Projekt Paulus

Denmark
Public Errors, Unlawful Interventions and Their Consequences for Citizens

2006-2025
Separate supplement up to 7 October 2026
Final revised report - Statistics

Ole Bakkestrøm
Project Manager, Projekt Paulus

7 October 2026

Ex officio et ex conscientia.

English translation. Figures retain source notation: 1.000 = 1,000; 1,5 = 1.5.
Danish quotations are translated; source identifiers and URLs are unchanged.

Contents

1. Main find, knowledge and count model 4

2. National control arrangements and police outcomes 11

3. Municipal complaints, outcomes and reassessment 38

4. Practical studies: children, family and historical findings 91

5. Employment, Supplies and Pensions 264

6. Handicap, equal treatment, environment and other practices 468

7. The boundaries of children's and disabled barometers 617

8. Children, Parents, Disabilities and Youth Crime Board 1005

9. Health, Compensation and Psychiatric coercion 1047

10. Personal data and historical surveillance series 1201

11. Taxes: outages, stocks and time 1217

12. Foreigners and asylum: verification and compliance 1260

13. EMD: judgments, complaints and different rightholders 1273

14. Enforcement of human rights judgments 1290

15. United Nations: control, complaints and knowledge 1293

16. CPT and UPR: repeated findings and reactions 1327

17. Copenhagen children's cases: errors and consequences 1345

18. Time of intervention, repatriation and temporary protection of children 1349

19. The case of instruction: separation, time and jurisdiction 1357

20. Tibet: rights, proof and responsibility 1361

21. Stateless: breach of the Convention and 14 years of civil review 1366

22. Mink: legal, management and staff actions 1370

23. Defence and intelligence: Green Desert and Samsam 1374

24. Greenland: self-determination, family ties and repair 1379

25. Commission, audit, liability time limits and evidence retention 1384

26. Legal basis and liability comparison 1517

27. Judicial review, detention and restoration 1531

28. Denmark's knowledge, positive commitments and actual responsibility 1800

29. Cross-cutting evidence and documented consequences 1808

30. Main conclusions and concrete requirements 1866

31. Literature and source list 1868

1. Main find, knowledge and count model

Overall documented report for 2006-2025

With separate addition to 7 October 2026. Prepared after ordering municipalities, police, civil servants, authorities and politicians, with special testing of families, children and persons with disabilities. Date of check: October 7, 2026.

1. Main conclusion and reading path

The report documents repeated breaches of the law in the exercise of public authority and actual loss of family contact, freedom, help, support, privacy and bodily self-determination. It also documents institutional knowledge of serious problems. The strongest criticism therefore follows the whole chain: what did they do? competent bodies by knowledge and when was the citizen's right actually protected or restored? [R03; L04; TFLAN23; TFLANISM26; ERVA01-ERVA02; GL sources]

A letter of criticism, a remittal or an administrative closure does not in itself prove that the citizen's loss ended. The Langeland case demonstrates this specifically: in May 2026 the Ministry required renewed scrutiny of lawfulness, redress and sanctions following earlier oversight. The authorities' organisational initiatives did not in themselves document lawful practice or actual correction of the affected cases. [TFLANISM26, physical PDF 14-16]

The absence of personal punishment does not exempt the State from responsibility. Protection, effective investigation, timely review and redress must be assessed independently. In 2023 the UN Committee against Torture criticised, among other things, the narrow focus of certain police complaint investigations on individual criminal culpability. ECtHR case-law shows that an almost symbolic sanction following serious ill-treatment may be inadequate. The legal analysis in chapter 28 connects these verified legal sources with the report's specific findings. [PFK02, points 40-41; PFK04, paragraphs 123-125]

The report identifies several mechanisms that may limit or prevent liability: illegal administrative exemption practices, limited personal financial liability, protection of certain reporting bases, explicit immunity from fines and actual obstacles after lengthy proceedings. The rule, scope and effect of each mechanism are shown. Public employment does not give an ordinary criminal immunity. At the same time, the specific derogation shall not be withheld. [PFK06-PFK10; Chapters 26 and 28]

Time is part of the loss of rights. Remittal for reconsideration, a new decision, actual return home, assistance delivered and payment each have their own date. A child may still lack contact after a favourable appeal decision. A patient may obtain a right to compensation without regaining their health. A citizen may obtain a finding in their favour and wait further for support. The specific courses show why correction must be followed from paper to effect. [Chapters 9, 18 and 27-29]

In the case of family interventions, both the beginning and the continuation must be tested. A later plan cannot prove that the required basis existed on the day of the decision. The loss of family ties caused by neglected reunification must not be used as a reason for adoption. [PFK11, paragraphs 205, 208 and 212; Chapters 18 and 28]

In the children's sector, Rigsrevisionen found at least one of the measured breaches of the law in 69 per cent of 3.148 selected children's first placement trajectories in 2022-2024. The study itself describes the proportion as a lower-bound estimate. These are documented breaches of the law in this sample; the figure alone does not determine the validity of each placement. The 2019 pilot barometer, by contrast, examined 228 cases not appealed. Complaint cases, samples of cases not appealed and different tests of safeguards must therefore each have their own denominator. [RRAN26, physical PDF 22-32 and 38-54; BBP19; BBP19M, physical PDF 5]

No unknown national total is needed to demand action in the already documented courses. All figures retain the source’s unit, denominator, exclusions and version. Several errors may affect the same person, and several oversight bodies may deal with the same case. The report maintains five linked accounts: oversight, errors, persons, consequences and responsibility/redress. They are not added together into one invented victim total.

The total legal test shall be: **conclusion → original proof → relevant duty → knowledge of the actor; and competence → action or omission → legal deviation → citizens' follow → responsibility → concrete requirements.** The statement of a authority or court shall be tested against its original basis. Repeated information is not a new independent evidence. State responsibility, personal guilt and international straitjacket have their own conditions.

Route of reading: Chapter 1 gives main findings and controlled figures. Chapter 2-27 contains the full documentation of the sectors. Chapter 28 analyses the state's knowledge, obligations and liability exemptions. Chapter 29 summarises the concrete consequences, evidence chains and cover accounts. Chapter 30 concludes with the main conclusion and priority requirements. Literature and sources are collected at the end of Chapter 31.

What the reader will follow	Documentation in the report
Children, family, disability and actual repatriation	Chapter 3-8 and 17-19; Greenlandic programme in Chapter 24.
Health, waiting time, complaints and compensation	Chapter 9; health protection during detention also in Chapter 27.
Police, detention and liability	Chapters 2, 20 and 27.
Offences, tax appeals, residence and compliance	Chapters 3, 5, 6, 11 and 12.
Information, policy instructions and management	Chapters 10 and 19-25.
International findings and Denmark's reaction	Chapter 13-16.
Knowledge, investigation, sanction and redress	Chapters 26 and 28-30.
Numerical boundaries and source and evidence chains	Chapters 1 and 29; full list of literature and sources in Chapter 31.

Main figures checked

Each block of numbers below describes its own population. They are entries to the documentation of the report; they are not summed up to one national error count.

• **The pilot study for the Children's Day Barometer in 2019 included 228 uncontested cases from 12 municipalities:** 115 on family treatment and 113 on housing, of which four without consent. Among the various samples there were 70 / 228 missing current studies or updates without legal exception, 64 / 100 deadlines for studies and 99 / 226 missing for pre-decision interviews. The various errors may relate to the same case. The pilot's exclusion of pending cases has been retained; the figures are not added to the complaint figures as a documented personal union. All main figures and municipal annexes are now original checked. [BBP19, main figures; BBP19M, PDF5; BBP19K, PDF4-20]

• **Langeland’s 2023 analysis and the Ministry’s 2026 statement document a specific chain from known errors to insufficient subsequent oversight.** In the municipally selected sample of 12 cases, seven raised doubts about sufficient assistance; in one placement, the action plan came 11 months after placement. On 29. May 2026, the Ministry instructed the Appeals Board to reconsider legality, redress and possible sanctions. The earlier closure of supervision and increased staffing therefore did not prove that the affected citizens’ rights had been restored. [TFLAN23, PDF23-33; TFLANISM26, PDF1-16]

• **Historical complaint statistics contain documented hidden or changed outcome categories.** Landsskatteretten's original 2011-2012 reports provide administrative outcomes for 2009-2012 with precise denominators and rounded percentages; the category »other« can also include an actual reduction. The statistics on vehicles for people with disabilities change scope in 2010 and revise earlier annual figures. The report retains each version and exclusion so that hidden successful claims are not recorded as zero and the same year's cases are not counted several times. [LSRH11-LSRH12;HB06-HB10]

• **69 per cent of 3.148 selected children’s first placement processes had at least one measured breach of law in 2022-2024.** Rigsrevisionen’s 2026 report describes the proportion as a lower-bound estimate: not all five requirements were examined for each child, and the measurement method counts, among other things, planned/cancelled interviews as held. The 3.148 are different children within the study’s sample; the percentages cannot be converted into exact error counts or a national error rate. Unfinished delays are absent from the completed-duration samples. [RRAN26,PDF22-32,38-54]

• **In a 2025 review of 75 referral trajectories from September 2024, 72 were delayed for capacity reasons; 26 of 71 assessable letters lacked sufficient information about free choice of hospital.** The national quarterly average in the same follow-up reached 162 diagnostic assessment days in the second quarter of 2025.

Registration changes require separate reconciliation. From 1. January 2026,new rights apply to new referrals; they do not retrospectively remedy the examined families' courses. [CPsy25,PDF4-10; PsyL25,§§1-2]

• **45.022 overturnings among 150.345 municipal social and employment appeals determined on the merits, 2018-2024.** These are appeal outcomes, not 45.022 different individuals or a count of all municipal errors. [A20,A21,A24]

• **77 children's cases in Copenhagen 2013- 2016 with criticised case handling.** The sub-studies have different denominators; the original 78 cases became 77 by one exclusion. [R03]

• **59 ECtHR judgment records and 57 case courses in 2006-2025.** The annual statistics record 25 judgment records finding violations; the specific joining of cases gives 24 distinct courses with a final finding of a violation. Savran's superseded Chamber judgment explains the difference. The 30 article/subcategory findings belong to the annual statistics. None of the figures is a count of unique victims. [EMD-årstabeller; HUDOC-regnskab]

• **265 UN decision documents concerning 263 communication numbers in 2006-2025.** They include 57 favourable Views on the merits concerning violations or forward-looking protection, 45 without an established violation, 74 pure inadmissibility decisions, 88 pure discontinuances and one mixed outcome. In the inadmissible CAT case F.K., a separate Article 22 violation was also found because Denmark carried out the removal despite interim measures. Main outcomes alone therefore do not exhaust the violation count; documents and communication numbers are not unique people either. [FN-individuelt register; CAT/C/70/D/743/2016, § 8.2 and § 10]

• **1.669 supervisory cases in 2018- 2024 investigated by Rigsrevisionen:** 1.114 rejected, 555 examined further. The four powers examined - annulment, periodic penalty payments, actions for damages and fines - were not used in the controlled material. [RR18 / 2024]

• **7.422 amendments and remittals for reconsideration among 22.927 admissible municipal complaints in 2025**, after the demarcation of the number portal. The self-calculated share 32,4 per cent uses the portal denominator; the 46,8 per cent of the Danish map has a different delimitation. [Kommunaltal2025]

• **The target for appeal processing was changed from 13 to 30 weeks; in 2025 the time was around 35 weeks.** The closure of the review in 2025 was based on earlier processing times below the new target. It documents neither fulfilment of the old target nor actual assistance and redress for citizens. An administrative average target, a statutory time limit and a Convention requirement must each be assessed under their own rule. [AT07, pp. 3-4; AT13, pp. 8-11]

• **12.949 conduct decisions and 354 decisions expressing criticism in the police years checked, 2006-2025.** Before and after 2012, criminal cases have different population definitions. Criticism, prosecution and conviction are separate outcomes. [Politiudfald2006-2025]

• **The product cycle will be longer in the controlled 2018- 2024 series.** Justitia/ The 2025 version of the Bar Society records 4.604 completed courses in 2018 and 2.940 in 2024; the average increased from 3,3 to 6,2 months. In 2024, 152 courses were dismissed for the main relationship and an average duration of 7,7 months. The State Advocate's March 2026 audit records 2.941 completed 2024 runs and is maintained as a separate version. Fewer registered endings do not in themselves document fewer different custodians. [Justitia2025, p.68,70,81,96-98; RA2024, marts2026]

• **354 women's accounts of 488 contraception incidents in the Greenland investigation**, covering the period 1960-1991 and knowledge/reparation in 2025-2026. This is a self-referred historical sample, not a national population measurement or 488 different women. The 2026 Act contains a specific exemption from fines for authorities and their employees for failure to provide information for the compensation case. The exemption applies to this duty and must not be rewritten as general impunity. [GL-K01-GL-K04]

• **A documented national registration gap for healthcare errors in Kriminalforsorgen.** The ministerial reply of 23. June 2025 states that Øst does not register and retain reports after handling them. Vest has manually counted 38 incidents from 1. April 2024 to 1. June 2025, including 35 medication deviations. 38 is neither a national total nor a number of distinct prisoners. The court statistics also have different outgoing-case denominators: 2024 states 141 decided cases, while the outcome categories sum to 148. [KFUTH25,pp.2-3;KF24,pp.54-56]

Examples of concrete consequences and times of responsibility

The report connects the statistics with legal rights: an error can mean lost assistance, income, privacy, contact or liberty. A remittal may leave a citizen facing further waiting time. A child may remain separated from their family after a favourable appeal decision. Individual consequences must be documented from the decision to actual redress; they do not disappear because a complaint case has been administratively closed.

The extended timelines include unlawful contact restrictions, actual return home, ministerial separations, Tibet, stateless persons, mink, Green Desert, Samsam and Greenlandic reparations. The cases also show why a favourable decision, an ordered residence card, an offer of compensation and an actually restored right must be registered as different steps. Following Statsløsekommissionen's criticism, the personnel cases of two central officials were closed without further steps; the later civil review lasted more than 14 years from filing proceedings to Højesteret's decision. In the Tibet track, two suspended criminal sentences were imposed in 2025, more than 13 years after the earliest intervention. These are specific accountability timelines, not a calculated general time limit for citizens' loss of rights. [SL-kilder;TB-kilder]

In an original pre-trial detention case, 408.000 kroner for 240 days beyond the sentence imposed was upheld only 673 calendar days after release. In the Suldrup case, the authorities' halving of compensation and lost earnings was set aside; the High Court concluded the case 875 days after a mother's acquittal and release. According to her court testimony, her two minor children moved back upon her release. Return, full entitlement to compensation, actual payment and restoration of work and health are different steps. A three-year-old boy's exclusion from a municipal musical playgroup was found to be unlawful discrimination after 961 calendar days; payment and restored access are not documented in the decision. [ERVA01-ERVA02; KEN9536/2021]

The comparison with private individuals also follows the actual judicial outcome. In the fully checked 2017 case concerning a mother and grandmother travelling with one child, the prosecution sought 2-3 months' immediate imprisonment, but both were acquitted in the district court and high court. The sentence sought therefore cannot be presented as a sentence imposed or a general sentencing tariff. Scrutiny of public interventions requires the same precision about conduct, legal authority, elements of the offence and culpability, together with separate consideration of the authority's duties of protection and redress. [PB01,pp.1-3;PB03,pp.3-5]

Another fully read combination of convictions shows an actual conviction: one mother's 37 days of evading one child resulted in 40 days of conditional imprisonment with 60 hours of community service. At the same time, the embedded decision on family law describes that the basis was lacking on the day of the administrative decision, but that a later created situation was given importance. The report shall keep separate records of each stage of time and of each body. The comparison documents a concrete private penalty; public liability requires independent review of the corresponding act, guilt and duration of action. [PU22, PDF1-6]

References in tables and arguments indicate the source of the statement. The coverage status below refers to the actual count and source reading.

Coverage status

This is an overall cross-cutting report with verified series, concrete studies, legal sources and explicit coverage gaps. It is **not a full record of all published Danish control reports or all errors for 20 years**. Such a complete register cannot be claimed from the sources actually controlled. Where a series or a denominator is missing, it is explicitly stated; missing years are never recorded as zero. The cover accounts make the difference verifiable.

This definition applies to the completeness of the census. It does not alter the controlled findings or their seriousness. The report uses the reported outcome of each included statistic, mentions and exclusions, and specifies exactly where original data are still required.

Glossary before documentation chapters

Concept or abbreviation	Meaning of the report
Ankestyrelsen / AS / AST	The Danish Complaints and Supervisory Authority; source codes can use different abbreviations.
BFU	Child welfare assessment. The report examines content, timing and the rule in force at the time.
VISO	The national knowledge and specialist consultancy organisation in the social and special education fields.
Task Force	A process of advice and development on local administration. A completed course does not in itself document the correction of each citizen's case.
Children's barometers	The Board of Appeal's study of selected requirements for municipal children's cases. Every year and every question has its own population.
Remittal for reconsideration	The Board of Appeal shall refer the matter back to the Board of Appeal for reconsideration. It's a different step than actual help or repatriation.
Return	The decision to cease placing and actual movement shall be recorded separately. The destination must be indicated; the termination of placement is not always a reunion with a parent.
Resumption	An earlier case is taken up again. This does not, on its own, indicate that the outcome changes or the loss is remedied.
EMRK	European Convention on Human Rights.
EMD	European Court of Human Rights. Complaints, judicial files, final proceedings and breaches of Articles shall be counted separately.
United Nations Committees	Convention committees with different mandates for control and complaints. Recommendations, substantive opinions and procedural decisions have separate status fields.
CRC / CRPD / CAT	The UN Children's Committee, the Disabled Committee and the Torture Committee; the abbreviations are also included in document numbers.
CPT	Committee of the Council of Europe for the Prevention of Torture. Visiting reports and government responses are different sources.
OPCAT	The optional protocol to the UN Convention on the Torture of Preventive Visits. The Danish national control system is a different system from the CPT.
UPR	The UN's periodic assessment of a country's human rights situation. Recommendations are not individual judgments finding violations.
R2P	Responsibility to Protect: responsibility for the protection of genocide, war crimes, ethnic cleansing and crimes against humanity.
PCN / SDN	The former Patient Complaints Board and the Disciplinary Board of the Health Service. Their statistics have different units and historical versions.
Patient insurance / Replacement	The compensation scheme under its historical and current name. Recognised damage is not automatically documented errors of a public servant.
UTH / DPSD	Adverse event / Danish Patient Safety Database. Reports, classifications and people are different units.
LSR	National Tax Tribunal. Administrative decisions, court outcomes and compensation statistics have their own denominators.
Source code and locator	A brief reference to the source and the specific location: e.g. table, section, physical PDFs page or printed page. Physical and printed page numbers may be different.
Version	The specific publication or revision from which a figure originates. Later referrals may change an earlier year.
Unique persons	Various identified rightholders after documented interconnection. The number of cases, decisions or events does not replace this count.

2. Period, sources and what is counted

2006-2025 is 20 completed calendar years. Publications from 2026 on decisions in 2025 belong to the 2025 series. Events from 2026 are shown as a supplement. Older events and sources of law may explain the later knowledge or legal state, but are not counted as new events during the period.

Public servants, authorities and politicians are different subjects of responsibility. Politicians aren't all employees. The region, the municipality or the state may be responsible even when personal criminal liability has not been determined. Statistics relating to a system of private and public treatment places shall not be renamed "statistics on errors of public servants'.

Concept	Importance of the report	Example of incorrect aggregation
Application / notification	Complaints or information received	Notification = proven infringement
Decision	One recorded outage	More decisions = same number of people
Overturning	Amendment/annulment or remittal	Overturning=one criminal removal
Process error	Absence of legal action	Each process error = new child
Deficiency of residence	Lack of legal basis	Any error = own home shortage
Lack of competence	Wrong decision-making body	Legal basis therefore exists, the decision of the actor was lawful
Convention infringement	Determined or legally analysed breach	All committee recommendations = infringement judgments
Liability	Conditions for performance and debts	Critified employee = convicted employee
Person concerned	Identifiable rightholder	One child = automatically two different parents

The historical pre-trial detention statistics contain documented breaks in methodology: manual reports were replaced by POLSAS/QlikView in the 2011-12 series; the 2017 series recalculated historical data; from 2021 the endpoint became actual release, and interrupted periods were split. The report retains 35 checked annual versions for 2010-2023 rather than adding overlapping retrospective accounts together. Earlier Qlik tables on section 768 a deadlines also used an incorrect endpoint. [LV11 pp. 2-5; LV15 p. 6; LV17 pp. 2-3; LV21 pp. 2 and 6]

The four original pages of the 2019 report document 16 cases in which the statutory submission to the public prosecutor prior to a prolonged extension of the custody was not forthcoming. This is a proven procedural lack. The number of persons concerned, the other basis of the order and the actual period of validity require each case. The 82 references made by the statement are a different registration and are not used as a common national denominator for the 16 shortcomings. The number of the corresponding 16-page annex has been incorporated with the express status of secondary reproduction; the original annexes have not yet been checked. [LV19, p. 1-4; separate annex account]

The isolation series contains precisely lit day numbers and specific children's programmes. The 19 historical records of children cannot be referred to as 19 different children without identity coupling. The original for 2019 provides a rare actual coupling: 15 runs involve 13 people. Such coupling shall not be generalised to other years. [ISO2006-2017; ISO2019, method / personal information]

Five linked financial statements

Oversight: intakes, samples and decisions. **Errors:** established deficiencies, critical outcomes, deficiencies in competence/legal authority and Convention findings. **Persons:** distinct children, parents, patients and other rights holders. **Consequences:** the intervention’s actual duration, loss and the start of assistance. **Responsibility and redress:** punishment, employment-related response, cessation, reunification, repayment and compensation. The accounts are linked; they are not added together into one quantity.

A national aggregate requires case and person coupling between the accounts. Without coupling, sectoral amounts are given. Complaints, samples, judgments, notifications and children shall not be merged into a single total.

Name account for each publication

The verification requested for omitted cases shall include:

1. The population the report claims to describe and the actual sampling.
2. Number of cases sought / submitted and sorted out for reasons.
3. Already pending, lapsed / rejected cases and reassessments.
4. Number of cases examined per theme; different themes may have different denominators.
5. Findings, formal errors in confirmed cases and several errors in the same case.
6. Time, field of law, instance and version revisions.
7. Overlap with other publications, years or populations.

If one report counts the entire register and another counts a sample from it, they must not be added together. If the practice study excludes cases actually appealed, it can shed light on errors outside the complaint statistics. This does not, however, make every sample automatically additive: overlap, case year and unit must be checked. [V19]

The national appeal statistics from 2006 and 2012 provide a specific denominator example. The 2006 version reports 6.393 overturnings as 23 per cent of all 28.043 closures; using 24.915 cases determined on the merits as the denominator, the own calculation is 25,7 per cent. By contrast, the 2012 version’s 8.202 overturnings use 32.066 cases determined on the merits as the denominator. From 2007, a municipal amendment during an appeal may fall within the combined dismissed/discontinued category; this code therefore does not document that all such municipal decisions remained unchanged. The full tables, printed percentage versions and codes appear in chapter 3 with original references.

Where overlap is known, the union is **A+B−overlap**. A verified example is the Senior Pension Unit 2024: 287 overturnings and 170 cases with formal errors; 51 of the cases with errors are upheld. This gives 338 cases with an overturning or a formal error, not 457. [SP24]

In case of unknown overlap, an interval may only be used if A and B actually count the same type of unit. Minimum = max (A, B), maximum = A + B is a clean quantity limit; it is not an estimate of the true error population. Complaints and persons cannot be included in the same formula.

Reproducibility and source hierarchy

Statistical rows have a year, unit, numerator, denominator, sample and source. The original table locator is given when it has been checked. Known internally conflicting figures are retained with a choice of version or a separate note. A guessed figure is not inserted merely because it would make the table reconcile.

An original judgment, legislative text or control report has a different function of proof than a press summary or the reproduction of a later committee. A control report shall document the findings and method of the check; it shall not constitute an independent review of all the underlying original documents. Therefore, formulations such as the "report records" are used when this is what is actually documented.

For decisive claims, the chain is used **original source → concrete locator → defined statement → own calculation or legal conclusion;**. The authorities' own statements about corrections are sources of reaction. Compliance requires subsequent documentation.

2. National control arrangements and police outcomes

Control per. 7 October 2026. Public sources; no private case database. The Annex contains compact fact sheets and independent method assessments. Figures have the specified source / version status; an annual archive alone is not referred to as an annual series. Financial year 2025 and publication in 2026 are shown separately. The Matrix also refers to actually reviewed extension modules; it is not alleged that all public cases have been registered.

Coverage accounts

Zone	Actual verified number content	Missing for a full 20-year count of errors, affected and responsibility;
Local authorities / practicalities	National 2006 / 2012 originals: 13 tables 262 rows; national 2007-2011 versions; Talportal 2014-2025; 2013 transitions three originals actually read. Installation practice 2006 / 08 / 09 and inclusion / relocation 2011 all 63 / 73 / 94 / 107 / 65 pages with full reading tables in the special modules	Exact national full-year outcomes for 2013 do not appear in the transitional documents read. UDK 2021: all 90 pages have been fully reviewed. The 21 specifically allocated remaining main-report/annex items are complete; foster family 2014 parts 1/2/4+summary, all 108 pages, and FKU 2012, all 20 pages, have also been checked. The main original for BarnetsReform 2012, foster placement moves 2014 part 3 and FKU 2012 annex 1 have still not been obtained after documented searches. Person/reconsideration/redress linkage is required
The practice of the Regional Board before 2013	Central Jutland cash-assistance suspension 2012: all 17 main tables and 42 municipal rows;80 cases,76 hypothetical amendments/remittals. See regionale-naevn-midtjylland-kontanthjaelp2012.md	Other regional originals are the procurement / inventory scope; specifically controlled further courses are in the special modules; already complained / investigated excluded, no national error / person sum or actual refund series
Placed / children / h andicap	End 2006-2025, current implementations 2011-2025 and historical AS 2010 all 56 pages / 18 tables 325 rows. Actual 2007-10 start-ups 3693 / 3502 / 3254 / 2864; child disability 2022-2025	Malfunctions for child / parents and actual repatriation require personal connection; 3253 termination 2010 includes 18 years of cessation also with continued surveillance. Search flocks / places are not number of children or physical co-location
Ombudsman	Completed cases and criticisms 2006-2025, all 20 years	A case's criticism may relate to several errors / persons; proven errors of other control bodies overlap
Police	Actual annual decision outcomes 2006-2025,with degrees of criticism, criminal-case decisions and the 2012 transition; see politi-udfald-2006-2025.md/.json. Separate disciplinary accounting included	Connecting to unique employees / citizens and final judgment, discipline, compensation and restoration in the same event
Patient Replacement	Claims 2006-2025 and separate treatment/drug/person versions; annual originals 2006-2010 expanded with 77 tables, 712 factual rows and public/private/regional breakdown in three patient-insurance modules	Original 2011 / 12 full-year documents not obtained after documented archive / ODA / official trials; exact 2011 treatment denominator / drug 2012 not constructed from percentages. Recognition is not automatically employed culpa; actual payment / personal union requires separate coupling
Patient complaints / TV	Critical / marketing year and version break in special modules; PKS 2006 all 27 pages / 36 tables 328 rows; SDN 2011 all 34 pages official text, same 2437 outcomes. PPKN 2011- 2025, anchor board 2014- 2025 and selected regional predecessor years. UTH20 years; 2007 / 2012Part 1 and 2012Part 2 / learning annexes now materially controlled, Part 2 / learning Annex 531 factorial rows	The outstanding originals for 2009/2013DPSD and certain predecessor years for patient complaints/coercion are documented materials still to be obtained. UTH, patient complaints and coercion have their own denominators; public/private, the union of employees/patients and actual harm/cessation/redress require separate evidence
Data Protection Agency	All 2006- 2025 annual report's registered activity targets; 2018- 2025 also the 385 annual administrative report's table cells, time targets and version deviations. 16 supervisory groups, 19 public fines, 3 appeals and 11 original judgments controlled. See Data Protection -2006- 2017- extension.md and Data Protection -2018- 2025- expansion.md	Journals, complaints, breakup reviews, criticisms and judgments have different denominators. Historical critical percentage decision denominator, full sanction / person register and actual payment / restoration require additional register data; public / private and duplicates are kept separately
Rigsrevisionen	Annual audit main / ministerial / follow-up series 2006-2025 materially controlled; historical thematic and concrete critical events in the national audit years- historia.md and rrr-concrete-impact and tables.md. The 17 residue tables 2018- 2021: 86 rows / 165 numerical cells text / visually controlled in the National Audit -2018- 2021-remaining -annual tables .md. Report 11 / 2025 on placement published 2026: all 54 + 4 + 7 original pages, 80 factual rows and 84 municipal rows. See National Audit Posts 2026.md	The main annual series and 17 specified annual tables are completed; other criticism/methodology figures for 2006-2017 and remaining special reports/follow-ups are specific remaining gaps. A catalogue of 796 entries is not a content check. No national error/person total; individual redress/responsibility requires linkage

Zone	Actual verified number content	Missing for a full 20-year count of errors, affected and responsibility;
Children's baro meter and task force	Pilot 2019:all 42+6+20 pages, 228 cases not appealed; 2020-24:all 2059 municipality-annex rows and case-type annexes; disability barometers in their own modules. Central Task Force list of 43 processes:28 have checked analysis/status content, 15 lack such an obtained original. Five other schemes separately; all currently obtained main/annex originals in named modules have been read	28 checked sequences are not 28 sequences with all phases or proved reparation. Original pages/phases not obtained and the exact routes tried are listed in the 43 reconciliation. The 2019 pilot's previous 404 gap is closed. Exclusion, union of people and actual redress are separate register/record requirements
Honey.	All 2014- 2025 original five-actor outcomes; historical LSR 2006 s 31 tables 146 rows as well as administrative 2009-12 / Domases 2009- 12 with 26 tables 154 rows. 2007 management / warranty source 31 pages; 2013 financial original 16 pages read, no administrative matrix in it	Administrative 2007/08/2013 and court outcomes 2007/08 have still not been obtained after the routes tried. Rounded percentages do not give exact favourable-finding cells; union of people, actual repayment/interest and responsibility require case linkage
Aliens	Udlændingenævnet 2013- 2025: precise outages 2013-2021 and rounded percentages 2022- 2025; original 2006-2025 series of the Refugee Board for core decisions, resumption and time; Dublin 2014- 2025	Remaining delimited decision categories, children / age assessment, deductibility, actual stay and reunion. See the separate denominator modules
Judicial review	Den Særlige Klageret's original outcomes 2020-2025; 2013-2020 historical register account in original legal literature, clearly separated; specific reopening and accountability trajectories. See domstolskontrol-og-genoptagelsesregnskab.md	Historical original register 2006-2019, personal coupling, new convictions and restoration; resumption is not in itself an acquittal or judicial liability
Preservation, isolation and children	Actual pre-trial detention tables and versions; all annual solitary-confinement originals for 2006-2024 including children/time and the 2019 figures of 15 processes/13 people; interferences with liberty for under-15s and specific cessation processes. See isolation-originaler-boern-tid-og-versioner.md and the pre-trial detention/children modules	2025-isolation original, event-based deduplication and individual cessation / replacement. Isolation numbers do not automatically count illegal orders; penalty cells and other contact restrictions are other populations
Equal treatment	Actual 2018- 2025 series; all exit categories 2020- 2025 and concrete public events. See equaltreatment- fallout -reduction- and -restation.md	Previous years and other early years; classification public / private, actual reimbursement and deduced persons
Environment and level	Actual outcome of the appeal and procedural times with its own arrangements and transition years. See environment-plan-fallout-time and-limits.	Older predecessor register, actual physical compliance and linking incidents/people; remittal does not prove pollution has ceased
Defence and intelligence	TET: all 34 annual public reports 2014- 2025, 651 factorial rows; FE / PET / CFCS and disaggregated skills. Concrete Green Desert, Samsam and the annual audit defense findings. See the text-material-control account.md and the special modules	TET did not exist 2006-2013; it is not zero series. Confidential primary control certificates, total individual interventions and actual deletion / repair are not fully public. System controls are not persons
EMD, UN, CPT and UPR	EMD59 case files / 57 proceedings; FN265 period decisions + 5 in 2026; CPTsex visits / responses; UPR 2011 / 16 / 21 all 620 recommendations. 2026UPRandre 265 numbers and all 67 pages in four-ground originals controlled	Written UPR2026Add 1 not obtained after 6 routes; 174 supported / 91 recorded meeting statements in explicitly automatic FNprintout. Individual recommendation acceptance / compliance, cross-case personal union and actual repair shall not be derived from document numbers;
Politicians, ministers and commissions	Rigsret (Court of Impeachment), Mink, Tibet, Statsløse, Green Desert and other specifically document-verified time/accountability trajectories in the separate modules	No total national register for all acts involving liability; liability, discipline, penalties and actual compensation must continue to be separated

Own methodological conclusion: Denmark has several parallel layers of oversight, but their counts measure different events. A total of all complaints, overturnings, compensation awards, UTH and data breaches would both count unexamined allegations as established errors and count the same person and act several times. The documented counts must still be included within their own scope: incompatible categories must not be removed, but presented as separate counting layers.

1. Folketingets Ombudsmand - actually 20-year series

Unit: closed file, not citizens or all public decisions. Criticism means the total category of the source of criticism / recommendation / recommendation, etc. Before 2015, the category was rejected wider; from 2015, different treatment / help and formal refusals are distinguished. Criticism is therefore not a national error rate. The source also includes other institutions under the authority and outside the authority. The Court of Justice, private law and cases not investigated constitute a loss of selectivity. Annual archives.

Year	Criticism	Without criticism	Other aid (from 2015)	Rejected	Completed	PDF page with total
2006	217	629	-	3105	3951	30

2025	98	821	5019	1187	7125	Annual Web Table

2010- 2012 outside criticism is own subtraction of reality-treated minus criticism: 875 − 137; 1001 − 153; 686 − 83. The others are directly tabular cells. The source's raw PDF's are not saved. Verified direct primary URLs:

- 2006, 2007, 2008, 2009.
- 2010, 2011, 2012, 2013, 2014.
- 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022.
- 2023 webtable, 2024 web table, 2025 web table.

2025 authority scope: State 70 criticism/3687 cases; municipality-region 24/1912; others within jurisdiction 4/161; outside 464; unspecified institution 901. The municipality-region total does not give the number of citizens affected by errors. 2025 annual review, pp.72-74 tables. The archive also contains cases of principle and supervision requiring separate case coding for error type/consequence/responsibility.

2. Police - Entry and Trial

2006-2011, former Public Prosecutor's Scheme

Year	Conduct	Criminal proceedings	Of which traffic	Of which death / serious damage § 1020a (2)	Total Entry
2006	405	584	277	20	989
2007	457	566	214	21	1023
2008	447	534	231	14	981
2009	424	629	290	12	1053
2010	407	564	228	12	971
2011	415	515	230	14	930

Unit: created cases. Traffic and Section 1020 (a) (2) are subsets of criminal proceedings; they do not have to be added again. Complaints / notifications are not found to be illegality. State Advocate General's 2011 Report, Table 1 prints.130 Institution breach 1 / 1 / 2012; older cases pending are dealt with separately in the DUP.

2012- 2025, Independent Policy Office

Year	Criminal proceedings	Traffic	§ 1020a (2) studies;	Conduct	Completed Table B
2012	435	430	21	726	1250
2013	433	446	16	652	1614
2014	496	456	11	651	1584
2015	466	480	21	509	1369
2016	464	547	26	508	1556
2017	426	769	17	464	1539
2018	446	717	20	610	1709
2019	484	901	14	711	2131
2020	526	939	15	788	2142
2021	449	758	11	876	2242
2022	481	775	15	1031	2145
2023	541	786	13	984	2183
2024	562	851	11	1016	2472
2025	602	863	20	1258	2388

The first four columns have been created; the last have been completed across the vintage year and including traffic note cases. Traffic and serious injury investigations are independent categories from 2012. No number is the number of convicted employees. 2012 closure includes 245 public prosecutor's cases; the table Cuden transitional cases gives 1005, not 1250. 2023 annual report, Table A / Bs.9-10; 2025 annual report, Table A / Bs.10-11 2025 total entry 4240 includes 307 ac-insights + 1190 others; real four categories 2743. These 1497 administrative / other cases may not be counted as further complaints about breaches of the law.

2024 behavioural outcomes: 1112 endings = 163 nots + 44 revoked + 50 temptations + 39 baseless + 690 none-critique + 3 regrettable + 26 inappropriate + 36 critical + 9 meget- critical able + 0 special-sense-critical + 52 other.

Criticism in the three degrees of criticism 45; other negative descriptions 29 must be separate. Penal proceedings 542 closed; 9 on the basis of indictment / fines / discontinuance / warning; this is not a case-law statistic. 2024 annual report, Table 4 prints.123 and Table 8 prints.128.

2025 time measurement:553 criminal cases; 221 from completed investigation→State Prosecutor took 286 days at DUP+55 at the State Prosecutor=341; 332 summarily dismissed/discontinued took 48 days; all 553 averaged 165 days. Traffic:569 closures, of which 323 forwarded:145+38=183 days. Source:2025 annual report table C. Different courses and denominators; no overall completion time for the citizen's court/disciplinary case is documented here.

3. Patienterstatningen - Annual Entry and Replacement

Unit: notified treatment providers/cases. A patient may have several cases. Notifications are not evidence of error. Acceptance is not automatically individual culpa either: the specialist rule, equipment, another method and the reasonableness rule have different conditions. Amounts awarded are not numbers of patients. All private treatment must be separated out when counting public responsibility.

Year	Treatment notification ed	Medicinal product notification ed	Overall, how separate published	Source Block
2006	4861	255	5116*	P1
2007	5416	338	5754*	P1

2025	16621	1238	17859	P4 / P5

* Own addition, not source cells. No uniform 20 years revised version is available. 2011 P 1 introduction says 8375 against table addition 8372; the report warns provisional 2011 figures. 2024 annual report / statistics 2025 version said 14752 against 2026 version 14743; the difference must be as revision, not further cases. 2021 earlier extract 12404 against last 12402. No different versions are added together.

• P1 2006–2011 analysis, table 1/3/20, PDF pp.10/13/46. Treatment findings in favour 1482,1488,1506,2379,2518,2712; medicinal-product findings in favour 57,61,94,144,106,68. Medicinal-product decisions 321,243,264,404,425,352. Public

Hospital reports 4029,4366,4262,4724,5587,5965.2012- 2015 prognosis tables should not be used as observed figures.

• P2 Administrative 2017 annual report, Table 4 PDFs.10. Cases of the full year include treatment / medicines. 2017 reviews 9483 treatment + 908 medicine. 2017 times 186 day decision + 242 day count; the average values of the two phases cannot be summed up without cohort control to each patient's waiting time.

• P3 2020 annual report, Table 4 PDFs.13.2020 decision time 215 days, inventory time 215 days; part has aconto. The 2020 report describes the resumption of almost 16000 decisions in 8744 cases following Supreme Court judgment 4 / 12 / 2020 on interest rate calculation, PDFs.7-8. These are decisions and cases, not 16000 unique patients.

• P4 Treatment injuries 2025,27/5/2026 version, tables 1/2/3/4, PDF pp.3-7.2021-2025 decisions 9761,9456,12152,12680,13913; successful claims 2370,2067,2791,2810,3482. Public somatic hospital notifications 7170,7285,7763,7939,9098; accepted claims 1822,1557,1995,1994,1974.2025 successful claims under the specialist rule 2470 incl. psychiatry; successful claims under the reasonableness rule 922. Private insurance cases are included; home nursing/home care is public+private. Dentists enter in 2024; coverage extensions in 2016/2018 create breaks in the series.

• P5 Drug Injuries 2025,27/5/2026 version, table 1/3/4 PDF pp.2-4.2021-2025 decisions 1128,1611,1859,1580,1149; favourable findings 418,361,382,250,225.2025 awarded 62,87 million kroner; treatment+drugs 961,82 million kroner.7647 are compensation assessment decisions, not 7647 recognised patients.

Supplementary actual person-count check 2013-2017:7993,8572,8189,8562,8113 people, compared with 9312,10300,9707,10189,9464 treatment claims in this 2017 version's table 1. Treatment annual report 2017,PDF p. 12. The Faroe Islands' 16 claims in 2017 are excluded here; private insurance cases are included. Version/scope differs from the 2017 administrative annual report and later revised extracts; the person series must not be used as an automatic conversion factor for other years. Psychiatry coded by specialty name and treatment facility; adverse effects of psychiatric medication in another report.

4. The Data Protection Agency - public sector can be separated in 2025

Year	GDPRK Break Notifications	Complaints 2021-25
2018	2722	-
2019	7242	-
2020	8773	-
2021	8554	2237
2022	8816	1817
2023	9537	1767
2024	9624	1777
2025	9849	3128

2025 breaches: public sector 5167, private sector 4630, other 52=9849; breaches under the Law Enforcement Act excluded. 2025 complaints: public sector 1040, private sector 2080, other 8=3128. A notification is not an adjudicated finding of unlawfulness; several notifications may concern the same incident, and one may concern many people. Supervision counts 2021-25:512,513,504,518,525. 2025 annual review, PDF pp.26/38-39; 2025 annual report, table 3 A, PDF p.8. Annual archive 2006-2025 found. The specific statistical measures for 2006-2017 have now been verified against the originals in all 12 annual reviews; datatilsyn-2006-2017-udvidelse.md documents 7.944 new public-sector inquiry/complaint cases and 315 new public-sector supervision cases. New cases are not necessarily closed cases, and supervision cases are not a count of visits. Full national consequences for individuals and uniform denominators for criticism are still not quantified.

Whistleblower 2025 received 282:97 public sector/185 private sector; 273 closed, including 89 forwarded, of which 3 to the police. Forwarding is not a judgment or an established breach of official duty. 2024 received 186:73 public sector/113 private sector. Source: whistleblower section of the 2025 annual review. AULA decisions 2024are a specific public-institution source on risk assessment that must be coded separately by case for orders issued and affected individuals.

5. Rigsrevisionen - the impact of supervision and the loss of citizens' time;

Fact card R 1: Ankestyrelsen’s supervision,18/2024,2/6/2025, fig. 5, table 1/B/C, printed pp.16/26/36-37.2018-24 closed 1669=1114 declined+555 investigated. Annual totals 61,121,116,197,180,540,454; investigated 25,24,11,40,50,221,184. Children 750=552 declined+198 investigated; adults 919=562 declined+357 investigated.154 withdrawn/discontinued/forwarded are excluded from 1669. Response table 545 after merging:475 without a response,70 advisory opinions(80 registered cases, including4 advance opinions);0 annulment/coercive fine/compensation action/penalty. Cases investigated in 2023/24 took~1 year; all closed cases over 245 days 34%/25%. Follow-up measured on 498 selected closures,10%; not all 1669. Time analysis 1578/524 after date exclusions. **Source error:** table C adults-declined 2024 shows 191 but 202 total and 101 investigated; sum 191+101=292. Fig. 5 shows 270 declined overall;169 children+191 adults=360. Visual verification on 6/10/2026 confirms 191 on PDF page 44/printed p.37; the verification image was deleted after reading. No cell has been silently corrected.

Own criticism: the response and follow-up figures document a weak enforcement link in this particular population. An established error and a municipal assurance of subsequent correction are not evidence of actual restoration of the benefit, family relationship or rights of the citizen. Zero use of these four reactions is not proof that no employees were sanctioned by other means; that investigation is missing. The poor quality assessment by the National Audit Office rather than conscious decisions is an institutional assessment, no individual accountability and no exemption from liability.

Fact card R2: Child psychiatry, 10/2023,19/2/2024, annex 1/figures, printed methodology p. 31 ff. Register:42252 referral processes Q3/2019-Q1/2022 minus 1759 without a completion marker=40493; one patient may have several. More than 27000 processes exceeded 30 days in 2019-2022; average 76→115 days. Sample 382; 52% missing assessment plan, 63% missing information on extended choice; sub-denominators 260/252. Suspension 18/3-1/9/2020 requires separate delimitation. Three regions’ first meeting was systematically registered as a completed assessment. This documents measurement error, not merely waiting time. Further details in personstatistik.md; more than 27000 must not be called unique children.

Fact sheet R 3: Specialised palliative care, 17/2024,12/5/2025, summary/waiting-time figures. 7600 starts in 2023; typically 20 days against 24 in 2019.79% against the quality target of 90% within 10 days; Central Denmark 92%,Capital 65%,Zealand 72%.81% of cancer patients/70% with other diseases received the intervention before becoming too ill/dying. Quality targets are not automatically statutory time limits. Own analysis of consequences: delayed relief cannot be restored after death; a subsequent administrative correction does not replace the lost relief.

Rigsrevisionen's audit case archive contains many more sector studies. The number of reports or monetary amounts of financial errors must not be converted into a number of violations of citizens' rights. 2025 annual reportrecords 20 major studies; this means 20 studies, not 20 instances of unlawfulness.

6. Other Health Service Controls

STPK history: STPK in figures 2023 PDF, historical 2015-2021 tables. Pending at year end 5221,4603,4872,6406,9129,8211,6539; closed through dialogue 484,513,520,453,304,705,918.2017-2021 disciplinary outcomes: no criticism 75,3/85,0/83,2/78,6/79,2%; criticism 22,9/14,3/15,5/20,1/19,0%; aggravated criticism 1,9/0,7/1,3/1,2/1,8%. Criticism of treatment facilities 31,3/31,8/34,6/33,1/29,5%. Refusals to reopen are excluded; dental complaints from 1/6/2019 are included. Rounded percentages without a verified common denominator must not be converted into exact counts. Public+private are included; the oversight body was established in 2018; the predecessor originals actually obtained and the remaining gaps are specified in sundhedsaar-serier.md, patientklager2006-originalkontrol-og-naevnerkritik.md and disciplinarnaevn2011-originale-udfald-og-bevismangler.md. Current figures dashboard PowerBI 2020-2025 has not been fully read.

UTH fact sheet: Danish Patient Safety Database 2024,count/event/consequence tables. 489361 reports=127850 individual+361511 reported in aggregates. Aggregate reports:municipalities 354190,other regional 3799,hospital 2269,private 1253. Individual reports:medication 60463,care 13806,handover/information/records 13401. Patients/relatives 2887 reports. 6010 potentially fatal incidents are not 6010 deaths. Actually fatal category:municipal 0,5%,hospital 0,6%,other regional 0,4%,private 0,1%; percentages are rounded. Registered/closed/anonymised population, not unique patients, judgments or all incidents. The aggregate-reporting scheme changes in 2024; revision on reopening/deletion is possible. The 2025 transfer of tasks requires reconciliation.

Own criticism: UTH is important knowledge of actual risk / damage, which should neither be mixed with legally established breach of duty nor removed because the system is used for learning. An injury may occur iUTH, patient complaint and damages case

At the same time. The statement of liability shall link the incident with specific duty, action, damage and consequences for the responsible staff member.

7. Taxation and Aliens Control

Tax 2025: Figures from Skatteankestyrelsen 2025, table 3/4 PDF pp.8-9.10577 decisions/closures=2746 wholly/partly favourable findings+253 remitted+4606 upheld+235 made more adverse+698 other+2039 closed before the appeal body. Administrative closures without/with only limited consideration are excluded. 2021-2025 overall average months 17,4/17,5/18,6/13,9/13,0; National Tax Tribunal 29,7/32,9/31,4/28,0/24,6. Time excludes earlier periods on hold, including pending criminal/court proceedings. The Annual archive 2014–2025 has now been used to check the outcome tables in all 12 original reports. skatteklager-udfald-og-tid-2014-2025.md/.json contains 129.099 recorded decisions/closures and 35.759 wholly/partly favourable findings in five actors' series; these are case entries, not unique individuals. Historical administrative 2006/2009-2012 and court 2006/2009-2012 outcomes have subsequently been checked in the separate LSR modules. Administrative 2007/2008/2013 and court 2007/2008 outcomes have not been obtained after documented searches; reading the specified tables is not a declaration of full reading of the other content of each annual report. Own consequence analysis: a favourable finding may correct the tax; it does not automatically show full repayment/interest/losses from compulsory collection or punishment of employees.

Immigration 2025: Udlændingenævnet's annual statistics, cases concerning individuals.4134 incoming,3759 outgoing including those without a substantive decision,2402 pending at year-end; closed cases 192 days, age of pending cases 136 days. 'Cases concerning individuals' is not a documented national unique-person count or a count of unlawfulness. Annual archive 2013–2025 has now been used to verify all 13 years' measures against originals: udlaendingenaevn-udfald-og-tid-2013-2025.md/.json provides precise outcomes for 2013-2021 and the originals' rounded outcome percentages for 2022-2025. No exact counts are calculated from the rounded percentages. flygtningenaevn-udfald-og-personer-2006-2025.md/.json supplements this with core decisions, reopening decisions and time in all 20 originals, plus Dublin 2014-2025. Bounded other categories and actual redress are identified as specific outstanding items. Family separation, residence without rights or removal must be linked to decisions examined on the merits and actual effects, not merely incoming cases.

8. Documented facts, deficiencies and priority studies

Reproducible own sums of the annex's rows: Ombudsman 2006-2025 has 102.833 closed registered cases, including 2.794 in the criticism/recommendation/advice category. The previous police system 2006-2011 has 2.555 conduct cases and 3.392 criminal cases including traffic/serious injury. DUP 2012-2025 has 10.784 conduct cases,6.811 criminal cases,9.718 traffic cases and 231 serious injury investigations. GDPR breaches 2018-2025 total 65.117 notifications,2018 under a new legal regime. The patient table's mixed-version rows total 206.138 notifications; this is **a reproduction of precisely the selected source tables, not a uniform 20-year register total**. None of these sums is a count of illegalities, unique injured people or responsible employees. Machine-readable figures: kontrolserier.json. Sundhedsansvar.md supplements this with adverse coercion outcomes and separately formally unlawful approvals.

Documented: the control bodies detect negative decision outcomes, criticism, errors in registration, overcrowding of patients' rights and inadequate follow-up in specific, demarcated populations. The figures in the tables are neither a total of all Danish errors nor a basis for automatic acquittal of institutions / persons without registered criticism.

Not proven by these totals: all placements unlawful; all remittals invalid interventions; all patient injuries disciplinary offences; the same person's number of annual cohorts; a corresponding count of two parents per child; specific employees' intent; a national number of criminal breaches of official duty. Each hypothesis requires the case's primary material and specific application of the legal rule to the facts.
Required public data tracks:

1. Complaint / practice investigation-case-ID, initial authority / year, error type, result, person-ID and status of excluded - already pending.

2. Date of intervention, remittal/annulment, fresh municipal decision, actual effect/return home, further appeal and full duration.

3. Public / private actor and damage in health / data sources; unique affected persons and families across registers.

4. indictment, indictment, final judgment, disciplinary criticism, warning, sentence in the service, dismissal, compensation / recompense and management, with joint event ID.

5. All other annual reports / tables 2006-2025 and international inspections, conclusions and implementation.

The strongest sustainable statistical criticisms are the documented errors / negative outcomes in each population studied; then documented continued duration and weak follow-up; then lack of public interconnection to recovery and responsibility. A legal conclusion on the legal basis, EMRK, international law and specific legal order require separate legal annexes.

Controlled sums and their units

Restricted series	Calculated sum	What the summation means
The Ombudsman closed cases 2006-2025	102.833	Cases over 20 years of age; no person's delusion
The Ombudsman's criticism / recommendations 2006-2025	2.794	Source Critical Group; No National Illegality Rate
Politicikslager 2006-2011, behaviour	2.555	Cases set up in previous arrangements
Policy warehouse 2006-2011, criminal law	3.392	Including traffic and serious injury studies
DUP 2012- 2025, behaviour	10.784	Cases opened; separate category
DUP 2012-2025, criminal cases	6.811	Separate from traffic / studies in the new scheme
DUP 2012-2025, traffic	9.718	Cases set up; no court or person-total
DUP 2012- 2025, serious injury studies	231	Investigation entry; unproven number of police crimes
Police Disciplinary Summaries 2006-2025	1.454	Number of items; several items may relate to the same case / staff, several employees may be in one item
Patient reviews 2006-2025, shown version rows	206.138	Pure reproduction of mixed versions; non homogeneous error / person total

The sum is checked against the compact annual rows of control series.json. They can be deduced from the tables of this chapter and from the police outcome module. They shall not be merged across schemes, populations and entities. Complaints, placement status, interventions and EMDs shall each have their separate votes in the following chapters.

The actual outcome of the police complaint 2006-2025

Controlled October 7, 2026. All 20 years have been read in original fallout tables. The units are decision-making, not citizens or employees.

Year	Conduct settled	Criticism	Conviction / appropriate term	Punishment decided.	Testimony g	Transport Dedicated / indicted Basis	Indentation Dedicated / indicted Basis
2006	379	7	7	527	173	246 / 162	subset; see delimitation

2024	1112	45	29	542	9	589 / 27	16 / 0
2025	1152	26	40	554	10	569 / 26	9 / 0

Behaviour 2006-2011: 2,588 decisions, 44 critical decisions. Behaviour 2012- 2025: 10,361 decisions, 310 critical decisions. Grand total: 12,949 decisions and 354 critical decisions. The sum is reproducible in JSON; they include 2012 transitional cases and are not unique persons.

Limitation and documented deviations

• 2006-2011 criminal proceedings include traffic and § 1020 a cases; they stand separately from 2012. 2009 source inconsistency: traffic 278 in Table 5 c, 277 in Table 4.

• 2012 outage includes 245 transitional cases concluded by the public prosecutor under the old regime: 106 punishments 25 traffic 3 emergency 111 behavior. Not extra entry cases. Critical 25 includes 9 from old regime; indictment 15 includes 8.

• Table 5 2012- 2015 includes the police director's traffic decisions, while Table 3 shows them separately. From 2016 Table 5 excludes guidance cases. Do not wait for Table 5 and orientation in 2012-2015.

• 2025 complaint -country count 4, circle 2; visually original controlled. Soft category 40 = 4 + 36; national sum 1152 follows the printed country totals.

• Criticism, indictment, judgment and disciplinary action are different outcomes. A case may relate to several employees; persons / employees / violations cannot be summed up from here.

• Table 5 on the basis of a rapid response is the subject of old criminal proceedings; any overlap in behaviour and subsequent reopening require file keys.

Control tracks

JSON contains all national categories in the controlled behavioral and criminal tables, including denominators and original URL / page references. Traffic and rapid reaction have been kept separate. The historical and recent criminal populations are not harmonised by an unjustified total.

Residual work

Annual actual judgments, acquitments, disciplinary measures, dispositions and full-time series are separate control tasks. They cannot be replaced by this series of events.

Police disciplinary action: reaction, delay and consequences of the citizen

All 18 annual public summaries 2008-2025 are checked for their numbered items and decision outcomes. This complements the 20-year policy outcomes; the two populations must not be merged. The summaries shall also cover matters outside the service and internal employment relationships. Therefore, they do not constitute a statistic of government violations against citizens alone. The original summaries are read in memory; the local annex contains its own categories, numbers and precise locators.

Annual accounts with an explicit counting unit

A row below counts **numbered summary items;**. An item may include several staff members and several different penalties; several items may belong to the same case. An employee can walk again between years. The figure is thus neither the number of unique cases, the number of employees, the number of convictions, nor the number of citizens. Own categorisation shows the primary stated outcome. Others include dematerialisation, transfer, suspension, management treatment, medical termination, self-termination and mixed penalties. The end category is a process category; it does not express an overall assessment of the legality of the action.

Year	Items	Warning	Reprimand	Essential fine	Abort	Completion	Other
2008	42	8	11	10	4	8	1
2009	42	9	11	10	3	9	0
2010	61	15	6	17	7	14	2
2011	93	39	12	27	1	14	0
2012	43	13	5	13	7	5	0
2013	54	20	10	11	4	6	3
2014	77	17	13	21	7	13	6
2015	79	14	19	18	9	18	1
2016	79	20	12	15	11	21	0
2017	97	11	28	25	6	25	2
2018	62	10	12	11	8	20	1
2019	99	15	27	18	8	28	3
2020	82	21	14	27	10	10	0
2021	77	36	6	27	5	3	0
2022	83	35	12	24	8	4	0
2023	70	38	8	15	6	2	1
2024	102	61	10	16	7	6	2
2025	88	42	13	12	12	6	3
Sum 2008-2025	1330	424	229	317	123	212	25

Votes: All primary categories sum up to the year's items. The category breakdown is the report's own and can be derived from the summary ID and physical page of the compact annex. It's not a new official statistics from the State Police. The reasons for the reaction and any temporary or previous reactions must be checked in each original before a specific person is concluded liable to the criminal or civil action.

Joint and joint positions: 2014 No. 18 includes two employees: one reprimand and one fine of DKK 1.000; the post is in others and counted once. 2013 No 45 contains both transfer and fine and is primarily a transfer. 2013 No 33 includes several employees in one fine post. 2015 numbers 53 and 54 have a common description and two numbered items. 2016 Nos 4 / 5 and 55 / 56 and 2017 Nos 52 / 53 and 67 / 68 are the same case with several numbered employees. A sum of postal numbers should therefore not be referred to as "unique cases'.

Departure on health grounds and resignation: 2014 nos. 46/56, 2017 no. 65 and 2018 no. 47 are separately coded as health-related. They are not included as disciplinary dismissals. 2024 no. 59 ends with the person's own resignation after a recommendation for dismissal; the recommendation is not an actual dismissal by the authority. 2011 no. 2 was initially put on hold for two years, but the summary reports subsequent closure; it is therefore not a case still pending on hold. These corrections prevent an inflated count of actual disciplinary penalties.

When the time of the proceedings weakens responsibility

PD01 - An almost four-year delay reduced the reaction. 2011 No 61, physical page 12-13, describes an arrest report for possible detention of 45- 50 detainees. The Attorney General and the Attorney General criticised the lack of care; criminal proceedings were suspended. The State police announced reprimand and indicated the almost four-year delay as mitigating because it could not be blamed on the employee. It's a proven effect on the sanction. The summary does not document how many of the 45-50 were actually imprisoned on the basis of the report. Therefore, they should not all be registered as proven victims of illegal imprisonment. The specific requirement is full control of the original report, each freedom decision and responsibility for the delay.

PD02 - One year of delay removed disciplinary proceedings. 2014 No 32, physical page 9, refers to a detained rape victim who was left unguarded. The recommendation was received only after a year. The National Police did not start disciplinary proceedings, although it also described the conduct as totally unacceptable and suitable for disciplinary treatment. This shows that an established control requirement may be eliminated during the use of the liability system itself. The documented consequence is the absence of disciplinary action; actual evidence or subsequent damage has not been proven in the summary. The requirement is responsible for the delay in reporting and checking of possible civil consequences.

Concrete citizens' consequences and different responsibilities

PD03 - Individual with Parkinson’s found only after more than 42 hours. 2015 no. 21, physical page 7, states that an individual called after a bicycle accident in a forest and explained that he could not get up by himself. No rescue effort was initiated. He was later found in a ditch. DUP criticised the conduct and found the action particularly regrettable; the National Police’s response was a warning. The authority’s specific knowledge of helplessness and the absence of a rescue effort must be examined under ECHR Articles 2 and 3 and the duties of service. The summary documents the time spent there and the response, but no final Convention judgment or compensation payment. The demand is examination of the emergency call recording, report, rescue process, harm and subsequent review; a warning does not replace these investigations.

PD04 - A private conflict over a child was supported by police. 2011 no. 65/66/75, physical pages 13-16, describes a police officer who directly summoned colleagues and removed a child shared with the mother from her while the patrol was present. Prosecution under § 155 ended in acquittal; the temporary transfer was revoked, and all three employment-related avenues were closed without disciplinary proceedings, with formal staff interviews. The summary’s account of an unjustified advantage is not in itself evidence of every criminal-law conduct element: the original judgment, the basis of parental responsibility and the child’s actual whereabouts are missing from this summary. Nor does the acquittal for abuse of office document an examination of all the child’s and mother’s rights. The demand is independent verification of this basis against the documents and actual reunification. The case illustrates the need to distinguish State responsibility, family law, criminal law and employment-related responses.

PD05 - The same course can accommodate punishment and an additional service response. 2017 No 64, physical page 16, indicates six unjustified entries in the register of the staff member's mother's road traffic criminal proceedings. The criminal penalty imposed under Section 155 was

3.500 DKK; the disciplinary fine was 1.000 DKK. It is one employee with two responsibilities, not two employees or two citizens' violations. The source demonstrates that the service does not generally exempt from punishment. At the same time, it is necessary to check who the information concerned and whether it was transmitted before a comparison with the intrusion of a private person into a system can be made.

PD06 - The public's defence and the response of the employees were different. 2016 No. 55 / 56, physical page 20-21, describes two officers' private taxis and subsequent arrest of the driver after the conflict of payment. The driver was sentenced in the city court to 30 days in prison, but the national court dismissed the action on the basis of the defence. The State police closed the two disciplinary proceedings without prosecution and requested the service. This is a concrete combination of actual outcomes in the same event. It does not document a private person's final sentence in 30 days: that sentence was amended. The original sentences, the actual detention and possible compensation are the necessary next evidence.

Legal follow-up and precise comparison

There is no general criminal immunity for case handlers or police. Clauses 155- 157 of the Criminal Code on abuse of service and negligence on duty are precisely separate means of liability. The specific difference is, among other things, the legal basis for intervention which the service may have, the payment of civil compensation by the authority and access to the response of the service. A private person does not have the authority of a municipality or police; in the case of deprivation of liberty, removal of child, violence or unwarranted access, the relevant general criminal provisions shall be tested with the same precision as regards action, guilt and cause. Penalties in Chapter 26 cannot be treated as actually measured penalties in these summaries.

The clearest documented criticism is that the Authority's own delay in PD01-02 became concrete for liability, while PD03 shows over 42 hours with the helpless citizen as the directly affected. No overall police total answers whether a citizen was helped, stopped the procedure or repaired. A liability system must therefore compare the date of the event, the time of the authority's knowledge, reporting, complaint, final sanction, actual restoration and damage. It cannot simply register the closed case.

Sources and necessary further information

• PD 2008: Rigspolitiet's disciplinary case summary 2008, 11 physical pages; entries 1-42. Decision sections and marked specific cases have been checked; summary ID and page in the compact annex.

• PD 2009: National Police Disciplinary Case Summary 2009, 11 physical pages; items 1 -42. The decision section and selected concrete steps are checked; summary ID and page in the compact annex.

• PD 2010: National Police Disciplinary Case Summary 2010, 15 physical pages; items 1 -61. The decision section and selected concrete steps are checked; summary ID and page in the compact annex.

• PD 2024: National Police Disciplinary Case Summary 2024, 30 physical pages; items 1 -102. The decision section and selected concrete steps are checked; summary ID and page in the compact annex.

• PD 2025: National Police Disciplinary Case Summary 2025, 27 physical pages; items 1 -88. The decision section and selected concrete steps are checked; summary ID and page in the compact annex.

The 2006-2007 annual summaries have now been found as public document copies at KRIM and full text in RAM. The following original control module adds 85 and 39 entries and extends the postal series to 1.454 for 2006-2025. The 2007 categories are consistent with report 1507 / 2009; binary identity with a government-hosted copy and the full service register require separate checks. For all years, case / employee linkage is also required between the DUP, the public prosecutor, the judgment and the staff decision and the actual termination, damage and repair of the citizen. The anonymisation of the summaries and the different entities prevent a documented national personal union. This is a specific lack of data; it does not downgrade the above verified trajectories.

Police disciplinary proceedings 2006-2007: the summaries found and the chain of responsibility;

The two previously missing annual summaries have been recovered as publicly available document copies held by KRIM. The entire 2006 summary's 17 pages and the entire 2007 summary's 10 pages have been read directly as text in memory. The 2007 pages 6-8 were reread after a truncated tool display. Physical pages 11/14 in 2006 and 8/10 in 2007 were also visually checked. No copies of the originals have been saved. The annual series below is the report's own categorisation; the compact verification annex contains each entry's number, physical page and primary outcome. The document copies' binary identity with a version hosted by an authority has not been verified. For 2007, the five active outcome categories and the total agree with report 1507/2009, printed page 97. This is a specific external reconciliation, not a full authenticity check of each case summary. [PD2006K; PD2007K; PDB1507]

Two years added to the postal accounts

Year / population	Numbered e items	Warning	Reprieve a	Essential fine	Disciplinary farewell	Completion	Other / mix ed
2006	85	13	15	25	9	12	11
2007	39	16	6	9	1	6	1
Sum 2006-2007	124	29	21	34	10	18	12
Previously controlled subseries 2008-2025	1.330	424	229	317	123	212	25
Total postal series 2006-2025	**1.454**	**453**	**250**	**351**	**133**	**230**	**37**

All year categories summer to the numbered postal series. The census shall cover both duties, private relations and internal employment. It is therefore not a national enumeration of illegal government interventions or victims. A criminal fine and a subsequent fine for the same staff member shall not constitute two posts. Temporary

the suspension is also not an additional final sanction. Termination may follow acquittal, self-termination or other grounds; it may not be translated without control into impunity for a proven crime.

Other outcomes in 2006 include four alcohol-related processes put on hold for two years, cases on hold during leave, transfers and combinations of fines and transfers. Entries 16 and 17 each combine a disciplinary fine of 1.000 kroner with removal from the custody officer function; entry 59 combines 1.500 kroner with a transfer. These three disciplinary fines therefore fall within the mixed category and are not absent from the source. They may be included in a separate count of all response components, but not added to the entry total. A recommendation for dismissal is not a completed dismissal, and voluntary resignation followed by closure of the case is not coded as a disciplinary dismissal by the authority.

Documented links between entries: 2006 nos. 11 and 73 concern the same police officer in different matters. Nos. 26 and 27 describe violent use of force and further degrading treatment of an arrested person respectively. No. 70 contains two employees and two detainees in one numbered entry. 2007 nos. 18/19 give identical descriptions of sleeping guard staff, and nos. 28/29 identical descriptions of a fatal shooting incident. The latter similarities must be linked through original case numbers before forming a union of cases or persons. Neither two distinct people killed nor two distinct incidents may be inferred solely from two entry numbers.

Reporting, suspension and termination have its own counting unit

The summary of the report of the 2007 Review shows the following:

Measure	2006	2007	Limitation
Notified cases	77	46	New alerts; not completed in the year
Suspended police officers	5	9	Person reaction during the process; not an additional final decision
Decisions in 2007	-	39	1 farewell, 1 other work, 9 fines, 6 reprimands, 16 warnings; the active categories sum up to 33
Completed numbered items in the read summaries	85	39	2006 also includes previously reported circumstances; the difference 85 / 77 is not a source error alone

The six 2007 entries without an active final response explain the difference between 39 and the 33 active categories in the copy read. The 46 reports must not be added to the 39 final entries to make 85 cases. The annual cohort, pending caseload, reopening and links to individuals are necessary for a proper account of case trajectories. [PDB1507, printed 96-97]

Monitoring of follow-up: three omitted cases and an unknown reaction chain

The report describes that at that time no systematic statistics were produced which coupled criticism or regret of the police's treatment of citizens with the subsequent staff decision. The declared view of the National Police that criticism should have a service consequence is a specified standard and not evidence of actual follow-up in each case.

A separate study covered 55 cases: 20 conduct complaints with criticism, 14 conduct complaints with an expression of regret without grounds for criticism, and 21 criminal cases without grounds for charges but with criticism or regret. There were a further three known cases involving criticism/regret that the study excluded: two cases concerning legal officers under the Ministry of Justice’s disciplinary jurisdiction and one case that the Director of Public Prosecutions had remitted and that had not yet been finally decided. The relevant known pool is therefore **55 examined plus 3 excluded = 58**. It is not a new national total and must not be added to the disciplinary series.

Outcome in the selected study,	Share declared	Names and meanings
Disciplinary reaction	31 %	55 cases examined; no exact integer indicated here
Confidential conversation	38 %	The same 55; conversation is not a criminal offence
One of the above	69 %	Informed amount of the volumes; not 69% of all policy stocks
No disciplinary response and no conversation known to the State Police.	31 %	Lack of known conversation is not proof that no local conversation took place

Outcome in the selected study,	Share declared	Names and meanings
Outcome of the investigation	3 cases	Two legal-officer cases and one pending remittal; must not disappear from the denominator

An employee in the police reserve employed under a collective agreement was not covered by the Civil Servants Act's disciplinary rules, but received a written warning. This employment distinction is not general criminal immunity. The specific criticism is the absence of a documented, complete chain from the citizen's successful complaint to accountability and redress, together with the omission of three already known cases from the follow-up study. The specific demand is for the full linkage between case records and personnel in the 58 cases, separate final outcomes for the excluded cases and information about citizens' harm, cessation and reparation. [PDB1507, printed 97-98 with both footnotes]

Specific interventions and consequences

PDH01 - Interview reports attributed to the wrong interviewer

2006 No. 15, physical page 5, describes three reports which a superior had prepared, but asked an aspirant to sign and introduce into POLAS, so that the reports appeared as the interview of the aspirant. The public prosecutor suspended the prosecution under Section 155 / 157, but criticised the procedure; the fine was DKK 800. It documents a specific problem in the origin of the evidence and the knowledge of the authority. This does not in itself prove that the content of the statements was false or that three citizens were convicted on the reports. The requirement is the original reports, sound or simultaneous notes, signatures, amending logs and the decisions in which the reports took effect. The legal difference must be derived from the incorrect source of evidence, evidence and result; liability cannot be closed by the fine imposed on the staff decision alone.

PDH02 - Handcuffs, foot on neck and denied toilet

2006 nos. 26-27, physical page 7, describes the use of force against a handcuffed person on the ground and further degrading treatment, including toilet conditions. Statsadvokaten assessed the use of force as unnecessary, questionable from a safety perspective and humiliating; no criminal prosecution was brought, while the fine was 800 kr. The additional matter resulted in a reprimand. The source supports specific criticism of treatment and use of force. ECHR Article 3 must be examined on the basis of the original sequence of events, intensity, duration, harm, necessity and subsequent investigation; the summary is not a final Convention judgment. The demand is for the grounds for arrest, use-of-force reports, medical records, witnesses and the entire investigation/complaint chain, together with individual reparation. The two entries do not provide a basis for automatically counting two different victims. [PD2006K]

PDH03 - A private conflict led to unwarranted arrest

2007 no. 31, physical page 8, describes showing police identification during a private argument without an official reason, unjustified arrest and an attempt to restrain the arrested person. The State Prosecutor and the Director of Public Prosecutions criticised the conduct; the National Police’s disciplinary fine was 800 kr. This is a directly documented example of an official position being used in a private conflict. The duration of the interference with liberty, the reasons for the penalty decision and a compensation decision are not given. Comparison with a private person must therefore start from the actual arrest and be assessed against the conduct and culpability elements of the provisions on deprivation of liberty; abuse of office has its additional avenue of public responsibility. A specific prison sentence for a private person cannot be invented. The demand is for the original course of the arrest, examination of legal authority, the investigation decision and actual compensation. [PD2007K; R05-R06]

PDH04 - Violence review was not received and dog bit without sufficient warning

2007 no. 11, physical pages 4-5, describes dismissive and rude treatment of an individual who wanted to report a violent assault; the individual left without the report being registered. The disciplinary fine was 800 kroner. No. 9, physical page 4, concerns a dog bite without sufficient justification and warning, likewise with a disciplinary fine of 800 kroner. The first matter requires examination of the authority’s received knowledge of violence, the duty to register and investigate, and the consequences of the missing reporting process; the second requires examination of the decision to use force, the necessary warning, injury and treatment. Positive duties to protect and investigate under ECHR Articles 2/3 must be applied according to the specific risk and treatment, rather than solely according to the heading of a disciplinary entry. The summaries state no overall assessment of harm or actual reparation. [PD2007K]

Actual punishment and professional response: the same staff member may receive both

Source / item	Penal outcome specified in: the summary;	Final service reaction	Control Point
2006 No 52, PDF11	The District Court's suspended sentence of 3 months changed to 40 days of immediate imprisonment in the High Court	Abort	Unjustified record information passed on to private investigator; not three months final penalty
2006 No 54, PDF11	6 months of urban law changed to 8 months unconditional	Abort	Fictitious confiscation statements in return for payment
2006 nr. 55, PDF11	10 days conditional change to 10 daily penalty payments of DKK 250 = DKK 2.500.	Transfer to other place of employment	The final penalty is fines; previous prison sentences must not stand as final
2006 No 56, PDF11-12	25 daily fines of 400 DKK = 10.000 DKK after § 157	Reprimand	Discipline in diet gave an inmate access to two cell phones
2006 No 59, PDF12	Greenlandic fine changed from DKK 6.000 to DKK 4.000.	1.500 DKK and transfer	Departure is not actually parting; separate Greenlandic legal basis
2006 No 71, PDF14-15	4 months conditional change to 60 days unconditional	Own-fund closure	Threats against former spouse / witness; own resignation must not conceal the criminal sentence
2006 No 72, PDF15	10 daily penalty payments of 250 DKK = 2.500 DKK.	500 kr.	Violence against two school pupils; two described injured persons in one post
2006 No 73, PDF15	2 daily fines of 300 DKK = 600 DKK.	800 kr.	Entry into the former spouse's house; same staff member as No 11
2007 No 6, PDF3	10 daily penalty payments of 400 DKK = 4.000 DKK.	Warning	Abuse of records by office staff; not an additional person for each track of responsibility
2007 No 8, PDF3-4	20 daily fines of 500 DKK = 10.000 DKK.	1.000 kr.	Disclosure and disclosure of previous partners
2007 No 27, PDF7	Greenlandic district court measure of 40 days changed to acquittal in the High Court	Own-fund closure	The first-instance outcome is not a final conviction

The table shows the outcome of the summaries; the original judgments are necessary for full control of grounds, guilt and final legal qualification. Penalties are stronger than a general claim of impunity: they show concrete prison sentences, fines and additional service reactions. They do not answer whether the citizen was compensated or whether all the elements responsible were tested. The response track of the Civil Service Tribunal and the financial responsibility of the Authority must therefore be conducted in parallel with the criminal justice track. [PD2006K; PD2007K]

Dismissed the application must be checked locally: 2006 No 70, physical page 14, describes the tape of the head and mouth of two arrears during transport, but indicates the city's acquittal and disciplinary proceedings closed. 2007 No 28 / 29, physical page 7-8, also indicates the acquittal in the described shooting. These summaries may justify the examination of the actual and human rights foundations of the events; they may not be reproduced as criminal convictions. Nor is it proof that each action and every positive commitment were independently examined.

The original headlines are not certain classification: 2006 No 57 describes private discothetics violence under a section on service, while No 70's arrest transport is outside the service. The report's assessment follows the action described, not just the organisational heading. A final service / private record requires the original work and incident information.

Time and responsibility

2006 entries 32/33 refer to the course of the case as mitigating without stating a precise duration. 2007 entry 35,physical page 9,concerns a fine of 400 kroner for street disorder; the disciplinary case was concluded only two years later with a reprimand. This documents the interval and response, but does not on its own establish how much of the response's leniency was due to delay. The later PD01/PD02 processes already checked document more directly that almost four years' delay reduced the response, and that a recommendation delayed by one year meant no disciplinary case was opened.

The specific demand is a dual account of time: the citizen's period of harm or continuing intervention and the authority's period up to investigation, accountability and actual reparation. A disciplinary fine, a closed case or a remittal provides no end date for the consequences for the citizen. The new 2006-2007 sources close the gap in entries for those years; the public anonymised summaries do not close the national gap in links between individuals, judgments and compensation.

All 124 postlocators and their own exit categories

The table makes the postal count reproducible. It reproduces its own categories and locators, not the originals' case-making.

Complaints about conduct: findings in favour, hidden timing errors and discontinuation of publication

Complaints about police operational decisions concern police actions and omissions within and outside criminal proceedings. They are a different population from DUP's conduct cases and criminal cases. The three original reports for 2018-2020 show both overturnings and already acknowledged errors that do not appear as a new overturning. The current statistics page states that joint annual publication has ceased; 2021-2025 must not be set to 0. [DKL01-04]

Populations and expressly omitted complaints

The reports omit DUP behavioral complaints, traditional decisions under the law on dogs and weapons, are subject to compensation for victims, the prosecution's own actions, and Greenland and the Faroe Islands. However, bans on zones and restaurants shall be included in the overall review. 2020 adds four subject words to change the categories from 8 to 12 in the Police Board's statement. An subject category is no unique case. [DKL01-03, delimitation section]

The 2018 original refers to 210 complaints as both received and decided in 2018.2019's original footnote 1 describes 2018 as incoming cases and 2019 as decided cases, and expressly says that some cases appear in both years. Both source formulations are retained;210+246 therefore does not represent 456 unique complaint cases. In addition, 2018 has no comprehensive register of police districts' first-instance decisions not appealed. [DKL01,p.2;DKL02,p.2,note1]

Year and instance	Population	Criticism / overturned	Partial	None criticism / not circumcised	Meaning
2018, Senior Authorities, Mixed Agencies	210	12	10	188	No homogeneous comparison with 2019's separate first / second-stage series
2019, Policy Court First Instance	1.660	281	99	1.280	380 findings in favour; approx. 23%
2019, overall second instance	133	18	3	112	21 overturnings; approx. 16%
2019, State Police First Instance	13	5	0	8	Claims over 50.000 DKK; criticism is not proof of actual payment
2020, Policy Court First Instance	1.553	238	93	1.222	331 findings in favour; approx. 21%
2020, overall second instance	103	8	6	89	14 overturnings; approx. 14%
2020, State police first instance	10	1	4	5	5 findings in favour;50%

The overall 2019 figure is 246=133 second instance+113 first instance; first instance 113=13 National Police+100 Regional Public Prosecutor. The 2020 figure is 227=103+124; first instance 124=10+114. The last 100/114 are complaints about time, with a special outcome model shown below. None of these instance totals deduplicates people or cases across instances. [DKL02,pp.5-9;DKL03,pp.5-9]

Poor handling time may be in the category of "consensus"

Year	Attorney General n s time complaints	New critique	New partial criticism	Enigma i setting	Already lamented by the agree	Overall acknowledged too long
2018	35 in mixed category	2 overturnings	1 part	32 not reversed	11 cases after note of the table; person / point overlap not shown	No total unique counter provided
2019	100	10	8	82	55 of 82	73 of 100 = 73%
2020	114	Not divided into new criticisms in the original	Not allocated	19 out of a long time	A large proportion of 95 were already recognized; precise numbers not provided	95 of 114, about 83%

The year 2019's 73 is thus 18 new critic outcomes + 55 already regretted. Using 18 alone removes 55 documented negative time outages from the accounts. It is a specific delimitation error, not a general estimate of the Authority's behaviour. 2020 also mentions citizens who, for the second time, complain about waiting time in the same case; therefore, annual occurrences are not unique. 2018's 11 should be included as separate control information, but without case ID point overlap cannot be clarified. [DKL01, p.3, note; DKL02, p.9-10; DKL03, p.8-12]

All category cells in the original tables and figures

2018's empty cells are shown as "-" and are kept in the register as unprinted cells, not as independent find of 0. The printed outflows 12 + 10 + 188 = 210 votes. [DKL01, p.3]

2018- category	Complaints	Reversed	Partial	Uncircumcised
Investigation	47	1	-	46
Intervention by the police	19	-	2	17

Restoration ban	-	-	0	0	0
Zone prohibition	-	-	3	0	0
Duration of proceedings in criminal proceedings	-	-	-	-	114

2019: figure 1 totals 1.681 category instances, but only 1.660 cases; 21 are assigned to two categories. Figure 3 gives 386 against 380 findings in the party's favour; 6 are assigned to two categories. 2020: similarly 1.590 against 1.553,37 assigned to two categories; 336 against 331 findings in the party's favour, 5 assigned to two categories. Time categories in the police districts' figures may also appear in the higher authorities' figure 7. "-" means that the category does not appear in that figure and must not be added to a national zero series. [DKL02,pp. 4-5; DKL03,pp. 4-5]

Specific interventions, loss and redress

Source and progress	Original documented error / reaction	Time and actual follow	Responsibilities and precise requirements
2018, Annex 2, Summary 2, p.7	The police returned the rental car to the company without any basis for acquiring it. The district did not criticise; the public prosecutor overturned and criticised.	The citizen lost access to the car; duration and compensation not disclosed.	Original seizure, civil-law basis for control, return date and loss must be linked; a finding in favour alone does not show redress.
2018 Summary 10, p.11	Personal data review May 2016; only investigating May 2017. The district rejected unreasonable time; the public prosecutor regretted one year of inactivity.	Complaint February 2018; expected indictment March 2018 is an expectation, not actual decision.	Requirements for effective investigation / decision date, limitation effect and proven loss.
2018, resu mé12 -13, p.12	Unmarked ground clearance at the control tent with bus damage: The National Police recognised responsibility. Separate deposit 31.000 kr for driver: The DA demanded 1.000 kr back; 30.000 for driver and 55.000 for business were retained.	Recognition/repayment decision; payment and timing not documented.	These amounts are the amount of the decision; 85.000 kr retained is not a proven unlawful collection.
2019, p.10	3 of 4 zone bans overturned; 2 following a District Court judgment concerning the absence of a camp, followed by a change of practice. In 11 complaints to the National Police concerning cars, 4 full+1 partial overturning due to insufficient hearing of the parties.	Illegal process and actual availability / movement interventions must follow the specific cases. The source found parking grounds in the car cases.	Party consultation errors document the specific process deviation; it does not automatically make each original parking basis non-existent.
2020, Annex 3, Summary 5, p.27	The police brought minors from private homes without re-assessment of the situation; the circle criticised this and the State Police confirmed it.	Actual pick-up; number of children, separation time, new legal basis and return not disclosed. Critics of pick-up must not disappear during the outcome "confirmed." Window replacement was rejected as not causally demonstrated.	Requirements for initial action basis, each decision during the course, contact and actual return of the child (s) and separate assessment of responsibilities.
2020 summary 6, p.27-28	Detention 08.42- 17.00 without offer of adequate care: regretted in the circle and confirmed.	8 hours 18 minutes is the own calculation of the stated time; later the clothing point was rejected and is not counted as proven clothing error.	The deviation in food provision is documented in the oversight chain; it must be examined independently in relation to dignity and, where relevant, Article 3 according to its specific severity.
2020, summary 13, p.31	Stolen car mistakenly unregistered as stolen after lodging license plates. The district had no criticism; the district attorney overturned.	The start of June 2018 → end of October 2018, about five months without proper registration. Exact dates and affected recovery not disclosed.	The investigation and property consequences of the error require original registrations; no replacement / discipline is shown.
2020, summary 14, p.31-32	Guilty fraud reported end September 2019, short investigation October, then wait; complaint June 2020, five reminders. The DA regretted time and unanswered requests and demanded information.	No actual start of investigation or end date shall be reported after the inspection decision.	Information requirements are a response; subsequent compliance, loss of the citizen and individual non-compliance shall be documented.
2020, p.11 and summary 16, p.32	Four first-instance cases concerning compensation after the courts set aside area bans: partial compensation under ECHR Article 13+TP4 Article 2+EAL section 26. One summary concerning a homeless citizen illustrates the group.	Amounts, prohibition days and actual payment not published here. The summary is not a fifth case.	Claims for all four original prohibitions, signatures, time, amount of decision and payment; at the same time, the private criminal comparison requires individual judicial review.

Conclusion: An affirmance can preserve an error already established, and a new alteration/remittal rate can omit 55 of 73 adverse timing outcomes. **Authority's statement:** The majority are described as agreement or no new alteration/remittal. **Original evidence:**2019's reconciliation of timing and 2020's specific collection of a child. **Deficiency:** The outcome code alone describes neither the entire error nor redress for the citizen. **Rule:** Requirements of statutory authority, proportionality, fact-finding and relevant ECHR protection. **Action:** The citizen is subjected to an intervention or awaits action by the authority while oversight is closed with an aggregate code. **Departure:** Omitting adverse partial results already established produces an incorrect account of errors; the specific departure from a right must be proved separately. **Consequence:** Continuing loss of liberty,

family/control relationship or access to investigation may persist after the review decision. **Responsibility:** The original authority and subsequent oversight/follow-up chain, and individuals according to specific duty and culpability. **Demand:** A de-identified process register must preserve all complaint points and original adverse outcomes, link instances and show actual cessation, return home, payment and personnel response.

Ethnicity complaints: the zero in the review is geographically and institutionally limited

The overall authorities of 2018 did not identify any such complaints. 2019 identified Copenhagen Police 3 passport control cases without criticism and without subsequent complaint, while Østjylland had 1 note case; overall register had none. 2020 had Copenhagen 3 and Western Region 1, all without criticism and subsequent complaint; overall register again none. A national wording on "no complaints' would thus remove the four known districts in each of 2019 and 2020. These are complaints, not four proven breaches of discrimination or different persons across years. [DKL01, p.3-4; DKL02, p.11; DKL03, p.12-13]

Fewer complaints after notifications do not prove fewer material rights violations. A conversation can end a record trail without any real test. Whether the registration provides sufficient guidance and effective redress to the citizen must be investigated against original request and termination; the reports do not publish the necessary data. The missing years 2006-2017 and 2021-2025 require the unidentified extracts of the National Police and Public Prosecutors, with first-time / repeated complaints and outcomes at each point. Observed total annual publication is documented; terminated underlying registration cannot be deduced from this.

3. Municipal complaints, outcomes and reassessment

Date of inspection: 6 October 2026. Contribution to the overall report. All figures below have been verified in named official primary publications. The statistical classification of the documents is reproduced; it does not constitute an independent review of each decision. The sub-contribution does not contain a complete 20-year year series.

1. The count that can be made

A complaint case, a decision altered or remitted, an established error, an unlawful intervention and an affected person are different units. Altered/remitted = altered/annulled + remitted. Remittal rejects the existing basis for the decision and requires reconsideration; the reason and final outcome must be coded separately. An affirmed case may also contain criticised formal errors. Alteration/remittal statistics therefore do not record all errors.

Local social and employment complaints

Decision year	Stated	Modified / oph Edible	Remitted	Reversed, calculated	Reality beh duck, name;	Overturning % published	Source
2017	18.460	3.198	4.724	7.922	26.282	30	A17
2018	18.644	3.736	4.440	8.176	26.820	30	A20
2019	16.209	3.407	4.404	7.811	24.020	33	A21
2020	16.692	2.741	4.163	6.904	23.596	29	A21
2021	15.538	2.130	3.350	5.480	21.018	26	A21
2022	12.838	2.045	3.506	5.551	18.389	30	A24
2023	13.504	2.034	3.659	5.693	19.197	30	A24
2024	11.898	1.472	3.935	5.407	17.305	31	A24

Selection: settled, substantive appeals against municipal decisions. Rejected and cancelled cases shall be omitted from the denominator. Decisions by the local authorities without a complaint Ankestyrelsen, not included. Cases modified by municipal reassessment must be examined separately and cannot be assessed in this series.

Adding 2018-2024 gives **45.022 overturned appeal cases among 150.345 appeal cases considered on the merits**. These are events distributed by decision year; person identification or deduplication of recurring courses is not documented. The sum is not a count of unique citizens, original decisions or unlawful interventions. 2017 is added separately if the scope then used is accepted as comparable; it provides a further 7.922 overturnings.

Source version: A20 indicates for 2020 16.690 confirmed and mentions 23.594; A21 indicates 16.692 and 23.596. This is where the later A21 version is used. The surrounding counter is in both 6.904. The A24 data retrieval is dated 11 April 2025 and indicates the possibility of post-registration.

Legislative areas in 2024: sub-quantities not to be added to the main series

Legal area	Amended/annulled	Remitted	Reversed	Reality-treated
Services Act	150	1.352	1.502	3.287
The law of the child	341	1.258	1.599	3.609
The Act on Assets	476	670	1.146	5.116
Sick day money law	345	356	701	3.227

Source: A24 Table 4.4, printed page 27. The child's law entered into force in 2024: the new division must be maintained in comparison.

2. Denmark map: 2024-2025

Decision year	Map area	Amended / repealed %	Remitted %	%	Absolute denominator verified here
2024	Social area	7,1	37,8	44,9	No
2025	Social area	6,2	40,6	46,8	No
2024	Child disability	7,6	41,3	48,9	No
2025	Child disability	10,6	48,0	58,6	No
2024	Adult disability	4,5	35,9	40,4	No
2025	Adult disability	1,8	41,5	43,3	No

Sources: D25S, D25B, D25V, published June 23, 2026. Percentages without absolute denominator cannot be converted into numbers at rounded percentages only. 2025 is the year of decision, 2026 is the year of publication; it is not 2026 cases.

The sub-areas of the social card overlap fully with the social card: adult and child handicapped cards are subsets. The adult card only covers sections 95, 96, 97 and 100 of the service law. The children's card includes special disability provisions in the child's law; these are not all child cases or all placement. Forced placement cannot be deduced from this map.

Specific source deviation: D25B also indicates 41,1% confirmed in 2025. 41,1 + 10,6 + 48,0 = 99,7. This cannot be explained by normal rounding to one decimal alone. The figure must be clarified in raw data; here there is no guessed correction.

Activity and persons next to the cards

The maps use activity data from 2024 alongside complaint outcomes for 2025. The number of benefit recipients is not the number of decisions. A person appears several times under different sections, but only once per section; activity cells with fewer than five recipients in a municipality are excluded/not displayed. Municipalities with joint reporting are excluded from some maps. D25S states that Tårnby, Dragør, Fredensborg, Fanø and Lyngby-Taarbæk are excluded from the activity count, while D25V states Tårnby and Dragør. This is exclusion from activity data and must not be described as exclusion from complaint figures without checking. Source: D26L pages 2-3 and the maps' notes.

3. Errors outside the complaint statistics and errors in confirmed cases

Source / year	Population and unit	Denominat ion	Critical Outcome	Selection, exclusion and overlap
Penalties § 36-37, Report 2024, P24	Investigated municipal sanctions, job / activity rate	96	28 would be amended; 3 remitted; 65 affirmed; total 31/96 hypothetical overturnings	Practice sample, not appeals decided on the merits. 42 job-ready and 54 assessed as ready for activation. Cannot be added to appeal counts for a decision year without checking year/ID/sample.
§ 7, April 2016, P16	Local decisions on incapacity for work	115	17 would be amended/remitted	Practical examination; actual complaint population is different. Subareas and causes of errors overlap; total 17 is the numerator.
Senior pensionsenh eden 2024, SP24	Reality-treated senior pension claims	1.138	46 amended; 241 remitted; 851 affirmed; 170 with procedural errors	Formal errors: 51 affirmed + 76 remitted + 43 altered. 287 alterations/remittals + 170 errors must not be summed; their union is 338 cases (=287+51), assuming the report's outcome categories. Not the main municipal series.

The 2019 guidance on legal safeguards expressly states that cases actually appealed are in practice not included in practice studies. This confirms Ole’s central point about different population samples. However, each study’s methodology annex must be verified separately; a qualitative process study including appeal cases is not automatically a legal practice study. V19.

The guide also indicates that remittal for reconsideration may be due to lack of information, new information, significant procedural errors or home-page deficiencies. A remittal for reconsideration must therefore be indicated as a reason before it is counted as

proven illegality. This delineates the specific statistical indicator and does not remove documented process errors or consequences.

4. Processing time and continuing consequences after remittal

Municipal Social and Employment Complaints of the Appeal Board

Year	Average completed treatment, weeks	Average rest period end-of-week	Source
2018	20	12,6	A20 Table 4.5, page 41
2019	17,9	12,7	A21 Table 4.5, page 39
2020	17,4	10,6	A21 Table 4.5, page 39
2021	14,3	11,0	A21 Table 4.5, page 39
2022	14,5	10,7	A24 Table 4.6, page 28
2023	17,5	14,0	A24 Table 4.6, page 28
2024	26,3	21,4	A24 Table 4.6, page 28
2025	approx. 35	Unverified	A25 page 11

Pending time is the age of cases not yet decided and cannot be added to the average processing time. Initial municipal processing, reassessment and processing following remittal for reconsideration fall outside the Appeals Board's average.

A24 source deviation: the text of the bread on page 28 indicates 21,4 weeks as treatment time, while Table 4.6 indicates 26,3. The increase in the bread text of just under nine weeks from 2023 votes by 26,3 − 17,5 = 8,8. Here, the table value is reproduced 26,3 and the deviation is explicitly retained.

Child cases and compulsory measures, older separate counts

Year	Compulsory placement and use of force, months	General municipal complaint, months	Source
2015	1,7	4,2	A17 Table 4.21, page 13
2016	1,6	4,4	A17 Table 4.21, page 13
2017	1,7	4,7	A17 Table 4.21, page 13

The coercion category combines compulsory placement and use of force. It must not be rewritten as an average exclusively for placements without consent. The complete separate annual series for 2006-2025 has not been verified in this contribution.

Entire case histories, including after remittal: the 2022 investigation

T22 reviews 39 complaints from 2018- 2019: 6 under § 95, 13 under § 96, 12 under § 112 and 8 under § 113. § 112 / 113 has been selected for particularly long / short treatment. This is not a representative national time distribution.

Pre-trade type	Verified time	Denominator/scope	Reference
Overall application → final decision § 95 / 96	Two longest 164 and 163 weeks; two shortest 14 and 18 weeks	19 cases selected	T22 page 33
After remittal, fresh municipal consideration + possible further appeal	44,4-67,9 weeks	3 remitted cases, §§ 95/96	T22 page 44
After remittal, fresh municipal consideration + possible further appeal	2,6-25 weeks	7 remitted cases, §§ 112/113	T22 page 45

These periods after remittal for reconsideration do not isolate the time until the new municipal decision, because renewed consideration by the Appeals Board may be included. A national series for date of remittal for reconsideration → actual assistance/redress and a new municipal decision is not published in the sources examined here. It must be requested separately with the same case identification.

5. Holes and necessary catch-ups

1. The historical outcomes were subsequently expanded with national 2006/2012 originals, 2007-2011 version tables and the portal's 2014-2025 rows; see the following modules. Before 1. July 2013,ordinary municipal appeals were considered by social appeals boards/employment appeals boards. The common row for the 2013 transitional year requires separate reconciliation of levels of jurisdiction and versions; missing parts are not set to zero.

2. The main series's municipal numerator / denominator for 2025 must be extracted from the number portal; the Danish map percentages cannot deliver it.

3. The complete register of all practice studies 2006-2025 with table counts, submitted/rejected cases and samples has not been fully extracted. P16/P24 above are verified examples, not a complete count.

4. Collect separate statements of municipal revaluations, new complaints after remittal for reconsideration, number of different citizens and errors in confirmed cases.

5. Obtain Ankestyrelsen's own decisions that were subsequently set aside; court losses must not be added to first-instance overturnings without case linkage.

6. 2026 is an ongoing year at the date of inspection; publications in 2026 relating to 2025 have been kept separate. No fictitious full year has been created for 2026.

Municipal Appeals Results - Enlargement 7 October 2026

Verified overall outcomes, social boards and Employment Appeals Board 2007-2011

Unit: complaint cases closed in the calendar year, national boards combined; not individuals or initial municipal decisions. Merits denominator = affirmed + altered + remitted. Altered/remitted is our own sum of altered + remitted.

Year	Stated	Modified	Remitted	Rejected / cancelled it	All cleared	Reality beha Name	Reversed (own sum)
2007	14.554	2.295	3.567	2.531	22.947	20.416	5.862
2008	17.824	2.679	3.991	3.026	27.520	24.494	6.670
2009	21.020	3.114	4.318	3.534	31.986	28.452	7.432
2010	24.458	3.406	4.900	3.667	36.431	32.764	8.306
2011	23.158	4.068	4.890	3.811	35.927	32.116	8.958

Source: Appeals Board, *Appeal Statistics Annual Statistics 2011*, June 2012, table 2.1 printed p. 3 / PDF page 5; table 3.1 printed p. 10 / PDF page 12. Primary report in a publicly available copy. The outcome table is based on the State Administrations' case-record information via the Ministry for Economic Affairs and the Interior. Annex 1 pp. 20-22 explains changes in registration and revisions. A municipal amendment while a board case is pending may be included in the dismissed/lapsed category; it is therefore not a pure dismissal count. Municipal reassessments before forwarding are not counted here. 800 Capital Region cases handled by Central Denmark are included only there in 2011. Annual rows from the same table must not be added to another edition of the same annual statistics. 2007 was re-extracted in 2008; minor differences from the first edition may occur. The 2010 refinement may give minor differences between areas of legislation.

2006: legal sample for comparison with the national original checked

Year	Stated	Repealed amended	Remitted	Rejected / rejected t	Dismissed	Completed by source	Reality, own sum;	Reversed, own sum;
2006	6.074	1.257	1.144	576	365	9.417	8.475	2.401

Source: Københavns Kommune's Employment Committee, meeting of 10. January 2008, item 5, annex 1 (one page), containing Ankestyrelsen's national statistics for the committee's areas of legislation: original annex. Social Services Administration benefits are excluded; some areas of legislation are not subdivided. Outcomes sum to 9.416, while the source states 9.417; the difference of one is retained. The source's 25,5 % alteration/remittal rate uses all 9.417 closed cases as the denominator. This row is a national subset of legislation. It must not be harmonised with the 2007 boards' merits denominator. No unique-citizen or reconsideration count.

Ankestyrelsen 2015- 2016: historical denominators, separate version

Year	Reality b treated municipality e cases	Dismissed	Done at everything, without rejected	Stated	Amended/annulle d	Remitted	Rejected
2015	27.990	2.889	30.879	Not broken down here	Not broken down here	Not broken down here	Absence of this total
2016	23.162	2.805	25.967	Not broken down here	Not broken down here	Not broken down here	Absence of this total

Source: Ankestyrelsen, *Annual Declaration 2017*, May 2018, Table 2.2 printed p. 4 / Physical PDF page 6 of KL-agenda Annex 19. June 2018. Extracts April 2018; 2015-2016 as a general rule maintained from the 2016 Annual Declaration. Rejected cases are omitted from the decision here but may be included in the received. Received and definitely does not relate to the same case report. The difference should therefore not be used as a refusal figure. Municipal decisions and Payment Denmark are separate areas. Feature transferred to Payout Denmark 1 May 2015. Children's and young people's committees and notifications are separate matters, not this municipal total; from 2016, these cases will be created per child instead of family.

Working status

2007-2011: national board outcomes in the 2011 version. 2006 and 2012: the full national original reports have now been checked in the following module with all 13 tables and 262 rows; 2006 concerns social appeals boards, 2012 social appeals boards and employment appeals boards. 2014-2025: national outcomes within the current portal's selectable legislative scope; historical totals are retained separately. The shared row for the transitional year 2013 still requires separate reconciliation. No missing value means zero.

Actual extract from Ankestyrelsen's Statistics Portal, 7. October 2026

Elections: Municipalities, laws, all 26 law groups, add national capital, year 2014- 2025. Total row / Whole country. Primary portal. Unit: closed complaints. Discontinuance is not reflected in the selected outcome targets.

Year	Reality	Stated	Amended/annulled	Remitted	Rejected
2014	35.590	27.019	3.964	4.607	3.590
2015	27.100	19.871	3.235	3.994	3.060
2016	22.491	15.916	2.935	3.640	3.062
2017	25.815	18.072	3.107	4.636	2.765
2018	26.861	18.666	3.757	4.438	2.550
2019	24.038	16.217	3.409	4.412	2.412
2020	23.608	16.692	2.746	4.170	2.367
2021	20.995	15.515	2.129	3.351	1.885
2022	18.415	12.860	2.045	3.510	1.759
2023	19.210	13.511	2.037	3.662	2.124
2024	17.307	11.900	1.473	3.934	2.421
2025	22.927	15.505	1.767	5.655	2.755

Current portal values constitute a separate version and delimitation. Historical annual statistics' figures for decisions on the merits in 2015 and 2016 are respectively 890 and 671 higher than this portal selection. The selectable list of laws does not include a separate Legal Protection and Administration in Social Matters Act category. This demonstrates a difference in coverage/coding but does not establish the entire explanation. Do not use the annual report's denominator together with the portal's outcome counts. Municipal reassessments before an appeal is forwarded and unique persons affected are not counted in the table.

2012: actual help after won denominator, delimited adult area

Ankestyrelsen, Kommuner's compliance with Board Decisions, November 2013: SEL § 83-86,95-99; 1.364 Board Decisions 2012; 145 registered amended / repealed, 14 omitted, 131 examined. Absence: error-coded authentication, other legal basis, removal / new application, or non-execution possible and without fixed date. Municipal questions; time limits and legality of reasons not verified.

Efficacy after Board decision, days	0-15	16-30	31-60	61-90	Exceeding 90	Denominatio n
All investigated	71	19	15	11	15	131
Direct change	42	9	6	3	5	65
Partial remittal for reconsideration	24	10	9	8	10	61

Other 5 cancellations effect within 10 days. 13 out of 90 had already been granted within 30 days before the municipality received the Board decision. 41 of 131 over 30 days. Names 65: 14 over 30 days despite no need for new decision. Names 61: 27 over 30 days. Locator: s.2,6-7,9-10,12-13, Annex 1 p.16-17 (PhysicPDF4,8-9,11-12,14-15,18-19).

Own analysis of significance: this measures the subsequent waiting time for assistance in this particular appeal population. For the consequences for citizens, it is crucial that an amended decision or a decision remitted for reconsideration does not in itself document that assistance has been delivered. Measurement begins at the board's decision; the preceding deprivation and waiting time may be longer. The figures are a sample of board decisions from 2012 and must not be added to a later overall 2012 total. Each row in the implementation table is a subdivision of 131, not an additional 131/65/61 citizens. Registration errors among the 14 exclusions mean that 145 does not represent 145 finally verified lawful amendments. The survey shows actual registered implementation, not a national compensation, return-home or reunification rate.

Fractures, unit of counting and actual aggregation

2006-2007: Municipal reform and the establishment of employment appeals boards change jurisdiction. Appeal statistics 2011 annex 1 p.21 expressly states that before 2007, cases not decided on the merits were included in the alteration/remittal denominator; from 2007 they are removed. Annulment without remittal is recorded as altered; annulment with remittal is recorded as remitted. Rejected/discontinued is combined and may include alteration by the municipality.

2013: Act no. 493/2013, entry into force and transition § 25–26, reproduced in the historical legislative notes to the Legal Protection and Administration in Social Matters Act: competence is transferred on 1. July 2013; pending board cases are completed by the Appeals Board/the Appeals Board's Employment Committee. Own implication: a correct 2013 annual series requires separate January-June board closures and July-December Appeals Board closures, together with verification of transferred case numbers. Before the reform, cases involving matters of principle in the Appeals Board constituted an additional level; the same course may appear in both board and Appeals Board statistics.

After 2013: Transfer of benefit areas to Payout Denmark and separate registration of children's and youth committees / notifications change the coverage area. The current selection of 26 legal groups cannot without explanation replace the total of the older annual accounts.

Our counting rule: Affirmed+altered+remitted must equal decisions on the merits. Altered+remitted constitutes alterations/remittals. Rejected and discontinued must be kept separately where the source permits. Reconsideration granting full relief before forwarding falls outside these complaint denominators. A fresh decision after remittal and a later appeal are new registered events, but may concern the same citizen and the same deprivation. None of the national series found documents unique-person keys.

Precise residual holes and prepared internal data requests

Nothing has been sent. 2006 and 2012's published national outcomes are now original controlled. The remaining fields of the register apply to transitional voting, re-evaluation and actual effect, not to the annual totals already presented.

Deficiency	Registry Manager or first competent recipient	Precise desired material
2013 overall outturn of the transitional year	Ankestyrelsen as well as the archives authority for the central government's records retrieval;	2013-Q1/Q2 board closures and 2013-Q3/Q4 Appeals Board closures, including transferred backlogs; coding manual before/after 1. July, old/new-case-ID linkage, second-instance cases involving matters of principle and exclusion of duplicate counting.
2014- 2025 portal versus historical annual financial statements	The statistical / register function of the Appeal Board	Explanation of versions and scope by year/by law; missing historical law/provision codes, legal-protection codes, day-care and integration codes; the right to obtain outcomes for the entire decided population. Explain the 2015 difference of 890 and the 2016 difference of 671; supply lapsed cases and dismissals separately.
Municipal reassessment before transmission 2006-2025	The case / ESDH registers of each municipality; Ankestyrelsen/ Ministry of Social Affairs and Housing for National Reporting if available	Annual complaints received, findings wholly/partly in the party’s favour on reassessment, upheld/forwarded cases, withdrawals and time limits. No national zero value can be inferred from the fact that the complaints did not reach the Appeals Board.
People and actual consequences following overturning	Municipal benefits / children's registers, Ankestyrelsen; DST for legal statistical coupling	Pseudonymous linkage keys, multiple appeals per person/family, date of first intervention, date of overturning/remittal for reconsideration, date of new decision, assistance delivered, actual return home/reunification, cessation date and duration of delay. Separate children, parents and adults with disabilities; remittal for reconsideration must not be coded as return home.

Control status: National 2006 / 2012 originals, 2007-2011 version tables and portal 2014- 2025 numbers are actually reach.262 rows from 2006 / 2012 are in the separate original module; they are not summed up with overlapping historical versions or the local legal sample. The 2013transition and the full municipal reassessment / follow-up series remain separate remains. No residue shall be filled in by extrapolation.

National appeals statistics found 2006 and 2012

The two previously missing original annual statistics have been recovered in public archive copies of the Appeals Board’s own publication addresses. The entire 2006 original of 19 pages and the entire 2012 original of 24 pages have been read in memory. All 13 numbered numerical tables have also been visually checked; all 262 table rows are in the separate table annex. Originals or images have not been stored. The archive date is the time of copying, not the statistical year or publication date.

The key result is that the report's national series for 2006 can be completed with 6.393 deleted / amended or remitted registrations and the row for 2012 with 8.202 modified or remitted; records. The names are different. The figures do not say how many different citizens were affected or whether the aid or family life was actually restored after the decision.

National accounts with actual delimitation

Year / publicionsversion	Stadfoe Stated	Revolve one or more or amended	Home t	Rejected / lost ist	Withdrawal	Other	Rejected / withdrawn aldet Total	End Total	Realite tsbehandlet	Entries recording overturned decisions
2006; July 2007	18.522	2.896	3.497	1.920	1.072	136	Non-separate total code	28.043	24.915	6.393
2012 / July 2013	23.864	3.601	4.601	In overall code	In overall code	In overall code	3.430	35.496	32.066	8.202

2006 source: Table 1, physical / printed p. 6, Table 3 p. 11 and Table 4 p. 14. 2012source: Table 2.1, physical p. 6 / printed p. 4, Table 3.1 physical p. 10 / printed p. 8 and Table 3.2 physical p. 11-12 / printed p. 9-10. 2006 original archive copy, The archive copy of the original of the 2012.
The 6.393 registrations in 2006 are 22,8% of all 28.043 cases closed, published as 23%. The report's Table 4, Note 1, explicitly applies all closed cases. If the 24.915 claims are taken as a comparator, the proportion becomes **25,7 %**, calculated in this report. This is another calculation and must be marked as such; the published 23% must not be overwritten.

In 2012, table 3.1 publishes 26 %, while table 3.2 publishes 25,5 %. Both tables use cases determined on the merits as the denominator. An own calculation using the published 8.202/32.066 yields 25,58 %, rounded to one decimal place **25,6 %**; the printed 25,5 % is retained as the original's information. Dividing the same numerator by all 35.496 closed cases yields **23,1 %**, which is only a supplementary own calculation. A time series placing the 2006 figure of 23 % alongside the 2012 figure of 26 % without checking the denominators may therefore give a misleading explanation of the change.

The alteration/remittal records for the two different years sum to **14.595**. This is a sum of annual records. Different decisions or repeated complaint processes for the same citizen cannot be identified in these published tables. The other tables, regional breakdowns, areas of legislation and historical retrospective accounts are subdivisions or repetitions of the populations and must not be added to this sum.

Which municipal corrections disappear in the total code?

The 2012 original methodological annex, physically pp. 20-21 / printed pp. 18-19, explains that the non-reality codes have been merged as from 1 January 2007. **rejected / cancelled**. The total code includes both rejection or reference, cancellation as a result of a change of decision in the municipality, cancellation for other reasons and other closures. The 3.430 registrations in 2012 cannot therefore be read as 3.430 complaints without changing the legal position of the citizen. A non-published part with a municipal change is included in the complaint. The number cannot be calculated from the total code.

The methodological annex also describes recording outright annulments as amendments and annulment followed by remittal as remittal. **An annulment and a remittal in the same decision are therefore not two new cases.** The note to table 2.1 refers to six earlier codes, while the methodological annex refers to seven, including two separate grounds for discontinuance. Both statements are retained; the original provides no separate reconciliation of this difference. The annex's statement that important information has not been lost does not prove that the number of municipal corrections can be inferred from the new combined code. It cannot be inferred from the published tables.

Children, disability and specific benefit groups

2006 covers the social boards in 14 state chambers and the board of the municipalities of Copenhagen and Frederiksberg. Several benefits are dealt with in the same broad legal group; the publication does not have data for individual paragraphs (preface, p. 4). It is therefore not a complete register of, for example, forced employment or different children.

Group 2006, Table 4, p. 14	Completed	Stated	Repealed / Modified a	Remitted	Overturning entries, own total	Printed per cent, mention all cleared
Specific support for children	1.018	612	78	166	244	24 %
Home help	288	142	33	58	91	32 %
Other offers for adults	1.365	775	156	304	460	34 %
Auxiliary products etc.	2.339	1.690	205	228	433	19 %
Use of force	127	44	22	3	25	20 %

This documents decision outcomes in the specified fields. The 244 child-related overturning entries are not 244 children in care or 244 placements without legal authority. Separate case type, identity linkage, legal grounds of error and actual redress are missing for such conclusions. Conversely, the 166 remittals must not be presented as documented delivery of the missing support.

In 2012, the social appeals boards closed 18.811 cases and the employment appeals boards 16.685. Table 3.2 gives, among other things, **10.466 closed cases concerning social services**, of which 1.070 were amended and 1.819 remitted for reconsideration; **201 concerning use of force against**

adults, of which 5 altered and 21 remitted; **69 concerning people with disabilities in employment**, of which 9 altered and 22 remitted. These groups are neither uniform populations of people nor documented as mutually separate groups of citizens. For additional expenses for adults, the methodology annex explains the division of the former group sections 100-106 into section 100, sections 101-102 and sections 103-106 (physical p. 21); the table does not publish the numbers of people in these groups.

Time trajectory and changing control targets

The 2006 weighted national average is **87 days** Against 89 in 2005. The general objective is referred to as 13 weeks / 91 days (p. 16). The average of the boards varies from **58 days in Frederiksborg to 151 days in West Zealand**; Funen is 99 and Storstrøm 111. There is no indication as to how many specific cases exceed the target or when the citizen's help was delivered. Average of completed cases is not a maximum waiting time.

The weighted national average for 2012 is **20,9 weeks**, comprising 19,8 in the employment appeals boards and 21,9 in the social appeals boards. The Capital Region is 29,3 weeks overall and **35,6 weeks in the social appeals board**. The national retrospective figures in table 4.1 are 15,9 weeks in 2010 and 18,0 in 2011. All regional and legislative time series are included in the table annex. The original does not state the distribution of waiting times or the time from a favourable finding to actual assistance/reunification.

The oversight targets in 2012 vary by quarter and region. Physical p. 14/printed p. 12 of the original gives these endpoints: the Capital Region's social appeals board **26 weeks in the first quarter and 17 in the last**, the employment appeals board **21 and 16**; Zealand's social appeals board **13 weeks in all four quarters**, the employment appeals board **17 and 13**. The full targets for the intervening quarters are not stated in this report. Meeting an increased target is not proof that the previous target or the individual's timely protection was secured.

For 2006, table 7 states that admission to residential accommodation without consent under section 109 g of the Social Services Act then in force was subject to a **14-day decision deadline** from receipt of the recommendation. The published 9-day average for use of force does not document compliance in every case. The 2012 annex reproduces Executive Order no. 853 of 23. August 2012 then in force: section 29 on a provisional decision in cases of urgent need or risk of substantial harm, and section 30 on a 4-week board deadline in certain employment cases and forwarding within 5 working days after reconsideration (physical p. 23/printed p. 21). These historical statutory texts have a limited scope; they do not document individual compliance or the rules in 2026.

The source's own inconsistencies are preserved.

The status of the originals' authority gives no reason to delete internal errors or select a version without explanation:

• **2006, Table 4, p. 14:** Overall assessment has six outcome cells that summer to 8 but print total 9. Sickness and birth benefits summed up to 4.609 but have printed total 4.608. Child benefit totals 97, but has printed a total of 93. Individual housing support sums up to 1.174 but has printed a total of 1.178. The original cells and totals are preserved, not harmonised.

• **2006 summary, p. 5 versus Table 1-2, p. 6 / 10:** The summary refers to Fyn by 23% and West Zealand by 27%; Table 1-2 indicates 29% and 25% for 2006, while 23% and 27% are in the 2005 column. The precise local mismatch shall be indicated if the summary is used.

• **2006, Table 2, p. 10:** Viborg has 44% in 2005 and 37% in 2006, but the change is printed as − 8 percentage points. Own subtraction is − 7; the printed − 8 is retained.

• **2006, p. 17:** The prose's statement that only active employment measures have an average exceeding 13 weeks is not supported by table 7. The table also has social pensions and collection of child maintenance at 93 days and legal safeguards/administration at 94 days, all exceeding 91 days.

• **2012, physical p. 16 / printed p. 14 versus table 4.2 physical p. 17 / printed p. 15:** The prosas indicate 19,5 weeks for social pension, new law, in the social board. The table indicates 20,3. Both are maintained, and the increase of 4,6 weeks at the same time is consistent with 20,3 minus 15,7, not with 19,5 minus 15,7.

• **2012:** The printed national 25,5% in Table 3.2 and the calculated 25,58% from the same published integers are treated separately as described above.

These are tangible inconsistencies in the published information. They do not in themselves prove which underlying registration is correct or that the decision of a particular citizen was illegal. A correction requires the relevant original extracts or a documented correction version.

Document control and precise residue

K01's gap in national originals for **2006 and 2012 is closed** for these two publications'13 numerical tables, text/methodology and published prose information. Both official publication pages and their PDF copies appear in the specific CDX finding. The 2006 original does **not** contain a complete national register of other labour-market appeal bodies before 2007; the transition in the annual series must still describe the change of jurisdiction.

The 2006 annex states that the last two quarters of the Copenhagen State and the Danish National Security Agency have been dealt with manually and that no separate annual statistics were submitted to the Danish Security Authority; the year is based on the four quarters (p. 19 and Table 1, Note 3). As of 1 January 2007, the municipal reform changed the board and the division of tasks. In 2012, complaints about child benefit, family allowances and the collection of maintenance allowances were moved to Ankestyrelsen from **1 October** at the same time as Denmark's acquisition. These cases are therefore missing in the last quarter of the year and cannot be counted as an actual decrease in errors or complaints (preface, physical p. 3 / printed p. 1). It was not until July 2013 that the boards ceased completely.

Actual remaining gaps: The graphs do not have precise data labels for every bar, and their exact underlying figures for cases opened/pending have not been turned into calculated guesses. For 2012, the prose separately gives 39.130 cases opened, 3.331 fewer than in 2011; this is saved as a numerical entry tied to the text, not read from the figure. For 2006, a fall of 1.995 cases opened is stated, but the exact annual intake figures cannot be derived from this fall alone. Municipality-by-statutory-provision tables/the data portal, the union of identities, grounds for errors, municipal amendments hidden in aggregate codes and actual redress are still not fully covered by these publications. Retrospective figures already found in later annual reports must not be added again on top of the original annual registers.

Ankestatistic 2006 and 2012: all original voice tables

All 13 numbered tables are included with original figures, separate source years, columns and physical/printed page locators. Table rows are registrations and overlapping breakdowns; they are not counts of distinct citizens. The historical retrospectives are versions of the same annual populations. Full stops are retained as the original's thousands separators; decimals use commas. A full stop or hyphen as a separate cell is not converted to zero. BAN means employment appeals board. Explanatory board additions in row names help keep identical law titles separate.

Transitional year 2013: original case numbers, omitting complaints and waiting time targets

The rediscovered originals fill the first half-year's board counts with 16.780 decision entries. They do not provide a complete national 2013 matrix of upheld, amended, remitted and dismissed decisions. Ankestyrelsen's annual report also shows that cases relevant to the merger are excluded from its measurement of cases over 12 months. Target achievement therefore cannot be used as proof of timely review of the entire 2013 population.

Three independent primary sources have actually been read in relevant sections: Statsforvaltningerne's scanned half-year report(SFV13H), the consolidated annual report(SFV13A) and Ankestyrelsen's annual report(AS13A). SFV13H has been read visually on PDF1-8,15,19-20; SFV13A read as text on PDF1-13,25-29 and visually checked on 26/28; AS13A read as text on PDF1-20 and visually checked on 8/13/18/19. These are not complete readings of all accounting/balance-sheet pages. No public original or original image has been stored.

The first six months of Board decisions

SFV13H,PDF15/printed 13, and SFV13A,table 19, PDF28/printed 26, have the same counts:7.696 employment appeals board decisions and 9.084 social appeals board decisions. The subtotal of 16.780 is their sum, not an additional population. All regional cells appear below. Decision entries are neither unique appeal processes nor people. Outcome groups, reconsideration/discontinuance grounds and actual implementation are not published in this table. Before the reform, a board decision could be followed by further consideration of a question of principle by Ankestyrelsen.

AS13A, PDF7, states approximately 11.000 municipal appeal cases closed as a result of the transfer. This is a rounded statement, not an exact outcome matrix. It does not provide an exact national annual total of 27.780, and any duplicate registrations require links between case records/levels of jurisdiction. The approximately 16.000 or 17.000 pending cases transferred are stock figures, not additional concluded decisions.

Statsforvaltningen's original decision records

SFV13A, table 19,PDF28,and SFV13H, PDF15. First-half regional figures and national totals for both half-years are reproduced. Empty board/agricultural fields after the transfer of tasks do not mean zero decisions in Denmark. Family law and both boards are subtotals. The two adoption phases may concern the same process; no national union of people or error rate is formed.

Names: actual waiting times and rest times before reform

SFV13A, Table 18, PDF26 / printed 24. SFV13H, Table 1, PDF5-6, marks the mean results as: **unweighted average**: a small region and a large region receive the same weight. The percentages below have the case population in their own region as the denominator; absolute old case figures are not available.

Objective / result first half of the year	HOV	SJL	SYD	MIDT	NORD
Employment, target weeks	20	15	18	20	20
Employment, result weeks	25	22	24	25	27
Social, target weeks	30	17	17	15	21
Social, result weeks	42	17	21	13	25
Employment, over 4 months of rest, maximum percentage	40	20	30	35	35
Employment, over 4 months of rest, actual percentage	61	47	27,6	51	41
Social, over 4 months rest, max.	50	20	30	15	42
Social, over 4 months rest, actual percentage	66	27	25,4	19	41

SFV13H publishes 24,6 weeks in employment appeals boards and 23,6 in social appeals boards; pending-time proportions of 46 and 36 per cent. Own calculation from the five regional values gives 24,6 and 23,6 weeks; the averages of the pending-time values are 45,52 and 35,68 per cent. Rounded average percentages are not converted into exact counts of old cases. The previously incorporated AT02 annex has a first-half-year result of 28,6/23,6 for social/employment boards; this source difference is retained. Period allocation, extraction and weighting must be reconciled against underlying data before forming one common time series.

The Appeal Board's own entrances, endings and stocks 2006-2013

AS13A Table 4, PDF8. All numbers are the original version, with task change 2013. They overlap with other registered complaints / injuries series and may not be added as additional complaints. Empty historical complexities don't mean zero.

Measure	2006	2007	2008	2009	2010	2011	2012	2013
Authorization - established	5.424	3.857	4.657	5.950	7.036	7.853	8.735	40.090
Authorisation - Completed	5.311	4.103	4.775	5.234	6.852	8.364	8.324	22.765

Measure	2006	2007	2008	2009	2010	2011	2012	2013
Funding - pending	852	965	978	1.619	1.864	1.232	1.588	24.629
Work injury - created	13.325	15.157	14.973	19.190	17.909	13.816	15.145	15.233
Work injury - completed	14.539	13.848	14.560	16.809	18.517	18.629	13.353	12.267
Work injury - pending	5.542	5.884	6.651	9.127	8.623	3.792	6.388	9.672
Work injury - average months	5,8	5,0	6,3	5,8	5,95	6,2	4,96	6,7
Work injury - complex months	Empty	Empty	Empty	Empty	Empty	Empty	5,8	8,1
Injury to work - non-complex months	Empty	Empty	Empty	Empty	Empty	Empty	2,8	3,3

The original's 35.032 cases closed at PDF7 correspond exactly to 22.765 budget-controlled + 12.267 work injuries. Therefore, the 12.267 should not be added to 35.032 despite the prosaic formulation of work injuries "beyond." The annual increase of 13.355 corresponds to 35.032 − (8.324 + 13.353). The area of funding also includes family law, payment of Denmark and previous basic complaints, so 22.765 are not municipal complaints alone. New 2006-2012 historical cells are reproduced as this version's retrospective, not new independent year populations.

The 12-month measurement omits merger cases and does not match its own table

AS13A, Table 9, PDF18, visually verified:

Original version	Number	Printed share	Denominator/scope
Under 12 months, Table 9	18.607	94,1%	Printed table, does not refer to independently shown
Over 12 months, Table 9	1.262	5,9%	The same table
Total determined in prose	21.347	-	Merger cases not included
Accidents at work above 12 m	1.144	10,1%	11.371 cases
Family rights over 12 m	28	0,9%	3.041 cases
Welfare over 12 m	90	1,3%	6.935 cases

The three prose denominators total 21.347 and their old cases 1.262. But the two counts in table 9 give 19.869, that is 1.478 fewer. 1.262/21.347=5,91%; 1.262/19.869=6,35%. To obtain the prose total by subtraction, the under-12-month count would have to be 20.085. **This is an independently calculated reconciliation value, not a documented correction to 18.607.** All printed values are retained; the underlying case records must determine where the difference arose.

At the same time, the defined denominators are smaller than the annual flow: occupational injury 11.371 as against 12.267 and 21.347 as against 35.032. The report explicitly omits merger-relevant cases, but does not specify the whole difference between the different flow / tempest populations. It cannot therefore be converted into a precise number of merger cases. The published target is 98% closure below 12 m, result 94,1%; a measured target of 96% is the target-result ratio, no new timely citizen's share. [AS13A, PDF13,18-19]

Notifications, interaction and quality control

AS13A, Table 7, PDF12-14	Contract objectives	Result	Unit / denominator
Compulsory placement/use of force	8	6,6	weeks on average; not individual time-limit checks
Notification	8	10,4	weeks on average
Rejected cases of principle	2	2,6	weeks on average
Reality dealt with in principle	7	8,1	months
Foreign pension	3	4,5	months
Other stock account	4,5	4,0	months
Insurance, Employment Committee	6	4,7	months
Working Environment Appeals Board	5,5	3,3	months
Equal Treatment Board	7	6,5	months
Special education	4	3,2	months
Uncomplex work injury	2,5	3,3	months
Industrial injury, complex	7	8,1	months
Contributions	85	54	per cent before service destination, absolute mention of deficiencies
Parental authority	85	89	%
Residence	85	97	%
Interview	85	82	%
Family / stepchild option	85	81	%
Name cases	85	93	%
Adoption Board	85	96	%
Internal quality	84	82,5	points, maximum 100, no factual legal percentage
AS successful in court	94%	665/704	judgements, not unique citizens

39 judgment registrations are the difference 704−665. The original does not specify the legal outcomes or union of persons for these 39; they must not all be relabelled as findings wholly in the citizen’s favour, unlawful placements or actual returns home. Nor may the measure of court findings in the citizen’s favour stand alone as evidence that unexamined cases gave the citizen the correct legal position.

PDF14-15 counts 38 points out of 100 and 5 of 8 targets fully met. Objective 5 on improvement following a practice study has been removed because the study is only available in April 2014. PDF12 originally says 9 goals. PDF15 refers to 19 time targets and 9 not observed; its subsequent wording on 4 areas is followed by nine named groups. The figures are kept at their own level. Internal legal sub-quality 86,7 on PDF19 is a different cut from total 82,5; inadequate information about expected waiting time is part of the overall quality shortage. Guidance for 85% of municipalities does not prove better decisions; the required quantitative user survey was not carried out and the municipalities were not able to explain any change in practice following a change in law.

Managed cleanup, citizens' time and concrete evidence requirements

SFV13A, PDF10-11, describes approximately 6.000 ongoing contributions on 1 July, about 9.0001. October and below 6.000 at the end of 2013; approximately 3.000 of the oldest cases were settled from mid-October to the end of the year. Stock and closures are overlapping cuts, not 24.000 persons.40-45 new employees had to be trained. The forward-looking 9 weeks 2014 is described for applications made after 1 January 2014; older cases receive special teams. The scope of the target must be consistent with the actual date of complaint of the citizens, not make old waiting periods invisible.

SFV13H, PDF5-6,uses an unweighted 64-per-cent average for a meeting within 35 days against a target of 70%. SFV13A, table 18,has regional values of 17,1/62,2/87,3/71,7/83,0 for the first half-year and 58,0 for the second; PDF11 discusses 58% for 2013 generally. Periods and unweighted/regional/national statistics therefore cannot be harmonised without underlying data. According to PDF11,the Capital Region accounts for approximately 30% of meetings. The half-year report's 32 children's groups, the annual report's 45 in the second half-year and the prose's 75 completed in 2013 do not reconcile to the same total:32+45=77. Not a sum of persons; the basis of grouping/period allocation must be clarified.

AS13A, PDF14, has 8.500 completed by 16.000 transferred arrears, while PDF15 refers to 17.000 transferred. Both are original versions, no hidden rounding correction. Task Force 2. September 2013 / 15% extra production until mid-2015 in PDF20 is a special settlement effort at Ankestyrelsen; it shall not be confused with the municipal task force samples. Future 4-5 months level in 2016 and planned 2.000 fewer pending occupational injury cases in 2014 are targets, not proof of actual implementation. Concerns 65% at the start of the year and 82% at the end of PDF18 indicate the development of service measurement, not actual reunification.

Conclusion → proof → order: The control system's own documents show excluded time courses, known backlog and an uncoordinated time denominator. It provides a well documented demand for the full flow of cases without interruption of the registration of the citizen's losses. The specific case / time-limit, justification, urgency and effectiveness obligations shall be tested from the application / action by appeal, new decision and actual assistance / contact / return. If a continued intervention lacks a valid current basis, necessary cessation and restoration measures shall be immediately tested; a statistical indication of organisational pressure is not a legal basis. The duty, knowledge, action and guilt of the institution, management and individual staff shall be identified separately. [R04, R19; AS13A, PDF13-20; SFV13A, PDF10-11]

Documented findings are the original figures, the exclusion of merger-related cases, the table discrepancy and the acknowledged oversight deficiencies above. Suspicions of continuing separation caused by errors, unremedied loss or individual criminal culpability require original citizen case records. Missing evidence consists of exact first-/second-half-year outcomes with transferred case-record keys, all inclusion/exclusion codes for time measurement, original deadline and urgent decisions and documentation of actual redress. K01's first-half-year count gap has been closed; the full 2013 outcome matrix and the links between individuals and effects remain specific outstanding items.

Local government 2006 figures: defined national committees and original re-assessment checks;

Two original municipal annexes, not the entire national denominator population

Both annexes to the Copenhagen committee dated 10. January 2008 have been read in full; the two tables on page 1 have also been visually checked. Page 2 of annex 2 has no further table. The national figures were selected by the areas covered by the Employment and Integration Administration. Social Administration benefits and repayment obligations are excluded; integration appeals may nevertheless contain both administrations' areas. Annex 2 also excludes appeals under the Act on Legal Protection and Administration in Social Matters that could not be allocated. Therefore, 9.417 is not Denmark's entire municipal appeal count for 2006.

The appeals board figures also exclude cases in which the municipality granted full relief on reconsideration, or partial relief without a maintained complaint. This is expressly stated in the contemporaneous committee minutes. The figure 819 represents closed board cases within this scope, not all complaints received by municipalities.

All eight municipal / national rows, Annex 1

Zone	Pr.1000 input.	Finish t	Dismisse d/ referred	Stadfoe Stated	Stad%	Modified	Change%	Cases remitted	Home%	Withdraw al	Omg%

Dagpengelov: others	66	3	54	81,8	1	1,5	5	7,6	3	9,1
Leave	0	0	0	-	0	-	0	-	0	-
Integration, mixed development	6	0	4	66,7	0	0,0	1	16,7	0	16,7
Repatriation	0	0	0	-	0	-	0	-	0	-
Partial pension	0	0	0	-	0	-	0	-	0	-
Total, printed	819	41	502	61,3	70	8,5	162	19,8	43	28,3

Percentages reproduce the printed original. A dash means the original's dash, not zero errors. The printed definition of the alteration/remittal rate uses altered/annulled plus remitted divided by closed cases, including rejected/discontinued cases. This is a different denominator from the later merits-based percentage. Municipality rows are subsets of the national row and must not be added to it.

Arithmetic and linguistic deviations preserved in the source chain

The national outcome sum is 9.416, while closures are shown as 9.417. Copenhagen’s discontinued cases are 44 in annex 1 and 43 in annex 2. The benefit rows in annex 2 yield 819 closures, but the outcomes shown are 41 dismissed,502 upheld,70 amended,162 remitted and 43 discontinued, totalling 818. The integration row shows six closures, while four upheld and one remitted yield only five outcomes. No extra case or correction of discontinued cases is constructed to make the sum fit.

Annex 2 gives the overturning rate for flex jobs as 27,8 per cent, whereas(2+6)/29 gives 27,6 with normal rounding to one decimal place; cash/start assistance is given as 33,8 against 93/276=33,7; vocational rehabilitation 36,3 against 50/138=36,2; sickness benefits 26,7 against 65/244=26,6. Thus not all the original percentages can be recalculated from the displayed numerators and denominators.

The main account's remittal-for-reconsideration percentage of 19,5 also differs from the 19,8 in both annexes; the national figure of 1,7 per 1000 inhabitants is described in the text as a percentage, which is a different unit. None of these local reconciliations reduces the documented amendments/remittals for reconsideration to zero.

Inspection 2006, Report 2010: 18 of 40 reassessment deadlines exceeded

The Ombudsman's original sections 4.2.4-4.2.5 have been read physically PDF68-73; notification and closure physically 74. The 40 borrowed cases are selected control material, not a random national sample. The time shall be measured from the receipt of the municipality to the transmission, but the report shall deduct, where possible, waiting time for other information / observations. This, therefore, is not the whole calendar cycle of the citizen.

Group	Investigated	Exceeding 4 weeks	Average	Shortest	Longest	Separate information
Cash benefits, Case 1 -8	8	5	5 weeks	5 days	10 weeks 1 day	Three out of five delayed without notification
Reimbursement, Case 9-15	7	4	4 weeks less than 6 days	1 week 1 day	9 weeks 2 days	Four of four delayed without notification
Pensionsincrease, 16-20	5	3	5 weeks	5 days	9 weeks	Case 19 complaint 23.12.2005, sent 27.1.2006
Auxiliary products, Case 21-30	10	0	Not available	Not available	Not available	All deadlines seemed to have been observed.
Early retirement, Case 31-40	10	6	6 weeks 4 days	1 week 2 days	15 weeks 4 days	One of six delayed without notification.

The disjoint groups give 40 cases and 18 deadline overruns/45 per cent: social services administration 9/25 and employment administration 9/15. The latter are the same 18 broken down by administration, not a further 18 errors. Missing notification comprises at least eight identified occurrences in the social assistance(3), repayment(4) and disability pension(1) groups; they are within the deadline group and are not added as eight new citizens. The incompletely counted pension-increase group is not changed to zero notification errors.

Case 6 is described with five days of treatment from a written complaint, but the report gives the impression of previous oral / personal complaints without journal notes. It is a proven lack of registration and a concrete, earlier starting issue, not a verified additional date. Case 8's receipt came one week after internal transfer, although the municipality had received the complaint about four weeks earlier. The report states that internal transfers do not reset the start of the deadline. Case 19 ranges from 23 December 2005 to 27 January 2006; it is included as a historical control case ending during the period, not as a new 2006 complaint.

The importance, responsibility and requirements of the evidence

Conclusion: The 2006 material already documents that the municipality's own reconsideration can delay access to review and that appeal statistics omit favourable municipal findings. **Original evidence:** The two statistical annexes, the minutes' express exclusions and the cases identified by the inspection. **Discrepancy:** An internal start date and unrecorded earlier contacts can shorten a reported waiting time; the printed 2006 totals and percentages require reconciliation. **Relevant rule:** The inspection report cites the reconsideration and notification rules applicable at the time, including the four-week deadline and immediate handling of urgent appeals. Historical section numbers are not current statutory text. **Act/omission and legal departure:**18 established missed deadlines and a specific failure to notify. **Significance for the outcome:** Delayed forwarding and insufficient information to the individual; substantive invalidity, actual loss of benefits and back payment require the individual case files. **Responsibility and specific demand:** Disclose original receipts, notes of oral appeals, grounds for postponement, forwarding, final outcomes and payment/assistance dates; count favourable findings on reconsideration separately before national aggregation.

The end of the report after the municipality's described actions is a check-out. It is not an original evidence of later actual timeliness in all new cases. Nor is any personal criminal guilt derived solely from the 18 temptations. The self-criticism of the lack of record keeping and information is maintained even when the total intervention time cannot yet be measured.

Reassessments, objections and complaint populations

Controlled October 7, 2026. This module fills in concrete parts of K03 and K04; it does not establish a national full re-assessment series. A row may contain several decision events in the same case. The number of cases cannot be converted into unique citizens without identifiers and the reconciliation of repetitive processes.

Municipal original statements

Product: loss of earnings [Gen- VAR24]

Period	Population	Decisions	Complaints	Amended by: reassessment;	Transmitted to AS	Withdrawn
2023	Section 42 of the Services Act, Varde	161	37	14	15	8
2024, first quarter	Law of the child § 87, Varde	32	1	1	0	0

The original's pp. 20-22 use both "proposed decision" and amended decision for the 14; their final decision status must be clarified before classification as unlawful final decisions. The own-initiative supervision covered 21 case files: 9 first-time decisions and 12 amendments on follow-up; unchanged follow-up decisions were not included. Four courses lasted 7-12 months; two decisions relied on irrelevant considerations. Overlap between the two findings is not stated. The one appeal case in 2024 was corrected for missing medical information and reasons; it is already included in the table. Locator: printed pp. 20-24, PDF pp. 22-26; delimitation p. 19/PDF21.

Copenhagen: Social Services [GEN-KK14]

Year	Reality complaints	Complaints of admissibility
2009	2.468	294
2010	2.421	439
2011	3.446	744
2012	2.960	624
2013	2.560	642
2014	2.256	598

Original PDF, table 7, p. 8. The exercise of public authority is included; service provision, including day and residential services, is excluded. 2009-2013 was updated on 28. October 2014; the 2014 count is dated 13. March 2015. Open reconsiderations are excluded from the outcome figure. A partly favourable finding may still lead to an appeal; a wholly favourable finding locally is not included as a new AS decision. The charts' exact reconsideration counts are not published in the PDF reviewed. The agenda text mentions both 598 and 584 procedural complaints in 2014; the table's 598 is used with the version conflict visible. The figures are complaints, not established errors.

Copenhagen: Beskæftigelses- og Integrationsforvaltningen [GEN-KKBIF24]

Year	Citizen's Adviser formal complaints;	BIF's formal complaint	Original sum	Reality complaints
2023	246	630	876	1.702
2024	277	579	856	1.861

PDF-s.2-3, Table 1-2. The original states that complaints sent by the Citizens' Adviser to BIF are included in BIF's statement. Therefore, the original arithmetic sum 876 / 856 is not verified number of unique formalities. Reassessment results are not set out in the Annex. Reality complaints and formal complaints shall not be added together as persons either.

Housing aid: actual pre-control and post-control [Gen- UK21]

Period and unit	2019	2020, January-September	Total
Recovery proceedings	1.300.000	950.000	2.250.000
Official letters	800.000	600.000	1.400.000
Objections	30.000	20.000	50.000
Finding in favour on objection	17.000	11.000	28.000
Complaints	2.239	1.073	3.312
Finding in favour on appeal	100	30	130
As decided on in substance	615	326	941
AS Confirmed	520	282	802
AS remitted	22	15	37
AS amended	73	29	102
AS repealed	0	0	0

Table 6.1,p. 56: the large, rounded process volumes are the original's figures, not exact register counts. AS table 2.2,p. 17, is a different decision population. The sample is 45 reconsideration processes with favourable findings, without AS consideration, selected before September 2020; two cases nevertheless contained new information. Table 3.2/6.2,pp. 25/58:

AS Assessment	Initial decision	New Decision
Correct	19	26
Not correct	20	11
Partly correct	1	3
Cannot be determined / otherwise	5	5

All 11 new incorrect decisions followed originally correct decisions (p.57). Five correct amendments were due to changed practice (p.25). 45 sequences are 90 decision events, not 90 individuals. The sample does not document the error rate among the 28.000 objections. The publication page states that principle notice 27-22 subsequently changed practice concerning specific benefit amounts.

2026: survey of workflows [GEN- AS26]

The survey includes 93 managers from 84 municipalities and 107 case handlers from 83: 200 replies from 89 different municipalities; two partial replies. All 98 municipalities were invited. Several answers may come from the same municipality. In addition, group interviews in four municipalities, five citizens' advisers in three interviews and four experts. Prior to the complaint, respondents provided oral + written 29%, oral 19%, written 6%, no 35%, other 11%; following the complaint 21%, 15%, 31%, 26%, 7%. These are respondents' information on the most recent case, not nationally counted changes, deadlines or illegality. Locator: method s.47-50; contact p.17-19; summary p.7-9 2026 is not included in 2006-2025 -sums.

Importance of the report count and evidence requirements

The lack of a national series of re-assessments is an independent blind spot: citizens can get a change of decision before Ankestyrelsen receive a complaint. It cannot be counted as zero error or completed by adding municipal examples to national appeals volume. On the contrary, change alone does not prove that the first decision was wrong. The housing aid sample also shows the need for verification of the decision issued after the complaint.

For a complete census, a balanced extract from the municipality's journal systems and the register of the Appeal Board is required: stable pseudonymised case and person identifier; statutory provision; first date of decision and outcome;

complaint date; full/partial relief, maintenance of the decision, withdrawal and rejection; new information or a change in the legal position; forwarding date; AS decision date/outcome; subsequent municipal decision and actual implementation. Repeat complaints, multiple decisions in the same case, Borgerrådgiveren's referrals and annual renewed decisions must be deduplicated separately.

K03 is partly substantively completed by the counts above. The national 20-year series, a complete list of all locally published reconsideration statistics and the underlying raw outcome cells for Copenhagen 2014 constitute a specific data need; the entire known 8-page annex has now been read as text and PDF2-7 visually checked in the separate module, where no precise outcome labels are available. K04: the housing benefit study's 66 pages and both separate 12-page annexes have now been fully checked as to substance. All tables, figures, samples and case trajectories are set out in genberegning-boligstoette2021-fulde-tabeller-og-genvurderingsforloeb.md; the specific links between individuals and payment timing are still not published here.

Housing support 2021: full original control of tables, re-evaluation and annexes

The entire main report on 66 pages and both separate 12-page annexes are text-read in memory. All 10 numbered tables and 7 figures in the main report have been checked; Figure 2.1 is a straight line diagram without numbers. In addition, the two summaries of cases in Annex 2 have been visually checked. No original or original image is stored locally. The verification below replaces the previous status of unread subtables and annexes.

This is the same 45 selected courses as in GEN- UDK 21. Before / after decisions, the sub-groups of the Annex and the re-calculation months provide no additional population. The April 2021 version of the publication is registered according to its current practice; no conclusion is drawn on the current legal situation.

PDF page number and printed page number are the same. Visual inspection of the main report: 8, 16, 17, 19, 24, 25, 26, 27, 28, 29, 30, 35, 44, 45, 49, 56, 58. Annex 2: p.9-10 Annex 3 contains three opinions, no case statistics table.

Samples, exclusions and overlap

Main report pp.7/57/59-60: UDK submitted the 45 most recent recalculation cases before September 2020 in which relief was granted on reconsideration. They had therefore not been subject to appeal proceedings in Ankestyrelsen. New information was to be excluded, but ID 3 and 34 were retained as examples even though they should have been excluded. The study is expressly not representative.

On the other hand, Annex 2 p.4 / 7 states that all 13 system decisions were submitted incorrectly and, in the opinion of the UDK, fall outside the scope of the Directive; therefore, the UDK uses 32 manual originals as a learning basis. This does not alter the actual 45-denominator of the main report. Date of birth and local case number are fields in Annex 1, but there is no public person key or full 45 case list. Duplicated exclusion and household integrity have not been documented.

Objections before a decision, complaints to the UDK and complaints forwarded to Ankestyrelsen are different process steps. Official letters are decisions only when the time limit expires without objection; Graph 2.1 / p.16-20 makes a distinction between them. National flows cannot therefore be summed up as errors, persons or independent cases.

8	Startup	Yes	No

Additional text figures and selection accounts

Sample 45; the sub-population of the series indicated in the workpiece. Source: Main Report PDF-p.6-7 / 23-26 / 34 / 41-48 / 55 / 57 / 59.

Statement	Number	Limitation
Housing support complaint 2019	6.555	All housing subsidies, not only recalculation
UDK amended complaints 2019%	12	All housing benefits; exactly counts not published here
Sample	45	Most recent sequence leading to finding in favour before submission in September 2020
Failure to submit new information cases	2	ID3 / 34 kept in 45
Other: technical reclassification	4	Part of 7 Other cases
Other: removal	2	Part of 7 Other cases
Other: extra household member	1	Part of 7 Other cases
Corrected originals and new	6	The same course of action, including 5 changes in practice
Practice changed among both correct	5	Not original error on report assessment

Statement	Number	Limitation
Income register assessed by correct original	8	19 correct originals
Income register assessed by correct new	17	26 correct new
Absence of income recording in the event of a system failure	3	5 System Error Mode
Dominoeffect -December 2019 original	5	6 domino effect courses; later practice
Dominoeffect -February 2020 original	1	6 domino effect courses; new practices should be known
New correct, original not correct	18	26 new correct
New correct, original part	1	26 new correct
New correct, original correct	6	26 new correct
New correct, original open	1	26 new correct
Wrong new, originally correct	11	All 11 according to heads.57
New non-system decision known	44	1 new has unsolved form; p.57 all 11 wrong are manual

Table 6.1 shows a dash as the appeal total; the body text on p. 57 states 3.312. 2.239+1.073=3.312 is also an own recalculation. 28.000/50.000=56% is an own calculation using rounded figures, not an original overall percentage. Favourable findings on objections are not necessarily established original illegality.

Deviations inside the originals

Search	Original information	Handling
Double payout, original	p.26 / p.31: 13 not correct; p.30 graph / p.29: 14; p.31 refers to one unresolved among 14	Maintain 13 / 14 and classification; no independent additional error
System error, original	p.9: 4 of 20; p.29 / p.30: 5; p.34: 4 not correct + 1 part	Graph groups may include partial decision
Start-up / back-up, new	p.44: 4 / 7; Figure 5.1: 7 / 4; p.45: 5 startup wrong + 2 partial; p.47: 4 post-payment	Graphlend controlled; no harmonisation
System error, new	Figure 5.2 / p.44: 4; p.52: 5 correct	Keep figure and text separately
Wrong New → Original System	p.11: 4; p.57: 2; Annex 2 p.10: 8 manual of 11 (3)	No verified common allocation amount
Case ID28	p. 33 cash assistance; p. 50 resource programme benefit	The same ID is kept together; the performance identity is not reconstructed
Relocation error	Main p. 55 missing registration/processing; annex 2 p. 10 already registered, incorrect handling of personal scope	Two explanations of authority, no independent original records published here
Annex 2 p.9	9 double-payment rows, of which 1 new partial; subsequent text says correct	The sub-status of the table is maintained
Annex 3 date	Annex 2 p.11: 28 June 2018; Annex 3: 10: 28 July 2018	The date deviation of the output is retained; second note 24 April 2018 explicitly

Local case IDs, economy and actual waiting time

The following 16 local IDs are deduced on the same report ID; repeated mention in pre- / post chapters gives the same row. The other 29 runways have not been published in this report. Rows without individual IDs in Annex 2 cannot be safely connected to these 16. An ID is not verified personal integrity.

Local ID	PDF Page	Progress	Amount / result	Efficacy / limit of evidence
1	33-34	Partial allocation by period; two earlier months of resource programme benefit in November	Partly correct p.33 / not correct p.34	No actual payment date
3	34-35/52	Double pension and additional household member	DKK 557 off in June; new decision DKK 557 back	Payment promised within 5 working days; actual bank post missing; new information should be deleted
5	36-37/46	Cash start-up and reimbursement SU	New decision partially correct; 721 kr. a conto announced	No actual payment date
8	42/50-51	Cash benefits / pensions and domino effect	Finding in favour; calculation promised after 2-3 months	New calculation decision actually 5 months later; bank date / amount missing
11	32/49-50	SU double paid	482 kr missing housing allowance; new payment of advance 482 kr.	Squeeze warning, unconfirmed effectiveness
16	37-38	Start-up benefit	Initially correct after the assessment of the report at that time	September / October paid in November; new result not case-tested
17	31-32	Delayed daily allowances	Requirement 1.866 DKK; no January 2020 amount; remaining 80 DKK for annual statement	Decision tree quarling; bank post missing
28	33/50	Double payout	2.573 DKK new payment on account; 237 DKK moved September → August	Originally social assistance, later resource programme benefit; identity/benefit conflict
29	53-54	Start explained as double payout	New wrong after report; 1.019 kr. a conto announced	No actual payment date
30	41/51-52	Domino effect June-October 2019	DKK 2.661 for October + DKK 121 for July announced	Squeeze, not actual bank date
32	38-39/47-4 8	Regulation of resourse ceforløbsbegiveningen	1.185 DKK income; 213 DKK a conto announced 2 Jan 2020	NemAccount rather than housing company; performance not documented
33	39-40/47	Repaid daily allowances	29.988 kr. income; finding in favour, but still no housing benefit in July	No net payment despite finding in favour
34	52	System View Error	658 kr. supplement required back	New information should be deleted; new correct decision may involve reimbursement
36	43	Deferred income correction	Opposition 20 Aug 2019; notification of new objection ca 20 Sep 2019	No conclusion on correctness or closure
44	45-46	Start of disability pension	518 kr. overpayment in December/January determined on the same day as finding in favour	Amount included in annual statement; finding in favour may shift debt
45	55	Daughter relocated 1 March 2019	637 kr. a conto announced	Income continues to be included; the cause of registration / proceedings is disputed in Annex 2;

Advance amounts and dates in decision excerpts are the authority's promises of payment unless a later event is specified. ID8 documents that the new calculation decision came only 5 months after a favourable finding; it does not document the bank payment date. ID33 shows a favourable finding without housing benefit in the recalculated month. ID44 shows that a favourable finding can result in debt for earlier months. Therefore no aggregate net loss or number of individuals whose position was corrected is calculated.

The table of the Annex and the state's knowledge

Annex 1 pp. 61-66 is a blank assessment form, not an additional dataset. It measures benefit/income type, form of decision, correctness, calculation, deficiencies in the factual basis and interpretation of practice. Multiple selections are permitted. No completed set of 45 forms, age tables or counts of person categories is published here.

Annex 2 p.5-8 is the UDK's own statement 18 Dec 2020: monthly cross-cutting review from August 2020 and possible search / resumption of uncontested decisions. UDK states that system errors and other affected cases were

corrected / resumed. There is no list, number, post-check or payment record with the statement. It is therefore counted as informed action, not verified full repair.

Annex 3 p.4-12 documents STAR's guidance on the distribution of income, specific exceptions and retention by post-regulation over the year. The source chain is STAR guidance → The Appeals Board's practice → EXCISE instructions / decisions. Annex 2 p.11 recognises the incorrect application of rules in the case of post-payment / regulation. At start-up / quarterly income, UDK describes other interpretation and wants clarification. The actual differences and date deviations are maintained above; the statements of authority do not automatically have the value of proof of proper practice.

Documented results and concrete residue

The known readable residue is closed: 90 original pages, all numerical figures / tables and both separate annexes are processed. The scoreboard 20 original not correct and 11 new not correct are the same 45 runs and must not be added to the national complaint numbers as individuals.

The remains are precise data needs at UDK /Ankestyrelsen: anonymised 45-case key and completed measurement forms, audit history of category / system number conflicts, concrete recovery cases without complaint and actual payment / set-off dates with net amounts. They are not unread annexes in the three publicly retrievable originals. No contact has been sent.

Copenhagen complaints statistics 2014: the whole annex and unlabelled outcomes

The well-known reading hole is completed: the entire 8-page annex dated March 13, 2015 is actually the RAM text read. PDF2-7 is also directly visually read in memory. All 7 table headers cover diagrams; the outcome diagrams on PDF6-7 have no precise number labels, percentage labels or outcome indicators. The printed year of the original from Table 7 can be reconciled; the size of the circular sectors cannot reasonably replace the missing figures. No official original or image is saved. [GEN-KK14F]

Table 7: All printed annual tables

Year	Reality complaints	Complaints of admissibility	Original site
2009	2468	294	PDF8
2010	2421	439	PDF8
2011	3446	744	PDF8
2012	2960	624	PDF8
2013	2560	642	PDF8
2014	2256	598	PDF8
Own sum 2009-2014	16.111	3.341	Sum of six original annual cells; not personal union

The original states that 2009-2013 was counted as at 28. October 2014.2014’s 2.256+598=2.854 is the same annual population already used. Full rereading creates no new appeal cases. Category totals for six years give 19.452 registration instances; the same citizen, multiple appeals and overlap between substantive and formal complaints are not identified.

Full scope of the other diagrams

Original	What the original actually shows	Specific figures / evidence
Table 1, PDF2	Two monthly curves divided into five control units; axis 0- 160 / 0- 40	No exact curve cells. Month / unit raw data required
Table 2, PDF3	Two distributions over 10 main types of case	No counters, no exact shares. Unclassified formality is included as category
Table 3, PDF4	Material part repeats the classification of the case; formal part has 10 complaints	Long time / missing answers, contact, decision terms, information and guidance are provided; no exact counters are available
Table 4, PDF5	Complainants in each of the two categories	The recipient track / person overlap of the same complaint cannot be deduced
Table 5, PDF6	Substantive outcomes: affirmation, finding wholly/partly in favour, late appeal, lapse, remainder; procedural outcomes: finding wholly in favour, affirmation, remainder, finding partly in favour	No precise numerators / denominators. Annual figures are not automatically mentioned for decided complaints
Table 6, PDF7	Appeal outcomes: affirmation, remittal, late appeal, lapse, amendment, remainder; the procedural section reports no forwarded appeals in 2014	No precise anchor cells. Absence of this recorded track is not the absence of all error of formality
Table 7, PDF8	All 12 printed annual cells reproduced above	No unread cell in the printed annual table

Separate figures and conflict of presentation

The submission for political consideration dated 22. April 2015 states that the service-provider area is excluded and that undecided complaints are not included in outcomes. It gives approximately 50.000 cases and 5,7% complaints. Formal outcomes are described as approximately half finding wholly/partly in the party's favour, a third upheld and a fifth other; appeal outcomes as approximately 70% upheld, 10% remitted for reconsideration and 2% amended. Just over half of forwarded complaints were undecided. These expressions of magnitude are not exact cell counts. The submission gives 598 formal complaints, but its parenthesis states 642→584 together with a 6,9% decrease. The annex gives 598; the conflict is retained. Reduction targets of 3%/10% and previous changes of 13,5%/2,9% must be kept separate from error rates. [GEN-KK14POL]

Highest sustainable criticism and demands

The submission by the municipality documents a limited track of complaints and an unsuccessful appeal outcome. It is an inventory of registered complaint activity, the access, registration and delimitation of which must be controlled by itself. A decrease in the number of complaints cannot only prove fewer illegal acts or better actual help. The absence of the export area makes a separate requirement for the registration of daily and daily offers concrete. The absence of raw cells also makes it practical to require the underlying tables rather than to estimate outcomes from coloured circular sectors.

The review of consequences must follow each original decision through municipal reassessment, a finding wholly/partly in the party's favour, forwarding, the appeal decision and actual provision, contact or payment. It must show which citizens continued to wait during the undecided part and when a registered finding in the party's favour took effect. The existing 8 original pages have been fully examined; the missing raw figures are no longer a gap in reading but a precise demand for documents from the municipality.

Time of the Board of Appeal, revised control objectives and effective protection

Conclusion: longer allowed waiting is not the restoration of rights

The national control programme demonstrates that the objective of 13 weeks of treatment of municipal complaints was not met, but was subsequently replaced by a target of 30 weeks. The end of the national audit in 2025 was based on the fact that the measured times were below the new target. It does not document that citizens had received help within 13 weeks or that losses during the waiting period were repaired. The Board of Appeal's annual report for 2025 then indicates about 35 weeks and failure to meet the 30-week target. This is an independent track of responsibility on actual access to testing and assistance. [AT07, p.3-4; AT13, p.8-11]

The report retains both remittal and redress actually carried out. An appeal decision closes one registered process; it does not show when a benefit was paid in arrears, assistance delivered or a child returned home.

Therefore, the development of the control measure is compared with original dates and the evidence missing between decision and actual effect. Timelimits, legal time limits and Convention requirements have different legal effects and must be tested separately.

The historical course and the modification of the measurement method

Control Point	Original number	Meaning of the citizen's review
The names, 2011	18,2 weeks social; 17,7 employment; 18,0 total	Country weighted average, not one uniform waiting period for all
The names, first half of 2013	28,6 social and 23,6 employment in the Annex figure	Average of regional times; weighting other than 2011
Transfer 1 July 2013	Some 17.000 cases pending	Stock of cases, not new or already decided
2014	7 months / 30 weeks; December 5,8 months / 25 weeks	Annual averages and December measurement are different
2015	4,2 months / 18 weeks	Continued above the previous target of 3,25 months / 14 weeks
2016	4,5 months / 20 weeks	The new target of 3,5 months is about 4,5 months of treatment.
2018, Rigsrevisionen	21,3 weeks for municipal complaints and Payment Denmark overall	30.206 cases closed; not all types of action brought by the Board of Appeal
2021, same control track	13,9 weeks total; municipal social 15,5; employment 13,5	The total includes Udbetaling Danmark; it is not solely municipal
2023 and 2024, final note 2025	18,5 and 27,5 weeks	Meets the new 30-week; does not meet the 13-week goal
2025, Annual Report of the Board of Appeal	About 35 weeks	The new target of 30 weeks was also exceeded.

Sources: AT01 physical PDF17 and 20; AT02 physical PDF24-27 and 31-34; AT03 p.4-6; AT05 physical PDF21; AT06 p.4; AT07 p.3-4; AT13 p.8-11 The complete series of figures, including the regional and quarterly differences, are listed in the following Annex with 14 tables and 200 rows of figures. A certain number is a number in a source, not a number of identified citizens.

The historical review also shows why the measurement method must accompany the figures. Rigsrevisionen’s 2014 report states 28,3 weeks for the social appeals boards and 24,7 weeks for the employment appeals boards for the second quarter of 2013; the annex states 28,6 and 23,6 for the first half-year. These are different periods and must not be interpreted as an arithmetic error. However, the report explains that the historical measure was based on the average of regional averages. A large and a small region can therefore receive the same weight. The national figures in the 2011 original are weighted by cases processed. The two series cannot be joined into one continuous national time series without recalculating the underlying counts. [AT01, physical PDF17; AT02, physical PDF24-25 and31]

Of the cases transferred, 35% were older than six months and 1% older than a year in July 2013. In March 2014 the corresponding figures were 36 percent and about 7 percent. A further 3.036 old cases had been decided until 28 February 2014. The 129 completed old cases in a special effort of 18 November-20 December 2013 are separate decision-making events. Some 4.500 cases were set up by two teams in December; the creation may not be changed to 4.500 decisions or re-established rights. [AT02, physical PDF24-27]

The 2017 control decision was not accepted as the end point by the State auditors, who maintained follow-up. In 2019, the old track was transferred to a new report. This transfer is also not evidence that the problems had been solved. The 2017 note conversion uses 4,3 weeks per month; it would be wrong to recalculate the printed targets by four weeks. [AT03; AT04]

The original 2018 population: 42.837 time-measured cases and several exclusions

Group, 2018	Number	Average, weeks	More than 13 weeks	More than one year
Local employment	16.614	21,2	70,5 %	2,7 %
Local social area	10.221	20,8	69,3 %	1,9 %
Payment Denmark	3.371	23,7	69,2 %	9,0 %
The three groups together	30.206	21,3	70,0 %	3,1 %
Injury at work	12.631	31,6	Not the same 13 weeks	8,7 %

Table 1 of the original, physical PDF21, constitutes the basis. The 30.206 and 12.631 are disjunction groups in this time scale and provide 42.837 time-measured cases. The average of 21,3 is not the average of four shown averages. The rounded percentages also do not give exact integer numbers of persons or temptations. [AT05]

The methodology of the report shows the following chain: 44.429 extracted cases minus 1.526 duplicates, 54 cases in wrong areas and 12 time-void registrations give 42.837. The 12 are explained in one place as missing date of receipt or a date of receipt after the decision, while the table box refers to missing date of decision. The actual cause of registration requires a vote; both sources are retained. The dates of the method section for withdrawals from the systems are in January 2018, although the population covers the whole of 2018. This chronology requires a source correction and is not amended tacitly until January 2019. [AT05, physical PDF49-50]

The analysis of internal workflows uses a different starting population of 42.891, which includes the 54 miscategorised cases again. Deducting 809 cases without records, 11.716 in Captia, 874 outside the period, 440 reopenings and 722 created after the period gives 28.330. This population forms the basis of the workflow analysis and cannot be equated with the 42.837 in the time calculation. Two of 11 record types have only a date and are assigned an estimated time of 06; nine have an actual timestamp. [AT05, physical PDF53 and56]

The process analysis describes an average of 4,3 weeks of administration, 9,3 weeks between work stages and 4,9 weeks of substantive case handling. This cannot be rewritten as meaning that the entire national appeal population experienced exactly 9,3 weeks of inactivity. However, the survey documents a separate capacity issue: time between work stages is part of the time during which the citizen awaits protection. The productivity calculation’s assumption of maintained quality is not a substantive check that the decisions are correct. The report expressly does not examine this. [AT05, physical PDF18 and27-28]

Special time limits and unexplained denominators

Table 3 in the 2018 report has been checked against the table image itself, physical PDF26. It states 103 notice cases with 0,7 per cent exceeding the deadline, 259 previously remitted cases with 0,4 per cent, 185 children’s cases with 27,0 per cent and 191 cases concerning insured unemployed people with 23,0 per cent. The average overrun for the last two groups is stated as 2,7 and 4,4 weeks respectively. [AT05]

For advance-notice and previously remitted cases, the counts shown include only cases without a registered request for further information. At that time, Ankestyrelsen could not generally register when the information was complete. The unknown number of other cases is therefore a specific exclusion from this deadline analysis. They must be counted neither as timely nor as unlawful without further documentation.

There is also an arithmetic vote: no integer share with the denominator 103 is rounded to 0,7 percent to one decimal. One case would give 0,97 percent; zero equals zero. The percentage shown therefore requires another denominator, a separate calculation method or a correction. This is a documented voting problem, not evidence of 0,721 citizens or of a certain hidden number. On the other hand, the corresponding combination of 259 and 0,4 per cent could be one case. A calculated option does not replace the original's unlit numerator.

In the 2022 follow-up, the reported proportion of deadline overruns for insured unemployed people falls from 23 per cent in 2018 to 0 per cent in 2021 and for children from 27 to 1 per cent. Previously remitted cases show 4 per cent overruns in 2021, while the text elsewhere describes 86 per cent timeliness for 2019-2021. These periods and selections must be reconciled before a common timeliness rate of 96 per cent is stated. Advance-notice cases show 0 in 2021. None of these improvements documents actual payment of arrears or a child's return home. [AT06, pp.5-6]

An annual percentage target does not necessarily cover all cases received. For example, the annual report 2022 limits the target of 10 weeks for payment Denmark / sickness benefit for cases received in the third and fourth quarter of 2022. Annual Report 2023 reproduces the same 2022 cohort. It shall not be renamed to all decisions or citizens by 2023. [AT10, physical PDF11; AT11, physical PDF12-13]

Four original citizens' programmes: the weeks of the Authority must be tested against the dates

The 2014 report has four examples. They are four examples of complaints, not four findings of material illegality. Three ended with confirmation and one with remittal for reconsideration back. A confirmation does not in itself resolve procedural rights or documented losses during the waiting period. [AT02, physical PDF33 -34]

The remitted sanctions case has the following printed dates:

Event	Date	Calculated interval to remittal on 10. March 2014
Municipal decision	13 November 2013	117 calendar days
Complaint	3 December 2013	97 calendar days
Commune transmission	16 January 2014	53 calendar days
Receipt by the Appeal Board	5 February 2014	33 calendar days
Remittal for reconsideration	10 March 2014	0

The municipality forwarded the case 44 days after the complaint. The original nevertheless states five weeks of processing in Ankestyrelsen and eight weeks in the municipality. These statements do not correspond to 53 and 44 days respectively. The five weeks are closer to 33 days from the acknowledgement; this is a possible calculation, not evidence of an undisclosed start registration. The sum of the printed 13 weeks gives 91 days, while complaint-to-remittal is 97 days. The calculations use the ordinary difference between dates without counting both endpoints. [AT02]

Meaning of proof: An unclear starting point may shorten the citizen's waiting time in the check-up than in the course of events. **Relevant rule and deviation:** Timely and effective review shall be assessed from the legally relevant events, including the reassessment and transmission of the municipality, with the specific deadline and its possible legal extension. A remittal for reconsideration shows the need for further processing; the original does not provide sufficient information on grounds of error, penalties or post-payment to establish them. **Consistency, responsibility and concrete requirements:** Submit the decision, appeal, receipt log, reassessment, reasoned extension, remittal for reconsideration, new decision and payment dates. The breakdown must show both the municipal and the state period. The actual fault and the financial consequences are determined from these evidence, not from an average.

The other examples include a health insurance case from 15 May 2013 to confirmation of 8 April 2014, a retirement case from 19 June 2013 to confirmation of 4 February 2014 and a speech valve case from 7 June 2013 to confirmation of 2 October 2013. In the pension case, a request for urgent treatment was rejected and a time forecast was extended. The examples show the actual history of the check; they do not document specific diagnostic effects, loss of payment or total loss of four different persons. [AT02]

Versions, resumption and verification of quality

Annual Report 2019 describes a specific break in registration: the transition to a new management information system in the fourth quarter brought 300-500 more pending cases into the same data basis. Cases in the administration's receipt and creation phase had previously been excluded. At the end of 2019, the figure was 8.012 against a target of 7.700; a separate Udbetaling Danmark/sickness-benefit track stood at 2.770 against 2.500. The time target for 2019 was 17 weeks as an interim target towards 13 in 2022, while the measured time was 18,7. The original thus documents both changed visibility of the queue and a specific already known overrun. The 300-500 represent changed registration of existing cases, not 300-500 new individuals or new breaches of law. [AT08, physical PDF12-13]

Information	Versions to stand separately	Specific control needs
Municipal times 2022	Annual Report 2022: 14,9 weeks; 2023-report review: 13,9; Case Statement 2022: 14,6	Identify population, post-registration and pre-comparison start date

Information	Versions to stand separately	Specific control needs
Timeline 2023	The target table indicates a maximum of 14 weeks; the main text refers to 13	Version and target atmosphere; 18,5 exceeds both
Recording	Rigsrevisionen's 2018 analysis includes the original receipt date; later case statistics use the reopening date	New technical start date does not actually remove previous deprivation
At the end of 2020	Municipal 2,4 months in the 2020 statistics against 3,0 in the 2021 statistics; occupational injury 3,1 against 4,1	Post-registration / method shall be documented; no tacit mixing
Ombudsman Criticism 2023 Report	Seven of 486 / 1,4% concerned closed 2022 cases	Not error rate among all the 2023 decisions of the Appeal Board
Ombudsman Criticism 2024 Report	Three of 518 / 0,6% concerned 2023 cases	The complaint-selected control group and time lag shall be maintained;
Access targets in the 2024 table	87 percent within 20 working days marked fourth quarter 2023	The original period shall not be rewritten to 2024;
Monthly curve Payment Denmark	Point between March 2026 and May 2026 marked April 2025	Data marking requires correction; the original mark is retained in the Annex

Sources: AT08-AT12; AT14-AT17. Retrospective differences may be due to post-registration, but the general information on ongoing updates does not prove the cause of each difference. Therefore, the versions and their boundaries are published. The achievement of the objective of the annual report to draw up a quality report is a delivery objective, not a finding that no decisions are flawed.

The Ombudsman's group is particularly important: seven critical decisions out of 486 cases closed are neither the critical percentage among all decisions nor a random sample of all citizens concerned. The purpose is to show documented errors and the source's control objectives with the correct denominator. Similarly, the 2024 figure is 343 surveillance cases older than six months and 216 older than 12 months overlapping stocks. They don't give 559 cases. [AT11-AT12]

The 2025 annual report's total underspend of 66,6 million kroner consists of 40,6 million in the appropriation-funded part and 26 million in the fee-funded part. The report describes that 25 million added in September could not be used to any significant extent during the year. At the same time, municipal case-processing time exceeded the target. This warrants specific scrutiny of the timing of funding, the management plan, recruitment and actual access to prompt assistance. It does not in itself document embezzlement, a particular employee's criminal omission or 66,6 million that should have been paid directly to complainants. [AT13, pp.8-11]

Court proceedings: concluded lawsuits do not equal the number of findings in favour or children

The Appeals Board’s 2021 case statistics count concluded court cases by level of jurisdiction: in 2019, respectively, 116 occupational injury cases, 1.066 children and young people cases and 30 other cases, totalling 1.212; in 2020, 80,1.012 and 29, totalling 1.121; in 2021, 84,1.093 and 31, totalling 1.208. These are registrations per level of jurisdiction. The same course may be counted again on appeal, and the original table does not state the outcome or the number of unique children, parents or workers. The three years total 3.541 registrations by level of jurisdiction, not 3.541 persons or 3.541 judgments finding in the party’s favour. [AT15, physical PDF11-12, table2.12]

A complete avenue of responsibility requires linkage of the administrative case, level of jurisdiction, judgment/order, outcome, grounds for error, reconsideration and actual implementation. The necessary outcomes cannot be inferred from the Appeals Board’s participation in almost all court cases. Participation is not upholding. Nor does the table state whether closure resulted from a judgment or another form of cessation. National administrative outcomes must therefore not be added to these registrations by level of jurisdiction as further new courses involving errors.

Legal Deviation, Liability and Specific Requirements

Documented error and control accounts: The old 13-week objective was not achieved in the completed control track; the target was changed to 30. 2025 also exceeded this. The sources document pending votes on dates, denominators, annual markings and target versions. The special-time track has observed exceedances in the populations indicated. The specific provision of time and its scope for extension must be linked to each case; exceeding an average administrative objective is not automatically the same legal breach.

Strongest sustainable argument: The State has repeated documented knowledge of waiting time and the consequences of a lack of prompt review. Changing the internal target does not change the citizen's need for effective protection or the underlying duties under national law and the ECHR. In child cases, time itself can weaken opportunities for contact and reunification, which must be examined in the specific case. In income-support and disability cases, waiting time must be linked to actual deprivation, expenses, missing support and the legal consequence of the later decision. The report's human rights chapters identify the verified judgments and rules; average time is used as evidence of the system's functioning, not as a substitute for individual application of the legal rules to the facts.

Suspicion requiring further proof: Whether a particular action was maintained without any legal basis during the whole or part of the waiting period; whether a person responsible knew of the invalidity and failed to act; whether certain losses were due to the waiting period; and whether a liability claim was outdated or was actually rejected. Statistics alone do not resolve these issues.

Responsibilities and requirements in order of priority: First, the actual cessation of unwarranted continued intervention and necessary temporary protection. Secondly, a fully informed, quick new decision, post-payment or concrete reunification, where the legal basis and evidence require it. Then the calculation of the entire time and effect of the loss as well as individual assessment of compensation, discipline and punishment. Public servants do not have a general criminal immunity and the lack of automatic suspensive effect does not make a tampering legal. Comparison with the punishment of individuals must be carried out on the same documented acts, calculations and legal conditions; the original private abduction sentences of the report show precisely why a prosecutor's sentence may not be presented as a sentenced sentence.

Specific demand for documents: Supply event extracts showing initial receipt, reassessment, forwarding, receipt of records, complete fact-finding, requests for urgency and suspension, decision, grounds for error, new decision, actual cessation/return home and payment. State reopenings and all exclusions. Use pseudonymous chain keys to distinguish cases, levels of jurisdiction and persons. A family with several children and several decisions must be countable both as one family and as several specifically identified rights holders, without creating new citizens at each level of jurisdiction.

The documented source chain goes from the original control reports and their tables to the shown figures and calculations. Subsequent actual assistance, payment and repatriation remain separate information that these national time reports do not contain. This specific balance shall be indicated as a necessary step of investigation, not as an acquittal of proven errors.

Original time and time tables of the Board of Appeal

This Annex contains 14 tables and 200 series of figures. Versions stand separately. Average cannot be summed to persons, errors or total intervention time.

Udlændingestyrelsen	Not specified	Not specified	27,6	16

Type of action	Week 2025	Decided 2025	Week 2026	Decided 2026
Workers' Holidays	38,1	9	20,4	6

The number of decisions represents neither persons nor unlawful interventions. An average of 14,4 weeks in the use-of-force category requires examination of each case’s legal authority, time limit, start date and continuing interventions; it does not automatically show 15 identical breaches of law. Remittal for reconsideration and actual assistance/return home must be linked separately.

4. Practical Studies: Children, Family and Historical find

Date of check: October 7, 2026. This is a continuous register of numbers. Only the fields selected below are checked in the contents of the original reports. The metadata of the inventory is a separate work entry; it does not mean that all the tables of the reports have been checked.

Historical placement studies

Report	Selection and separation	Names and outcomes	Overlap and demarcation	Original coil de / locator
Installation e, December 2006	21 municipalities convened; one did not deliver. 125 cases, 24 outside the theme; 101 examined from 20 municipalities. Most recent decisions before 20 April 2006, after 1 January 2006. Cases already complained and dealt with are excluded; siblings: only eldest child included.	78 correct, 23 incorrect / 101. 98 referred to as volunteers, 3 without consent. Information: no missing 77, minor 6, significant 13, essential 5.	34 studies are outside the testing of new study requirements; relevant sub-denominator 67: 55 studies were available, 12 were missing. Not all children in the submitted families are counted.	PUD06, p. 11, 14-16, 52.
Placing e, February 2008	11 municipalities × 15 cases = 165 called. 20 outside the theme, 2 not submitted; 143 examined. Newest before 15 May 2007, after 1 January 2006. The defendant is excluded. Siblings: only eldest child.	51 correct, 92 incorrect / 143. Primary cause: 3 missing basis for placement, 21 missing basis for voluntary placement, 68 formal errors. 137 volunteers, 6 without consent.	Actual absence of consent in 22 cases: parents only 12, young person only 7, both 3. One is classified primarily as lacking a basis for placement; hence 21 in the primary-cause table. The 22 are included in the 92.	PUD08, p. 9, 12-16, 55-57, 63-65.
Location is December 2009	14 municipalities × 10 = 140 submitted. 15 excluded: indicted 1, youth sanction 1, protection 1, modified place 1, not placed 4, not among the latest decisions 7. 125 examined. Most recently before 1 January 2009. Siblings: only eldest child.	Table 2.2: 21 correct, 104 incorrect / 125. Table 2.5 and text of bread: 20 correct, 105 incorrect / 125. 121 volunteers, 4 without consent; 11 / 121 missing consent.	Unresolved original source conflict on one case; no tacit correction. Fail causes overlap. The four-month deadline for the study was added in 2009; therefore, raw error rates are not uniform over time.	PUD09, p. 13-18, 74.

Associates and verified internal conflicts in 2008

Measurement	Figures	Denomination	Locator
Parents' consent, including purpose	Yes 122; no 15	137 volunteers	Table 2.11, p. 14
Consent from young people aged at least 15	Yes 46; no 10	56 young people	Table 2.12, p. 14
Investigation under Section 50	90; should be available, missing 40; still within four months 13	143	Table 2.13, p. 15
Content of available studies	High fulfillment 19; some 53; rings 17; none 0	89; one of 90 is omitted from the content study for future parents;	Table 2.14, p. 16
Content of action plans	High 4; some 63; call 33; none 4	104	Annex 3, Table 5, p. 65
Lack of information	No 61; less 43; significant 21; decisive 18	143	Table 2.9 and 2.10, p. 13-14
The same measure of information in municipal annexes	No 70; less 46; significant 11; decisive 16	143	Annex 3, Table 3, p. 64; contrary to the main tables

The Bread text on p. 12 indicates 69 formal primary causes; main table 2.8 and municipal annexes 68. The 3 + 21 + 68 = 92 main table is arithmetic coherent. The method of p. 56 delineates the most recent decisions before 15 May 2007; the later inventory of the National Audit Office indicates 1 July 2007. The original report's own method is recorded as a selection rule. Both conflicts must be resolved at the European level. Ankestyrelsenif the raw measurement forms are to be restored.

Additional child-related studies checked against originals

Report	Selection / opt-out	Expires and delfigures	Original / locator
Involvement, 2011	135 submitted, 14 sorted, 121 from 15 municipalities. Latest before 1 February 2010. The defendant / forwarded excluded; in the case of siblings the same day of the decision only oldest.	46 correct, 75 incorrect / 121. Discharge 25 / 43 incorrect; contact person 25 / 33; affixing 25 / 45. Overlapping error: study missing 33, late 8, content 1; action plan missing 29, late 32, content 1; consent 29; child conversation 14; information 19.	PUD-I11, printed p. 13-16, 79-81 / PDF p. 17-20, 83-85.
Moving / haunting, 2011	132 received, the report indicates 50 quits and 81 examined; 132 − 50 = 82, i.e. one unexplained case. 16 municipalities, 12-17-year-olds, January 2010-March 2011. The alleged, developmental / physical impairment and termination at 18 years is excluded.	14 correct, 67 incorrect / 81. Transfer 40 / 50 incorrect; return 27 / 31. Overlapping error: Child amalgamation rules 57; Action plan rules 42; consent missing without committee decision 19; no repatriation period 22.	PUD-H11, printed p. 9-12, 40-41, 57-59 / PDF p. 12-15, 43-44, 60-62.

In the involvement survey, the four-month time limit is not included in the main outcome, although measured separately. Reasons for errors must not be added to more cases than the 75. In the moving/return-home survey, return to the responsible municipality counts a move to that municipality, not return home to parents. The two surveys' publication in 2011 is not the decision year.

Children's Day Barometer 2024: actual counters

724 cases from 27 municipalities: 276 cases, of which 7 without consent; 448 family treatment / other interventions, 45 others. Decisions of 2022; procedure examined 2021-2022. Cases complained of and cases dealt with as notification cases in Ankestyrelsen should be excluded. The municipalities were asked for an additional 15-20 percent; absolutely submitted / opt-out is not indicated. [BB24, p. 5-6, 42-44]

Measurement	Outcome	Denomination	Page
Current investigation	New 371; updated 142; lawful reason for absence 53; not updated 82; complete absence 61	709	21
Four-month deadline	Compliance with 169; legal ground 15; exceeded 187	371	22
Length of the infringement	During week 13; week-month 49; month -three months 64; over three months 61	187	23
Reasoned position	Yes 501; no 12	513	24
Investigation completed before decision	Yes 306; legal ground 137; no 70	513	25
Conversation under investigation	Requirements met 490; not met 11	501	27
Prior to decision	Requirements met 460; not met 248	708	29-30

Action plan describes effort	Yes 587; no 5	592	35
Three-month follow-up	Yes 355; no 118	473	36-37
24-hour evaluation	Yes 170; no 3	173	39
Response to emergency needs	Yes 8	8	39

Measurement	Outcome	Denomination	Page
Review by notification	Yes 85; not executed 79; result not disclosed 4	168	40

The subtotals overlap. No overall union of cases with at least one breach of the law is stated. Information from parents and contact with the child after the start are indicators, not independent counts of legal breaches. Sub-denominators and exclusions are in praksisundersoegelser-kompakt.json.

Independent methodological criticism: “Requirement met” is not always a documented interview actually conducted. Under § 48, the 460 include 74 instances in which the Appeals Board itself infers a reason for omission although it does not appear in the records. For follow-up, actions may replace documentation of a specific assessment in the measurement. The underlying responses must therefore be retained rather than merely repeating “65 per cent interview” or “75 per cent follow-up”. Appealed cases and cases considered following notifications have been excluded, so the barometer must not be presented as all child welfare cases or all children affected by errors.

Other historical survey figures

Report	Selection / Abstention	Outcome	Limitation	Original / locator
Flekjob, January 2006	145 convened: 100 municipal + 45 boards. 4 municipalities outside the theme; 141 examined = 96 municipal + 45 boards. Local government latest before 1 April 2005; unemployment benefit before 1 October 2004. The defendant is excluded.	Municipality 52 correct, 44 incorrect / 96. Name 42 correct, 1 incorrect, 2 cases of doubt / 45.	The decisions are before 2006; knowledge published in 2006. The criticism of 44 awards cannot be reformulated to 44 refusal of assistance. The two subpopulations are kept separate.	PUD-F06, printed p. 9, 14-19, 47-48 (PDF pp. 7, 12-17, 45-46).
Early onset of mental illness, December 2007	50 municipal awards. The appeal and the proceedings before the Board of Appeal have already been excluded. The rest of the detailed selection under control.	35 agreed, 15 disagreeing / 50 in award.	Favourable decisions; disagreement with the award is not a measure of people denied a legitimate pension. Formalities are not fully measured.	PUD-P07, summary and method, printed p. 58 (PDF p. 59).

Historical inventory, not yet fully controlled

Annex 2 of the National Audit Office provides the following additional original reports with legal review. The names here are checked in the reproduction of the National Audit, but counters, method and sorting must be checked in each Anchor Management Report before they can be included as verified series of investigations.

Report	Publication year of birth,	Case	Municipality r	Period of decision a	Status
Involvement of children and parents in voluntary action cases	2011	121	15	Latest before 1 February 2010	Original content outstanding; includes contact person and relief
Movement and repatriation of young people placed on the labour market	2011	81	16	1 January 2010- 1 March 2011	The entire 65-page original checked; 28 tables and 23 deduced example-ID. See? practice-relocation-help; emgive2011-full -tables -and -castle is for loeb.md
Contribution to the follow-up to the Children's Reform	2012	120	12	1 January 2011- 1 April 2012	Legal control in a welfare survey; original content is not available
Placed children and young people moving from foster family to other location	2014	57	20	1 January 2011- 1 November 2013	Original content not available

The same defined list contains four other welfare studies without a reported number of cases: municipality / region supervision 2009; case handling challenges 2010; municipality supervision 2012; cooperation

between foster families and municipalities 2014. They must not be counted as studies of zero cases. The list covers only studies focusing on case handling in the case of placement, not all of the Board of Appeal's practical studies.

The current public publication entry

The review of the public publication entry and searches gave 205 different publications pages and 321 PDF links. The same PDF may have several hostnames, and annexes / summaries may repeat the main report's cases. Therefore, the link references cannot be counted as 321 independent studies. The ordinary publication list contains mainly 2020-2026; it does not close 2006-2019. The controlled page register is found in the ast-publication-line.json; search observations in the ast-public-inventory-metadata a.json.

The AES study of remitted loss-of-earning-capacity cases and Udbetaling Danmark studies of reconsideration/appealed cases use different selection methods. The rule excluding cases already appealed from the historical municipal samples must not be transferred to these.

Relocation and return 2011: all tables, method and concrete citizen's programme

The November 2011 public original is fully read in memory: all 65 PDFs pages, 28 numbered tables including repeated table 8.1, Figure 2.1 and all case summaries. It is the original publication of the Ankestyrelsen in the public knowledge archive of the social educators. Read the original. SHA 256: 28ff7b6b0014e0e89fe2bedfca2d158cdbfd141df29ff6ffd642e7d3e3c3e58b.

The same 81 cases and overlapping 26 expert assessments are re-used. The 23 local example ID below is deduced across repeated mention and is not extra children. 11 of the cases describe the termination of placement; one of these is the transfer to the girlfriend's residence. Homecoming over the commune border and their own room can be continued. Return is not automatic reunification with parents and it is not the same as a remittal for reconsideration to a new decision by a review body.

Visual inspection: PDF 14 (Table 2.3), 16 (Figure 2.1), 18 (Table 3.1-3.2), 43 (Table 6.1). All other tables and the main text are text-read. Original counters / percentages shall be retained, even in the event of inconsistency. Percentage tables without a rough figure shall not be recalculated to integers. Locators are PDF pages; plain printed page numbers are PDFside minus 3, except the contents of the annex.

Basis, outcomes and known authority knowledge

Measure	Original number / percent / ve rsion	Unit, denominator, overlap and sample	PDF page
Order	February 2011	The Minister of Social Affairs's specific order; release November 2011	PDF 4
Local authorities / age	16; 12-17 years	Movement to own room / repatriation for municipal location / repatriation	PDF 5
Legal Committee	81 cases	Written documents, not all municipal cases	PDF 5
Family Affairs Sub-Committee	26/81	Gravity / clear problem; inadequately documented cases not selected	PDF 5
Consultation	4 Responses	Participation municipalities; not 4 repletions	PDF 4
Own operation	0 cases brought up	The Appeals Board’s express statement despite documented breaches of law; not redress	PDF 4
Legality	83% not adequate	Gross figures in Table 2.2; same 81	PDF 5
Children's conversation	57/81;70%	15 only this deficiency; the other 42 overlap with other regulatory deficiencies	PDF 6
Action plan audit	26/81;32%	Summary; legal error union later separated	PDF 6
No Action Plan	13/81;16%	No extra person sum	PDF 6
Ongoing contact	84%	Contact is not mandatory decision-making close to child conversation	PDF 6
Consent	23% moving cases; 91% consent among 15 +	Summary may have denominator / version conflict, be kept separate from table	PDF 6
Professional / statutory interview	24 valid; 28 actually held	Valid conversation is not necessarily capable of expert use; expert qualitative objectives separated	PDF 36-37 / 57
Figure 2.1	14 correct / 67 incorrect, essential / decisive 32 only incorrect	Visually controlled; no raw numeric segment labels. Not derived as a new count	PDF 16

Table 2.1-2.4: type of case, legality, causes of errors and information

Measure	Source count/%/ version	Unit, denominator, overlap and sample	PDF page

Maximum take-off	Up to 10 prkommune; up to 5 own room and 5 home take-home	Returns fill in remaining places; not random national sample	PDF 60-61
Window	1.1.2010-1.3.2011	Allocation instruction also January 2010- February 2011; 6 decisions 2011,75 in 2010	PDF 61-62
Submitted / dropped / unsolicited	132/50/81	132 − 50 = 82, unexplained 1 case. Absence cases without a breakdown of numbers	PDF 61-62
Excluded	Alleged / treated in a social court /Ankestyrelsen	Also intellectual disabilities/physical impairments, return home at age 18,youth sanction/aftercare, children under 12,new placements, incorrect date/reason, moves outside the responsible municipality	PDF 61-62
T 8.1 repeated movement	50 / 62%; of which 12 / 15%, 29 / 36%, 9 / 11%	Repeat T 2.1, same 50; 38 returns	PDF 62
T 8.1 repeated return / total	31/38%;81/100%	Repeat T 2.1, no extra 81	PDF 62
Returned case-by-case assessment	Each case / measurement scheme for the municipality	Local authority knowledge in addition to public report; unsubstantiated legal consequences	PDF 60 Note / 63
Document base	All relevant files and records requested	Failure to submit plan / study may lead to a lack of information; assessment of documents	PDF 63
Children's advisory committee	26 / 81; second annual extended survey	Not by accident; gravity / well documented. First 2010; no addition	PDF 64-65
Knowledge	Consultation and dialogue meeting	4 consultation response PDF 4; no meeting date or case repair rate in the Annex	PDF 65

Decoupled summaries of cases: actual cessation, relocation and consequences

The information below is the report's reproductions of municipal files and expert assessments. The underlying individual acts have not been published in the report. The granting of aid, actual relocation, the person's statements and expert assessment shall be kept separate in each row. A new national sum for children or parents is not derived.

Local ID	Compact evidence / time chain	Limitation	PDFsider
038	17 year old boy returned to mother after about 3 years of placement; both wishes, the municipality assesses most goals achieved, contact person and revised plan with six target areas. Actually, Homecoming day unknown.	Positive action-plan example; no documented compensatory redress	27, 29
037	17-year-old girl urgently placed about 7 months after father's violence. Parents and girl want home, returned shortly after decision; plan 14 days after and contact / family treatment. No calendar date or subsequent safety result. PDF 52: Psychologist recommended continued placement until self-evident, place assessed possible repatriation; girl's wish changed in a few days. Cultural expertise involved and actually family care after. PDF 58 expert: sudden change of attitude should be investigated in the conversation.	Plan too late; actual reunion described	27, 28, 52, 58

Local ID	Compact evidence / time chain	Limitation	PDFsider
024	15-year-old girl returned home to her mother approximately 1,5 years after her first boarding school placement; psychiatric assessment after half a year, institution for the last half-year; plan not revised.	Return described; support / time unknown	28
068	14-year-old girl returned from short emergency stay to mother; cause unknown, family treatment, undated plan. Continued next page. PDF 30: plan describes school / family care, but Ankestyrelsen evaluate further efforts not specified.	Absence of progress	29, 30
007	15-year-old girl about 8 months placed because of mother's abuse / conflict. After half-year wants home; decided home after 2 months with security plan, joint action plan / child conversation and close follow-up. Actual calendar date unknown.	Real reunion described; not full proof of original illegal placement	30, 37, 39
081	15-year-old boy returned to parents after just over 10 months, school improved; revised plan without young / parents involvement.	Actual return home described; redress unknown	30
006	17-year-old girl moves to her own room after barely 3 months of emergency stay, mother depression. Contact person and continued psychologist, updated plan with six target areas.	Continued placement, non-return	31, 33
017	17-year-old boy boarding school since 2006; decided spring 2010 moved to own cabin 1.8.2010 with contact person. Plan 16.3.2010 relates to 2006 location, no current audit.	Continued placement; planned date of relocation	31
101	17-year-old girl own apartment with contact person; sparse purpose and lack of goals in revised plan. PDF 54: First emergency location April 2008, location terminated due to problems, home period and new institution June 2009; no psychological / psychiatric update since 2008.	Continued placement; later time outages unknown	33, 54
026	A 16-year-old boy moves from the same foster family after approximately 8 years to a residential institution. No interview before the decision/statement of views; yes only after presentation of the institution. PDF 46:no documented reason for the move other than the municipality’s termination of the foster-family arrangement.	Continued placement; consent after presentation is not decision-making conversation	37, 46
018	17-year-old girl placed since 2008; wants home, moves own room with 10 hours of contact weekly; status / network meetings and high involvement.	Continued placement; scope of support	39
153	14-year-old boy retired from outside residence to within the municipality; contract terminated due to circumstances in place, unclear reason for moving and poor youth involvement.	Continued placement, non-family reunion	39
073	17-year-old boy perennial placement, moving his own room summer 2010; conversations 2009 and status / farinterview show wish, no conversation before decision.	Continued placement; old conversations do not replace concrete consultation	40
118	Almost 15-year-old girl repeated placement, released April 2010 without conversation or opinion appears.	Actual month of release; loss time unknown	40
014	16-year-old boy Tourette / ADHD released after 2 years of placement, then post-school financially supported. Children's interview about 1 month before, other involvement is missing.	Home + new school described; date unknown	41
141	16-year-old boy returned to mother December 2010 after about 1 year stay; contact person. Plan says child conversation was held, no conversation ticket.	Actual return; lack of documentation	46
027	16-year-old boy returned summer 2010 after 1,5 years / two places; later does not want contact person; more undated plans without homecoming content.	Actual return; subsequent aid choices described	46

Local ID	Compact evidence / time chain	Limitation	PDFsider
008	17-year-old girl placed since 8 / 9 years moved from treatment home to her own room in a home-self project with a support person; mother has sole custody, both want documented. PDF 55: two	Continued placement; positive consent example	48, 55

Local ID	Compact evidence / time chain	Limitation	PDFsider
	previous suicide attempt, April 2006 treatment homes, last 2 years' exit; planned HF after relocation. Earlier and later mental processes are separated.		
062	17-year-old boy moves his own room November 2010; mother cannot attend but accepts later orientation, parental authority / consent and youth consent unabated.	Continued placement without documented all relevant consents	48, 49
136	17-year-old girl ADD after adolescent psychiatric discharge placed 2009 in foster family, post-school 2-3 months and back. Moves your own room after a non-functioning process; repeated suicide attempts also after a move, later massive support in your own home. Expert knowledge should be involved.	Specific serious consequence; causality not established	52
058	17 years old returned from supported own apartment to pregnant girlfriends' residence in the second municipality, do not want support for themselves / future child. Done 2007, planted 2008, own room 2009, drug experiments since 11 years / hashabuse until half a year before. Place continues to recommend support.	Termination of employment; not reunification with parents	53
108	16-year-old girl urgently placed according to his own statement about stepfather's sexual abuse, stepfather later convicted, mother rejects contact, weak father's new custody. Treated / psychologist, then own room at high school with bothtraining / advisor.	Continued placement; relevant specialised assistance	53, 56
103	17-year-old boy Tourette / OCD after 3 year-old institution moves their own room, self-desire and insufficient need recognition; support and continuous follow-up. Experts assess positive development and an appropriate independent framework.	Continued placement, positive actual support example	56

Documented errors and impact level

• The child expert assessment at PDF7-9 describes a missing current assessment and insufficient investigation of parental resources, weak continuity and insufficient support measures. The fact that the young person is not placed in a worse position may be because the previous placement did not meet the need either; it is not proof of adequate assistance.

• The treatment of the municipal council is required under § 79a (PDF 4) of the Historical Law on Legal Security. The report documents authority knowledge and responsibility for follow-up, but not actually case-by-case repair.

• PDF 54-58 the expert part has no raw count of appropriateness, support or quality of conversation beyond the 26 committee. Qualitative terms as a little over half / major part must not be recalculated into integers or added to 67 cases of error.

• Case 136 PDF 52 documents suicide attempts also after relocation and subsequent intensive support. This shows a serious consequence in a specific case, but not the isolated causal contribution of the municipality's assessment/support deficiencies.

• PDF 47 consent is accepted on the basis of positive setting. The published material does not document separately all the information, voluntary or legal persons' understanding behind each accepted consent.

Original deviations and non-harmonised objectives

• Summary PDF 6 says 23% of moving cases lack consent; Table 2.3 gives 19 / 81 = 23% and later the moving committee is 50. Keep both denominator statements; 19 / 50 is 38%, own calculation.

• Table 2.3 Action Plan 42% specified 51, while 42 / 81 rounded 52%; others 42 indicated 52%. The numerators and original percentages shall be retained.

• Table 3.2 16 years 30 / 81 indicated 36% and 20 / 41 indicated 50%; own rounding would be 37% and 49%. No quiet correction.

• T 6.1 PDF 43 original 27% / 73% for 9 / 22 of 31, own rounding 29% / 71%. No modification of original cells.

• T 2.3 PDF 14 consultation deficit 1, T 6.2 PDF 44 consultation deficit 2 among 6 relevant 2011 relocations. No hidden harmonisation.

• Case 153 PDF 39 refers to point 4.4.1, where in fact 006 / 017 stands, not 153. Cross-reference error retained.

• PDF 46 main text decisions otherform 35%, Table 7.1 PDF 47 says 29 / 81 and 36%. Original versions shall be retained.

• The appeal guidance measure at PDF49 equates consent/requested return home with no need to give the young person guidance. The report does not separately examine whether consent entails a wholly favourable finding in all support/conditions components.
• Submission flow 132−50=82 versus 81 examined (PDF61-62). Attrition is 50 cases that dropped out, not 50 cases excluded from the sample; the earlier compact registers' field n_udtaget_rapport must be clarified as attrition.

• Case 058 return is to pregnant girlfriend's apartment, while general case type description PDF 17 calls 31 returns to parents. Return means termination of employment, not always family reunion.

• Case numbers go up to 153 despite 81 measured; the number is local identification tracks from larger submitted / registered material, not targeted or citizen's national ID.

• Several case references point to the wrong section (026 → 5.1.5 on PDF 46,073 → 7.1.2 on PDF 53,108 → 7.1.3 on PDF 56). Own case ID chains are aligned on actual pages, not blind cross-references.

Lack of documents and concrete measures of investigation

• Ankestyrelsen: Explain flow 132 submitted − 50 deleted as against 81 measured, 1 versus 2 consultation gaps and the original's erroneous percentage cells; provide anonymous data basis / measurement forms with local case ID and exclusion grounds.
• The 16 municipalities: state the date of receipt of the feedback for each case, municipal council consideration under§79 a, actual reopening or new decision, support delivery and individual losses/compensation. The report documents 0 own-initiative cases, but not 0 municipal redress.

• Personal / Reunion Coupling: Unanonymously publishes IDcoupled with the original date of placement, actual termination / transfer date, destination and possible new location. 81 cases and 23 examples ID cannot be matched without a register to national unique children / parents.

• Case 136 suicide attempts and later massive support: individual original records and timeline required for precise causality, avoidable losses and liability. No duration or date of actual stabilisation has been published.

Priority responsibilities and requirements

The 67 decisions measured by the municipalities did not comply with the legislation examined. The evidence is the case-wise control, summarised in Tables 2.2-2.3, with 19 gaps in consent / committee, 57 infrequent children and 42 action plans among the overlapping errors. The rules protect both the young person's right to be heard and the basis for choosing an effective and comprehensive approach. The measures were specific relocation, cessation of placing and change of aid. Therefore, the municipality must be able to document what it did in each well-known case-related case after receiving the case-by-case assessment of the Appeal Board.

The most strongly documented first demand is establishment of the facts and consideration of each individual legal consequence: reopening or a new decision, specific support, actual destination and period of loss. Next are demands for documented follow-up by management and the municipal council and an explanation of the Appeals Board's express decision not to take up any of the cases on its own initiative. The original proves this decision; it proves neither subsequent municipal redress nor an absence of redress.

A precise claim for compensation or debt requires, in particular, original timeline and causality in cases where the need for aid was overlooked or the absence of consent / committee responsible. Case 136's serious self-harm is a specific element of investigation, not a generalised causality for 81 children. The months / years of the published examples indicate specific events; they must not be converted into total illegal placement times, since the legality of the original placement has not been investigated here.

The primary tracking is checked: all tables and each deduplicated example row have PDF locator; original URL / hash and full page checks are recorded in the accompanying JSON. No page in this original stands as unread. The rest are the exact underlying case / person / follow-up documents mentioned.

Inclusion 2011: full original tables and impact chains

All 107 pages have actually been read as RAM text, including all 31 numbered main tables,4 municipal-annex tables,3 figures and the complete measurement form. Figure pages 21/33/44 and tables 58/97/99/100 have been visually checked in RAM. Same cohort of 121 as in the earlier main figures;40 cases reviewed by child welfare specialists are nested and selectively chosen. No new cohort totals.

Concrete evidence chains

Local case ID	Locator	Proof / consistency
116	PDF25 / 29; PDF52; PDF65	Aged 17; the supplemented BFU from 2 years earlier is accepted as to content, but the young person's consent to the BFU is missing. The same case in two sections. The same 17-year-old, contact person: both parents agreed according to the case note; AS counts this as consent to the measure despite the young person's missing BFU consent. The same 17-year-old: the father's meeting participation omitted despite joint custody; he himself requests participation. Consent to support does not determine actual ongoing involvement.
134	PDF25-26 / 29; PDF37; PDF46-47	Aged 15; a BFU from 2 years earlier supplemented before placement, but the young person's consent to the BFU is missing. Diagnostic/family descriptions are accounts of the case, not independent original clinical evidence. The same 15-year-old:AS regards a BFU supplement on the same day as the placement decision as timely; the exact physical date is not stated. The same placed 15-year-old:AS assesses "throughout childhood" as a precise duration; not automatically a reunification plan or an actual 3 years of separation.
025	PDF26; PDF44; PDF61	Age 12, respite care based on a 2-year-old BFU for another intervention, no current supplement; BFU requirement not met. Same age 12 respite case: plan purpose/intervention assessed as good; this does not change the missing BFU. Same age 12: prior interview positive about respite care, consent track does not resolve the BFU deficiency.
091	PDF26; PDF45	2 month child placed; BFU before birth on family treatment not updated after birth before placement. The same 2-month child: the general objectives of the plan do not support concrete impact checks.
022	PDF29	Aged 15, contact person; no attempt to obtain consent to the BFU from the father with joint custody.
027	PDF31-32; PDF47	Aged 7,Down syndrome; no child interview/other expression of views. AS accepts a specifically reasoned exemption; this does not document a general exemption for children with disabilities. Duration in the original plan example:probably throughout childhood; a norm/plan is not an actual cessation date.
063	PDF31-32; PDF47	8 years, ADHD; child interview only after the respite-care decision, no alternative account of the child's views; AS accepts the local exemption assessment. Duration in the original plan example:12 months of respite care every other weekend; a standard/plan is not an actual cessation date.
076	PDF34	10 year ADHD; BFUhealth point says healthy / healthy despite medical treatment; content any degree, not separate illegality judgement.
131	PDF35; PDF81	Aged 8, contact person without a reasoned position in the BFU. The same 8-year-old: PPR report almost 4 years after referral; family treatment granted to the father never started. Residence previously PDF35 equally with each parent versus PDF81 mostly with the father; version discrepancy not harmonised.
034	PDF37	15 years, municipality known problems several years / notifications especially 2 years. BFUconsent 3 m before violence; physical placement 10 d post-episode; ASrejects emergency exception to missing BFU.
103	PDF37	16 years acute placed after sudden deterioration; ASaccept emergency exception to BFU decision. No automatic final legality of all other guarantees.
068	PDF39	Aged 9; concerns for approximately 7 years; moved municipality just over 1½ years earlier; home visit→child welfare assessment at the earliest 5 months.4-month deadline breached; not all 7 years in the same municipality.
030	PDF42	17 years of age, retired after 1 year of residence and no further education. Contact person without plan; actual date of entry / school period unknown.
098	PDF42	14 years of relief without anticipatory plan; the municipality known the family several years.
074	PDF42-43	Aged 15, placed as an emergency following the reported suicide attempt; not previously known. AS accepts the missing plan before the emergency decision; actual return/redress not stated.
010	PDF45	17 years two previous placements, now returned to father; contact plan without concrete effort. No actual date of return.
130	PDF46; PDF80-81	Aged 13,respite care, plan duration uncertain without further reasons. The same 13-year-old:professional assessment of timely/appropriate respite care, but plan duration uncertain according to PDF46. Professional approval does not remove a specific deficiency in safeguards.
084	PDF46	12 years of placement, duration depends on development without further evaluation; duration criteria omitted main error.

Local case ID	Locator	Proof / consistency
062	PDF47	Original schedule duration: 1-2 years; standard / plane is not actual hearing date.
097	PDF47	Original schedule duration: like 2 years or longer; standard / plan is not actual hearing date.
088	PDF47	Original plan duration: long-term review; standard / plan is not actual hearing date.
125	PDF47	Original schedule duration: one school year; standard / plan is not actual hearing date.
009	PDF48	17 year contact person, plan 1 ½ m after decision.
115	PDF49	6 years, respite care; plan on the decision date; AS: timely.
058	PDF49	17 years of contact, plan 1 m before decision; AStimely.
092	PDF49	Newborn physically placed as an emergency the day after birth, 8 weeks premature; plan 2 months after birth, emergency exception accepted by AS.
135	PDF49	17 years, emergency respite care after being thrown out; plan within 4 months, emergency exception accepted by AS.
083	PDF53; PDF77	Child aged 1½ years placed in care, preprinted form with both parents' consent; approved by AS, original consent not independently seen. Same 1½ years: need known from birth, later placed in care; child expert assesses a late response. Statements about parenting capacity require their original basis before independent application of the law to the facts.
001	PDF53	Age 15, placed outside the home, mother's consent but no documented consent from the father with joint parental responsibility.
008	PDF53	Age 16, placed in care, missing consent from the father holding joint parental responsibility. No actual/home date.
060	PDF54	17 years of existence, indirect joy transfer accepted by ASas intended consent; original journalism provided here.
080	PDF54; PDF78-79	Aged 17,wants to leave the parents after a suicide attempt; AS accepts the statements as consent to the purpose; independent examination of the originals is necessary. The same 17-year-old:previously placed→returned home to the father→placed again; course known by year, actual dates unknown. Sexual abuse appears as an allegation by the mother, not a verified fact.
086	PDF58-59	14 year contact person first informed by decision, no prior conversation / exemption / alternative attitude; 5 siblings not automatically 5 additional error victims.
093	PDF59	Aged 13,placement after approximately 8 years of respite care and many notifications; no prior child interview/statement of views/assessment of an exemption.
105	PDF60-61	12 years of contact, family known before birth; conversation before decision and concise request to person, ASinterview guarantee met.
120	PDF61	9 years of reloading 4 m; conversation about general well-being but not the child's attitude to concordant support.
075	PDF61; PDF65-66	9 years, new respite care every 4th weekend; no child interview/views/exemption examination. Same 9 years: no interview with the child at any time, parents informed only when a possible respite family found; decision time→delivery time unknown.
114	PDF61	5 years of disability without spoken language; local exemption accepted by AS. Not generalexemption for all disabilities.
123	PDF65	6 years, relaxation since 2 years → emplacement; anticipatory conversation / attitude; asemblemhigh.
048	PDF71	Aged 15, a contact person was actually provided 1 year after the decision; professional criticism of missing assessment and prevention. 1 year without granted support is specific; causation of criminality is a consultant's assessment, not counterfactually proved.
069	PDF72	Age 11, autism; specific exemption because of an unfamiliar adviser/the burden of an unpredictable situation professionally accepted; no general diagnosis-based exemption.
129	PDF72	14 years of Down syndrome, counsellor greetings home; concreteexemption accepted professionally.

Local case ID	Locator	Proof / consistency
113	PDF72	Aged 12,ADHD; municipality/parents' new interpretation is not a child interview before respite care; the child expert disagrees and wants direct involvement.
079	PDF76	Age 17, own approach→interview/psychologist→placement; child expert assesses good involvement, not an independent judgment on the outcome.
073	PDF81	Age 3, concern involving the eldest child 8 years earlier; family with 4 children, respite care inadequate according to a professional assessment. Not all 4 recorded in a unique error cohort; family records required.

Independent judicial review

Total correctness is a defined measuring instrument. The study omits the form of administrative law, justification and review guidance, as well as the four-month period, consent to the investigation itself, the expected duration of the plan and systematic inclusion as independent main criteria. The duties in force in the present case do not lapse in the opt-out procedure. The separate cells must therefore be retained and the lack of public cross-coding prevents addition to 75 cases of error.

The absence of valid consent constitutes a concrete departure from the conditions of the place of placement. Each of the 11 places of accommodation requires verification of consent, competent enforcement, effective implementation and continuation. A general presumption of the legality of the Authority cannot replace those evidence. At the same time, a case description of a parent problem must not be transformed into independently verified facts solely through repetition in legal and child-friendly sections.

One year without a granted contact person and almost four years waiting for assessment show specific periods in which support or the basis for decision-making was missing. The demand is actual delivery and individual redress, simultaneous assessment of loss and responsibility, and examination of the content of own-initiative decisions. The percentage of correct cases can neither measure these periods nor prove redress.

Checks and residues carried out

No unread page or numbered numerical matrix in the original. Three graphs' unlabelled data cells and internal conflicts in the original require raw tables; 121 original case records and completed forms, 14 exclusion-reason cells, linkage/union of people for cases already appealed, 2 original own-initiative decisions and actual support/redress/accountability have not been obtained.

The placement study 2006: all 32 tables, parental roles and specific separations

The study demonstrates concrete shortcomings in the basis for interventions in the family life of children and parents. Its 23 rated change outcomes out of 101 selected decisions are a control assessment, not a count of 23 actually native children. The published original has now been studied in full, all 63PDFs pages including method and questionnaires. All 32 numbered tables are included below. This is a deepening of the same 101case-cohort, which is already included in the report; it must not be added again.

Selection and cases not covered

21 municipalities were selected, one could not supply cases, and 20 were included. 125 received cases minus 24 outside the topic yielded 101. The sample consists of the most recent 5-8 relevant placement decisions per municipality before 20. April 2006, with a decision after 1. January 2006, under the methodology described. Cases already appealed are not included. In sibling cases, the oldest child is generally selected. The low number of compulsory cases therefore cannot be used as a national distribution. Answers to organisational questions vary between 10 and 20 municipalities.

The excluded appeal population must be examined separately. There is no public person-identity key showing overlap with other practice surveys, appeals, siblings or parents. Table 2.3 describes parental-responsibility roles; it does not give a count of unique affected adults. Offers to 12 mothers and 7 fathers in table 2.26 are 19 role instances with unknown overlap. Involvement, consent to assessment, consent to placement and actual reunification are different events.

All tables with original denominator

The tables reproduce factual cell values with their own short row labels. Percentages are referred to as percentages; blank or not explicitly printed cells are not changed to zero. The original case summaries are the reproduction of municipal documents by the control body. The citizens' original records are not publicly presented in this report.

Table 2.1 - Original PDF11

Form of settlement	Number
With consent	98
Without consent	3
Without parental consent, with young people's consent	0
Total	101

Table 2.2 - Original PDF12

Age	Boys	Girls	Total
0-3 years	2	2	4
4 to 6 years	4	1	5
7-11 years	7	5	12
12 to 14 years	20	12	32
15 to 17 years	21	26	47
Undisclosed	Not specifically printed	1	1
Total	54	47	101

The unlit row's boy cell is not filled in in the text reproduction. A calculated zero shall not be produced as a printed original cell.

Table 2.3 - Original PDF12

Parental authority	Number
Common	48
Mom alone.	46
Father alone	5
Others	2
Total	101

48 joint custody is not 48 unique parents. The report does not provide the identity key for deductibility.

Table 2.4 - original PDF13

Initiative / Contact	Number
Parents	46
School / SFO	26
Municipality	22
Others	22
Child / Young	19
Health services	14
Family / network	10
Police / Court	8
Daily offers	4

Several entrances may occur in the same case. Order 171 is not 171 cases. One case's entry is unknown. Of 46 parents' requests, 17 are only entry and 29 are combined; of 19 children's requests, 6 are alone and 13 are combined.

Table 2.5 - Original PDF13

6-10	5	0	0	5
11-15	2	2	0	4
16-20	0	3	0	3
21-25	0	1	0	1
26-30	0	1	2	3
Exceeding 30	0	0	4	4
Total	7	7	6	20

Local authorities vary between 10 and 20 according to the question. The area of staff also includes other child, support and disability tasks.

Case-chains and the actual timelimits

The following own summaries maintain the original case codes so that repeated summaries do not turn into new people. The original report is the source of the statement made by the control body; the underlying municipal original documents are still necessary for self-examination.

Case a	Locator	Specific information on the control report	Meaning and delineation
3.4	PDF24 and 41	15-year-old girl placed 26.2.2006 and returned 31.3.2006; plan missing before decision; the investigation would amend the decision.	33 calendar days of actual placement. Return home is justified by dissatisfaction with the school; it is not documented as the result of a legal overturning.
5.19	PDF24-25	13-year-old girl; contact 28.12.2005, decision 26.1.2006, placement 1.2.2006 to carry out an assessment. The review body states that there was no basis for placement and does not accept the emergency justification.	Actual start is documented in the summary. The end, the return and the final responsibility are not disclosed.
4.8	PDF24 and 30	16-year-old girl; contact January 2006 and placement 13.3.2006 without necessary examination. The summary points out that two of three posts were vacant.	Evidence of capacity explanation and insufficient basis; no documented end date.
4.2	PDF25	13-year-old boy; study and plan after decision, with psychological material as insufficient substitute for overall assessment.	Subsequent document production does not in itself show legally original basis or restored family life.
4.6	PDF25-26	14-year-old girl; the mother's reluctant consent after the assessment does not cover the purpose.	Requirements for specific review of the content, voluntary nature and legal basis of consent; no end date.
2.8	PDF26	15-year-old boy in sister; no documented contact with or consent from the mother, although described as positive.	An assessed positive attitude is not documented consent.
0.2	PDF26 and 38	14-year-old girl with joint custody; father abroad has not been tried involved or asked.	The same case occurs in several places. Two children may not be counted.
5.22	PDF26-27 and 32	1-year-old boy, parents 17 and 20 years: mother consents to study 23.2.2006; father asks for help 13.3; acute placement 27.3 with mother's consent and father's previous aid wish treated as consent.	A request for help does not document consent to a particular placement. The different dates and consent objects must be kept separate.
5.18	PDF27 and 37-38	17-year-old girl refuses placement 14.3.2006 but the decision is treated as voluntary. The young person is not included in the study; the needs of younger family members have not been evaluated.	Concrete consent and involvement errors; younger family members are not extra investigated cases.
2.9	PDF27-28	Mother psychiatric inmate 5.4.2006 gives registered consent; 18.4 she does not remember. Father with joint authority has not agreed. The investigation and plan are missing.	13 days between entries have not been documented total separation time. The number of children is not determined by pluris.
1.1	PDF28	4-year-old boy; the municipality's assumption of custody has not been documented; plan is missing.	Actual custody must be documented before the municipality's assumption is used as a basis for action.
1.11	PDF29	15-year-old girl; study is missing, but the control body finds other information sufficient for the outcome.	Unchanged result cannot be rewritten as the absence of the investigation existed.
3.11	PDF29-30	The age of the summary 7 months and the 3 ½ years of the assessment have not been clarified.	The original's contradiction must be visible; it cannot be used for a secure age or person count.
3.8	PDF30-31	15-year-old girl; contact 7.3.2006 and acute placement 9.3 with family care.	The summary justifies specific acute exception; two days of process is not automatically illegal.

Case a	Locator	Specific information on the control report	Meaning and delineation
3.9	PDF31	12-year-old girl; police 9.3.2006, video interrogation 10.3 and acute placement; subsequent investigation is planned.	The initial trajectory provides no public end date or reunification information.
5.10	PDF31-32	11-year-old boy; acute placement at late evening and absent mother who later wishes to continue.	Consent and urgency must be attached to each time; the summary does not document the legality of the entire duration.
1.3	PDF33-34	16-year-old girl; relevant grandparents and sister are not adequately described in the family survey.	The network shortage may affect the alternative to placement; original alternative course and end date are required.
5.11	PDF34	16-year-old girl; school description only indicates the school type with no function, well-being and further education.	The title or institution name does not replace specific needs information.
3.6	PDF35	13-year-old boy; health section mentions allergy, but does not take a position on possible drug problems mentioned elsewhere.	The inconsistency of the source chain requires verification; the ruse suspicion is not independently verified.
0.1	PDF35	16-year-old girl; father died 2005 and information on mom's mental problems, but no sufficient information on friend environment.	Family information is summary statements; needs and network assessment must be based on original documents.
5.3	PDF36	16-year-old boy; school completion, local environment and housing opportunities are specifically included in the youth assessment.	This is the same age-restricted analysis, not an additional population.
5.14	PDF36-37 and 42	16-year-old boy; education, the local environment and housing are inadequately assessed; the plan only indicates an indefinite duration.	Unclear objectives and final perspectives may prolong the procedure; actual cessation date is not disclosed.
3.5	PDF37	16-year-old girl with a son and a half-brother named.	Maternity, child and siblings are different roles; they cannot be counted as three of the 101 without identity checks.
3.12	PDF37	14-year-old middle brother; oldest already placed and youngest at day school, with studies referred to.	The family context does not create three new sampled cases.
4.10	PDF37-38	15-year-old girl with 13-year-old brother; the need for a separate sibling study is specifically assessed.	A relevance assessment is not a general number of siblings or finished bets.
5.23	PDF38	A 17-year-old, the eldest of four, provides extensive care for siblings aged 7,3 and 1½ years. The oversight body calls for individual needs assessments.	One investigated case of old age; three mentioned siblings with possible unmet needs, without documented national delusion.
5.1	PDF32 and 39	12-year-old with 3-year-old sister; mother's consent to study has not been documented and grandmother cannot be the main caregiver.	Repeatations are gathered under the same case code.
1.5	PDF39	14-year-old boy; possible support of mother and grandmother has not been sufficiently investigated.	Requirements for clarification of less intrusive support, with concrete accessibility and the needs of the child.
5.4	PDF43	14-year-old girl previously housed in Greenland and returned in Denmark after cessation of care. The plan is imprecise on integration and family ties.	The actual return is mentioned, but the date and connection to the search is unknown.
1.12	PDF44	4-year-old boy; consent withdrawn and coercive decision 24.4.2006; older study continues to be assessed appropriately.	The review shall follow the change from consent to coercion; the date of selection of the original shall require a separate vote.
4.18	PDF44	The record in the coercion case lacks guidance on appeal rights.	Effective review is specifically concerned; effective redress, duration of action and subsequent correction are required.

Case a	Locator	Specific information on the control report	Meaning and delineation
5.21	PDF45	4-year-old girl acute on suspicion, with medical records without evidence of intrusion and age-threatening bruises. The inspection body asks for reasons; the Committee on Children's Rights does not approve the decision of the chairman.	The suspicion is not verified by being repeated. Non-approval shall be followed for effective termination / return; this end date is not disclosed.

Legal consequence, responsibility and concrete requirements

The strongest specific criticisms are a decision without a sufficient basis for placement, missing relevant consent and failure to approve an emergency decision. In case 5.22, the father’s request for help cannot, without documentation, be turned into consent to the specific separation. In case 5.18, an express refusal by a 17-year-old cannot be presented as consent. In case 5.19, the review body expressly states that a basis for placement is missing. Each point must be examined under the historical version of the law on the intervention date and the specific conditions for consent, assessment, emergency action and coercion; current Children’s Act provisions cannot be uncritically moved back to 2006.

The consequence of the action is the actual separation of the child and the loss of relevant parental involvement. Case 3.4 has a proven 33-day course and an established plan problem. The two facts are both documented in the summary, but the published source does not state that all 33 days were homeless or that the return was due to a violation. Comparison with private 37-day evasion in the report's chapter of responsibility must therefore show, respectively, the actual duration, the legal basis, the consent, the guilt, the actual review and the result of the judgment. The 40-day suspended prison of the private case is a real punishment in the specific case; it is not an automatic punishment for all municipal planning errors.

The specific chain of responsibility is the decision-maker, competent certification body, management and ex post control. The requested further course is the maintenance of simultaneous original records and consent documents, a separate decision on continued intervention, actual date of return / contact / support and a verifiable liability assessment. The report's reference to one own-initiative case under Article 47 does not give an additional 101- case code nor evidence of final return. The Committee's duty to follow up the practical study demonstrates a control route, but not its actual impact on these children.

Opposite and residual evidence of the original

Documented disputes include 55 against 57 studies, 64 against 65 journal notes, the exchange of 7 / 10 explanatory notes, a meeting column with a total of 86 and a total of 87, and percentage cells which do not match the printed numbers. There are also summaries of different ages or dates which require a vote with the original records. These concrete contradictions must not be concealed by adjusting the figures to a nice total.

All 32 numbered tables are now covered. The figures in figure 5.1 can be read as text, but their mapping to the bars has not been visually verified; figures 5.2/5.3 do not contain exact bar values in text. No values are invented from the height of the graph. The remaining substantive evidence consists particularly of the underlying 101 case files, the selection list with the 24 excluded cases and the cases already appealed, the final decision in the own-initiative case, municipal follow-up and citizens’ actual redress. These are precise additional demands for documents, not a reason to tone down the deficiencies already documented.

Appointment 2008: full original, all tables and actual meaning of consent

The full 73- page original is now text read, including all 39 main tables, all 5 municipal tables and the measurement scheme. PDF10 and 56 are also visually controlled in memory. This explains the same 143case-cohort in the historical series of the report; no 143 new cases are added. The cover indicates January 2008, the issue field February 2008. Both dates shall be retained.

The inspection body assesses 92 / 143 decisions improperly.22 cases lack relevant placement consent; 21 are listed as primary consent category and one in the primary category of non-placement basis. The control report shall not seek a hypothetical coercive power to replace a lack of voluntary consent. The known conditions must be followed to:

actual residence, termination, new valid decision and personal liability; the original does not give the overall restoration account.

Limitation and units

11 municipalities were asked for 15 cases each: 165 called minus 20 outside the theme and 2 not submitted = 143. Decisions should be after 1.1.2006 and the latest before 15.5.2007. Cases already complained are excluded; in the case of siblings only the oldest children.24 decision dates are undisclosed and age is set at 1.5.2007. Some summaries actually describe repatriation, while case 065 was explicitly never implemented.143 decisions are therefore not 143 documented new physical separations.

89 studies of substance are a subset of 90 available; one study concerns future parents and falls outside the then content examination.104 plans are the subset of the same cases. Parents' columns, siblings and source indications provide roles and sources; they cannot be summed up to unique persons.

All numerical tables and the exact figures of the graph

The row labels below are own short terms. Numbers and percentages are the values actually read, including the actual contradiction of the original. A code in the empty measurement scheme is a response category, not an observed number of citizens.

Table 2.1 - PDF9

Category: Form of decision	Number	Printed percentage
Optional	137	96
Forced	6	4
Forced with young people's consent	0	0
Total	143	100

Table 2.2 - PDF10

Age	Number of boys	Boys%	Number of girls	Girls%	Total number	Total%

Decommissioning quarter	Number
1st kvt. 2006	4
2nd kvt. 2006	6
3rd kvt. 2006	14
4th kvt. 2006	10
1st kvt. 2007	44
2nd kvt. 2007	41
Total known date	119
Unstated date	24
All decisions	143

All six column numbers and mapping actually visually controlled in RAM7.10.2026 Sum 119 plus 24 = 143.

Case chains, actual stay and loss of participation

These are own summaries of the statements made in the control report. The 38 separate case codes are counted once each in this list; they are not 38 additional cases on top of 143. Underlying medical records, health information and citizens' statements are not independently verified by their reproduction alone.

Case a	Locator	Information of the control report	Consistency and further requirements
159	PDF27	15-year-old deaf boy; dietary needs treated as placement, although the control body finds sufficient information and no basis for placement.	A need for support does not automatically provide legal authority for the further municipal decision-making competence that accompanies placement.
061	PDF27-28	13-year-old girl; actual permanent residence with the former respite-care family and a new placement decision without a supplementary assessment; the older assessment approximately three years old.	Permanent residence, authorisation and regulatory needs assessment shall be aligned; no precise end date.
072	PDF28 / 36	14-year-old boy about six years earlier placement, escape and actual repatriation, then new decision without plan.	The historic six-year period has not been proven for six years without legal basis; a new plan error does not automatically give rise to the legality of the historical period.
049	PDF28 / 45	13-year-old boy; municipality justifies lack of study with work pressure, plan is also missing.	Capacity explanation documents knowledge, not fulfilment of guarantees or emergency exception.
160	PDF28-29 / 32-33	11-year-old boy; no conversation before the decision, later orientation.	Subsequent information shall not give back the lost participation before the decision is taken.
128	PDF29 / 36 / 41 / 4 9	13-year-old boy; the municipality chooses not to involve father because of described mental illness and limited contact, no father's consent; the child is first spoken on the day of placement; siblings are not assessed.	The same case code repeated four places; one case, several concrete overlapping errors. Original health statements must be tested independently.
065	PDF30-32	15-year-old boy; parents choose meeting without him, no young consent, insufficient information and no investigation. The placement will not be launched.	Decision without substantiated basis, but no proven physical separation as a result of that decision.
041	PDF30 / 45-46	16-year-old with extensive intellectual disability; no consent test for young people, special plan papers without purpose, effort and objectives.	The consent of the mother does not automatically replace the required consent of the child; the lack of consent requires legal representation and verification of competence.

Case a	Locator	Information of the control report	Consistency and further requirements
027	PDF30	Three months old girl; parents face voluntary or forced placement and choose consent while they do not understand the necessity.	The inspection body considers that the agreement is inadequate. The threat of other interventions is not evidence of informed volunteering.
042	PDF31	15-year-old pregnant girl; joint custody, only mother's consent.	The rights of the father and young person must be treated on a concrete basis; the pregnancy must not be counted as an additional child already placed without proof.
022	PDF32	14-year-old girl and younger sister previously placed about six years earlier, returned the year before without expected usefulness, now new acute decision insufficiently reasoned.	Two children are mentioned, but only the oldest is selected. Exact previous duration, new physical residence and end date are unknown.
138	PDF34 / 40	15-year-old girl; decision on network placement before examination, which ends approximately two months later; local environment and school continuity insufficiently assessed.	Two months relate to subsequent investigation, not documented overall separation time. The original allegations of violence are summary statements.
030	PDF35	14-year-old girl; hospital report 9.1.2007, meeting 11.1 and emergency decision upon discharge 12.1.	Three days between knowledge and decision, concrete acute assessment; no end date or date of return.
112	PDF36 / 53	13-year-old boy, emergency placement without consent; later consent to assessment, but the emergency decision and reasons are not documented as communicated in writing.	Time limit 24 hours and information on the rights of the parties / lawyer fails on the assessment of the supervisory body. PDF53 refers to the boy as a girl in a sentence; co-code.
037	PDF37	7-year-old boy; specific health conditions and controls described.	Checkpoint on source content, not new error population.
154	PDF38	16-year-old boy; urine sample approximately two months earlier, but current health data from boy and mother are missing.	A previous test does not replace a specific overall health assessment.
137	PDF38	Almost 6 years old; the health section has only the designation unspecified.	The title of the form does not prove the content of the study.
039	PDF38	13-year-old girl; ethnicity and language specifically discussed.	The documented control point is the content assessment, not verified damage.
083	PDF38 / 41	Barely 16-year-old; possible debt and drug concern without original information from young / mother; no own position in study supplements.	Repeated concern is not self-verification.
150	PDF39 / 42	16-year-old girl; network / school / own wishes referred to, but crash risk and hedge unconsidered.	Different checkpoints in the same case; two younger siblings are not two extra cases examined.
163	PDF40 / 50	10-year-old boy; sibling assessment made, but conversation before decision is not about placement; later position is obtained.	A conversation may be registered and yet lacks the necessary topic and time.
111	PDF41	16-year-old girl; own housing request described, father with custody is in custody.	Parents' detention and the child's intervention may be simultaneous, but the report has no personal union with the custody register.
100	PDF42	13-year-old girl; worsened situation, but the supplement reuses old resource description without current network assessment.	Previous information is not automatically simultaneous or comprehensive for the new decision.
157	PDF43-44	14-year-old with ADHD; notification 29.5.2006, meeting 4.9, deadline 29.9, completed study 27.3.2007 without preliminary assessment.	302 calendar days from knowledge to completion, 179 days from four months to completion; unproven 302 days' placement.

Case a	Locator	Information of the control report	Consistency and further requirements
046	PDF44	16 years; knowledge 11.12.2006, consent 23.1.2007, preliminary assessment 4.4, end 6.5.2007.	146 calendar days from knowledge to completion. The original writes the deadline 11.4.2006, which is before knowledge; the calendars give 11.4.2007,25 days to end. The original date shall be kept in conflict.
132	PDF46	16-year-old; plan without purpose.	Evidence of lack of target basis; actual cessation unknown.
162	PDF46	13-year-old; the plan's positive future goals do not specify concrete intervention.	Abstract development is not a specific aid programme.
125	PDF46 / 53-54	11- year of compulsory schooling; plan without specific objectives, decision without decisive factual considerations and without decision with regard to father with common authority.	The supervisory body shall designate a decision in relation to both parents as a condition of validity; no effective date of termination.
008	PDF46-47	10-year-old; plan repeats general development objectives on several themes.	Recurrence does not provide precise efforts or a verifiable reconciliation objective.
062	PDF47	Plan indicates indefinite duration of stay.	No precise end perspective; actual days unknown.
047	PDF47	The plan shall indicate a long duration at least until the first year of life.	The inspection body considers it too imprecise; the child's actual end date is missing.
155	PDF49	16-year-old with autism and grief; diagnosis is used to avoid conversation.	An adapted interview with a support person must be investigated; a diagnosis is not on its own evidence that participation is impossible.
129	PDF49	13-year-old with OCD / anxiety; no conversation before decision and no concrete reasons.	Requirement for appropriate participation and specific reasons for an exception.
135	PDF50	4-year-old; no conversation or justification.	Age alone does not replace individual maturity assessment.
084	PDF50	5-year-old with partial paralysis; no conversation or justification.	Physical disability does not document the inability to participate.
021	PDF50	14-year-old; interview completed but not about the upcoming placement.	95 recorded conversations are not 95 properly conducted conversations.
088	PDF53	13-year-old girl urgently placed without documented decision copy / written justification.	The same 24-hour guarantee and access to a lawyer / access to documents must be subject to effective review.
078	PDF54	New born coercive; committee decision and complaint guidance not documented.	The absence of evidence in the course of the procedure requires the simultaneous supporting documents for competence and justification.

Legal Deviation and Liability

The 22 cases of consent shall, after verification by the inspection body, provide evidence of a lack of basis for the chosen form of voluntary decision. It cannot be repaired analytically by inventing a coercive decision that was not taken. In Case 027, the parents of a three-month-old child were faced with voluntary or compulsory placement while they did not understand the purpose; the supervisory body rejects the adequacy of the consent. In case 041, large-scale disability is used in a process without proven legal position on the young person's own rights. In case 125, the decision in relation to both parents has not been implemented. The actual deviations must be carried out in accordance with historical service law § 52 / 53 / 58, the rules on competence and the concrete guarantees reproduced by the original.

The importance of the evidence is that formal conditions here protect against physical separation on the wrong basis of decision. A lack of discussion may deprive the child of the opportunity to influence the decision; it may not be restored simply by information after the decision. The lack of support and imprecise end targets may affect the possibility of reunification. However, the source shall not document for each child the subsequent period of stay, new decision, return or appeal for responsibility.

The avenue of responsibility must therefore identify the original decision-maker, management's documented knowledge of workload, the specific power to stop or change the intervention and the municipal council's follow-up under Legal Protection and Administration in Social Matters Act § 79 a. The foreword's two own-initiative cases are a review action; they are neither two additional 143 cases nor two documented completed instances of redress. The demand is original consents and contemporaneous records, physical start/end, a reasoned review of continuation, actual support for child and parents and assessment of specific compensation/disciplinary/criminal responsibility.

Original conflicts and remaining necessary evidence

The main conflicts are 68 / 69 formal errors, 115 source data against 29 missing child data in 143 cases, main tables 61 / 43 / 21 / 18 against Annex 70 / 46 / 11 / 16 information categories, the summary 42 against Table 41 for late plans, different 3 / 61 against 4 / 60 percentage distribution of the same number of plans and 13 no + 1 not referred to as 14 without temporary evaluation. The original's Sønderborg percentages by mentioning 10 and more other percentage cells can also not be uncritically converted to secure integers. Case 046 s exempts 2006 lies before the described knowledge; the own calendars and the printed date are both visible.

All 73 pages and all 44 numbered tables are now covered textually, and the figure's six observed quarterly counts have been visually verified. The specific further evidence is the 143 original case files, 20 excluded cases, the separate outcomes of cases already appealed, the decisions in two own-initiative cases and the municipalities' individual redress with dates. The public tables contain no identity key that can close these person and causation links through further addition.

Municipal representation against the original control

Copenhagen's meeting item of 12.3.2008 describes all the municipality's placement decisions as correct while also stating that 70% have errors. The original municipality table states 3 correct and 7 incorrect out of 10; among the 7, 29% are categorised as lacking a voluntary basis. The municipality's further statement that no cases were handled incorrectly therefore cannot be used as the same legality conclusion as the original's. 7 assessments, 10 plans and 8 interviews document occurrence, not content, timeliness or valid consent. The sustainable criticism is this change of meaning in the presentation to the political body. The demand is that the municipal council receive the original legality assessment and the specific redress processes. The meeting item's expected improvements and statement of no financial consequences establish no individual reparation. [KK-SUD93/2008; PUD08-FULD, PDF63-65]

Placing practice 2009: the entire original tables, denominators and citizen's programme

In fact, all 94 physical aspects of the board's December report are textual, including the municipal tables and the methodological and regulatory annexes. The readable source is a public archive copy of the Office's own version. The page number is the same in the physical PDF and the printed report. It is the same 125 case reports as the previously limited PUD09 sample; tables and repeated case descriptions must not be added together as new citizens.

Main analysis: errors before the intervention and oversight without documented redress

The report documents deficiencies in the decision-making basis itself and the necessary participation of children and parents. In 11 of 121 placements registered as voluntary, the required consent is not documented. Case 097 describes an actual emergency placement without the father's consent, despite his joint parental responsibility. The Appeals Board expressly finds that there was no basis for a voluntary placement. That an urgent need may justify a later BFU does not resolve the deficiency in the chosen consent-based legal authority for placement. Case 135 describes a hospitalised mother whom the municipality's own record says does not understand the meeting, yet the municipality nevertheless decides on voluntary placement. Here the criticism concerns a necessary legal condition, not merely the letter's form. [PUD09, PDF 18-19 and 24]

The review report's 83 per cent must be relabelled neither as substantively approved placements nor as an unconditional national abduction rate. Ankestyrelsen states on PDF 12 that it assessed the basis for placement only in cases meeting the specific procedural requirements. For the other cases, the study therefore does not document that the substantive legal basis was present. The specific consent findings can be examined against the condition for legal authority; the remaining errors must be traced to each decision's validity, duration and actual consequences. The original also states that no case was taken up of the authority's own motion. This does not document that the recorded errors were corrected, families reunited or losses compensated. [PUD09, PDF 4, 12-14 and 90]

Time is real in a number of cases. A 14-year plan of action only comes seven months after placement (018). A 15-year-old Asperger course is waiting from the family approach in February 2008 until the beginning of December for finished BFU and the plan is drawn up after the placement (090). A two-year BFU takes six months from the notification of the new municipality (032). The report does not consider any justification for the particular circumstances of the 35 BFF programmes which exceed the four-month period. The delay concerns the child's access to a timely examined and planned assistance. The report gives no systematic subsequent record of actual improvement, family support or cessation. [PUD09, PDF 43-46 and 62-63]

Assistance to the family is a separate duty and denominator. T4.7 covers 130 holders of parental responsibility in 91 cases; 83 have not been offered a separate action plan. T4.6 instead measures the content of the same 91 child plans:31 do not describe support for the family, and three do so only to a limited extent. These figures cannot be added together as different families. The original connects family support with the possibility of return home and the parental role during placement. A described offer or plan is nevertheless not documentation of assistance actually received. [PUD09, PDF 59-61]

The possibility of review shall be weakened when a written decision, date, statement of reasons or complaint guidance is missing. The newborn in case 024 is placed from birth; the mother is orally informed of the right of appeal, but proper written advice has not been documented. A plan for the rest of the upbringing indicates a time perspective. It does not show an actual separation for 18 years and does not in itself test whether such separation is necessary and proportional. In case 139, the one-year re-examination period is also not an actual residence period. [PUD09, PDF 58 and 70-72]

Method, persons and voting

140 cases were requested and received from 14 municipalities selected from the year’s 30 municipalities in the three-year plan. After 15 exclusions, 125 are included. Decisions already appealed must not be selected. Municipalities were to send their ten most recent decisions before 1. January 2009. Where several children in the same family share the same date, only the oldest is assessed. The siblings mentioned therefore show more affected people than the principal cases assessed, but the report does not provide a deduplicated total for all siblings or parents. Missing submitted records are treated in the assessment as missing information in case processing. The underlying case records are not published here. [PUD09, PDF 4 and 73-77]

Total correctness is printed as 21 / 104 on PDF 13 and 20 / 105 in the cross table on PDF 17 and the commune table on PDF 91. It is an internal source conflict in the same 125 cases. On the other hand, the original note to PDF 14 explains why the BFU is missing in 44 cases, but is an overall error in 43: one emergency case was returned after two months before the deadline. The same case explains 34 failure to act, compared with 33 as a whole, as a cause of error. That explanation must not be used without documentation to harmonise the correctness conflict.

The summary of PDF 7 indicates 64 percent BFU to a large extent; the detailed T3.2 and the text of PDF 26-27 indicates 50 / 81 and 62 percent. T6.3 classifies two instructions that are not correct, while the running text says that the correctness of two cases could not be assessed. The final sentence of the method on PDF 81 in the action plan deadline wrongly calls the measurement object § 50 the study; PDF 61-62 / 80 and the tables are about action plan. These local differences are preserved and demarcated. None of them cancels out the other documented errors.

All 41 numbered tables follow below, including the four methodology tables and four municipality tables. Additional numerical blocks show selection and the original’s 2008 comparisons. Subgroups and causes overlap. Percentages are not converted back into guessed numbers of persons. In the case chains, information is described as the review report’s account; it is not the original record or an independent validation of diagnoses, allegations and family circumstances.

All tables in the original

T2.1 - Type of placement

PUD09, physical and printed page 11. Denominator/scope: 125.

Category	Planned locations number	Acute locations § 75 number	Total
Article 52 (3) No 8	95	26	121
Without consent § 58 (1)	4	0	4

Category	Planned locations number	Acute locations § 75 number	Total
Total	99	26	125

Acute and planned are the study categories. No urgent coercive action in this sample.

T2.2 - Overall assessment of decisions

PUD09, physical and printed page 13. Denominator/scope: 125.

Category	Number	Percentage
In accordance with rules and practices	21	17
Not in accordance with rules and practices	104	83
Total	125	100

Opposes T2.5 and Annex 3 T3.1, which prints 20 / 105. Both versions are preserved; no new case is inferred.

T2.3 - Causes of incorrect decisions

PUD09, physical and printed page 14. Denominator/scope: 104.

Reason	One of several reasons	Of which only reason
No § 50 survey	43	6
§ 50 investigation not completed after 4 months	35	12
No Action Plan	33	4
Action plan not completed before decision	31	6
§ 50 investigation not completed before decision	10	2
No child conversation and attitude not obtained	13	0
No consent to voluntary placement	11	1
§ 50 investigation does not comply with legal requirements	10	3
Action plan does not comply with legal requirements	8	1
Total	-	35

Causes overlap. One acute case with repatriation after 2 months is accepted without BFU / action plan; explains 43 against 44 in T3.1 and 33 against 34 in T4.1 35 only one deficiency, 69 more. 12 only four months; 92 / 125 = printed 74% without this criterion. The text also uses 105 for action; not harmonised.

T2.4 - Information base

PUD09, physical and printed page 16. Denominator/scope: 125.

Category	Number	Percentage
No information is missing	89	71
Some minor information is missing	16	13
Several and / or essential information missing	15	12
Decisive information missing	5	4
Total	125	100

The BFU and the action plan are not themselves treated as information for this measurement; therefore their absence does not automatically affect the information assessment.

T2.5 - Correctness and information base

PUD09, physical and printed page 17. Denominator/scope: 125.

Information	Legally correct yes	Legally correct no.	Total
No missing	18	71	89
A few minor deficiencies	2	14	16
Multiple / significant deficiencies	0	15	15
Decisive deficiencies	0	5	5
Total	20	105	125

20 / 105 versus 21 / 104 in T2.2 No missing information is not the same as legal placement.

T2.6 - Consent for placement

PUD09, physical and printed page 18. Denominator/scope: 121.

Category	Number	Percentage
Yes	110	91
No	11	9
Total	121	100

Only placements recorded as voluntary. Of 11, 3 lack the young people’s consent; in 1 case the mother cannot give informed consent; the remainder concern holders of parental responsibility. Consent to a child welfare assessment in T3.3 is a different decision and not an additional population of people.

T3.1 - BFU prepared

PUD09, physical and printed page 22. Denominator/scope: 125.

Category	Number	Percentage
Yes	81	65
No	44	35
Total	125	100

Older BFU for other support does not count if not supplemented for current placement. Acute exception explains the difference to T2.3

T3.2 - BFU total content

PUD09, physical and printed on page 26. Denominator/scope: 81.

Category	Number	Percentage
Very much	50	62
To some extent	18	22
Very small	3	4
No, do not meet requirements	10	12

Category	Number	Percentage
Total	81	100

The content assessment omits the four-month deadline and location before the decision. Summary PDF 7 writes 64%; table and PDF 26-27 writes 62% (50 / 81).

T3.3 - Consent to BFU from all relevant parties

PUD09, physical and printed, page 28. Denominator/scope: 81.

Category	Number	Percentage
Yes	70	86
No	11	14
Total	81	100

Historical Paragraph 50 (9) provided a separate way to investigate without consent. Consent for examination shall not replace consent to voluntary placement.

T3.4 - BFU: six themes

PUD09, physical and printed page 32. Denominator/scope: 81.

Theme	To a large or some extent	Small or small not	Irrelevant	Total
Development and behaviour	93	2	5	100
Family conditions	100	0	0	100
School conditions	83	5	12	100
Recreation and friendships	78	10	12	100
Health conditions	90	10	0	100
Other relevant factors	44	7	49	100

Percent, not exact integers. Themes are parallel assessments of the same 81 studies.

T3.5 - BFU: special conditions at the age of 15

PUD09, physical and printed, page 34. Denominator/scope: 28.

Category	Number	Percentage
Very much	8	29
To some extent	4	14
Very small	0	0
No	10	36
Irrelevant	6	21
Total	28	100

44 of 125 cases concern 15-17-year-olds, but only 28 of them have a child welfare assessment and are included here.

T3.6 - Assessment of examinations of other children

PUD09, physical and printed, page 36. Denominator/scope: 45.

Category	Number	Percentage
Yes	27	60
No	18	40
Total	45	100

36 of 81 BFU omitted as not applicable. Other children are defined wider than biological siblings. These are 45 selected cases, not 45 families plus all siblings.

T3.7 - BFU: Views of the holder of parental responsibility

PUD09, physical and printed, page 37. Denominator/scope: 81.

Category	Number	Percentage
Yes	73	90
No	8	10
Total	81	100

T3.8 - BFU: attitude of the child

PUD09, physical and printed, page 38. Denominator/scope: 69.

Category	Number	Percentage
Yes	60	87
No	9	13
Total	69	100

12 of 81 omitted from the source's assessment of lack of relevance / possibility. The calculation method differs from 2008. Case 107 is mentioned in several places, but is counted once as a course.

T3.9 - BFU: resources in family and environment

PUD09, physical and printed, page 39. Denominator/scope: 81.

Category	Number	Percentage
Very much	38	47
To some extent	32	39
Very small	4	5
No	7	9
Total	81	100

T3.10 - BFU: reasoned opinion

PUD09, physical and printed page 40. Denominator/scope: 81.

Category	Number	Percentage
Very much	72	89
To some extent	5	6

Category	Number	Percentage
Very small	1	1
No	3	4
Total	81	100

T3.11 - BFU completed within four months

PUD09, physical and printed, page 43. Denominator/scope: 81.

Category	Number	Percentage
Yes	43	53
No	35	43
Undisclosed	3	4
Total	81	100

Start by the Authority's knowledge of support needs; not by its later decision on investigation. None of 35 exceedances were found to be justified by special circumstances. Unknown start / end date in 3 cases.

T3.12 - BFU prior to decision in planned locations

PUD09, physical and printed page 45. Denominator/scope: 68.

Category	Number	Percentage
Yes	52	76
No	10	15
Undisclosed	6	9
Total	68	100

13 acute of 81 BFU omitted from this pre-decision measurement but is included in the four-month measurement.

T4.1 - Action plan prepared

PUD09, physical and printed, page 49. Denominator/scope: 125.

Category	Number	Percentage
Yes	91	73
No	34	27
Total	125	100

The acute case referred back after 2 months explains 33 deficiencies in overall assessment as against 34 here.

T4.2 - Action plan total content

PUD09, physical and printed, page 51. Denominator/scope: 91.

Category	Number	Percentage
Very much	30	33
To some extent	44	48

Category	Number	Percentage
Very small	9	10
No	8	9
Total	91	100

Timeliness is excluded from the content measure; it is included in the overall assessment of the decision. Eight insufficient plans lack at least 3 elements.

T4.3 - Action plan: purpose and necessary effort

PUD09, physical and printed, page 52. Denominator/scope: 91.

Category	Number of objectives	Objective percentage	Number of wagers	Rate of bet
Very much	74	81	59	65
To some extent	16	18	29	32
Very small	1	1	2	2
No	0	0	1	1
Total	91	100	91	100

Two assessments of the same plans, not 182 different plans.

T4.4 - Action plan: objectives and sub-objectives for six themes

PUD09, physical and printed, page 54. Denominator/scope: 91.

Theme	To a large or some extent	Small or small not	Not applicable	Total
Development and behaviour	84	16	0	100
Family conditions	86	14	0	100
School conditions	75	11	14	100
Recreation and friendships	69	20	11	100
Health conditions	78	22	0	100
Other relevant factors	28	19	53	100

Percentages; not exact integers or proof of actual delivery of bets.

T4.5 - Expected duration specified

PUD09, physical and printed, page 57. Denominator/scope: 91.

Category	Number	Percentage
Yes	73	80
No	18	20
Total	91	100

A specified duration is not a registered actual end date. PDF 58 accepts the remainder of upbringing as an indication in case 024; this does not try proportionality over 18 years.

T4.6 - Family support specified

PUD09, physical and printed, page 59. Denominator/scope: 91.

Category	Number	Percentage
Very much	37	41
To some extent	20	22
Very small	3	3
No	31	34
Total	91	100

The description of aid is not actually offering, participating or reuniting.

T4.7 - Holders of parental responsibility offered a separate action plan

PUD09, physical and printed page 60. Denominator/scope: 130.

Category	Number	Percentage
Yes	47	36
No	83	64
Total	130	100

130 holders of parental responsibility in 91 cases. Both are assessed where parental responsibility is joint. The 130 are not added to the children as a union of unique citizens.

T4.8 - Action plan before decision: intended locations

PUD09, physical and printed, page 62. Denominator/scope: 71.

Category	Number	Percentage
Yes	31	44
No	25	35
Undisclosed	15	21
Total	71	100

20 acute of 91 plans are included in the second measurement T4.9

T4.9 - Action plan within four months: acute volunteers

PUD09, physical and printed, page 62. Denominator/scope: 20.

Category	Number	Percentage
Yes	13	65
No	6	30
Undisclosed	1	5
Total	20	100

25 + 6 = 31 documented time gaps in the action plan in T2.3; unknown date groups are not automatically added.

T5.1 - Children's interview completed

PUD09, physical and printed, page 65. Denominator/scope: 125.

Category	Number	Percentage
Yes	86	69
No	24	19
Not applicable	15	12
Total	125	100

The relevance assessment of the source, not an independent review of disability adaptation.

T5.2 - Position obtained by other means without conversation

PUD09, physical and printed, page 65. Denominator/scope: 24.

Category	Number	Percentage
Yes	11	46
No	13	54
Total	24	100

Only the 24 without conversation in T5.1; the 15 not relevant are not included.86 + 11 = 97, printed 78% of 125.

T5.3 - Children's interview or position by age

PUD09, physical and printed, page 66. Denominator/scope: 125.

Age	Yes number	No number	Total	Percentage i the age group;
0-3 years	1	12	13	8
4 to 6 years	3	1	4	75
7-11 years	13	5	18	72
12 to 14 years	40	6	46	87
15 to 17 years	40	4	44	91
Total	97	28	125	-

12 out of 12 no for 0-3 years, 1 out of 5 no for 7-11 years and 2 out of 6 no for 12-14 years are not considered relevant. The column heading in the original says completed child conversation, but title / counters also include attitude in other ways. No exclusive share of the call shall be derived.

T6.1 - Form of decision

PUD09, physical and printed, page 69. Denominator/scope: 125.

Category	Number	Percentage
Written decision	33	27
Written journal note	60	48
Declaration of consent	9	7
Other form	23	18

Category	Number	Percentage
Total	125	100

Of 4 coercion cases, 2 written decisions, 1 forwarded protocol, 1 medical record entry without documented written notification.33/125=26, 4%; the original's 27% is retained.

T6.2 - Forced decision: Statement of reasons FVL § 22- 24

PUD09, physical and printed page 70. Denominator/scope: 4.

Category	Number
Consistency	3
Not in accordance	1
Total	4

Case 139 has grounds in the minutes note, but notification and adequate justification to the mother have not been documented.

T6.3 - Forced decision: Appeals notice

PUD09, physical and printed, page 71. Denominator/scope: 4.

Category	Number
Proper complaint guidance	2
Inappropriate complaint guidance	2
Total	4

The body text says it was not possible to assess in 2 cases; the table heading says not correct. Uncertainty about notification and established incorrect guidance are kept separate. Case 024: oral information does not satisfy the requirement for written guidance.

B1.T1.1 - Annex 1: Sex and age

PUD09, physical and printed, page 75. Denominator/scope: 125.

Sex	0-3 years	4 to 6 years	7-11 years	12 to 14 years	15 to 17 years	Total	Total percentage
Boy	6	2	10	18	24	60	48
Girl	7	2	8	28	20	65	52
Total	13	4	18	46	44	125	100

The same 125 cases.90 / 125 = printed 72% for 12-17 years. Not a new cohort.

B1.T1.2 - Annex 1: Parental responsibility

PUD09, physical and printed, page 75. Denominator/scope: 125.

Category	Number	Percentage
Common	51	41
Mother alone	53	42
The Father alone	13	10
Others	2	2

Category	Number	Percentage
Undisclosed	6	5
Total	125	100

Cases analysed by authority; not full census of parents.

B1.T1.3 - Annex 1: Reason for action

PUD09, physical and printed, page 76. Denominator/scope: 125.

Feature	Number	Percentage	Only occasion number	Only occasion %
Parental authority holder	51	41	22	18
School / Recreation Home / SFO	47	38	19	15
Initiative of the municipality	29	23	13	10
The child / child	20	16	3	2
Health care / health care	12	10	2	2
Family / network	8	6	1	1
Police / Court	6	5	1	1
Day institution	2	2	0	0
Others	23	19	5	4

Multiple reasons, percentages use 125, including sole reason. 23/125=18, 4%; the printed 19% is retained. Not the same percentage definition as ASAN10 T2.4.

B1.T1.4 - Annex 1: Origin of data

PUD09, physical and printed, page 77. Denominator/scope: 125.

Category	Number	Percentage
Mom.	108	86
The child / child	84	67
School / teachers	86	69
Dad.	56	45
Psychologists	50	40
Doctors	30	24
Network	27	22
Day institution / educator	16	13
Health care	8	6
Others	40	32

More sources of information. The author is not independent confirmation or verification of the accuracy of the statement. Others include the police and former commune of residence.

B3.T3.1 - Annex 3: Total correctness

PUD09, physical and printed, page 91. Denominator/scope: 125.

Municipality	Number (first detachment column)	No.	Total
Aabenra	2	8	10
Aalborg	4	5	9
Billund	0	9	9
Fredensborg	1	9	10
Heath site	3	6	9
Helsingør	3	6	9
Herning	3	4	7
Ikast-Brand	1	9	10
Kalundborg	0	10	10
Cold	0	8	8
Nyborg	0	9	9
Slaughter	2	5	7
Sorø	0	10	10
Tower	1	7	8
Total	20	105	125

The original header's first exit column is denoted Number. Summer 20 / 105, as T2.5; conflict with 21 / 104 in T2.2
The 7-10 cases of the municipalities are selected, not municipal full populations.

B3.T3.2 - Annex 3: Information base

PUD09, physical and printed, page 92. Denominator/scope: 125.

Municipality	No missing	A few smaller deficiencies	Multiple / substantial deficiencies	Decisive deficiencies
Aabenra	9	1	0	0
Aalborg	6	3	0	0
Billund	7	0	2	0
Fredensborg	6	3	1	0
Heath site	7	2	0	0
Helsingør	7	0	2	0
Herning	5	0	2	0
Ikast-Brand	7	3	0	0
Kalundborg	5	1	2	2
Cold	5	1	2	0
Nyborg	8	1	0	0

Municipality	No missing	A few smaller deficiencies	Multiple / substantial deficiencies	Decisive deficiencies
Slaughter	6	0	1	0
Sorø	6	0	2	2
Tower	5	1	1	1
Total	89	16	15	5

Same 4 national marginals as T2.4; no addition.

B3.T3.3 - Annex 3: BFU content

PUD09, physical and printed, page 93. Denominator/scope: 81.

Municipality	Very much	To some extent	Very small	No.	Total
Aabenra	8	0	0	0	8
Aalborg	4	4	0	1	9
Billund	3	2	0	0	5
Fredensborg	3	1	0	2	6

Reproductions of the 2008 results for comparison, not new 2008 cases. Only terminal errors removed give 92 / 125 = printed 74%, but do not normalise selection or other method differences. Summary PDF 7 64% BFU has a high degree of detail compared to 62%; retained as a conflict in the T3.2 note.

Case Chains: the same case is counted once

Case ode	Age	Findings and concrete consequences of the original	Time	Historical rule	Locator
018	14	Current post-school placement without new or supplementary BFU; action plan not until 7 months after decision / placement. Placing process carried out without current investigation and timely plan.	7 months to action plan; return unknown	§ 50, § 52 (2) and § 140	PUD09, PDF 15, 25, 62
031	14	Treatment placement of a girl described as having manic-depressive disorder; no child welfare assessment, action plan or documented child interview. The original describes the family as well-functioning. The child was placed without the three recorded safeguards. The diagnosis/family statement is the source's account, not independently verified.	Recommendatio n June; affixing November; no exact dates	§ 50, § 140 and § 48	PUD09, PDF 15, 23, 49, 67
097	10	Acute placement three days after the meeting; joint custody, father away and his consent missing. No BFU before or after. Ankestyrelsen find no grounds for voluntary placement. Child actually placed without the necessary consent to the chosen voluntary legal basis. The acute BFU exemption does not solve the lack of consent.	3 days meeting → placement; end date unknown	§ 52 (1) (3), § 53; acute exposure to BFU requires the following BFU	PUD09, PDF 18, 19, 24
033	17	Placed in an institution; no BFU / action plan, no documented conversation or own consent. No necessary consent condition for voluntary placement supported by evidence.	Not available	§ 52/53, § 50, § 140, § 48	PUD09, PDF 19
135	15	The municipality's journal describes that seriously ill hospitalized mother does not understand the meeting. The municipality nevertheless records voluntary placement; also BFU consent was wrongly based. Placing on a registered voluntary basis without meaningful parental consent; the investigation required a separate legal procedure.	Not available	Section 52 / 53 and separate section 50 (9)	PUD09, PDF 19, 29
045	16	Girl mentioned with ADHD; not documented child conversation, other position or consent before placement. The child's involvement and the necessary consent conditions have not been documented.	Not available	Section 48 and Section 52 / 53	PUD09, PDF 66, 67
032	2	New municipality receives notification in mid-December; BFU finished six months later. Plan has purpose / goal; family contact specified 2 hours a week first, then every other weekend. Aid needs examined with documented deadline overrun. Contact plan is planned scope, not proof of actual interaction.	6 months of unemployment → BF U	§ 50 (7); § 140 on Objective and Family Support	PUD09, PDF 43, 52, 54, 55, 56, 63
090	15	Asperger course: the mother seeks assistance in February 2008; the BFU is not completed until early December; the action plan is undated but prepared after placement. Delayed assessment and placement without a timely plan; new statutory targets do not document actual redress.	February → beginning of December · 10 months; approximate, not exact day number	§ 50 (7) and § 140 (1)	PUD09, PDF 43, 44, 52, 54, 55, 56, 63

Case ode	Age	Findings and concrete consequences of the original	Time	Historical rule	Locator
081	11	Preliminary assessment before the deadline, but no particular circumstances justify a failure to complete BFU. Action plan indicates family assistance. Preliminary paper was not considered sufficient to fulfil the obligation to complete the study; planned family support does not document delivery.	Not available	Article 50 (7)	PUD09, PDF 44, 60
079	13	Decision beginning of June after notification at the end of April; BFU only completed early July, no action plan. Health section omits relevant information. The child placed before finished BFU without an acute exception and without plan.	Last April → beginning of June → beginning of July; exact days not given	§ 52 (2), § 50 and § 140	PUD09, PDF 32, 46, 49, 66
067	9	Replaced January to mother in new municipality; replaced acute June with consent in former foster family. Action plan not complete within four months. Documented return followed by re-placement; return is not permanent reunification.	January return; June recovery; more than 4 months to plan	§ 140 emergency time limit	PUD09, PDF 50
002	17 years 10 months	Father with full custody dead; own residence. The municipality fails to take action because of short-term placement; this is not accepted. Subsidiarity to 18 years was used to avoid plan; the source states that short duration does not cancel the obligation.	Not available	§ 140 and historically eft erværnspla n	PUD09, PDF 35, 39, 50
063	14	Three siblings; no assessment of their survey needs. Mother did not offer separate action plan. Sibling protection and the family's own support plan omitted. Three siblings are referred to persons without independent assessment in the 125 cohort.	Not available	§ 50 (8) and § 140 (8)	PUD09, PDF 36, 61
013	14	Twin and younger sister. Twinning is investigated indirectly, but no proven position on younger sister. The school claims a desire to separate twins. Study needs of younger children not assessed. The school's statements do not even prove the need for separation.	Not available	Article 50 (8)	PUD09, PDF 36, 39, 41
069	15	BFU refers to sexual violations and ADHD; the action plan does not assess the need for specific action in the context of the violations. Registered knowledge of violations translated into placement, but no documented treatment / protection follow-up in the plan.	Not available	§ 140 Consistency with § 50	PUD09, PDF 33, 56, 57
113	11	The BFU health section does not comment, while the source's case-making refers to enuresis and encresis. Relevant health problem omitted from the assessment of support needs.	Not available	§ 50 health conditions	PUD09, PDF 32

Case ode	Age	Findings and concrete consequences of the original	Time	Historical rule	Locator
139	11	Forced placement with one-year retreatment is shown in the note; written notification and adequate justification to the mother are not documented. The mother's ability to know and attack the decision has not been proven.	1 year period for re-processing; not documented actual placing	§ 22-24 and written observations	PUD09, PDF 70, 71
024	newborn	Placed from birth without the mother's consent. Minutes/meeting provide oral information; correct written appeal guidance is not documented. The plan states the rest of childhood. A newborn separated; guidance on review is missing. A plan until age 18 and annual reconsideration are neither an established 18-year stay nor an independent proportionality assessment.	From birth; 1 year re-treatment; plan to 18 years; actual endpoints unknown	FVL § 25 and § 140	PUD09, PDF 58, 72
060	15	Previous return from foster family; new placement shortly after. Decision date not clear in the journal. Replacement without a traceable date of decision; return not permanently documented.	Shortly after return; exact dates unknown	Note and decision making	PUD09, PDF 69
126	8	Acute voluntary placement; BFU and schedule later, but decision / date not documented clearly. In fact, placing with a lack of documentation of the decision chain.	Not available	Note and decision making	PUD09, PDF 69, 70
107	11	The original classifies a girl with multiple disabilities who does not speak as unable to address her place of residence and accepts the absence of an interview/views. Included among the exceptions. The original does not document separate testing of supported communication here; its assessment is not an independent disability-accommodation review.	Not available	§ 48 and specific relevance assessment	PUD09, PDF 28, 38, 66
051	14	Plan only states that duration is assessed continuously; this is not accepted as expected duration. Child / family lack specific time perspective during placement.	Not available	Article 140 (6)	PUD09, PDF 58
121	14	Acute placement after the fourth mentioned suicide attempt; BFU completed 16 days after. The source accepts the timeliness of this very acute case; this is not a general exception for other cases.	16 days notice → BFU	Historically a rule exception to § 52 (2)	PUD09, PDF 46
050	11	Residential family with two younger siblings during mother's treatment; primarily information about mother's alcohol problems, significant child-specific conditions missing. Several children actually included in the family placement process, but only the oldest are assessed in the sample.	Provisional 6-month placement; actual cessation unknown	Basis of information and § 50	PUD09, PDF 17
038	14	Primarily police charges and contact-person contracts; other school/family circumstances missing. Placement on a decisively deficient basis according to the review report. Charges are not established crimes.	Not available	Basis of information and § 50	PUD09, PDF 17

Case ode	Age	Findings and concrete consequences of the original	Time	Historical rule	Locator
036	16	New notification January, own desired college placement September; no BFU. Placement without current statutory examination.	January → septte mber; no exact days	Articles 50 and 52 (2)	PUD09, PDF 23
082	9	Boy referred to by ADHD; notification February, voluntary placement September, no BFU. Placement without current investigation according to longer known needs.	February → September; no exact days	Articles 50 and 52 (2)	PUD09, PDF 23
030	14	Older BFU on support person; no new or supplementary when stowed. Previous support study does not substitute for study of current placement.	Not available	§ 50 Current investigation	PUD09, PDF 25
093	15	No documented mother / child BFU consent; custody is transferred during the study to father, including his consent documented. Change of authority not followed by documented legal investigation route.	Not available	Article 50 consent and paragraph 9	PUD09, PDF 29
080	12	Father with joint custody refuses consent; only mother gives BFU consent. The BFU should have followed the separate legal basis without consent; not just called consent-based.	Not available	Article 50 (9)	PUD09, PDF 29
116	8 months	Mother consents to BFU; the father's part in authority is discovered later, his consent and information is missing. The person / consent circle is deficient; the position of the child is described voluntarily after the institution stays.	Enlisted with mother at 5 months; placed after 2 months; no final date of discontinuation	Articles 50 and 9	PUD09, PDF 30
014	16	Action plan only indicates the need for offers without detailed purpose; PPR / psychiatric assessments are not incorporated. Progress without any specific objective of the aid; diagnosis is the source's statement.	Not available	§ 140 purpose and effort	PUD09, PDF 53
070	16	The BFU refers to charges and weapons incidents as other relevant facts. Example of sufficient publicity assessed; charge alone is not a proof of guilt.	Not available	§ 50 relevant facts	PUD09, PDF 33
102	14	Small family / friend networks discussed and considered to be unable to solve the difficulties. The source accepts the description; it is not a verification of all underlying network information.	Not available	§ 50 resources	PUD09, PDF 40
056	14	Acute voluntary placement in sister's foster family, action plan within four months; plan for 18 years. The source accepts the time; planned duration is not actually terminated.	Within 4 months to plan; plan to 18 years	§ 140 emergency time limit	PUD09, PDF 50, 58
085	17	Documented BFUconsent; pre-positioning and pre-decision examination. Positive example in several paragraphs, same case.	Mid-August implementation → beginning of December BFU; source estimates within 4 months	§ 50, § 52 and § 140	PUD09, PDF 28, 41, 45, 63

Case ode	Age	Findings and concrete consequences of the original	Time	Historical rule	Locator
134	12	Current complement to previous BFU is adequately assessed. Positive example of supplement, not an extra location case.	Not available	§ 50 Current investigation	PUD09, PDF 24
140	16	Supplement to previous BFU upon own request; action plan / consent before decision. The source assesses the decision correctly; repeated examples are the same.	About 1 week approaches → supplement	§ 50, § 52 / 53 and § 140	PUD09, PDF 15, 16, 24, 45

Documented errors, limits of evidence and specific requirements

The documented review findings include missing consent for the voluntary legal basis chosen, a missing or delayed current BFU, a missing or delayed action plan, omission of an interview with the child/the child's views, a missing separate family plan and deficient documentation of decisions and review. Each row above identifies the specific line of evidence. A final determination of invalidity, any persons responsible, criminal intent and loss in each case requires the underlying records; these are not established by the review classification alone. The strongest specific argument in the consent cases described is that the municipality carried out a placement registered as voluntary without the necessary condition, rather than merely committing an unspecified formal error. The demand is to retrieve the contemporaneous legal basis and any separate compulsory-placement decision, the complete chain of decisions and stays, and actual redress. For timing and planning errors, dates are required for knowledge, decision, implementation, completion, family support, physical return home and payment. The unresolved subsequent redress is a precise limit of the documentation. It must not be converted into an established number of children who remain separated, but the absence of these public outcomes cannot be used as evidence that the authorities corrected the errors either. Access to case records, the municipal council's consideration under section 79 a and documentation of individual follow-ups are the necessary next evidential links. No such request has been sent.

Parenting capacity assessments 2012: complete tables and evidential chains

All 20 pages of the publicly available Ankestyrelsen report have been read as text in RAM. Five pages with discrepancies in percentages, denominators and table sums have also been visually checked in RAM. All 22 printed tables are included. The municipalities' questionnaire responses,104 placement cases and ten professional assessments of parenting capacity assessments have different scopes. Footnote 5 confirms that the placement cases were reused from the study of Barnets Reform. The 104 cases are therefore not added as new children.

Sources and scope of control

H: Original, 20 pages. SHA256: 4673c5d1bed797fcf469ac189a784a40777777ced1ce3ff63be6fe5206ad02b8. All pages read.

Original parts	Actual Read Content
H1 -11, printed p.1-9	Version, questionnaire, all municipal number / percentage tables and complete committee notes.
H12 -20, printed p.10-18	All case / material / subject group / FKU / involvement / interpreter tables, all quality records and methodological notes.
Visual H5 / 9 / 13 / 14 / 18	Local number sum, percentage deviations, material and trade group contests, and external psychologist visually controlled in RAM.

Sample and population

Search	Limitation
Three studies	Municipal questionnaire concerning 2011, legal review of 104 placement cases from 12 municipalities after 1. January 2011, child welfare specialist quality review of ten parenting capacity assessments within the 104.
Overlap Child Reform	Footnote 5 H11 states that cases were primarily requested for follow-up on Barnets Reform and were reused here. 104 therefore does not automatically mean an additional 104 children on top of another reform cohort. No public case-ID linkage in this report.
Non-compliant municipalities	Pr. 2. August 2012: Hedensted, Vejle, Langeland, Kerteminde, Guldborgsund, Næstved, Slagelse, Holbæk, Hallsnæm, Hørsholm, Helsingør, Hillerød, Frederiksberg, Viborg and Rebild.
Calls and exclusions	12 municipalities asked for randomly selected accommodation cases and all relevant documents. The absence of significant acts is not assessed. Number of summoned, terminated, already indicted and affected unique persons not published here.

All published figures

25 reading tables with 142 rows. Repeals and subsets of the same cohort shall not be added together. N and response categories are retained from each original.

1.1: Parenting capacity assessments requested in 2011

Original H, PDF page 4. 82 municipalities gave numbers; 83 answered one or more questions. Counts assessments, not unique children/parents.

Search	Number
Number of surveys	816
Average per municipality	10
Minimum	0
Maximum Aalborg	77

1.2: Breakdown of numbers between municipalities

Original H, PDF page 5. 82 municipalities; 44 estimate the number. Copenhagen’s estimate covers six of eight local centres; one municipality covers only the family department, not the disability department.

Health care provider	9

Examples, time and citizens' consequences

The specific documentation shows placement decisions with missing child welfare assessments and FKUs with unexamined interaction, transfer from one child to another without supplementation, omitted relevant records and insufficient validity. These errors may affect the basis for separating the child from the parents and for choosing support, but the report does not provide the full assessment of legal authority/proportionality or subsequent cessation for every placement. Each decisive claim must therefore be traced from original case records through the specific legal rule to the result of the intervention; professional approval of the overall material is not alone evidence that the intervention was lawful. No actual return home, waiting time, compensation or employment-related sanction is documented here.

Own locator	PDF	Example type	Number / progress	Assessment
H16-E1	16	No source ID, own locator	FKU with good psychological tests, but without interaction observation or concrete child perspective	To a small extent, care coverage. Test results alone do not bear any specific relation / needs of the child.
H16-E2	16	No source ID, own locator	The FKU related to mother and another more treatment-consuming child; not supplemented for current child	Transfer between siblings without specific supplement; individual evidence deficiencies. It is not possible to identify overlap with two missing supplements.
H16-E3	16	No source ID, own locator	Psychologist did not have access to relevant documents; previous sentence for violence against children not included	Key information omitted from the survey according to source. Judgments / originals shall not be disclosed; no independent judicial review shall be carried out.

Own locator	PDF	Example type	Number / progress	Assessment
H17-E1	17	Group reference, no source ID	Three only to a small extent valid / coherent FKU	Lack of relation to economy / abuse, child's concrete needs and interaction. Not three new examples / people on top of ten.
H20-E1	20	No source ID, own locator	Coming mother; review tried, birth initiated prematurely	In fact, lack of review of the report described, not a documented waiver from the mother.
H20-E2	20	No source ID, own locator	Non-Danish-speaking parents, interpreter used	One case of interpretation within the same ten; language, quality, actual understanding and number of parents unknown.

Source deviations

Locator	Deviation
H6-7	Position in text 46%, table 28% + 17% = 45%; printed table percentages sum 99 against 100. Rounding cannot be found in unpublished integers.
H9	Table 1.6 has 22/69 printed as 29%, own division approximately 31,88%; category percentages 49+29+13+6=97. The text's 78% always/often differs from 56/69≈81,16%. Retain the counts and both statements.
H9-10	Own guidelines referred to 28%, Table 21 / 78 printed 27%; both retained.
H10	Authorized psychology table has printed 1.2, text 1.8; recycled number retained.
H4	Annex 1 with a municipal-count overview is mentioned, but is not included in the 20-page public original. A separate access route is being examined.
H13	Table 1.10 has 13 / 104 printed 11%, recalculation 12,5%; category percentages 83 + 11 + 5 = 99.
H13-14	Material table 1.11 contains 90 journal notes and 86%, compared with 94% in 86 studies. The table indicates 9FKU, footnote 7 says 7 directly + 3 further = 10. No secure individual vote.
H14-15	Trade group table 1.12 says cashier 91 / 87%, teacher 45 / 43%, family 42 / 40%, while bread text says 98 / 50 / 47%. Total occurrences 299, not unique professional population.
H17	Printed Table 1.37 against text 1.17; preserved as original version locators.
H18	External authorised psychologist 4 / 20% and specialist 3 / 30%, overall 7 / 100%; bread text says four specialists. Percentages do not match the 7-denominator; no exchange or percentage correction.
H19	The report accepts the possibility of comment partly on the basis of the submission to the meeting. No parents' comments on every case. Submission does not in itself document real, timely contrast.
H5, Table 1.2, Visually confirmed	The categories 3 + 34 + 19 + 14 + 5 + 1 + 4 + 3 summer to 83 municipalities, while the total and table note indicate 82. All cells have been visually confirmed. It is an original deviation, not a transfer error; no municipality is moved or deleted.

Other factual incisions

Locator	Precise information
H5	816 are commissioned studies from 82 municipalities, with 44 estimates. Psychological / interaction studies and implicit family treatment assessments may give additional assessments; not identical to the recorded 816 population.
H8-11	Guidelines of 21 June 2011 are, according to the original, not binding. Therefore, the absence of guidelines should not be counted as a breach of law alone.
H11-12	Legal review focuses material types and disciplines; ti-expert-review quality and adequacy. A quality problem is not in itself a published decision on invalid placement.
H12-13	According to the study, 13 placement cases should have had a 50-year study; five acute placement cases should be dealt with separately. The report does not subsequently publish § 50 preparation, repatriation or review of full material fitting.
H15 -18	Ankestyrelsen assess the parental material of a total of ten placement cases adequately, at the same time as three small valid FKU and two untimely without a supplement. The collection material assessment does not eliminate the documented actual FKU deficiencies.
H19-20	One course of early childbirth explains an attempted but not completed submission; unsolicited case coding / other subsequent meeting not documented.
H13 footnote 6	Guidance on the measurement form is given, but not attached; the original blank form and code / jump method cannot be checked here.
Annex track, tested October 7, 2026	H4 refers to the municipal table Annex 1, but the 20-page copy does not contain such a list. The Folketing's report copy of 18 pages omits the front page / colophon and has the same attachment; web metadata confirms 18 pages. It has not been certified fully text-controlled here.
Original register, tested 7 October 2026	SOU alm.del 2012-13 Annex 9 records report and transmission letter, document date 4 October 2012. No separate annex report was provided in the available registry view. This does not prove that the municipality inventory was never published.
Access to named annexes	Precise searches by report title + annex, 2012 + annex 1 + municipality, 2012 + annex report and 2012 + measurement form gave report copies / mention, no separate municipality summary or measurement plan guidance. The previous publication address of ASTM gave 404; two exact archive CDX tracks gave timeout respectively HTTP503. The FTregister gave in RAM HTTP403. No end to non-publication.
Registry responsibility and specific enquiry	Ankestyrelsen: provide the municipality-by-municipality annex 1 overview, original questionnaire with responses and estimated-value markers, measurement-form guidance/form and version/correction basis for tables 1.2,1.6,1.10,1.11,1.12 and 1.19, linked to the October 2012 report ISBN978-87-7811-192-0. Ministry/FT: accompanying annexes and original transmission register SOU 2012-13 annex 9. No request has been sent.

Historical Rule references

These are the rules and principles of the original. They are not counted as new investigations and are not automatically used as applicable 2026.

Reference	Locator	Defined content
Service Law § 50 and Guidelines 21 June 2011	H3 / H8 / H12	A child welfare assessment examines the child's/family's resources and difficulties. Guiding FKU principles: multiple methods, the specific child, parental strengths/weaknesses, no recommendation of a particular measure, thorough review with the parents.

Instrument and stage of execution

Blank fields, codes and illustrations are method information, not citizens' numbers. Actual correction, delivery and payment shall not be deduced solely from a follow-up decision.

Field	Locator	Meaning
Questionnaire	H4- 11	All municipalities asked June-July 2012 about 2011. Not everyone answers all questions; each table has its own denominator.
Legal Measurement	H11 footnote 5	Documents not in submitted acts are not assumed to have been drawn up. This is a method assumption; actual non-existence requires the municipality / file register.
Child qualified measurement	H12-20	TiFKU subset of 104. Quality of test / action basis, timeliness, care, validity and contrast; assessment section overlaps.
Personal dedup	H3 / H11	No local case IDs. 816 studies, 104 cases, 10FKU and municipality numbers are different units; cannot be a citizen's union.
Time / effect	H11-20	Decisions after 1 Jan 2011; no individual placement/return-home dates or redress/accountability series.

Concrete remains and evidence chain

All tables/pages of the main original have been fully checked. Named but not supplied annexes: the list of municipalities “annex 1” (H4) and the assessment-form instructions (H13 footnote 6). The specific access check below retains these as outstanding originals, without claiming non-publication. Also missing are 104 complete case files, 10 original FKUs, municipality/case links to BarnetsReform, the received/excluded/appealed flow, a register of records to test the assumption of absence, parents’ comments, current supplements, return-home dates/duration of intervention, responsibility and loss. Demand: an individual factual basis concerning the child and parents grounded in the records, an opportunity to contest the material, examination of the basis for every placement, a correct decision and documented cessation/redress where substantive legal authority is lacking. Nationwide demand for FKUs cannot be calculated from the estimated 816 as a rate of unique breaches of law.

The source chain is the original table or case summary → delimited error → the stated historical rule → the act or omission of the municipality → concrete significance for performance / testing → responsibility and requirement for act-based correct decision as well as documented effectiveness. Actual loss, guilt and personal union require the separate documents specified. The assessment by the Authority is not merely proof of its own correctness.

Specific access tracks for non-enclosed annexes

Tested URL	Result
Source tracks	Web can read the 18-page report copy; available main text / metadata, no independent attachment 1 file identified. Not full certificate of this parallel version.
Source tracks	Search records shall provide a report and a letter of transmission. Direct RAM HTTP403; web direct cache error.
Source tracks	HTTP404; no end to original publication.
Source tracks	Timeout, no record.
Source tracks	HTTP503, no record.

Family and network contact 2013: full numbers, children's statements and evidence chains

A plan of visits does not in itself demonstrate that the child's relationship is preserved. The fully reviewed study shows that family and sibling contact often depends on parents' contact, carers' agreements or the child's own efforts. A child misses half-siblings, which it hasn't seen since Christmas, but hasn't told an adult. Another doesn't know why a firm and cosy deal with Grandma has ended. The municipality's obligation to seek out the child's wishes cannot therefore be replaced by the right of the child or family to turn to themselves. [NET13-FUD, PDF23 / 69-72]

The local authorities' explanation that parents typically cancel must be kept separate from the documentation. The contact figures record frequency, not the reason for each rejection. Several interviewees tell that parents most often meet and only

are cancelled in case of illness or practical circumstances; some describe repeatedly other cancellations. The interview children cannot be connected to the 252 documents, and the difference is therefore a difference between source types, not proof that a particular municipality is lying in a particular case. [NET13-FUD, PDF6 / 33 / 54-55 / 65-66 / 79]

The child's wishes can be both more and less contact. The criticism is that the wishes must be examined in concrete terms, be real and be reflected in the explanatory statement of the decision. A reference to the best or professional method of the child is not in itself proof that this has happened. The concrete statements about the lack of sibling issues, insufficient early network coverage and experienced distortion of a child's conversation provide precise testing clues. They are not a finished invalidation or punishment. [NET13-FULD, PDF23 / 27 / 68 / 70-72]

Source control and delimitation

NET13-FULL. Ankestyrelsen, December 2013, ISBN 978- 87- 7811- 213-2. All 79 physical pages have been read, including both annexes. All 20 figures are reviewed; all sides with figures and ambiguous tables are also visually controlled in memory. No official original, full text or page images are stored locally. PDFside = printed page + 3. Original Public report copy of social educators. SHA256 c6df436a55861b36582f4c5b52ac8ab7ae1400c111df68bf86c73f46b3fb04ba. Known Annex of the Folketing - ID1316351 is metadata / mirror tracks, not an additional document or a separately read population.

There are 14 numbered original tables with 73 rows,20 figures with all explicitly published values,16 methodology cards and 24 description cards of our own. Bars without numerical labels have been checked, but their height has not been converted into invented exact cells. The 252 children, 9 interviewed children, 542 contact-group occurrences and the annual statistics' stocks/decisions each have their own denominator.

Method, exclusions and cohort bridge

Point	Actual delimitation	Physical PDFside
Selection of municipal units	98 municipalities; Ishøj / Vallensbæk joint gives 97 possible answers; 94 replies = printed 97%	78
Lack of general answers	Goldborgsund, Lyngby-Taarbæk, Brøndby	78
Review	252 cases from 86 municipalities; still located 0-14 years per 1Jan 2013, decision after 1Jan 2011 and before 1Jan 2013	48
Exclusion	Development inhibition / physical impairment only; types of placement other than the five specified; termination of placement; 15-17 years	48
Choice of proceedings	Latest three fulfilling decisions per municipality; called randomly in other sections, but method is temporal local quota	48
Unselected municipalities	The footnote says 9, but Esbjerg is mentioned twice among 9 names; unique 8.	48
Reference population	1080 target group in prose PDF48 / 73 / 74; footnote PDF74 indicates 1142 children / adolescents without a vote	74
Alleged representativeness	Printed 5% error margin without published weighting; different consent / placement distributions; no national error rate	74
Municipality interview	6 municipalities: Gladsaxe, Skanderborg, Aabenraa, Frederikshavn, Lolland, Odense; selection including network use	78
Case files for qualitative illustrations	6 municipalities asked for 3 acts each, one network; 18 are ordering, not documented definitively received	22
Child interview	9 children 10-14 years in ordinary foster family, 4 municipalities, August 2013, in a room without foster parents	60
Child Selection	Commune intermediary; written consent of the parental authority; able to handle interviews; possibility of networks in addition to parents	79
Passenger bridge	252 children / 9 interviewees not connected; no documented union 261; number of parents / siblings / disabled	49
Contact concept	Physical interaction; letter, email, telephone, social media omitted from the mapping, but mentioned in interviews	48
General time limits	Family group conferencing typically 2-3 weeks; child welfare assessment 4-month time limit mentioned; Aalborg 2-year project	21
No fallout check	No national or individual measurement of legal correctness/return home/compensation; contact over the most recent six months is the municipalities' file-based recording	48

All numbered original tables

Table 2.1: Participatory case-processing method

NET13-FULD, physical PDF11, printed 8. 93 responses; one “do not know” excluded from 94.

Concrete contact and information processes

Map	Documented statement and possible consistency	Concrete verification required	PDF page
K01	Copenhagen recognises insufficient early networking. After installation, the network may be more difficult to get involved.	Early investigations, searches and alternative support options in the specific case.	27
K02	The AS considers the risk of registering only those who are addressing themselves or of describing only relationships. Passive or less strong relatives may be omitted; relationships are not translated into support.	Outreach work and reasoned assessment of resources, not just a list of relationships.	23
B01	A child has been monitoring contact with mother for half an hour every four weeks and wants the representative's protection. Very limited time and dependence on adult support; the child's own desire must be preserved.	The specific decision, reasons for necessity and the child's own statements; not automatic illegal surveillance.	62
B02	A child says the mother's return report turned out not to hold. Uncertainty of return and subsequent teasing described by the child.	The decision / information course and original interview; the report does not test the mother's statement independently.	62
B03	A child wants shorter contact than two hours at the table. Load and lack of meaningful activity, not simple resentment of family contact.	The child's wishes, support and concrete activity / contact plan.	62,63
B04	A child will be troubled if the written schedule of visits is not there. Predictability has an independent effect on the child's everyday life.	Available plan and timely explanation of changes.	63
B05	A child describes three different homes on the same day and fears of saying something wrong. Load by shift and consideration of adult emotions.	The child's experience and specific transport / time courses, not diagnosis derived from interviews.	63,64
B06	A child wants to stay with mother, but says that the municipality has announced stay in the care family to the 9th grade. lived locked future and grief by farewell.	Original decision, review periods and reunification work; interviews are not a legal test.	64
B07	A child prefers the foster family, too, if her mother gets well. The relationship and desire of the child differ from that of other children.	Individual assessment; no general presumption of the same desire in all children.	64
B08	A child has lived 9 years in foster care after 3 first years with mother and has to choose an adult when purchasing a confirmation dress. Loyalty conflict between mother and foster mother; fear of making anyone sad.	Support for the child's own wishes without making the child responsible for adult conflict.	64,65
B09	A child would rather have 2 good hours with mother than 4 bad ones and is prepared to wait a year for longer contact. The child puts their own wish aside out of consideration for the mother's condition.	Support needs and actual contact; the opinion is not evidence of a year's actual waiting time.	65
B10	One child describes that mother's cancellations ended after the interview with case handler; others describe continued cancellations. Cancellations have different causes and processes; support can make difference.	Cancellation log and practical barriers; no overall cancellation guilt can be inferred from fewer visits.	65,66
B11	A child wants the family centre, but doubts whether it was the child or the parents' proximity. Being asked isn't the same as being able to see your influence.	Statement of reasons and response to the child's wishes.	66,67
B12	A child sees mother every two weeks against earlier monthly, changed a month before interview via mother. Contact was extended, but the child does not tell about his own direct conversation at the time of the change.	Talk and the child's real participation.	67

Map	Documented statement and possible consistency	Concrete verification required	PDF page
B13	A girl resumes contact with her father after more than 2 years and gains closer contact with his other family. The paternal side had previously been absent from a confirmation celebration with 62 invitees; her sister arrived 4 hours before the others.	Contact chain to the entire family page; the information does not show that the authority caused the previous breach.	67,69
B14	A child makes contact with mother changed from two to once monthly and from home to center; describes 5-6 movements in the year and at least 13 earlier. The child's desire for a different contact was followed.	Original wishes / decision; no additional person count of each move.	67,68
B15	A child has on several occasions wanted less intercourse, but says the municipality says the parents have to say yes. The desire remains ineffective; later hours lead to fatigue at homework.	Original grounds for jurisdiction / consent and concrete assessment; the report does not give rise to a declaration of invalidity.	68
B16	A child says that a cosy firm agreement with Grandma has ceased without the child knowing why. Contact can cease without understandable explanation for the child.	Contact plan, cause of discontinuation, child's wishes and support to maintain the relationship.	69
B17	A child experiences that Grandma no longer wants to have contact after moving to foster care. Experienced loss of relationship, even if a birthday present is sent.	Original contact trials and grandmother's statements; experience is not verified motive.	70
B18	A child sees little sister in the second foster family about every third Monday through the foster family agreement. Practical support actually provides sibling contact.	The continuity of the plan and the child's own wishes; no automatic municipal plan.	70
B19	A child has not seen half-siblings since Christmas, misses them and has not told the caretaker or foster mother it; little brother 1 year. Siblings can be weakened while missing remain unspoken.	Outreach child interview and concrete contact plan. Interview date August 2013 does not exactly give the last date of the visit.	70,71
B20	A child maintains contact with two friends from 3rd grade and organises visits independently; no one helps the child remember them. Preservation of the original network depends on the child’s own efforts.	Support for relations; no assumption that lack of plan is the same as no connection.	71
B21	A child tells about meeting months later about the foster family without knowing what it was; the second describes the fatigue of many interlocutors. Information and continuity may fail or strain.	Original information, intercom and customized help; episodes cannot be duplicated.	71
B22	One child experiences that the previous caseworker did not incorporate their wishes into the plan; another experiences an example of gardening assistance being changed to pots only and forwarded. Experienced disregard and distortion may weaken trust and the child’s ability to speak freely.	Original interview / journal / plan and receiving chain; the authority's reproduction cannot prove itself.	72

Legal significance, responsibility and requirements

The study discusses the Social Services Act rules then in force on systematic involvement (§47), child welfare assessment (§50), a support person (§68 b) and the child’s right to contact with family and network (§71). These are 2013 rules as reproduced in the report, not an assertion that the 2026 section number is unchanged. The joint report’s current rights analysis is used for present-day demands. [NET13-FULD, PDF4/14/19-20/22-23/28/33-34/56-57]

The sustainable evidential chain is: a child's contact can disappear without the child being asked or given an explanation; this is supported by specific interview statements and AS' own points for attention on active investigation; its significance is the risk of losing family connections and lacking influence, which is not resolved merely by having a plan; responsibility must be assigned to the authority that was required to investigate, give reasons, arrange and follow up; the demand is for production of original interviews with children, network maps, contact/cancellation logs, decisions and actual support, together with specific review and restoration of the affected relationships. The legal basis, necessity, causal sequence and any culpability in respect of each person must be determined on the specific records. The report does not provide personal identities or final outcomes concerning return home/compensation.

Documented source problems and residues

T6.4 contains a visually confirmed 152, where its own subcells 105 + 147 give 252. T6.1 calls its numerical heading planned absence. The grandparent figure is 30% in the table but 31% in prose; T4.2 is 37% against 38% in prose; supported networks are 0 in T6.5 against one instance in prose. The footnote's list of 9 municipalities repeats Esbjerg and gives only 8 distinct names. The reference population is 1080 in prose but 1142 in a footnote. All these values are retained separately. [NET13-FULD, PDF32-33/48/50-51/56-57/73-74]

A specific problem with the results is that the report uses the word children in frequency figures whose notes state 542 contact-group occurrences. This cannot be converted into the number of children with too little overall contact, completed visits, lost relationships or cancellations giving rise to liability. T6.3, however, actually gives 17 children with fewer contact groups than planned; it does not say why. The sample contains 36% placements without consent against a reference of 23% and 58% ordinary foster care against 44%; a standard margin of error of 5% does not remove this documented population shift. [NET13-FULD, PDF49-55/74-77]

The source work on the 79-page report is closed. The specific outstanding matters are identity links not publicly disclosed, original individual case records, reasons for cancellation, subsequent contact/reunification and actual compensation or support. These outstanding matters are necessary for stronger claims about individuals/culpability/redress; they do not weaken the already substantiated deficiencies in investigation and the children’s documented experiences.

Residential families 2014: full sub-reports, supervision and populations

All 37 + 53 + 11 + 7 = 108 original pages actually read in memory. All 40 numbered tables in Part 1 / 2 / 4; 61 reader blocks / 373 rows. Visual pages appear in the source register.

Coverage and demarcation

PF14K:80-90 municipal responses, 79 in the satisfaction figure; 97 response units. PF14P:374 of 834 questionnaires sent, 60 municipalities; former foster families excluded; one child per response. 11 interviewed families are among the 374. PF14N:95 of 97 response units, 10.542 approved/8.794 active/5.987 active full-time foster families at the end of October 2013. PF14S repeats the populations; part 3 with 57 legally examined moves is only summarised, and the main original remains a specific document still to be obtained.

374/834=44,84% response against the printed 62%.132/340=38,82% with fewer than 2 supervision visits,not 39% of 374 or all children in care.95 municipalities in the mapping against summary 93. All discrepancies are retained locally. Different survey/percentage/family/case denominators are not harmonised.

KM: Municipality method

PF14K PDF3 / 36-37; mentions 97; unitary municipality / interviews. End 2013; Organisational Reform 2014. No judicial review. Satisfaction 1-5 is recoded 1 / 2 / 3 / 4 + 5; PF14P other categories, no direct scale harmonisation.

Own evidence, rights and impact assessment

The supervision responses document a clear oversight signal:132 responses describe fewer than two visits in 2013. The strongest sustainable demand is to obtain the underlying supervision records, the child's own interview and reasons for any departures, and then establish what risk or unmet support need the missing visits caused. It is not sustainable to multiply 38,82% by the entire national population in care. The sample includes particular active families, one selected child and 340 specifically delimited responses; families whose arrangements had ended are excluded, and specific person linkage is missing.

The family's perception of a child's reactions is a contribution to proof which must be tested independently. It cannot automatically prove that contact with parents is harmful or that relationships should be restricted. When a municipality describes a general minimum of contact in the first three months, it is a concrete evidence of individual justification, proportionality and family preservation; the presentation of the report as a cooperative approach does not replace the trial. Similarly, an unheard foster family is relevant to the provision of information on a moving case, but it is not without the other acts a definitive invalidation judgment.

Case-handling changes, lack of delivery, sanction fears under supervision and lack of support may undermine both information and protection. The supporting evidence justifies the requirements of the simultaneous records, contact requests, lack of response and subsequent action. Movements proposed following an acute situation shall not be presented as a documented actual move. Similarly, administrative family breakdown must not be excused by a general cooperation narrative.

The overall strongest evidence chain is original survey response → journal / decision → concrete duty → failure → failure to act → child's proven consistency → authority knowledge → responsibility and repair. The current sources provide first-tier and clear control themes. They shall not provide a common register of persons, individual criminal assessment or proof of effective reunification. Raw data, full recordings, part 3 the main original and concrete results follow-up shall be provided for the precise additional claims. All four here identified readable originals are fully reviewed.

Three further original surveys:pension, activation and contact

Controlled October 7, 2026. Own factual tables. The populations are kept separate; there is no person delupling.

Early retirement after work efficiency method, July 2006

three months	128 yes, 9 no, 10 not available / 147	Table 3.3.5, PDF 19

Source: Original report, 59 PDF pages, SHA-256 d3d171a0343078bbd5b7e917bf6473034109e6d426bed1c08d5004a54fcd2dad. The entire pension 2006 original has now been reviewed in practice -pension2006- full -tables -and -citizens-loeb.md / .json: all 59 pages, 20 number blocks with 108

rows and 23 historical summaries of decisions on matters of principle. The same 147 awards; no additional cases. The original's two conflicting category distributions and delimited time measures are retained; the union of persons and actual redress are separate data requirements.

Two sub-tables are not harmonised: Table 3.2.8 has categories 88 / 28 / 21 / 10, while cross table 3.3.10 has 88 / 29 / 21 / 9, both n 147. These versions are retained as a concrete internal counting difference; main outcomes 113 / 34 are common. The report repeals the category "in doubt" of the new measurement forms (PDF 38); therefore, later years' change of category must not be hidden in a common series of errors.

Company practice and wage subsidy, March 2014

Source: Original report, 103 PDF pages, SHA-256 290a8104cf52c9521151b613c00aac2920e94c32d004fbab036fc241b50f9fd5.

The last two unpleasure targets did not in themselves affect the principal accuracy (PDF 51). Thus "64 correct 'is a conclusion within selected control criteria; it does not prove that all legal requirements were verified. No additional documents were obtained (PDF 61). Private / public figures refer to: **workplace**while the tried decision authority was the municipality. All 103 pages and numerical sub / commune tables of the trainee are now in fact reviewed in practice -internalization2014-full -original tables.md / .json: 40 data lags, 185 rows of numbers and 16 identified cases. The same 111 decisions; no new cohorts.

Social affairs, January 2016: State Administration

Registration	Figures and demarcation	Original Locator
Request / received and investigated	40 / **38** decisions on the merits after 1. May 2015, not appealed	PDF 3
Former control 2014	33 **already appealed and remitted** cases from 2012-2013; separate selected population	PDF 3, only historical information in this original
The child's perspective illuminated	36 sufficient / **2 insufficient** / 38	PDF 4-5
Reasons	**6 insufficient**, 1 partial / 38	PDF 4-6
Parental agreement	7 agree / 31 disagree / 38; both inadequately elucidated and all six inadequately justified in the disunity group	PDF 4
Continued handling of cases after suspension	Case **12 and 29**: temporary suspension was not followed by continuation of the proceedings until final decision;	PDF 26, printed page 24

Source: The original of the Appeal Board at the Social Teachers' Association, 32 pages, SHA-256 685486d225462b2bb1be4of2a61e072703a60ed88663d4a54fee70bd3f5bda62.

Precise version selection: The colophon calls the document "DRAFT" (PDF 2); the library catalogs it as the published 2016 report. An alternative final PDF has not been verified. The "six percent of 31" of the text in the explanatory statement does not correspond to its own six cases: its own division is 6 / 31 = 19,35%. Numbers are recorded as 6 / 38 and 6 / 31, the percentage error is corrected locally. The two lighting errors, six justification errors, one partial justification and two lack of follow-up procedures may overlap and may not be added to a number of children concerned. The duration and in fact the subsequent restoration of contact are not apparent from these checks.

Full supplementary check: Contact 2016: all 32 pages, all three figures and 20 local case IDs. The same 38 decisions, the UDKAST marking retained.. The known outstanding public table/annex material has been covered; actual redress and a union of persons do not follow automatically from decision counts.

Cases 2016: full tables, method and children's programme

The version of the publicly available 32-page version is fully text read in RAM, and all three figures as well as the erroneous percentage indication are visually checked in RAM. The Colophon's DRAFT selection is maintained. The module completes the already registered sample of 38 decisions; no new cohort is added.

Sources and scope of control

H: Original, 32 pages. SHA256: 685486d225462b2bb1be4of2a61e072703a60ed88663d4a54fee70bd3f5bda62. All pages read.

Original parts	Actual Read Content
H1-7, printed p.1-5	Version, complete scope of the request for cases, summary, all three figures and recommendations.
H8-16, printed p.6-14	The entire section on rules/the opportunity to contest the material/reasons.
H17 -26, printed p.15-24	All ages, decision groups and specific lighting / justification courses.
H27-32, printed p.25-30	The entire sub-arrangement / holiday / party consultation / agreement section and all repeat / new local case IDs.

Sample and population

Search	Limitation
Version	January 2016, ISBN 978-87-7811-314-6. The colophon PDF2 gives the title as »Samværssager - UDKAST«. The actual public version is retained, not an assumed final edition.
2015sample	40 unappealed decisions determined on the merits after 1. May 2015 requested; 38 received and measured. Appealed decisions excluded. No random-selection procedure or complete flow for the two not received is stated.
Previous investigation	33 appealed decisions from 2012-2013 already remitted for reconsideration were examined in 2014. An earlier population selected for errors, not an additional 33 in the current 38 cohort. The number of remittals for reconsideration is said to have doubled in 2012→2013, but absolute denominators are not stated.

All published figures

12 reading tables with 101 rows. Repeals and subsets of the same cohort shall not be added together. N and response categories are retained from each original.

2.1: Decision types, all graph cells

Original H, PDF page 5. 38 decisions; the categories are mutually separated in this figure, while the chapter on current / holiday / terms overlap.

Type	Number
Refusal / termination and other contact	1
Current and terms	1
Replacement	1
Suspension	2
Monitoring of the interaction	2
Conditions	2
Holidays	5
Current and Vacation	6
Ongoing interaction	9
Refusal / cancellation	9
Own sum	38

2.2: Lighting the child's perspective, all graph cells

Original H, PDF page 5. 38

Type	Yeah.	No.	Total
Refusal / termination and other contact	1	0	1
Current and terms	1	0	1
Replacement	1	0	1
Suspension	1	1	2
Monitoring of the interaction	2	0	2
Conditions	1	1	2

Type	Yeah.	No.	Total
Holidays	5	0	5
Current and Vacation	6	0	6
Ongoing interaction	9	0	9
Refusal / cancellation	9	0	9
Own sum	36	2	38

2.3: Justification of the child's perspective, all graph cells

Original H, PDF page 6. 38

Type	Yeah.	No.	Partial	Total
Refusal / termination and other contact	1	0	0	1
Current and terms	0	0	1	1
Replacement	1	0	0	1
Suspension	1	1	0	2
Monitoring of the interaction	2	0	0	2
Conditions	1	1	0	2
Holidays	5	0	0	5
Current and Vacation	4	2	0	6
Ongoing interaction	7	2	0	9
Refusal / cancellation	9	0	0	9
Own sum	31	6	1	38

S2: Overall lighting, justification and parental agreement

Original H, PDF page 4. 38. Printed 6 / 31 = 6% is a source deviation, not a correct calculation.

Cut	Number	N	Printed percentage
The child's perspective adequately elucidated	36	38	95
Insufficient lighting, disagreeing parents	2	31	6
Parents agree	7	38	18
Parents disagree	31	38	Not printed
Insufficient justification	6	38	16
The same six factors of disagreement	6	31	6
Additional partial justification	1	38	Not printed

S15: Refusal / termination of contact and age

Original H, PDF page 17. Ten cases, nine pure refusal / cancellation and one other contact. Six children are reported in the disagreements, not the total national population.

Cut	Number	N
Refusal / Revocation proceedings	10	38
Sufficiently illuminated / justified	10	10
Parental agreement	4	10
Parental disagreements	6	10
Absence children 0-2 years	2	6
Disunity children 3-5 years	1	6
Absence children 6-8 years	1	6
Disunity children 9-11 years old	2	6

S16: Ongoing interaction and absence of justification

Original H, PDF page 18. 16 courses, sub-decisions overlap with holidays / conditions. Figure 2.3 also codes one partial statement of reasons in combination proceedings.

Cut	Number	N
Ongoing	9	38
Current and Vacation	6	38
Current and terms	1	38
Total ongoing interaction	16	38
Adequate lighting of running part	16	16
Insufficient justification of the current part	4	16
of which expert assessment not involved / weighed	3	4

S17: Children in current cases

Original H, PDF page 19. 16 cases, 19 child cases, three cases involving two children. The group text "more than 12 years" is the original, although case 15 is 12 years.

Age / structure	Number
0-2 years	3
3 to 5 years	3
6 to 8 years	7
9 to 11 years	3
More than 12 years old, original formulation	3
Two children in the same case	3
Own sum of age groups	19

S19: Holidays and reasons

Original H, PDF page 21. Figure 2.1 shows five purely holiday cases; the four + six of the text can be read as the ten dispute cases, but not explicitly explained. Keep the local denominator.

Cut	Number	N
Vacancy cases	11	38
Adequate lighting	11	11
Parental agreement	1	11
Parental disagreements	10	11
Only holidays in bread text	4	10
Combination holidays in bread text	6	10
Insufficient holiday justification	2	11

S19A: Children in the ten holiday disputes

Original H, PDF page 21. ten cases / 11 child cases; overlap with 16 current cases is specifically present.

Age / structure	Number
0-2 years	1
6 to 8 years	4
9 to 11 years	2
12 years or more	4
Two children in the same case	1
Own age groups	11

S21: Conditions

Original H, PDF page 23. Three cases. Figure 2.2 shows two illuminated / one not, while H23 says only one illuminated. Not harmonised.

Cut	Number
Terms only	2
Current and terms	1
Total	3
Bread text says only one sufficiently illuminated	1
Bread text then insufficiently illuminated	1
Bread text then insufficiently substantiated	1

S23: Temporary and replacement relations

Original H, PDF page 25. Four temporary cases; the other two properly dealt with disputes have three children, not all four.

Cut	Number
Replacement, correct lighting / justification	1
Temporary meeting	4
Monitor	2
Suspension	2
Temporary correct lighting / justification	3
Agreement on Monitoring	1
Other two described properly dealt with disputes	2
Children 3-5 years of age in these two	1
Children 6-8 years of age in these two	1
Children 9-11 years of age in these two	1
Of which two children in the same case	1

S25: Sharing arrangements and other control findings

Original H, PDF page 27. Five divide-up cases within 16 consecutive; two excess holiday offers within 11 holidays. Agreement 8 may include partial agreement, 7 summary is complete, but precise coupling not published.

Cut	Number	N
Dividend proceedings	5	16
Desired limited previous regime	4	5
Determination of the sharing system	1	5
Conflicts of interest examined in three examples	3	5
Poor cooperation but not changed	2	3
Effects on children and changed	1	3
More holiday conversation than applied for	2	11
Agreement is included in the decision, H31	8	38
Agreement, summary H4	7	38

Examples, time and citizens' consequences

The strongest documented errors are insufficient lighting in cases 7 and 12, insufficient reasoning, the use of a holiday study which does not address holidays, party consultation shortcomings and the lack of further treatment following temporary suspension in cases 12 and 29. Child and parent may in the latter course be maintained in a contact procedure without the required final review. The original does not state how long those suspensions actually lasted or whether contact was restored. Case 23 provides about five months of contact absence prior to the decision, Case 25 provides an actual restart through parental statements. The decision to have a relationship is not proof of having a real relationship. Each of the 20 published local case IDs appears only once in the preliminary table; several children in the same case are specified specifically and repeated records are not added together.

Own locator	PDF	Example a	Number / progress	Assessment
32	17	Source ID	Child 11 years, multi-annual absence; termination	School and child experts' assessments and the child's wish are reproduced as a basis for decision.

Own locator	PDF	Example a	Number / progress	Assessment
				Original conversation / school acts not published; cause of multiannual absences not documented here.
9	18	Source ID	Child 10 years, two conversations; refusal of contact	The child's statements on sexual abuse and psychological evaluation are reproduced. This is documented source statements, not self-verification of the infringement.
31	19	Source ID	Children aged seven and 11; agreed 7/7 arrangement changed	Lack of parental cooperation and the concern of children are cited as a justification. The scope / effect of the new scheme is not apparent.
5	19	Kildecase ID, same also H24	Child five years; Friday-Sunday straight weeks, Wednesday-Thursday odd weeks; refusal of passport deposit	Part of the territory assessed reasoned, arbitrary part deficient: concrete justification for not requiring passport deposit deficiencies. Not two separate children / cases.
6	20	Source ID	Children six and eight years; refusal to grant a licence	The child's wish is expressed without weighing up the experts' doubts about the pressure of loyalty. Actual subsequent implementation not measured.
15	20	Source ID, continued H21	Child 12 years; spend every other weekend reduced to every fourth	The child's wish was based solely on the fact that an expert assessment of loyalty and absence of free speech was not included in the explanatory statement. Conversation note only sent for information prior to follow-up meeting; source criticises lack of clear possibility / deadlines for comments.
33	22	Source ID	Children 13 and 11 years of age; maintained three weeks of summer vacation	Perspectives only through parents; source estimates sufficiently illuminated. The children's independent attitude / actual effect not published.
30	22	Source ID	Holidays up to three nights; last one-week holidays four years earlier; H29 indicates six years, H30 five years; holiday placement influenced by the telephone information provided by the parent	Extent based on past relationship, institution and medical information. The age of the child is not given in the example; the parent does not consult the parties before the decision.
20	22	Kildecase ID, continued H23	Children eight years wanted a maximum of three overnight stays; set seven summer days, next year 14 days; Christmas shared by 28 December	Expert assessment of the child's limited understanding of consequences not weighed in the explanatory statement; holiday requests 2 + 1 week are given by parent.
37	23	Source ID	Child seven years; fixed holiday with reference to child-expert examination	The study did not relate to holidays. The reference does not therefore bear the specific holiday certificate used.
34	23	Kildecase ID, continued H24	Conditions for urine testing at the doctor / drug center, agreed about ten months earlier, maintained	Parental information on well-being and the possibility of requiring a sample upon request; actual test execution not disclosed.
7	24	Source ID	Child seven years old, allergy / asthma, dot test horse / dog / cat / dust mites; refusal of animal contact conditions	Conflicting fact of protection in contact; no further medical opinion obtained. In fact, illness after intercourse is parental enlightenment, not causally medically verified here.
29	25	Kildecase ID, continued H26	Child four years; relationship suspended	The information of the parent on mental breakdown and the child's condition is reproduced; the parent is not commented on. The source does not establish any further proceedings / final decision following the interim measure.
Own locator	**PDF**	**Example a**	**Number / progress**	**Assessment**
12	25	Kildecase ID, continued H26	Child five years; remaining in contact suspended despite lack	Alleged violence and the institution’s assessment relied upon; observed contact could illuminate the child’s

Own locator	PDF	Example a	Number / progress	Assessment
				perspective. Ankestyrelsen The Court of Justice of the European Communities has held that there is insufficient information and no further action / final decision. The exact length of the period is not available. Children's garden opinion given weight without party consultation.
11	27	Source ID	Child four years; 7 / 7 system maintained despite expert advice against continued poor cooperation	The central government's estimates of well-being and a short time after the termination of cohabitation are reproduced; the importance of conflict is used differently in the cases described.
8	28	Source ID	Children two and six years; separation from court settlements about seven months earlier maintained	The state administration is likely to be dissatisfied with change, despite poor communication. Original institutional / judicial conciliation acts are not included in the report.
3	28	Kildecase ID, continued H29	Child one year; previous shifts every second / third day in the 14-day roll, changed to Friday-Monday straight and Thursday-Friday odd weeks	The childminder's descriptions of well-being are reproduced. The lawyer's development/attachment assessment is a statement by an authority, not a separately produced expert assessment.
2	29	Kildecase ID, continued H30	Child six years; applied 23-26 and 24-27 December, fixed 29-December-1 January and 23-27 December	The report assesses more / more holiday interaction than desired. No actual date of implementation measured.
25	30	Source ID	Children nine years; spend every other weekend / holidays 2011-August 2014; applied vacation 2015, set 2015 and onwards	Parents provide stable restart immediately after the meeting. This is source-informed actual restart, unverified relationship records or precise restart date.
23	31	Kildecase ID, continued H32	Child 13 years; weekend Friday -Sunday and holiday set without escalation after about five months of interruption	Unclear as to the extent is the decision or reproduction of agreement; disagreement on escalation. Five months' absence has been disclosed, actual performance after the decision has not been documented.

Source deviations

Locator	Deviation
H4, printed s.2	The original indicates six inadequately justified by 31 disputes as six percent. 6 / 31 is about 19,35%; both printed percent and own control is retained. On the other hand, two insufficiently elucidated by 31 is about 6,45%.
H2	The Colophon's DRAFT selection; no other version based.
H19, printed p.17	The age group is formulated "more than 12 years," while Case 15 states 12 years. No tacit rewrite to ≥ 12.
H21, printed p.19	11 leave cases and one agreement; then text four pure plus six combination cases, against the five pure plus six combinations of the figure. Possible differences not explicitly; both retained.
H23-24, printed p.21-22	Bread text says only one of three arbitrary cases sufficiently elucidated; later it describes one lack of information and one lack of justification. Figure 2.2 shows together two illuminated arbitrage cases.
H22 / H29 / H30	The same case 30 is referred to without age at H22, as six years old at H29 and five years old at H30. Not divided into two children or two cases.
H4 / H31	The seven cases of unity of the summary face eight decisions with agreement in the agreement section. The latter also refers in part to agreement. Both counters are preserved without secure individual harmonisation.
H25-26	Temporary limitation of information requirements is generally justified by a later final decision, but cases 12 and 29 have no further consideration, according to the report. Consequently, the specific condition of the statement of reasons was not fulfilled in the two stages.

Other factual incisions

Locator	Precise information
H7, printed p.5	The State administration must justify why a child-expert assessment is not important, indicate the relevant age and distinguish the decision from the write-down of the parental agreement. The recommendations of the report are not documented subsequent changes.
H10-12, printed p.8-10	No fixed age limit for inclusion; about seven years is only indicative age of conversation. For under three years, information from parents, health care and institutions can be used. Note must justify concrete immaturity or alleged influence; children must not feel responsible for the decision.
H3	The state administration asked. Ankestyrelsen Participation on the sidelines in a justification project in 2016. Actual implementation, amended decisions and impact have not been documented here.
H26, printed p.24	Cases 12 and 29 are both described as suspension, but Statsforvaltningen did not proceed further, so the interim decision would not be followed by a final one. This is a specific failure to continue processing; actual subsequent reopening or restoration of contact is not documented.
H27-30	The weight of the conflict level in sharing arrangements varies in the five cases examined. Recommendation to clarify practice is not a documented change in practice.
H29-30	Two out of 11 holiday cases have more holiday experience than applied for. The report highlights the presence of the parent's own contact, not publicly required contact beyond the wish.
H30-31	Failures to hear the parties are discussed without an aggregate numerical count. Specific ID30,12,15 are reused; not three new cases in addition to those already referenced.
H31 - 32	An agreement may replace a decision by an instrument of access; specific parts of the decision must be identified, in particular by a mixed agreement / disagreement.

Historical Rule references

These are the rules and principles of the original. They are not counted as new investigations and are not automatically used as applicable 2026.

Reference	Locator	Defined content
Parental Responsibility Act § 4-5,19,21,32,34	H8-12, printed p.6-10	The child's best, own voice by age / maturity, contact with both parents and, specifically, the child's relationship. The child's perspective must always be elucidated; counselling and conflict mediation through disagreement with specific exceptions.
The official principle	H12, printed p.10	The decision basis shall be adequate and information reliable, including from other authorities. Qualified assessment of evidence is required.
Administrative Law § 19; FOB1987 p.91	H13, printed p.11	Party hearing is a guarantee. Family law information and the views of the counterparty may require further involvement; the minimum rules of the law do not replace concrete contractual arrangements.
Administrative Act § 24; FOB1988 p.276	H14 -16, printed p.12-14	Individual account of the facts and estimates. Irritable fact, conflicting expertise and derogation shall be identified and justified. The presumption of conflict in the event of termination requires concrete factual basis.
Parties' consultations	H14, printed p.12	Reasonable deadline for reply, clear information on the possibility of comments before decision. Following a meeting, requests for further comments should, as a general rule, be granted by deadline.

Instrument and stage of execution

Blank fields, codes and illustrations are method information, not citizens' numbers. Actual correction, delivery and payment shall not be deduced solely from a follow-up decision.

Field	Locator	Meaning
Measuring points	H3	Method of illumination, sufficient information and sufficient justification; no published completed instrument / local distribution.

Field	Locator	Meaning
Local case numbers	H17-32	Numbers identify examples within the report; repeated mention of the same number is the same case, not new person.
Number of children	H19 / H21 / H25	19 cases in 16 current cases, 11 in ten dissimilar cases, three in two described correct temporary disputes. The population overlaps.
The originator of information	H17-32	Parents' statements, expert assessments and institutional statements are reproduced separately. Original conversation / journal / institutional files have not been provided; the report's approval is not an independent verification of the whole fact.
Actual contact	H26 / H30 / H32	Suspension without further processing, resumption reported by the source and five months of absence are found; no complete implementation/redress series.

Concrete remains and evidence chain

All identified public pages, figures and case summaries in this version have been fully checked. Not published here: all 38 complete case files, precise dates of intervention/cessation/restart, the full union of children/parents, subsequent amendment, contact actually carried out, loss and responsible persons, the operative outcome of the two decisions not received and the later final version of UDKAST. Demand: full establishment of the facts from the case records and an opportunity to contest the material, an individually reasoned decision, continued and rapid final consideration of temporary interventions, and documentation of actual redress and any loss. Hypotheses about longer absence of contact, the cause of absence and specific culpability require evidence of timing and complete case files.

The source chain is the original table or case summary → delimited error → the stated historical rule → the act or omission of the municipality → concrete significance for performance / testing → responsibility and requirement for act-based correct decision as well as documented effectiveness. Actual loss, guilt and personal union require the separate documents specified. The assessment by the Authority is not merely proof of its own correctness.

Business practice and wage subsidy 2014: full original tables and citizens' programme

All 103 original pages are actually read in RAM. This complements the same 111case-law in practice-pension2006-training2014- cooperation2016.md; no new 111 cases are added. **32 numbered original tables,**, explicit figure data, municipal annexes and 16 different case codes have been retained.

Main analysis and control limit

The study documents 47 decisions that would be amended or remitted on appeal. This is a review assessment, rather than 47 documented amending decisions. Municipal grants could rely on deficient forms even where a signature was present. Each missing item of information must be linked to the rule, who knew it, the actual placement/employment and the individual’s or ordinarily employed worker’s specific loss. [PPR14-FULD,PDF22-26/30-46]

The 64 decisions assessed as correct overall are delimited by an explicit methodological choice: a missing job plan, prior unemployment and special employer requirements did not necessarily affect the main correctness assessment. Pay/employment conditions, distortion of competition, aid intensity and assessment under the Public Administration Act lay outside the review’s focus. The assessment form’s formal fields on PDF86 document an instrument, not that these requirements were fully examined or the results published. These exclusions do not release the municipality from specific duties. [PPR14-FULD, PDF10-11/50-57/59/86]

Method, selection and knowledge

Grants before 20. June 2013,18-65 years old; refusals excluded. Most recent cases from 12 municipalities, not a probability-based national person rate. Requested 116(32 work placements/84 wage subsidies),5 excluded, 111 retained. Already appealed and forwarded cases excluded; cases amended in local reconsideration could be included. Renewed offers for the same individual required records from the first grant. Records submitted by municipalities were assumed complete; no supplementary documents obtained. [PPR14-FULD, PDF59-61/75]

Case-wise measurement forms had to be sent to the municipality and the report was politically considered. A letter of call indicates the shredding of submitted copies after reporting; it is not proof that the municipality's own original documents have been shredded. The municipalities' general difficulty rate of 10 / 1 / 1 stands independently alongside 47 cases. Planned

dialogue in the first quarter of 2014 and reporting does not document individual repair. [PPR14-FUD, PDF9 / 59-61 / 76 / 81-83]

Figures by original table and sub-population

1.1: Total accuracy by tender

PPR14-FULD, PDF6, printed page 4. Denominator: 111. Repeats the same cohort as T3.1-3.3.

Concrete course: same outcome, no personal add-on

Case a	Original Locate or	Specific information provided by the source	Meaning and requirements
5	PDF29	Folkeskole, originally 27.2.13, extended 27.5.13; 70 employees / 3 trainees February; Declaration 9.4.13.	AS accepts the available basis despite the lack of 3 month history; declaration does not self-control of all actors' employees.
43	PDF30	Daily offers: internship 22.4.13, wage subsidy 21.5.13; 29 employees, 4 wage grants + 4 internships.	Asfinder reasonably not met, also at 29 ordinary not more than 5 supported.
103	PDF30-31	Sole proprietorship, wage subsidy 1.6.13; already 1 work-placement participant with no cessation information.	Asfinds no basis for another supported position.
111	PDF31	Public enterprise, internship 13.5.13 → wage subsidy 11.6.13; 5 / 6 / 6 employees, May 2 wage subsidy + 1 internship.	Previous termination not documented; teams of unemployed several years, possible repeated displacement requires primary acts.
48	PDF32-33	Public-sector work placement 19.6.13; employer's signature missing, employee's indication is available.	Asamen right; concrete criterion weight, not full formal acquittal.
66	PDF33	The sickness benefit is awarded to the trade union 17.6-30.8.13; signed without duly completed justification.	Signature does not replace specified agreement.
80	PDF37-38	Office assistant wage subsidy 12.11.12-10.5.13 and 17.6-13.12.13; neither old nor new form documents required consultation / agreement.	All relevant BAB68 requirements missing according to AS; the assumption of extension is the reviewer's assessment, not actual uninterrupted work.
105	PDF38	Pupils 18.6-15.12.13, signature without completed consultation points.	AS finds award unlawful; no documented subsequent redress.
57	PDF40	Painsvend 18.6-13.12.13; corresponding ordinary position available for voluntary departure only 3 months.	AS finds the additional-employment requirement not met; a specific safeguard against displacement, not evidence of a particular dismissed person's loss.
102	PDF40-41	Office assistant 10.6-31.12.13; ordinary employee dismissed 1.6.13 alleged misconduct.	Ascan not exclude similar position; the municipality had to investigate, misstatements not independently confirmed.
42	PDF44	Public office assistant 7.6-31.10.13, signature without agreement on additional employment.	The municipality should not grant the foundation.
68	PDF46	Service staff 20.6-15.9.13; form indicating work distribution.	The municipality had to examine the factual basis before an award; no final independent investigation of the employer produced.
101	PDF48	Public-school work placement 19.6-19.7.13; alternative workplace delimitation without explanation/agreement.	The municipality was supposed to investigate the actual department and get a statement.
71	PDF48-49	Insurance company, alternative delimitation without description but agreement declared.	Asgathered properly despite documented lack of clarification; unfamiliar character.
11	PDF49	Hospital archives 11.3-16.6.13, extended 17.6-16.12.13; 41 / 43 / 44 employees.	Asstis second delimitation and accepts principal accuracy, but the municipality had to clarify it. The number of departments is not automatically true.
47	PDF56	58 years, grant 12.6.13 offers 13.6-11.12.13; actual resignation 30.9.13 and acquisition of shop 8.10.13; cooperation agreement 10.6.13.	Lack of purpose / experience and additional employment; actual resignation has not been proven legal repair.

Documented deviations, local source differences and residues

The documented criticisms are insufficient fact-finding, missing ratios/hearing/agreement, known obstacles without necessary investigation, insufficient examination of sole proprietorships and unexamined public budgets. 2 municipal statements that a budget was obtained are not 2 budgets produced; T3.21 shows 0/38 in the records. The specific departure from employment in case 47 is likewise not a remittal-for-reconsideration or compensation date.

The source's local counting differences are retained: PDF27's 24 deficiencies in written declarations against T3.13's 25; PDF48-49's 3+2 alternative delimitations against T3.24's 4; the B2.2 note has 4 substantively incorrect cases without significant deficiencies; T3.4 has 4 substantively incorrect cases with significant deficiencies. These 4+4 constitute the 8 substantively incorrect cases and are not a source conflict. None of these differences is replaced with a guessed harmonised figure. Blank fields in the municipality table are reproduced as blank. Repeated tables/figures concern the same cohort.

- In fact, employees / unemployed persons' CPRunion were not published; past / other municipal interventions may overlap.
- The report does not include individual key acts, actual job paths, wage / benefit changes, losses, political implementation and post-control.
- Figure PDF64 intermediate years have no exact labels; graph curve reading would be estimated.
- A single scale for contract / formal response is not published as a result table; blank instrument response is not 0.

The strongest demand is individual examination of each documented statutory requirement, linkage of records between the municipality and workplace, actual time lost and financial consequences, responsibility for known breaches and relevant redress. Suspicion of further displacement in case 111 or citizens affected by errors outside the sample requires primary records; no national multiplication from 47/111.

Remittal, reconsideration and a broken connection: three original investigations

Controlled 7.10.2026. Figures in this module are not new citizens apart from the complaints series when the population has already dealt with complaints. All locators are physical PDFs page. No uncritical sum for the same cause of error.

AES loss of earning capacity:85 remitted appeal cases, published March 2023

Main report 39 pp.: https://cdn.ast.dk/ankestyrelsen/Media/638732391690173418/Praksisunders%C3%B8gelse-af-sager-om-tab-af-erhvervsevne-der-hjemvises-grundet-oplysningsgrundlaget.pdf. AS selected the 85 most recent AES decisions from 145 cases remitted in 2021 because of the evidential basis; reopening cases excluded. Annex p. 3; main report pp. 4-5. The original denominator for all 2021 complaints is internally contradictory:2132 on p. 4 and 2312 on p. 5.202 remittals/145 remittals concerning information are stated on p. 4. The 85-case sample is already part of the 145-case remittal population. Not 85 additional errors for the annual series.

35 requested as a pool,30 examined;3 of the wrong type replaced from the pool. Most recent before 1.8.2021. Only original refusals amended on reconsideration with a favourable finding without forwarding to AS; as a rule without new information, with a few cases containing unused new information allowed. COVID§ 26 a-b excluded. Substantive matters examined, ordinary party consultation/appeal guidance not examined. Annexes 4-6.

Measurement	Figures	Denomination	Locator
Worker's period of reimbursement / pregnancy / employee / self-employed	9/3/17/1	30	Head 6, Annex 5
Background 2020: Complaint-treated maternity cases	791	all the complaints referred to above;	head 5; UKK key figure 2020T2.3 secondary quoted
Background 2020: finding in favour on reconsideration	10%	791	same; raw counter not specified

The report does not give a complete numerator for 30 original errors versus 30 reconsideration errors. It states itself that not all 30 sequences are reproduced, main report 7. Therefore, neither 79 favourable findings from 10% rounding nor 30 unlawful original decisions from the selection criterion are inferred. Necessary request: AS's30 analysis forms and UDK2020T2.3 raw numerator/version date; case ID, appealed decision, reconsideration, favourable finding, amended award period, actual payment date and time taken. All 30 public code references and all 76 pages have now been checked in praksis-UDK2022-fuld-metode-og-30-sagsforloeb.md/.json; no additional 30 cases are added.

Interruption of interaction / contact, January 2020

Original 55 s: https://www.ast.dk/Media/638732272956796950/Ankestyrelsens-unders%C3%B8gelse-af-afbrydelse-af -samv% C3% A6r- and -kontakt.pdf. SHA256 b5a5f0addf6d114cd8e7d6aa9e841288b454ac2ce2f9f0cda861ac408dff9203.

Year	Consultation / Contact Complaint r, heleAS	All BUU complaints	Selected sample before exclusions	Locator
2016	151	1227	109	T2.1, p 15; T6.1, p 48
2017	193	1334	129	same
2018	235	1517	146	same
Sum	579	4078	384	derived amounts of separate annual statements;

384 sample cases−17 wrong type=367 appeal cases reviewed; 17 excluded=10 supervised contact+3 controlled contact+4 both. 367 cases contain 382 decisions; 15 cases under both§71 subsections 3 and 4,p. 48. The report examines characteristics, **not** a new legality review,p. 8. Four group interviews/four municipalities. The legal sample is already included in 579 AS appeals; all BUU appeals also include these appeals.

Visually read annex graphs, pp. 53-54:2016 upheld 73%, period amended 15%, other amendment 1%, annulled 12%;2017=86/5/without a printed label/9%;2018=83/8/1/8%. Subsection 3=80/10/1/10%, subsection 4=86/7/0/8%. Raw outcome counts and final year/section denominators are not specified in the graphs; percentages must not be rounded back into exact cases. The note to figure 2 uses 367 appeal cases even though the sections contain 382 decisions; the population must not be silently harmonised. All 55 pages,17 original tables/figures and 15 specific interview leads have now been checked in praksis-samvaer2020-fulde-originaltal-og-kontaktforloeb.md/.json. Periods and relationships are found there with

demarcation. In fact, subsequent contact / reunion is not part of the data set. Justification figure 2.2 omits repealed decisions and covers 331 out of 367 cases.

AES 2023: all original tables and nine citizens' programmes

39 pages of the main report and 28 pages of annexes have been read. The 31 annex tables in the previous PAES23 module were already checked; this fuller control also retains all printed percentages, four main tables, the nine individual trajectories and time intervals. **No new 85 cases population**.

Main analysis: known lack of information before refusal and deduction

The review documents 82 of 85 remitted cases in which, in Ankestyrelsen's assessment, AES should have obtained information earlier. In 19 cases AES reconsidered; five without new information and 14 still insufficiently investigated. The citizen was thus put through yet another decision and appeal while the question of compensation remained unresolved. This is a specific chain of responsibility from a known information deficiency to unnecessary waiting time. [PAES23-FULD,HovedPDF7/24-29;Bilag4.30,PDF28]

Statements by the employer and municipality cannot replace the missing primary evidence. Example 4 shows a refusal following an uninvestigated conflict over overtime and work accommodations. Example 2 shows a deduction based on municipal information about old hip pain disputed by the individual’s union; AS required further medical documentation. Historical § 12 required the occupational injury authority to discharge the burden of proving that documented loss of earning capacity was, on the balance of probabilities, due to something other than the occupational injury. The strongest demand is full source examination before compensation is reduced, a prompt lawful new decision and specific examination of the loss from delay. [PAES23-FULD, HovedPDF14-17/21-23; BilagPDF17]

Remittal is a review outcome, not documentation of compensation paid. The time intervals below stop at remittal because the next decision and actual payment are not provided. Three cases had relevant new information that, in AS’s assessment, AES could not have known; this changes only the specific assessment of responsibility in those three cases. [PAES23-FULD,HovedPDF29-30]

Method and demarcation

The sample consists of 85 most recently decided AES cases among 145 remittals for reconsideration due to deficiencies in the factual basis in 2021. All these 85 are already appeal cases in the annual series; they cannot be added as 85 extra cases. Reopening cases are excluded. Five cases read in a pilot informed the form, not a new cohort of errors. Activations of the instrument are not shown in the annex; instrument options are not actual results. [PAES23-FULD, HovedPDF4-5; BilagPDF3-13]

Source internal differences remain: 2132 Total complaints on main PDF4 and 2312 on PDF5. The main PDF9 refers to 30 complaint credits, B4.5 shows 26; 34 iB4.20 is another dimension, namely the deduction ATab could assess. The 73 actualcase deficiencies of the prosaic consist of 69 before the decision and 4 after / before the decision; not 73 before the decision. Main PDF31 s 18 not obtained should be read together with B4.25 s 1 yes / 1 partial / 17 no.

Citizens' courses and estimated time intervals

Days are their own calendar difference between the explicitly printed dates. They are not national appeals and do not include waiting time after remittal for reconsideration.

Examplest	Main original	Progress	Meaning of proof
1	PDF12-14	Trainee pedagogue, recognition 16.11.2015/permanent impairment 8%; request to reopen 21.9.2017. Working hours 37→20 hours+17 on benefits, later 30 hours. AES 1.7.2020 loss of earning capacity 15%, reassessment 14.9.2020 calculates 5% and refuses. AS 27.4.2021 remits for reconsideration. The former employer could not respond after transfer to the municipality; AES did not seek further information.	AES changed substantive compensation on an incompletely investigated occupational/medical basis. Time to remittal does not end the period of loss.
2	PDF16-17	Forklift driver struck on 16.5.2017 by 10-15 kg; recognition on 29.10.2018 permanent impairment 10%; 15.4.2019 temporary 30%without deduction. Dismissed November 2018.21.7.2020 total loss 60%/half deduction/30%occupational injury based on municipal hip history. Union challenges deterioration/no earlier sick leave.15.2.2021 remittal requires a specialist and full medical records from 2014 onwards.	Municipal repetition of disease is not sufficient proof of deduction. The burden of proof must be lifted independently.
3	PDF18-19	Welder fell 3 m on 31.8.2017, on sick leave the following week; disability pension four years later.4 specialist medical reports.13.3.2020 AES permanent injury 12%(10 back+addition for finger), AS21.12.2020 the same 12%.18.3.2021 loss of earning capacity 60%,1/3 of symptoms attributed to psychological/cognitive factors without total loss established. The company considers earnings of 250.000 kroner/35% loss.27.8.2021 remittal requires a psychiatric report/full medical records.	The company's amount and municipal PTSDomtal are statements, not evidence of non-work-related cause. No actual final 35% discharge.

Examples t	Main original	Progress	Meaning of proof
4	PDF21-23	Operator, crush injury 10.4.2019, recognition 21.4.2020 permanent impairment 5%; two weeks' sick leave.37 hours afterwards, more before. Citizen: no heavy work/no overtime; employer: no adjustments/fewer orders.3.8.2020 loss 30%,29.10.2020 reconsidered refusal (<15%) after recalculation. Citizen disputes a statement from an administrative employee and refers to the operations manager/colleagues' overtime.10.11.2021 remittal.	AEScould before the refusal had investigated conflicting facts and cross-heard. Employers' statements were used without the actual objections being verified.
5	PDF26-27	Unskilled worker, forearm fracture 28.9.2018.10.9.2020 recognition/permanent impairment 15%; specialist on 27.5.2020 reports return to work for 3 months, dismissed half a year later; municipality reports new sick leave a year later.16.2.2021 loss 60%, arm usable for 1-2 hours with severe pain. Insurer claims full-time work is possible, AS requires psychological records.	The source's different time statements about work / illness are preserved. Psychological treatment does not automatically prove other cause than work injury; the source recognises possible contributions.
6	PDF27-29	Driver,21.8.2019 recognised aggravated back condition/permanent impairment 10%−half=5%. Rehabilitation appendix not attached.17.4.2020 refusal,18.12.2020 reconsideration 40%13-31.12.2019 and 15%from 1.1.2020 with¼deduction for memory/concentration. AS24.9.2021 remits loss of earning capacity/annual pay.	The absence of underlying municipal records was visible; the general practitioner’s record alone before reassessment did not resolve the underlying problem.
7	PDF29-30	Fitter with finger injury,19.10.2020 permanent impairment<5%/loss-of-earning-capacity claim refused;AES14.12.2020 forwards after 10 months of income. AS receives information about a resource programme from 19.10.2020.7.10.2021 remittal concerning permanent impairment/loss.	AS assesses new information and no AES investigation error. The delimitation is specific:3/85,not a general defence for 82 documented deficiencies.
8	PDF33-34	Electrician’s shoulder 11.6.2018,30.10.2019 permanent injury 12%,AS30.4.2020 permanent injury 15%.31.1.2020 refusal,24.8.2020 reconsideration states both 30% and 40%.17.9.2020 new 40% decision without statutory authority. The company requests employment agreement/earnings/asthma information; AES does not obtain it, the employer has not replied. AS5.11.2021 remits.	Lack of response is not a positive proof of decision-making. Even revalued amounts were unsolved and burdened retrial.
9	PDF38-39	Warehouse worker struck by ladder,25.7.2019 permanent impairment 10%−half=5%;medical adviser consulted only about impairment.10.10.2019 loss 50%,20.10.2020 again 50%,no deduction for continuing depression. Insurer appeals. AS medical adviser finds basis incomplete;remittal date not stated.	AS specifically assesses that continuing depression required investigation in 2020. An assumption of a transient condition in 2019 does not prove the cause of illness or justify a deduction in 2020.

Example	Start	End	Days	Limitation
1	2020-07-01	2021-04-27	300	First 2020 decision→remittal
1	2020-09-14	2021-04-27	225	Refusal after reconsideration→remittal
1	2017-09-21	2021-04-27	1314	Request→remittal; not the processing time of one appeal case
2	2020-07-21	2021-02-15	209	Deduction decision→remittal for reconsideration
3	2021-03-18	2021-08-27	162	Compensation decision→remittal for reconsideration
4	2020-08-03	2021-11-10	464	Award→remittal for reconsideration
4	2020-10-29	2021-11-10	377	Refusal→remittal for reconsideration
6	2020-04-17	2021-09-24	525	Refusal→remittal for reconsideration

Example	Start	End	Days	Limitation
6	2020-12-18	2021-09-24	280	Reconsideration→remittal for reconsideration
7	2020-10-19	2021-10-07	353	AES decision→remittal for reconsideration
7	2020-12-14	2021-10-07	297	Forwarding→remittal for reconsideration
8	2020-09-17	2021-11-05	414	New 40% decision→remittal for reconsideration

Remaining and liability

Documented criticisms are insufficient information, untreated concrete factual conflicts, deduction without the necessary evidence and further delay after inadequate re-evaluation. Suspicion of the intention of a particular employee, the amount of the final compensation or consequential damage requires primary documents and the pay-out record. Former municipal or medical reproductions are no longer independent sources.

- Full CPR-based union with other complaint series not published.
- Final decision/payment/compensation and total time after remittal not recorded as outcomes.
- 2132 in main PDF4 versus 2312 in PDF5; appeal exclusion 30 in PDF9 versus 26 in B4.5. No guess selected. Main 31:18 not obtained includes 1 partial; annex 4.25 distinguishes 1 yes/1 partial/17 no.

Date of birth 2022: full method and 30 case codes

All 49 pages of the main report and 27 pages of the annex report are read. The study publishes qualitative courses and brief references to 30 case codes, but **no full quantitative accuracy matrix**. All public code references and explicit population data are reproduced below. It is the same 30 cases as earlier PUDK22; not new 30 complaints.

Main analysis: the Authority's own information is disregarded before refusal

Payment Denmark could refuse a timely application because the new alert was used without the previous alert which the Authority itself had requested to be replaced. Easy refund deleted the previous notification by correction. In Case 32, the Authority confirmed the timeliness and on the same day refused to exceed the time limit. The concrete chain of responsibility is therefore the authority's prior knowledge and instruction → loss of initial notification → lack of record involvement → incorrect refusal → necessary complaint. [PUDK22-FUD, HeadPDF14-19 / 25-26]

A successful complaint does not necessarily remove the actual burden. Case 28 shows only partial redress in practice, with even the reconsideration remaining incorrect in AS' assessment. Case 33 granted relief on the deadline, but the citizen/employer process then ended in refusal because of medical documentation. Case 34 took 135 calendar days from refusal to relief, while the employer was asked for documentation that was not used in the grounds for granting relief. Actual payment and its date are a separate evidential requirement. [PUDK22-FULD,HovedPDF31/33-35/42-43]

The review also criticises decisions granting more than AS considers lawful. These assessments are retained with their specific reasons; they cannot be rewritten as evidence that a particular citizen actually suffered a loss or had to repay. AS' assessment of case 34 is based on an unclear telephone note, and the original complaint and Nemrefusion documentation must be examined before the note is used as evidence of the truth of the telephone conversation. [PUDK22-FULD,HovedPDF32-35]

Method: reassembly case and concrete passenger bridge

35 cases submitted, 30 examined; three outside the time-limit issue were replaced within the same pool. The most recent decisions were dated 1. August 2021 or earlier. Only cases with a local finding in the party's favour, which were therefore not forwarded to AS; these are precisely a population that ordinary AS appeal statistics do not count as appeals considered. Nine employer reimbursements, three pregnancy-related sickness absences, 17 employees and one self-employed person. Employer cases may concern both the employee's parental leave and the company's finances; one case code is not a precise person count. [PUDK22-FULD, BilagPDF4-6]

The criterion was change without new knowledge. The Annex's footnote clarifies that some cases still have new information that UDKikke used. COVID § 26 a / bvar was omitted, and the hearing and complaint guidance were not formally tested. This opt-out limits the number measurement, not the duties of the authority. The pilot's five cases are method work, not five additional control cases. BilagPDF7-21 is an instrument with hidden activations, not a table of all 30 results. [PUDK22-FUD, HeadPDF7; BilagPDF4-7]

Case	Group	Main PDF	Documented case history	Original Decision	Reconsideration
3	Employer reimbursement 8 weeks	17-18/24/27-28	2.4.2020 first notification 24.1-6.2; 5.4 employee confirmation; 3.5 awaiting registration of the father; 6.5 guidance to submit a new notification; 18.5 and 13.7 periods extended to 19.1-19.2. Refusal deadline 15.4. Reassessment grants the whole period and calls it a dispensation.	Cannot be determined: changed period, lack of practice	Not applicable; individual exemption without legal basis is criticised
4	Employees 8 weeks	42	Insufficient guidance, correct equalisation.	Wrong	Correct
5	Employees 8 weeks	37-38/44-45	Father of a4-month-old child who underwent heart surgery 8-19.1.2021; 19.1 phone contact without a deadline, same day 13-page notification with deadline on page 7=5.3.30.3 reminder, 31.3 application; 7.4 refusal; the appeal describes surgery, municipal notification/personal circumstances. 3.5 favourable finding on incorrect grounds for rectifying the substantive position, should have been an exemption under§26 subsection 6.	Wrong, lack of assessment of the cause of temptation	Right outcome; incorrect justification

Case	Group	Main PDF	Documented case history	Original Decision	Reconsideration
6	Employer reimbursement 8 weeks	28	Wanted leave first declared unpaid; no ASPrpractices to maintain original notification.	Uncorrected	Unable to settle
7	Self-employed 8 weeks	48-49	Father takes 2 weeks of paternity+1 week of parental leave 15.7-2.8.2019. Telephone guidance twice,draft created 26.6,no time limit stated;signs 20.12.2019. Refusal ignores two file notes. Telephone finding in favour/substantive equalisation.	Wrong	Correct real compensation; date of payment not disclosed
9	Employees 8 weeks	41-42	Newborn twins. Paid leave 18-31.1.2020(file 20-31.1),unpaid 1-14.2.27.1 telephone;5.2 letter with deadline 27.3;28.5 application;3.7 finding in favour.	AS assesses as correct	Asvalue incorrect real equalisation
10	Employer reimbursement 8 weeks	19-21/27	2.2.2020 notification; 25.3 reimbursement 13.11-31.12.2019; 9.6 application 1.1-31.5; 18.6 a new application required; 24.6 assistance; 26.6 new application 1.1-30.4; 29.6 refusal with time limit 25.6; 30.6 finding in the party's favour. The original 9.6 application was timely.	Wrong	Correct outcome; incorrect grounds for restoring the actual position
11	Pregnancy related absence 5 weeks	31-32/34-35	Telephone 23.2.2021 without guidance on time limit;absence 15.3-7.6 due date,21.4 reporting;deadline 19.4;granted for 21.4-11.5. Finding in favour for 15.3-20.4. Decision states 20.4 as notification date;UDK confirms 21.4 is correct.	Wrong	Correct outcome, unclear real equalisation / derogation and lack of home reference
12	Employer reimbursement 8 weeks	24-25/27-28	Three periods, partial/full return to work; new reporting changes periods. Initially results in refusal and finding in favour for all periods; no documented basis for timeliness in all periods.	Unable to settle	Unable to settle
13	Employees 8 weeks	39-40	Two children, remaining leave for both.6.7.2020 timely application for 28.5-26.6 with child 1;refusal on eligibility conditions and requires new notification with child 2.11.1.2021 employer notifies/13.1 mother applies;new refusal on time limit;appeal upheld.	Wrong	Correct; UDK should have asked about child 2 already in the original case
14	Employees 8 weeks	39	Deadline not exceeded, but refusal; reconsideration finds a timely application.	Wrong	Correct
15	Employer reimbursement 8 weeks	24	Ground for finding in favour absent from reconsideration; depends on file note.	Not separately aligned in this short reference	Not separately aligned in this short reference
16	Employees 8 weeks	40-41	Pregnancy-related illness 1.7.2019,pay ends 25.8,new entitlement to pay 25.10,birth 29.11.28.8 letter with deadline 20.10;application 5.11 for 26.8-24.10. Finding in favour calculates deadline from later birth.	AS assesses as correct	Ascertaining incorrect rule / deadline
17	Employees 8 weeks	38-39/45	Mother's absence 1.4.2020, birth 26.4, correct deadline 21.6.15.6 two enquiries, employer missing;18.6 notification/letter,22.6 application 1.4.2020-12.3.2021. Refusal calculates incorrect deadline 27.5 from 1.4.21.6 documentation of borger.dk error;13.7 relief granted.	Wrong	Right outcome; unclear / incorrect basis of derogation
18	Employees 8 weeks	42	Early contact is found in the call history, not recorded in the case file. Guidance on the deadline therefore cannot be documented; UDK accepts the citizen's account and provides actual redress.	Not separately aligned in this short reference	Not separately aligned in this short reference
19	Employees 8 weeks	41	Rectification of the substantive position on reconsideration, where AS considers the conditions unmet.	AS assesses as correct	AS assesses as incorrect

Case	Group	Main PDF	Documented case history	Original Decision	Reconsideration
20	Employees 8 weeks	45-46	Leave 1.7-6.10.2020,paid holiday 7-20.10,unpaid 21.10-9.11.28.9 email to HR.4.1.2021 employer notification/letter with premature deadline 16.12.2020,application 4.1 and refusal,telephone finding in favour for good faith. AS had to obtain further information available beforehand.	Cannot be determined: no fixed practice	Unable to settle; benevolent reasons for derogation assessed by AS
21	Employees 8 weeks	13/38	Refers to § 21 subsection 7 point 3 on reconsideration; AS considers the provision inapplicable.	Uncorrected	Incorrect use of exemption
22	Employees 8 weeks	39	Time limit not exceeded, but refusal; finding in favour on timely application.	Wrong	Correct
24	Employees 8 weeks	37-38	The father documents employer contact and wages paid/later withdrawn. Rectification of the substantive position versus sufficient written guidance; AS considers an exemption under § 21 subsection 7 point 1.	A lack of a uniform approach described a	Right outcome; second reason necessary
25	Employees 8 weeks	13/38	Proper derogation use after AS.	Uncorrected	Proper derogation use
26	Employees 8 weeks	13/38	Proper derogation use after AS.	Uncorrected	Proper derogation use
27	Employees 8 weeks	39/45	One day of leave 7.9.2020, employer 3.11 with letter deadline 2.11. Extra one-week deadline 9.11, application 12.11.13.1.2021 finding in the party's favour by telephone, the note alleges a one-day overrun. Actually 3 days after 9.11.	AS assesses as correct	AS assesses as incorrect; retrievability of the oral decision is questioned
28	Employees 8 weeks	42-43	Leave 30.9-31.12.2020, often one leave day each week.8.6 plan communicated and acknowledged, no guidance on a new application. Letter deadline 25.11;3.12 application/refusal for 30.9-3.12, awarded 7-31.12. On reconsideration awarded from 14.10 with deadline 9.12;not the entire preceding period.	Wrong	Wrong: only partial real compensation, actual remaining loss time
30	Employer reimbursement 8 weeks	22-24/27	Seriously ill child 15.6-8.7.2020 and paternity leave 8-21.7. Party consultation 6.8 says to do nothing if in agreement; the deadline 15.9 was not given. Reminder 28.9 in prose versus 1.10 in the case record; unanswered. 20.10 both grant and refusal/conflicting notifications. 10.11 favourable finding on reconsideration.	Improper, inadequate guidance	Correct real equalisation
31	Employer reimbursement 8 weeks	25	Refusal even though the employer was informed that the application had been made in time.	Concordance Time Error described	Not separately aligned in this short reference
32	Employer reimbursement 8 weeks	18-19/25-26	21.7.2020 application for 2.3-29.6; 20.8 holiday error; 17.9 guidance to submit a new report after holiday and confirm timeliness. Same-day refusal 28.4-29.6; later favourable finding 28.4-22.6, no parental leave remaining for the rest 23-29.6. New period in the case record 27.4, in prose 28.4.	Improper refusal of time	Proper assessment of time off; other maternity rights not tested
33	Pregnancy related absence 5 weeks	30-31/34	On sick leave from 10.3.2020, municipal notification three days later; 25.5UDK informed of pregnancy-related absence.2 2.7 application for 2.6-3.7 refused with deadline 7.7.12.10 complaint upheld regarding timely municipal notification; subsequent refusal due to missing medical documentation.	Wrong	Correct finding in favour on time limit; actual reimbursement still refused on another ground
34	Pregnancy related absence 5 weeks	32-35	17.12.2019 telephone about rates;31.1/24.2.2020 applications for 18.11-31.12.2019;24.3 refusal. Appeal next day,Nemrefusion document arrives in late May and is forwarded 19.6(states created 9.12.2019).6.8 finding in favour based on old guidance note, not collected document.	AS assesses as correct	Asvaluing real equalitywrong; 135 evaluation, document unnecessary

Case	Group	Main PDF	Documented case history	Original Decision	Reconsideration

33	2020-05-25	2020-10-12	140	UDK prior knowledge→finding in favour on time limit, not payment
34	2020-03-24	2020-08-06	135	Refusal→finding in favour
34	2020-06-19	2020-08-06	48	Document received→finding in favour
5	2021-04-07	2021-05-03	26	Refusal→finding in favour

Documented errors, hypotheses and residues

Documented criticisms include omitted prior knowledge, incorrect calculation of time limits, inadequate guidance, incomplete real compensation, unclear reasons and decisions that cannot be recovered. Payment Denmark indicated that no decisions were automatic; Asset signatures / notes were used. It does not in itself prove that a case manager had read through the well-known documents. [PUDK22-FULD, HeadquarterPDF14 / 45]

The strongest requirements are the reconstruction of the original report and file, the verification of what information became known when, full real compensation where the error of authority affected the action of the citizen, correct justifications and actual economic recovery. Suspicion of intent, systematic concealment or a certain total economic loss requires additional primary proof.

• No publicly compiled table with exact number of correct / incorrect original and re-evaluated decisions; the 30 codes cannot all be classified from short references.

• Finding in favour on time limit does not always mean actual benefit: case 33 was subsequently refused on medical-documentation grounds.

• Exact payments, amounts, redress dates and a CPR-based union with annual statistics are missing.

• Case 30:reminder dated 28.9 in prose versus 1.10 in the record; case 32:new period starts 27.4 in the record versus 28.4 in prose; case 35:the record prints 29.02.19 in a 2020 course; case 9:pay starts 18.1 versus 20.1 in the record. Evidence versions retained.

Disrupted contact: all original numbers and documented interviews in 2020;

All 55 pages are read and all 17 original tables / figures are checked visually in memory. The tables reproduce the printed data cells with their boundaries. The Kohorten is the former PSAM20 cohort; it does not add 367 new complaints to the statistics.

Main analysis: breach of contact, lack of evidence and time

The survey shows both extensive breaks in contact and significant selection in their explanation. Figure 2.2 describes only 331 upheld or amended cases; annulled decisions are excluded. The published proportions of reasons therefore cannot be used as statistics of reasons for all 367 appeal cases examined. The derived excluded count is 36,calculated as 367−331. The report has not conducted a fresh lawfulness assessment. [PSAM20-FULD, PDF8/16/48-49]

The statements made by the authorities require independent control. Lawyers describe everything from convicted assaults to a loose, unannounced and unsubstantiated accusation. Others describe the most intrusive measures first, information afterwards, and party consultation without full information for parents. It proves documented practical statements and concrete investigation requirements; it does not automatically prove that each of 88 paragraph 4 decisions was legal, illegal or based on actual abuses. [PSAM20-FULD, PDF35 / 37- 38 / 41-42]

The time accounts shall follow the actual relationship. Two children had not seen their father for several years, according to a caseworker; Ankestyrelsen set a further period of two years at the latest. Another statement refers to six months of lack of contact before the formal interruption. The periods laid down in the figures must not be called actual time for reunification. For young children, the authorities themselves describe that the relationship can only be preserved through contact. The necessary chain of responsibility is therefore the first actual breach → decision and proof → each extension → complaint outcome → actual resumption → proven relationship loss and restoration. The last terms are not available in this dataset. [PSAM20-FULD, PDF26 / 30-31 / 36]

Method, separation and bridge

579 nationally decided AS complaint cases from 2016-18 form the selection population.384 sample cases became 367 after 17 exclusions.367 cases contain 382 decision occurrences under specific statutory provisions, because 15 cases involve both provisions.294 subsection 3+88 subsection 4=382; this represents neither 382 children nor 382 independent families. Contact less than once a month is treated as interruption even though contact may continue. [PSAM20-FULD,PDF7/13/24/34/48-49]

The interviews cover 14 employees in four municipalities selected by experience, variation in legal basis and geography. Managers selected the employees; quotations were sent to them for comment. Statements do not replace case records, and municipalities' explanations for the increase in complaints are assessments, not causal evidence. Each person's repetition across years, siblings and relationships cannot be publicly reconciled. [PSAM20-FULD,PDF49-51]

All concrete interview tracks with evidence definition

Track	PDF	Own paraphrase of statements	Meaning of proof and necessary checks
Int 01	21	The case manager reports on past relationships / negotiations rather than several formal decisions after legal upgrading.	Documented self-description of practice, not full case control. Requires initial agreements / competence / concrete consent for legal review.
Int 02	25	A child's relationship with mother was reduced from monthly to every three months, according to the opinion of the case worker, due to prolonged reactions.	Three months of interval is not three months of complete contact. The child's record, description and decision not published; no independently established infringement.
Int 03	26	Trade coordinator describes girl with anxiety / crying after mother's presence and refers to mother as mentally ill.	Authority statements; no medical original diagnosis checked. Both the child's reaction and causal explanation require primary proof.
Int 04	26	The trade coordinator describes interruption although the child had not already seen mother for 6 months, in order to remove uncertainty about attendance.	In fact, the absence of meetings prior to the formal decision following statements; no date / explanation for each extension of the default .6 months is not further counted in an unknown decision period.
Int 05	30-31	Lawyers describe 6 months of repetitive interruptions, with possible transition to 1 year, shorter periods of documentation failure and young children, where the relationship can only be maintained through contact.	The practice described by the Authority shows even the loss of relationships of time. No measured actual cumulative separation; requires first break, each extension and actual restoration.
Int 06	31-32	Lawyer describes young people who want a normal foster family life, although there is no strong concrete justification in health / development and parents do not harm the child.	The statement documents a problem of legal reasoning, not that all such interventions were unlawful. The child's wishes must be examined together with the actual condition for legal authority and proportionality.
Int 07	32-33	The child's various statements to parents, foster families and carers are called possible loyalty conflict.	Initial statements and interview terms are not reproduced; official interpretation must not automatically replace the child's own explanation.
Int 08	35	Legal indicates ranges from final judgment against the relevant person to loose accusation from mother against father / grandfather without substantiation or notification.	Necessary separation of judgment, charge, notification, suspicion and proof. Not all 88 paragraph 4 decisions actually document abuse.
Int 09	36	Case handler describes two children without contact with father for several years; AS set the last interruption period to 2 years.	Two children in one statement, no published case ID or delupply bridge to 367.2 years is a last-specified period, not the entire actual separation. Repair not enlightened.
Int 10	37-38	Lawyer describes acute placement + anonymization + interrupted contact / contact before full information, then dialogue with police / orphanage / parents.	A cumulative chain of interventions and missing information at the starting point appear as statements about practice. Original chairperson decision and all subsidiarity assessments required.
Int 11	38	Legal describes the hearing of the parties at the same time as parents are initially supposed to be given limited information for the purposes of notification.	Specific risk of an ineffective opportunity to challenge the material; the legal basis for each restriction of information must be documented, not assumed lawful from the quotation.
Int 12	38-39	The case manager describes mother's Messenger behavior and the requirement of a teacher in contact; another describes monitoring as practically impossible.	The first is the condition of control and accusation, not necessarily full termination of contact. Access / contact instructions and actual messages are required for testing.
Int 13	40	Legal officer describes 3-4 months before the requested child welfare assessment in an urgent unfamiliar case; the contact period follows.	Planned information period has not been documented actual implementation time, nor automatically legal deadline.
Int 14	41-42	Employees describe action only on presumption and continued presumption following waiver; report refers to 63-16 / 42- 18.	Absence of charges proves neither abuse nor automatic abuse. The Authority shall provide a concrete basis for the current presumption and for each continued action; general belief in children is not original proof.

Track	PDF	Own paraphrase of statements	Meaning of proof and necessary checks
Int 15	43/46	One relation to former foster family is interrupted; the child 12 + complained. Siblings / grandparents / foster parents are not included in the report's scheme.	The relationship blindness of the complaining population; one relation is not one new family independent of the cohort. No Union of direct / indirect affected.

Documented source deviations and real residues

2016 in Annex Figure 1 has a printed 1% share changed; earlier 0% was wrong and is corrected here. 2017 has not printed a label for the same category; an exact zero value is not derived from the missing label. In Figure 5.1, 2018Second Network stands 99% on a short column; the printed label is maintained and requires correction sheet or raw data. Figure 3.2 shows 25 months share 1% in 2018, while prosaPDF29 repeats 2016. No hidden harmonisations are introduced.

The necessary documents are analysis forms with annual distribution after 17 dispositions, precise counters, initial action decisions and the simultaneous evidence behind the interviews. In addition, there are dates for actual resumption of contact and concrete support measures. A confirmation outage is recorded as ASoutage and cannot only document the truth of all initial statements of authority.

5. Employment, Supplies and Pensions

Checked on 7. October 2026. The historical headline figures below are entry points to the newer full modules. The 2015 study of assessment of young people has now actually been read across all 86 pages, with 34 data blocks, 162 numerical rows and 20 identified case sequences; the 2015 sickness-benefit reassessment study across all 133 pages, with 25 data blocks, 186 numerical rows and 24 identified sequences. These are the same 102 and 125 decisions as below. Conflicting original denominators are retained; review assessments are not in themselves actual reopening or payment. See praksis-ungevisitation2015-fulde-tabeller-og-borgerforloeb.md and praksis-sygedagpengerevurdering2015-fulde-tabeller-og-borgerforloeb.md.

Report	n / kom munes	Correct headu falls	Wrong headu falls	Selection and exclusion	Original and locator
Sick day ge, review 2015	125/13	86	39	130 according to adjusted criteria; 5 out. First 123: 38 out, after change of criterion only 14 out; 21 supplementary is requested. Appeal and forwarded excluded; municipal revaluations allowed	report, printed 32-34,70-73,117-124
Young people under 30, visitation 2015	102/12	85	17	120 requested, 112 received, 10 out. First request after 1 January 2014; referral before 1 June 2014. Appeal on the basis of benefit excluded; municipal change allowed	report, printed 3-4; Annex 1 and letter of invitation 74- 75
Early Childhood 2015	78/10	62	16	80 received, 2 final 49 awards and 29 refusals. Communications with numerous refusals on this basis were selected on 1 October 2013- 1 April 2014. Appeal and forwarded excluded; municipal change allowed	report, printed 2-3,46-47,54-55
Fåtimerfleksej ob 2016	130/13	88	42	Only awards; all 130 received. Actual decisions 11 May 2013- 16 June 2015. Local authorities selected according to relevant case volume, size / geography. Appeal and forwarded excluded; municipal change allowed	report, printed 2-4,62-66,72-76
Pension without rehabili teringteam 2019	100/10	96	4	36 refusal, 44 obvious awards, 20 terminal awards. Not indicted Ankestyrelsen. Separate questionnaire 97 / 98 municipalities. Main report and methodological annexes now fully checked: 41 + 27 pages; see practice -pensions without 2019 -full -tables -and -citizens f orloeb.md	report, physical PDF6-9 and footnote 1

Registered error types

Measurement	Counter / relevant denominator	Locator
Sickness benefit 2015: essential medical information missing	26 / 125; current medical information missing in 22 / 26	printed 32-34,
Sickness benefit 2015: search / review not complied with	15/125	printed 56
Sickness benefit 2015: follow-up not complied with	10/125	printed 57
Sickness benefit 2015: § 7a assessment later than two weeks before cessation	29/125	printed 58
Sickness benefit 2015: § 7 a citizen involvement late; completely missing	23/125;26/125	printed 58
Young 2015: material information missing	10/102	printed 25
Young 2015: motivation / professionalism / social conditions / health not involved	9/102;9/102;12/102;14/102	printed 28-30,
Young 2015: first conversation for late; total conversation illegal	25/102;52/102	printed 31-32,
Young 2015: first stage missing / second stage not registered	42 / 102; 70 / 102. The general legality of the second stage has not been tested; individual exemption may occur.	printed 33- 34; UNGE15-FULL PDF35-36
Pension 2015: material case information missing in awards	16/49	printed 13
Pension 2015: preparatory plan / medical assessment / team statement insufficient	8/49;3/44;5/47	printed 24,28,33
Fleks 2016: material case information missing	36/130	printed 29
Fleks 2016: wrong target group flekjob / fåtimerflekjob	37/130;51/130	printed 70-71 municipal tables
Fleks 2016: Development potential not assessed by the municipality	88/130	printed 39
Fleks 2016: plan / team justification insufficient	7/130;9/130	printed 50-57,
Pension 2019: Young people's award delayed after the 18th anniversary	6/14	physical PDF9
Pension 2019: terminal medical consultant improperly involved	1/20	physical PDF9

The figures in each error group may overlap. A correct main outcome does not mean the absence of all procedural errors either. The 2019 pension study includes two refusals that should have been remitted and two awards using the wrong exemption provision; the total of 4 is a sum of adverse study assessments with different legal consequences. The report documents one young person who received a pension almost four years after their 18th birthday. It may be used as a specific observation of delay, rather than a national average waiting time.

Specific remaining checks

Pension 2015 is now fully checked in PEN15F: all 65 physical pages and all tables/annexes, with visual checking of the ambiguous cells. “Wishes” 49 yes+2 no/N49 is an actual discrepancy in the original; the 44 in the medical review has been reconciled as 49 minus four obvious § 12 cases minus case 78 on the existing basis. T1.3=36/5/8 contradicts T3.4=37/4/8 for the same 49 plans; both are retained. The previous image/medical-denominator problem has therefore been specifically resolved. See the full module’s precise case and time chains. Pension 2019 has now been fully examined with its separate methodology annex: all 41+27 pages, 13 numerical blocks and 98 rows in praksis-pensionuden2019-fulde-tabeller-og-borgerforloeb.md/.json. The five surveys discussed here were subsequently completed in the separate modules on reassessment 2015, youth classification 2015, pension 2015, few hours 2016 and pension without team submission 2019. This closes the known outstanding subtable/annex material; it does not certify a complete national inventory or actual individual redress.

Pension 2015: all tables, medical certificates, selection and citizen's programme

PEN15F includes an actual RAM reading of all 65 physical pages including all annexes. Eight pages of ambiguous numbers, all municipal cells and demographigraphs are also visually controlled; no public original stored locally. Physical PDF page is printed page number + 2. The same 78 cases as the main series, not 78 new; 14 specific case numbers that are only deduced within the original.

Main findings and concrete significance of the demarcation

All 16 hypothetical changes / remittals for reconsideration concern **awards;**, not proven wrongful refusal. All 29 refusals on the present basis were judged materially correct by the Board, while the same refusal group had three flawed plans, three incorrect complaint guides and 25 only partially correct complaint guides. The correct figure cannot therefore be rewritten into 29 error-free proceedings. The 16 awards were criticised for insufficient information; this does not prove that citizens actually had an opportunity to improve, that they were not ill or that a pension was actually deprived.

Ten municipalities were selected because they had the most refusals on the existing basis in the 4th quarter of 2013/1st quarter of 2014, ensuring enough cases that had not been appealed. 80 were submitted, two were excluded under the criteria, 78 were analysed, 49 awards and 29 refusals (PDF48-49/55-57). **Cases appealed and forwarded were excluded; cases reconsidered and amended without forwarding could be included** (PDF56). This is not a national random-sample error rate, and refusals already appealed are absent from the sample.

The request states that subsequent collection of records cannot be expected (PDF55). The methodology annex documents actual subsequent collection of forgotten records from nine of ten municipalities (PDF49). Both statements are retained: the published assessments follow completion of the records, while the number of affected cases and before/after changes are not reported. The request’s expected reporting in quarter 4 of 2014 is kept separate from the actual consultation on 20 February 2015 and public report in April 2015.

The review of plans is expressly a **purely formal check of whether information already available has been included**, not a full independent examination of the truth of each piece of information. Where information was elsewhere, the agency assumed that the team knew the complete material (PDF6/25-26). This assumption cannot replace documentation of actual presentation, receipt and consideration. The reasons for the team's recommendation were not examined under chapter 6 of the Administrative Procedure Act, because the agency treated it as a procedural step; the 29 refusals did not receive this examination of the reasons for the recommendation at all (PDF9/35/42). This must not be concealed by the overarching term review of legality.

The assessment form’s questions on hearing the parties, 5.4,and citizen involvement/team participation, 2.4.2/2.8,have no complete public results table (PDF59/61/65). A question in the form does not prove a count of safeguards met. The report’s legal references to executive orders of June/December 2014 must be version-checked against decisions from October 2013-April 2014 before making specific legal demands; a later account alone does not make later rules apply retrospectively.

All numbered tables and exact published demographics

Repeatations of the same judgment are for the purposes of voting, but are not included as additional cases. Unlabelled columns have not been found in integer cells. Printed figures / percentages are retained even where they cannot be matched mathematically.

Voting and the specific deviations of the original

T1.3 has 36 / 5 / 8, while T3.4 has 37 / 4 / 8 for the same 49 planes; both versions are visually seen. The 41 accepted / eight deficient are similar, but the degree distribution is different. The T3.5 wisher- row has 49 yes + 2 no with printN49; it is visually verified and preserved without tacit correction. T4.8 presses 25 / 29 as 87%; own fraction is 86,21%, and ordinary integer rounding would be 86. The original 87 is preserved as a number deviation, not as an additional citizen.

The LÆ265denominator 44 has been fully settled: 49 minus four obvious § 12 cases minus Case 78 on the basis of the case (PDF7 / 29-30). The previous possible gap 49 − 4 − 44 is thus explained by one specific exception case and is not a currently missing figure. 17 § 12 and 3 § 13 provide 20 positive registrations in 19 different cases due to one double count, explicitly indicated in T3.8. T3.12 s twice five negative are the same five team justifications.

The demographies PDF50-51 have been viewed visually, but column cells are not printed with exact values. Prosaen 52% men / 48% women among 49 awards cannot be translated into unique integers by regular rounding. The published 45 men / 33 women and 78 in total are preserved; they do not solve all type / age tables. A national personal connection and a register of actual loss of benefits have not been published in this study.

Specific case, health and family codes

The reproduction by the competent authority of a medical opinion shall be marked as reproduction; the full original of the medical opinion has not been published here. This is particularly true of the conclusions where the board replaces a professional forecast / risk statement with an opportunity for further clarification. The cases should be read as below, not as automatically verified medical truths.

Case mold	Physical PDF Page	The reproduction process of the original	Deviation, consistency and requirements for evidence
54	15-16	47-year-old woman, substance abuse since 16, drug-free since 2008, pain, neck/knee conditions and carpal tunnel operations. One month of work assessment in a kitchen, 2-2½ hours daily, exhaustion after 1-1½ hours.	AS: tasks did not meet the needs of the spare; further clarification. Possible higher workability is a management ending, not documented actual improvement.
44	16-17/27-28	38-year-old mother alone with five children; PTSD, anxiety and chronic pain. Trauma rehabilitation centre states chronic condition, exhausted options, risk from even the slightest treatment/assessment/clarification.	AS requires psychiatric special examination and more functional / ancillary description. The recommendation of the Management Board does not have a published independent clinical justification which clarifies the Centre's specific deterioration risk. Demand original statement, risk assessment, concrete necessity / proportionality and actual help for mother / children. Five children, not five new housing cases.
78	17-18/30	47-year-old man with anxiety / depression since youth, suspected schizophrenia 1998, diagnosed 2012, recent work 2001, effectively without stable psychiatric treatment 1998-2013. Depot medicine March 2013, accommodation; two psychiatrist disagreements, health coordinator indicates chronology and lack of opportunity.	AS: insufficient assessment, a resource programme proposed. A documented disagreement over treatment is not independent evidence of a realistic, sound prospect of development. Case 78 is precisely the fifth omitted LÆ265 assessment; no additional denominator gap.
20	19-21	55-year-old machine worker with 30 years of work, heart condition in 1995,severe shoulder injury in 2012. Cardiologist on 17 May 2013 states POSSIBLE improvement with treatment. Team 8 August; refusal 21 November 2013. Psychiatrist on 4 September says no mental illness/indication for treatment. Assessment 16 September-4 October and work placement 4 November-16 December, eight absences out of 14,30-45 minutes on the other days. Team 20 February 2014: pension; coordinator: no further medical measures.	The AS uses previously possible treatment and the motivation interpretation of the internship to criticise the award. Non-cooperation is the statement of the internship, not independently verified intent, and pain / medicine / IT deficiency should not be rewritten into it. The statement of the grounds for refusal 21 November on the lack of employment initiatives is the subject of the report's already dated September / October courses and on-going November practice. Require original decision / action list to clarify the discrepancy.
6	21-22/31	46-year-old mother had cared for her brain-injured son since he was five months old, round-the-clock assistance; brief employment when son aged 3-4. Son placed outside the home at age 15 in summer 2010, mother on sick leave from 5 August 2010. Resource programme in summer 2013, private psychology/psychiatry October 2013-January 2014, discontinued following deterioration. Clinic on 29 January 2014 describes risk from further measures.	Pension accepted. READ 265 from 24 May 2013 not updated; AS bases accuracy on other acts. The reported deterioration during the course and the clinic's risk assessment must be shown as real citizen consistency; full original clinic act is missing for independent causality / compensation testing. The son is actually described, but the original does not test the legality of the placement or the time of return.
72	22-24	18-year-old woman with significant intellectual impairment; STU and foster family, day-to-day needs. Neuropsychology 21 December 2013 at 17 years 10 months / IQ52, several levels of development are reproduced. The municipality starts retirement proceedings one month before the age of 18 and grants from the age of 18.	AS accepts obvious futility by reclarification; actual date of effect not bank date. Development ages are the reproduced professional description, not an independent basis for depriving legal capacity.
22	24-25/33	37-year-old male, lung cancer December 2013 with back metastases and terminal same month, COPD / abuse. Life-prolonging chemo and pain cover.	Pension and lenient plan accepted; life-long treatment is not documented work development. No precise terminal date / pension / payment date for day count.

Case mold	Physical PDF Page	The reproduction process of the original	Deviation, consistency and requirements for evidence
12	28/30-31	52-year-old male, accidents at work 2002 / 2004, schizophrenia diagnosis March 2012, treatment stabilized; municipal team 28 August 2013, start of the retirement case subsequently cancelled. New psychiatric status, new team January 28, 2014 without updated plan / LE265.	AS criticises both the basis and the timeliness. Five months between meetings document pre-term, not automatically five months of unlawful refusal or non-performance. CTfinding with evidence of previous blood clots should be explicitly reproduced without described damage; do not sharpen to proven brain damage.
47	29/31	46-year-old male in the nursing center with help for all everyday tasks except hygiene, alcohol-related cirrhosis, MISTANKE about alcohol dementia. Cognitive information is missing from plan / LE265 but according to AS is found in other documents.	Pension accepted following an assessment of materiality. The suspicion must remain a suspicion. Assumed team knowledge based on other documents is not proved actual review without meeting/presentation material.
31	36	17-year-old man with Down syndrome, special school / STU, significant support / communication needs; pension from 18 years without team. The municipality recognises general practice of direct pension boards in obvious cases and later indicates correction.	Safeguard rule breached; AS considers the specific deficiency to have no effect on the outcome. The municipality's reported correction of its routine is not a fully dated follow-up verification account. No published count of other individuals affected by the acknowledged practice.
48	36-38	59-year-old male, cancer surgery 2009,14 cm oesophagus / one third stomach / rib removed and lung punctured; later declared healthy. Flekbob, terminated two years later; team rejection but municipality awarded pension without re-submission.	AS: significant information gap and retransmission errors. Declared healthy after cancer treatment does not prove discontinued functional impairment after surgery. The doctor's statement that few hours of flex job cannot be ruled out is not proof of actually sustainable self-support.
1	40	63-year-old woman, teacher 1969-2012, disability pension, pain and two non-operable aneurysms. Represents as non-desirable job offers.	AS accepts refusal on the available basis. It is an assessment of the available material, not independent medical evidence that offers are sound or realistic.
34	40-41	29-year-old father with three children, special child with father; financial pressure and foreclosure. Chronic pain after a traffic accident, antidepressants, dyslexia / bullying; electrical training is lacking about half a year, dismissed after illness. Trainees as driver / janitor / warehouse.	AS accepts refusal and examination of resource trajectories; team reproduces motivation. Physical training, centre for functional disorders and extended mentors are plan proposals, not actually delivered effect; three specifically mentioned children in one family.
58	41	44-year self-employed hairdresser with work since 1996 and parallel 18 hours postjob until fall February 2010. Flekjob since May 2012, pension application May 2013.	AS accepts refusal because deterioration is not documented. Absence of documented deterioration is not self-sufficient proof of sufficient effective capacity to work; full functional / flekscobakter necessary for concrete verification.

Case 44's five children, case 6's one son with a disability and case 34's three children are nine specific children described in three parental courses. This counts descriptions in three distinct local cases, not a person-deduplicated national nine-child total; only case 6 describes actual placement of the son. Cases 72/31 also concern the young people themselves in the transition to age 18,and case 72 mentions a foster family. They must not be added to the placement statistics as two new placements.

Case	Start information	Final disclosure	Own resources calendar days	What time actually measures
12	28 August 2013	28 January 2014	153	Two team meetings; no known illegality space
20	21 November 2013	20 February 2014	91	Refusal → team setting, not pension / bank date
6	24 May 2013	29 January 2014	250	LEV265 → later clinical evaluation
6	5 August 2010	29 January 2014	1273	Disease reporting → Clinical evaluation; not every day proven authority-induced damage

These ranges overlap with other descriptions in the same case. None of them may be used automatically as days without a pension, illegal placement or a failure to pay a bank. The clinical course October 2013- January 2014 does not have exact start / end dates; it is described in the published months, not as invented 90 days. Between the two

team meetings in case 12 went 153 days; a refusal / cancellation date and actual subsequent payment must be submitted to try financial intervention time.

Local authorities' knowledge, responsibilities and priority pleas

Copenhagen's political treatment 17 September 2015 describes seven local cases, five accepted and two criticised awards; the board maintained the criticism after the municipality's comments. The production indicates 62 / 78 as 79% and 16 / 78 as 21%, while the original T1.1 presses 80 / 20; both version rows must be retained. It promises quality initiatives implemented in Q3 2015 and early correction of complaint guidance. Decision without reconciliation and expected quality improvement proves knowledge / plan, not actually improved citizen outcomes or fully completed restoration.

Documented errors: the 16 substantive criticisms of the factual basis, deficiencies concerning plans/certificates/teams/appeal guidance with their precise denominators, failure to resubmit case 48, an acknowledged unlawful routine of no team submission in case 31’s municipality, and the visually verified numerical discrepancies. **Suspicions requiring primary evidence:** an unsound new assessment despite a risk of deterioration in case 44/6, an incorrect account of absent intervention in case 20, further citizens affected by the acknowledged routine, and specific non-payment/individual criminal liability. These hypotheses must not be counted as adjudicated crimes.

Strongest demands in order of priority: produce the original medical/employment/team material and examine whether each inference actually follows from it; require sound clarification supported by specific reasons and avoidance of health-damaging measures where the primary prognosis shows a risk and necessity is not documented; require a lawful, timely decision specifically addressing all support and income-maintenance options; require dated, correct effect/payment and consideration of documented loss. For each case, the authority's knowledge, act/omission, legal departure and consequence must be linked to the original record. Public attribution of responsibility must be distinguished from actual redress; a percentage for substantive correctness cannot determine the question of Convention duties towards the citizen and the children.

Pension 2006: all results tables, citizens' programmes and authorities knowledge

PEN06F is a full RAM reading of all 59 physical pages, including the rules, principles and measurement tables. Eight pages of dense / tabular error-proof original numbers are also visually controlled. Physical and printed page numbers are the same on the main text. No official original is stored locally. It is the same 147 awards as the previous main series, not 147 new cases; 15 numbered cases, one unnumbered terminal citizen case and 23 historical summary of principles are kept separate.

Time, selection and concrete limitation of accuracy

Fifteen municipalities were asked for ten awards each; 150 called, three out on theme, 147 were analysed. The most recent decisions were taken before 1 December 2005. **This has been public knowledge published July 2006 on decisions before the main period of the report;**, not a number of new 2006 decisions. (PDF38); this wording must not be treated in the same way as the exclusion of any subsequent investigation of complaints already submitted.

The municipalities were Copenhagen, Odense, Aarhus, Aalborg, Greve, Nykøbing Falster, Helsingør, Køge, Roskilde, Næstved, Esbjerg, Horsens, Holbæk, Slagelse and Svendborg. The original does not publish a fully distributed local results sheet. The 15 municipal names and the desired ten per municipality must not be used to invent where the three abandoned were.

The investigation shall cover only awards, not refusals. Thus, the 34 criticised awards are not 34 documented illegallyrefused pensions.30 had significant / decisive information gaps, four sufficient information but materially incorrect outcomes. The Board could not change specific decisions of its own motion in this practice control (PDF7). It provides individual feedback but does not provide an actual correction / payment series.

The break in measurement in 2006 is expressly documented: the “in doubt” category is removed, and inadequate factual bases are moved to the overall incorrect/would be amended or remitted for reconsideration category (PDF9/38). Without consistent coding, an increasing error rate after this break cannot alone be interpreted as more decisions actually containing errors. Conversely, older doubtful cases must not be concealed as lawful cases in historical comparison.

All original tables and additional control figures

Each figure follows the denominator of the original; multiple crosses, subpopulations and column percentages are marked separately. All percentage deviations have been retained. Table number 3.3.10 is the original's own number, although it stands between 3.2.9 and 3.2.11.

T3.1.1 - Gender and main diagnosis; dash maintained (PDF10)

Diagnosis	Women	Women%	Male	Male%	Total	Total%

Profile and result same	147	Only awards; not automatic quality certificate
Future control decided	1	Case 003, unlawful control assessed
Deficient profiles	19	Same 18 + 1 in T3.3.1; all misjudged
Over three months	9	Notification / justification of extension not provided
No Profile	1	Terminal 64 year; concrete award accepted
Municipalities	15	ten cases requested from each
Called	150	Three out on theme: 147
Previous reform practice studies mentioned	6	Three pensions 2003 / 2004 / 2006, reval 2003, merud 2004, flex 2005; not six new 2006 cohorts

Deviations and limits of proof which the original's conclusions do not resolve

T3.2.8 has 88 / 28 / 21 / 10, while T3.3.10 has 88 / 29 / 21 / 9 for the same 147. Both versions are actually visually controlled and preserved; the change between someone's degree and no can not be corrected by guessing. The T3.2.1 assembly lines press 12 as 7% and 23 as 17%, although the specified denominators 147 give 8,16% and 15,65% .30 information gaps / 147 is 20,41%, while the summary / text refers to 21%. T3.2.5 presses one true case without documentation as 2% of 113; own fraction is 0,88%. These figures are source deviations, not further mishit citizens.

The summary at PDF4 states 27% lacking documentation of all relevant measures, while T3.2.12 has 41/147 and 28%; the own fraction of 27,89% supports the table’s rounding. The 59 pointless work trials in T3.2.7 and 37 pointless work trials in T3.2.12 involve different conditional questions and may overlap; not 96 people. The diagnosis percentages in 3.1.1 use the sex columns’ 69/78 as denominators in the type rows, while the total row’s 47/53 indicates the distribution of the full 147. The original’s footnote must be read against the cells, rather than as one uniform percentage population.

The original says that only nine of 99 offered a meeting attended; 54 are unspecified. There are therefore nine documented attendances, 36 known non-attendances and 54 unknown, not 90 documented refusals or instances of lack of interest. The agency’s own statement of limited interest cannot be established for the 54 without actual attendance evidence (PDF35).42 unspecified meeting offers are likewise not 42 documented lawful offers. Nine time-limit breaches have unspecified written extension notices, and ten have unspecified timeliness (PDF35); neither nine nor ten is a count of days without a pension.

The fact that the board did not find overtreatment / unnecessary measures applies to the selected, most recent, non-named awards. It does not document the absence of such errors in all refusals, complaints already made or the overall long-standing process of the citizen. The formal profile control is an overall assessment without separate verification of each profile element (PDF33); the original recognises that continuous citizen involvement was difficult to control (PDF34).

Concrete citizens' programme and consequences of the original

Local gsnummer no	Physical PDF Page	Publication	Evidence, concrete meaning and necessity requirements
011	22	37-year-old woman, a teacher retrained through vocational rehabilitation, depression/personality disorder and a mentally ill 15-year-old son.	AS considers less psychologically demanding work not excluded. It is a possible job ending, not documented actual support; one son and mother are concrete family contexts.
050	22-23	22-year-old male with brain damage, balance, fatigue, major speech-motor difficulties and complexity problems; stable / slow work test.	AS: lack of evidence that flekjob is unmanageable. Attendance / stability does not prove sufficient pay / work ability without performance, support and actual job base.
040	24-25	59-year-old clerk after a blood clot, reduced energy / initiative and defined cognitive problems. Short internship in new business interrupted; she was strongly emotionally influenced.	AS probably accepts the pension and calls the test appropriate. The emotional consequence is reproduced; precise duration / cause / subsequent support not provided.
042	25	47-year-old machine worker after small blood clots in the brain / brain stem, fatigue and oversight problems. A few hours on the past business could not be completed.	AS accepts adaptation and consideration. The employer's error / energy assessment is labelled as statements, not a free-standing diagnosis.
170	26	Women's tailor / housekeeper, Denmark from 1990, traffic accident 2003, chronic pain, dizziness / knee problems; pension only on a medical basis.	The AS requires work tests. The health / functional / risk basis must be verified before a specific new load; the absence of a test alone does not prove a sound improvement.
003	26-27/30	25-year-old woman after a stroke at the age of 5, learning problems, discontinued education; five short jobs and four traineeships. Neuropsychologist recommends pension with follow-up for home / home. Four-month clarification, 50% absence.	AS considers interests / hand functions insufficiently tested; only decided pension control is assessed illegally. Repeatations are one matter. Interest in the workshop / housing plan is not actually established support / housing.
030	27	54- year-old cleaning assistant after 22 years of work, severe osteoarthritis / pain. New clarification in the arcade with cleaning, interrupted after one day.	AS: the test did not respond precisely to cleaning-related pain. The concrete inappropriate task is documented criticism, not just administrative formality.
060	27-28	48-year-old health care provider with pain / migraine and referred to the trend of somatization, revalidated manual teacher two years earlier, with no job. The packaging / assembly test of the revalværket site concluded an prohibitive physical barrier.	AS: training / creative ability and possible deterioration not illuminated. Continuing training two years before is not in itself proof of the present capacity to work; the trend of sexist must not be tightened up to the absence of disease.
010	28-29	18-year-old man with Down syndrome and constant motor restlessness, assistance with all functions.	AS accepts pointless new clarification. No known bank date, no documented inclusion in the example.
172	29	51-year-old social / health assistant, severe lung disease with spread to the brain and extremely low function.	AS accepts special circumstances. The original does not provide precise action / payment dates.
029	30	37-year-old goldsmith with renal failure, imminent dialysis / transplantation, flex job abandoned.	AS says future resumption could be considered. It is a proposal, not an actual control decision or known retirement withdrawal.
058	33	20-year-old woman with delayed development, bothtraining and three-month baking practice. Psychologist's statement and positive practical statements are mentioned. The report assigns father support for addiction / weakness.	The description of the father’s influence is the authority’s causal interpretation, not independently verified evidence. Require the original psychologist/work-placement record before a family relationship is used for attitude adjustment or denial of a right.
065	33	52 years of age after stable work, depression, respiratory symptoms, sensory disturbances and possible small blood clots. Psychiatric specialist suggests possible alcohol-related brain damage.	The AS requires neurology / lung bases. Possible brain damage must not be rewritten as verified cause of injury; original statements are necessary.

Local gsnummer no	Physical PDF Page	Publication	Evidence, concrete meaning and necessity requirements
018	33	32-year old self-employed, schizophrenic diagnosis after one meeting, long-term therapist contact.	AS:one-sided factual basis, missing therapist assessment. Repetition of the medical narrative without contemporaneous treatment records cannot verify the conclusion about functioning.
089	34	60-year-old woman with stable / varied work history and new physical / mental genes.	AS: comprehensive profile, but concrete efforts in relation to resources not explained. Future improvement outcomes unknown.
No published number	32	64-year-old terminal citizen with oesophagus narrowing, no profile.	AS: formal guarantee deficiency with no concrete result. This is not proof that all profile errors are irrelevant; must not be assigned an invented case number.

Case 011 describes one mother and one 15-year-old son, case 058one father of a 20-year-old woman. These parent / child relationships cannot be deduced nationally. Boottraining in 058 has not been documented forced placement or separation from the hazard. In fact, neither case 003's possible home nor a future work function has been proven to be achieved. The original's main direct citizens' consequences are briefly interrupted unsuitable cleaning clarification, repeated job / internship breaks, emotional stress and health risks, with precise source levels for each.

All 23 historical summary of principles; separate knowledge chain

These courses concerning decisions on matters of principle are historical, from 2003-2005,and cannot be counted as 23 new cases from 2006. They were read in the published original's summaries, not presented as a full reading of the original records of those decisions. They show, among other things, already known invalidity due to profile/meeting/delegation-of-authority errors and the requirement for all relevant information rather than a later profile summary alone.

Principle	Physical PDF page	Own summary and concrete meaning
P-22-03	47	Young office graduates; AS does not accept the start of pension until relevant options are studied.
P-04-04	47	No profile; actually remittal for reconsideration back in historical cases.
P-7-04	47	58-year-old woman, refusal on the available basis; weakened concret- job requirements indicated.
P-8-04	47-48	Deficient profile concerning previous flex job/cessation; remittal for reconsideration.
P-11-04	48	65 years after 23 years of work until February 2002; AS considers testing to continue.
P-14-04	48-49	65- year weakened woman, end of October 2003 supports start; planned three-week introduction could not be implemented, remittal for reconsideration back.
P -15 -04	49	45-year existence of basic refusal; planned new internship has not actually been delivered.
P-21-04	49-50	Invalid: insufficient guidance, lack of a citizens' meeting, lack of previous fleksjobinformation; medical consultant exceeds the function of pension law assessment.
P-28-04	50	55-year-old male; flekjob / treatment justifies refusal according to AS.
P-29-04	50	Deviation from setting allowed; indication of the status of the setting required as good practice.
P-30-04	50	Failure to provide for meetings with decision-makers results in concrete nullity.
P-33-04	51	60-year-old man resident Norway, Norwegian pension; Danish refusal based on written profile / leisure resources.
P-35-04	51	Checks shall not be allowed on the basis of chronic pain syndrome alone.
P-36-04	51	The function of the profile's authority cannot be delegated; deficiency with nullity.
P-8-05	51-52	33-year-old wants pension since 1993, mental function problems and reproduced rejection of treatment; AS accepts refusal.

Principle	Physical PDF page	Own summary and concrete meaning
P-9-05	52	42-year-old woman, methadone since 1993, discontinued abuse; no attempt of actual self-support, AS accepts refusal.
P -12 -05	52-53	31 years after whips' silence, flexisitation April 2003; most recent clarification did not address competences / interests or previously documented limitations.
P-18-05	53	Healthy significantly aggravated after flekjob; AS requires specially adapted sample, actual help / result not specified.
P-19-05	53	The municipality AND board built on incomplete profile summaries; all relevant original facts had to be investigated.
P-20-05	54	Sporadic employment for 38 years; demand for clarification.
P-26-05	54	Control by May 2000 at the latest; right to the middle pension from 1 September 2000; ability to work about 2 / 3 reduced. Retroactive right, unknown bank date.
P-28-05	54	53years of short employment over 30 years; AS accepts refusal on the reproduced basis.
N-2-04	54	Specific work functions can be described as jobs or job activities.

P-26-05 is a specific historical redress track: a missed review due no later than May 2000 resulted in entitlement to the intermediate pension from 1 September 2000. A retroactive entitlement is not evidence of the day the money was actually paid. A precise complaint/redress duration cannot be calculated because the original review deadline, complaint date, AS decision and bank entry have not all been published here. The case is kept outside the report's new decisions for 2006-2025.

Documented errors, hypotheses and liability requirements

Documented errors: the negative sub-assessments, 19 defective profiles, 15 insufficient / undocumented dialogue, six missing meeting offers, nine exceedances of the three-month deadline, the illegal control in 003 and concrete unsuitable work tests in 030; their overlap shall be maintained. Undisclosed facts are separate, not proof of compliance with the obligation. **Hypotheses:** additional undisclosed guarantee / payment errors, harmful non-sample overclarification and individual criminal infringement. They require independent original documents and must not be counted as convicted acts.

Priorities:(1) documented duration, function and risk shall be tested in simultaneous primary acts before an administrative statement of possible improvement is used for further burdensome actions; (2) the municipal public-law information, dialogue and meeting guarantees shall be tested, including dates; (3) require legal decision, correct effect / payment and concrete treatment of loss / repair; (4) require the management's dated follow-up to individual feedback. The historic section 21 of the Pension Act starts with a formal transition to pension treatment, not automatically with the first sick leave. The entire pre-transition run must be measured separately so that technical compliance with time limits does not conceal the actual waiting time of the citizen.

The original's P-19-05 specifies that both municipality and board must address all relevant information, not only a summary in the profile. This rule is a direct document-verification standard for the report's criticism: where medical, family and work-placement information is reproduced, the authority's inference must not be given greater evidential weight than the original basis actually supports. The State's responsibility for protection and effective redress is a separate element; the original's lack of access to own-initiative alteration is not evidence of individual criminal immunity.

Flekjob 2006: full original control, all tables and citizens' programme

F06F. All 72 original pages of the readable Copenhagen annex version are actually reviewed in memory, including all 11 results tables, method, law extracts, practice summaries and blank measurement form. No official original is stored. PDF14 / 15 / 48 / 52 is visually controlled; in particular, the error-drawn table 3.3 is corrected to the image. The figures are the same 96 municipal and 45 Board decisions as previous main statement; this is an extension of documentation, not 141 additional errors.

What the verification covered and excluded

145 decisions are convened: 100 municipal and 45 committee decisions. Four municipal cases fall outside the theme, so 96 + 45 = 141 are investigated. 30 municipalities participate: five large with five cases and 25 others with three. The municipalities are Kø benhavn, Frederiksberg, Odense, Århus, Ålborg, Frederikssund, Helsingør, Køge, Gladsakser, Hvidovre, Ishøj, Allerød, Faru m, Greve, Helsinginge, Jægerprør, Ølkre, Næstved, Horsens, Kolding, Randers, Slagelse, Fredericia, Silkeborg, Fred erikshavn, Nakskov, Ikast, Struer, Hobro. A full municipal cell table of accuracy is not published for 96 cases. The five large are named in the method; not 30 municipal percentages are constructed.

Selection is of the most recent decisions before 1 April 2005, unemployment-benefit cases before 1 October 2004. Results were published in 2006, but the decisions precede the reporting period; they are counted as knowledge published in 2006 with their actual decision years. Decisions already appealed were not to be submitted, including board decisions already appealed to Ankestyrelsen. The total number of excluded appealed decisions is not published. The 45 board decisions are therefore not proof that the whole appeal population was examined.

PDF9 expressly states that the practice survey cannot amend lower-authority decisions on its own initiative, subject to a special rule in the child welfare area. PDF45-47 describes specific feedback and forward-looking guidance, but no complete register linkage to new decisions, jobs, pensions or compensation. A hypothetical assessment of invalidity in 44 municipal cases does not document actual restoration of 44 citizens' rights.

Table 3.7, PDF16: Causes of unemployment; more answers per case

Reason	Number	Percentage
Lack of suitable jobs	25	74
Work test / rehabilitation	4	12
Second reason	11	32

Table 3.4 p 17 contains three futile tests. The three highest degrees of retention in Table 3.5 are precisely these three. They are not added to the table. Table 3.7 has 40 causality registrations in 34 cases, explicitly multiple replies. Table 3.8 percentages sum 101 by rounding; the figures give 34. Both sub-groups 22 and 74 are contained in 96; ten in earlier fields are part of 74.

Additional exact figures and their denominators

PDF46: Call and deduction

Category	Number	Limitation
Decisions called for	145	100 municipality + 45 boards
Local authorities outside the theme	4	Dismissed 100, not 96
Local authorities included	96	The same 96 in all main tables
Decisions included	45	Complaint decisions; local authority background not extra
Assessment decisions	141	96 + 45; Undocumented personal union
Municipalities	30	Five large with 5 cases; 25 others with 3
Name	15	Derived by 45 with 3 per board; no row of municipalities per case public

PDF14: Working test and retention

Category	Number	Limitation
Appreciably pointless tests	3	Part to 17 high; not extra
Previous Workplace	22	23% of 96
Same area of work second place	10	10% of 96
New area second place	64	Rest of 96
Insufficient test retention	16	73% of 22
Insufficient testing other	18	25% of 74

PDF17: Resource Profile

Category	Number	Limitation
Prepared	83	86% of 96
Not prepared	13	14%; older appropriations without new requirements
Submitted citizen	74	77% of 96
Not presented	8	8% of 96
Submission does not appear.	14	15% of 96
Completely incomplete profile	1	Case 88; expressly invalid; overlap with 44

PDF41-44: Name outage and control

Category	Number	Limitation
Stated Refusal Visitation	33	Own outturn of the members
State-owned wage subsidy share	1	Case 16
Stated persons rather than pensions	1	Case 29
Stated refusal of own business	1	Case 26
Modified refusal of flex job	1	The same case 8 as the board is in doubt about
Remitted for reconsideration	8	Same 45, no extra 8
Overall correct decision of the Board	42	93% of 45; not 42 legal municipal cases
Wrong decision of the Board	1	Case 22, lack of resource profile
Doubt	2	Case 8 / Case 10, practice and testing
The board criticised a legal deficiency on the municipality's part	6	ID1,2,13,39,21,34; overlap with remittal for reconsideration
Missing/deficient profile underlying remittal for reconsideration	6	ID2,21,33,34,39,43
Absence of the Board's opinion	4	ID7,16,17,18; same 45

PDF9-10: Historical background outside the period

Category	Number	Limitation
Expectation for flekjob 2004	23000	Expectation; non-observed citizens 2006
About 40000 searched 2004	40000	Approximate background; not error population
About 8000 unemployed 2004	8000	20% approximate background

13 missing resource profiles must not be made into 13 infringements: the original links them to appropriations before the entry into force of the work efficiency method on 1 January 2003. On the other hand, one completely incomplete profile is explicitly invalid. Two-thirds of the right other hearing and one inadequate is published as a prose alone; an exact integer table for the remaining group does not exist. The eight missing references and 14 unknown appear as independent control categories, not 22 automatically void cases. Justification shall be explicitly assessed by means of authorisations; unknown decision-making acts may not be reclassified as verified written legality.

All published local citizens' references

Number series	Local ID	Physically PDFsid a	Own paraphrase and meaning of proof
municipality	18	22	38 years of age, low level of intellectual function; the board assesses testing adequately.
municipality	83	23	42 years of age, sclerosis; flexible jobs in previous office work; similar ID in Annex 2.
municipality	1	23/26-27/49	41 years in main text, 42 years in Annex 2; back / whiplash, one introduction course and narrow electrical testing. The board is calling for information; not proof of fervour.
municipality	56	24/50	Approximately 50 years in main text, 51 years in Annex 2; psychologically low talent versus earlier extensive agricultural work. The Authority's assumption of employability is an assessment, not an independent new function measurement.
municipality	52	26	51 years of age, psychiatric course; testing found administrative work rather than human work.
municipality	32	27/50	47 years, osteoarthritis; no other workplace / work area tested.
municipality	47	28	54 years, brain surgery autumn 2003 with spastic paralysis; fleksjob February 2005, the board considers further measures pointless. ID47 is not in Annex 2's six correct restraining cases; no renumbering is carried out.
municipality	92	28-29/49	Age 49, muscle disorder and fatigue; reassignment at the workplace from the turn of 2003/04. The agency requests a trial at another workplace;same ID in annex 2.
municipality	4	33/52	53 years of age, knee / back pain. Flekjob 1 July 2004, interview 19 July 2004, deteriorated hospital message 6 April 2005. The main text calls follow-up a great deal; Annex 3 some degree. Hospital fatigue is described, but its own medical documentation is not published.
municipality	9	34-35/52	53 years of age, pain; fleksjob 1 September 2004, internship november-December 2004, retired 20 May 2005: 261 calendar days. Only the start of the case, not the pension award or the post-payment.
municipality	88	36/56	40 years, back; completely inconclusive profile and no follow-up. The municipality's own lack of follow-up is indicated; no subsequent repair is documented.
municipality	21	48	Proper retention; age 25; reported health conditions: sclerosis. No public date for restoration.
municipality	38	48	Proper retention; age 57; reported health conditions: fibromyalgia. No public date for restoration.
municipality	60	48	Proper retention; age 61; reported health conditions: cerebral haemorrhage. No public date for restoration.
municipality	83	48	Proper retention; age 42; reported health conditions: sclerosis. No public date for restoration.
municipality	89	48	Proper retention; age 43; reported health conditions: back injury. No public date for restoration.
municipality	96	48	Proper retention; age 49; reported health conditions: parkinsonism. No public date for restoration.
municipality	6	48-49	Deficient retention; age 60; reported health conditions: osteoarthritis / fibromyalgia. No public date for restoration.
municipality	16	48-49	Deficient retention; age 49; reported health conditions: depression. No public date for restoration.
municipality	22	48-49	Deficient retention; age 59; reported health conditions: back pain. No public date for restoration.

municipality	86	49-50	Deficient past area according to Annex 2; age 44; reported health conditions: back / past abuse. No public date for restoration.
municipality	19,20,50,59,82,95	51-52	Annex 3 follow-up: High. IDs are retained as local references, not additional citizens.
municipality	4,5,9,10,14,15,24,25,28,31,34,36,40,43,67,70,73,77,85,91,93,98,99	52-56	Annex 3 follow-up: someone. IDs are retained as local references, not additional citizens.
municipality	14	56	Annex 3 follow-up: Rings. IDs are retained as local references, not additional citizens.
municipality	55,64,88,97	56	Annex 3 follow-up: None. IDs are retained as local references, not additional citizens.
municipality	19	51	Annex 3; age 37; Flekjob 22 September 2004; unemployment 1 November 2004; depression and lack of expected employment.
municipality	20	51	Annex 3; age 30; Flekjob June 2004; job 1 July 2005; back / mental / social conditions and difficult family life. The board calls the grant without basis, but the follow-up is high.
municipality	50	51	Annex 3; age 36; Depression / personality structure; one month's sick leave before job 23 May 2005.
municipality	59	51	Annex 3; age 33; Unemployment 1 November 2004; 35 sought jobs; internship January 2005 for 20 hours / week interrupted, as citizen could not cope with the tasks.
municipality	82	52	Annex 3; age 36; Flekjob 23 August 2004; unemployment 1 September 2004; internship 1 September-29 November 2004; course 17 January-11 March 2005; psychologist 21 January 2005; hospital March 2005. Pain, anxiety, compulsive disorder and connective tissue disorder.
municipality	95	52	Annex 3; age 54; Flekjob / unemployment 20 September 2004; pain elbow / hand / shoulder.
municipality	4	52	Annex 3; age 53; Unemployment 1 July 2004; admissions made job search difficult. SammeID as the main text.
municipality	5	52	Annex 3; age 50; Unemployment 17 July 2003; follow-up October / November 2003 and February 2004; job club March 2004; migraine / fibromyalgia, pension in talk.
municipality	9	52	Annex 3; age 53; Unemployment 1 September 2004; internship November-December 2004; 20 May 2005 start pension case. Originally 25 hours / week reduced to 20 in December.
municipality	10	52	Annex 3; age 40; Unemployment 1 January 2005; periodic depression / paranoid personality structure; hospitalisation interrupted follow-up.
municipality	14	53/56	Annex 3; age 32; mental problems / low skill; contact to an internship only after 5 months; coincidence in two categories.
municipality	15	53	Annex 3; age 30; Unemployment 30 August 2004; psychiatric illness; unpaid driver training February 2005 ended after 2 days; citizen asked himself to seek March 2005.
municipality	24	53	Annex 3; age 50; Flekjob 29 May 2002; unemployment 1 June 2002; back surgery January 2003; course 1 September-28 November 2003; reference 10 December 2003; internship 7 June-15 September 2004.

Number series	Local ID	Physically PDFsid a	Own paraphrase and meaning of proof
municipality	25	53	Annex 3; age 44; Flekjob 13 November 2002; unemployment 1 December 2002; internship 17 January-30 April 2003; unemployment 1 August 2003; project first January 2005. Chronic pain.
municipality	28	53	Annex 3; age 47; Unemployment 10 March 2003; follow-up November 2003; job 1 June 2005 for 15 hours / week; psoriatic arthritis and arthritis.
municipality	31	53	Annex 3; age 47; Visitation 1 September 2002; internship 18 December 2003-14 January 2004; job 15 January 2004 in 16,5 hours / week; terminated 14 September 2004 until end October; unemployment 1 November 2004.
municipality	34	54	Annex 3; age 50; Visitation 22 September 2004; unemployment 1 October 2004; clarification result 30 June 2005; knee / abdomen / back / psychiatric condition.
municipality	36	54	Annex 3; age 41; Visitation 20 September 2001; job 22 October 2001 to 2004; unemployment 13 September 2004; pension application 10 November 2004. Bronchitis, nerve / back conditions, diabetes / blood pressure.
municipality	40	54	Annex 3; age 54; unemployment 1 August 2004; worsening shoulder/neck/nerve conditions; no pension decision date.
municipality	43	54	Annex 3; age 57; unemployment June 2004; nervous disorders, assessment for depression/dementia; origin Turkey according to the original.
municipality	67	54	Annex 3; age 52; unemployment 15 September 2004; unsuccessful vocational rehabilitation as a construction technician; caretaker work in spring 2005 could not be managed because of painting tasks; heart/leg/knee conditions.
municipality	70	54	Annex 3; age 41; Visitation 25 June 2003; follow-up February 2004; proposal back centre; pain, no later start date.
municipality	73	55	Annex 3; age 40; Unemployment 1 October 2004; interviews 19 October / 8 November 2004; job search workshop 18 May 2005 after the unusual press! 8; hearing reduction / migraine, ancestry Bosnia.
municipality	77	55	Annex 3; age 42; Unemployment July 2004; job negotiation September 2004; neuroinfection, no actual date of employment.
municipality	85	55	Annex 3; age 56; Visitation 1 September 2004; unemployment 1 October 2004; training interrupted by illness / shielding; vision, depression, shoulder / social conditions.
municipality	91	55	Annex 3; age 57; Visitation May / June 2004; labour market centre, concrete action not shown; retirement case May 2005; osteoarthritis / Scheuermann.
municipality	93	55	Annex 3; age 26; Visitation / unemployment 1 October 2004; internship 22 November 2004-20 February 2005 and 1 April-30 June 2005; possible brain damage, epilepsy, back / muscle wind.
municipality	98	55	Annex 3; age 50; Unemployment 1 January 2004; job 20 May 2005; congenital spastic disorder / brain injury / two discus operations.
municipality	99	56	Annex 3; age 25; Unemployment 1 May 2004; job 16 June 2004; unemployment again 5 July 2004; internship 18 October-12 November 2004; foot surgery February 2005, continued on sick leave July 2005. Personality disorder.
municipality	55	56	Annex 3; age 49; Unemployment February 2004; specialist requested February 2005; internship April-May 2005; no documented 6-month follow-up.
municipality	64	56	Annex 3; age 44; Unemployment 31 May 2004; job 31 May 2005; fatigue / unexplained symptoms; no 6-month follow-up.
municipality	88	56	Annex 3; age 40; Unemployment 1 September 2004; agreed truck card; the municipality does not provide any follow-up.
municipality	97	56	Annex 3; age 57; Unemployment 1 November 2004; heart disease; 6 months just passed without documented follow-up.

Number series	Local ID	Physically PDFsid a	Own paraphrase and meaning of proof
municipality	28	53	Visited 10 March 2003, first follow-up November 2003, job 1 June 2005: 814 d for recruitment. Placed under some degree, but own phrase says little. Job date is not a repair of the whole legality error.
municipality	14	53/56	32 years of age, mental problems / low level of skills; first contact at an internship after 5 months, place cannot employ. SammeID and history both below and below; not two people.
municipality	5	52	50 years, fibromyalgia / migraine; the original writes 23 hours a day. Unrealistic timing is retained as source error, not rewritten to assumed 2-3 hours.
municipality	64	56	Unemployment 31 May 2004 → job 31 May 2005: 365 d. The board finds authorisation incorrect and no documented 6 months follow-up; no full repair registered.
municipality	98	55	Unemployment 1 January 2004 → job 20 May 2005: 505 d. Congenital spastic disorder / brain damage and back surgery; the board assesses the license correctly and follow up some degree.
municipality	50	51	Visitation 1 October 2004 → job 23 May 2005: 234 d. Depression; positive follow-up assessment is not causative evidence.
name	16,29,26,8	41-42	The four separate outcome descriptions are repeated under local name ID; the number ID of the municipality case is a second number series.
name	2,21,33,34,39, 43,45,10	42	The eight remittals for reconsideration; ID39 both profile and hearing the parties, ID45 a private company wrote the profile without municipal dialogue with the citizen.
name	22,8,10	42	The Board's Board's Board's assessment: ID22 incorrect, ID8 / 10 in doubt; same 45.
name	1,2,13,39,21,3 4	43	Referral to the Court: follow-up, justification, speed and late retirement; ID34 work-injury proceedings were extended. The report writes Section 19 of the Law on the Consultation of the Parties; correctly FVL § 19 står PDF42.
name	7,16,17,18	44	The Management Board identifies four missing panel statements on profile / justification.

There are 67 different published municipal IDs and 18 different board IDs in this register. The two number series must not be linked by numbers alone. Annex 3 has 34 description entries, but 33 different local IDs, because 14 is repeated. No CPR-based union or children/spouses per process is published. Diagnostic references are source statements, not new medical documentation and not a measure of all disabled people among the 96.

Original conflicts affecting counting or consistency

Original site	Concrete conflict and proper handling
PDF28 versus 48	Positive restraint ID47 missing in Annex 2's six correct ID; no documented IDbro.
PDF15 versus 49-50	Table 3.6 has seven none / rings and three none; Annex 2 classifies all ten in the missing / deficient section. All figures and references are retained without making 10 to 7.
PDF33 versus 52	ID4 high versus no follow-up.
PDF53 versus 56	ID14 repeated as some and rings; 34 entries in Annex 3 but 33 different ID.
PDF53	The ID28 is below someone, but phrase says little.
PDF23 / 26 versus 49	ID1 age 41 versus 42; ID56 approx. 50 versus 51.
PDF52	ID5 is given 23 hours a day; no guess of correction.
PDF43 versus 42	The party consultation reference is called § 19 of the Act on Legal Protection and Administration in Social Matters; FVL§ 19 is the rule in the remittal description.

Strongest sustainable criticism and demands

Conclusion: the report documents significant errors in the basis for employment and income-support decisions, but a limited and internally contradictory picture of subsequent assistance to citizens. **Authority's statement and original evidence:**44/96 do not comply with rules/practice; PDF46 excludes appealed cases; PDF9 excludes alterations made by the authority itself; PDF53/56 repeats ID14 under two degrees of follow-up. **Deficiency:** review findings are not linked to an actual new decision, payment of arrears or redress. **Rule and action:** the duty to establish the facts and sections 69-70 then in force required specific documentation and relevant individual work trials; section 4 of the Legal Safeguards Act and section 7 of the Capacity for Work Executive Order required citizen involvement. **Departure and significance:**an inadequate profile or one on which the citizen has not been heard makes the authority's narrative about capacity for work unsuitable as a reliable basis. This also applies to claims about work that can be performed and illness that can be overcome; they are not proved merely by repeating the assessment. **Consequence:**ID9 has a documented 261-day period from assessment as eligible for flexible employment to the start of a pension case, ID28 an 814-day period to employment. These times are bounded intervals in case trajectories, not automatically the same duration of an unlawful loss of income. **Responsibility:**the municipality's fact-finding, dialogue with the citizen and follow-up, and the board's review, must be documented separately. **Specific demand:**link the identified cases to corrective decisions, benefit payments, actual employment/pension, loss and assessment of responsibility; at the same time, provide original assessments and an explanation of the ID/classification conflicts. No employee is documented as unpunished or punished by these tables.

Documented errors include 44 main assessments, the expressly invalid profile, eight profiles not submitted, one board decision with a missing profile and identified grounds for remittal/reprimand. They overlap and must not be added together. Suspicions requiring primary records are erroneous narratives about citizens, deterioration in health caused by work trials, continuing loss of benefits and individual employee responsibility. Missing documents are case/person links, original employment/medical records, the entire complaint population and subsequent redress. All figures above have been traced to the stated original page; time intervals are our own calendar calculations from two published dates.

Early retirement and mental illness 2007: full tables, families and evidence training;

PP07F. All 86 public original pages have actually been read in memory. All 23 numbered results are reproduced, including the four registry tables; blank instrument, annexes to the law and six historical principles have been read separately. PDF14 / 18 / 21 / 61 is visually controlled on the crucial column and number problems. No official original is stored. The 50 cases in the tables are the same 50 in the report's previous main account, not an extra 50.

The Committee and the express control limit

The study was conducted in June-October 2007 and concerns awards in 2006 to Danish citizens aged 18-49 with specified, municipally reported affective, neurotic or stress-related diagnoses. The register population is 980; 50 are selected by sex, age and diagnosis. The eight under 30 are deliberately overrepresented compared with 42/980(approximately 4%) in the register. The raw 15/50=30% therefore cannot be extrapolated as 294 of 980 actually unlawful pensions. Refusals, people without Danish citizenship, other diagnoses and older pensioners are not covered.

PDF59 excludes cases appealed to/considered by a board. The number of excluded appeal cases is not published. The agency assumes that all records have been received and states that no further records will be obtained. PDF7/60 says the practice study does not itself amend decisions. Less focus on the work-capacity method is declared at PDF57. PDF26/47/57 says the records and timeframe are insufficient for a proper study of effectiveness and waiting time, even though table 2.19 gives appropriateness categories. A positive assessment of an interim objective is therefore not a full document review of all offers' effects or the individual's loss.

23 municipalities named PDF63: Albertslund, Ballerup, Billund, Bornholm, Brøndby, Ebeltoft / Syddjurs, Fredericia, Frederi ksværk, Faaborg, Gladsaxe, Greve, Herning, Horsens, Hvidovre, Højoverver, Høj-Tåstrup, Copenhagen, Lolland, Odense, Ringsted, Str uer, Vejen, Egedal / Ølkhel, Aabenraa. There has been no publication of a complete 50-case municipal distribution of accuracy; no figures are constructed per municipality.

Offer and diagnostic groups overlap the same 50; T2.3 summarises 76 person records across types, not 76 people. T2.8 is multiple responses and contains the documented total sum conflict. T2.7 s 23 unknown are lack of time, not 0 months. The seven over 12 months all had cash benefits; range 17-84 months each contain an extra value. Seven-year period after the last offer documents a condition of maintenance / delivery, but not seven-year established illegality or cause of health follow-up. The 53% married person in the register cannot be converted into a precise number of affected spouses among those who have failed 50, and 34 women cannot be converted into 34 mothers.

T5.2 actually has the sum of cells 99 / 98 / 99 as opposed to printed 100 / 100 / 100; rounded percentages are not converted into exact person cells. T5.4 sums 99 by rounding. T2.12 has only one registered primary deficiency per case after note; the second category includes a case with both diagnosis and treatment deficiency. The glossy instrument, on the other hand, likes to say several crosss.11 primary causes are not a complete numerator of all information errors.

All additional concrete statements

All 25 published local case ID

ID	Age	Original PDFside	Own paraphrase and meaning of the evidence
17	Not available	30/51	PDF30 says no medical annexes for diagnosis were submitted, but extensive case-record summaries; PDF51,the same ID, describes a33-year-old with a clear personality diagnosis. Both statements retained.
8	49	32	Nurses; head / back trauma, depression / panic; stress from management jobs according to production; the board accepts pension.
11	32	32-33	Treatment 6-7 years in medical records and more than 10 years overall; hospital from end 1999 to 2006; suicidal impulses are mentioned. Diagnosis weight personality / depression changes; not independent evidence of disease-induced loss.
12	45	33-34	Former leader; abuse from 17 years, lost rehabilitation; record of alcohol pattern and treatment missing. The board accepts border cases.
3	28	37-38	Socio-phobia, specialist doctor November 2005 does not assess any significant improvement next year; citizen rejects pharmaceutical form. Management consultant points to age and opportunity for treatment / job. No new patient study / actual treatment effect in public.
7	42	38	Driver, two robbery-related assaults; specialist in March 2005 proposes a fresh assessment, general practitioner in January 2006 points to clarification of authority/insurance cases. The agency lacks treatment/work-trial information; the 10-year duration mentioned is the consultant's experience, not an actual time measurement of the case.
10	46	38-39	Female from Serbia, arrived 31 years; pain / depression; rheumatoid acts missing, consultant indicates possible improvement; no documented actual improvement.
19	47	39	No ordinary employment since 1985; three-week work trial with 9 sick days; anxiety, pain, possible schizotypal disorder; the agency states treatment is possible, but a borderline case.
20	45	39-40	Disciplinary studies, four months of group therapy; the management consultant says intensive treatment should be given long ago, but indicates possible non-participation. The latter is undocumented opportunity in summary, not established citizen rejection.
24	46	40	Secretary, two accidents / whiplash; no work test / psychiatric special examination. The diagnosis label in case is given 068 while the same PTSD category in the register is 067. Prognosis is assessed badly, but the board requires more testing.
36	29	40-41	Women want education; psychiatric / psychological courses over several years. Consultant says too easily abandoned and that time makes the condition more difficult to change. No dated solution / effect.
41	45	41	Nurse / case manager, without work since 1997; anxiety prevents leaving home, health barrier to work testing. The consultant refers to rejected hospitalization / alternative intensive treatment; original rejection and medical files are missing.
1	44	42-43	On medical grounds, May 2005; about 11 weeks of testing, less than 10 hours / week; concentration / memory. The mother's boundary psychosis statements and the psychologist's later assessment are different sources. Lack of diagnostic information does not mean agility.
2	36	43	Mother of 2 children living at home with major problems; dyslexic, grade 3.-4. level, physical pain. The employment centre assesses no work function, the agency consultant assumes a possible personality disorder and calls for psychiatry/work trials. The children are expressly reported family impact, not two additional error entries.
6	33	43-44	The warehouse expects return; testing ½ -1 hour / day, district psychology. The board provides possible correct pension, but documentation unclear. Case code 063 for phobic anxiety does not fit register category 064.

ID	Age	Original PDFside	Own paraphrase and meaning of the evidence
33	34	44	Institution for homeless, psychiatric care and home care / support; medical consultant cannot judge diagnosis / treatment / abuse safely. Missing current medical certificate.
43	29	44-45	Single parent, whiplash; psychologist recommends tranquility for children / everyday life. Number of children not published; cannot be calculated by majority rule. The board finds sparse medical records.
44	34	45	Psychiatric status certificate describes PTSDafter custody and permanent inability to work. Management consultant lacks the basis, explicitly does not mean no disease. No date or independent certificate of causality for prison consequences.
48	48	45	Accounting; two-month settlement; medical consultant changes PTSDtil adjustment response and does not assess lasting. No patient examination in the control documented.
18	30	51	Mother of a child of 1 year; anxiety, medicine, conversations, admissions. The board accepts duration despite possible improvement with maturation; young age alone does not justify control. The child's diagnosis is not derived from the sentence design.
14	Not available	53-54	Local PTSD reporting; status March 2006 refers to hallucinations, psychosis / antipsychotics; management consultant finds more severe psychotic disease.
35	Not available	54	Postcontrasting, somatoform / PTSD; management consultant reclassifies neurologic symptom complex as somatoform. It is the consultant's assessment, not a verified modification of original objective findings.
37	Not available	54	Many specialist diagnoses; consultant collects as severe PTSD.
39	Not available	54	Hallucinations / compulsion; status severe depression with psychotic symptoms; consultant cannot rule out actual psychosis. Possibility is not safe diagnosis.
50	Not available	54	Consultant finds indication for severe chronic PTSD; not a new patient course.

Case 2 expressly has two children living at home;Case 18 a mother of a one-year-old child. This gives at least three directly described children in two local cases. Case 43 mentions children without a precise number and single parenthood. A complete child/parent/disability union is not published. These children are family members affected in the descriptions;they do not document three new unlawful decisions or three children placed outside the home. Reported health conditions and medical consultants' conclusions are marked as source statements, not as new objective study results.

Six historical principles, separate from the sample

Decision of principle	PDF page	Progress and limit of evidence
P22-04	66-68	47 years, 1994 without work, 1999 two suicide attempts. Original denotes municipal decision 17 July 2003 but Board confirmation 11 December 2002 before the municipality; date order not corrected by guess.
P19-04	68-69	21 years, cancer January 2003, chemo February / June 2003; refusal because during treatment. Death after the appeal before the decision; pension retrospectively from the month following the municipality's decision. Dated life / payment chain not published. Historical regelillustration 2004, not extra 50-person.
P35-04	69-72	44 years, chronic pain; 37 hours / week study 2000 and 3-4 hours / day 2001; reassessment after 3 years denied, no disqualification. Former historical case, not an extra 50.
P8-05	72-74	33 years, application since 1993; specialist March 2003 describes severe social response and fear of drug abuse. The municipality of November 2003 refused, the board gave the pension, the board deprived the right; validity assessments of the treatment option must be tested against original grounds.
P9-05	74-77	42 years, methadone since 1993; 12 week clarification 2003, only 1-3 hours / day; the board joins the refusal and requires municipal assistance. In fact, subsequent help not shown.
P13-06	77-78	48 years old, tortureliver; municipal rehabilitation since 1 November 1993, pain centre January 2004, specialist doctor September 2004, application November 2004. The municipality / board's refusal is changed to pension 2006 after re-obtaining documents back in 1993. The plea of legal basis and re-information is traced; no exact application → payment time.

The six principles cannot be added to 50 as new cases in 2007. P13-06 is included as relevant legal knowledge in 2006; the previous records are legal background. In P19-04, the pension entitlement was only restored after the death of the citizen. A retroactive decision is not the same thing as actually helping while the citizen lived. In P13-06 the file chain back to 1993 was obtained prior to the amendment of the Board's refusal; it is a documented illustration that renewed primary evidence can break a repeated authority narrative.

Original conflicts and precise corrections

Original site	Concrete discrepancy
PDF14 / 15	Prose 7 of 10 depressions worked against Table 9 of 13. Not the same denominator; original change unexplained.
PDF16	Prose 4 job training against Table 3; 50 of the table is tuned.
PDF17 / 18	Prose 27 psychiatric therapy against Table 29; printed total 111 counter-cell sum 113. Number type table 2.9 weighted 111 does not support a choice between the two.
PDF21	30-40: 5 / 18 wrong = 27,78%, printed 18%; 40-49: 17 / 24 = 70,83%, printed 74%; 7 / 24 = 29,17%, printed 16%. Printed percentages are retained next to own fractions.

PDF30	All 35 are said psychiatric documented, but one case 17 without medical records is described in the same place.
PDF20-21 / 83	Result note: only one answer about lack of information; blank instrument says more crosses. Full misunion cannot be deduced from the primary causation N11.
PDF40 / 43	Case 24PTSD068 and Case 6 phobic 063 do not match the register's 067 / 064 labels.
PDF67	Historical P22-04 date of 11 December 2002 is prior to the date of the municipality 17 July 2003; no estimated time of appeal on those dates.

Criticism, consistency and requirements

Conclusion: the study documents both inadequate municipal fact-finding and a review that cannot support firm conclusions about all citizens' actual treatment options or redress. **Authority's statement:**15 awards would be altered/remitted; 35 are accepted; treatment effectiveness and waiting time cannot be adequately examined. **Original evidence:**T2.10-12, PDF26/47/57/59 and the individual citizens' cases above. **Deficiency:**original medical/employment records have not been published; statements about possible improvement and participation cannot be reclassified as established medical fact. **Relevant rule:**sections 16-20 of the Pensions Act then in force required documented, specific capacity for work, the citizen's own view and clarification of relevant measures; section 21 required a decision no later than three months after formal transition, with a reasoned notification in the event of an exception. **Act/omission and departure:**missing case records or necessary psychiatric information make a firm statement about entitlement to income support inadequately substantiated; replacing the original course of events with summary diagnoses does not change the duty. **Effect on the outcome:**11 of 15 relate to hypothetical remittal, four to substantive disagreement; PDF43/45 shows citizens and family circumstances in which further information could change the basis. **Consequence:**at least three children are mentioned directly, the seven known lengthy cases last 17-84 months after the most recent measure, and the 23 unknown intervals conceal further possible periods of intervention/waiting time. None of these is documented as the same number of unlawful deprivations of income. **Responsibility:**the municipality's fact-finding, treatment offers and political follow-up must be examined against specific contemporaneous records; the agency's and consultant's assessment bases are separate matters for scrutiny. **Specific demand:**publish case-linked scope, duration and remedial action; obtain the records underlying prognoses and medical classifications; examine the identified citizens' cases specifically in relation to income support, treatment, loss and responsibility.

Documented review errors are 15 overall correctness findings, 11 significant/decisive deficiencies in the factual basis and 5 instances of little/no dialogue with the citizen; they overlap. Documented source errors are the conflicts concerning tables, ages, diagnostic codes and chronological order. Suspicions requiring further evidence are an incorrect medical narrative, missing actual assistance, health harm from waiting/testing and individual employee responsibility. Missing documents are the complete contemporaneous records, linkage to original treatment, appeals, later redress and loss. The strongest sustainable arguments concern the duty to establish the facts, specific reasons and dialogue with the citizen, followed by actual access to subsistence support/treatment and effective review. All decisive factual claims are linked to a physical original page above; counting alone creates no conclusion on responsibility.

Penalties 2015: full original numbers, actual dependencies and control chains

SAN15F is a full reading of all 116 physical pages of the main report and all its annexes, together with the separate one-page corrigendum. The originals were read directly in memory and not saved locally. 18 numerical pages were also visually checked. The locators are physical PDF pages; the main text’s printed page numbers are three lower. These are the same 99 cases as in the historical series, not 99 new cases. 29 example rows below contain 31 distinct local case numbers; repeated mentions are counted once within the original, and the numbers must not be linked to numbers in other reports without independent evidence identifying the persons.

What the study shows and what it fails to try

The strongest proven finding is 25 sanctions, which, according to the Board of Directors, would be amended or remitted by complaint, 26 pending cases and significant separate procedural deficiencies in the same population. The second error concerns the municipality's failure to sanction case 18. It must not be converted into another illegal deduction. The 47 cases in question relate to Sections 35 and 36 of the Act, not to a published complete review of all legal aspects.

Ten municipalities were selected by high/low sanction rates from October 2012 to September 2013. 120 cases were requested, four in each of three categories from each municipality;99 were included. Not all municipalities had the requested number in the categories. This does not document that the difference of 21 represents 21 discarded unlawful decisions. The original methodology does not further detail the actual receipt/exclusion accounting.

Cases already appealed and forwarded were excluded.(PDF98 / 113). The original complaint population must therefore be assessed separately and cannot be found by multiplying 25 / 99 up to all sanctions. Decisions and events should be after 1 January 2014; submission deadline 24 September 2014. An expectation of reporting in the first quarter of 2015 is a plan, not a restoration date.

The study did not examine whether eligibility interviews were held/their deadlines, coordinating caseworker/mentor duties or the validity of education orders (PDF5). This has specific significance: its own review of precedent decisions 87-14/N-2-07/N-7-06 describes how an invalid offer due to a missing mandatory plan/order may also invalidate the subsequent sanction (PDF93-95). Omission of a prior review of legal authority may thus conceal errors decisive for the deduction from subsistence benefits. The general description of practice studies as legality reviews (PDF112) does not expand the specific scope of examination.

The questionnaire also includes reasonable consultation time 6.3 and complaint guidance 6.7 (PDF109-111), but the original does not publish a full distribution of results for these two indents. Questions in a table are not published results. The Board evaluates only the files submitted and sends individual assessment forms to the municipalities (PDF99 / 116); actual corrections / post payments have not been published as a single series.

All original tables and figures with their delimitation

Numerical repetitions are part of this to make voting possible. They're reproductions of the same cases. A graph without printed figures is reproduced with the numbers of the accompanying text; column heights are not used to invent exact new cells. The percentage columns shall retain the rounded off of the original.

F5.1 - Three stages of consultation; deadlines have the second denominator (PDF58)

Test	Yeah.	No.	Undisclosed	N
Consultation made	83	11	5	99
All days of default	63	23	13	99
Time-limit decision	72	11	12	95

SUP1 - Call and interim / penalty (PDF5 / 8 / 46 / 97- 101 / 115)

Search	Number or time limit	Meaning
Municipalities	10	Selected by high / low penalty shares October 2012- September 2013
Cases per municipality requested	12	Four in each of three assessment categories
Total demand	120	Finally 99; deficiency in categories, undocumented 21 rejected illegal cases
Penalised	95	Justification and due process
No sanction	4	Three correct, one AS thinks wrong
19 incorrect § 36	19	11 no consultation + 4 wrong rule + 3 reasonable reason + 1 wrong number of days
Time limit for submission	24 September 2014	Recent decisions before the date of the call for competition
Start of the rule / event	1 January 2014	Both decision and sanctioned post-reform event
Expected municipal reporting	1st quarter 2015	Plan, not actual repair
Distribution of municipalities	12/4/8/12/11/12/5/11/12/12	Summer 99, same Annex 7 / T1

SUP2 - Local government's described workflows; overlap possible (PDF64-65 / 114)

Practice	Number	Evidence value
Internal guidelines	10	Submitted by the municipalities
Detailed Annexes	6	Not six extra case samples
Signature considered as consultation	1	Signature does not prove any concrete proof of defence
Home visits if necessary	1	Self-described routine, not actually contact in all cases
Meeting before sanction	1	Self-described routine
Electronic transversal operation	1	Daily at municipal centres, monthly at external and language schools, daily / weekly at job centres
Supplementary organisational questions	2	Guidelines and receipt of information from the service facility

Deviations, overlap and non-recovery order

Main text PDF54 indicates 66 correct, 17 deficient and 16 undisclosed overall instructions. The original table PDF68 in the municipality annex indicates 68 / 16 / 15. Both sums are 99; the deviation is visually verified and both versions are preserved. The recital 29 of October 2015 merely amends the withdrawal of the Committee on Economic and Monetary Affairs from the political debate because the recommendation has no economic consequences. It doesn't correct this number deviation. A statement of the financial consequences of the nomination is not an estimate of the financial losses of the citizens.

T4.2 has 103 response records in 99 cases because several grounds for absence could be registered. The text PDF42 refers to 38 cases with other reasons, while the table has 39 registrations in Others. 39 unique citizens or a new overall error population cannot be deduced from this. No response 51 is neither 51 documented absences without reasonable reason nor 51 documented healthy citizens.

T5.1 has 95 as its denominator; T5.2 has 99. Hearing the parties concerning all days has 99, whereas a decision after expiry of the time limit has 95, because the four without a sanction are excluded from the latter. The summary's 76 written notifications of absence can be reconciled as 73 written+3 other electronic/email/attendance slips in T6.1; this is a grouping, not 76 additional cases. The 31 insufficiently investigated cases, 48 deficient statements of reasons, 23 deficient hearings concerning all days and 25 hypothetical amendments/remittals for reconsideration may overlap. They must not be added together as 127 distinct citizens affected by errors.

The largest known negative sub-group is 48 deficient reasons among 95 sanctions. For a Union of at least one of these documented negative sub-assessments, a minimum of 48 and a maximum of 99 runs may only be indicated in the overall sample before a cross-table / identification is available. It is a mathematical limit to the course of proceedings, not a number of persons, criminal proceedings or fully invalid decisions. The 26 pending cases have not been declared legal.

Citizens, children, parents, health and time

The examples below are own summaries of published reproductions. Information from medical records, doctors and citizens is labelled according to their actual source; the underlying full original record is not provided in the report. Local numbers provide deduplication within this original, not cross-government identification. The course of three children in case 57 is specific family context; placement, actual separation and repair time are not documented in this example.

Local number	Physical PDF Page	Publication	Meaning of proof and specific delineation
79	38-39	26-year-old woman: ADHD / depression, alcohol, economy for recommended medication and lack of excess for treatment is mentioned.	AS: should be a party to activities. Training readiness shall not be based on undocumented treatment / resources. Original medical files and actually subsequent help have not been published.
11	39/50-51	19-year-old man with Asperger, isolation, about 18 computer hours a day, lives with parents. Five days off in five-month offers; Mom couldn't get him to go.	AS accepts the contact link. This does not prove that aid was sufficient or every other level of lawfulness met.

Local number	Physical PDF Page	Publication	Meaning of proof and specific delineation
15	40	25-year-old man with HG / HF, SU June 2014, wanted educational training and rejected the SOSU track.	AS accepts obvious readiness for education; this is the agency's assessment on the records submitted.
42	40	60-year-old woman with care / care work, the municipality considered her ready for work.	Accepted search; no independent review of all levels of sanctions in the example.
39	40	30-year-old man, dyslexic, lack of years of education, help since 2006, anxiety / abuse and mentor mentioned.	AS accepts activity Parate Visitation; registered mentor is not documented enough actual help.
50	41	Job-ready category without sufficient documents.	The basis for the eligibility assessment could not be checked.
51	41	Depression since 2010, severe overweight / absence; job-ready without medical record.	Lack of medical basis for checking, undocumented ranting.
72	41	The municipality had stated, 2,5 months before the sentence, that health had to be investigated.	Relevant material was missing during the investigation. The course documents previously recognised information needs; no precise dates for daily calculation.
38	44/52/61	39-year-old man with ADHD, anxiety / depression and alcohol; lived with mother for economic reasons. Ten days absence in May 2014, penalty for nine. Offers February-May, ten hours per week / two days, mentor; June details on antabus and medicines.	AS: medical basis and contact insufficient. Relevant June information could not be disregarded without investigation; a mentor/home contact should have been attempted. Three mentions are one case; no arrears-payment date.
75	44-45	23-year-old man with isolation, skizoid drag / test information, could not call for help; absence in July.	AS: Penalties do not promote availability. The municipality subsequently stated that the decision had been amended. The statement is evidence of notified change, unverified bank payment or restoration date.
46	45	35-year-old male with social anxiety, absence in May, medical information in June 2014.	Proper non-sanction according to AS; not to be counted as illegal deduction.
18	45-46	26-year-old male with august- / septembre absence, SU from 1 October 2014; the municipality failed to sanction.	AS considers that the municipality should have sanctioned. This error is a different category from the illegal deprivation of the citizen's support; it is not a 26th proven wrong sanction.
22,24	46	Absence from conversation attributed to section 36.	AS: wrong sanction clause, § 37 was relevant. Two different local numbers.
54,80	46/59	Failure to report sick leave referred to Section 36; 80 also defective statement of reasons.	AS: Paragraph 39 was relevant. The same 80 goes on again; it does not add up to more citizens.
16	46	Deductions for too many days.	AS underestimates the number of days; the correct / excess number is not published here.
9	47/59	Guidance accepted, but the reasons for the decision did not explain the reason and the assessment of the citizen.	A correct guidance link does not prove correct overall decision.
90	47-48	45-year-old man, bid 23 June 2014; journal 20 June, signature 24 June; absence 23 and 26 June, penalty for two days.	AS: guidance came too late for June 23. The municipality was aware to pay back one day. Intent / recognition is not a bank receipt.
94	48	22-year-old man, offer 7 July 2014, job plan 8 July; former guide 4 April and later consultation 11 July.	Lack of simultaneous guidance; neither previous general guidance nor subsequent consultation replaces the management.
62	48	Guidance did not indicate how the right to help is recovered.	A description of efficacy without guidance is insufficient.
66	49	25-year-old male received general text with three alternative effects.	The citizen could not know the consequence of his incident; sanction without clear guidance.

Local number	Physical PDF Page	Publication	Meaning of proof and specific delineation
57	51	36-year-old man, stay after family reunification, wife and three children, six years of school; six days of absence at a Danish course, lost school's telephone number and language difficulties. Stress is mentioned.	AS accepts contact. Three specifically mentioned children in one family; not a national children's number, and no original medical act has been presented.
59	51-52	28-year-old male, refugee; eight amputated toes after foreign imprisonment, pain and psychiatric referral. Nine days of absence, two days a week as well as Danish lessons.	AS accepts contact. The decision of the Danish authority must be examined separately; foreign torture / injury must not be counted as eight Danish government offences.
43	53	39-year-old male, osteoarthritis, mentor, parental authority; medical disease 25 June-16 July 2014 and record of worsening in activity.	Letter without response was followed by sanction; AS requires further contact, including parents. 21 past calendar days / 22 days including both dates are only the interval in the reported sick leave, not known illegality or medically verified cause of injury.
10	53	18-year-old man with severe ADD in a § 107 residential facility; one day of absence.	Only letter, no personal contact via the accommodation; AS: Contact options not exhausted.
49	53-54	41st-year-old male, six-month offer, 22 days off.	Only letter, no personal contact before deduction; number of absences has not been proven 22 illegal deduction days.
83	54	26-year-old man, stress/depression, seven-month measure, five days of absence. Call requested only a signature.	Contact without examination of the cause of absence did not satisfy Article 35 (5).
74	59	Deductions for 12 August 2014.	The justification did not explain the specific cause and assessment; one decided sanction day, bank outturn unknown.
85	59	Deductions for 4 June 2014.	Lack of response was equated with illegal absence without concrete justification; bank outturn unknown.
35	61	The citizen said on the phone that he had actually met the two contentious July / August days. The municipality asked him to contact the site of the bid and sanctioned without his own clarification.	AS: The authority had to investigate the attendance error itself. The list of the invitation to tender cannot only make contentious absences true; the two actual absences have not been proven in the published chain.

Knowledge, public political treatment and the strongest demands

Copenhagen's political presentation and decision 12 November 2015 documents the receipt / processing of the findings. The municipality's own sample had 12 cases, ten true, one change / remittal for reconsideration and one unresolved. The presentation says that the failed citizen had immediately passed on to training and that therefore there had been no actual consequence or further treatment. The evidence of subsequent education does not in itself demonstrate that a previous improper deduction of the income had been paid back. The production also indicates that the recommendations were already implemented; that is the municipality's status statement, not a published post-check of each payment.

The national political table indicates 47 / 25 / 26 and in a footnote omits the one wrongly omitted penalty. That demarcation may be used for the adverse sanctions of citizens, but the original's full 47 / 25 / 1 / 26 must continue to be shown. The decision to take note of the report is not a documented decision on the restoration of each individual citizen.

Documented errors: the negative partial assessments in the tables, the specifically reproduced deficiencies concerning invalidity/contact/the factual basis, and the original’s numerical discrepancy of 66/17/16 against 68/16/15. **Hypotheses that require more evidence:** further unlawful sanctions in unresolved cases, omitted plan/order errors, specific payment loss and missing back payment, and individual intentional/grossly negligent disregard. None may be counted as proved solely from the sample percentage.

Priorities of pleas and claims: First, try the prior offer / training order and each condition of sanction, not only the summary accuracy figure. Secondly, resume and correct the actual errors, present original absenteeism lists and citizens' objections, and pay back proven unjustified deductions with

specific consideration of interest/compensation under the applicable basis. Finally, require a dated account of redress from the erroneous decision through municipal knowledge/complaint/remittal to actual correct bank payment. The authority's duty to gather information and conduct a specific hearing of the parties follows section 10 of the Legal Safeguards Act, section 19/sections 22-24 of the Administrative Procedure Act and the Active Social Policy Act's special safeguards in the historical version reproduced in the original; current rules must not be applied retrospectively without version verification.

The state's responsibility under the Convention does not depend on a particular caseworker being punished. Documented unlawful deprivation of subsistence must be investigated as a real impact on the individual's means of existence and family life; the duration and seriousness of the loss must be linked to specific record/payment dates. The original provides no basis for calculating a national sum of months without subsistence. The missing bank/reparation data are specifically missing evidence of consequences, not an argument for explaining away the documented errors.

Sanction surveys 2015-2017:actual samples and exclusions

Control 7 October 2026. Own compact fact records following original reports. The outcome is the review of sample cases by the Board of Appeal; they are neither actually made up of complaints nor evidence of criminal liability. Unsubstantiated legality is distinct from a well-established error of assessment. No person deducting is available.

Publication / deg Ear period	Input, fractionation and actual n	Right / wrong / not evaluable	Limitation and original locator
September 2015 / 2014	120 requested; 99 investigated in 10 municipalities: 95 sanctions and 4 decisions not to sanction. Full reception / separation distribution has not been documented here.	47 / 26 / 26. The 26 wrong ones are **25 decisions on penalties and one; decision not to: Penalties**.	§ 36; municipalities selected by high / low previous penalties. Cases complained of and forwarded were excluded; cases of locally modified reassembly were possible. PDF 5-11, 69, 112-115. Original 2015.
June 2016 / 1st January-31 October 2015	Objective 130; Call 13 × (8 + 3) plus all § 40 a cases; 175 received, 44 deleted, **131 tested**.	**34 / 70 / 27**. Control sum below.	Selected from the use of § 40a, length of complaint and geography. Objected cases excluded. PDF 5-10, 33, 35-37, 42-44, 56, 75-78, 136. Original 2016.
March 2017 / 1st January-4 May 2016	Objective 130; 150 requested; 136 received; 31 deleted; **105 tested**, the same 10 municipalities as 2015.	**62 / 21 / 22**. The 21 would be changed; the 22 could not be judged sufficiently.	Article 36. Objected cases excluded. 28 job-ready, 46 training and 31 activity-parate. PDF 4-10 and methodological annexes; source letter PDF 91. Original 2017.

Selected separate error targets with their own denominators:

Report	Measurement	Counter / denominator	Locator
2015	Misapplication of Paragraph 36 in isolation	19 / 99; 61 correct, 19 not evaluable	PDF 8-9
2015	Insufficient justification	48 / 95 Penalties	PDF 58

Report	Measurement	Counter / denominator	Locator
2015	Insufficient information	31 / 99	PDF 61
2015	Counselling incorrect / not evaluable	7 / 99 and 13 / 99	PDF 47
2016	§ 39, point 8: guidance inadequate / not assessable	6 / 29 and 14 / 29	PDF 44
2016	§ 40 a: reasonable reason not evaluable	8 / 20	PDF 62
2017	Counselling incorrect / not evaluable	11 / 105 and 1 / 105	PDF 7-10
2017	Activity Parate: Personal contact insufficient / not assessable	18 / 31 and 1 / 31	PDF 7-10
2017	Absence of justification	67 / 105	PDF 37, printed page 34
2017	Complaint guidance correctly / partially deficient / insufficient	5 / 105; 99 / 105; 1 / 105	PDF 40, printed page 37

Documentation change in 2017: Initially, 107 cases were relevant. Further material was requested in 87; 86 produced additional documents, with two cases then excluded. In 44 of the remaining 84, the documents changed the assessment. These 44 are a documentation-process measure, not a further 44 unlawful sanctions. The two earlier studies and 2017 must therefore not be presented as a trend series with a constant methodology.

Mistakes can overlap. The denominators shown must be preserved. The n of the three main populations can be summed as a maximum of 335 **sample measurements;**; there is no documented cross-border citizen deluxation. The same municipality is not the same citizen and different publication years are not proof of different people. Full review of all sub-tables in 2016 and 2017 has not yet been completed.

Source control: PDF number 116 / 142 / 98. SHA-256 of source bytes under control: 2015 e12704095eab24d1934818ec84913aa70a542219eb390aba6eef60a103435575; 2016 bcc87b8cda029245502462c861aff2f4e5c058722416e6d4c204362bef821951. The source bytes are not stored in the project.

Penalties 2016: all original result matrices and citizens' programmes

All 142 original pages have been read in RAM. All 28 numbered main tables, both municipality annex tables and the seven results figures have been addressed. This is the same 131-case cohort as in the historical overview; the tables and examples add no new cases. The “percentage” column reproduces the original’s rounded percentage, not a new calculation. The 47 local example numbers are deduplicated below.

Kohort Bridge and Documentation Terms

175 received minus 44 excluded =131 assessed. There is no public numerical breakdown of the individual grounds for exclusion. The plan was 130, the request 13×(8+3) plus all § 40 a cases. The distribution is 78 under § 37,4 under § 39, no. 7,29 under § 39, no. 8 and 20 under § 40 a. Appealed cases are expressly excluded in the case-request letter PDF136. The most recent decisions before 1 November 2015 were selected; this is not a documented random national sample. The municipalities were selected partly on the basis of sanction use and appeals. Nine of 13 municipalities participated in dialogue on 25 May 2016. The records submitted were the sole basis for assessment, and missing papers could change the outcome. Neither the number of repayments nor actual time without assistance is published.

Exceeding 60	1	0	1	0	50	50	2

Specific measurement blindness and source deviations

Calculation errors have been omitted from principal accuracy. The PDF30-31,40-41 and 51-52 expressly state that the correct penalty time / amount is not a prerequisite for the "correct 'of the main measure. The separate 5 / 78 time calculation errors and 1 / 29 amount errors must therefore be shown. They cannot simply be added to 70 wrong; the cross table is missing. Similarly, 74 / 78 decisions are inadequately justified with regard to other factors and 71 / 78 without a documented assessment of availability. The 34 main cases are thus not 34 cases without legal error.

The review assumes several circumstances without complete original documentation. PDF38 gives significance to an unanswered hearing of the parties in relation to missing job applications. PDF43 assumes a job-search agreement in all 29 § 39,no. 8 cases without having requested the agreement in all of them. PDF64 relies on the municipal assessment of willingness even without specific reasons. These measurement assumptions are not independent evidence of each individual fact.

Multiple responses: T4.2 has 10+7+5+0+0+1+0=23 occurrences of statutory provisions for 20 cases; the original permits multiple responses. This is not an arithmetic error or 23 people. Figure 2.1 likewise does not sum to 100%,because reasons overlap.

Bug references: PDF25 refers to T2.6 for the three accepted municipal assessments and T2.7 for 36 subsequent assessments; the latter table actually measures contact. The figures and their actual questions are maintained. The PDF79 claims male majority across ages, but figure 1 shows only 33% men among 18-20 years of age. Case 91 should be reported 38 years on PDF25 and 36 years on PDF30. Case 96 has different statement periods and 10 decisions / 11 periods respectively; without the original act, the difference must be left open. The call letter PDF137 uses the word "refund" in a section on feedback and report consultation; it is not evidence of an actual payment.

A measurement form is not outcome data. PDF100-134 contains blank questions, including questions about the 3-month implementation deadline and the effect of sanctions on attendance. No completed national distribution of outcomes is published for all these fields. The options' code numbers must not be counted as cases. PDF138-141 contains blank submission lists, not additional decisions.

Dependent local case procedures

The 47 local case numbers below appear as examples in the same 131cohort. Repeated mention is collected; numbers are not publicly linked to unique CPR numbers. The actual statement of the source is therefore identified control summaries, not an independent rereading of the underlying citizens' records.

Local number	PDF	Documentary progress of the control summary	Meaning and time limits
32	16/19	Lack of guidance; the municipality accepted disease as a reasonable reason, but sanctioned the next day.	Two mention of the same case; no post-payment or end date published.
46	16	Inaccurate guidance without proper return to help.	Unlawful condition for sanctioning according to the study;actual amount/duration unknown.
67	16	The municipality gave guidance on the disappearance, subsequently correctly on deduction, but only after the absence.	Subsequent guidance does not repair the prior condition.
64	17	The municipality moved the meeting to the coffee shop without new timely instructions; the citizen asked for calls.	The municipality-changed agreement did not bear the sanction.
87	17	Telefonic meeting agreed for the next day; the presentation of the letter before the meeting was not documented.	Undocumented written prior guidance.
25	19	Likely to have overslept.	Example of a lack of due cause; not in itself proven unlawful sanction.

Local number	PDF	Documentary progress of the control summary	Meaning and time limits
31	19	Lived to forget the meeting.	Only one element of the overall test.
114	20	Diabetes / eating disorder; citizen and father enlightened vomiting, previous admissions known.	Sickness reasonable reason; doubts had to be examined medically before penalty.
12	20	Following traffic accidents and mental problems; contact after approximately 14 days.	Medical psychiatric information was missing; 14 days is contact interval, unverified loss time.
102	20	21-year-old with social anxiety, psychiatric diagnostic assessment and a contact person for four years in aftercare.	The municipality's lack of health information; four years is a history of support, not an illegal withdrawal from benefits.
131	22-23	45 years of age with serious health / addiction problems; where the absence was explained three days later.	Other reasonable grounds were exempted; the municipality could not sanction.
91	25/30	Homeless with mental information and mail address in mother; repeated contact attempts.	The source indicates 38 years in one mention and 36 years in another; the same number is counted once.
37	25	22-year-old with eating disorder, but explained absence with oblivion / oversleep.	Example of the Authority's on-site assessment, not self-proven damage.
26	26	45- year of alcohol abuse reported abstinence with tremors / malaise.	Health information is insufficient to assess the effectiveness of sanctions.
51	26	44-year-old mother emotionally influenced by forced removal; party consultation response reduced to standard note.	No concrete representation of the answer; parental loss and financial intervention meet in the same course, but the number / dates of the child are unknown.
72	29	36-year-old asked for calls; one attempt, decision four days later; mentor known.	Contact options not exhausted.
99	29	26-year-old with special schooling/STU and difficulties with structure lived with mother;decision 14 days later without contact.	The residence contact should be tried; 14 days is the time for the decision.
152	29	34-year-old wrote that the phone was dead and offered attendance; the municipality refused visits without an appointment.	The municipality failed to make any real contact.
163	29-30	59-year-old in methadone treatment; the municipality knew the place of extradition, but gave up after one missed call.	Not exhausted contact; time without help unknown.
50	30	60-year-old with back / alcohol problems; contact tried through residential, residential and telephone.	Example of exhausted possibilities; no independent illegality proven here.
69	30	20-year-old with a loaded upbringing; repeated calls and contact at the address.	The same definition as Case 50.
135	31	Failed to attend on 7 October 2015; deduction only from party consultation on 13 October.	Six-day calculation difference, but this has not been documented further citizen load.
118	32	It was 17 September; the municipality announced self-employment / new application after 31 October.	The municipality could not terminate the case on this basis; actual implementation could not be published.
175	37	Unclear guidance letter on job search and consequences.	Absence of a residence condition for § 39 (7)
109	38/41	Job search agreement one job per week; decision indicated three daily rates without any amount.	Agreement documented; calculation not verifiable.
174	38	Agreement on two posts found and at least two weekly applications.	Only the contract criterion documented.
173	42	1.995 kr mentioned for October-December with no clarity about total amount or monthly deduction.	No safe loss sum can be calculated from the formulation.
94	45	Guidance on registration and reduction of benefits.	Example of correct guidance; other indents separately.

Local number	PDF	Documentary progress of the control summary	Meaning and time limits
140	45/51	Guidance on registration and daily rates; citizen explained missing computer.	Repeat case number, no extra person.
76	45	Guidance on availability assessment, but without precise consequences for aid.	Insufficient guidance.
10	45-46/49/5 1	The municipality referred to counselling papers without accompanying them; the citizen actually informed the job search.	Missing original documentation must not be turned into certain proof of the content of the guidance.
11	47/49	Deadline every 30 days; joblog 27 august-28 September, registration 30 September.	Specific deadline and registration, not a public payment date.
35	47/49	Registration agreement at least two jobs per week; citizen was entering.	Obligation to register and actual job search must be separated.
56	47/51	No documented time limit for registration; unclear representation of party consultation results.	Both temptation and lack of information; one case with multiple errors.
20	47	Note 14 October on no registration since 27 August.	Deadline not established from the note.
107	49	New deadline 20 May; registration 18 May.	Citizens complied with the new deadline set by the local government.
138	51	Justified non-registration with distance to work.	The source's example for no reasonable reason; not proof of all other conditions.
105	52	Decision with DKK 1.995 and § 40.	Example of estimable amount calculation.
38	58	Guidance on possible enhanced sanction in prior consultation of parties.	Correct guidance, but the main cohort's 20 tightened sanctions all wrong.
96	61/66/71	Former sanctions; § 40 a 26 February 2015 from 2 March to 30 April, but only one possible meeting day for bids.	Daily access to help was missing; 29 absences, 10 decisions and 11 periods in various mention without cross tables.
143	61/71	55 days of absence for five periods; § 40 a 14 October 2015 with effect from 6 October to 6 December.	The dates show decision eight days after the date of effect; review requires appearance / payment data, not automatic further breach of law.
23	61	Internal settings for 15 absences, but only one documented previous sanction decision.	Internal proposals are not sanctions taken and have not been tightened.
40	61-62	12 attendance days of 30 possible over barely six weeks; no § 36 decisions.	Stronger sanctions could not be built on unsanctioned conditions.
43	63	Citizen gave no explanation of absence.	Only the question of reasonable ground.
79	63/68	No NEG ID for a period; Decision of 1 October 2015 without a specified end period.	Indeterminate duration of the penalty; no public effective end date.
36	70-71	Interview 28 May 2015; new application 11 September; eight-week intensified measure from 14 September.	Only one previous decision so that enhanced sanction could not be applied; 106 days for new application are not documented legality / payment figures.
39	71	45-year-old carpenter; one absence 25 August 2015 based on three-month penalty.	Stronger sanction was not proportional; three months have been decided period, not documented actual income loss.

Legally sustainable consistency and concrete requirements

The conclusion is that documented deficiencies in the Act's preconditions for sanctions led to interference with subsistence support, and that the review measure additionally omitted some calculation and reasoning errors. The evidence is the specific tables and case summaries above. The significance is that 70 incorrect and 27 not assessable do not form a complete union of all legal deficiencies. The relevant historical chain of rules is Active Social Policy Act §§ 13,35,37,39,40 and 40 a, the duty to establish the facts and the requirements to give reasons and make records. A municipal sanction without fulfilment of the conditions concerning guidance, contact, illness or proportionality departs from these rules. The consequence must be assessed as reopening and repayment of unjustified deductions with separate examination of time and interest; responsibility for the documented loss of subsistence support cannot be inferred solely from a general hypothetical appeal outcome.

The demand is a decision-specific follow-up list for the 70 incorrect, 27 not assessable and separate calculation/reasoning errors:original decision, interference with income, all appeal/reconsideration dates, reopening, final decision, payment, interest and any compensation. The municipal council's consideration under Legal Protection and Administration in Social Matters Act § 79 a must be linked to actual redress, not general guidance alone. The material documents neither general immunity nor an individual criminal conviction of the caseworkers; personal responsibility requires evidence of action, culpability and the relevant rule of responsibility. The State's human-rights responsibility does not depend on conviction of a particular employee.

Penalties 2017: all result tables, contact guarantees and citizens' programme

The original is text read in memory of all 98 physical PDFs pages. Fourteen pages of results, figures and municipal distributions are also checked visually. Source code **SAN17F**; the locators below are physical PDFs pages. The original isn't hidden locally. This broadens the same 105 cases in the historical main table; it does not create 105 new cases.

Selection, lack of documents and limits of measurement

150 cases were requested with a target of 130; 136 were received, 31 were withdrawn, 105 were tried. They consist of 28 job-ready, 46 training parates and 31 activity parates. The ten municipalities were selected on the basis of high / low sanction shares 2012-2013, not as a random national sample. The call excludes decisions already pending (PDF91). The most recent decision requested before 9 May 2016 must be kept separate from the period actually concluded until 4 May.

Before reminders, 107 were assessable and 29 excluded; after 87 requests, the agency received 86 supplementary responses, after which two further cases were excluded. New material changed the assessment in 44 of 84 cases. These are changed assessments of the same cases, not 44 additional breaches of law. Five municipalities participated in information on 20 June 2016 and six in dialogue on 9 December 2016; all ten answered three organisational questions. Holding meetings documents knowledge and discussion, not actual repayment.

All 105 meet the initial category for a section 36 deduction in annex table 1. This does not mean that 105 sanctions were lawful: that review expressly disregards subsequent failures to meet conditions (PDF11-12). The main result is 62 correct,21 incorrect and 22 not assessable. The 99 partially correct appeal instructions expressly do not affect the main result because the cases had not been appealed (PDF41). Exclusion and error measurement therefore make the main measure of correctness narrower than all documented deficiencies under administrative law.

Additional counts and original discrepancies

For 72 cases without a reasonable reason, 38 have no answers and 34 have an explanation. The two cases with reasonable grounds relate to the lack of childcare and an unfair offer. The 31 unknown are distributed in six without contact, 18 with own / child disease and seven others (PDF17). Of the 25 with actual contact, 12 are adequately investigated, 12 are inadequate and one is not clear. All six without actual contact had unexhausted contact possibilities; thus the overall outcome of the contact guarantee is 12 / 18 / 1 (PDF26-27).

Only eight out of 31 had documented evaluation for other reasonable reasons; 23 had not. Of these 23, 14 were still unaccounted for, of which ten were sick. The availability was demonstrated in three out of 31 but not in 28; of these 28 16 were undisclosed, of which ten were with disease (PDF22). These groups overlap and must not be summed up to more citizens. The complete cross-division of the remaining subgroups has not been published.

PDF12 calls 93 of 105 correctly advised 90%; PDF7 says 89%, and division gives 88,57%. The main table's 2+69+30% is 101% due to rounding. PDF14 generally states that all ten municipalities use written messages; two also receive provider/progress reports, nine obtain information directly, whereas one lets citizens over 30 submit lists themselves. The specific case count on PDF14 mentions 59 attendance lists, seven emails, 11 telephone reports, 15 other and 14 unknown; the total of 106 against the case denominator of 105 is retained because the stated count provides no unambiguous response/overlap rule. PDF42 discusses the appeal guidance positively, whereas the specific figure shows only five fully correct and 99 partly correct. None of these circumstances is silently corrected in the figures.

All local example codes and the significance of the evidence

Case number no	PDF	Publication	Consistency and evidence limit
38	13	The guide was correct.	This single link does not prove total legality.
44	13/38	Correct guidance, but the explanatory statement was missing.	Repeat number is one matter.
6	13	The guide did not meet the requirements.	No public end date or post-payment.
69	13	The guide did not meet the requirements.	The same definition as Case 6.
24,26,41,75, 94,97,126,132	19	The Board refers to these eight numbers as matters for no reasonable reason.	Eight local case numbers, not eight further documented illegality; original civil acts have not been published.
21	19	Child ill; no other care, father at work. The municipality had refused due cause.	The board assesses reasonable grounds. Information about children is not a national children's census.
105	19	Telefonic responses about serious illness; the board criticises the lack of specific investigation.	The municipality's reproduction of intoxication is a statement, not verified medical certificate.
46	20	Depression and emotional instability; psychological contact should be resumed.	The health basis was not sufficiently investigated.
89	20	Language / pain problems, an often ill child and no telephone credit.	Responses were insufficiently noted; the citizen's reply should not be replaced by inadequate notes.
101	20	Years of daily discomfort in irritable intestines.	Relevant health data were not investigated.
136	20/32/35-36	23-year-old: ten March days, seven of which were explained by illness; correct notification to the school was considered to be the wrong place to report. Phone contact April 19.	The contact concerned absenteeism of 2,3,4,8,10,11,14,15,29,30 March; relevant disease questions were not asked. Three of them are the same thing.
66	28	One unsuccessful call and party consultation; no contact at home or via offers.	The possibilities for contact were not exhausted.
48	28	Disease explained absence, but health issues were missing.	Actual contact is not in itself a fulfilment of the investigation and contact guarantee.
3	31	The board points out that the doctor had not seen the citizen for six months.	Missing medical visits are not independent medical evidence of absence of illness; the published reproduction does not give full medical advice.
65	31-32	Father describes one seriously ill child, another child's traffic accident, mental stress and alcohol.	The Board accepts absence for reasonable reasons; the published text does not provide an independent full medical basis. Two mentioned children cannot be added to other reports' children without personal connection.
103	32	22-year-old with anxiety wanted job clothes; psychologist had referred to attendance with support.	A statement of attendance with support does not demonstrate that the aid was actually provided.
92	32	Mother: own and child's disease, five whole and two partial days; no telephone credit.	Lack of health issues; one mother-child chain, not a deduplicated national series of people.
15	35	Hearing of the parties concerning 4,5,7,8 April.	The Board's example of proper consultation, not proof of all other links.
19	35/37	Consultation on April 4-12; problems with internet and My Plan.	Consultation and justification shall be mentioned; the same number shall be counted once.
129	36	Four days of absence in March were not specifically indicated in the hearing.	The citizen was not given the concrete basis to answer.
29	37-38	Days 4,7,10,11,14 March; hearing 8 April unanswered.	Examples of reasons given by the Management Board; actual end-of-year results not published.

Case number no	PDF	Publication	Consistency and evidence limit
135	38	Hearing 18 January 2016; deduction refers to 4,5,7,8,13,19,22,25,26,27,28,29 January.	The board calls the explanatory statement good. The consultation date precedes several sanctioned days; further consultation cannot be verified from the summary and must be documented before legality can be established.
133	39	277 kr in March for absenteeism 17 February without concrete explanation of the basis.	Declared deduction, unverified bank item or final loss.
124	39	ten days 1-15 February; announced deduction 5.060 DKK before tax 29 February.	Other reasonable reasons and contact were missing; actual payment losses have not been verified.
33	41-42	Correct complaint guidance with office time 15.30 of the historical scheme.	Historical criterion; not to be used as contemporary digital freebar.
88	42	Complaint guidance did not have proper information about office time.	Part of the same 105, not an additional complaint.
67	42	Complaint guidance did not have proper information about office time.	The same definition as Case 88.

There are 34 different local case numbers in the examples. The numbers are deduced within this original; they do not document 34 unique people across surveys.

Knowledge, intervention and responsibility

Conclusion: contact and consultation of parties must be tested according to their content; registered contact or a standard letter itself does not provide a legal basis for deduction. **Statement of authority:** the main result classifies 62 cases as correct. **Original proof:** the published milestones show, among other things, 67 insufficient justifications, 17 hearings without all days and 99 partially correct complaint guides. **Deficiency:** the main result does not cover all deficiencies and it does not actually demonstrate restoration. **Rule:** the rules on asset law, the official principle, the requirements of consultation of the parties and the reasons on which they are based in the original; the historical right of appeal shall be tested in accordance with the rules of the time. **Action:** the municipality reduces the financial assistance without necessary studies or sufficient justification. **Deviation and result:** a defective basis may bear an unjustified deduction and prevent the citizen from effectively responding and complaining. **Responsibilities and requirements:** reopening, proof of actual deduction, full repayment and position on interest / compensation, and concrete assessment of liability. The responsibility of the State for human rights does not require an individual conviction; the liability of each employee requires separate proof of the content and imputability of the offence.

Copenhagen's political treatment 22 June 2017 took note of the study. The municipality stated that one wrong case concerned the care of a sick child, but that the citizen was given work before completion, so that the deduction was not carried out. That is the subsequent information of the municipality, not a verified bank item. No case code uniquely links the statement to the original case 21. Three good examples of reasonable grounds and three of reasons may relate to the same cases. The claim that there are no economic consequences is a municipal assessment; it is not an estimate of the losses of all citizens.

The blank measurement forms ask, among other things, about correct deduction days, implementation within three months and the hearing deadline (PDF83/86-87), but not all completed individual responses are published. There is therefore no complete table of actual income loss, later correction, repayment or time to reparation. The known outstanding tables and published examples have been covered; unpublished citizen case records and reparation dates can be obtained only through separate documentation.

Penalty and pension surveys: main figures checked

Review 7. October 2026. Main outcomes and methodology have been read in the original reports. Sanctions 1/2022 and 2/2023 have now been supplemented with all main and municipal tables and all published case examples in the subsequent full-table modules. Sanctions 3/2024 and the 2025 pension study retain their separately stated status until the full modules are integrated. The figures describe selected decisions; they are neither a national error rate nor a register of unique citizens. An alteration/remittal is the study's hypothetical appeal outcome, not documentation of actual correction or repayment.

Report	Investigated a decisions	Stadkæstelse	Amendment	Remittal	Alteration/ remittal	Important demarcation
Penalties 1 April 2022	95	45	48	2	50	10 municipalities; 59 activity parates and 36 jobready; § 36: 26, § 37: 69
Penalties 2, April 2023	61	9	52	0	52	26 activity rates: all changed; 35 jobs ready: 26 changes. The annex has 13 municipalities, the main report refers to 14
Penalties 3, April 2024	96	65	28	3	31	12 other municipalities; 54 activity parate, 42 jobready; § 36: 30, § 37: 66
Awards of disability pension, May 2025	60	42	11	7	18	Only awards and only submission for rehabilitation teams; 10 municipalities elected, inter alia, after large increases in awards

Penalties 1

105 cases are requested; seven are not included in the population assessed. The 95 examined are 39 / 59 rotated among activity parates and 11 / 36 among job parate.11 of 50 rotated have the guidance as the only decisive error; 39 have other crucial errors. There is no evidence of separate number opt-out for cases already complained of in the controlled method: it may not be introduced from other investigations. The summary of the main report shall indicate decisions after 1 January 2020, the methodology section after 1 May 2020; both shall have the end date of 1 May 2021. Table 5.5 exchanges the names of sections 36 and 37; the substantive legal description of the report and the main figures have been used.

Source: main report, PDF -p.6-7,18-19,66-69; Annexes, p. 4 SHA256 main report a1a999a6723f7cd6a3621958d122274fc6ff42f15e420dce1242345cf7922d95; Annex fd4cc31f1bbf11d38faafe4cdea0a4aa0e85f0abf7a0bcea3a05bd907fb3a75a.

Penalties 2

75 courses requested; 73 received. Two courses each contain two decisions: 75 decisions before category.13 invalid and one unused decision gives 61 examined. Therefore, 61 have not been documented as 61 people. The 13 municipalities of the Annex sum up to 9 endorsements and 52 amendments. The main report's reference to 14 municipalities cannot be used as an actual municipal denominator. The final date of the summary on 1 April 2022 differs from that on 1 May 2022. Cases already pending have not been separately documented as exclusion in the controlled sections of the methodology. The lack of personal coupling and the two conflicting methodology information require the initial call letter and anonymised decision / lead list.

Penalties 3

108 cases are requested; four cannot be included.96 are assessed.54 people ready for activity have 34 affirmances,17 alterations and 3 remittals; 42 people ready for work have 31 affirmances and 11 alterations.12 of 31 decisions altered or remitted have guidance as the only decisive error. The period is 1. June 2022-15. April 2023. Missing records and supplementary cases were obtained, whereas this was not done in the two preceding studies. The difference in alteration/remittal rates therefore cannot be read solely as an improvement. The methodology table again swaps the section 36/section 37 labels. Exclusion of cases already appealed is not documented in the methodology section checked.

Early retirement 2025

40 decisions concern people under 40, 20 concern people over 40. 47 have a sufficient basis for assessing eligibility for the target group; 13 do not. Five of the 47 have other decisive errors.11 alterations comprise two incorrect start dates and nine cases in which another course of action should have been tried; seven remittals are distributed as six in Bornholm and one in Faaborg-Midtfyn. Six cases and one reserve per municipality are requested.60 are selected; exclusion counts by reason are not stated.16 lack a correct preparatory rehabilitation plan, three contain an assessment of capacity for work by a medical consultant and 17 have an incorrect statutory reference. These errors may overlap. Refusals and awards without a rehabilitation team are excluded from the population. Explicit exclusion of decisions already appealed is not documented in the methodology sections checked.

Main tables on errors, with own denominators

Measurement	Penalties 1	Penalties 2	Penalties 3
Insufficient case information	14/95	13 / 61; 14 unknown	13/96
Insufficient justification	48/95	55/61	35/96
Guidance § 35, paragraph 1 incorrect	25/95	15/61	19/96
Extended guidance § 35, paragraph 2 incorrect	not relevant same population	24 / 56, of which 5 without and 19 inadequate	not relevant same population
Visitation not withdrawn	13/95	44 / 52 in behavioural assessment	6/96
Other factors not assessed, activity rate	28/59	26 / 26	12/54
Personal contact not exhausted	6/59	no fully published union in the full original;	2/54
Absence of administrative law, overall Union	51/95	no fully published union in the full original;	36/96
Of which profit or loss	29/51	no fully published union in the full original;	18/36
Criticism	20/95	3/61	27/96
Note	23/95	2/61	14/96

Sanctions 2: the duration is one month in 10, two months in 16, three months in 31 and another duration in 4 of 61 decisions. 46/61 durations lack reasons. This is the sanction duration decided upon, not documented actual time without income. 24/56 incorrect extended guidance instances must not be added to 15/61 general guidance errors; the report's p. 43 refers to 24 as a shared group without a complete cross-table. Row-level errors may overlap both with one another and with the overturnings.

Table locators and additional indicators are recorded in sanctions and pension practical- compact.json. Penalties 1 / 2 now have full visually verified commune columns and all published subdivisions in their own supplements. Their actual follow-up has not been published. Penalties 3 and pension 2025 are handled in separate full modules.

Documentation requirements and consequences

The studies identify interventions in social assistance and deficiencies in pension decisions. They do not document whether each citizen subsequently obtained reopening, repayment, interest or compensation, or how long the benefit was absent. The specific review requirements are therefore: municipal case ID, pseudonymised person ID, date of the original intervention, error found by the study, reopening date, final outcome, payment of arrears and accountability steps. Each municipality and Ankestyrelsen must be asked for outcomes and follow-up; the letters requesting cases must clarify the status of appealed cases and the dating conflicts. Until then, the sum of decisions is solely a sum of study observations.

Penalties 1,2022: all tables and limits of evidence of the investigation

SAN22F. All 69 pages of the main report and 25 pages of the annex are text-read in memory. All 18 numbered result tables are included below; their pages are also visually checked. The same 95 decisions are included in the previous main figures and this supplement, without additional addition. Figure 2.1 on PDF23 is a disease flow with no additional numerical population.

Selection and correctness

Ten municipalities are selected by size/geography. 105 cases are requested to ensure 95; seven of the submitted cases do not meet the criteria, and seven of the ten extra cases are used. Aalborg had two excluded cases; Aarhus contributed one extra. Seven excluded cases must therefore not automatically be subtracted from 105 to give 98 as the final population. By agreement with STAR, the agency expressly does not subsequently obtain missing records (PDF68); an actual appeal case would trigger a request for information. Neither a separate count of cases already appealed nor an unambiguous appealed status for each ID is published. An exclusion from other practice studies must not be transferred to this one.

The main summary states the period after 1 January 2020, before 1 May 2021; the methodology states after 1 May 2020, before 1 May 2021. Both source statements are retained. § 36 is an offer, § 37 an interview according to the main text/statutory boxes; methodology table 5.5 swaps the labels. The correct headline counts are 26 under § 36 and 69 under § 37. An incorrect printed label is corrected in the analysis and retained in the documentation table.

Aabenra	2	6	empty	8
Aalborg	8	2	empty	10
Aarhus	7	4	1	12
Total	45	48	2	95

Empty municipal fields are marked as empty in the original. They may be arithmetic aligned as zero in the sum of the results, but they are not reproduced as printed zeros. All municipalities summer to 45 / 48 / 2 / 95.

All further concrete targets

There are 50 hypothetical alterations/remittals; 11 are due solely to guidance,39 to other decisive factors. PDF19 states that all 39 would be altered, but the main table contains two remittals; 39 is therefore not a separately verified alteration category in addition to 48+2. Five of the seven with reasonable grounds concern illness. All 13 without involvement of the assessment group would be altered; all 26 without an assessment of the effect on availability for work would be altered. All 25 guidance deficiencies would lead to alteration. These groups overlap within the same 50 and cannot be added to them.

The PDF44 uses the correct guidance for the first call in 93 cases, including when it is not stated otherwise that this is not the first conversation or the relationship is not problematic. It does not say that 93 simultaneous original calls are documented. Two are classified without guidance. PDF45 bases some unclear documents on telephone COVID conversation or re-guidance. The number affected by these assumptions is not made public. This is a concrete limit in the basis of control, not proof that the unknown acts were actually legal or illegal.

Five have accumulated monthly deductions; all five have been heard. Four out of 36 people are ready for work; all four are classified with the four necessary fields. The original classifies all 95 as the correct party hearing, all 95 without unlawful criteria / estimates under rule and all 95 with complaint guidance. At the same time, PDF56 / 63- 64 describes a decision by mid-March before the citizens' response deadline at the end of March. The specific lack of time must be shown alongside the total statement, not hidden under the category of information on cases.

Of 48 reasons, 42 relate to activity parates and thus six jobs ready. Of 29 performance-based management deficiencies, 27 relate to faulty justification; 22 out of 51 do not affect the management's accuracy objectives. Criticism 20 and remark 23 are neither 43 further unlawful decisions nor a measure of liability to employees. The COVID table has 109 rule records in 95 cases, explicitly several replies per case.

All published examples

The original does not have stable case numbers for the main text examples. Below, all concrete references and repetitions are brought together; a number of several examples indicate this. It does not provide a documented union of people or cases.

PDF	Publication	Meaning of proof
23	COVID symptoms and expected tests; no further information before sanction.	The agency would remit; no actual subsequent review published.

PDF	Publication	Meaning of proof
24	Headache; no details.	The management would change as transient disease could no longer be reported. The inaction of the Authority detracts from the possibility of proof.
25-26	Four aforementioned explanations: broken simcard, bad internet, it is difficult, sleep problems.	The municipality did not examine the answers; the number of different unique persons cannot be determined by the list.
26	Two examples of confused dates and unheard of telephone.	Other reasonable reasons were assessed; each link does not demonstrate aggregate legality.
26	Friend fell over with cardiac arrest, resuscitated and hospitalized; citizen missed the call.	The municipality did not investigate the timing/significance; the agency would remit.
28-29	Activity Parate without phone, long-standing psychiatric attachment.	The municipality looked solely at the cause of absence and not known mental conditions; the board would change.
30	Three municipal assessments: telephone participation despite health, abuse worsens without offers, mental condition does not prevent conversation.	The existence of assessments is not independent medical evidence of their content.
31	Forgot e-Box; other known activity parate conditions not included.	The board would change.
34	Six availability-for-work assessments mentioned:two self-support trajectories,two earlier effects of sanctions,one support for mental health problems,one course with a psychologist.	Local efficacy statements; reported assessments do not actually document positive treatment effects.
34-35	Psychiatric conditions assessed but the severity of the sanction not assessed.	A met sub-requirement shall not replace the other.
35	The municipality calls the transfer to the service centre an implicit assessment; two other subsequent statements of assessment.	No assessment in simultaneous acts; later municipal explanation is not accepted as evidence.
36-37	Two contacts with address / mentor / social administration and street team.	Examples of exhausted possibilities; not demand for actual contact in all cases.
37	Written consultation / SMS, two days after absence; new interview about 14 d later; citizen replies one month after first absence.	No other contact options tested; one month is provided contact interval, unverified duration of income loss.
37	Two decisions claim telephone contact attempts, but the case file does not document it.	The decision's statement is not independent proof of the call.
37	Dead phone number, mail fails; no contact at home.	Fair contact possibilities not exhausted.
38-39	Overtaken call; other known facts and availability assessed.	A positive control finding in the original; no actual citizen restoration.
39	Diseases were ignored; the municipality only put the emphasis on no sick leave.	Activity Parate conditions and availability also ignored; several errors in the same example.
45	Personal first call with written delivery and later shipment; second example telephone subCOVID and shipment the following day.	Two guidance courses; unpublished unique ID.
46	First interview with extradition, but no documented later shipment; second example shipment, but no documented physical extradition.	The two necessary links cannot replace each other.
47	Undated letter about semi-annual re-guidance, but no documented review.	Sending only does not meet review requirements.
49	Guidance before reopening in May 2020, but no reguidance after May 27.	The additional condition of the COVID rules was not followed.
55	Activity Parate with Disease; Telephone Hearing Contact with Medical Questions.	The agency’s positive assessment of the information basis; the doctor-contact question does not in itself prove absence of illness.

PDF	Publication	Meaning of proof
55	Job-ready with illness; no health information.	Penalty before necessary investigations.
56/63-64	Response deadline until end March, but sanction mid March before reply.	The same sequence of descriptions is found; the report's simultaneous claim of proper consultation of the parties in all 95 does not match this specific deadline. No extra person is counted.
56	Activity Parate without exhausted contact; Second example Activity Parate which had difficulty without deepening.	Two disclosures described; overlap with previous examples unexplained.
60	Social anxiety / depression and psychological services; the municipality justifies sanction with motivation / meeting stability.	The presence of justification shall not be made a clinical evidence of the benefit of economic pressure.
61	Paragraph 13 (8) is added to the legal basis, but no concrete assessment is made.	Reference to a rule is not the application of its conditions.
63	Activity party without justification of other circumstances / availability effect.	The board would change; can repeat earlier description, no union assumed.
65	Assessment is in the note but not justified against the citizen.	The board would confirm with criticism and itself correct the explanatory statement; the municipality's original deficiency consists of historical control findings.
65	Job-ready decision wrongly refers to activity party special rule.	The board would comment, no documented actual individual follow-up.

The annex reproduces principle notices 102-16,88-14,39-15. Their own three and two specific decision examples respectively are earlier case law, not additional cases in the 95 population.102-16 includes, among other things, the municipality obtaining medical evidence too late and disregarding a sick-leave notification from 27 May-27 October 2016 without a sufficient basis.39-15 distinguishes several contact channels from email alone despite a known phone number. They support the requirements for timely investigation, independent assessment and documented contact.

Documented errors, necessary proofs and requirements

Conclusion: the study provides direct documentation of 50 decisions that could not be upheld as submitted, and of further administrative deficiencies within the same 95. **Statement:** the agency’s positive main categories and subcategories. **Original evidence:** all the tables above and the specific deadline/contact/health courses. **Deficiency:** assumed guidance circumstances, records not obtained and a description of deadlines that does not match the overall statement about proper hearing of parties. **Rule:** the Active Social Policy Act conditions applied in the original, § 10 of the Act on Legal Protection and Administration in Social Matters and §§ 19,22-25 of the Public Administration Act. **Action/departure:** deductions without the necessary conditions or before fact-finding and the opportunity to respond have concluded. **Consequence:** interference with subsistence and reduced opportunity for effective review; banking loss and final duration are not published. **Responsibility/demand:** documented reopening, setting aside of unlawful deductions, back payment and separate assessment of interest, compensation and personal responsibility.

All known tables and examples are now included. Suspicion of further hidden errors cannot be counted as proven cases. The remaining material required is the call letters, completed measurement forms, original decisions and response deadlines, as well as actual payment / follow-up per pseudonymised person. The unknown scale jumps are explicitly not set out in the Annex (PDF5). Therefore, the answers provided by the form do not provide a full public matrix of each citizen's programme.

Penalties 2,2023: full tables, family support and decided intervention time;

SAN23F. The 54 pages of the main report and the 16 pages of the annex are all text-read in memory. All 12 numbered tables with municipal distribution have been included and visually verified. Figure 2.1 on PDF15 is an indicative procedure without an additional number population. These are the same 61 decisions as the previous main table of the report, not 61 additional cases or persons.

Selection, delimitation and known authority

75 courses are convened with objective 60.73 courses are received; two have two decisions, so there are 75 decisions.13 do not meet the criteria; one further decision is not used; 61 are tested. Køge did not reply and did not submit the two requested courses. The main report lists 14 municipalities; the blank sheet lists 15 inclusive Køge; the final commune table has 13, without boats Køge and Bornholm. These are different documented boundaries. The explanation for Bornholm's lack of final rows and full commune separation has not been published. Therefore, a main text, which calls 61 cases a material from 14 municipalities, must not become a municipal denomination for the actual rows.

The summary uses before 1 April 2022; the method before 1 May 2022, both after 1 January 2020. Missing documents were not sought by agreement with STAR (PDF53). No separate exclusion figure for decisions already complained of has been published. Two double courses and lack of personal connection mean that 61 cannot be treated as 61 proven unique citizens.

Prior penalties are not explicitly fully tested; the form denotes the test as a check of general conditions and obvious inaccuracy (Annex 8 / 10). Nor are tender and termination decisions under Paragraph 40a (2) / 7 fully tested for resource reasons (PDF6). Subsequent monthly payment decisions pursuant to paragraph 6 shall be completely excluded. The main result must therefore not be read as full control of the legality of the whole process, of all payments or of all family members affected.

44	Prose: no written decision / complaint guidance	3	61
50	Table / prose: no written decision / complaint guidance	4	61

All 26 activity parate main decisions would change; 26 out of 35 jobs ready would also change. The Union of all management deficiencies is not public.55 reasons gaps provide a documented lower limit of 55 decisions concerned within 61; overlap with consultation, information and complaint guidance hinders an exactly larger Union. It is a limit to decisions, not a personal union. In the Contact Trial, four activity parates from 18 are published without party consultation and one contact example, but not a complete contact guarantee table for all 26; the missing full result cannot be filled out from the reply options of the form.

The number contradictions of the original shall be preserved;

Table 2.2 has 30 + 26 + 5 = 61; the prosas also refer to two unknown decisions without indicating their location. The two must not be added and make 63. PDF27 calls the group 54 inadequately justified, but the same page has 26 + 29 = 55 and Table 55. PDF44 mentions three without written decision / complaint guidance, but PDF50 / Table 4.2 indicates four. PDF43 refers to 24 as paragraph 1 / 2 group, but without cross-tables between 15 general and 24 extended deficiencies. 39 unique guidance errors can therefore not be calculated. The wording of the original shall be accurately visible without correcting it tacitly.

All specific examples refer to

PDF	Original progress	Meaning and consistency
22	Prior penalty 16 February 2021; consultation 17 March 2021 on job search.	The municipality deduces a lack of will from unanswered consultation; a municipal statement, not self-verified behavioral / health examination.
23	Absence of October-December 2021; Decisions 10 / 12 / 24 January 2022; Decision 24 January reinforced based on non-compliance 3 January.	The new absence lies before the previous decisions; the board would change. Time order is a home condition.
23	An intensified sanction decision of 30 September 2021 is justified by doubts about the citizen’s address; no documented prior sanction.	The conditions are not fulfilled; the board would change. There's no proof of a lack of availability.
25-26	Sanctions 15 March 2022; new absence 18 March; reinforced decision 28 March; Municipality refers to lack of contact since 22 February.	Example of assessment carried out, not evidence of all legal conditions or actual positive sanction effect.
26-27	Sanctions 17 February 2022; absence 25 February; no concrete assessment of lack of will.	The board would change; repetition of an offence cannot replace necessary estimates.
28	Job-ready, repeated various omissions and unanswered hearing.	The agency’s positive example of reasons; not evidence of actual restoration of subsistence support.
28	Decision imposing an intensified sanction refers only to a new breach after 15 March 2022.	No justified lack of will. Date similarity with PDF25-26 does not in itself demonstrate that it is the same person.
29	Activity Parate: Reinforced Decision 28 January 2021 refers only to previous / new non-shows.	No concrete main considerations in behavioural assessment.
31	Ready for activity:intensified sanction decision on 8 November 2021 without the special considerations.	The board would change.
34	Job-ready: Decision 31 March 2022 in two months from 1 April; previous assessment of availability is mentioned.	Decided duration and justification; no published banking / disclosure history actually results in loss time.
36	Termination decisions shall be taken only after the reinforced decision.	The original says that help cannot cease on that basis; number of concrete examples and end outcomes not published.
42	A number of standard letters omit daily payment, month-end and spouse effect.	Lack of guidance; no public count of actually affected spouses.
47	Activity Parate Mother: hearing 16 September 2021 and email about sick boy / doctor visits the same day; sharpened decision 22 September.	The municipality did not investigate care / medical information. Six days from the reply to the decision shows knowledge before the intervention; it is not verified duration of financial loss.
49	Written consultation / mail 26 May 2021, telephone trial only 2 June; no documented further contact before previous sanction.	The subsequent sharpened sanction cannot rest on the deficient previous decision; the board would change.

No stable cases are published in these cases. Repeated subjects or dates are not enough to establish identity. The mother and the sick boy at PDF47 are a documented mention of a parent and a child; neither the child's total loss, number of children in the family nor actual payment period can be deduced. The form directly asks for consistency for a spouse's right to help (Annex 13), but the report does not publish an overall response column. Legal spouse effect must therefore not be presented as a figure for spouses actually affected.

Liability, time and requirements

Conclusion: 52 of 61 intensified sanction decisions examined would be amended, and all 26 main decisions concerning persons assessed as ready for activation fail. **Authority's statement:** the intensified sanction requires an individually assessed lack of willingness and lawfully established previous/new breaches of availability requirements. **Original evidence:** the tables and dated examples show missing reasons, knowledge of a sick child before the intervention and reliance on a failure to attend that preceded the necessary prior decision. **Deficiency:** allegations about conduct do not replace proof of every condition for legal authority; partial review omits parts of the entire course of subsistence support. **Rule:** the original's Active Social Policy Act §§ 13,35,40 a, Legal Protection and Administration in Social Matters Act § 10 and the Public Administration Act's requirements to hear the parties and give reasons. **Action/departure:** the municipality decides on partial or complete withdrawal of assistance without the necessary conditions being met. **Consequence:** risk of, and specific decisions on, loss of basic subsistence support, also with statutory effects on the spouse; the effect on bank payments and subsequent redress require their own evidence. **Responsibility/demand:** annulment/reopening, repayment of unjustified deductions actually made and a documented determination concerning interest, compensation and specific public liability.

The original has been sent to a municipal hearing, and Paragraph 79 (a) of the Law on Legal Security requires political presentation. It documents a requirement for knowledge and follow-up, not that all municipalities actually resumed and repaired. The well-known tables and examples have now been included; the remaining necessary evidence is the municipal selection list, the completed forms, time-stamped citizens' acts, monthly payment decisions and actual repairs. Individual criminal liability requires separate review; the absence of published criminal proceedings is not, in itself, legal immunity.

Penalties 2024: all original tables and limits of evidence

All 54 + 15 pages actually RAM text read; head 14 / 18 / 53 and Annex 4 visually RAM checked.

Same 96 cases as before SAN24; no extra cohorts. Selected newer sanctions, activity parate over-represented. No national extrapolation.

No explicit exclusion of pending cases found in the originals method; not available from other investigations.

Source conflicts and necessary divisions

- Table 5.16 PDF53: conversation / offer swap; § 36 = 30 / § 37 = 66. PDF6: Offer 30 / interview 66. Visually verified.
- Annex PDF4 prosa 13 municipalities; table and main report 12. Visually verified.
- PDF15 calls all 19 remaining cases alterations; table 2.1 has 28 alterations+3 remittals. Preserve the separate statements.
- The contents' page references do not fit physical pagination; the physical PDF page is used.
- Table 4.14 is printed 0.14 on PDF50.

Independent analysis

The alteration/remittal rate does not exhaust the deficiencies: reasons, guidance, contact, information and response are measured in overlapping cases. The 31 hypothetical alterations/remittals, 36 administrative deficiencies and 41 outcomes with criticism/comments therefore cannot be added together. An erroneous sanction interferes with income support; documentation of repayment and the timing of actual redress requires the individual decisions and payment entries.

The two party consultation measurements are different: FVL96 / 96 and the monthly total LAS6 / 9. The material assessment of the study is based on the available documents; therefore, a lack of evidence can be decisive without proving that a particular conversation never took place.

The 96 completed measurement forms, exact deduction amounts/dates, person deduplication and actual complaints/redress are not published in these originals. Example descriptions have no stable case numbers, so the number of unique citizens cannot be derived from the occurrences.

Early retirement 2025: all original tables, municipal cells and citizens' programme

All 51 pages in the main report and 28 pages in the annex are actually read in memory. All eight original numerical tables / figures or municipal lists as well as five additional block numbers are reproduced with delimiting. The 60 cases are the same PPEN 25 cohorts as before; the repetitions of the series are not counted as new citizens.

Main analysis: late rights and lack of support must not disappear

The study documents two pension cases in Struer in which the award was made later than the rules allowed. Six cases from one municipality were decided orally by a rehabilitation team without jurisdiction; the municipality table shows six hypothetical remittals in Bornholm. There is dialogue with the municipality, but the report does not document a new decision by a competent body, back payment or actual redress. These errors must be investigated as loss of rights and breaches of jurisdiction, with specific decision and payment dates. [PPEN25-FULD,H16/21-22;B12-13]

Only awards are investigated. Refusal and obvious pension cases without rehabilitation teams have been omitted. The results cannot therefore determine how many citizens were illegally refused or delayed pensions. The authorities' interviews themselves describe restrictive refusals, resource flows without development potential, rescheduled refusals and changed municipal practices. These concrete tracks require a separate statement of initial refusal, resumption, repayment and loss over the waiting period. [PPEN25-FULD, H32-37; B4-6]

Lack of support has an independent impact chain. The study describes two cases in which the social burden of the home was not supported before the pension decision. Local staff describe repeated sanctions after failure to appear to citizens whose support needs were not understood and the citizens' progress that is lost between departments. Psychiatric and treatment waiting times are referred to as worsening. These are documented summaries and statements of authority; a concrete replacement or liability conclusion requires simultaneous proof of needs, decision-making, treatment and loss. [PPEN25-FULD, H16 / 46-50]

The review also examines awards that the Appeals Board considers should have been resource programmes or flex jobs. That assessment is accurately reproduced, but missing documentation of permanent loss does not automatically prove an actual capacity for development. In the Dorte and Kim summaries, a realistic prognosis for treatment/work capacity must be checked against original medical information. The 22 awards without employment assessment which the agency assessed as correct also show that a new work placement or resource programme is not an unconditional prerequisite. [PPEN25-FULD, H14-17]

Method and cohort bridge

Ten municipalities were selected particularly for a large relative increase in awards during 2013-23,size and geography. There are three intended groups of 20 cases:young people aged 20-39 with resource programmes, young people aged 20-39 directly from cash assistance and 40+. The actual pre-pension distribution is 20 resource programme benefit+11 cash assistance+8 education assistance+1 self-supporting among 40 young people. Two 40+ cases came from job assessment programmes. The municipalities' final 5-7 cases differ from the request's six plus one reserve; reserves are not automatically counted as new review cases. [PPEN25-FULD, H5/26; B4-6]

Ten interviews took place on May-June 2024, although the report appeared on May 2025. Only cases submitted to rehabilitation teams and awarded within the last two years are included. The method does not indicate a general separation of previously contested cases; such a rule cannot be imported from other reports. Analysis forms and quotes were heard from municipalities / employees, not published as individual full files. [PPEN25-FULD, B5-7]

All original and supplementary data cells

General Table 0.1

PPEN25-FULD, H12. 47 includes 42 affirmances+2 altered dates+3 procedural remittals.18 alterations/remittals are hypothetical appeal outcomes, no actual reopening documented. Prose refers to 2.1 while the table is printed as 0.1.

No development option doc documented, too late time										2

Kohorte and method

PPEN25-FULD, H5 / B4-7. Only award § 20 (1) after rehabilitation team, not refusal, not obvious awards without team. No explicit general sentence on cases already complained of in this Annex; that exclusion may not be imported from other investigations. Final 5-7 prkommune differs from 6 requirements; reserve cases cannot be automatically added to 60.

Measurement	Figures
Review of awards	60
Participation municipalities	10
20-39 co-resource trajectories	20
20 -39 direct cash benefits	20
40 + Group	20
40 + job clarification exception	2

Actual municipal distribution	5-7
Interview	10
Interview municipalities	5
Leader interview	5
Employee Group Interview	5
Leadership participants [2 + 4 × 1, own sum]	6
Interview period	May-June 2024

Measurement	Figures
Calls for tenders	last 2 years

Additional legal limits

PPEN25-FULD, H11 / 14-20. Overlapping subpopulations; 22 without job clarification are legal afterASassessment and not 22 errors. Two examples of aid are repeated H48, not new cases.

Relationship	Number	Denomination
Target group correction but error	5	47
Wrong time, late end legal basis	2	11
Would resource path / flex job instead	9	11
Remittal, still correctly within the target group	3	7
Remittal, development not ruled out	4	7
Health information is missing only	1	13
Job satisfaction alone is lacking.	6	13
Both information gaps	6	13
Correct award without an employment assessment	22	42
Preparatory plan without health data present	5	16
Two social stress cases without aid	2	9

Young characteristics

PPEN25-FULD, H25-26. The requested group of 20 directly from cash assistance becomes 11 on cash assistance+8 on education assistance+1 self-supporting in the actual subsistence information. This population difference is retained; no concealed recoding of 19 to 20.

Relationship	Number	Denomination
Psychiatric conditions / diagnosis based	26	40
Former regular employment	26	40
Resource programme benefit before	20	40
Cash Helper	11	40
Training assistant	8	40
Self-dependant before	1	40
Education	every three [rounded]	40

National background and additional prosa

PPEN25-FULD, H4 / 7 / 23 / 31 / 32. Background are quoted national series, not errors. 2004 outpatient, methodical baseline. Receiving stock shall not be added to annual awards. Brainskatetal second population.

Relationship	Year	Figures
Persons receiving pensions	2012	259098

Relationship	Year	Figures
Persons receiving pensions	2023	258423
Full-time / labour force	2004	9.4%
Full-time / population	2004	7.2%

Full-time / population	2023	6.3%
Less than 40 cooperative awards	2023	27%
40 + Cooperative awards	2023	73%
Less than 40 increase in award	2014→2023	471%
40 + increase in award	2014→2023	220%
Acquired brain damage nationally quoted	2011	148387
Acquired brain damage nationally quoted	2017	168701
Award in rounded prose	2012	approximately 15000
Award in rounded prose	2014	approximately 6500

Explicit interview / programme number

PPEN25-FULD, H25 / 34-39 / 42-44 / 47 / 50. Authority interview / policy program description; not new error / person occurrences or accurately documented waiting time serie.2 years / 2.5 year versions not harmonised.

Messages / Programmes	Figures
Chopper's refusal	almost every 2nd case, staff estimate
Previous resource trajectory max	5 years
New 2022 maksprråd	3 years, more than possible
Commitment guarantee	first 6 months
Spot-repeated resource allocations	the route numbers 3 and 4;
Roskilde example young	After 2 years, internship 2 hour week
Roskilde, people ready for activity	approx. 760 → 170 over 6 years, management estimate
Potato strain	about 30 cases by project
More must come with	3 roll, first>5 annual assistance
Clarification pool	>8 of the last 10 cash benefits
Mini-flex job	up to 10 paid hours
GladFondeinfoBox	2 years of training
GladFonden	nearly 2.5 years, 1700 hours internship, 500-600 hours instruction
Faaborg-Midtfyn processing perspective	example 3 years of sycatraemia waiting time
Roskilde orthopaedic surgeon	example 1 annual waiting period

Individual and organisational evidence chains

Track	Locator	Own paraffase	Consistency and primary control
Dorte	H14-15	Aged 33, psychiatric diagnosis/treatment, reduced alcohol consumption; most recent employment initiative>10 years earlier. AS considers that further substance misuse treatment/clarification may develop work capacity.	Anonymised case summary, not the medical record itself or a treatment prognosis. Historical lack of clarification does not in itself prove an actual present possibility of improvement;AS' assessment must be tested against specific medical facts. No actual withdrawal of a pension documented.
Katrine	H15	21 years, infantilatism / avIQ / cognitive problems, STUoganden effort interrupted; support for clothing / bath, not possible real internship. Asner pension without resource progression correctly.	Documenting the report's concrete example that work ability clarification / New Resource trajectory can be futile. There is no general rule that all citizens must first carry out an internship.
Kim.	H17	Pain, further treatment recommended, no improvement in function expected in months to come; limited internship interrupted by a recent accident. The team grants an oral pension without competence. Asses further treatment and longer internship relevant.	A specific breach of competence; AS's inference of realistic development of work capacity requires a separate original pain prognosis, effect/risk and necessary accommodations. A treatment option does not automatically document improvement in work capacity. No actual subsequent correction of errors.
Social 01	H16 / 48	Two citizens with health problems and social stress; one short internship interrupted, the other former intermittently self-supporting with support. The municipalities did not support the burden of the home before retirement. H48 refers to children living at home with special needs as an example.	Same two cases repeated. Absence of aid documented in study summary; unknown number of children and practical assistance. Liability requires knowledge of needs, applications / official duty, specific aid decisions and effects.
Competence Bornholm	H16 / 21-22; B12	All 6 Bornholm cases would be remitted for reconsideration; all 6 oral team decisions are described as being from the same municipality. AS is in dialogue with the municipality.	The municipality linkage is a documented inference of our own from one municipality 6/6 and B12. Six invalidity assessments are not six subsequently remitted appeals. Dialogue is not a documented new decision by a competent body or full redress.
TidStruer	H16; B13	Two retirement cases were awarded later than the home allowed; B13 places both in Struer.	Documented delayed right but no dates / amounts / interest / post payment published. In fact, enhanced time and loss accounts require correct start date and payment date.
Psych 01.	H31	The case summary mentions ADHD, borderline, cannabis addiction and signs of schizophrenic disorder in a single citizen.	Diagnostic words are reproduced as a summary, not independently verified medical facts. Can't be added to 60 as a new citizen.
Psych 02.	H31	Other citizens are referred to with congenital brain damage, ADHD and neglect of care in childhood.	Causality and original documentation require specific journal / history; the number of public errors is not derived from the lack of care summary.
Pre-run Roskilde	H32-35	Roskilde describes early very restrictive levels, young people in resource processes even without development potential, later changed line after reversed refusal.	Self-described authority competence / practice change. Demands rejected citizens' cohorts and retroactivity in order to measure losses; this study's 60 awards omitted refusals.
PoliticFaaborg	H36- 37	The leader describes committee policy: award in case of grey zone cases, as well as previous restrictive practices after press / political attention.	Political direction is described by the leader; the original decision of the committee, individual rights and responsibilities must be tested. No evidence of which specific cases were unlawfully rejected.
Psychiatric disorders	H46-47	Communes describe long waiting time, ending without sufficient treatment, worsening while citizens are waiting; Faaborg-Midtfyn talks about treatment three years advance as an example.	Documented authority knowledge at interview level, no precise national 3 year waiting time. Identify concrete references, visitation, processing and subsequent loss of function.

Track	Locator	Own paraffase	Consistency and primary control
Penalties	H48	Faaborg-Midtfyn describes repeated sanctions for non-attendance against persons functioning poorly	Consistency of aid failure → failure to appear → sanction is described by the Authority.

Track	Locator	Own paraffase	Consistency and primary control
		citizens without an understanding of support needs; subsequent recognition of the need for social educational assistance.	Number, amount and concrete legality not examined here; no automatic equivalence of all non-displays with illegal sanction.
Responsibilities	H49	A specific case is described as responsibility pong between the Social Department and the Children's and Family, without anyone taking the necessary everyday support task.	Need / knowledge appears as an interview trail. Internal dissent cannot in itself nullify the municipality's civic duty; concrete help / legal basis and loss require legal action.
Printing	H48-49	Faaborg-Midtfyn describes psychiatric discharge with support needs but neither help nor municipal follow-up; kkconcern for young people left to themselves.	Current chain of responsibility for cross-sector referral and coordination. Entitlement to social support is determined specifically, not by the jobcentre's objective of avoiding a pension.
PhysicVentRo Source	H50	Employees describe the one-year waiting of some citizens on orthopaedic surgery and subsequent stress, depression / anxiety and more difficult rehabilitation.	Statements document known possible causation; not medically established harm in all waiting-time cases. Requires a specific referral/assessment/functioning trajectory and contemporaneous medical records.
Laegefortaelli no	H50-51	Job centre staff describe doctors' assessment of pension / employability as motivation problem and citizen explanation certificates without proper investigation.	The interpretation of authority must be tested against the actual medical statements and facts. The doctor's observation of loss of function cannot be ignored as poor motivation simply because the municipality wants further development.

Source deviations and precise residue

The main table is printed as 0.1 on PDF12, but the prose calls it 2.1. The age graph's youngest category is 16-19, while the prose calls it 15-19; neither label means a pension before age 18. H8 has a sentence with a reversed earlier exclusion criterion, while H4/32-33 describes the other direction; that error is not cited as a legal rule. H20 first mentions three medical-consultant cases and then the last case without a clearly new population; no fourth case is created from the wording.

B14-28 is an analysis form, not actual response counts. It contains specific materiality review of safeguards, but does not show a public distribution of all hearing-of-the-parties, meeting and reasoning fields. The strongest documented criticism is the specific breaches of competence, delayed starting dates, information deficiencies and failures to provide support. Original medical certificates, individual forms, municipal follow-up and payment dates are necessary for person deduplication and a complete account of loss.

Additional original checks: flekjob 2010, additional expenses 2014 and sickness benefit 2016

Checked on 7. October 2026. Figures are case-count measurements; no person deduplication. Locators are physical PDF pages. Sources' own legality assessments are recorded as assessments, not independent examination of each individual's original records.

Fee and unemployment benefit, 2010

Primary: https://www.ft.dk/samling/20091/almdel/amu/bilag/220/871393.pdf. Full municipal original copy: https://www.kk.dk/sites/default/files/agenda/543fe3eddee6c626b2c3dbd2acf24a4a3541f435/13-bilag-2.PDF. 106 pages; SHA256 27178ef1b5cd64d5ddea3f330faccf80571cc5874adf7d01a66b03b57496c542 for KP copy.

Population:175 requested; 164 examined =72 municipal grants +32 board grants following amended refusals +60 municipal reassessment cases. 14 municipalities, five boards; the reassessment component only 13 municipalities with actual cases. Three premature reassessment cases excluded; the received total and remaining difference from 175 are not fully reported. Municipal cases: most recent grants before 15.10.2009 and oldest eligibility assessments after 30.4.2007 with continuing unemployment benefit for people eligible for flex jobs. Municipal cases already appealed **and determined**, as well as those previously examined in practice studies, excluded. Boards: most recent grants following overturning before 15.10.2009, without appeal to Ankestyrelsen. Methodology/request letters pp. 59-60,68-72.

Measurement	Number in source category order	Denomination	Locator
Municipal grant: correct / amendment-remittal	53 /19	72	T2.1, p. 8-9

Employers' justification high / some / no	8/33/5	46	T6.2, p. 65
Employer's statement of reasons: not employed/irrelevant/unverifiable	53/10/6	115	T6.2, p. 65
Party consultation citizen yes / no	105/9	114 relevant	s 8
Party consultation employer yes / no	38/20	58 relevant	s 8
Lack of complaint guidance, citizen	1	115	s 9

Visually verified conflict: summary p. 8 states 1 entirely inadequate statement of reasons to a citizen; T6.1 and the report's own prose on p. 64 state 2. Summary p. 9 uses 52 relevant statements of reasons to employers; T6.2 shows 46 assessed+6 unverifiable. The report assesses 2 section 7 a case trajectories as incorrect beyond the delay; they are not additional cases on top of 17 alterations/remittals. Formal errors and an incorrect subsection are recorded separately from the hypothetical appeal outcome.

Municipality objection to AP rating: KK-notat 3.6.2016, one page: https://www.kk.dk/sites/default/files/agenda/4 4ffd761-6cc6-4bba-896d-05de22c6667a / a734c6f3-8c94-451c-9040-5df2d25bbc92-Annex -2.pdf. KK claims 1 of 2 criticised cases / 10 based on AS 'misreading of the medical document date and overlooked justification. The original of the claim and any correction of AS is missing; therefore, AS 'published 17 / 115 is not amended by the note alone. Specific data request: KK 2016-0030250-8, related to case / dated medical document, measurement form and AS-correspondence on re-processing. It is a local, documented incompetence, not a general defence of municipal practice.

Full supplement check: Sickness benefit 2016 - all tables and citizen's programme. The entire 134 pages original, including all documents of principle, municipality, call and measurement, is now RAM reader.31 reading tables / 188 rows, 25 local examples -IDs and 26 visually controlled pages; the same 115 cases, no extra cohorts. Actual reopening / post-payment and the underlying file of the KK opposition are separate document deficiencies.

Flekjob 2010: T3.5 andsamænge kommunale / omningsalbilitet

Concrete table residue is closed: 10 table blocks / 94 rows at the same 164 case measurements. Main outcomes 72 / 32 / 60 and other main tables are in the previous module. This supplement certifies the listed pages / tables, not a new full 106pages main text reading.

Empty original cells appear; printed 0 is preserved. All six annexes of PDF64-67 are visually controlled in RAM.

Limitation and source conflicts

175 requested and 164 measurements; 3 immature reassessments deleted, the rest of the difference is not fully explained. Municipalities 14, review cases only 13 municipalities; all 5 boards. The appeal / examination and previous practice investigation are excluded; the case is selected from modified municipal refusals but excludes appeals to the Court of Justice. Ankestyrelsen.72 + 32 appropriations and 60 reviews may relate to the same person.53 information / unemployment measurements leave out 7 without reassessment. No additional persons are formed from the municipal annexes.

T3.5 prosa says 94% in writing; the table says 45 / 72 and 63% .22 journal notes is a separate category. T3.4 raw 28 / 4 versus 75 / 25% is retained. T1.3 percent sum 99; 16 / 72 is 22,2% versus 23 printed. Age / gender figures 61-62 have no exact printed column numbers; raw cells are required. Copies of files shall be provided after report; not proof of the deletion of municipal original records.

Own method analysis: the municipal distribution closes the table hole; it is no person union or proof of actual delivery, early retirement or compensation. Case 093PDF58 describes 1.4.2007 unemployment benefit → 18 m 1.10.2008 → note 6.1.2009 / profile 20.1.2009 only then further clarification. The inspection body criticises the fact that the investigation should have been initiated in the past; there is no evidence of any subsequent grant / compensation.

Flekjob in very few hours 2016: full original tables and citizens' programme

FF16F. All 89 physical original pages are read in RAM. 28 block numbers, of which 21 numbered tables; 170 series of data. 19 different case numbers are recorded; repeat No 112 is counted once. Raster tables and graphs are visually controlled on PDF 6, 7, 8, 9, 10, 11, 12, 13, 14, 31, 34, 41, 42, 46, 50, 51, 53, 54, 56, 57, 60, 68, 71, 72, 73, 74. The same 130 cohorts as the previous main control; no extra cases.

Limitation and method

130 grants from 13 municipalities, ten per municipality. Local authorities selected by number of small flex jobs / unemployment benefits, size and geography. The call required the most recent decisions before 1 May 2015; the actual period of the report ends on 16 June 2015. Cases already appealed and forwarded are omitted; amended after reassembly without forwarding are included (PDF75). All requested 130 received. Annexes were sought from four municipalities (PDF66-67). Copies are shredded after reporting, not evidence of shredding of municipal records (PDF76). No statistically significant national error rate (PDF67).

Plan content and team reasons are examined formally; the correctness of the reasons is not examined. The team's knowledge of information in other records is assumed (PDF52-53/59). AS itself completes the development assessment in 47 of 79 low-hours flexible employment cases (PDF41). Subsequent intervention is not fully covered (PDF51).

Original numbers and deviations

T1.2 presses 39% for 51 / 130; T3.4 presses 38% for the same 51 / 130. T1.1 / T3.3 presses 69% for 89 / 130 (68,46%). Figures and printed percentages have been kept separately. The 37 unresolved cases of the prosaic have to be read with the exception of Case 54, which is described as sufficiently well informed with ordinary work possibilities (PDF34). T3.11 has 10 / 12 / 5 shortcomings in sub-points, although the total missing team justification is 9; the categories may not be added together.

T1.1: Flex job target group

Citizens' programme: local case numbers

Compact factual records; all assessments in the final column are the report’s. No national union of people or actual individual redress is inferred.

No	PDF	Documented facts	Assessment of the report
18	32-33	54 F; head trauma; 1 ½ month / 9 hours	Insufficient clarification / considerations of safety
119	33	38 M; vertebral fracture / ADHD; seven months internship	Special studies not requested
54	34-35	23 F; Asperger; 13 weeks + nine months	AS assesses the possibility of regular work
66	36	47 M; bipolar; 2 ½ months	Current treatment; clarification inadequate
61	37	46 M; depression / abuse / HIV; one year	AS assesses fleksjobgrund correctly
96	38	59 F; blood clots; near one year	AS assesses fleksjobgrund correctly
40	39-40	39 F; fixed head injury; six months	Maintenance conditions not met
63	40-41	57 F; progressive nervous disorder; seven months	AS considers the retention exception satisfied

No	PDF	Documented facts	Assessment of the report
11	42-43	41 M; brain injury; year + six months	AS complements the municipality's lack of development assessment
31	43-44	52 M; knee / depression; three months	AS complements development assessment
112	44-45;61	51 M; Parkinson; nine weeks / 18 hours effective	General flexible jobs; team reasons deficient
76	46-47	59 F; disease load; three months / four-hour test	Pension wish; doctor predicts the most quality of life; AS accepts the municipality's development statements
98	47-48	35 F; knee injury; 2 ½ hours / week	AS accepts development option
117	48-49	53 M; lung injury after cancer; three months	AS accepts development statements such as work motivation
12	54-55	58 M; neck / back; 2 ½ month	Plan / information insufficient; treatment not completed
4	55-56	46 M; depression; handicapped resident son	The son's care / support and current social conditions insufficiently elucidated
36	57-58	46 F; chronic pain; 2 ½ month	LÆ265 lacks current treatment information
106	58-59	49 F; anxiety / agoraphobia; resource progression one year	LEE265 over one year old, not updated
67	61-62	48 F; hip disorder; 13 weeks	Practice in medically unsuitable kitchen work; team justification inadequate

Own evidence and impact assessment

Overall correctness does not count every safeguard deficiency. The evidence is the documented procedural examination, the 47 subsequent assessments completed by the reviewing authority and the sub-items with more deficiencies than the overall count of incorrect reasons. This shows the review test’s limitation: a public decision may be classified as correct while an originally mandatory assessment element is absent from the municipality’s records. Such a review measure does not prove that the individual received adequate reasons and an opportunity to challenge the material when the decision was made.

Case 67 documents that the clarification itself took place in work excluded by the doctor's recommended adjustments; the result therefore cannot support a reliable assessment of capacity for work. Case 4 links inadequate fact-finding with the actual burden of caring for a child with disabilities, but the child is not automatically counted as another person subject to a decision. Case 76 documents a wish for a pension, exhaustion and an expectation of development; neither subsequent development nor a final pension decision is documented here.

Specific requirements: initial acts and measurement forms, actual subsequent effort / health / employability, resumption and benefits per case, and responsible follow-up. This information requires authorised passenger coupling. The well-known reading hole of the 89- page original is closed; individual repairs and historical sources of law outside this original have not been declared.

Sickness benefit 2016: full tables and citizens' programme

The entire public original of 134 PDFs pages has been read in memory, including rules, principles, municipalities, calls and schedules. 26 pages are visually checked in memory. The municipality's separate opposition note of 1 page has also been read. This supplement uses the same 115 examined decisions as the previous module; the figures may not be added again.

Ankestyrelsen 17 decisions wrongly assessed: 11 would have been amended and 6 returned by complaint. A remittal for reconsideration is a new procedure, and the investigation does not document a full series of actual resumed benefits or post-payment. Error in legal reference, consultation, information and result overlaps. A decision which the board calls overall correct may still have separately documented errors in the handling of the case.

Original: Section 7 of the Health and Safety Act concerning incapacity for work, April 2016;. SHA256: 591c9787b97bf97b7b108dee601a5b76e428c568aba20201c3751a8e944ba904. The PDF page is physically 1-based; the printed page is usually the PDF page minus 3. ISBN978-87-7811-322-1.

Scope and sample

Search	Precise demarcation
Request / received / measured	160 / 127 / 115. First 120 cases from 12 municipalities: 90 − 4 incorrect − 2 extra = 84. Extra 40 from 4 municipalities: 37 − 6 incorrect = 31.
Exclusion of complaints	Cases appealed and forwarded to Ankestyrelsen should be excluded. Modified by reassembly without transmission. The number of excluded complaints and such reassessments shall not be made public.
Period	The first 12 municipalities' most recent decisions before 1 July 2015; the 4 new municipalities' sample is expanded at the end of September to decisions after 30 June and before the request. Examples cover 2013-2015.
Difficulty	The municipalities found it difficult to find first refusal and settlement cases. They informed many alleged post office cases and agreements for quick notification without a decision. The remaining section 7 (3) cases were accepted.
Information	The Authority's requirement for all relevant documents is not an independent audit of the municipality's full archives. Some additional documents were obtained.
Application	Small sample; the original does not say statistically significant. Commune tables do not provide a secure national or local error rate.
Dedup	25 local example IDs are contained in 115. No publicly verifiable personal union between them or through other reports.
Repair	Hypothetical appeal outcome; no full list of actual resumption, post-payment, amount or end date of the period of error.

All published figures

31 reading tables with 188 rows. Repeats in summary, method and municipal annexes are versions of the same population. All printed percentage cells are retained even when rounding or the original classification results in deviations. The response codes of the form are separate.

Summary Outcome: Overall and case type outages

Original PDF6. Mention / delimitation: 115 cases; hypothetical complaint outcome, non-successful reopening.

Concrete stops and citizens' programmes

The date in the stop column is stop effect when explicitly stated; at first refusal, the date of decision is indicated. Date alone does not prove when the money was actually missing or later paid. The assessment by the Management Board may be verified against the original documents; the extracts are its published summaries of cases.

84	41	24	2013-12-18	2014-01-28	Remittal for reconsideration	Key economic problems; medical not retrieving one, away from business enough
33	43	49	2014-11-11	2015-04-01	Remittal for reconsideration	Teacher, stress; employment ends 30 September 2015;February medical:partial without a time horizon; psychological information omitted
86	43 €44	34	2014-05-30	2014-11-30	Change	Recurrent depression; psychiatry 26 May–19 Aug/GP 31 Aug; antidepressant increased 20 Aug; cannot manage 4 h/week exercise+moving in October
32	44	26	2015-03-20	2015-06-02	Correct	Stress, poor environment; broad before 3 months, notice expected; AS medical assessment: fit for work
87	44â 45	39	2013-06-20	2014-08-02	Correct	Status 23 May 2014, last seen 9 Apr; expected recovery in 1–2 months; 12 Jun interview, own expectation after the holiday
7	45	Not available	2015-01-06	2015-07-09	Wrong piece; stop possible	Apprenticeship 31 May 2015; 3â † '4; 32 hmax self-education course; self-education 15 Junelast 16 mar
22	46â €47	44	2014-10-30	2015-05-31	Change	Depression after mother's death 2 years earlier;debt/medication/cannabis/stress;medical 22 May 2015 unfit for work
103	47	34	2014-12-10	2015-06-27	Change	Colitis post-birth; past 37 hpraktik 18 h; medical 1 Jun 2015 downstilltime; not fully ordained in scope
9	48	29	2014-07-28	2014-12-20	Correct	Floor sander/unemployed; bouts of abdominal pain, gastrointestinal diagnostic assessment without a diagnosis/irritable bowel; 14 October improvement
39	48	55	2014-09-25	2015-04-01	Correct	Chronic pancreas / diabetes; medical 3 mar 2015 no seizures 2 m; diffuseled pain 1 m
21	51	51	2015-03-16	2015-05-21	Change	Progressive neuropathy, unknown level of functioning; hospital status report of 3 Jun 2015 missing, B12 every 3 months; other interventions not clarified
98	51	55	Not available	2015-03-27	Correct	Road traffic accident; pain clinics from 2014 without recovery; 30 h / week delviskraskfrajan 2014
99	52	35	2014-01-17	2014-11-13	Absence of reasoning; stop possible	12–15 effective hours/week in the current work placement against the previous 30 hours; objective findings versus demonstrated functioning is AS's assessment, reasons concerning the intervention missing
49	52â 53	54	2015-01-19	2015-05-08	Wrong piece; stop possible	Flexible employment 2001,25 hours→15 hours from 20 February 2015;section 7(5) not applicable because already in flexible employment,AS section 7(3) another flexible job possible
97	53	44	2014-09-01	2015-01-19	Wrong piece; stop possible	32 hrs; medical 11 Dec 2014 hypermobility 30 hrealistic; § 7 (5) before otherpieces

Case 55 shows a specific income interval: the Board considers that the first refusal should not have replaced payment from 29 April to 1 June 2015; instead, no form could justify a later stop from 2 June. The original does not disclose any actual post-payment. Case 86 describes stop 30 November 2014 during continued depression without current

health information. Case 21 describes stop 21 May 2015 in the case of progressive neuropathy without clear function or alternative efforts. An unknown post-payment link does not cancel the documented error in the decision.

Absence of the original and independent source verification

Locator	Deviation
PDF13 - 14	Category 1 first follow-up within the 8th week stated in PDF13;PDF14 says no required time/form. The historical rule version is reproduced, not harmonised.
PDF60	Employer 8/77 described as employed at cessation, but PDF58 says 77 were employed at the start of sick leave; retain the conflict over the population's time point
PDF64 vs PDF7	Justification completely inadequate 2 in main text against 1 summary; read in Table 6.1 before choice

Table 5.6PDF134 vST6.6	T6.6 has 6 correspondingly printed response code; blank categories are not counted citizens

The City of Copenhagen Note 3 June 2016 states that, in its view, 1 of 2 criticised cases were misjudged: the board should have misunderstood the date of the medical document and overlooked part of the explanatory statement. The note identifies journal 2016-0030250 / document 2016-0030250-8, but does not include any original act or accepted management correction. The municipality's claim must be tested by medical document, decision, measurement form and correspondence. The published 17 / 115 series is not changed on this basis alone. Note: HA256: 6db578a6ed19ba1c4bfae5681575a3433606b3004b1e24f25dab25a05a9890b2.

PDF108 - 109	Both municipal tables visually
PDF110â 121	Both letters, blank front pages, records and municipal lists
PDF122 - 134	Whole blank coding instrument; no blank boxes counted as persons

All 134 pages of available table / annex content are dealt with. Visual pages: 6, 7, 8, 32, 33, 36, 37, 42, 46, 49, 50, 56, 57, 58, 59, 60, 61, 64, 65, 66, 67, 69, 74, 75, 108, 109. There is no known available table residue in this original. Individual municipal fuldacts, response to Copenhagen's objection, actual payout data and identity dedup er

separate documentary gaps. Necessary next steps are case-ID-based linkage of records and payments at the 16 municipalities, together with Ankestyrelsen's measurement forms and correction correspondence. No such linkage may be filled in with a national rate estimate.

The strongest documented criticism follows the chain: decision or omission → published case summary and exact table → deficiency in information/hearing of the parties/legal authority → historical rule → cessation of income support or absence of specific review → responsibility of the decision-making authority → demand for verification against original records, a new correct decision and documented financial redress. Actual loss and duration require payment history, which the report does not publish.

Sickness-benefit reassessment 2015: all tables, methodology and specific individual case histories

All 133 original pages have actually been read in RAM, including seven annexes. The 16 numerical tables and three figures are fully reproduced with all explicit data cells; supplementary summary, process, surveillance and method blocks are kept separate. Physical PDF page is printed page number + 1. It is the same 125 decisions as the existing series; the fuller control adds no new 125 citizens.

Main analysis: the lack of information can change the dependency of the citizen

The municipalities had made 26 decisions without the necessary medical basis, and according to the study 39 decisions would have been altered or remitted on appeal. This is a specific review of 125 decisions, excluding cases already appealed and forwarded. There are thus documented errors in the part of practice not already examined in Ankestyrelsen's appeal system. The 39 are neither 39 appeals actually resulting in alteration/remittal nor 39 documented deprivations of income support: some adverse assessments concern extensions that the agency would change to a job clarification programme. Direction and consequences for the citizen must therefore be linked to each case. [SYREV15-FULD,PDF33-35/41/45/51/72-74/119]

Case 31 shows the opposite error, directly burdening the individual: the municipality stopped sickness benefits and referred the person to job clarification despite an overall assessment that, according to Ankestyrelsen’s own assessment, supported an extension. Case 102 shows that a medical certificate received before reassessment did not trigger a new assessment. Case 56 shows 25 days from reassessment and the original refusal to a new extension decision with a retroactive start. The last decision does not in itself document when the money was paid, nor that the case was now sufficiently investigated: the agency still required information from the psychologist. [SYREV15-FULD, PDF38-39/42-43]

The time rules were not met in all substantively correct cases either. 29 assessments under § 7 a of the Act on Legal Protection and Administration in Social Matters were late, 26 individuals were not involved at all, and six cases had both deficiencies. 10 extensions were limited in time in advance contrary to the rules. None of these errors must disappear in the statement that 86 substantive decisions were correct. The original’s assessment that there was no effect on the outcome is separate from whether the individual received timely participation, a comprehensible decision, uninterrupted support and actual payment. [SYREV15-FULD, PDF57-66]

A specific stop instruction has subsequently been disregarded

The report's annex reproduces 16-15 with an instruction to stop at the reassessment date despite an insufficient basis. On 11. November 2015, precedent decision 75-15 specifically discarded those passages. It states that cessation requires a valid decision and describes the earlier practice as an error of law following Højesteret's judgment of 10. September 2015. It requires consideration of reopening; the decision's account is not an independent reading of the original judgment here. The historical study's stop instruction therefore cannot prove the lawfulness of a specific cessation of income support. Its figures are retained while this legal error is precisely delimited.75-15 also describes that remittal with annulment requires the benefit to be reinstated until a valid cessation decision exists. [SYREV15-FULD,PDF102; SYREV15-75,PDF1-5/7]

Cohorts and test limits

Thirteen municipalities were each required to submit ten decisions divided into 3 No 2 extensions, 3 No 3 extensions and 4 job clarification cases. The first round gave 123 cases where 38 were excluded, so 85 could be used. According to extended criteria, 109 of the original 123 could be used; 21 additional were requested. The final accounts shall indicate 130 received after adjustment, 5 excluded and 125 analyes.21 requested shall not be treated as 21 further analysed or added to 109. The letter of 29 May shows a specific request of 1 No. 3 + 2 job clarification; it is a single municipality's letter, not all 13 municipalities' second round. [SYREV15-FUD, PDF72- 74 / 125]

Decisions following the enlargement were due to be taken before 15 April 2015; sick leave before 1 July 2014 could now be included if the review followed the 22 week rule. Cases already appealed and forwarded to Ankestyrelsen are omitted, while locally modified reassessments without transmission could be included. The number of such omitting complaints and actual reassessments shall not be made public. The municipalities' submitted documents were accepted in full after few concrete requests for obvious lack of documents. The summons said that after retrieval would not happen. The original documents this actual method difference. [SYREV15-FUD, PDF72- 74 / 119]

The first follow-up in all 125 cases was before 5 January 2015. The new requirement for LÆ285 at the first follow-up is therefore not the basis for testing this particular part of the cohort; later visitation / follow-up follows the entry into force. The survey includes the wider experiences of the municipalities, including with new rules. The local authorities' statements of waiting time for medical certificates and treatment are not an individual proof of who caused the delay. They document a known risk of a shorter period being translated into lower dependency without adequate information. [SYREV15-FULD, PDF11-16 / 67-69 / 78-92]

All original and supplementary data cells

Table 4.1 - PDF33

Category	Number	Percentage
Correct	86	69
Would be amended/remitted on appeal	39	31
Total	125	100

Substantive study assessment, not 39 appeals actually overturned.

Table 4.2 - PDF34

The 24 cases identified

The Office's descriptions are public reproductions of health and file files. The full individual medical records have not been published in the report. The reproduction can therefore demonstrate the reported assessment of the authority and its internal inconsistencies; it does not make any diagnosis, forecast or actual payment independently verified. The local numbers are deduplicated only within this original.

Case	Locator	Reported progress	Meaning of proof and specific delineation
5	PDF36	61 year old SOSU-helper, on sick leave 14 July 2014, pain hands / feet; reassessment 31 Jan 2015. Journal 12 Nov 2014 describes stabilized / stationary condition and wound infection, control mid-January. The municipality calls the state unresolved and stops for job clarification.	AS: current information/reasons missing; the hospital's information as reproduced does not support the municipality's conclusion that matters remain unclarified.
115	PDF36-37	45-year-old teacher, load response 11 Feb 2014; review 31 Aug 2014. Doctor 6 Jun expects a quick announcement 13 Christmas and work after-work; psychological treatment. The city stops for job clarification.	AS: The municipality does not investigate why the forecast failed or the current information of the psychologist. No actual post-payment documented.
47	PDF37	Age 31, unemployed, on sick leave from 25 July 2014 after pregnancy with pelvic pain, suspected sleep apnoea/stress; reassessment 31 January 2015. No. 2 extension based solely on awaited sleep-clinic information.	AS: missing current information and insufficient reasons for clarification; not evidence of no illness or lawful later cessation.
75	PDF38	53 year building painter, knee wear, operation 10 Sep 2014 and later mental problems. No 2 extension	AS: no current health / clearance basis. Several months old information, not verified

Case	Locator	Reported progress	Meaning of proof and specific delineation

56	PDF38-39	44 years old, free, anxiety / stress, psychologist, sick leave 11 Aug 2014. By 28 Feb 2015 refuse pending certificate; 25 Mar 2015 new No. 3 extension back from reassessment. Certificate 26 feb is based on the last medical visit 1 Dec 2014.	25 days elapsed between reassessment and new decision; initially stop reproduced, actual payment interruption / postpayment day unknown. AS still criticises the lack of psychological basis; a new decision is not full restoration.
108	PDF39	38 year old SOSU-helper, knee pain 2 Oct 2014; review 31 Mar 2015. Physiotherapist 19 Feb 2015 expects part-start within 4-6 weeks, 1 ½ -2 hours four times a week. Latest medical information 13 Nov 2014.	AS: general physiotherapy status does not have a certain medical expectation of past work.
87	PDF39-40	35 years old, free, depression / back 5 Aug 2014, re-evaluation 28 Feb 2015; physician 21 Jan and psychiatrist 16 Feb describes major mental illness and continued treatment.	AS accepts job clarification on current basis; not a negative decision error. Treatment needs are actually described.
34	PDF40	55-year-old self-employed driver, neck / shoulder / knee 12 Aug 2014, re-assessment 28 Feb 2015. Doctor 11 feb describes prolapse / wear extraterritorial improvement and clear workability.	AS accepts no 2 extension for clarification; no new injury / payment measurement.
23	PDF40-41	36 years old, free, shoulder drop 3 Sep 2014; operation 6 feb 2015, doctor 19 feb, interview 27 mar, reassessment 31 Mar 2015. Expected 3-4 months of rehabilitation.	AS accepts no 3 prolongation, known surgery without described complications; actually later rattling undetected.
31	PDF42	46 year-old educator, depression / anxiety / stress 11 Aug 2014; treatment and good prognosis. The municipality stops at 28 Feb 2015 for job clarification with reference to uncertain time and training.	AS would change: the overall assessment bears the number 3 extension. The municipality makes escalation and imprecise time to refusal despite sufficient positive forecast; actually new decision / pay not shown.
102	PDF42-43	29 year-old unskilled, prolapse 7 Aug 2014, review 28 Feb 2015. The municipality stops for job clarification before medical certificate 20 Feb 2015, which is received immediately after decision and before re-assessment; expected non-backloading work after few months.	AS: new trial failed; would be remitted. At the same time, the original does not say any current information on reassessment despite the certificate before 28 Feb; precise date of the proceedings requires acts, not explanation of proven failure to resume.
51	PDF43	38 years old full-time personal helper, severe depression 1 Aug 2014; worsening occasionally before 28 Feb 2015, psychiatrist 26 Jan. Part-start had to be abandoned.	AS accepts job clarification; no secure time / volume forecast. Not proven healthy simply because overall prognosis is described well.
78	PDF43-44	32-year-old SOSU assistant, knee pain 29 Sep 2014; operation 17 Dec 2014/4 Mar 2015; suicide attempt, psychologist and suspected personality disorder. Decision 9 Apr 2015,reassessment printed as 31 Apr 2015; psychiatry on 10 Mar expects 1½-2 years of treatment.	April 31 is invalid calendar date, no recoding until April 30. AS accepts job clarification; duration of treatment is reproduced forecast, not actually two years intervention.
26	PDF45-46	47 year self-forestry, lumbar pain; original sick leave 19 Sep 2015 but review 31 Mar 2015 / Decision 25 Feb 2015. Physician 18 Feb 2015 recommends physiotherapy / 3 months and further blockade.	AS would change job clarification, points out premature decision and security clarification. The year of sick leave contradicts the chronology; the correct year is not guessed. 34 d from 25 Feb to 31 mar shows the distance of the decision, not illegal stopping time.
48	PDF46-47	56 year-old teacher, blood clot 4 Aug 2014, re-evaluation 28 Feb 2015; part-start 23 Feb and full time after summer. Doctor 24 feb mentions mental withdrawal, social distress / loss of sight. No 2 extension.	AS: stepping up is not an assessment, no. 2 incorrect; no. 3 requires further information. Would remit for reconsideration, not evidence of no impediment to work.
49	PDF47-48	35 year-old secretary, borderline, sick leave 8 Aug 2014, no 2 at 28 Feb 2015. Psychiatric 24 Nov 2014 no current treatment needs, doctor 5 Mar 2015 stable phase; flexible working time is recommended.	AS assesses no incapacity for work and would amend. A later 5 Mar status cannot simply be treated as proved available on 28 Feb; the report's expanded scope including later records must be stated.

Case	Locator	Reported progress	Meaning of proof and specific delineation
73	PDF48	62-year-old property administrator, blood clot 25 Aug 2014,reassessment 28 Feb 2015. Rehabilitation centre 5 Feb:basic daily needs/longer rehabilitation expected, assumed discharge 21 Apr and a better assessment at the end of 2015.	The AS wanted to change number 2 for job clarification. Massive cognitive problems and dependence must be maintained; prognosis is not actually rapidity.
93	PDF48-49	35-year-old slaughterhouse employee, lymph cancer 25 Aug 2014. Review 28 Feb 2015, last chemo plan 11 mar, start 3-4 weeks later. No 2 time limited 3 Christmas 2015 to 30 hours per week.	AS: no. 3 should have been applied, advance time limit unlawful.30 hours not necessarily the previous full extent; reduced hours do not automatically mean complete recovery.125 days from 28 February to 3 July is a set horizon, not documented actual loss of income support.
9	PDF49-50	58-year-old fisherman, pain/wear/nerve involvement 4 Aug 2014,reassessment 31 Dec 2014. Condition stable with no treatment options, no longer able to do fishing work. The certificate is mentioned as both 4 Aug and 8 Sep 2014.	AS accepts No 2; conflicting certification dates are retained, without unknown actual workability produced as proven.
136	PDF50	58 year old CFO, lung cancer with bone metastases 21 Jul 2014, review 31 Jan 2015. Oncology 17 Nov 2014: stable and motivated, tired / residual workability unclear; doctor life-threatening, cannot be cured.	AS accepts No 2 but refers to possible No 5 with a lack of information about currently life-threatening. Criticism of documentation must not turn serious cancer into ferociousness.
64	PDF51-52	37 years old, free 25 Aug 2014, accident / tooth injury and socialphobia; own doctor 21 Jan 2015 awaits 3 months dental prostheses; No 3 delimited 28 Apr 2015 from 28 Feb.	AS would amend; mental-health treatment not documented and waiting for prostheses not equated with the illness period. Unlawful advance time limitation also identified; 59 days is the set horizon, not a documented actual cessation of payment.
83	PDF52-53	32-year-old agricultural employee, shoulder 14 Aug 2014; physiotherapy 11 Dec, own doctor 27 Jan 2015: uncertain prognosis. No. 3 as at 28 Feb based on a typical 6-month course and expected recovery on 1 Jul 2015.	AS would change job clarification: general forecast is not individual security forecast. In fact, subsequent payment / outflow undetected.
45	PDF53	37 years old laborant, depression 21 Jul 2014, treatment and partial work. Doctor 16 Feb 2015 evaluates full extent after coming months from 28 Feb.	AS accepts No 3; concrete escalation plan and stable attachment, not proof of realised recovery.
138	PDF53-54	44 year old SOSU-helper, knee accident 3 apr 2014, operation and screws removed; review 31 Oct 2014. Doctor 7 Oct expects part-start 1 nov and full-time work after 2-3 months; training 3 times weekly.	AS accepts No 3; later actual return has not been observed.

Documented errors and verified source discrepancies

The 39 adverse substantive assessments,26 significant information deficiencies, late section 7 a assessments, missing involvement, advance time limits and absence of a new decision are specifically documented in the cited tables and case accounts. These are overlapping dimensions of review. The internal contradictions below are also specific source findings; they do not remove other documented errors.

Passage	Precise problem
PDF8 / 63 / 64	Party consultation 60 / 61 in summary vs 62 / 64 in table; 62 irrelevant of 125 gives 63 relevant, not 64.96% for 62 / 64 is also original printed.
PDF10 / 69	The summary says all 9 WITHDRAWAL 285 uses other certificates; details indicate 1 yes / 5 no / 3 other.
PDF43-44	Case 78 has 31 April 2015, a non-existing calendar date.
PDF45-46	Case 26 has sick leave 19 Sep 2015 before reassessment 31 Mar 2015; correct years cannot be determined on this alone.
PDF42-43	Case 102 has received a pre-evaluation but subsequent formulation of no current information on re-evaluation. The actual date of receipt / processing of new information requires acts.

Passage	Precise problem
PDF49-50	Case 9 has two different certification dates, 4 Aug and 8 Sep 2014.
PDF76	Age / type figure covers 123, not all 125. The second most frequent 40-49 does not apply to No 2, where 50-59 has 10 to 9.
PDF102 / 75-15PDF5	Historical stop instruction 16-15 was discarded 11 Nov 2015; should not be reproduced as valid or independent law finds.

Suspects, necessary evidence and priority requirements

The published material does not document bank dates, precise differences in benefits, interest rates, actual resumption / correction dates for the 39 cases, individual guilt or a nationwide personal union. These are concrete investigative tracks: bring in the original decision, full file and reception tracks for medical information, consultation and guidance, new decision and post-payment account. Suspicions of further loss or damage must be linked to each course, not to a national amount.

The strongest documented demand order is: try the validity of the maintenance stop; clarify the municipality's responsibility for lack of information and re-evaluation; try the participation / time breaks independently; require actual and dated recovery / post-payment by the documented invalidity; investigate individual responsibility and loss consequences based on the complete chain. An improved post-survey workflow is not proof that already affected citizens got their dependants back.

The assessment form PDF126-131 and survey PDF132-133 have been read in full. They contain more fields than the published results; response codes are not new statistical measurements. The summaries of decisions on matters of principle PDF100-115 have been read as historical legal background, not added to 125 as new survey cases. Criticism concerning safeguarding provisions/the factual basis is described, among others, in D-8-03, R-1-06, D-12-08, D-14-08 and 232-11; the specific legal consequences must be applied using the correct historical version.

Sources and original controls

[SYREV15-FULD] Appeals Board,November 2015, ISBN978-87-7811-306-1.133 pages actually read; all 16 numerical tables and three figures, seven annexes. Official FT original: https://www.ft.dk/samling/20151/almdel/beu/bilag/40/1565744.pdf. Delivery actually read in full: https://trung.dk/api/politi k/bilag/7749fc83-f68b-40f5-a921-70256a7a1af4?filename=Ankestyrelsens%20praksisunders%C3%B8gelse%20om%20revurdering%20og%20forl%C3%A6ngelse%20af%20sygedagpengeperioden.pdf. This is the Appeals Board's identified report, delivered through a mirror of Slagelse's minutes/annexes; trung.dk is not an authority domain. SHA2568f052ec42c9dbff7234e92e8634c1427503c0e78609580a6c85a92d5d2f9f068,1.142.589 bytes. Figure/table visually checked on PDF63/75/76/77.

The 20230323172028 capture of / publications / appeal management -practice examination -re-evaluation -and -fordelelse -of the -sickness benefit period / @ download / publication gave only 1.048.576 bytes by an announced 1.142.617 bytes. It is a specifically interrupted copy and was not treated as full-read storginal. Aalborg's well-known documentation route provided HTML about missing file. FT direct RAMdownload 403; the later found full copy closed the material 133 pages. No official original PDF / full text / images are stored locally.

[SYREV15-75] Decision of the Appeal Board of Appeal 75-15, KEN11009 of 11 Nov 2015, public Kkcopi: https://www.kk. dk / sites / default / files / agenda / f76aa402-f4ca-4c5e-8190-4a316b9a16db / 505886e2-4ccf-49c-92de-69e8ace4c59a-car ag-2.pdf. All seven pages read via official PDF reproduction. PDF1-3: valid decision / error of law / reopening; PDF4: F3-00 on annulment and recovery; PDF5: discarded 175-12 and 16-15; PDF5-7: the case and reproduced Supreme Court premium. No new population is added from this historical source of rules.

Youth Visitation 2015: full original tables and citizens' programme

All 86 original pages have actually been read in memory. All 17 numerical tables and 13 figures as well as four additional method / historical bet blocks are reproduced. Visual check of stacked figure and commune cells: PDF39 / 50 / 52 / 53. This replaces UNGE15's previous sub-control, but does not add any new 102case reports.

Main analysis: a proper category does not guarantee the statutory assistance

The survey's 85 correct classifications must not be read as 85 error-free courses. The same sample contains 52 courses without compliance with the interview duty/time limits, 42 without the first education order, 69 of 98 without the mandatory test and 40 of 48 without a documented offer of a coordinating caseworker. 11 additional tests were late. The deficiencies affect assessment, support and educational opportunities; their overlap is not published. 17 classifications would be amended/remitted for reconsideration on appeal, but the survey does not represent 17 actual overturning decisions. [UNGE15-FULD, PDF5-14/33-45/52-53]

Benefit calculation and other LAS decisions are expressly excluded. Incorrect activity/education eligibility assessment may affect the activity supplement, but the report does not document each individual's monetary benefit, back payment or actual redress. The historical rates below show legal significance without inventing losses. Case 62 shows lengthy case processing and missing support for a young person formerly in care; case 18 shows a single mother and insufficiently investigated care/childcare needs. [UNGE15-FULD, PDF16/26-27/30-31/54-55]

The figures 70 without duck steps and 26 without offers are registrations, the general legality of which was not tested. Case 99 shows in concrete terms that the second stage could be superfluous in the case of actual training. The fact that the process was described as generally correct on classification can therefore neither remove documented mandatory breaches nor create 70 new breakthroughs on an uninvestigated criterion. [UNGE15-FUD, PDF4 / 35-38 / 50]

Kohorte, test limits and source criticism

120 requested, 112 received, 10 excluded, 102 checked. Twelve municipalities are distributed geographically 3/2/3/2/2 and by size; each was to supply quotas of 1 obviously ready for education+4 other people ready for education+1 obviously ready for activity+4 others ready for activity. Most recent eligibility assessment before 1 Jun 2014,first contact after 1 Jan 2014,ages 18-29 and grants. Municipality tables have 5-10 cases and cannot be used as national error rates. [UNGE15-FULD, PDF47-50/75-79]

Cases already appealed against on the basis of benefit and forwarded to Ankestyrelsen is omitted; municipal revaluations may be included. The documents are assumed to be fully submitted and no missing documents are requested. Consultation correction only accepts material from the original submission and the period before 1 Jun 2014. This delineates the control against complaint statistics and subsequent actual corrections; the number of complaints omitted and the number of corrected assessments not to be disclosed. [UNGE15-FULD, PDF49 / 76 / 86]

The demographic prose at PDF50 actually has 202 men in the 18-21 group and repeats 22-25 in the final group. The specific figure at PDF51 shows 20 men and 26-29 as the final group; the totals of 46 men/56 women agree with the graph. The erroneous string is retained as a source error, not as an additional 202 people. References to Table 4.1 on eligibility categories are imprecise: the table actually numbered 4.1 concerns the factual basis, while the categories appear in Figure 4.1.

All 20 published examples

ID	Locator	Original summary, own paraphrase	Meaning and delineation
27	PDF24-25	18-year-old woman; former assault and cessation of education, mental illness in family; now college and HFplan. The AS accepts obvious education and training.	The family's illness is not automatically her function barrier.
9	PDF25	18-year-old woman, anxiety / grief after father's death, absence; psychological offer refused; SOSUS recording announced before submission.	The summary of the report documents recording, not completed training.
57	PDF25	24-year-old man; dyslexia, abuse by father, out-of-home placements, no contact with 4 siblings; mental health assessment; agricultural work placement 20 hours/week. AS accepts readiness for activity.	Traineeships are not evidence of education and training within a year.
78	PDF25-26	24-year-old man new schizophrenia diagnosis, welfare home with massive support for a few years, abuse. AS obviously accepts the activity party.	Specifically justified exemption from three conversations.
22	PDF26	18-year-old woman ADHD, former heavy alcohol abuse, housing lost with girlfriend, immaturity and unstable attendance. The municipality training parate; AS believes activity parate.	Resources / support and possible additional activity must be tested; actual cash difference not investigated.
62	PDF26-27	20-year-old woman previously placed, abandoned HF, mental problems, pain and sparse parent networks; early psychologistic but still no treatment at the end of business due to waiting time; wants support person. The municipality of education, AS activity party.	The treatment waiting and lack of concrete support are part of incorrect training requirements; precise waiting time / post-payment is not publicly available.
34	PDF27-28	21-year-old woman with physical illness/mental health assessment; municipality mentions a health certificate not found in the submitted records; assessed as ready for education.	AS requires more detailed information; the Authority's statement of the statement obtained does not prove the content of the statement.
35	PDF28	20-year-old woman training, difficult for others; party of activity on summarical psychological information only.	Lack of information, not evidence of absence of disease.
100	PDF29	20-year-old woman ill for 2 years, diagnostic assessment of pain, a caravan at her partner’s father’s home, HF plan; municipality classifies her as ready for activation without examining the factors.	AS cites both insufficient investigation and possible readiness for education; not direct proof of actual resources without assessment.
18	PDF30-31	21-year-old single mother of a single child, gastronomic course interrupted after 5 weeks; caring for a crèche, seeking relief; stress / psoriasis. Municipality of Activity Parat.	Network, medical basis, motivation / professionalism missing; documented child minimum 1 in this course, not national child count.
11	PDF31	24-year-old man with ADHD/depression, electrical engineering studies abandoned after 1.5 years, successful watchmaking work placement. Municipality: ready for activity.	Social background / information not deepened, no evidence of automatic development only through practical success.
73	PDF32	19-year-old man ADHD and widespread abuse after 60 d prison; municipality education parate but relieves him of activities.	AS considers activity-friendly; simultaneous and incompatible performance assessments require concrete testing.
92	PDF35 / 41	21-year-old male neurological genes after concussion not recovered; no education requirement; wants kindergarten practice, gets 4 weeks at coffee company / comrade, company bankruptcy.	SammeID two places; AS criticises information and lack of educational purposes. Not two people.
99	PDF36-37	21-year-old man terminated by order, 4 weeks of fitness practice, recorded 1 yearHG.	The AS assesses andetrin superfluous; the absence of step 2 is therefore not automatically illegal.
90	PDF39	18-year-old man, EGU ended, shoulder injury/migraine, dyslexia teaching, mentor+hotel work placement.	Three types of offer in the same case; not three citizens.
7	PDF40	22-year-old woman drug abuse since 14 years, anxiety / depression, activity parate; conversation rules and instructions not followed; mentor 1 h / week 6 months.	Correct mentoring does not cancel simultaneous process errors.

ID	Locator	Original summary, own paraphrase	Meaning and delineation
82	PDF40	24-year-old male 5 years of hash use; first education partner later activity parate; mentor 1.5 h / week 6 months, no other offer.	The two visits of the course are the same person, no repair date documented.
96	PDF40-41	28-year-old man with partner and their child, and a child from an earlier relationship, released after 8 months; ADHD assessment, offer of Dialog mod vold/clarification.	At least two children mentioned in the household; not new 2 cases. Stray information is a summary of authority without primary judgment.
88	PDF41	26-year-old man wants educationand training, SFOintern until the start of training.	AS accepts training-oriented offers.
55	PDF42	20-year-old male agricultural enrolment but 4 weeks' work experience + 8 weeks' wage subsidy at the bridging apprenticeship.	AS evaluates training-oriented; the apprenticeship is planned, not actually documented.

The 20IDs have different numbers, but full person deluxation and union across reports cannot be verified without original person key. Case 92 is repeated without new occurrence. Two background cases in Decision 50-14, PDF20-21 / 74, are excluded from the 102 addition; the report does not prove that they are additional unique persons. No actual post-payment or full course of training is added.

Measurement form and follow-up

Records sex / age, visitation, interview date intervals, information, factors, steps, offers, tests and coordinator. No public distribution of all instrument fields; response codes are not statistical figures. No actual recovery / post-payment / sequencing is measured. [UNGE15-FULD, PDF80-85]

Consideration by the municipal council under § 79 a; consultation 8 Dec 2014 to 5 Jan 2015; 12 responses,6 without comments. Only support in records already submitted leads to correction; new material and material later than 1 Jun 2014 excluded. No public before/after count of error categories or actual correction for citizens. [UNGE15-FULD, PDF47/86]

Lost earnings 2022: all tables and family history

The entire main report of 38 pages and the annex report of 17 pages have been read in RAM. Both figures and the central annex outcomes have been visually checked on 4 pages. All listed tables and annexes have been addressed; the same 42 cases as before, no new cohort. 27 cases contain errors wholly or partly; the hypothesis of an appeal outcome is separate from actual payment and redress.

Sources and scope of control

H: Original, 38 pages. SHA256: 83b8fcb5accd49de314d08c48870d87bea46fe45e43ec2601e1182e3f5f353bb. All pages read.

Follow-up	20	3	23
Total	36	6	42

Hescope: Specific assessments

Original H, PDF page 33. Sub-volumes 42 overlap.

Measurement	n	N
Full relief, conditions unclear	5	20
Follow-up unclear conditions	11	23
Reduction / Termination insufficient reinforced statement of reasons	4	17

B2.1: Municipalities and outcomes

Original B, PDF page 5. 42/7 each; N: own sum, defined in the original note.

Municipality	Correct	Amendment	remittal for reconsideration	Partial	N
Corner	3	0	0	4	7
Holbæk	2	0	4	1	7
Holstebro	1	1	2	3	7
Rødover	3	0	3	1	7
Stevns	5	0	2	0	7
Sønderborg	1	0	5	1	7
Total	15	1	16	10	42

B2.1 Note: Partial outage

Original B, PDF page 5. 10 cases with mixed outcomes; not added to decision counts.

Combination	n	N
Stasis + change	5	10
Staging + Revocation	3	10
Conviction + remittal for reconsideration	2	10

B3.2: Deficiency class

Original B, PDF page 6. 27 / 42 heroic part error.

Class	n	N
Formula only	2	27
Content only	9	27
Both	16	27
Total	27	27

B3.3: Formal deficiencies

Original B, PDF page 6. 18 formal; multiple responses.

Deficiency	n	N
Enhanced statement of reasons	1	18
Reason / hour measurement	12	18
Official principle	17	18
Total cases	18	18

B3.4: Absence of content

Original B, PDF page 6. 25 content; multiple responses.

Deficiency	n	N
Illegal time limit	5	25
No fitting-out period	2	25
Measurement	7	25
Conditions unclear	14	25
Total cases	25	25

Examples, time and citizens' consequences

The study documents errors in determining amounts, unlawful time limits and missing adjustment periods. They may limit the family's income and ability to care for the child. No complete payment history, correction date or common child/parent identifier is published. The 42 cases are therefore counted as cases, and no automatic sum of 42 children or 84 parents is used. The examples' page references are our own locators; the original publishes no stable case IDs, so the same family may appear again without verifiable deduplication.

Own locator	PDF	Example type	Number / progress	Assessment
H13	13	Sample sample	15 years; full-time appropriations	Not yet published; needs for care
H14	14	Sample sample	10 years;37 h/week intensive rehabilitation granted	Care/looking after a person, not healthcare treatment as such
H14-15	14	Sample sample	Short-day care / training for tsatauthorisation	No approval of home training; other provisions should be examined
H15-16	15	Sample sample	17 years; development / sustainability	Necessary care needs not stated
H12 / H20	12	Hypothetical teaching example	10 year football	Age-typical leisure activity; alternative time/sport in relation to necessary loss of income
H21	21	Hypothetical teaching example	37 h / week	Previous weekly limit on hours is not automatically a new need for full-time care
H22- 23	22	Hypothetical teaching example	07.30-15.30 → 10-18, Needs 09	Hours fixed but scheduling of working time changes; previously 1½ hours+transport
H24	24	Hypothetical teaching example	Beho 14, normal 15.30, departure 13.30	2 hinkl transport
H25	25	Hypothetical teaching example	School 15 h / week, work 37 h → 22 awarded	Pure redundancy without concretetime / loss of income
H26a	26	Sample sample	27 → 4 h / week	More school, currently 4 nursing, both parenting times illuminated; correct
H26 b	26	Sample sample	16 years of cancer; 17 h / week	Current care needs and working hours not established
H29-30	29	Sample sample	1 year; 37 h / week granted	Necessary full-time care, reasons given
H30-31	30	Sample sample	8 annual days; up to 6,5 h / week	Incorrect one-off grant; would be amended to an ongoing benefit
H32	32	Sample sample	1 year-old parents	Missing current information; breach of the duty to establish the facts
H33 a	33	Sample sample	Single treatment / sick days; cessation	No specific changes compared with the previous award
H33 b-34	33	Sample sample	37 → 17 h / week	Child, more nursery hours; alteration justified
H35	35	Sample sample	Follow-up meeting	Loss profit + additional costs + other needs

Source deviations

Locator	Deviation
H10 versus B5	H10 calls all 17 material deficiencies in the factual basis hypothetical remittals for reconsideration; B2.1 divides the 17 wholly incorrect cases into 1 amendment and 16 remittals for reconsideration. Retain both without a distorted national count of 17 remittals for reconsideration
H33 versus B6	Enhanced reasons 4/17 reduction/cessation in the main report versus 1/18 in the procedural-deficiency subset in the annex. Different measurement/denominator, not reconciled
B5	Introduction says “table 1.1” whereas the number is 2.1; original table number retained
InstrumentB9 versus B5	Form 3.1 lacks a partial-response category, while 10 of 42 actual outcomes have Partial
InstrumentB8	Code 2.7 order 4,6,5; codes 5/6 retained without renumbering
InstrumentB7	Conditional branching not published; public form is not the entire decision logic

Other factual incisions

Locator	Precise information
H4	49,5% reversed § 42- Appeals 1 Jul 2020- 30 Jun 2021, no n / N here; including modification / annulment / remittal for reconsideration, not 42 sample cases.
H5-6	42 cases, 6 municipalities;15 correct, 17 no, 10 partial. No generalisation;the report's selection of themes does not exhaust all legal challenges.17 negative assessments concerning material information=hypothetical remittal,not documentation that the benefit was substantively incorrect in 17 cases.
H12	Hypothetical football illustration concerning a10-year-old, not a sample case count. Disability compensation requires necessary care needs+loss of income, not only medically necessary tasks.
H13-25	Care also outside the home, practical chores, sleep, accompaniment. Healthcare treatment versus care and training versus approval of home training must be examined separately. The school sector must support resources; a parental benefit is not automatically a substitute for the school budget. Working hours at transition are fixed, their scheduling is not; an earlier reduction due to disability may … [source unclear: “førdatogrundlag”]. Flexibility requirements must be considered in terms of their significance for family life; transport and unsocial hours included.

Historical Rule references

These are the rules and principles of the original. They are not counted as new investigations and are not automatically used as applicable 2026.

Reference	Locator	Defined content
69-16	B15-16	2-3 working days/year normally not significant; total across both parents/all disabled children/forms of absence; no holiday requirement, not automatically an absolute 2-3-day limit
C-52-06	B16	32 hours/week basis; an earlier reduction caused by the child has not been sufficiently established
C-24-08	B16	Ongoing benefit without a time limit unless agreed with the recipient
101-13	B16	Starting from the application, special exceptions
231-10	B16	3-month adjustment period at 13½ h/week, substantial reduction; historical precedent case, not the TA22 cohort
25-19	B16-17	School transport: education sector; no transfer to the social sector without a rule
SEL42	B12	Under 18; hospital visits also for a child in care § 42(2); printed monthly ceiling 31.936 kroner,10% pension,ATP1/3 individual 2/3 municipality, historical 2022 reproduction
SEL148 (2) / RSL5,10,68,76, 79,79 a / FVL22-24	B13-14	Follow-up/comprehensive fact-finding/coordination/municipal council responsibility; 14-day time limit for written reasons

Instrument and stage of execution

Blank fields, codes and illustrations are method information, not citizens' numbers. Actual correction, delivery and payment shall not be deduced solely from a follow-up decision.

Field	Locator	Meaning
1.1-1.4	B7	6 municipality codes; case number, case manager, age of the child
2.1-2.3	B7	Date; initial / follow-up; authorisation / partial / refusal / reduction / cessation / other
2.4-2.8	B8	Full-time/part-time/single days/combination; amended/upheld, times, old award date, written/oral
3.1-3.2	B9	Yes/amendment/annulment/remittal for reconsideration; formal/content/both; multiple responses for error classes
3.3-3.4	B9-10	None/minor/significant;9 information categories, multiple responses
3.6-3.11	B10-11	Statement of reasons, complaints, interpretation rule, quality standard, invariably
4.1,5.1,5.2,6	B11	Overall assessment; case description/strengths/“fritrelevant”; no actual payment date

Concrete remains and evidence chain

No known unread public table or attachment page consists of these two originals. Necessary self-coupling: The Anchor's completed 42 analysis forms and municipal fuldacts, all children / parents per case, justification for code differences and concrete actual measurement / payment / repair. The current grant and the individual grant have different courses of action. A reopening shall be documented by decision and execution separately.

The source chain is the original table or case summary → delimited error → the stated historical rule → the act or omission of the municipality → concrete significance for performance / testing → responsibility and requirement for act-based correct decision as well as documented effectiveness. Actual loss, guilt and personal union require the separate documents specified. The assessment by the Authority is not merely proof of its own correctness.

Business practice 2022: full tables, method and citizens' programme

All 50 pages of the main report and 13 pages of the annex report are text read in RAM. The municipal table and the conflicting follow-up / signature / extension cells are also visually controlled in RAM. The module complements the already registered cohort of 95 decisions; no new person or error amount is added.

Sources and scope of control

H: Original, 50 pages. SHA256: 33f7cc70d4517e23of89ce0cdae23adb9a138c72eb0a06dc3dd9d1b83caf7ed. All pages read.

Viborg	8	2	0	10
Own sum	71	15	9	95

Examples, time and citizens' consequences

The examples document the duties, hours, duration and individual follow-up of the work experience. Three self-finding processes have subsequently been reported as ordinary or supported recruitment; this is not a full series of effects. In the former case of recruitment, the citizen was granted 13 weeks of internship in the same role as the wage subsidy, and VITAS contains conflicting information. Hypothetically abrogation shows an illegal offer, but does not demonstrate that the offer was actually abrogated or which part of the period the citizen completed. Example passenger without kildecase ID can overlap and is not summed to unique persons.

Own locator	PDF	Example a	Number / progress	Assessment
H15-E1	15	Sample sample sample size	Daily subsistence allowance, cleaning, four weeks; daily subsistence allowance by being used up	Evaluated correct offer; actually subsequent jobs not disclosed.
H16-E1	16	Sample sample sample size	Self-employed car dealer internship, four weeks, 37 hours / week; telephone follow-up	Subsequent wage subsidies reported; ordinary recruitment and duration not documented.
H17-E1	17	Sample sample sample size	Job-ready, property service four weeks, 25 hours / week; job-targeted teacher and assistant	Trade changes did not assess the fastest path despite labour shortages in both areas.
H17-E2	17	Sample sample sample size	Benefit recipient, marketing three weeks; previous jobs / competences not disclosed	Would be remitted for reconsideration; good job prospects alone do not document an individually suitable offer.
H18-E1	18	Sample sample sample size	Activity Parate, place of training 13 weeks; three days 09- 11, extension two months; follow-up every four weeks, contact over two sick days	Ankestyrelsen evaluate purposes relevant despite undeclared job goals / assumptions.
H20-E1	20	Sample sample sample size	Job-ready cleaning, four weeks, 30 hours / week	Subsequent wage subsidies the same company; possible overlap with three subsequent appointments at H16 is unresolved.
H21-E1	21	Sample sample sample size	Job-ready shop assistant 37 hours / week, four weeks and two days	Would also change if exceeded in only two days.
H22-E1	22	Sample sample sample size	Activity Parate Supermarket, 13 weeks, beginning 12 hours / week, extended 13 weeks with several hours / tasks	Follow-up conversation informed; extension deemed lawful.
H24-E1	24	Sample sample sample size	Pedel 16 traineeships and four paid hours / week, 13 weeks from 5 August 2020; former traineeship November 2018- November 2019, wage subsidy from 3 February 2020	VITAS says no previous employment but describes wage subsidies in the same place / function. Wanted to be cancelled.
H25-E1	25	Sample sample sample size	The daily allowance takes first post office four weeks, then the shop assistant four weeks the same supermarket, 37 hours / week	Ankestyrelsen considers the functions different despite the task overlap; not extension.
H30-E1	30	Sample sample sample size	Job-ready shop assistant four weeks; seven internships and seven pay hours	No separation of functions; tasks include closure and all tasks.
H31- E1	31	Sample sample sample size	Self-employed customer service activities four weeks, 37 hours / week	Concrete tasks documented: customer service, offers, communication and marketing.
H31- E2	31	Sample sample sample size	Job-ready special construction work	A general statement of skills development does not document which work tasks.

Own locator	PDF	Example a	Number / progress	Assessment
H31- E3	31	Sample sample sample size	Activity Parate with Anxiety, store 13 weeks; starting one day 09.30-11.30, target two days	Step-by-step task training and milestones described.
H31- E4	31	Sample sample sample size	Job-ready grocery store four weeks, 37 hours / week	Tasks described but not linked to specific sub-targets.
H32-E1	32	Sample sample size, continued H33	Activity Parate Electronic Workshop 13 weeks, 12 → 32 hours / week; meeting after three weeks, new meeting a month later	The employer actually participated; follow-up of attendance and tasks.
H33-E1	33	Sample sample sample size	Activity Parate Assistant six hours / week, separate follow-up two hours / week; extension further 13 weeks	Close vocational guidance continues during extension.
H34-E1	34	Sample sample size, continued H35	Activity Parate cleaning nine weeks, 15 hours / week; wants employment April 2021, until then call replacement	The employer's intention, not documented actual April launch.
H45-E1	45	Sampling procedure	Only reference to LAB Chapter 11 and on-call / penalty rules	Deficiently precise legal basis; extracts have no independent source ID.

Source deviations

Locator	Deviation
H16 / 20 / 22	Bread text refers to Table 1.2 / 1.3 / 1.4, but the printed tables are called 2.2 / 2.3 / 2.4. Locators follow printed table headings.
H32 / 34	Table 3.2 has 35 with plan and 60 without / unknown, while Table 3.4 has 14 + 33 with follow-up branch and 48 without agreed follow-up. Cists / coding cannot be deduced as identical; no redistribution.
H38	Bread text indicates 66 signatures, Table 3.6 indicates 64; bread text also uses 16 / 66 one-man companies. Both original figures are retained.
H39	Prolongation rule is referred to LAB § 62 st.2, while H21 reproduces § 61 stp.2. Reference deviation retained.
H30-39	Bread text refers repeatedly to Table 4. x; printed tables are called 3. x.
H40	Table number 3.5 repeated:H37 reasonableness, H40 discussion of extension. Registered as two separate measurements.
H44 / 48	Complaint guidance is printed as 4.6, target group as 5.7; text refers to 3.2 and 5.1. Not tacitly renumbered.
H48	105 requested cases, eight cases outside the criteria and 95 measured cases do not in themselves provide a complete received/selected flow. Two unused reserves cannot be recorded as rejected cases without original information.
B6 / H14	The general exception in the Annex refers to Article 53 (3); the main report reproduces paragraph 4. Original references are retained, no new legal update.
B9	Total material schematic text refers to paragraphs 3.1 to 3.5, but the main text's illegal ex-recruitment example also relates to 3.8 to 3.9. Not proof that it was actually omitted from the overall assessment.

Other factual incisions

Locator	Precise information
H5-13	71 substantively correct decisions and 24 with hypothetical amendment, annulment or remittal for reconsideration; this is not an overall assessment of freedom from errors concerning all formal requirements.
H12-13	The 15 cases of amendment / termination include 12 per diem / jobready (of which one with a duration error) and three periods of activity (two duration, one internship by former employer in the same function).
H13	Ankestyrelsen assumes that specified job targets are the citizen's fastest way to employment. The assumption does not document an actual ex post employment result.
H11-13	None of the nine remittal assessments concerns people ready for activity. The report explains this by their distance from the labour market; this does not generally remove the requirement to document complete information on employment goals.
H18-19	None of the 95 offers are available to test under Section 54. All 95 are estimated to meet § 57- 58.
H14-15	No offers awarded under Section 53 (4) for social understanding or, by way of derogation, to the wishes of the citizen were examined. Trainees must not worsen health.
H27 / 37-38	Ankestyrelsen had no access to VITAS. Missing VITAS records are among the explanations for missing documentation; all 31 cases without signature information lack the submitted application form. This does not in itself prove that signatures never existed.
H34	Among the 48 without agreed follow-up, three are actually implemented follow-up with a business contact person. Agreement, plan and actual follow-up are different measurements.
H39	For extensions, a written indication of discussion exists in eight of 19 cases assessed as ready for activity; the continuation page must be read before the final table.
H39-40	Four of eight documented extension discussions indicate a sole-trader business; in eleven others the VITAS application is missing.
H41-45	All 72 decisions not independently located have deficient references to the legal basis. The Appeals Board assesses the deficiencies as remediable; this does not document actual reconsideration or redress.
H42- 44	23 awards solely in Min Plan without appeal instructions. According to the report, missing instructions suspend the appeal deadline until correct instructions are given; not in itself a ground for alteration/remittal.
H47-50	Selection from STAR's 25 municipalities with greater use in August 2020, by geography and size. Oldest decisions meeting the criteria after 1. August 2020, an equal distribution of target groups, also extensions for people assessed as ready for activity in November 2020.
H48-49	No subsequent call for missing documents, based on resource / delimitation choices. Preliminary study 10 of the same 95; completed forms locally consulted. No generalisation to national or municipal overall error level.

Historical Rule references

These are the rules and principles of the original. They are not counted as new investigations and are not automatically used as applicable 2026.

Reference	Locator	Defined content
LAB § 53- 54,57- 58,61	H7-13	Offers must target the individual's employment situation and the earliest possible self-support; work placements must have a specific purpose. Duration up to four weeks for unemployment-benefit recipients/people ready for work and 13 weeks for people ready for activity, with special conditions for extension.
LAB § 59	H8-10	Precise purpose is agreed between citizen, company and job centre. My plan does not replace a decision and complaint guidance.
LAB 548 of 7 May 2019	H3-4	New Employment Act entered into force on 1 January 2020. The investigation concerns decisions taken in August 2020.

Reference	Locator	Defined content
LAB § 61 stk.2	H21-23	Activity Parate can be extended up to 26 weeks on the basis of a concrete assessment, then for special needs not more than 13 weeks at a time. No extension of benefit / job-ready.
BAB § 61 stk.2-3	H23-26	Last place of work excluded from benefit / job ready. Activity Parate requires other working functions documented in the agreement. Repeated internship in the same place requires specific needs and distinct functions.
LAB § 40-41; BAB § 51	H35-36	My plan must be prepared / updated by offers and contain where, when, why and current status.
LAB § 63; BAB § 65 stk.1 -8	H36- 39	Limitation of proportionality: one person per five ordinary employees up to 50 employees, then one per ten; always the possibility of one. Full-time fractions, four previous months' average, excluded grant employees and less than 18. Written statement before establishment; representative thierarchy and over three days' absence.
BAB § 62 stk.1	H32-35	Follow-up as part of individual contacts and necessary employer involvement.
LAB § 63 stk.2; BAB § 64	H39	For work placements exceeding 13 weeks, discussion and a written statement from the employer and employee representative are required.
Administration Act § 22-25	H41-45	Justification by a decision which is not fully favourable in writing; written justification may be required within 14 days of the oral notification. Complaint guidance with instance, procedure and time limit.
BAB § 129	H43	The report's reproduction requires notification of offers through Digital Post. My plan does not replace the decision.

Instrument and stage of execution

Blank fields, codes and illustrations are method information, not citizens' numbers. Actual correction, delivery and payment shall not be deduced solely from a follow-up decision.

Field	Locator	Meaning
1.1	B5	Municipality
1.2	B5	Case numbers; five code names, not five citizens.
1.3	B5	Case number; field name but no completed IDs published.
1.4	B5	Yes / no and grounds for withdrawal.
2.1	B5	Three LAB target groups.
3.1	B6	§ 53 met: yes / no / missing information.
3.2	B7	§ 57- 58: yes / no / missing information.
3.3	B7	Duration: yes / no / missing information.
3.4	B7	Extension: yes / no / unknown.
3.5	B7	Extension conditions: yes / no / missing information.
3.6	B7-8	Previous internship same company: yes / no.
3.7	B8	Same place of work: yes / no / missing information / not the same.
3.8	B8	Previous appointment of the same company: yes / no.
3.9	B9	Previous recruitment rule: yes / no / missing information.
3.10	B9	Overall substantive outcome: correct/amendment or annulment/remittal.

Field	Locator	Meaning
4.1	B9	Form of decision: written / My Plan / journal note / no / self-found / other. Code order 1,2,3,4,6,5.
4.2	B9-10	Complaint guidance: yes / no / self-employed advantage.
4.3	B10	Reason: yes / no / other.
4.4	B10	Invalidity concerning reasons: yes/no, remediable/other.
5.1	B11	Specifically agreed purpose: yes / no or unknown.
5.2	B11	Target code 1 pay hours, 2 specific competences, 3 job / training clarification.
5.3	B11	Tasks agreed: yes / no or unknown.
5.4	B11	Sub-measure: yes / no or unknown.
5.5	B11- 12	Follow-up plan: yes / no or unknown.
5.6	B12	Extension follow-up: yes / no or unknown / not extended.
5.7	B12	Company contact person: yes / no or unknown / unagreed follow-up.
5.8	B12	My plan: yes / no or unknown.
5.9	B12	Validity examined: yes / no or unknown.
5.10	B12-13	Reasonable signature: yes / no or unknown.
5.11	B13	Discussion of extension: yes / no or unknown / not extended.
6	B13	Summary for report example; no public case identification or actual subsequent power measurement.
Jump	B5	The instrument contains activation / deactivation jumps which are not published.
Note fields	B5-13	Subfields explanations are recorded, but completed forms and individual data have not been published.

Concrete remains and evidence chain

The identified public table / annex residue is closed. Specifically not published: completed individual forms, VITAS originals, industry jumps, unique person / case combinations, full received / reserve flow, appeal status, actual resumption / modification / termination and full subsequent recruitment / salary loss. Necessary requirements are action-based correct decision, precise justification and guidance, as well as evidence of effective implementation; personal responsibility and compensation require simultaneous action on concrete progress.

The source chain is the original table or case summary → delimited error → the stated historical rule → the act or omission of the municipality → concrete significance for performance / testing → responsibility and requirement for act-based correct decision as well as documented effectiveness. Actual loss, guilt and personal union require the separate documents specified. The assessment by the Authority is not merely proof of its own correctness.

Pension without rehabilitation team 2019: full originals and control limits

PEN19F / PEN19BF. All 41 + 27 = 68 physical pages actually RAM-read, five main and six attachment pages visually controlled. All 6 numbered tables and 5 figures; with two prosa -number blocks 13 blocks / 98 data rows. Same 100 cases as previous main control.

Limitation

100 cases from 10 municipalities, 36 refusals/44 obvious cases/20 terminal cases. Target of ten per municipality +three reserves, actual uneven distribution 8-12. Decisions from 1.10.2017; already appealed cases excluded. A shortage of cases meeting the criteria is filled with the most recent cases regardless of type and from other municipalities. The actual total received/replaced is not printed (PEN19BF5-8). STAR selection figures are indicative and constitute a separate population.

Questionnaire October-28 November 2018: 97 / 98 municipalities, one response per municipality, validated with municipalities. Two binding collaborators are kept as municipalities. Pilot test three municipalities / pilot analysis three cases are not additional cases of error.

The check omits formal facts, explicit consultation / complaint guidance (PEN19BF8- 9). Therefore, 96 is not an objective of full legality. Two remittals for reconsideration are hypothetical; two awards by wrong decision are not automatically incorrect pension rights.

All published tables and figure cells

F2.1: Overall municipal decision

PEN19F PDF12; N=97; unit municipalities. One municipal response; responses overlap in F2.2-2.4. Not decisions or people.

Concrete progress

IDs are own page tags, unpublished file numbers; several observation tracks may relate to the same citizen. The table is not a personal union.

Own ID	Main PDF	Compact facts	Assessment / own calendar calculation;
L22	22	Middle-aged woman; sick leave 2007; second course of resources; internship 5 hours / week	Lack of support / follow-up; AS correctly assesses refusal of available evidence
L23	23	Female 60s; sick leave 2006; resident adult autistic child; resourceMay 2018	The burden of care / support needs to be clarified prior to work ability; AS assesses refusal correctly
L25	25	Female; 30 years of labour market; sick leave 2009; internship 3 months in 2016; home clarification 2017	Functioning almost immaterial; AS would remit to the team, no pension entitlement finally determined
L26	26	Female; anxiety / depression / abuse; course 2018 only two appearances	Non-attendance for treatment: motivation or lack of ability unresolved; AS would remit
L31	30-31	Male with severe brain damage; status after coordinator informs treatment exhausted	Pension materially correct, but missing new coordinator / team

Own ID	Main PDF	Compact facts	Assessment / own calendar calculation;
L32	31-33	Male 20s; schizophrenia / ADHD; about 2 years of practice during abuse; no offers since Jan 2015	Opposite medical assessments; AS requires team, not automatic withdrawal of pension
L34	34	Female 60 s; COPD / pain / cancer; clarification of interrupted health	Resource course possibly harmful according to doctor; AS assesses the award correctly
L36	36	18 years; cognitive level 4 years; helps 15 hours / month	Pension from 18 years
L40 a	40	Female with terminal cancer; coordinator seeking additional home help information	Overstatement, not incorrect material attribution
L40 b	40	Terminal 7Jun 2018; Coordinator 4Jul; Decision 12Jul 2018	35 calendar days from already documented terminal status to decision
L41	41	Terminal Document 6Nov 2017; Medical Adviser 16Nov; Decision 30Nov 2017	24 calendar days; undue medical consultant

Own analysis: time and guarantees

The six early retirement young people are a separately documented injury indicator within the award cohort. One waited 47 months after 18 years, five 1-4 months. The eight with appropriate effect from 18 years also include two decisions taken three and six months later, but with retroactive effect. The settlement time and economic impact date must therefore be shown separately; retroactive performance does not prove the absence of temporary stress. Actual payment and additional compensation are not documented in this original.

The terminal run of June 7 → 12 July 2018 shows 35 days from known terminal status, where further co-ordinator opinion was unnecessary according to the report. It must not be overruled by a general three-month period: compliance with time limits does not preclude the verification of unnecessary waiting time after sufficient evidence has already been provided. The separate 24-day course includes a directly prohibited medical consultant, although the award is properly classified.

Specific demands are the original measurement form, a complete timeline from known information to commencement/decision/effect/payment, a back-payment account, possible reopening and accountability consequences. No withdrawal of pension or person count is inferred from the two procedurally incorrect awards. The known gap in public reading coverage of the main report and annex report is closed; individual redress and exact unpublished times require case-record data.

Additional expenses 2014: full original tables and citizens' programme

All 74 physical PDFs pages actually RAMs text read; PDF13 / 17 / 20 / 27-30 / 58-60 actually visually RAMs controlled.

The same 75 cohorts as previous additional expenditure module; tables and examples are not extra cases. Diagnosis tables count several checks per case.

130 convened / 117 received / 75 selected; 16 → 15 municipalities. Decisions after 1.12.2009 and subsequent May-June 2012. Persons covered, not the amount of benefits. The appeal and forwarded to the Board excluded. No additional act is expected; AS bases the submitted act. Submitted copies are shredded after reporting (PDF62), not the municipality's own records. VUM-specific requirements not tested (PDF21-22).

Original conflicts

• Head 2.4 = 52 / 13 / 3 / 7; municipal annex 2 = 51 / 13 / 3 / 8.

• PDF17 prose: all 39 covered have severe functional impairment; T2.8 = 28 yes / 7 no / 4 unknown. Visually controlled.

• T2.9 repeats T2.8,although the section concerns assistance measures; no new measurement of assistance measures.

• PDF26:36 covered 52%/39 refusals 48%, reversed against main tables 39/36. PDF26 says one diabetes refusal, but T2.3 has 3.

• T2.3/T2.7 notes say 39 cases; the refusal population is 36,with 67 overlapping diagnostic checkbox selections.

• Citizen involvement summary PDF5 = 95%, bread text PDF22 = 96%; raw 72 / 75 = 96%.

• Home May 2014; kolofonPDF3 / 31 March 2014; hearing 4-25 April 2014. Version dates shall be retained.

• Fig 4.1-4.4 visually read: no exact number labels; underlying graph cells not invented. Figure 4.2 / 4.4 repeats the time distribution.

Independent impact and evidence analysis

Cases 024 and 011 document published refusals that Ankestyrelsen assessed as substantively incorrect. They provide specific evidence of the risk of lost compensation where there are severe functional limitations. The published assessment does not, however, document when the citizen actually obtained an altered decision or received the money. This requires the municipal reopening decision and payment history.

A combined 2011/2014 error count cannot be constructed from the printed percentages. Both samples' selection and the changed diagnostic composition must be retained; the explanation concerning less complex cases is Ankestyrelsen's assessment, not an independently proved causal analysis.

42 individual grounds for discarding received but not selected, 13 non-delivered cases, 16. commune, raw graph cells, completed 75 measurement forms, actual resumption / post-payment / personunion have not been provided by this public original.

Own source criticism and citizens' consequences

Table 6 has 13 no / 14 irrelevant, while municipality table 1.9 has 14 no / 13 irrelevant. Table 1.18 total 46 + 18 + 15 = 79, although the denominator is 80; the third column of the commune totals 16. Table 5 has 16 irrelevant and presses 19% where 16 / 80 = 20%. Table 6 presses 18% for 13 and 16% for 14. The deviations are visually controlled and maintained. Table 13 is recycled for two different measurements. Termination examples 39 / 42 PDF29-30 have date 31.12.2012 in the course of decisions January 2012; these dates may not be tacitly rewritten.

Our evidential scrutiny: the total of 76 is the reviewer's conditional outcome, not 76 completed complaint cases or payments of arrears. The board states in PDF4 that it could not reopen of its own motion. A municipal promise to change practice concerning competence in PDF31 does not document reinstatement of the 12 specific citizens' benefits. Errors in reasons 14 and absence of appeal instructions 9 include 7 decisions not communicated at all; they must not be summed as 30 people. Unclear guidance on regaining entitlement is accepted in 6 cases, and deficiencies in reasons/job plans are partly not included in the overall error indicator. The 95% figure therefore cannot be treated as an exhaustive record of all procedural errors.

Documented consequences: in case 77, payment for October 2011 had not been made before the decision on 24.11.2011; in case 11, re-registration and new assistance are refused following non-attendance; in case 67, two weeks of attendance are required before reconsideration without identified legal authority; case 39 requires repayment for December 2011 despite first non-attendance on 5.12 and actual attendance. The report examples are the reviewer’s accounts, not the individuals’ own records. Necessary demand: municipalities must disclose original decisions, payment/back-payment histories, reopening decisions, affected spouses/children and a specific assessment of responsibility for each case ID.

The 14 employment-interview cases excluded and the 4 cases removed are different populations; the 4 cannot be added to 76 as proven invalid cessations.84 original submissions plus 10 replacements give 94 submission occurrences, not 94 unique affected citizens. PDF43 plans destruction of submitted records after reporting; seek the original municipal case records and the retained measurement dataset at Ankestyrelsen/Rigsarkivet.

6. Handicap, equal treatment, environment and other practices

Controlled 7.10.2026. The physical PDF page is used. Raw counters are preserved by source conflict; no uncritical harmonisation. Measurements of different requirements in the same case overlap. The studies include selected decisions, not all citizens with illness, dementia or disability.

Cash benefits and wealth, January 2014

Original 65 pages: https://viden.sl.dk/media/6876/ankestyrelsens-praksisundersgelse-kontanthjlp.pdf. SHA256 49dccfce343ea6b3e562625de17527787d426d4eb0d46be0e0621d70127b9c29.

155 requested, 137 received, 7 excluded, 130 examined in 14 municipalities. Most recent decisions before 10.5.2013; 18-65 years old. Appealed and forwarded to a board excluded. Excluded:2 grants, 1 without a decision, 1 withdrawal, 1 appeal, 2 uncertainties about personal scope. Pp. 38-39,52-53. Some municipalities located cases from memory; one submitted none because of deficient registration. The basis for repayment and the correct length of the self-support period were not examined,p. 4. The 47 partly correct asset assessments contain calculation deficiencies, even though the outcome of the refusal is assessed as correct.

Party consultation yes / no / irrelevant	26/3/101	130; relevant 29	T4.4, p. 35

Main tables checked; municipality-row outcomes on p. 42 total 116/14/130. The factual-basis annex PDF43 has now been fully reconciled row by row and visually in praksis-formue2014-fulde-kommunebilag.md; the same 84/38/7/1 and 130 cohort. S4-5/T3.6 shows that a low overturning rate must not be presented as an overall error rate.

Rehabilitation teams, October 2014

Original 112 pages: https://www.kk.dk/sites/default/files/agenda/a9c0cb4f-2fdc-41f3-b83e-09880a5e4ea9/b91d566a-db66-456d-8f2e-cfadfbf1ac11-Annex -1.pdf. SHA256 7a7c49c76a0f1d2f53ebcf323a4ecac6f129e2d3f77b4a69e6894409e7a08e24.

150 requested, 143 received, 4 excluded, 139 examined in 10 large/larger municipalities. Grants:49 flex jobs, 53 resource programmes, 37 other measures; refusals/pensions excluded. Request letter 1.9-1.12.2013, pp. 98-100; the summary says quarter 4 of 2013,p. 5 (period conflict). Appealed and forwarded excluded; amended on reconsideration without forwarding allowed. Additional records received from 5 of 9 municipalities contacted; missing decisions not obtained. Ordinary party consultation/appeal guidance was not the study's focus,pp. 81-83.

Measurement	Figures	Denomination	Locator
Overall correct/alteration-remittal/no decision	107/21/11	139	s 6-7
Material error / formal error alone	20/1	21 incorrect	s 7
Adequate / insufficient / untested information	100/17/22	139	s 7
Sex woman / man in the cases	85/54	139	s 84

The full check in praksis-rehabilitering2014-fulde-tabeller-og-borgerforloeb.md now covers all 112 original pages and 31 main tables as well as 2 municipality tables. Clarification:11 cases WITHOUT an actual decision are included among 26 assessable cases concerning other intervention because the Appeals Board assumes that the municipality followed the team (PDF67-69). A further 11 case steps have not received a main assessment. The two groups must not be conflated, and neither represents 11 actual overturnings.

Use of force against people with dementia,2015

Original 183 pages: https://www.kk.dk/sites/default/files/agenda/68f01f0d-7282-4233-9625-849e77f0ca06/b6c71b37-68c-40e7-afeb-e7c45f3a6f5b-Annex -1 _ 0.pdf. SHA256 59334a225ac2dd69386cc718cee0734db7383d0faab1efbf2841a3c2833e87b2.

112 requested / 14 municipalities; 106 received; 49 left, mainly § 125 and § 126 a which were outside the practice test; 57 cases / 13 municipalities. Latest before 31.12.2014. Appeal and forwarded excluded; reassessment modified without transmission allowed, PDF116- 118 / 149. The questionnaire all 98 municipalities, 86 replied in full / in part, with changing questions. Two explicit three-case groups for the same citizen mean that 57 cases do not involve more than 53 unique persons before any additional clutches. Case study and questionnaire are different populations.

Measurement	Figures	Denomination	Locator
Correct/amendment-remittal for reconsideration	27/30	57	s 6

Parents / guardians typically agree, the municipality's own answer	74	80	s 9

The entire 183-page original has now been read in RAM in praksis-demens2015-fulde-tabeller-og-indgrebsforloeb.md/.json:87 reading tables/461 rows, all 12 numerical figures and the municipality annex, annual statistics 2012-14, methodology, summaries of precedent decisions and blank forms. 26 pages have been visually reconciled. The source's conflicting total and percentage cells are retained. No national union of people, employees' guilt or actual redress can be inferred from 57 cases. Not all municipal records could isolate dementia from other individuals.

Rare disability and acquired brain damage, 2015

Original 158 pages: https://www.kk.dk/sites/default/files/agenda/a72b4d38-79b7-4b7a-a07d-6fa6d86360c2/606f6151- 5d5d-4a92-981f -9373f42c8bce -Annex -1.pdf. SHA256 1b1ad88416f1254363915d0863aa96d23ca9de85df0d49405aba8b7a109bf0da.

120 requested, 101 received, 3 deleted, 98 examined / 24 municipalities; 44 rare disabilities, 54 brain damage. Latest 1.1.2013- 1.10.2014, s 103 / 130, while summary s 6 indicates 1.7.2014 (conflict). Call letter s 131 says 25 municipalities, actually method 24. Not random selection: the municipality's knowledge of the target group governs. Appeal and forwarded excluded, reassessment modified without transmission allowed. Additional material assessed, p. 5. Latest 94 appropriations / 4 refusals; three-year history mapped, p. 6 / 103-104.

Same, brain damage	3/0/6	9	T7.6, p. 100

Visually checked conflicts in the original: the summary on p. 7 states 35 correct/19 incorrect brain injury cases, but T2.1 gives 34/20 and reconciles the 59/39 total. P9 confuses percentages with counts:37/28/35 sum to 100; T2.9 shows 36/28/34=98. These are not two additional individuals. Missing assessment of assistance needs 36/98 is separate from 39 overturnings; no known union. T6.5, p. 91 has 79 extension cases, while the prose says 9; the denominator requires separate documentation. All 158 pages of the original, all outcome/municipality tables, numerical figures and form annexes have now been checked. See the full disability 2015 module:92 reading tables/461 rows, 33 visually checked original pages and 40 local case IDs. The same 98 cases; no additional cohort. Actual subsequent assistance/moving dates and person linkages are not published as completed tables.

Form 2014: municipal annex and age / gender figure fully aligned

This supplement closes the specified municipal annex residue at the same 130 case cohort. Method / Annex PDF38-65 is read; PDF41 / 43 is visually controlled in RAM. Empty original cells appear as -, not as a printed zero. Row-N and column totals are retained.

Method and limit of evidence

155 requested→137 received→7 excluded→130 measured. The 7 excluded=2 awards+1 no decision+1 withdrawal+1 appealed+2 doubts about eligibility. 15 municipalities were invited; 14 have a measurement row. Cases already appealed/forwarded are excluded. The original assumes all records received and does not request missing documents. The letter states that submitted copies are shredded after final reporting; this does not document shredding of original municipal case records. Only the asset basis for refusal is examined, not the length of the self-support period or the basis for repayment. 116 correct therefore is not a declaration concerning all statutory requirements.

Own voting: the municipal columns give 116 / 14 / 130 and 84 / 38 / 7 / 1 / 130; the figure gives 69 men / 61 women. No new case / person sum is added to earlier 130. Lack of effective payment, loss of income and individual responsibility requires the original records and subsequent follow-up.

Rehabilitation 2014: full tables, annexes and documented citizens' programmes

The entire 112 pages original is actually text read in memory. VisuelRAM control: PDF7-9,11-12,74,85-86,96-97.This expands the control of the cohort of the already registered 139- case; there is no additional population.

Control limit

150 requested → 143 received → 4 removed → 139 cases: 49 flex jobs, 53 resource courses, 37 second rates. Decisions 1.9.-1.12.2013 from 10 major municipalities. All appeals and forwarded to AS have been omitted; modified remonstration without forwarding included. PDF81-83,98-100.

107 correct/21 would be amended-remitted for reconsideration/11 not assessable state the main measurement.Formalities such as hearing the parties and appeal guidance are outside the focus; AS did not obtain missing decisions. 11 of 26 assessable cases concerning other intervention lack an actual decision; AS assumes that the team recommendation was followed. 22/37 were not examined for sufficiency of the factual basis.Six partly followed resource-programme recommendations and two other interventions are regarded as valid on the separate question of resubmission, which had not been resolved as a matter of principle. 13 deficient intervention components expressly do not automatically entail an invalid award.PDF58,66-69,79,83.

Submitted COPIES were to be shredded after completion; this is not evidence of deletion of the municipalities' case records.PDF99.

Number recording

The number and print percentages are kept each for sight- is an empty original cell; 0 is a printed zero. Tables / figures must not be added up as new cases. Figure percentages do not give exact integer figures.

Methodology and population

Field	Original numerals and locator
Selection	150; 143; 4; 139; PDF82; 10 municipalities, 50 desired by each type; substitution between types
Demography	54; 85; 139; PDF84; Women 85 / 139 = 61,15%, prosa 60%
Assessment coverage	107; 21; 11; 139; PDF96; 20 materially wrong and 1 only formally wrong, PDF7
Adding	9; 5; 10; PDF83; 9 municipalities were lacking acts; 5 provided nothing; no case-N for acts
Action part	40; 13; 53; PDF12-13 / 57; 13 low / none, not automatic main failure
Non-disclosure	22; 37; PDF69; 11 without effective decision + 11 action
Settlement assumption	11; 26; 37; PDF67-69; 11 of 26 evaluable without actual decision
Partly followed settings	6; 53; 2; 37; PDF66 / 79; 6 resource + 2 second rate, not total

Original deviations

Block	Locator	Deviation
5.4	PDF74 visual	24 + 15 = 39, printed total 37; 65% + 35% = 100%; retain all original cells
1.1/4.7	PDF13 / 57	The same 4 cases are 8% early / 7% later; 4 / 53 = 7,55%
3.3 / F1.2	PDF29 / 8	Decision 8 / 49 printed 17% in Table / 16% in Figure; no missing 27 / 49 printed 56%
3.9	PDF43	32 / 49 = 65,31%; printed 66%
4.10	PDF64	N51 versus 53 resource cases; the reduction must not be harmonized away
BF1 / BF3	PDF84 / 86	85 women / 139 = 61,15%; prosa 60% opposite figure 61%
Rule version	PDF98-112 / 88-95	Decisions 2013 and measurement form 1418 / 2012; production / reprint 814 / 2014; not redating the case rules
Partial follow-up	PDF71 / 79	Case 13: amendment/remittal for reconsideration due to the factual basis; subsequent statements of validity concern the separate question of resubmission

Case code chains

18 single example codes; several locators by the same code are the same case. Family members have no common staff key or independent misunion.

Code	PDF	Age / gender	Time	Documented item
77	29-31	39 / M	2010→2013	Expected MRI result missing at team meeting 3.10.2013
8	31	52 / M		External work clarification missing
93	32-34,41,44	33 / K		25 hours considered inadequately reduced; repeat same code
90	34-35	50 / K	2010→2013	Physician warns about worsening at work
78	38-39	36 / K		Three children; one with Down; unclear clarification and treatment
91	39	55 / M		Practice nine hours alone citizens' statements

Code	PDF	Age / gender	Time	Documented item
73	47,53,56	29 / M	three-year programme	Medical certificate without consultation; mentoir / accommodation in the setting
85	50	28 / K	one-year programme	Treatment and development limited to validity
104	50-51	21 / M	five-year programme	Low cognitive level; planned support not documented
20	51-53	52 / K	25.1.2013→28.1.-22.3 .2013	Disrupted and new work tests despite exhausted medical treatments
4	56-57	41 / K		Deficient certificate assessed against other information
64	59-60	42 / K	18-year-old dependants,	No concrete action part; future meeting 29.1.2014
61	60-61	38 / K	2011/2012	Disrupted training courses; imprecise targets
100	61-62	52 / K	26.1.2012-30.6.2013	Four-six hours / week; unlasting effort and mentor
13	70-71,79	47 / M	2000-2005/2007	History of torture; neuropsychological assessment recommended but not followed up; disability-pension decision NOT examined
140	72-73	43 / K		Mother to three children, two under 18; illegal requirement for exhausted treatment in resource management
98	75-76	38 / K	March 2008 on sick leave	LES265 missing; action taken; actual implementation not disclosed
112	79	53 / K	New Team Assessment after 3 months of planning	Practice and conversations initiated; mentor not documented

Independent analysis and necessary legal consequences

The headline figure cannot be used as complete certification of lawful processes for individuals. It excludes review of particular safeguards and accepts some deficiencies without counting them in the main error. This reduces the statistics' scope; it does not remove the documented deficiency. For a specific demand, the original decision, the significance of the safeguard error, the intervention carried out and the actual subsequent correction must be connected. A missing decision requires a decision and access to effective review; a hypothetical remittal does not document that it actually happened.

Documentation residue

No identified unread original pages in this 112 page's version.139 full directories, dedup against other years, actually subsequent correction / replacement and raw data backgraph without cells require separate material.

Demens 2015: full tables and concrete action programmes

Controlled 7.10.2026. The entire 183-page original is read in RAM; 26 original pages are also visually controlled. The 87 reading tables contain 461 recorded rows, including repetitions and the own section of the summary. The numbers of the tables are different measurements of the same sample and must not be added to persons.

Original: Anchors' Demense Survey 2015. SHA256 59334a225ac2dd69386cc718cee0734db7383d0faab1efbf2841a3c2833e87b2. PDF page is physical page; the printed header page is usually PDF page minus 3. No original PDF, full text or image is stored locally.

Documented result and citizen consistency

The Appeals Board assesses 30 of 57 cases as incorrect. This is a hypothetical appeal assessment, not 30 actual overturnings. The specific documentation includes locking a person in for 10 minutes, use of a restraint belt without documented necessity, forced injections and 11 insertions of a nasogastric tube over a couple of months. Each of two three-case groups concerns the same citizen; 57 cases therefore cannot be described as 57 unique people. The explicit links give an upper limit of 53, not a verified exact population.

The strongest documented criticism is that interventions against people with a weakened ability to complain themselves were not sufficiently justified, individually tested or followed up. The report's correct municipal judgment could be precisely the denial of illegal power. It must not be rewritten as meaning that all actions in the 27 properly assessed cases were lawful.

Limitation and evidence chain

Search	Control and delimitation	The original locator
Sample	112 requested in 14 municipalities; 106 received; 49 left; 57 cases measured from 13 municipalities. Frederiksberg's cases dropped everyone. The most common dispositions were § 125 and § 126 a.	PDF116-119
Exclusion of complaints	Cases already appealed are forwarded to the Ankestyrelsen should be excluded. Local authorities changed cases after re-assessment, which were not forwarded, could be included.	PDF116 / 149
Time-out	Recent decisions before 31 December 2014, then backwards; about 2 of each of four types. Transmission deadline 3 March 2015.	PDF116 / 148-149
Passenger coupling	101 / 102 / 103 is one citizen; 82 / 83 / 84 is another. Therefore, a maximum of 53 unique persons among 57 cases before any additional clutches. The report does not publish a full list of persons.	PDF80 / 84 / 88
Survey	86 out of 98 municipalities answer in whole or in part; 81 examine the whole scheme, but not all questions. Five partial answers: Haderslev, Læsø, Hallsnæs, Hjørring and Køge. Questions have their own denominators.	PDF120-121
Missing survey	12 Unanswered: Dragør, Gribskov, Rudersdal, Lemvig, Syddjurs, Horsens, Billund, Jammerbugt, Morsø, Mariagerfjord, Ishøj, and Brønderslev.	PDF120
Validation	Only selected very high / low reporting figures were requested. Other figures and totals were not systematically validated. Qualified estimates were allowed.	PDF121 / 174 / 182-183
Annual denominators	All years of response and the committee with replies for all three years are different statements. Each type of action has its own municipal congress. The total row is the separately lit total of municipalities and is not to be replaced by the row number.	PDF42-46 / 144-147
Legal scope	The assessment covers § 126,§ 127,§ 128 and interventions outside the Social Services Act. Reports of already approved § 127/128 interventions have not been individually assessed; approval cases are included. § 125/129 are examined through a survey,§ 126 a at an overall level.	PDF4-6 / 64 / 119
Full basis	Ankestyrelsen assumes that all relevant acts have been received. The letter says that missing documents are not normally requested and copies are shredded after reporting. This does not prove completeness.	PDF119 / 148-149
Time of registration	Frequently read on the date of the reporting form. A previous note could not be excluded but was not visible. It is a documented measurement restriction, not a general presumption of timely registration.	PDF103
Actual duration	Time in a harness and the residential facilities' more detailed supervisory frameworks could not be measured. Four detention permits were time-limited, but ongoing examination of less intrusive measures was not documented. A harness was permitted for 3 months.	PDF90-91 / 96-98
Repeals	18 cases had repeated interventions; 37 had unknown history. Only 1 of 18 documents follow-up; 5 none and 12 unknown. These aren't 18 unique people.	PDF77-79
Redress	Blank measurement form has dates for intervention, registration, reporting, municipal assessment, application and decision. No complete public data sector for actual cessation, relocation, compensation or individual liability is found in the original.	PDF152-166
Policy follow-up	Municipal council consideration under § 79 a of the Act on Legal Protection and Administration in Social Matters and feedback in quarter 3 of 2015 are stated. This does not document actual reopening or cessation of the individual interventions.	PDF115 / 150
Self-reporting	The municipality's description of the agreement or its own guidelines is not verified citizen / oncoming responses or documented actual compliance. One 'each time' reply itself states that the frequency of use of the permit may not necessarily be disclosed.	PDF61-63
Schemes	Annexes 7 and 8 are blank instruments. Cross-boxes are not citizens. Question 10 (a) repeats the task of decision; 32 has 129 but not 128, while the results tables have 128 and not 129.	PDF152-183
Praxis Minutes	27 summaries of precedent decisions are kept separate. They are not 27 new 2015 cases or an individual register checked against complete records; material before 2006 is not included in the period's case count.	PDF133-143

Search	Control and delimitation	The original locator
Statistical range	The original denotes the trial as not statistically significant. There is no scaling-up for all dementia citizens, alerts or employees.	PDF119

All published tables and figures

Printed percentages and total amounts shall be retained even when the original is contradictory. Categories may overlap, and their own denominators are at each table. § 126 is acute retention; § 127 retention / return; § 128 drug harness; § 129 movement without consent. 'Not authorised' does not necessarily mean illegal: emergency intervention may lack prior authorisation and still fulfil its own conditions.

Summary municipalities: local authorities' self-enlightened practice

Concrete procedures and identity couplings

The following are their own brief summaries of the original case summaries. The underlying individual acts have not been published in the report. Source statements about behaviour and injury causes attributed to the report and are not an independent full-scale test.

Local case ID	PDF Page	Progress and follow
79	68	Two employees maintain arms after entering the residence of the other residents. The AST considers risk, absolute necessity, cooperative experiments and processes undocumented.
62	68	Refresh wheelchair: concrete material damage, fall rate / injury and alternatives not documented.
52	71/72	Lifting by force after falling without immediate medical needs; the municipality overlooks due to lack of personal injury risk and volunteering; offers education.
24	73	Sele approved simultaneous proposal comfort chair; AST finds testing should be before permission.
30	73/96	Night-time restlessness: restraint belt with alternative calming suggestions, but alternatives should have been clarified before approval. Permission for 3 months at night, round-the-clock attendance; the alleged countless falls are not found in extensive medical records, AST finds that the conditions are not documented.
48	74/91/92	Infectious unclean citizen, permit power; concrete more frequent supervision before meals alternative. AST finds the wrong Article 127 legal basis: internal transfer does not exit the settlement.
86	75	Two employees lead woman from the city to residence; the municipality simply signed, no separate assessment; AST points to diversion / accompanied walk.
47	76	Door-seeker without ID / light dress by traffic-driven road; GPS / alarms inadequate, need more suitable dementia section; no public actual moving date.
51	78	11 nasogastric tube insertions against the person's will within a couple of months. The municipality finds no legal authority under SEL and provides advice/training. No documented cessation date or redress.

Local case ID	PDF Page	Progress and follow
33	79/80	Maintenance and soothing injection, reported with 6 other interventions within 1 month. Citizen dies later; AST also requires evaluation afterwards; the report does not prove cause of death.
101/102/103	80/87/88	Three cases the same citizen, repeated retention / driver's own residence, inadequate municipal follow-up.
82/83/84	84/87/88	Three cases the same citizen goes to former homes; the action plan describes daily rhythm / escorts and demealing.
64	88/89	Described with broomstick impact on wheelchair user after pending action; AST finds acute risk / necessity.
91	89	Described as the rusk / turn / push against wall; short retention after conversation, AST approves.
96	89	Self-injury head against wall / floor with wound; retention after pending guidance, voluntary hospitalization follows; AST approves.
28	93/94	Door locked 10 minutes after return. The municipality accepts Section 127; AST finds illegal detention without a SEL legal basis.
42	97	Selenium after proven repeated falls and tested alternatives; AST finds concrete permission correct.
57	99	Soil / plant removed by force from the mouth, AST accedes exceptionally distressed against asphyxiation / poisoning.
32	99/100	Held in bed and injected after door search. The municipality / AST finds outside SEL; acute life-threatening exception not documented in two of three health cases.

Principles contained in Annex 4

The minutes are not a new case committee. Age, number and time data are kept outside the 2015cohort; original single acts and any actual movement / return cannot be derived from this.

Principle ID	PDF Page	Legal result of the report	Number / time of record
C-10-02	133	Approval alert / detention	Age 28;2 exits through windows;2 visits by strangers; staffing coverage throughout the day and night
C-35-00	133	Signature alert / restraining order	Age 43;8 months, application, versus the measure's 1-2 weeks; absence in hours
C-14-08	134	Internal screen 126 not 127	No separate N
C-59-05	134	Locking not under SEL; delimitation of jurisdiction	No separate N
57-10	134	Selenium approved underbreak healing / rehabilitation	47 years
C-36-00	134	Selenium overruled both cases	2 cases
6-15	135	Guardian cannot replace citizen consent to new accommodation	SEL107 also temporarily
65-14	135	Specific vacancy required	1 example of a rare diagnosis
53-13	136	Relocation/free choice also on institutional closure	no separate N
20-11	136	Movements to wife / family approved	1 brain injury
19-11	137	Moving closer mother denied without documentedeffect	1 young woman
C-20-07	137	Relief → permanent at the same address requires rules	1 woman

Principle ID	PDF Page	Legal result of the report	Number / time of record
C-5-06	137	Not opposed, guardian agree, municipality competent	1 woman
C-10-05	137	Admission accepted	Age 90; round-the-clock care
C-45-04	138	Uncertainty is not grounds for a different jurisdictional track	1 woman
C-42-04	138	Admission accepted	81 years; at least 2 non-eligible
C-36-04	138	Admission denied, alternative help not clarified	36 years
C-12-04	139	Admission accepted	76 years
C-28-02	139	Relocation set aside, physical space problems do not constitute sufficient risk	1 woman Down / dementia
C-1-02	140	Department move set aside	1 woman
C-49-01	140	Admission set aside, plus missing guardianship safeguard	82 years
C-26-01	141	Councillor → municipal rules	1 person
C-29-01	141	Sheltered→ordinary in the same nursing home; rules required	1 person
C-34-00	141	Recording accepted	Age 66; care throughout the day and night
C-33-00	142	Recording accepted	43 years
C-26-00	142	Recording Unrecognized	64 years; 3 episodes 1996 / 2000
C-21-00	143	Recording Unrecognized	77 years; schizophrenia 1950; 6 entries from the 1980s / barely 20 years old

Source deviations retained

Locator	Deviation
PDF21-22	15 / 35 printed 43% against bread 44%.
PDF30T4.2	Unwritten 6 / 83 printed 6%; percentages 90 + 6 + 2 = 98.
PDF43T4.10	Total 2000 → 1509 → 1233 decreases, but summary PDF8 and bread text PDF42 says increase.
PDF43-44T4.10 / 12	Approved total 2406/1784/1612 exceeds reported total 2000/1509/1233;53 municipalities in both, but identities/counts not public. No inference from the difference.
PDF44T4.12	53 municipalities in total, outside the note's range of 45-51; type cells 45-50.
PDF47-48	Annual policy report coordinates 42% in Figure, 44% bread text; summary 34 / 81.
PDF45-46	Non-approved total response 58 / 49 municipalities lie without type ranges; text 48-56 modT4.14 type 38-44.
PDF59-60	T7.1 / 2 total 81 counternote 80; T7.2 yes 46 / 81 printed 58%.
PDF62T7.3	74 + 4 + 1 + 2 = 81 counterprinted total 80; 74 / 80 = 92,5 not 91.
PDF70T9.5	Note 57 municipalities are 57 cases from 13 municipalities.
PDF94T9.20	Bread text says 10 / 53% met, 9 / 47% not; Table T9.2 says vice versa.
PDF102- 104	Timely registration 9/34 printed as 27% against 26% in the main text; specifically 22/23 printed as 96% against 91% in the main text; the main text says the vast majority report on time,44% yes 32% unknown.
PDF172 question 10a	AogC repeats the decision § 125- 128; registration iB, self-form may give overlapping choices.
PDF183 question 32	The model form has 129 but not 128; the result tables have 128 but not 129.
PDF57F6.1	Note 47-56 municipalities, but the appropriateness bar 58.
PDF7 versus 74	Summary educational alternatives 30; T9.8 cell 31. Two thirds is the rounded statement of the summary, not a published exact 36-person number.
PDF147	The original text / table is visibly staggered and overlaps. Numbers 568 / N53 and row cells read in both original text layer and RAM image; the original layout error is not report layout.

Legal liability and necessary follow-up requirements

The conclusion in case 28 is specific: the municipality approved locking a person in under § 127, whereas the original's description gives a locked door for 10 minutes and the Appeals Board finds an intervention without legal authority under the Social Services Act. The significance of the evidence is an actual interference with personal liberty, not merely a deficient document. The historical legal framework in the original is Constitution § 71, Social Services Act §§ 82,124-128 and the delimited rules on the use of force. The staff's action and the municipality's subsequent approval are separate avenues of responsibility. Specific follow-up must require documentation of cessation, a review of similar incidents and consideration of redress; the original does not document that these legal consequences were actually implemented.

Case 30 shows an evidentiary conflict:according to the Appeals Board's review, the extensive record does not support the alleged countless falls, although a night-time restraint belt was permitted for 3 months. A hypothetical amendment in the practice survey does not establish an actual cessation date. Case 51 shows 11 forced feeding-tube insertions, and case 33 repeated interventions followed by a death. The report provides no basis for claiming that the death was caused by the use of force. Failure to prevent and municipal follow-up can be criticised separately without inventing medical causation.

For precise person, duration and responsibility counts, the complete local personal connection is missing, the dates of the beginning / end of each action, the actual reopening of the municipality after the examination, the effectiveness and any disciplinary, criminal or compensation consequences. The shortcomings lie in these concrete links; they do not tone down the documented interventions and errors.

Scope of checks

Pages	Contents	Actual treatment
PDF1-113	Main text, all resulttables and figures	Text read; all 11 shapes visually controlled
PDF114-121	Front page of Annex / method	Text Read
PDF122-123	Two municipal tables	Text and Image
PDF124-132	Historical legal annexes	Text Read
PDF133-143	27 principals	Text read, kept out of new kohorte
PDF144-147	Six annual statistical annex tables	Text and Image
PDF148-151	Call letter	Text Read
PDF152-166	Blank measurement scheme	Text Read
PDF167-183	Blank municipal questionnaire	Text Read

Visually controlled originals: 20, 25, 29, 31, 32, 43, 44, 45, 46, 48, 50, 51, 57, 58, 59, 60, 61, 62, 63, 94, 122, 123, 144, 145, 146, 147. The actual scope of the check is all published results, annexes and schedules; it does not document the truth of all municipal statements or a national personal union.

Rare Disabilities and Acquired Brain Damage 2015 - all tables and published citizens' programmes;

All 158 original pages have been reviewed in memory. The 92 reading tables below contain 461 rows of original numbers and percentages, including repeated figures and conflicting cells. It's the same 98 cases. The published case summaries comprise 40 different local case numbers; repeated descriptions of case 57 are grouped together. No additional population has been created.

Source: Review by the Board of Appeal, November 2015. SHA256 1b1ad88416f1254363915d0863aa96d23ca9de85df0d49405aba8b7a109bf0da. PDFside is physical page; printed page is usually three lower. All 158 pages are textual; the following 33 pages are also visually controlled in RAM: 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 21, 51, 53, 74, 75, 77, 78, 79, 80, 81, 84, 91, 92, 94, 95, 105, 106, 124, 125, 126, 136.

Committees, exclusions and denominators

120 cases were requested, 101 were received and 3 were omitted, 98 of which came from 24 municipalities. Of which 44 rare disabilities and 54 acquired brain damage. The municipalities' target group knowledge determined the selection; it was not random and is not a national estimate. Only the most recent decision was legally assessed; the three-year history was used to examine needs and continuity. ABL § 105 was added upon receipt. The delineation in Annex / call is 1 January 2013- 1 October 2014; the main section indicates 1 July 2014 as the end date.

Complaint cases forwarded to Ankestyrelsen were excluded. Municipal reconsiderations granting relief that had not been forwarded could, however, be included. The study therefore cannot be added to complaint statistics or reconsiderations without checking overlap between decisions and individuals. The benefit distribution 12/27/6/8/22/13/10 is mutually exclusive by the most recent decision; later section 83/85 tables include the six combined cases under both benefits.

Locator	Limitation
PDF 5-6	Decisions 1 Jan 2013-1 July 2014
PDF 5-6	recent non-contested to AS
PDF 5-6	not random sampling
PDF 5-6	later municipal material examined when the parties were heard

Locator	Limitation
PDF 103-104	120 requested(60 brain+3×20 rare);101 submitted,19 missing;3 excluded under the criteria;98 measured. Municipality size/municipal knowledge used for target-group selection, not random sampling.
PDF 103	Annex requires decisions 1 Oct 2014 and back before 1 Jan 2013; main chapter 1 Jul 2014 is second version limit, retained.
PDF 103-104	Only the legality of the latest decision; earlier decisions over three years for need/continuity. ABL 105(2) added after receipt. General municipal responses are not specific case decisions.
PDF 130	Forwarded AS appeals are excluded; decisions amended on reconsideration without forwarding are INCLUDED.
PDF 131 / 136	Notice 25 municipalities, compared with 24 in fact. The visually visible 24 municipalities of the Annex list are correct; the extra 25-36 of the text extract is not visible source data and is not counted.

Errors detected, aid and actual effect

Table 2.1 and the municipality table reconcile 59 rule-compliant decisions and 39 decisions that, in Ankestyrelsen's assessment, would be amended or remitted on appeal. Brain injury cases are 34/20 in these tables, while the summary states 35/19. A further 36 cases with insufficient needs coverage and 51 with other procedural remarks are described. The procedural-remark category does not in itself document invalidity in all 51. Overlap with the 39 substantive outcomes and 36 unmet needs is not published.

The specific cases show consequences that a decision percentage does not describe: a waiting list for support, assistance placed on a relative with a disability of their own, moving back to parents because of inadequate residential provision, support terminated without a written decision, and residential provision terminated without an alternative. These are the report's documented descriptions and Ankestyrelsen's assessments; underlying municipal records and actual subsequent redress are not published here.

An appropriation shall be counted separately from aid provided. The measurement form shall obtain the date of application and implementation, but the report shall not print the date table of complete 98 cases. A half-year waiting list in case 39 is an enlightened actual delay; planned relocations in case 4 / 75 / 28 are not proof of completed relocation. Case 59 refers to a complete return to own homes without date. No total person month sum can be calculated.

All original result cells

The percentage columns represent printed percentages, even when they do not match numbers. They have not been redesigned. An unmarked zero bar in a figure is not a separate printed number; where this is essential, it is explicitly indicated. Recurrence is shown by its own locator, but must not be summed up. The denominator is at each table.

PDF 74 F 5.1	Figure percentages match denominators other than 16/17 section 85; no printed figure denominator. No back-calculation as source fact.	Preserve original cells; no harmonisation.

Locator	Deviation	Management
PDF 81 F 5.3	Brain gas percentages 25 / 50 / 75 under Note 14 = 9 + 5 cases; none corresponding to 5%.	Preserve original cells; no harmonisation.
PDF 105-106 B 1 fig 1-3	Fig. 1 sex/age heading covers diagnosis. Fig. 2 colour legend Women 51%/Men 49% overall versus body text 50 men 51%,48 women 49%. Reproduce both; do not swap them authoritatively.	Preserve original cells; no harmonisation.

PDF 136 shows visually only 24 municipalities. The additional 25-36 section of the text extract is not visible in the document and is treated as extract card. It's not really an extra community population.

Case numbers, interventions, time and consequences

The numbers are local anonymized case IDs in this original. They cannot be connected to other reports' case numbers or to CPR.40 different IDs below are not proof of 40 different failed individuals: also correctly assessed cases are used as examples. All are subgroups of the 98 cases.

Case	PDF page	Citizen / progress	Decision and actual effect	Proof of demarcation
1	62	72 years Huntington	Written decision without clear help § 89	Lack of counter-writing
2	25	60 yearcrane traumas	Retraining target car / traineeship reached; 104 → 85 support	Correct
4	33	49 years post-meningitis 2012 / accident	107 Rehabilitation → self-housing targets	Non-actual moving date
8	62	21 varicella / PTSD after 4 operations / 1 month	Borhosmor; kommune terminates aid at not used	No written adverse decision; the individual does not want cessation
10	40	50 blood clots	Wanted ABL 105 accommodation	Correct
11	41	55 years Prader Willi	Political 108→ABL 105, same building; self-harm; consent/personal scope unresolved	No actual subsequent redress stated
12	44	36 varicella / amputation	85 → needs 83 known; municipality requires new application	Should make a decision without a new application
17	56	41 years Huntington	Old-age housing / support / purchase / companion	Correct
19	37	20 Years	108 Oct 2013 → second bobudsaug 2014	Guardian's consent, no 129; citizen's consent unclear
21	42	45 years old brain cancer at 9 years old	Anxiety admissions; current physical / psychiatric defect	Unmet needs cannot be assessed
23	36	31 years	108 since 2003	Corretor
24	58	39 years Angelman	108 since 2003 / 104	Overall assessed
26	63	43 years Huntington	85 clear support for post / authority / structure	Correction clarity
27	30	49 years of aneurysm 2013	Rehab extended; accommodation waiting list with asset rehab	Correct
28	52	20 year-old brain injury	Apr-nov 2013 hospital → rehab → 107; depressive family concern / neuropathy inadequate pgaafasi	Referred to own GP without a specific decision on mental-health needs; return home unresolved
31	66	44 year schizophrenia / brain haemorrhage 2011	102, reasons based on discretion; spouse+son 1½ years/family department notified	Correction; not child error population

Case	PDF page	Citizen / progress	Decision and actual effect	Proof of demarcation
34	91	60-year-old brain bleeding Feb	Very long processing explained by exceptional staff training in spring 2014	AS does not assess factual justification;

Case	PDF page	Citizen / progress	Decision and actual effect	Proof of demarcation
		2014; paralyzed / driving chair		no exact duration / date of actual assistance
35	69	44 years of age	85 reduced upon improvement; appeal guidance lacks receipt deadline/office hours/option to appear in person	The report's contemporary formal assessment
36	56	36 years Prader Willi	Mother-concerned / daughter-eating garbage; authority's belief in assessment	Power of attorney/guardianship guidance and handling of consent missing
38	33	20 years spinal cord / ADHD	107 AND STU	Clarifying stay correctly
39	25	48 years Huntingtondem similar	½ annual waiting list 85 support	Decision type correct; duty to implement/supply discussed at 26-27
40	67	20 years Prader Willi	107+103 lifelong need but no specific intervention	Absence of justification
44	58	59 years Huntington	Auxiliary for home summer 2014; Introduced forefoot, hallucination 1 floor; wishes for accommodation	Later the same month shifts cannot be bodied without explanation
49	88	41-year-old male; several blood clots last 3 years; memory / tr density / overview	Residential rejection because needs still unresolved	AS requires information and concrete person training; in fact, subsequent help is not provided
57	44, 88	26 yearAngelman / 26-year-old Angelman; bobudsNov 2009	ABL 105 since 2009; pays self-cleaning; no verbal language / Get functional information / action plan against described basic 83 / 85 needs	Authority's care assessment left to the residential facility / Repeated ID, not a new person
58	23	27 years old spinal cord hernia	83 correct; wheelchair / flexjob	No newborn population
59	63	58 years of brain damage	Rehab 107 → home; 86 reference but possible 85 / 83	Actual return without date; decision-making
64	42	60 years	83 / 84 / 85 / 86 and VUM	Sufficient information
66	90	48-year-old Huntington; street-walk-away; emergency aid / surveillance	The municipality withdrew its offer without any other support	AS assesses cessation without an alternative as incompatible with the need; information about judgments and violence consists of statements in the report, not separately verified against sources
67	34	19 years of brain damage from 15 years	Residential stay under 52(3)7 before 18; continued without a proper adult decision; increasing weight	107 wrong persons; were needed
68	37	44 year schizophrenia	108 fall January 2014; informed consent assessed	Correct; cause not to be affected later on
74	28	23 Years Sotos	Property Home 2014 → Parents Autumn 2014 pgas anxiety	Outstanding housing needs / parents' wishes are not stays
75	52	50 years Prader Willi	Residential offer 1 Nov 2012 could not be a year care; new moveable month 2014 with awake night shift	Needs assessed after new decision; actual date of relocation not disclosed
76	38	63 year-olds 2012	Wheelchair; spouse applies for training; forwarded to the residential facility without assessment by the authority	Consent / guardianship not clarified
81	34	42 year skitraume	107 extension without assessment, reasons given	Variable needs
87	67	46 years Huntington	85 level 3 without details of assistance; wants more practical help	Unsubstantiated level 3

Case	PDF page	Citizen / progress	Decision and actual effect	Proof of demarcation
88	31	61 blood clots / aphasia	Health / decision / functional assessment	Unknown treatment coverage
90	23	73 years after cycle crash	12,5 hours/week without reasons; needs and the spouse’s resources insufficiently investigated	Net missing amount / useful time
94	27	47 cerebral injury / sc izofraenia	15 hour week insufficient estimation needs; girlfriend's handicap extra support	Medication allegedly caused cardiac arrest; not verified against primary evidence
96	47	18 year-old hernia	7 hours / day at secondary school 2012-14	Departure from the rule not examined, but substantively correct p. 48

PDF 87	The § 141 action plan is expressly not independently included in the lawfulness assessment. Chapter 6 municipal questionnaire:24 municipalities, whereas 6.1/2 lawfulness measurement:44/54 cases.	
PDF 95	Advice under § 12, municipal questionnaire:23 of 24 responded. Self-reporting, not individual effect.	

Measurement / Locator	Number or short explanation	Limitation
PDF 96	Municipal tool questions concern general practice in 24 municipalities, not solely 98 most recent decisions. Functional-capacity methodology requirements particularly concern§100,not automatically all benefits examined.	
PDF 105	50 men 51% / 48 women 49%, not all picture figures are sex: Figure 1 playful brain / rare.	
PDF 105	The methodology rejects statistical significance/municipality-specific assessment of case samples from small target groups.	
PDF 107-112	The annex's statutory version LBK 150/16 February 2015; section 83 a mentioned, while selected decisions are from 2013-2014. Application of dates must be examined specifically, not all 2015 wording applied retrospectively. Section 107 duration is measured by purpose, not a fixed maximum time.	
PDF 113-114	Responsibility for provision does not end when a residential facility closes; the individual's informed consent or the 129 procedure must be examined. ABL 105 tenancy cannot be terminated by the municipality; the specific §§ 81/82/88/89/130/141/148 and RTL 3/4/5/6/10/11 are the annex's framework for examination.	
PDF 115-120	Precedent references 83:48-13,93-12,83-12,53-12, C-31-08, C-54-06, C-1-05, C-14-02, C-17-01, C-17-99; service standard C-83-12, C-82-12, C-51-06, C-52-05, C-3-05, C-16-01, C-17-99; family 67-13,221-11, C-31-08, C-18-01, C-17-01;85:78-14, C-38-07,81-10,39-09, C-18-08, C-3-06, C-22-03;102:5-13;107:6-15,71-14. Report summary, not the original of each precedent decision.	
PDF 116-119	The annex recounts 4 home-help cessation cases in C-17-99(1999 without a period),2 weekly cleaning hours C-1-05,24-hour assistance 39-09, contact every other weekend versus 1 weekend C-3-06. These are legal examples, not additional 2015 individuals.	
PDF 121-122	Precedent references 108:72-14(3 cases/developmental age 1-4 years),53-13;105:137-10(23-year-old without an appeal guardian),C- 29-05(action-plan deficiency causing invalidity). Not new 2015 case IDs.	
PDF 129-132	Case-request example:11 cases/participant, time limit 28 Nov 2014; most recent decisions from 1 Oct 2014 backwards to 1 Jan 2013; three years of records; presentation expected in the 2nd quarter of 2015,actual report Nov 2015.	
PDF 133-134	Socialstyrelsen's background estimate: rare<1000 per diagnosis, approximately 800 diagnoses/30-50.000 people; spina bifida approximately 1200, Huntington 350-400, PWS 200, Angelman 200, Williams 200-250, Sotos 50, Rubinstein-Taybi 30-40, Rett 104 girls. Brain 5%/350-450 specialised rehabilitation; no national register for the broader group. Not a count of people affected by errors.	

Measurement / Locator	Number or short explanation	Limitation
PDF 137-158	Both municipal forms/cover pages are blank instruments, not data; 2013/2014 count/estimate fields without published completed cells. Multiple-choice benefits/tools overlap.	

Measurement / Locator	Number or short explanation	Limitation
	Measurement form PDF154 asks for application date and actual implementation date, but no complete date table for 98 people is provided.	
PDF 150	Filter 2.10.4: individual assessment when the answer to 2.10.2 is NO (reduction); explains T 5.19 n 28/14 but the main table heading “unchanged need” differs.	

The forms PDF 137-158 have been reviewed, including both versions of the municipality and front page form. Empty checkboxes and annual fields are not citizens or registrations. The filter in the measurement scheme 2.10.4 refers to a lack of performance reduction; the heading of the main table 5.19 describes a lack of change in needs. This evidence chain makes the table error concrete, but does not allow the original cells to be altered.

Responsibilities and concrete missing links

The strongest substantiated criticisms are a lack of decision on known aid needs, a lack of concrete or unfounded needs assessment, a lack of involvement of the citizen, insufficient actual support and relocation without clear consent / procedure. In Case 12 / 39 / 57 / 66 / 19 / 76 / 11, the responsibility of the municipality for supply and decision is directly affected. Legality must be linked to the individual case and the rule of the time. The 2015legislative annex to the report is not simply an 2013text.

The specific subsequent investigation must require the municipality’s reopening decision and actual assistance date for each identified error sequence; for a move, the consent document, any § 129 decision, residence date and actual alternative support; for unpaid care by relatives, an assessment of needs, support hours and loss. Ankestyrelsen can clarify the report’s conflicting tables and release anonymised linkage between substantive outcome, procedure, needs coverage and waiting time. These person/implementation links do not appear as completed annexes in the original now read in full.

Additional Practice Content 2022-2025

Control 7 October 2026. Figures refer to the individual reporting populations. Absence of information, formal errors, reasons for change and qualitative practices must not be confused.

Loss of earnings, May 2022

Field	Verified registration	Locator
Actual n	**42** cases, six municipalities × seven	Main Report PDF 5; Annex PDF 5
Measuring absolutely right / completely wrong / partially wrong	**15 / 17 / 10**	Main Report PDF 6
The 17 completely wrong.	**1 modification, 16 remittal for reconsideration**	Annex Table 2.1, PDF 5
The 10 partially wrong	5 partial amendment, 3 partial annulment, 2 partial remittal for reconsideration	Annex PDF 5 Note
Fail union	**27 of 42**, of which 2 only formal, 9 only content, 16 both	Annex Table 3.2, PDF 6
Formal error categories, overlapping	1 reinforced statement of reasons, 12 incorrect statement of reasons, 17 official principle; Union **18**	Annex Table 3.3, PDF 6
Content error, overlapping	5 illegal time limitation, 2 missing period of fitting-in, 7 measurement errors, 14 unclear condition tests; Union **25**	Annex Table 3.4, PDF 6
Selecting	At least 15 overturned cases and a relatively high overturning rate in the last two years; recent Task Force participation excluded; geographical spread	Main Report PDF 36
Cases closed	The defendant is excluded; the special COVID periods 17.3.-18.6.2020 and 24.12.2020- 15.4.2021 are excluded;	Main Report PDF 37 and Note
Control limit	Persons and most appropriate parents assumed to be satisfied; some obviously omitted documents were requested	Main Report PDF 37

The published material does not provide a full distribution of the receipt / exit or a precise final decision date. "27 with errors" is correct union in this targeted sample; 17 alone would overlook partially unlawful decisions. An illegal time limit is a specific benefit limit; the actual subsequent loss and duration of the family requires follow-up in the cases.

Business practice, January 2022

Field	Verified registration	Locator
Actual n	**95** decisions by ten municipalities; August 2020, Activity Parate with possible extension November 2020;	PDF 5, 47-48
Main Outcome	**71** confirmation; **15** amendment / repeal; **9** remittal for reconsideration	Table 2.1, PDF 11
Benefit recipients	26 / 3 / 5 of **34**	Table 2.1
Job-ready social assistance recipients	19 / 9 / 4 of **32**	Table 2.1
Social assistance recipients assessed as ready for activity	26 / 3 / 0 of **29**	Table 2.1
Absence of justification	**72 of 72** non-self-found practices; 23 self-found not in this required goal	PDF 45
Convening and terminated	**105** called; 8 did not meet the criteria; 8 of 10 reserve measurements were used. Total number of arrivals not unique	PDF 48
Selecting	STAR designated 25 municipalities with a high level of internship, AST chose 10; oldest cases after 1.8.2020	PDF 47-48
Complementary acts	No call for missing VITAS acts	PDF 48
Already complained of	Explicitly exclusive criterion **not documented,** in the read method and annex cases;	PDF 47-50; Annex

Primaries apply to selected material conditions. Absence of administrative regulations was recorded, but their significance for validity was not tested (PDF 49-50). Ankestyrelsen considered that all 72 errors in the statement of reasons could be repaired in a hypothetical complaint; this is its follow-up assessment and does not eliminate the error in the statement of reasons. Not all sub-tables are complete.

Payout Denmark: marriage-like relationship, February 2024

Field	Verified registration	Locator
Actual n	**30** non-defendant: 15 family allowances and 15 pensions,	PDF 3
Selecting	Unmarried, separate addresses; both cohabitation and single decisions; 25 by means of a notice of principle 44-22, 5 before 14.12.2022	PDF 3, 8
Consequences / does not follow practice	**27 / 3** of 30	PDF 3, 7
The three errors	Lack of profit comparison; misdistributive object; community of ownership treated as sufficient proof of cohabitation	PDF 6-8
First case	The result is considered by the AST to be correct; the error in assessment could, in its opinion, be repaired in complaint	PDF 7
Other error observations	One without any practical information; one initially without a current personal relationship informed, later supplemented by a citizen	PDF 4-5

The three departures from practice do not equal three decisions actually amended. The report shows, among other things, a repayment case with a missing assessment, but states neither the amount repaid, the case duration nor actual subsequent redress. The original numbers requested/received/excluded are not given. Combination with appeal statistics requires verification of later appeal and case ID.

Source: Original report, 8 pages, SHA-256 5f771492f996094c86d215d75a2fabd55336b113a210aa81286dfc78ae6f9a97.

Special day and club offers, September 2025

The report title calls this a practical study, but **the report does not examine the requirements of the provisions; the responsibility for the supply or the number of places required is fulfilled;**. Therefore, it cannot provide a counter for legal / illegal cases.

Field	Verified registration	Locator
Interview	**11**, six on day offers and five on club offers; seven municipalities; September-November 2024	PDF 53-54
Additional information	Mailanswers; two municipalities did not have or used special club offers	PDF 53-54
Register population	The Ministry of Social Affairs and Housing's own calculations on DST data; separate child / adolescent characteristics	PDF 54-55
Legal exclusions	No purpose of control for supply responsibilities, grants / own-account payments, parental boards, home training or access of senior 18 year olds	PDF 55
Alleged / wrong -n	Not applicable as a sample of legality	PDF 55

Source: Original report,58 pages, SHA-256 2eb4d09b9381034197770ce1d0455e0d3aa706d7ee4580b7710e00fea2573d23. The full check against the original has now been completed in praksis-dagklub2025-fulde-registertal-og-kontrolgraenser.md/.json:all 58 pages read, both diagnostic-percentage tables and the code annex visually read; 9 numerical/code blocks with 78 rows. The rounded register figures still provide neither a count of unlawfulness nor a deduplicated union of day/club participants.

Full supplementary review: Compensation for lost earnings: all 38+17 pages, municipality table, subcategories and instrument. The same 42 cases.. The known outstanding public table/annex material is closed; actual redress and a union of people do not automatically follow from decision figures.

Full supplementary review: Work placements: all 50+13 pages, municipality table, requirements for organisation and instrument. The same 95 decisions.. The known outstanding public table/annex material has been covered; actual redress and a union of individuals do not automatically follow from decision counts.

Special day and club offers 2025: full registries and control limits

All 58 original pages have actually been read in RAM. Image tables PDF12,31 and 57 have been read visually; PDF56/58 also seen. This supplements the earlier methodology check; no new cohort is created.

Population and excluded control issues

2023 recipients under 18 registered in the population at the beginning/end of the year:1.910 day services and 980 club services, rounded to 10.Diagnoses are based on hospital contacts in 1995-2022; general practitioners and privately practising specialists are excluded.Groups overlap; no overall day/club union of persons.

The report expressly does not examine statutory requirements, responsibility for provision, capacity needs, payment/subsidies, parent boards, home training or access over 18. Interviewees' insight does not necessarily cover operations/buildings/finances.PDF54-55.The four municipal chains below are self-descriptions, not review of decision records.

All registry, method and capacity figures

- means that no numerator has been printed. The percentage must not be multiplied to the exact number of persons found. Local space figures are not national denominators.

Concrete municipal source chains

Municipality	PDF	Objections, not self-certification of legality
Disc	35-36	No separate club search / no separate target group assessment in driving; practice under consideration
Gladsaxe	50	Supervision of specialist institutions not previously carried out; new concept is being developed
Hvidover	38	Clubs treated in the same way as other SFOs from 1.4.2024; previously free comprehensive provision
Holbæk	20-21	Lack of seats leads to purchases in neighbouring municipalities and possible relocation back; waiting time is covered by additional aid

Independent analysis and specific investigation requirements

Failure to check legality does not result in a zero measurement of law.In the allegation of correct action, the actual individual needs study, decision and aid actually provided must be demonstrated. For past lack of supervision, a period is required, time-stamped monitoring reports, risk assessment and citizen-oriented correction. A new supervisory concept does not prove that past deficiencies or losses have been corrected. For comparison with the SFODecision itself, the 2023 decision is required, the legal basis, the payment basis and individual needs tests. The published material justifies these specific investigations but does not provide an exact illegality -N.

Residues

All 58 pages of reader's test closed. Exact unrounded person cells, day / clubunion, commune-distributed raw registry numbers, decision / supervision files and actual fixes have not been published in this report. No figures document the number of illegally treated children.

Additional material practice controls: delegation, assistance arrangements and ancestry

Controlled October 7, 2026. The population below is self-employed. Completed complaints may be the subject of some investigations, while others disallow them. Illustrations and written procedures are not extra people.

Second actor in sickness benefits 2013 [PAKT13]

Statement	Counter / denominator	Local, printed page

Other procedural observations	13/48	T3.1.15,91

Recent decisions before 31 March 2012; private operators, not other municipal administrations. The sixth, overall, wrong case stopped the grant without a final decision. Another matter of hearing the parties as a decision overlaps the five delegates. Absence of written reference: 19 cases, two of which have no real other actor; the report classifies this as a rule of law. Five illegal delegations are not five further mistakes on top of the six. Full complement control has now been implemented on all 180 original pages and the scanned AMS orientation: practice -second actoer2013-full -original tables.md / .json.106 data lags and 527 number rows, 62 local example -ID, same 48 decisions. The old sub-control is thus extended, without new cohorts. All necessary tables and scanned legal annexes are actually checked.

Aid schemes under § 95- 96, 2023 [PBPA23]

16 grants from eight municipalities, eight per provision; no refusal by the Committee of the Regions. Recent applications; already complained allowed if not pending in AS. Five interviewing municipalities. Fredericia's license data were misrecorded. No overall legality assessment; concrete comments were sent to municipal supervision. Five analytical courses are subsets of the 16, and follow-up cases are not included. Method s.81-83.

Population	2018	2019	2020	Locator
Full-time benefits § 95, 93 municipalities	475,4	445,9	408,3	T2.2, p.14

Causes 2019-2021	§ 95	§ 96
Causal records	135	191
Cases dealt with	113	167

T0.2, p.17. Reasons overlap;191 reasons are not 191 cases. Full-time benefits are not people. T0.1's heading says 2018-2021, but contains absolute counts for only three years. The p.16 figure also shows 2021 percentages; these are not converted into absolute counts. Retrospective register entries can change figures for the same year.

Non-Western Background, 2023 [PHER23]

24 cases obtained from six municipalities; two over the age of 17 excluded; from 22, AS selected 12 with variation in age, intervention and the municipality's assessment of complexity. Seven had placement decisions, one without consent. Three immigrants/nine descendants; residence permit temporary 4/permanent 1/unspecified 7. The age groups 5+4+6 exceed 12 cases: they must not be treated as mutually exclusive case groups. If possible, cases should not previously have been considered as appeals/concern reports; one had in fact been an AS appeal case. Six group interviews with 4-6 participants, two expert interviews/two presentations. The study is not representative and does not examine the correctness of decisions. Five constructed narratives summarise 2-4 cases each; they are not five additional families. Methodology pp.6-7,40-43; fieldwork May-June 2022. Error count: not reported, not zero.

Independent analysis of scope and consequences

The delegation survey documents specific invalid decisions on entitlement to subsistence support. The consequences for the citizen must then be measured as actual cessation of payment, duration, back payment and consequential loss; this cannot be inferred solely from the report's sample proportion. Municipal political follow-up and the agency's contact with the municipality likewise do not prove individual redress or a sanction against a responsible employee.

The personal assistance scheme study leaves refusals outside the case review and follow-up outside the analytical examples. Its complaint statistics separately document several grounds for error in the same case and a large number of alterations/remittals based on insufficient information/reasons. The award cases reviewed cannot be used to exonerate the refusal population. Similarly, the ethnic-background study's municipal assessments of families cannot be treated as documented fact about a particular family without the contemporaneous original records.

For the three studies, record-based deductibility against the complaint records, information on actual follow-up and the implementation / payment dates of the individual citizens concerned are required. The absence of a public malfunctioning counter is an information gap; it does not eliminate the need to try out a concrete illegal intervention.

Second actor 2013: full tables, cessation of dependency and municipal responsibility

All 180 original pages have been read. Scanned PDF105-116 have all been visually read in RAM. **104 numbered original tables**, a municipal list of providers, a population crosswalk and 62 numbered examples are reproduced below. The same cohort of 48 cases as earlier PAKT13; neither 48 nor 62 new citizens are added to the annual series.

Main analysis: known illegal delegation and actual loss of support

Municipalities could deprive persons on sick leave of their subsistence support through a private provider, even though statutory decision-making competence rested with the municipality. In five of 48 cases, the Appeals Board found invalid delegation. The sixth incorrect case shows cessation without a final decision; approximately 9 months later, the municipality had still not made it. This is a specific course involving lost subsistence support and deferred review. The back payment and compensation actually received by the citizen are not stated. [PAKT13-FULD, PDF23/44-47/103]

The municipalities' responsibility had been expressly communicated before the review report. The AMS letter of 17. January 2012 instructed municipalities also to reopen other cases involving unlawful delegation, inform the citizen, secure information and a hearing of the parties, and make a new decision. Where there was a substantive entitlement to benefits, the municipality was to determine the period and pay as quickly as possible. The letter required independent municipal verification of private providers' case presentations. Responsibility must therefore be examined through the municipality's receipt of the notification, contract, management instruction, signature, decision/payment records and timing of redress. [PAKT13-FULD,PDF105-107/111-113]

The 42 cases assessed as correct overall are not 42 error-free cases. The report describes, among other things, missing statutory references in five of them, insufficient reasons and information. The information deficiency was itself treated as a breach of a non-invalidating procedural rule; this does not make a concurrent competence error lawful. Private providers' statements about illness/work identity and descriptions such as objective are their assessments, which must be tested against the medical/functional material. [PAKT13-FULD,PDF31/41/48-57]

Cohort, selection and source differences

The review concerns the most recent decisions before 31. March 2012 in 10 selected municipalities. 50 received, 2 already appealed/forwarded cases excluded, 48 examined. The selection is not a national probability sample. Submitted records were used as the basis; the Act's historical resource-profile requirements change from 2013.41 submitted contracts/26 providers and 21 contracts linked to 48 cases are different denominators. 34.753 persons on sick leave as at 31. March and 3.558 with a provider in the 1st quarter are stock/flow figures based on estimates from 14 and 25 municipalities respectively; they cannot be used as a nationwide error count. [PAKT13-FULD, PDF18/80-85/123-125]

The source has 92 responses inT3.1, but 91 in summary / method; 33 contracting municipalities in main text, 34 in summary / annex; the same 3 ring-border responses with 7% iT3.9 and 8% iB3.3.31 T3.1.8 mistakenly presses total 1 / 17 even if the reasons for errors 5 and 2 overlap. The printed total is visually controlled and maintained as source error. T5.5 has 20 hearings, T5.6 has 22 relevant classifications; no harmonization has been suggested. The rounded 101% of the originals shall be retained. T6.1 summers 52 events, not 52 unique persons. [PAKT13-FUD, PDF5 / 17-21 / 50-51 / 59 / 82 / 84 / 92 / 98- 103]

Individual processes and contract examples

Example numbers are not a unique person count. Contract examples 26-61 / 66-68 are terms and targets; not actual results. Hole numbers 24 / 25 / 62-65 are not designed.

Example or	Type	Original	Specific information provided by the source	Meaning and requirements
1	Case-law / preliminary ruling	PDF24	Disciplinary rascals; the letter of resignation lacks legal reference, the municipality has signed rascal.	Irregular reporting is a specific document; it is not automatically independent medical certificate of full ability to work.
2	Case-law / preliminary ruling	PDF26	The other actor shall obtain medical information after the signature of the mandate.	Consent for data collection does not prove consent to the termination of support.
3	Case-law / preliminary ruling	PDF29	Whipped tongue, sick name 2009; offer 12.4-1.6.2012.	Offer period, not decision/redress date.
4	Case-law / preliminary ruling	PDF29	Physical tests and spare requirements are part of the process.	The operator's test shall be tested against actual medical documentation.
5	Case-law / preliminary ruling	PDF29	ADHD and serious mental problems, career progression.	Health and progress described; actual healing / work not documented.
6	Case-law / preliminary ruling	PDF29	Stress / depression and return to work are included.	The objective and the plan must be kept separate from the actual return.
7	Case-law / preliminary ruling	PDF31	Status 24.9.2012 on chronic pain and limited resources; citizen says not to be able to return, player denotes assessment objective.	The term objective is the operator's statement, not independent proof of truth.
8	Case-law / preliminary ruling	PDF31	Status 23.3.2012: Protection against heavy lifting, knee / elbow / back.	Skagerrak information is concrete knowledge the municipality must include.
9	Case-law / preliminary ruling	PDF31	Status 6.9.2012: waiting for health services; continuation recommended to avoid break and decline.	Recommended continuity is not evidence of actual tender delivery.
10	Case-law / preliminary ruling	PDF32	Failure to attend makes it impossible, according to the other actor, to assess physical and mental ability to work.	Absence of an assessment does not prove capacity for work; AS assesses the section 21 decision against other criteria.
11	Case-law / preliminary ruling	PDF34-37	Party hearing 11.9.2012 / deadline 20.9; retirement stop 30.9.2012, over 80% absence after assault / threats. The municipality considers no clarification within 39 weeks from 31.1.2012; mentor / internship is judged necessary.	AS accepts the decision. Its own reproduction documents the unexplained ability and need for help. Whether lack of assistance contributed to absenteeism / cessation must be tested against the original; no automatic illegality derived from the summary.
12	Case-law / preliminary ruling	PDF38	Actor picks up information from employer and physiotherapist.	The self-examination and use of the municipality must be demonstrated.
13	Case-law / preliminary ruling	PDF39	Actor contributes data to the plan; the municipality makes the assessment.	Formal division of responsibility is not in itself proof of actual independent review.
14	Case-law / preliminary ruling	PDF41	Trainee in fish hall 20.2-29.4.2012.	Can overlap example 17; no secure personal union.
15	Case-law / preliminary ruling	PDF41	Actor will shift focus from disease identity to work identity.	The operator's interpretation is not a verified diagnosis or rejection of disease.
16	Case-law / preliminary ruling	PDF41	Actor is looking for an internship.	A search is not documented provision of an offer, a job or restoration of subsistence.
17	Case-law / preliminary ruling	PDF42	Fishery hall, asthma / allergy, actor indicates 5-30 minutes of effective work daily.	Specifically impaired function; possible overlap with 14, not new self-employed person demonstrated.

Example or	Type	Original	Specific information provided by the source	Meaning and requirements
18	Case-law / preliminary ruling	PDF44-45	Joint letter in five invalid delegation cases; the provider must also make a recommendation, non-attendance may lead to cessation under section 21. The letter denies decision-making competence, while the provider actually signs alone or with a manager.	The document chain shows a difference between declared role and actual decision; management co-signature and contract must be linked to knowledge / responsibility. The five are the same 5 / 48.
19	Case-law / preliminary ruling	PDF46	The municipality stops the service without a final decision and says at AS telephone contact that the consultation letter is the final decision.	Included in the five delegation cases; types of errors overlap, not extra seventh case.
20	Case-law / preliminary ruling	PDF47	Income support is stopped while the final decision is postponed pending a reply from the hospital/general practitioner. Approximately 9 months later, when AS makes contact, the municipality has still not made a decision.	In fact, there is a continuing lack of control, not just an abstract error of form. The post-payment, date of new decision and financial loss are not disclosed. Requirements: timeline, pay log, legal basis and restoration.
21	Case-law / preliminary ruling	PDF48-49	A letter of termination does not provide any legal basis or actual prior periods of benefit beyond 52 weeks within 18 months.	The citizen lacks verifiable grounds to challenge the expiry.
22	Case-law / preliminary ruling	PDF49	The alleged written basis is not available; general duration reference does not replace specific section 27 criteria.	Example 21 / 22 is also the two low § 7 involvement; no addition for four people.
23	Case-law / preliminary ruling	PDF56-57	Written reference and § 21 warning, AS assesses sufficient information.	A correct letter is not independent proof of actual ability to participate.
26	Contract / addition example	PDF61	Contract target group and offer defined.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
27	Contract / addition example	PDF61	Target group delimitation in contract.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
28	Contract / addition example	PDF61	The contract describes the target group.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
29	Contract / addition example	PDF61	Back disorders are broken down between 4 and 12 weeks and over 12 weeks.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
30	Contract / addition example	PDF61	Contract indicates target group.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
31	Contract / addition example	PDF62	One subcontractor contract for physical functional clarification.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.

Example or	Type	Original	Specific information provided by the source	Meaning and requirements
32	Contract / addition example	PDF63	The working procedures and the responsibilities of the parties shall be described.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
33	Contract / addition example	PDF63	Guidelines are described.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
34	Contract / addition example	PDF63	Contract to meet after 4 weeks with three parties.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
35	Contract / addition example	PDF64	Visitation contract.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
36	Contract / addition example	PDF64	Visitation and decision-making responsibilities are unclear.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
37	Contract / addition example	PDF65	Medical/employer information is obtained and sent to the municipality.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
38	Contract / addition example	PDF65	The operator shall send all relevant information collected to the municipality.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
39	Contract / addition example	PDF66	Follow-up mode is shown.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
40	Contract / addition example	PDF66	A lack of clarity about the follow-up task or the start of the course.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
41	Contract / addition example	PDF66	Follow-up every 4 weeks.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
42	Contract / addition example	PDF67	Three contracts in one municipality require municipal approval of the plan.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
43	Contract / addition example	PDF68	Job notes: 18-19 years within 4 weeks, over 19 years within 11 weeks.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
44	Contract / addition example	PDF69	780 DKK per week; 900 DKK KTH / unemployment benefit; 780 DKK for visitation reimbursed first month by actual course, intern search 780 DKK / week until appointment.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.

Example or	Type	Original	Specific information provided by the source	Meaning and requirements
45	Contract / addition example	PDF69	The municipality searches, the actor establishes an internship.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
46	Contract / addition example	PDF69	The operator shall establish and register an internship.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
47	Contract / addition example	PDF71	2 weeks of clarification and 11 weeks of internship.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
48	Contract / addition example	PDF71	Physical effort and stress / depression conversations.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
49	Contract / addition example	PDF71	Prolonged pain / stress.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
50	Contract / addition example	PDF71	Contract annexes describe the distribution of responsibilities.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
51	Contract / addition example	PDF72	Training / traineeship is part of the offer.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
52	Contract / addition example	PDF72	Training and training.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
53	Contract / addition example	PDF72	Coaching / progress.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
54	Contract / addition example	PDF72	12 weeks offer: 4 group and 8 internships.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
55	Contract / addition example	PDF72	Course / training course.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
56	Contract / addition example	PDF73	Function profile at end.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
57	Contract / addition example	PDF73	Continuous evaluation of resources.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.

Example or	Type	Original	Specific information provided by the source	Meaning and requirements
58	Contract / addition example	PDF73	Actor describes working function.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
59	Contract / addition example	PDF73	Labour assessment is included.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
60	Contract / addition example	PDF75	Physician and psychologist 2,5 hours each / week: 5 hours, 4125 kr exom per week started. Assessment within 10 working days 1150 DKK / hour, within 3 days 1600 DKK / time.3 psychological interviews 45-60 minutes, explicit employment, not diagnostic / treatment.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
61	Contract / addition example	PDF76	The contract 1.4.2011-30.6.2012 also transfers responses to appeals/casework, denies decision-making competence. No payment if AS/BAN amends/remits for reconsideration/invalidates.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
66	Contract / addition example	PDF77	Success target 55% healthy / partial.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
67	Contract / addition example	PDF77	12 weeks thereafter free group counselling until clarification.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.
68	Contract / addition example	PDF77	After 6 months: job / flexible / training 15%, healthy for A- Box 20%, external internship / wage subsidy 70%.	Contract terms, not documented actual person outcomes or paid cost. Incentives / prices are the basis for concrete accountability checks; no automatic proof of manipulation.

Knowledge, duty, follow-up and instruments

Consignor / date	Original	Documentary knowledge / duty	Follow-up
AMS → kommunern e; 17.1.2012	PDF105-107; Orientation letter, replaces 10.3.2011	Decision of principle 2010 / 11, invalid private power of decision. Points 2.1 to 2.3. Also resume other similar cases; inform the citizen, investigate case material, party hearing and take a new decision.	Point 2.4 consider the period / continued right / possible deduction; pay as soon as possible. Actual payment in 48 cases not documented.
AMS; 17.1.2012	PDF108-110; Point 2.5.1-2.5.4	Historical rule / practice interpretation of retroactivity, § 21 / § 24-27 / § 7.	No automatic material entitlement to benefit from any defect in competence, but that does not imply the legality of actual stoppages. Later legislation / practice will have to be tested separately.
AMS → kommunern e; 17.1.2012	PDF111-113; Point 3.1-3.3	Power to instruct, dual-employment/conflict-of-interest risk, the provider's account of the case. Actual municipal instruction of the temporary worker; independent verification of facts/information/statements; the municipality hears the parties and makes a recommendation.	The signature and the commune logo do not prove independent review.
Minister → AS → 10 municipalities; Consultation 2.5.2012; submission deadline 3.10.2012	PDF123-125; Call letter	Press reports about unlawful use of providers led to a request from the Ministry. All current contracts/instructions and the 5 most recent decisions; those already appealed/forwarded are excluded.	Expected publication mid-2013; shredding only submitted copies, not proof of municipal originals.

Instrument	Original	Actual measurement range	Limitation
Annex 7 survey	PDF126-136	2012 use, option, address, stock 31.3 and flow 1.1-31.3 with explicit beauty flags; CVR and contract forms, guidelines / tasks / orientation letter. Deadline 15.8.2012.	Empty response fields are not zero, and question options are not executed.
Annex 8	PDF137-163	Municipality / actor / date of birth / sex / date of decision / § 7 / 21 / 27, tasks / multiple actors, material accuracy / information, § 21 guidance / consultation, § 27 profile, § 7 involvement, FVL22-25 reason / complaint, operator recommendation / party consultation / information / letter transmitter.	48 controlled cases; no published date union or national CPRdedup.
Annex 9 Contract Eel Form	PDF164-180	One table per actor; letter paper / comparability / in struks / sub-contractor, 8 tasks, empowerment / successful / delegate supervision, actorvreelvicar and § 19 legality. Last page marked November 2012.	21 contracts; targets / prices / plans are not actually citizens' outcomes.

Errors, hypotheses and concrete residues

Documented criticisms are exceeding competence, cessation of income support without a final decision, insufficient reasons and information, and missing documentation of individual redress. Hedensted's five reviewed decisions and Copenhagen's one are in T3.4.1; this is not a national judgment or five named criminally liable officials. The binding duties must be examined for each municipality and each documented case.

Hypotheses concerning influenced assessment of medical evidence, abuse of financial incentives, harm from lost subsistence or further errors outside the sample require contemporaneous primary records. The contract's fee reduction upon remittal is a documented incentive, not proof of an actual withheld appeal or manipulation.

The prioritised evidential chain is: contract/instruction and AMS notification → actual sender/signature and basis for the decision → cessation date and payment records → municipal management's knowledge → new decision, payment and other redress. The strongest demands are reversal of actions exceeding competence, a lawful individual decision, prompt payment of arrears where entitlement continues, documented assessment of damages for loss and accountability for continuing known errors.

• Full individual files, CPRunion and overlap with other years of practice / complaint not published.

• In the event of actual reopening, post-payment, compensation, dependants and persons liable after the report have not been provided as a defaults register.

• T6.1 Actor occurrences 52 and several actors 6 cases are not sufficient to reconstruct the union.

• Historical precedent-decision summaries in PDF114-122 are the same legal references, not additional 2012 review cases.

BPA 2023: full original figures and concrete aid courses

BPA23F. All 83 original pages read in memory. 9 number / method blocks, 104 rows. All five analytical runs and the method annex checked; PDF14 / 16 / 17 actually visually.

Limitation and local original deviations

16 award cases from 8 municipalities; most recent new applications. Pending complaints are excluded, previously appealed closed cases are allowed. Five case trajectories selected from 16. Refusals and actual follow-up are not covered by this case cohort. The review does not test compliance with the law; some findings were sent to municipal supervision without a public count/outcome statement (PDF81-83).

Fredericia's selection of appropriations recognized the error. T2.3: 2020 heading towards 2021 prose. T0.1: 2021 in title without 2021 column. F2.1: § 95 remittal for reconsideration 2021 without number label. PDF29 uses remittal for reconsideration as population for 72 / 81%, where T0.2 includes all the surrounding. Casual initiation § 95 against, in fact, § 96.
Kurt: § 96- Decision is missing. Peter: replacement application without documented treatment. Martin: 168 / 50-hour relationship unfounded. Kasper: employer's responsibility not disclosed. Louise: 70-hour discharge missing (PDF25-27 / 47 / 51 / 69 / 73).

T2.2: Full-time services and approach

BPA23F PDF14; denominator 93; unit municipalities / full-time benefits. Not people. Two months count as 0,17 full-time. Inflow figures from a separate ministerial reply;2020/2021 not stated.

Year	§ 95 full-time	§ 96 full-time	Total full-time	§ 95 approach	§ 96 approach
2018	475.4	1544.4	2019.8	50	70
2019	445.9	1530.7	1976.6	40	70
2020	408.3	1510.1	1918.4	-	-

T2.3: Interview municipalities, grants

BPA23F PDF14; denominator 5; unit municipalities / grant measure. Heading quarter 4 of 2020 versus prose quarter 4 of 2021. Fredericia’s § 95 selection data later acknowledged as erroneous, PDF81. Not error statistics.

Municipality	§ 95	§ 96
Aabenra	17	18
Fredericia	15	15
Horsens	5	21
Odense	15	59
Viborg	7.2	26

T0.1: Real-time complaints

BPA23F PDF16; mentions separate case denominators per year; unit appeals. Heading 2018- 2021, but the 2021column does not exist. Ongoing post-registration; not automatically the same version as other series.

Year	§ 95	§ 96
2018	94	178
2019	79	171
2020	82	161

F2.1: Complaint result, printed percentage

BPA23F PDF16; mentions all reality complaints in each category / year; unit percent. Visually controlled. § 95 remittal for reconsideration 2021 has no number label; 27,6 would be calculated remainder, not printed figures. N 2021 not disclosed; rounded percentages are not translated into exact case numbers.

Destination	Year	Stable%	Modified / repealed%	Remitted %
§ 95	2018	54.3	5.3	40.4
§ 95	2019	44.3	11.4	44.3
§ 95	2020	52.4	4.9	42.7
§ 95	2021	68.1	4.3	No number label
§ 96	2018	70.2	6.2	23.6
§ 96	2019	59.6	9.4	31
§ 96	2020	65.2	8.7	26.1
§ 96	2021	76	1.7	22.3

T0.2: Reasons for alteration/remittal 2019-2021

BPA23F PDF17; denominator {'§ 95': 113, '§ 96': 167}; unit reason markers / decisions altered or remitted. Several reasons per case.135/191 does not represent people. PDF29 calls 72/81% remittals, but the original table's population is all decisions altered or remitted.

Reason	§ 95 number	§ 95 printed%	§ 96	§ 96 printed%
Other proceedings	3	3	3	2
New information	3	3	2	1
Information / justification	81	72	135	81
The parties' complaints	18	16	20	12
Legal use	30	27	31	19
Total Causes	135	-	191	-
Cases dealt with	113	-	167	-

M1: Analysis of grant cases, type

BPA23F PDF18; mentions 16; progress of unit appropriations. § 8 95 + § 8 96. Five cases have been selected from 16, not extra cases.

Type	Case
Transition	4
Progressive disorder	5
Change of municipality	2
Accident	1
Other	4
Total	16

M2: Methodology and case review

BPA23F PDF30-43; 81-83; denominator 16; unit cases / municipalities / interviews / years. N varies by row. 47/88 is a secondary reference to another survey, not an additional case cohort. The review is not a lawfulness assessment.

Measurement	Counter	Denomination	PDF
Called / reviewed	16	16	81
Municipalities	8	-	81
Interview municipalities	5	8	82
Interest organisations	4	-	83
Analytical course of case	5	16	82
§ 83 previous aid	8	16	35
Health information	10	16	32
Observation	2	16	36
Apparent health legislative tasks allocated	5	16	43
The same section § 95 / 96, interview	3	5	12

Own evidence and impact assessment

Award statistics do not answer whether the citizen's need for assistance was met. The decisive evidence is the difference between the decision date, start date and task-specific allocation. Kasper's decision process of just over six months is followed by a further two months before the actual start. A case-processing-time figure alone therefore overlooks a documented part of the period without the new assistance. A national duration cannot be inferred from this single case.

The five local deficiencies above must be linked to the original applications, justifications and record tracks. A failure to reach a decision on a maintained application requires an independent review; an authorisation under another provision does not automatically determine the untreated application. Unexplained hourly differences require a task-wise reconstruction and verification of the actual individual assessment. Not enough aid can be declared on the sole basis of a positive authorisation.

Parents' and partners' unpaid efforts may conceal unmet need and a transferred burden of care. Clinical tasks and social assistance must also be linked to the authority that actually delivers the support; a delimitation of competence does not prove that other necessary assistance was delivered. A traceability demand covers the decision, actual assistance, family consequences, any reopening/back payment and the notification of the supervisory authority already made.

Documented deficiencies and verified methodological exclusions are stated locally. Suspicion of unmet need or generally unlawful standards-based management requires task-specific original records. Interviewees' statements do not automatically become verified citizen case trajectories. Known readable pages have been fully reviewed; individual redress, supervisory outcomes and links to individuals have not been invented.

Generation 2023: full original numbers and constructed programmes

HER23F / HER23BF. All 43 + 27 pages actually read in memory; 5 register / method blocks and 47 rows. Main Report PDF43 visually controlled.

Limitation

24 caught up, 2 aged people, 12 selected among 22. Complex municipal selected cases; correctness not tested. Previous AS processing is avoided if possible; 1 complaint is included. Five annexes summarise 2-4 cases each. Age cells 5 + 4 + 6 = 15 versus 12 are original conflict, not person enlargement.

The annex is illustrative and does not provide deduplicated error counts or actual individual redress processes. All public measured figures are below; missing raw concern-report/placement denominators are not replaced with estimates.

M1: Selection and waiver

HER23F PDF6-7; 40-43; mentions 12; unit cases / interviews / constructions. Complex cases selected by the municipalities. If possible, no previous AS complaint / notification; not absolute exclusion. Five mergers are not five extra cases or five identifiable single children. No accuracy / national error rate.

Original cases per design	2-4	-	7

M2: Distribution of cases

HER23F PDF42-43; mentions 12; unit cases. Printed age cells summer 15 modN12; PDF43 actually visually controlled. No harmonisation or assumption of 15 unique children.

Category	Number	N
Immigration	3	12
Survivors	9	12
Temporary residence permit child / parent	4	12
Permanent child	1	12
Status of stay unknown	7	12
Placement decision	7	12
Of which without consent	1	7
0 - 5 years	5	12
6 to 11 years	4	12
12 to 17 years	6	12

S1: Background reference 2019

HER23F PDF5; does not mention printed raw; unit approximate ratio of two population populations. No number of notifications per child, no cohort course from each notification to decision and no causal effect.

Generation	Notified children / children placed;	Age	Primary level
Danish	8	0 - 5 years	Secondary reference to Ministry 2021 analysis
MENAP + Turkey	34	0 - 5 years	Same secondary reference
Other non-Western	21	0 - 5 years	Same secondary reference

C1: Annex 2: all five designed runs

HER23BF PDF5-24; denotes 5; unit combined illustrations. Legal / children's expert assessments. Not five actual person IDs; family / child numbers shall not be summed up to national persons or linked to 12 single acts.

No	Local name	PDF	Age / Children	Control find
1	Abdul.	5-8	5 → 11 years	Plans missing; notifications / follow-up unsystematic
2	Daviti	9-12	13 years; family 3 children	BFU>1 year; professional network omitted
3	Faisal	13-16	1 → 5 years; family 2 children	2 non-notifications; plan + 3 md
4	Yosef	17-20	16 years; family 3 children	BFU>4 md without justification; offers do not match support needs
5	Ahmad.	21-24	4 years; family 3 children	BFU>4 md without preliminary assessment; acute assessment missing

C2: Annex 2: printed time and contact dimensions

HER23BF PDF5-24; mentions five constructions; unit time measure in constructed illustrations. No exact calendar dates or documented chaos chain for one identified person. BFU deadline 4 months in the Annex; not all waiting times are automatic breaches of law.

Progress	Measurement	Value	PDF
Abdul.	Notification → placement	8	months; PDF6
Abdul.	Follow-up	2/4	months; PDF7
Daviti	BFU	more than 1	years; PDF10 / 12
Daviti	Dad's conversation.	Button 2	weeks; PDF10
Daviti	The child's conversation	good 2	weeks; PDF10
Daviti	Notification → relief	2.5	months; PDF11
Faisal	Notification → placement	almost 5	months; PDF15 / 16
Faisal	Action plan by decision	3	months; PDF15
Faisal	Forced → optional	1	years; PDF13
Yosef	BFU	just over 4	months; PDF18
Yosef	Follow-up interval	6	months after 3 months follow-up; PDF19
Ahmad.	Violence notification → location	1	week; PDF23
Ahmad.	Interview	1	hour / week; PDF23
Ahmad.	Revocated consent → Assignment	3	months; PDF23

Own evidence and impact assessment

A constructed narrative can document what a control authority recognises as a legal problem, but cannot only prove the timeline of a particular person. This is why the Annex's lack of action plans, excessive deadlines and inadequate offers are used as control themes with original sidelocators. An inventory of children affected requires the 12 underlying records and a key between the records and the designs; without this key, the same facts may have been used in several places.

The documented methods also limit the discrimination examination. Interviews about prejudice and mistranslations are authority statements that must be linked to contemporaneous concern reports, recordings, interpreter bookings and decisions. A cultural explanation is not in itself documentation of harm or lack of parenting capacity. Each factual assertion must be examined independently, and consent requires understanding of the specific intervention. The presence of an interpreter does not prove that understanding has been secured.

A strong sustainable requirement includes the initial calls, 22 criteria-appropriate acts, the 12 analytical tables and the deductive connection to the structure of the annex. Then you can try information, party consultation, valid consent, timely help, actual contact, any language loss and responsibility. Suspects of stereotypes or uncovered protection are marked as investigation requirements; they are not inserted as a breach of the Convention already concluded. Known readable main / attachment pages have been fully reviewed.

Equal treatment: outcome, end-of-life and restoration

The Board of Equal Treatment's statistics document discrimination considered and the limits of access to complaints. Respondents may be municipalities, regions, the State, public employers, organisations or private businesses. An overall board count therefore cannot be called unlawful acts by public employees. That requires specific classification of each respondent and the circumstances actually established by the decision.

1. Latest series, delimited as the original figure 2

Year	Consignee t	Name including: The President	Secretary atsafvisn ed	Figure 2 Total	José Manuel Barroso , already include a	Handica p without for work, delamyn gde	Source
2018	341	285	7	292	52	11	2025-original, physical PDF pages 43, 44 and 48
2019	374	133	34	167	22	21	2025-original, physical PDF pages 43, 44 and 48
2020	657	195	38	233	36	34	2025-original, physical PDF pages 43, 44 and 48
2021	486	183	46	229	52	80	2025-original, physical PDF pages 43, 44 and 48
2022	511	413	149	562	116	187	2025-original, physical PDF pages 43, 44 and 48
2023	551	198	131	329	62	51	2025-original, physical PDF pages 43, 44 and 48
2024	504	319	204	523	101	112	2025-original, physical PDF pages 43, 44 and 48
2025	554	362	169	531	122	109	2025-original, physical PDF pages 43, 44 and 48

This series is registered by: 13 January 2026. It does not automatically include all the reasons for closure. Figure 2 shows 63 "2024 'cases omitted, in particular the cause of closure or the refusal of resumption. Figure 5 of the same report shows 63 "second outages" without a separate season title, the total categories of which give 594 against Figure 2's 531 for 2025. Both original information shall be retained; the year and context of the note must be reconciled with the source before the omission is attributed to one particular year.

The note to figure 3 gives a data extraction date of 13. January 2025,but the figure also contains 122 chair's decisions in 2025. This internal date discrepancy is recorded; it is not rewritten as a verified different date. In figure 1,the bar for 2020 is 657,whereas the note says 658; 222 approaches concern the same housing-eviction complex. This is a counting difference and a documented case complex requiring person deduplication.

2. Original annual outage: all categories are included

Year	Name fencing	Secretary riatsafvi injection	Not law strife;	Execute ed	Violation of law • • • provide evidence; ed	Other outcome	Category isum	Source
2020	48	38	78	54	9	43	270	Annual original, physical PDF page 38
2021	77	47	55	40	11	95	325	Annual original, physical PDF page 34
2022	166	150	143	90	12	95	656	Annual original, physical PDF page 29
2023	108	132	52	33	5	43	373	Annual original, physical PDF page 27
2024	163	201	74	73	8	43	562	Annual original, physical PDF page 36
2025	163	169	117	79	3	63	594	Annual original, physical PDF page 44

2019 has a different breakdown of outcomes:board dismissal 29; secretariat dismissal 33; lapsed following settlement 23; not unlawful 61; compensation 35; unlawful without compensation seven; discontinued 29; access to records four. Category total 221. 2019 original, physical PDF page 35. Shorter lists containing only board decisions omit several of these courses.

Rejection is not a decision that the citizen has not been discriminated against. Rejection may be due, inter alia, to jurisdiction, legal interest, the need for oral explanations of parties and witnesses or a manifestly unfounded complaint. The concrete grounds for refusal determine what kind of review the citizen has actually received.

3. Source voting and Time Accounts

The 2024 foreword states 519 cases decided. The year's figure 2 has 318 board decisions and 201 secretariat dismissals = 519; figure 5 adds 43 other outcomes = 562. The later 2025 figure revises the board to 319 and the secretariat to 204 = 523. The four additional entries are a revision difference, and none of the totals can uncritically be used as a total of different people. 2024 original, physical PDF pages 3, 34 and 36.

The 2023 foreword/figure 2 has 197 +132 =329. The year's outcome figure has 198 board outcomes +132 secretariat dismissals +43 others =373. The difference of one in board categories is in the original. The latest 2025 series has 198 +131 =329. 2023 original, physical PDF pages 3, 25 and 27.

The 2022-foreword / Figure 2 indicates 629 Board Decisions and 150 Secretariat Decisions = 779, but the exit categories give 656, and the latest 2025-revision gives 413 + 149 = 562 before any other outcome. The greater difference has not yet been explained by the definition of the original. The 2021 original Board decisions are 183 and the six exit categories give 325 with 95 "other" and 47 Secretariat refusals, while Figure 2 has 53 Secretariat refusals. The differences are marked; the report does not choose the most convenient version. 2022 -original, pp. 3, 27 and 29; 2021 -original, p. 3, 32 and 34.

The 2020 original's average processing time is approximately 9½ months, and the 2021/2022 originals' approximately nine months. There is substantial variation between case types. An overall average does not document the time to actual compensation, reinstatement or other redress. Annual accounts of consequences and payments and the full historical time series are not published in the annual figures checked.

4. Concrete public intervention: origin and actual restoration

The 2019 report reviews a municipal case from 2009: the municipality refused a Danish citizen social assistance on the assumption that asylum residence had lapsed, even though citizenship appeared in the case record. The board found racial discrimination on 13. August 2010 and awarded 2.000 kroner; the District Court on 6. May 2013 and the High Court on 18. December 2014 maintained the amount. CERD found on 13. December 2018 that the compensation did not satisfy Article 6 of the Convention. In 2019, the board states that it considered reopening on its own initiative but refrained because the courts had determined the amount and the board found no new factual information. Annual Report 2019, physical PDF pages 30–31.

The original of the CERD decision and its follow-up shall be the main proof of the breach of the Convention. The Board's own report here is the direct proof of the Board's knowledge and failed to resume. The citizen has one municipal case through several bodies, not a new person at each control point. The restoration refusal of the panel must not be described as a quick original correction of the CERD breach.

The original is **S.A., CERD/C/97/D/58/2016**, adopted on 13. December 2018. § 8 finds a breach of Articles 5(d)(iii) and 6. The follow-up overview checked against the original in **A/78/18 (2023), chapter IX, the table after § 70**, assesses the action as partly satisfactory and the dialogue as open. This is a historical oversight status in 2023, not a documented new compensation payment or an updated closure in 2026. Original Views; the Committee's original follow-up report. The same person's case is recorded in the UN corpus and must not be counted as an additional victim when combined with the equal treatment chapter.

The 2024 original, p. 32, refers to one person with more than 430 complaints submitted, more than 280 pending cases and 176 complaints processed without relief: 166 rejected as manifestly without prospects of success, four outside jurisdiction and six concerning matters already examined. On 20. September 2024 the board decided on a two-year restriction, including closure of cases not admitted without a separate decision. The annual review reproduces the board's assessment of abuse of process; the correctness of each rejected complaint is not examined in these statistics. The example directly documents why complaints cannot be equated with distinct citizens and why closed cases must have their own category.

5. Historical predecessors and remnants

Bill L 41 in the 2007-08 session, in its explanatory notes on financial consequences, reproduces Ligestillingsnævnet's 2006 annual figures: 63 incoming cases and 42 requests for guidance not considered at a meeting. Klagekomitéen for Etnisk Ligebehandling simultaneously had 75 specific enquiries. These are different incoming categories that do not document established breaches or the same scope of individuals. Original bill. The original predecessor reports for 2006-08 and Ligebehandlingsnævnet's reports for 2009-18 have not yet been substantively reconciled. The board's newer originals refer to the old editions; link trails have been saved as compact metadata. New retrospective annual figures do not replace checking the original denominators and exclusions.

Environmental and planning complaints: amended decisions, waiting time and actual legalisation

Review of public authorities documents both decisions set aside and long waiting times. Annulment or remittal does not necessarily end noise, pollution, unlawful construction or loss of a protected natural condition. For each specific sequence of events, it must therefore be investigated when the intervention began, when the appeal was examined and when physical or financial redress actually occurred.

1. Referral to the Board of Appeal and denominators

Year	Received	Completed	Verserend End of period	Verserend ed mslitsalds, days	Completeds through cut, days	Source
2019	932	843	923	406	-	Plan report 2022, p.9; departure s.9; time in 2023 / 2024 report p.12; holding 2023 p.9-10 or NH 2024 p.12
2020	964	1071	815	243	472	Plan report 2023, p.8; departure p.8; time in 2023 / 2024 report p.12; holding 2023 p.9-10 or NH 2024 p.12
2021	1084	1401	495	127	300	Plan report 2024, p.8; departure p.9; time in 2023 / 2024-report p.12; holding 2023 p.9-10 or NH 2024-12
2022	1202	1312	385	93	137	Plan report 2024, p.8; departure p.9; time in 2023 / 2024-report p.12; holding 2023 p.9-10 or NH 2024-12
2023	1056	958	486	128	150	Plan report 2024, p.8; departure p.9; time in 2023 / 2024-report p.12; holding 2023 p.9-10 or NH 2024-12
2024	1046	1024	-	171	179	Plan report 2024, p.8; departure p.9; time in 2023 / 2024-report p.12; holding 2023 p.9-10 or NH 2024-12

The time shall be counted from the transmission of the first instance to the Board to the transmission of the Board's decision. The procedure of the Court of First Instance, the time before transmission and subsequent legalisation are outside. "-" does not mean zero. Plan 2024, p.11-12.

Year	Names: all cleared	Rejected,%	Withdrawal, %	Stated , %	Set aside, %	Source
2022	1312	21	7	48	24	Annual report, physical PDF page 10; visually controlled
2023	958	26	6	49	19	Annual report, physical PDF page 9; visually controlled
2024	1024	23	6	48	23	Annual report, physical PDF page 9; visually controlled

The percentages are rounded. Multiplication does not give exact category counts. The 2024 original defines setting aside as full or partial amendment. It also states that upheld decisions may contain partial amendments. The proportion set aside therefore does not fully count courses affected by errors, and each decision must be classified by its specific reasoning. Dismissed or lapsed appeals do not prove that the matter appealed was lawful.

2. The waiting period of the Environment and Food Complaints Board

Year	Completed cases average	Verserende average age, days	pending End of proceedings	Source
2021	8.3 months	-	-	NH Annual Report, p.7; Retrospective 2022-original; closed cases
2022	7.6 months	-	-	NH Annual Report, p.7; Completed cases
2023	298 days	413	-	NH Annual Report, p.10; Completed cases; age of verserer separately
2024	325 days	398	1201	NH Annual Report, p.12; Completed cases; number of stocks retrospectively 2025-original p.6
2025	366 days	219	1066	NH Annual Report, p.6; Completed cases; age of verserer separately

The 2025 average of 366 days is for closed cases. The age of the pending cases is 219 days; the two sizes must not be exchanged. Both leave out the citizen's time at first instance and for actual implementation after the complaint. NH 2025, p.6.

3. Historical outcomes and concrete omissions

The NMKN 2016 original shows 124 remittals in 2016 and retrospectively 193 in 2015 and 194 in 2014. They are subsets of closed cases. The table states 1.823 received/1.412 closed in 2016, 1.450 pending and an average of 232 days. Nine closed coastal protection cases are excluded from the time measure; they had been transferred with already high case ages. The 62 transferred cases are included in intake/backlog. For 2015, table 1 has 2.269/2.037 received/closed, table 2. b/c 2.226/2.031. The difference is retained. Original, pp.6,8–9.

4. The overall authority is broader than environmental complaints

Year	NH-afll utninger	Average	Limitation	Original
2017	6459	223 days	No way. 1.599 mental patients' complaints and 215 previously repressed air bankruptcy cases. 2016-retrospective: 6.589 and 184 days.	Annual report, physical PDF page 6
2018	-	190 days	Barely 6.000; a further barely 2.000 psychiatric patients' complaints. Only rounded totals on the controlled side.	Annual report, physical PDF page 6
2019	-	107 days	Barely 8.000; excluding separately settled old environmental / planning holdings, also in the time calculation.	Annual report, physical PDF page 6
2020	11205	141 days	11.205 closures; time calculation p.12 omits old environmental / planning inventory.	Annual report, physical PDF page 6
2021	11829	4.6 months	Findings s.6; 4,6 months retrospectively in 2022-original p.7.	Annual report, physical PDF page 6
2022	10742	3.7 months	2022-original p.7: all completed. 2023 -original s.7 represents 5,0 months for the case of the name and the case of construction in 2022; boundaries are kept separate.	Annual report, physical PDF page 9
2023	10525	5.8 months	Name and construction cases, time s.7; 11.333 received and 4.588 pending. No person delusion.	Annual report, physical PDF page 6
2024	9948	- not recorded here	All secretarial committees; not just public authority decisions.	Annual report, physical PDF page 9
2025	10252	181 days	All endings; 3.526 pending, average age 179 days. Private disputes are also included.	Annual report, physical PDF page 6

NH includes both reparation of regulatory decisions, private disputes and disciplinary boards. All totals are case records, and plan / environmental figures are already sub-quantities. They're not added to the total again.

5. State Knowledge, Priorities and Restoration

NH 2019 describes an old environmental/planning backlog of 1.921 cases received before 1. July 2018, including cases from predecessor bodies. They were excluded from the ordinary average of 107 days. The backlog was reduced to 1.260 at the end of 2019 and 402 at the end of 2020; NH 2021 reports complete clearance. Separately, the Building Appeals Unit took over 685 old cases on 1. January 2019; the last were decided in May 2021. Decided does not mean that unlawful construction or other actual consequences had been remedied. NH 2019, pp.6,11–12; NH 2020, pp.6,11–12; NH 2021, p.6.

NH 2023 states that the boards set aside approximately every fifth first-instance decision as non-compliant with the law. The statement concerns the board review described; it is not a precise environmental count and cannot be converted into a national error rate. The same original documents that a planned quality panel and knowledge sharing with the Ombudsman were not implemented because staff resources were prioritised for the government's green initiative. The source documents the choice and the authority's knowledge. It does not alone prove specific individual responsibility for subsequent harm. NH 2023, pp.7,10,13.

NH 2025 justifies high quality by stating that under 1% proceed to the courts and 0,06% of all decisions are set aside. A small selected court proportion does not examine the legality of the rest. Time, finances, the action deadline and absence of suspensive effect must be examined as possible access barriers in specific cases. Zero errors in decisions not brought before the courts have not been documented. NH 2025,p.6.

Plan 2024 itself describes the risk of irreparable damage to protected species / natural areas and that realisation impedes physical regularisation. It is therefore essential to register provisional protection and actual legalisation separately. A later abrogated permit is not proof that the original condition was restored. Plan 2024, p.6-7.

6. Precise Residues

The current official NH list contains all nine annual reports for 2017-25, and Plan has three annual reports for 2022-24. They have been located and their statistics sections read; this is not a full review of individual decisions. The predecessors' original annual tables for 2006-13/2014-15, the Environment and Food Appeals Board's sector-specific annual outcomes for 2017-25 and Plan 2017-21/2025 remain separate investigative tasks. Accounts of citizens, households, properties and physical restoration do not exist in these aggregate tables.

Disability area: continued data gap and closure without documented direct effect

Conclusion. The National Audit Office's follow-up in 2026 documents that implemented initiatives and a new supervisory concept lead to closure of parts of the review case while a direct effect on overturnings has not yet been demonstrated. The Ministry has still not established data on municipal applications and decisions in either the child or adult disability area. This is a specific current source of the report's data limitation and the demand for an account of consequences and redress.

Original: Rigsrevisionen, *Follow-up to the disability management case (Report No 13 / 2021)*, **26 May 2026**, CAS RN C109 / 26. The cover is dated June 2026. All nine physical PDFs pages are read in the original; Figure 1 on physical page 6 is also visually controlled. Original note; the official control history of the case;. The date of publication and the date of note shall be kept separately.

1. Knowledge, responsibility and follow-up by the authorities

Paragraph 1-3 of the original describes an investigation initiated with the 2022 report and follow-up 22 June 2022 and 27 May 2024. The municipalities are responsible for the individual citizen's offer and support; the Ministry is responsible for monitoring and follow-up. The State auditors' criticism concerns both unsatisfactory supervision and local administration, which in many cases did not comply with the service law. These are the documented assessments of the control bodies within the scope of the study, not a new census of all municipal decisions. Original: physical p. 2, § 1-3.

§ 12 reproduces criticism that the Ministry did not follow up its knowledge of problems for several years and that the monitoring was based on incomplete and incomplete data. § 13 reproduces the Minister's subsequent commitment to examine the possibility of national application and decision data. Article 14 continues to document the absence of this data in 2026. This makes the knowledge chain concrete: previous criticism → ministerial commitments → ex post verification of what is actually established. Original: Physical p. 7-8, § 12-14.

According to Section 6, the follow-up is based on ministerial statements, document reviews and the statistics of the Appeal Board. It is not a new review of the full original documents of every citizen. Article 17 states that a new supervisory concept records inadequacies and attitudes to handling; Rigsrevisionen expect ex post verification of whether the problems are actually solved. The expectation is not already evidence that the problems have been solved. Original: physical pp. 4 and 8.

2. Status of the five control points

Control Point	Reported status in the 2026 note	What status measures
Legal safeguards initiatives and additional-expense rules	To be completed; initiatives implemented 2022-2025 and new rules from 1.9.2025	Implementation of initiatives, not documented redress for all citizens
Loss of earnings and documentation requirements	Continued follow	Models and any changes not completed
Quality data base	Continued follow	Application / decision data missing for children and adults
New illegitimate supervisory concept	To be completed in this note	New registration / manager concept, subsequent effect must be followed
Social supervision / audit cooperation model and future design of specialised social area	Both completed in the note 27.5.2024	Historical endings, not new endings in 2026

Source: Physical p. 4, § 4, and p. 7-8, § 10-17. The original table has five main points; point 1 is broken down above because additional expenditure and loss of earnings have different status. Therefore, the presentation of five series with the last two main points is combined; it does not create six new control runs.

3. Overturnings: all the figure's percentages and the actual denominator

Year	Remitted for reconsideration, %	Amended / repealed,%	Sum of the rounded figure categories,%
2021	25	7	32
2022	31	8	39
2023	33	8	41
2024	40	5	45
2025	43	4	47

Source: Figure 1, physical p. 6 / printed p. 5, visually verified. The denominator is **all the merits of the appeal; Disability decisions** in the boundaries of the Appeal Board. The figure does not give exact numerators or denominators; the rounded percentages cannot be converted into exact numbers. They are also not error rates for all municipal disability decisions. It is the same complaint control trail as the relevant Appeals Board and may not be added as additional cases.

§ 9 separately states that a study of legal safeguards found that over a third of its disability decisions would have been overturned on appeal. This sample/assessment population differs from the figure's cases actually appealed. It must be linked to the original study's sample and denominator, not added to the appeal statistics. Original: physical p. 5, § 9.

In the memorandum, the Ministry acknowledges that the initiatives have not yet led to a fall in the alteration/remittal rate. Several were implemented only in 2025. Funding of **17,7 million kr. for 2026-2029** has been allocated for theme days, learning-team visits and learning programmes. The allocation is a planned resource/response figure, not a count of citizens actually helped or a documented effect. Original: physical p. 6.

4. The actual lack of registration

From 1. January 2025, certain adult reporting fields concerning assessment, functional capacity and intervention goals were introduced. These fields do not fill the gap in registration of applications received and decisions made. The Ministry reports substantial municipal variation, a need for new workflows and system adaptations, and expects a data/digitalisation strategy in summer 2026; the Ministry cannot state whether the strategy will have specific targets for case-processing data. This is the Ministry's documented statement at the review date, not evidence of a strategy published subsequently. Any such later strategy must be checked separately. Original: physical pp. 7-8, section 14 and its continuation.

5. Importance for the impact and responsibility chain

The continued absence of national application / decision data means that the control sources cannot follow all refusals, non-appeals or the full population of people who continue to lack help. Therefore, a completed own-initiative control cannot serve as evidence of an overall effective loss cessation.

The sustainable chain is: **conclusion concerning lack of documented effect → the memorandum's specific review and authority commitments → no established complete decision register → the relevant substantive support and supervisory duty → continuing failure to undertake the necessary documented follow-up in identified cases → specific continuing loss → the proper authority/management responsibility → demand for decision, time and redress data.** Whether the omission in a particular case also constitutes a Convention violation or a criminal breach of duty is examined by reference to the individual right, act, knowledge, culpability requirement and harm. The memorandum counts no personal criminal convictions or unique victims.

Residual control: The promised summer 2026 strategy and its possible concrete data targets have not been verified in this module. The new closure does not alter the continued open follow-up points on loss of earnings and

the data base of the quality. The original's Annex, physical page 9, shows the concrete statement by the Parliament, the committee, questions and consultations and can be used for the documented knowledge dates of responsible bodies.

Handicap: right of appeal, waiting period and the difference between a law and actual protection;

Documented main find

VIVE's evaluation from September 2024 documents a problem that is not apparent from a simple count of findings in the party's favour: it takes knowledge, effort and time to have a right examined. In the delimited series concerning the Disability Discrimination Act, 371 complaints were considered in 2018-2023. The average processing time increased from 6,2 weeks in 2018 to 54,8 weeks in 2023. The interviews describe how the work of making a complaint and the waiting time can deter affected citizens from having matters examined. The number of complaints therefore cannot be used as the number of persons subjected to discrimination in Denmark. Source: VIVE 2024, pp. 37-48 and 79-84, original report.

The study also provides a specific test of the evidential value of authority statements: school and daycare representatives say that they already make the necessary adjustments, while the report's comparison with parents' perspectives shows that needs are not always met. The institutions' description is a statement about their own practice, not a verified account that each child has actually received support. Source: same original, pp. 70-77.

Source, method and read material

Pernille Skovbo Rasmussen, Maliina Grønvold Olsen, Maria Røgskov, Ea Wulf Nielsen and Agnete Nygård Jensen: *Non-discrimination on the grounds of disability - Evaluation from a citizens' and society perspective*. VIVE, 2024, ISBN 9788775823727. Published 19 September 2024. The checked original has 96 PDFs pages. The figures and method are checked in the original pages 31-48 and 79-84; the citizens' consequences are checked in pages 49-50, 55-56 and 59-63; the institutions' statements and school / day supply analysis in pages 64-77. Table 4.2-4.4 is also visually controlled for years, empty fields and column location. This is a check of the listed sections, not a declaration of full reading of all 96 pages.

The evaluation shall have three different data bases, which shall be kept separate:

Data base	Actual number and demarcation	What it can document	Original locator
Complaint system	371 complaints considered under the Disability Discrimination Act in 2018-2023; data extracted May 2024	Complaints, processing time and annual number of complainants; mixed public and private sector complaints	S. 38-41, Table 4.1-4.4; p. 83
Publication of decisions	232 decisions, including 90 decisions by the President;	Content of the published denominator; not the content of all 371 complaints	S. 39 and 42-45
Qualitative interview	55 informants: 27 citizens/relatives, 12 municipal administration/school/daycare representatives, 9 organisation representatives, 3 agency/board representatives and 4 service-sector representatives	Specific experience, barriers and institutional statements; no national prevalence or individual legal decision	S. 79-82, Box 8.1
Organisational survey	36 organizations invited; 23 answered large parts, about 64%; questions sometimes have only 21 or 15 answers	Assessment by the corresponding organisations; not a citizens' survey	S. 82-83

The interviews were conducted August 2023-March 2024. The school and day contracts cover seven municipalities; ten were originally contacted and some were replaced after unsuccessful contact attempts. Recruitment through organisations, networks and social media means that all groups of people with disabilities are not covered. VIVE itself states that the qualitative analysis does not determine the legal validity of the experiences. The approximately 400.000 people represented by the organisations as a whole are not respondents to the study. Source: original p. 79 -83.

All annual complaints in the controlled evaluation

Year	Denomination juice see	Secretariat Decisions	Dismissed / he Intended etc.	Treated Total complaints	Average, weeks	Original locator and source
2018	2	0	7	9	6,2	S. 39-40, Tables 4.1 and 4.3, VIVE
2019	9	3	9	21	18,5	Same table and original
2020	24	2	7	33	29,9	Same table and original
2021	49	17	12	78	39,3	Same table and original
2022	119	53	14	186	56,5	Same table and original
2023	29	7	8	44	54,8	Same table and original
Sum of complaints	**232**	**82**	**57**	**371**	**Not Summerable**	Annual extract from May 2024

The 90 chairperson decisions are a subset of the 232 and must not be added. The 57 in the broad discontinued category include the 13 refusals to reopen below, 36 discontinued/shelved cases and 8 special closures. There are thus no further 57 complaints beyond the outcome table's 371. The series is a subset of Ligebehandlingsnævnet's total annual statistics and must not be added to those either.

Year	Successful complaint with compensation	Finding in the party's favour without compensation	Not me. dhold	Rejected by name	Rejected by secretariat	Genoptaed refused	Disposal / set aside	Special closure;	Sum	Original locator and source
2018	0	0	0	2	0	0	7	0	9	S. 41, Table 4.4, VIVE
2019	2	0	1	6	3	1	8	0	21	Same table and original
2020	5	1	4	14	2	2	4	1	33	Same table and original
2021	11	1	11	26	17	3	6	3	78	Same table and original
2022	12	1	35	71	53	5	5	4	186	Same table and original
2023	6	0	11	12	7	2	6	0	44	Same table and original
Sum	**36**	**3**	**62**	**131**	**82**	**13**	**36**	**8**	**371**	Balanced against Table 4.1

Blank fields in table 4.4 are reproduced as zero following visual checking and reconciliation of row and column totals. Favourable findings number 39, of which 36 include compensation. An award does not in itself document payment, changed access or support actually received by the child. These effects are not systematically followed in the evaluation's complaints table.

Internal discrepancies in the original: Box 4.1 on p. 37 states 37 favourable findings. Table 4.4 on p. 41 shows 36 + 3 = 39; pp. 42 and 44 also use 39. The body text on p. 41 states 191 complaints without favourable findings or dismissed by the board, but its own figures are 62 + 131 = 193; p. 42 uses 193. The report's count follows the reconciled tables and makes the differences visible. None of the conflicts justifies downplaying the separately documented barriers to complaints.

Complaints and persons: annual breakdown and deduplication

Year	Citizens with one case	With 2 -5 cases	With 6-30 cases	With more than 30 cases	Year complainants, calculated sum	Complaints in the year	Original locator and source
2018	7	1	0	0	8	9	S. 40, Table 4.2, VIVE
2019	11	4	0	0	15	21	Same table and original
2020	25	3	0	0	28	33	Same table and original
2021	42	1	0	1	44	78	Same table and original
2022	97	16	0	1	114	186	Same table and original
2023	27	4	1	0	32	44	Same table and original
Sum of years Osteonecrosis	**209**	**29**	**1**	**2**	**241**	**371**	Annual occurrences are not unique persons during the six-year period

The 241 are calculated as the sum of the categories of persons in the table for each year. The source does not provide a personal base that allows deduplication between years, and the same complainants can go again. Therefore, if the categories in the original are mutually exclusive within each year, the total number of complainants registered is between 114 and 241. This range describes registered complainants, not all persons directly and indirectly concerned. A child may be the person concerned while a parent lodges the complaint; the two roles must be recorded separately when the original facts of the decision can be verified.

VIVE's review assesses that around 30 % of the 193 board decisions without relief or rejected by the board probably originate from the same person. This is based on similarities in anonymised decisions, not a published identity key. No exact complaint count is therefore calculated from this percentage, and it does not replace the complaint system's annual person count. Source: pp. 42-43.

Knowledge of redress and further inquiries

Find	Counter / denominator or number	Limitation and meaning	Original locator; and source
Organizations know the existence of the law	21/23	Organisational worker; not share of citizens	S. 34, VIVE
Have high or any knowledge about regulations	16/23	The remaining 7 have superficial knowledge or no knowledge.	S. 34, same original
Does the members know the Board's right of appeal	2 / 23 agree; 18 / 23 disagree or very disagree	Assessment of members by organisations	S. 46, same original
Will recommend a complaint to the Board	12 / 21; 1 / 21 will not	The denominator of the question is 21, not 23	S. 47, same original
Believes to be able to guide complainants	13 / 21; 5 / 21 uncertain or disagreed	The last 3 are not classified in the reproduced bread text	S. 47, same original
First recommend contact with the respondent	9 / 21 agreed; 7 / 21 neutral; 5 / 21 don't know	Organisations, non-documented case outcomes	S. 48, same original
Helps with complaint / contact	8 / 21 agree; 9 / 21 uncertain or disagreed; 4 / 21 do not know	Self-assessed organisational practices	S. 48, same original
Disability requests for IMR, 2022	135 of 310 cases of discrimination	Requests, non-referrals, persons or alleged breaches	S. 47, same original
Disability approaches to IMR, 2023	129 of 301 discrimination	Possible overlap with the Board's complaints; no merger	S. 47, same original
Health as a frequent problem area	9 / 15 organisations	Only 15 replied to this question; not 60% of patients	S. 60, same original

VIVE finds in 2024 that the legislation was not followed by central application guidance or specific central dissemination measures beyond publication in Lovtidende. This is a dated implementation finding. It must not be rewritten without an updated check to claim that no guidance exists in October 2026. Source: pp. 34-35.

Concrete citizens' consequences and authorities' knowledge

Complaint and long wait. The interviews describe that the very formulation of an event, documentation and a long process can be incalculable, especially in the case of cognitive difficulties, mental illness or developmental disabilities. A formal right of appeal does not automatically mean that the citizen can actually use it. The documented average time of 54,8 weeks in 2023 shows the time to end in the defined series; it does not tell when access, support or payment was restored. Source: pp. 40-41 and 45-46.

Exclusion from a service. In one successful complaint described, a mother complained on behalf of her three-year-old son after a municipal leisure service had expelled them because of disruption. The board's criticism was that, after learning of the child's disability, the municipality did not try to resolve the problem. This is a specific finding concerning the authority's knowledge and subsequent omission, but the evaluation does not state the case number, decision date, compensation or actual resumption of participation. The underlying original has now been identified and read in full: KEN no. 9536 of 17. June 2021, case no. 19-16769, award of 5.000 kr.; expulsion 30. October 2018→decision 961 days and receipt by the board 24. March 2019→decision 816 days. Actual payment/access is still missing. See handicap-barn-musikalsk-legestue-tid-og-ansvar.md. Original decision, printed pp.1-6 and 12-14. Source for VIVE's account: p.45.

Lack of actual access to treatment. Interviews with individuals and relatives describe physical pain attributed to psychological difficulties; insufficient examination; deterioration; loss of trust; and a course of chemotherapy that had to be interrupted because the treatment setting did not accommodate a disclosed mental impairment. These are documented interview statements about consequences and information received by the authority, not individual compensation decisions verified against medical records. The descriptions establish which records, functional information, treatment choices and timelines a specific investigation must secure. Source: pp. 59-61.

Isolation and cut-off. Citizens and relatives describe inaccessible public buildings, limited cultural and leisure participation, and lack of staff to accompany accommodation. The consequence is that the right to

participation cannot be exercised in everyday life. Where the specific legal obligation and the specific needs of the aid are demonstrated, the analysis shall identify the decision, the responsible authority, its knowledge and the period of inaccessibility. Source: pp. 55-56 and 61-63.

The child's support and the institution's own description. VIVE reproduces that the participating school and day-care providers consider to make adjustments in advance and that many had not been informed of the change in the law. At the same time, VIVE shows the discrepancy with parents' experience and research on lack of support, unclear responsibilities and lengthy procedures. The strongest point of criticism is not that all the institutions interviewed have been proven to act illegally: it is that the institution's own declaration of practice does not demonstrate that the child's individual needs have been examined, the aid decided and the aid actually provided. Source: pp. 71-77.

Importance of the final analysis of the report and the necessary requirements

The source chain is: dated complaint system data → matching decision and person categories → actual waiting time → interview and document-based description of access barriers → separate control of the specific legal obligation and the loss of the citizen. This will avoid a refusal being treated as proof that there was no discrimination or that a compensation is treated as documented payment and terminated exclusion.

The documented study strengthens the requirements for available guidance and support for the complaint, registration of grounds for refusal, separate statement of public and private respondent, and follow-up on time for effective access, provided support and payment. An assessment of EMRK/ CRPD must then be linked to the specific right, the proven need for protection, the state's knowledge and the option of action it failed to use. The 371 complaints do not in themselves constitute 371 breaches of the Convention.

Remaining investigative gaps: Actual payment and access consequences in the case of the three-year-old boy whose original has now been identified; full person deduplication across years; public/private distribution; and updates after 2023 on processing time, payment of compensation and actual change in practice. The subsequent seventh report on the Act is identified as SOU 2025-26,annex 24,received June 2026; its time windows and main tables must be checked separately before comparison with the calendar-year series here.

A three-year child excluded from municipal offers: documented discrimination, 961 days and lack of recovery data;

Conclusion and source status

The municipality’s exclusion of a child aged approximately three from a musical playgroup breached the Disability Discrimination Act. The Board of Equal Treatment found this on 17. June 2021 in KEN no. 9536, case no. 19-16769. The municipality had maintained the exclusion after receiving information about the child’s disability and suggestions from the mother on creating a calmer environment. The board found that the municipality had not discharged the burden of proving that exclusion was necessary. The child was awarded 5.000 kroner, but the decision documents neither actual payment nor resumed participation. Original decision, printed pp. 1 and 12-14, physical PDF pp. 2 and 13-15.

The entire public decision of 15 physical PDFs pages has been read. The simultaneous material that the decision reproduces includes e-mails and a pedagogical psychological assessment. The original mail files, the separate original of the assessment and the Ombudsman's original letter have not been provided separately. Where the report uses this information, it is therefore indicated as documents reproduced in the original decision of the Board. The child is the same case as VIVE's example of p. 45 in the evaluation from 2024 and must not be added to the evaluation complaint count as an additional case.

Documented time programme

Time	Action, knowledge or control	The citizen's actual position	Original locator
25. May 2018	Educational-psychological assessment:long-standing communication and interaction difficulties; a support educator attached and referral to relevant professionals	The child had documented support needs for participation and development	Printed pp. 7-9 and 12; PDF pp. 8-10 and 13
17 August 2018	The child enrolled in the municipality's musical playroom	About three-year-old child participates with her mother	Printed p. 2; PDF p. 3
3, 10 and 17 September and 29 October 2018	Four courses are provided in the case-file and in the case-file.	The family participated in the community; the mother describes the last time as successful	Printed pages 2, 10 and 12; PDF pages 3, 11 and 13
30. October 2018	The music teacher reports that the child and mother are causing anxiety and must stop. On the same day, the mother replies to the question of professional participation and the possibility of creating more calm.	The child and mother are excluded from the offer	Printed p. 2-3; PDF p. 3-4
1 November 2018	The department manager refers to lack of specialist pedagogical skills / resources	No documented testing of mother's solution proposal	Printed p. 3-4; PDF p. 4 -5
5 November 2018	The mother asks for cooperation, access to documents and a decision before today's education; the manager replies that he cannot handle the case that day	New teaching path can pass without access	Printed p. 4-5; PDF p. 5-6
9 November 2018	The retention of the cultural school director is dated in the reproduced ombudsman's letter; the e-mail itself is undated in the case-file of the Board. The manager has spoken to staff and the legal department of the municipality and refers to the institutional relationship	The removal is maintained; announced reimbursement of course payments does not document actual payment	Printed p. 5 -6; PDF p. 6-7
12 January 2019	The mother complains to the Ombudsman	The case is being tried	Printed p. 6; PDF p. 7
24 March 2019	The Board of Equal Treatment receives the complaint	Child discrimination complaint recorded	Printed p. 6; PDF p. 7
8 April 2019	The Ombudsman chooses not to investigate the case; he refers to the institution's particular assumptions and considers that an inquiry could not help to achieve a different result.	No ombudsman inquiry or restoration through this track	Printed p. 6-7; PDF p. 7-8
17 June 2021	The name establishes illegal discrimination and grants the child DKK 5.000, payment within 14 days	The child has won the complaint; actual payment and access has not been documented	Printed pp. 1 and 13-14; PDF pp. 2 and 14-15

All information in the table comes from KEN no. 9536 of 17. June 2021. Time differences are the report's calculations: **961 days** from expulsion to the board's decision; **816 days** from the board's receipt of the complaint to the decision; **801 days** from the Ombudsman's closure to the later decision granting relief. They measure time to a formal decision, not a documented 961 days of uninterrupted exclusion from all leisure services or time to actual redress.

Verification of concrete statements of authority and source conflicts

The municipality’s reliance on its institutional authority did not withstand the discrimination-law assessment. The head of the cultural school referred to the institution’s authority to make necessary decisions about users. The reproduced letter shows that the municipality had consulted its legal department and maintained the exclusion. The Board’s later assessment required specific necessity after information about the disability and proposed solutions had been received. The municipality had not attempted to solve the problem and could not prove that exclusion was necessary. The departure actually established is unlawful indirect discrimination; the public material provides no basis for converting it into a criminal conviction of named employees. Source: printed pp. 5-6 and 12-14.

The Ombudsman's resignation was not evidence of legality. The reproduced letter places emphasis on the special experience and balancing of the cultural school and refrains from examining. The Board subsequently established a concrete infringement of the Discrimination Act. This demonstrates that the absence of ombudsman criticism in a closed file case cannot be used as a general counter to the law. The reproduced ombudsman's letter is the only source of this

closure; the report does not claim that the later Board alone documents all legal or factual errors in the Ombudsman's handling. Source:printed pp. 6-7 and 12-14.

Dates have been changed in the account of the reasons. The statement of facts and reasons on printed pp. 2, 4 and 12 reproduce the mother's emails from 30. October and 5. November **2018**. In the subsequent necessity examination on printed p. 13, the two dates appear as **2019**. This is an internal date discrepancy in the original. The timeline uses 2018, supported by the overall enrolment, teaching, exclusion and appeal process. The error does not in itself change the documented favourable finding.

The number of teaching sessions is shortened in the summary. The initial summary indicates that the mail came after three teaching sessions. The case-making and the grounds list four, including 29 October 2018. The report uses the four specific dated times. Source: printed pp. 1-2 and 12.

Consequences of the child and the family

The documented intervention was exclusion from a municipal children's community which the mother says was chosen with professional support to promote the child's interaction and language development. The child's short developmental window is specific: during the complaint process, the mother states that he will soon turn four, when the parents will no longer be able to participate in the same way. A finding in the party's favour several years later therefore cannot, without separate redress, restore the lost opportunity to participate as a three-year-old. Source: printed pp. 10-11; the assessment's recommendations printed pp. 7-9.

The mother describes short-term sick leave for both parents, family therapy, financial consequences and influence on the child's linguistic and mental development. The decision reproduces this as the complainant's pleas in law. There are no separate records, supporting documents of income or medical examinations, which determine the amount of the loss. The evidence of exclusion and infringement is independent; further losses require the specific supporting documents. Source: printed p. 10 -11.

Responsibilities and concrete follow-up

The respondent found responsible is the municipality. The Board awarded compensation under Disability Discrimination Act § 11 with a shared burden of proof under § 10, the prohibition in § 5 and the necessity/proportionality assessment in § 7. The rules applied are stated in the original, printed p. 14. The municipality's specific chain of knowledge and decision-making includes a music educator, department manager, head of the cultural school and consultation with the legal department; the text identifies neither personal criminal culpability nor a disciplinary decision.

The strongest documented demands are documentation of actual payment of the 5.000 kroner; access actually offered and implemented or an appropriate restorative offer; checks on changed procedures following the municipality's receipt of knowledge; and a separate account of the child's lost time and the family's documented expenses. If personal or criminal responsibility is to be assessed, contemporaneous emails and advisory records must be obtained and the conditions for each act examined under the relevant rules of responsibility. A general institutional legal basis cannot replace examination of the specific prohibition of discrimination found to have been breached.

Documented errors, concrete hypotheses and lack of evidence

Documented: unlawful indirect discrimination; maintaining the position after knowledge of disability without attempting a specific solution; 816 days recorded until the board decision; the original's conflicts over years and teaching sessions; no Ombudsman investigation despite a subsequently established breach of law.

Requires further proof: full individual loss, compensation paid, actual resumption of participation or alternative offers, systematic municipal practice and individual disciplinary / criminal liability. None of these is recorded as zero simply because they are not shown in the public decision.

Necessary original documents: the email threads, the educational-psychological assessment of 25. May 2018,legal advice/handling of access to records, the Ombudsman's letter and case material, payment records, the subsequent municipal offer and the family's loss documentation. The decisive breach of law and calculated time differences can be traced directly to the public primary decision; a full account of loss and redress cannot yet be traced in this way.

Handicapbil 2006-2010: original appropriations and separate versions

Result: The five annual originals have been obtained and their specific flow/award tables checked in memory. The outstanding missing annual vehicle awards have been covered at aggregate level. Awards, full refusals, altered reconsiderations and board decisions are different counting populations. They are not a national count of unique citizens or unlawful decisions.

A. Sources and actual reading delineation

ID	Original	Locally actually read
HB06	Annual statistics 2006, Aid for the purchase of cars etc., SEL § 99	Selected flow / allocation tables and method; PDFs, 11 visually controlled, not the entire report
HB07	Annual statistics 2007, Aid to disabled cars, SEL § 114	Tables 2,1 to 2,3 and their delimitation notes text read in RAM, not the whole report
HB08	Annual statistics 2008, Aid to disabled cars, SEL § 114	Table 2,1-2,3 and notes text read; PDFs, 6 visually controlled, not the whole report
HB09	Annual statistics 2009, Support for disabled cars, SEL § 114	Tables 2,1 to 2,3 and delimiting notes text read in RAM, not the whole report
HB10	Annual statistics 2010, Aid to disabled cars, SEL § 114	Table 2,1-2,4,3,1-3,2,4,2-4,3 and Annex 2 PDFs, 37-39 text read in RAM; delimited extract, not the whole report

B. Initial purchase appropriations

The figures under one year are overlapping sub-totals. 2006-table 2.4; 2007-2009-table 2.3; precise pages in source field / JSON. County 2006, Municipality 2007-09.

Own imputation, not correction of original: HB08's later 2007 has 5400 + 405 = 5805, but printed 5802. Unstated 39 + 59 = 98, but printed 95. Both printing errors are visually controlled on HB08 PDF-p.6. The original HB07 has 5149 + 405 = 5554; later reporting should not be added as an additional population. HB07 gives 6 municipalities and estimates 300-350 missing decisions; the estimate is not attributed to the actual figures.

D. HB10: reworked historical purchase series

Table 2.1 PDF-s.6 / printed 4. New car purchase delimitation, interrunning and validation: this version does not replace silent B / C. Percentage is the source's rounded figure.

Year	Disclaimer	%	Refusal	%	Authorisation	%	Denominatio n
2005	56	2	878	24	2795	75	3729
2006	72	2	1036	25	2964	73	4072
2007	49	1	997	27	2699	72	3745
2008	86	2	1182	33	2309	65	3577
2009	103	3	1113	36	1916	61	3132
2010	68	2	1310	40	1898	58	3276

2010: new and former applicants

Group	Disclaimer	%	Refusal	%	Authorisation	%	Denominati on
New	0	-	1017	58,1	732	41,9	1749
Previous	68	4,5	293	19,2	1166	76,4	1527
All	68	2,1	1310	40,0	1898	57,9	3276

Time in weeks, separate HB10 version

Table 3.1 PDF-p.17 / printed 15. Old dates: day 01; same month set to 2 weeks. Discrepancies are reported.

Year	New	Previous
2005	37,1	27,5
2006	43,3	31,7
2007	41,4	34,8
2008	39,0	34,4

Year	New	Previous
2009	39,1	34,5
2010	39,5	31,3

Name outturn 2010

Table 4.3 PDF-p.33 / printed 31. The columns are the result of the board; the row is the decision of the municipality.

Municipality	Common	Extended	Replacement	No loan	Disclaimer	Denomination	% change
Common	9	-	-	1	-	10	10
Replacement	-	-	11	-	-	11	0
No loan	-	-	3	323	-	326	1
Disclaimer	3	1	-	-	13	17	24
All	12	1	14	324	13	364	2

Our reconciliation:382=364+17 remitted+1 unspecified;66 further board decisions excluded without municipal data, thus 448 known decisions. Matrix changes 8=1+3+4; diagonal 356. These figures overlap other board statistics. The printed 2% does not include the 17 remittals.

E. Demarcation, consistency and concrete remainder

HB06 PDF-p.31-32: several decisions relating to the same person in the same year are recorded separately; simultaneous forms of aid are grouped together. From 1.1.2007 the municipality took over the power of decision; HB06 PDF-p.22.

HB06-09 Table 2.2: Full refusal partially omits refusal, e.g. rejected car purchase combined with allocated special features. Therefore, the different refusal denominators should not be used as a joint refusal / person series.

HB10 Annex 2 PDF-p.37-39: Only car purchase in new form; other § 114 such as special arrangement is omitted. Co-operation 1997-2009 and prioritisation of loan types change earlier / first time and loan categories. Disqualification / rejection validation may remain uncertain. Name time starts with a municipal decision and includes the period of appeal.

Our inference: The data document the scale of awards, recorded refusals and citizens' reported waiting time. They do not in themselves document unlawfulness or how many unique individuals lost a legal entitlement. One person may pass through municipality, reconsideration and board. Effective delivery, actual access to a vehicle and time from an erroneous decision to redress require separate linkage.

Precise remaining gap: other disability-benefit curves for 2006-17 and de-identified person/decision linkage. Historical register leads: National Archives 12705,2005–06, BIL_AMT/STAT, 12706,2007–09, BIL_KOM/STAT. Metadata have been checked; the register data have not been extracted. According to the archive description, the statistics transferred to DST in 2016. Necessary inquiry to DST/Appeals Board:version date, reporting/exclusion list and de-identified citizen ID with municipality, amended reassessment, board and implementation dates; separate purchase/adaptation and legal outcome. No inquiry has been sent.

7. The boundaries of children's and disabled barometers

Controlled in original annual reports 7 October 2026. The main objectives, methodology and all published municipal annex figures of five reports have been checked; all annexes to the case 2021-24 have been examined separately. The Pilot 2019 original is still being sought, the practice check requires independent accounting, and the official 2026 plan describes a new model after the release window. See the children barometric -municipal annex -2020-2024.md and the children barometric -pause- and -new -control.md.

Population and time displacement

Publication	Case	Municipalities	Family treatment g / others	Installation a	Of which: consent;	Settlement / measurement period a	Methodology page
2020	735	37	380	355	13	25 March 2016-25 March 2019	49
2021	708	27	429	279	21	8 January 2017-8 January 2020	51-52
2022	697	31	375	322	15	11 March 2017- 11 March 2020	53-54
2023	765	37	468 of which 37 others	297	11	Decisions 2021; proceedings 2020- 2021	41-43
2024	724	27	448 of which 45 others	276	7	Decisions 2022; proceedings 2021-2022	42-44

All exclude cases previously appealed to/considered by the Appeals Board. The most recent methodologies also specify cases considered following notifications. 2020-2022 mainly selects the most recent cases, but a third of placements must be at least one year old for the follow-up measurement. 2022 avoids the period of special Covid legislation. Absolute numbers submitted/excluded cannot be reconstructed from the instruction to provide 15-20 per cent additional cases.

The 2023 report, p. 5, documents the opt-out of three free municipalities with continued exemptions from certain procedural requirements. "All municipalities every three years' cannot therefore be continued as a literal coverage of all 98 municipalities. Differences between years can also reflect different municipalities and case types.

Controlled law-breakers

Each cell is **count/denominator (original page)**. “Assessment” counts a missing or not updated current child welfare assessment. “Interview” counts a breached requirement, not merely the absence of an interview. Lawful grounds for absence have been deducted from the error counts shown.

Publication	Investigation	Four-month-free t	Speech before Decision	Action plan	Three Months leaking,	Notification n
2020	215/731 (18)	219/330 (20)	322/717 (28)	152/735 (30)	58/118 (34)	95/203 (45)
2021	187/692 (21)	146/367 (22)	273/699 (31)	87/708 (33)	49/87 (37)	121/268 (47)
2022	252/687 (22)	185/284 (23)	309/691 (32-33)	161/697 (35)	46/102 (39)	103/219 (49)
2023	209/744 (20)	208/314 (21)	294/746 (28)	127/765 (33)	144/475 (36)	116/204 (39)
2024	143/709 (21)	187/371 (22)	248/708 (29-30)	120/724 (34)	118/473 (37)	83/168 (40)

The two composite counters shown are derived explicitly: study = not updated + none; re-evaluation = not performed + result missing. All components can be found in the compact JSON annex. There is no published union here that allows the sum of these columns as the number of failed children.

Follow-up and supervision prior to change of definition

Publication	Deficient six-month follow-up	Deficiently personalised supervision;	Original page
2020	50/103	27/101	35, 37
2021	38/76	24/74	38-39
2022	48/81	30/78	40-41

From 2023, three-month follow-up is measured in all relevant case types, not only the older placement sub-sample. Operationalization is changing at the same time. Therefore, raw falls or increases in percentages are not in themselves evidence of changed municipal law compliance.

What "met" covers

Publication	Conversation requirements	Actual prior interview on action	The Board of Appeal's own emissary reason for opt-out without municipal documentation;
2020	395/717	245	94
2021	426/699	278	51
2022	382/691	201	58
2023	452/746	250	78
2024	460/708	260	74

The last two columns are subsets of the first column. The rest includes, for example, documented opt-out, interview as part of investigation and child rejection. The reasons for the abstention are the assessments of the Ankestyrelsen; they do not prove a concurrently documented municipal statement of reasons. The criticism of the method is to preserve this difference in reporting legal certainty.

Reproduction and status checks

The compact annex boernesagsbarometre-2020-2024.json contains the actual component figures, URL, pages, SHA256 and local status. Figures for 2020 and 2023 without usable text values have been read visually; temporary checking images have been deleted. The 2024 details in praksisundersoegelser-kompakt.json repeat the same report and must not be added again.

Years refer to publication. No five-year-old case is a number of unique children. The three-year report on 2020-2022 repeats those years of data and shall not be added as a new sample. Links with unique children / parents, actual duration of placement and termination require identifiers and subsequent procedures.

Pilot 2019: documented errors in uncontested child cases

The first pilot of the Child Case Barometer documents serious failures in municipal fact-finding, involvement and follow-up, including in cases never appealed to Ankestyrelsen. The November 2019 report has now been recovered together with both original annexes. All 42 main pages, 6 methodology pages and 20 municipal-annex pages have been read in memory. The raster figures not reproduced by text extraction have been read visually, including all 17 municipal figures. No public original PDF, full text or original page image has been saved locally. Our numerical records contain the values of all 18 actual main figures, with figure 2.5 split into two denominators: 19 table extracts/67 category rows, the methodology municipality table's 12 rows and the municipal annex's 204 rows. Figure 1.1 in the main report is a reading illustration, not another study population. [BBP19, physical 4-7; BBP19M, 4-6; BBP19K, 4-20]

Selection: 228 cases are not 228 errors, places or different children

The 12 municipalities contributed 228 cases: 115 family-treatment cases and 113 placement cases. Four were compulsory placements, and 109 voluntary placements are the documented difference 113−4. The municipalities were selected for variation in size and geography; contribution size followed municipality size and socioeconomic index. Allerød 10, Esbjerg 47, Frederikshavn 24, Greve 16, Hillerød 15, Langeland 9, Lolland 27, Odsherred 14, Rebild 10, Rudersdal 13, Silkeborg 29, Skanderborg 14. Langeland's nine are an express exception to the methodology's minimum of ten. [BBP19, 5; BBP19M, 4-5,table 1.1; BBP19K, 4,figure 1.1]

The municipalities were to submit the latest decisions within 7 November 2015- 7 November 2018. One third of the accommodation cases had to be at least one year old in order to check the follow-up; the Annex indicates the decision by 7 December 2017. This separate printed date is not retained and is not replaced by an estimated November date. The proceedings were not to be appealed against Ankestyrelsen. The municipalities were instructed not to select any more. The population already complained of is thus excluded from the call and the errors of the pilot must not disappear in the overall coverage of the report because the complaint statistics do not contain them. At the same time, the exclusion does not in itself provide a controlled personal union with other investigations or subsequent complaints. [BBP19M, 5]

Each municipality was asked for 15-20% more cases than the planned number. All submitted more than were ultimately reviewed, and unsuitable cases were excluded. The precise submitted quantity and absolute exclusion count are not published in the originals read.15-20% is a requirement in the request for cases, not an actually counted exclusion account. Consultation with the municipalities led to some changes in results in two cases; the category and direction of the changes are not stated. [BBP19M, 4,footnotes 1-2; 6]

The Appeals Board assessed only the records submitted and actions within the review period. The methodology annex rejects the proposition that each municipality's sample is representative of all its cases and provides no basis for ranking the municipalities' overall lawfulness. The combined material is described as a better basis for illuminating overall practice; no nationally weighted representative error rate is documented here. Nor are there individual identifiers to count distinct children, parents or families. [BBP19, 5-7; BBP19M, 6]

Errors with the actual denominators

Test requirements	Documented non-compliance;	Limitation and original
Current child welfare assessment/update	70 / 228: 48 not updated and 22 without survey	100 current studies, 45 updates and 13 legal exceptions; BBP19, 15-16, Figure 2.1
Four-month deadline	64/100	Only first-time studies; none of the 64 had documented special circumstances as justification; 16-17, Figure 2.2
Reasoned position on the measure	5/145	All five were new studies; 18, Figure 2.4
Investigation / update completed before decision	19 / 145: 11 / 100 new and 8 / 45 updates	Legal acute / provisional exceptions 11 + 14 are omitted by the malfunction counter; 19-20, Figure 2.5
The child's interview in the study	8/137	145 minus 8 unborn; 22-23, Figure 3.1
Pre-decision children's interview	99/226	228 minus 2 unborn; 25- 26, Figure 3.3
Current action plan with the necessary effort	52/228	172 satisfied and 4 legitimate exceptions; 7 out of 52 had a plan without indicating the necessary effort; 28-29, Figure 4.1
Three-month follow-up	20/36	38 older placement cases minus 2 terminated before appropriate checks; 30-32, Figure 5.1
Six-month follow-up	20/33	36 minus 3 without relevant six-month period; 32-33, Figure 5.2
Two annual interviews during personal supervision	9/33	Location with relevant duration; 33-34, Figure 5.3
24-hour notification assessment	32 / 248 notifications	Lack of documented evaluation; 198 cases, not 248 children; 35-37, Figure 6.1
Re-assessment following new notification	25 / 57 notifications: 8 without visible result and 17 without visible reassessment	Initial notification only after decision; 40-41, Figure 6.5

All tables refer to BBP19. They are overlapping sections of error and investigation. The largest directly documented error sample is 99 cases with 48 errors, but no case-front union is published across all types of errors. Therefore, it has been demonstrated that at least 99 of the 228 cases of the sample have that failure; a precise total number of cases or children failed cannot be calculated by adding up the rows. The 33 or 36 follow-up cases are a committee from the placement cases and cannot be made a control of all 113 locations. [BBP19, 25-26; 30-34]

The 64 deadline overruns comprised 34 exceeding a further three months, 14 exceeding one and up to three months, 14 between one week and one month, and two under one week.34 cases thus had a total duration exceeding seven months from the point that triggered the four-month deadline; this is our own time inference from two documented intervals, not published individual dates. The report does not provide actual completion dates, a deduplicated child count or follow-up on harm for the 34. [BBP19, 17,fig 2.3]

The 99 errors in the child interview were 49 without a completed or legally diselected interview, 26 with a conversation about anything other than the specific measure and 24 with the conversation after the decision. The 127 lawfulcases were 95 with timely concrete interviews, 13 with a documented legal opt-out and 19 where Ankestyrelsen on the basis of the information provided in the case, it was subsequently considered that the opt-out could be justified even if it did not appear in the documents. At the time of the interview during the investigation, 129 cases of law were similarly 117 committed, nine documented diselected and three on the grounds of subsequent action by the Appeal Board. The skeleton shows that compliance in the barometer does not always mean that the child was actually heard or that the municipality documented the reason for the aberration. [BBP19, 23, footnote 2; 26]

Among the 20 errors in three-month follow-up, 16 lacked timely follow-up, of which ten received it later, three lacked a position on reassessment of the action plan and one lacked a position on changing the intervention. Among the 20 errors in six-month follow-up, 19 lacked timely follow-up, of which 12 received it later, and one lacked a position on

review of the action plan. A later check is not timely and the information does not establish that the child was repatriated, the effort corrected or the effect restored. [BBP19, 31- 33]

Notifications: 248 incidents in 198 cases

In 141 cases, there was only a controlled notification before the decision, in 50 both before and after, and in seven only after. This gives 191 before + 57 after = 248 notifications in 198 cases; the last 30 of 228 cases are not included in this notification section. Only the last before and the first after the decision was examined, and only the file information which the municipality had designated as notification.248 is therefore neither all the notifications in the cases nor 248 different children. [BBP19, 35-36]

At 30 notifications, the municipality had assessed urgent needs and responded. The municipal annex allocates these to 28 before and two after the decision.100% response among these 30 does not say that all other information received was correctly identified as notifications, that all needs assessments were correct or that timely action is documented for all 228 cases. The 32 undocumented 24-hour assessments and 25 reassessment errors must be independent. [BBP19, 35-37; BBP19K, 18 / 20, Figure 6.2 / 6.4]

Following the most recent concern report before the decision, the municipality had, within two months, contacted a holder of parental responsibility for 154/191 reports, spoken to the child for 87/191 and decided on an assessment/update for 52/191. Six had no visible action after the 24-hour assessment, while 15 were in process without a particular case step. Following the first concern report after the decision, the figures were 38/57 with parental contact and 21/57 with a child interview; six had no visible action after the 24-hour assessment and four were in process without particular case steps. All other category counts appear in the reading annex. Several actions may concern the same report. Neither contact nor being in process is in itself redress for an earlier error. [BBP19, 38-39,fig 6.3/6.4]

Benchmarks of the municipal annex and round-off of the main report

The municipal annex is now fully numbered: 17 figures × 12 municipalities = 204 rows. There are no 204 new cases. It also contains various control sections, which are grouped together in the main report: 179 existing action plans are tested for the indication of effort, as opposed to 228 for the actual existence and legal exception of the plan itself. The 52 plan errors of the main report contain the seven existing plans without sufficient indication of effort. [BBP19, 28-29; BBP19K, 12-13]

The main report breaks down parental responsibility information across 145 assessments: 129 with information from the relevant holders, two with unresolved parental responsibility, 12 from only one of two holders, and two without information. The municipality annex's binary yes/no figure has 143 as its overall denominator; Silkeborg's 17 in the assessment extract is 15 here. This is consistent with excluding the two unresolved cases, but is not an additional assessment population. The main report describes this as an involvement indicator rather than the separate statutory requirement being measured. The 14 missing/partial parental information entries therefore cannot, without further legal examination, be labelled as 14 independently established breaches of law. [BBP19, 23-24,fig 3.2; BBP19K, 7/10,fig 2.3/3.2]

The 69% compliance of the main barometer in the current investigation includes the 13 legal exceptions. The rounded percentages 44 + 20 + 6 give 70%, while the actual legal category counters 100 + 45 + 13 = 158 of 228 give approximately 69%. Both original figures are preserved. Similarly, 87% total compliance before decision is a total sample of 145 and cannot be reconstructed by adding rounded percentage labels from the 100 / 45 subsections. [BBP19, 8 / 15 / 19]

Importance for children, time and responsibility

The material documents that municipalities could initiate measures without the safeguards examined for a current factual basis, the child's participation, a usable plan or timely assessment of continued intervention. In the placement subset, missing follow-up may mean that a necessary change or termination is not assessed in time while the child and parents remain separated. This is the specific protective function that the former Social Services Act §§ 50, 48, 52, 140, 70, 148 and 155 a were intended to secure. The errors' precise significance for legal authority, validity, duration and actual loss must then be examined in the specific cases. The pilot report does not in itself document that all 113 placements lacked legal authority, or how many children actually returned home after the review. [BBP19, 14/19/25/27/31/33/36/40]

The strongest valid requirement of these findings is a control account linking each error point to the specific decision, the child and rightholders, the authority's date of designation, correction, possible repatriation, reunification, support, financial loss and actual liability. The consultation shows that the municipalities were provided with their case results; the originals do not give the date of each municipality or subsequent legal restoration. The error rate must therefore be supplemented by the authority's knowledge and actual action rather than producing the publication as the end of responsibility. [BBP19M, 6]

After the addition, the study volume for 2019-2024 is 228+3.629=3.857 case occurrences in six annual/pilot publications. The consolidated report for 2020-2022 adds no new cases. There is no verified union of individuals or error cases for the 3.857, and the pilot's different selection and decision period must be retained. The outstanding retrieval work is complete for the three 2019 originals and all printed figure values. Remaining substantive data needs are the precise submission/exclusion counts, stable case/person identifiers, the direction of change following consultation on two cases, and the actual redress/accountability trajectory. No external request has been sent.

Pilot of the Children's Day Barometer 2019: original figures and rows of municipalities

All figures come from the November 2019 version. The main report, the methodology annex and the municipal annex are fully read in RAM. The figures are translated into own reading tables. Physical page number is also printed page number. - means no printed percentage / no shown category column; the zero denominator is only written where the original shows 0. The percentages are rounded and the exact category counters of the municipality are not constructed. The rows are several sections of the same 228 cases and 248 notifications. They must not be summed up as different children, misguided citizens or decisions.

Table 1.1 of the Annex to the Methodology: municipal contribution

BBP19M, Physical 5

Municipality	Number of cases in judicial review
Allerred	10
Esbjerg	47
Frederikshavn	24
Count	16

Children's barometers 2021: all municipal and case type annexes

All 12 municipal tables with 324 municipal rows and all 16 case typtables are actually numbered. The local percentage cells and denominators are located in the children's barometric municipal annex. The Annexes repeat the main sample and give no new population. [BB21ANNEX]

Local government table	Measure	Published absolute total or visible denominator sum	PDF
2.1	Type of decision	702 public visible denominator; suppressed series missing	55
2.2	Investigation	687 public-visible denominator; suppressed series missing	56
2.3	Four-month deadline	335 public-visible denominator; suppressed series missing	57
2.4	Reasoned position	451 public-visible denominator; suppressed series missing	58
2.5	Pre-decision investigation	451 public-visible denominator; suppressed series missing	59
2.6	Study interview	436 publicly visible denominator sum; suppressed rows missing	60
2.7	Parental information	448 publicly visible denominator; suppressed rows missing	61
2.8	Prior to decision	693 public-visible denominator; suppressed series missing	62
2.9	Action plan	702 public visible denominator; suppressed series missing	63
2.10	Action of the plan	605 public-visible denominator; suppressed series missing	64
2.11	24 h last notification before decision	581 public visible denominator; suppressed series missing	65
2.12	24 h first notification after decision	231 public-visible denominator; suppressed rows missing	66

Case-type in order **placing / family treatment / overall**. The categories are rounded percentages.

3.12 Response to urgent needs	52/45/97	Yes 100 / 98 / 99; no 0 / 2 / 1	73

Table; Objectives	Cists	Percentage categories	PDF
3.13 Steps after last notification before decision	242/343/585	Parental contact 67/72/70; child interview 38/25/30; assessment 21/24/23; measure 56/20/35; information 8/15/12; existing assessment 5/6/6; process 12/8/9; none 2/6/4; § 11 offer 0/1/1; others 21/19/20	74
3.14 Steps after first notification after decision	112/166/278	Parental contact 32 / 67 / 53; child conversation 26 / 25 / 25; study 3 / 3 / 3; no change 9 / 19 / 15; second rate 3 / 1 / 2; information 2 / 6 / 4; location 9 / 0 / 4; process 39 / 13 / 24; none 13 / 8 / 10; § 11 offer 0 / 0 / 0; other 14 / 23 / 20	75
3.15 Re-evaluation	111/157/268	Yes 52 / 57 / 55; result defects 5 / 6 / 5; none 43 / 38 / 40	76
3.16 Reconsideration result	58/89/147	No change 79 / 75 / 77; second rate 14 / 18 / 16; information 2 / 6 / 4; second 5 / 1 / 3	76

Own source control: main figure 2.3 PDF23 indicates 146 deadlines, broken down by duration 9 / 26 / 48 / 63. Case Type Table 3.3 PDF69 has 41 + 104 = 145 and 17% in the 1 week-1 month range, compared with 18% in the main figure. Table 3.4 has 475 against 476 of the main measurement. These denominators are visually controlled in the original; no simultaneous explanation has been found. Require case allocation key and correction / version history rather than harmonising them.

Ærø and cells below 6 are hidden in publication and included in the overall sample. Municipality tables 2.11/2.12 concern, respectively, the last concern report before and the first after the decision; they are not the complete population of 863 concern reports.

Our methodological analysis: repeated questions may concern the same case; rounded percentages do not determine every integer cell. Missing documentation held by the reviewer must be distinguished from evidence that an action was never carried out. The identified procedural and documentation deficiencies must be checked separately against citizens' original case records, timelines and legal consequences. The tables do not provide unique children, parents, employees, return-home dates or total intervention duration.

Children's barometer 2022: all municipal and case type annexes

All 12 municipal tables with 372 municipal rows and all 16 case typtables are actually numbered. The local percentage cells and denominators are located in the children's barometric municipal annex. The Annexes repeat the main sample and give no new population. [BB22ANNEX]

3.16 Reconsideration result	76/40/116	No change 78 / 75 / 77; second rate 8 / 10 / 9; information 8 / 13 / 9; second 7 / 3 / 5	78

Our source verification: municipality table 2.7 PDF63 gives the binary parental-information item for 399 cases, while detailed case-type table 3.7 PDF72 distributes 400. Table 3.4 publishes an overall 99% yes and 2% no; rounding can give 101%, and the absolute counts 394/6 in table 2.4 are retained. Allerød/Samsø and cells below 6 are publicly suppressed and included in the total sample. Municipality table 2.11/2.12 concerns notifications before/after the decision, not all 802 notifications.

Our methodological analysis: repeated questions may concern the same case; rounded percentages do not determine every integer cell. Missing documentation held by the reviewer must be distinguished from evidence that an action was never carried out. The identified procedural and documentation deficiencies must be checked separately against citizens' original case records, timelines and legal consequences. The tables do not provide unique children, parents, employees, return-home dates or total intervention duration.

Children's Day Barometer 2023: full annexes and internal deviations

PDF45-64 actually reviewed .12 municipal tables / 444 municipal rows, including suppressed Fanoe / Læsø rows, are registered in the children's barometric -municipal annex stal.json. The unity of local numbers is absolute; local categories are percentage. These tables repeat main sample 765 cases. [BB23ANNEX]

Local government table	Absolute categories in original order; denominator	PDF
2.1Decision	286 voluntary / 11 compulsion / 468 family -second; n 765	46
2.2Investigation	468 Yes / 67 Legality / 72 No; n 607	47

Own source criticism: commune table 2.2 n 607 contradicts the main measurement and case type table 3.1's n 744. The table keeps the same 468 yes and 67 legal grounds as the main measurement, but only 72 no against the 209 main measurement. No simultaneous explanation has been identified. This cannot be solved by adding the different denominators, replacing one row or assigning the difference to sorted persons without proof. The specific request for authority is to provide version history, measurement scheme / cell counters and correction of Table 2.2.

Table 3.10 shows 297 + 431 = 728, while the total is 765. The basic population is 297 + 468 = 765, but the 431 of the original must be maintained as an unexplained source deviation. Table 3.14 shows 87 + 106 = 193 against total 204. The certified total denominator 765 / 204 of the same main tables shall not be used as proof of the type of case without a vote. It is a local delineation of the evidence value, not a justification for explaining away the other specific errors documented.

Fanoe / Læsø and categories under 6 are not published for reasons of discretion. Cases, decisions and return are not listed in the Annex. Percentage rounding does not allow unique absolute counters for all cells and 0% is not explicitly equal to 0 cases. There is no documented union of different procedural errors or of parents / children. Therefore, these tables are recorded with their own delimitation and repeat of the same sample marked.

Children's barometer 2024: all municipal and case type annexes

Original PDF46-66 actually reviewed. The 324 municipal rows (12 targets × 27 municipalities) and total rows are registered in the bonebarometric -municipal annex stal.json; table numbers 2.1 / 2.2 are mistakenly recycled in the original PDF57 / 58, so the physical side is the secure locator. The local authority distribution of information is not published here. The same 724 cases appear in the main findings, municipal and case-type annexes; no new sample. [BB24ANNEX]

All case types below: **placement / family treatment and other / total**. Percentage indications shall be kept rounded. The denominator varies per process requirement.

Table; Objectives	Cists	Percentage categories in order	PDF

Table; Objectives	Cists	Percentage categories in order	PDF
3.14Review	68/100/168	Yes 46 / 54 / 51; no 53 / 43 / 47; results 1 / 3 / 2	66
3.15 Reconsideration outcome	31/54/85	Amendment No 81 / 81 / 81; second rate 0 / 4 / 2; additional information 6 / 9 / 8; second 13 / 6 / 8	66

Own source criticism: Table 3.1's summed mention 709 contradicted by its note 707. Table 3.14's summary mentions 168 contradicted by the note 204. The original's main numbers are 709 and 168. The deviations have been visually confirmed; no tacit correction of the source has been made. PDF46 says that no local authority figures under 6 cases appear; PDF49 still publishes Halsnæs 5 cases / 40% -0% -60%. Unpublished rows are null / missing, never 0 errors.

Percentages cannot simply recreate absolute numerators. Copenhagen has 256 basic cases, for example 249 cases in the case of a child conversation; rounded percentages can therefore fit several integers. Also total rows require the original absolute counters from the main report. Table 3.7 explicitly states that 0% may contain one case. A complete table register shall not confuse rounded 0% with proven absence.

A missing submitted study or action plan is included in the category of absence, even when AS considers that the document might exist. It is a lack of documentation and control; the concrete justification must be retained before it is given the same legal effect as documented failure to produce. Parents' information, contact and proceedings are not unique parents or children. According to the report's own method, the case types and local samples are too small for the generalisation indicated; this only limits the extrapolation, not the documented control findings.

Specific additional data required: absolute cell counts in annexes 2/3, public correction of note 707/204 and the suppression threshold 5/6, municipalities' complete learning notes and exclusion accounts. Later correction/return home is not documented by these tables.

Children's barometers 2020-2024: all published municipal annex number;

The tables show the controlled original cells with the municipality, category, denominator and physical PDF page. Commune rows are percentage, while a number of explicitly marked numbers are absolute category numbers. Hidden figures are "not published"; a published zero denominator means no relevant measurement basis. All subtargets recycle the main samples. There shall be no cross-reference to persons or separate cases.

Original deviations are retained: 2023-commune table 2.2 has n 607 and 72 no against the main / case type measurement n 744 and 209 no. 2024 reuses table numbers 2.1 / 2.2 on PDF57 / 58; physical page and subject identify them. Later years of hidden cells below 6 do not apply as an automatic rule for 2020, where, among others, denominators 1-5 are published.

2020: municipal tables

[BB20ANNEX] All of the rows below are actually numbered. Fanoe 7 / Læsø 3 is hidden in the commune view and is included in the main total 735.

Children's Day Barometer: pilot, break and new populations

Original information	Year; numerator / denominator or delimitation	Locator
Pilot	2019: 228 uncontested cases / 12 municipalities; 115 family treatment and 113 places	BBP19, physical 5; BBP19M, 4-6, now all three originals read
Collector report	2020-22: 2.140 cases; pilot 2019 omitted; 3 free municipalities excluded	BBSAM22, PDF4, footnotes 1-2
New Barometer	2026: 385 cases per year; first new edition according to the child's law	BBPLAN26, section Children's Day Barometer
Legal review	2026-28: 330 unchallenged accommodation cases / 60 municipalities	BBPLAN26, Section Legal Service Oversight
VIVE evaluation	2026-29:≈1.000 cases planned	BBPLAN26 Title Contribution to the VIVE evaluation
Implementation status	2024-25:up to 10 cases in approximately half the municipalities;9 municipalities' special processes separately	BBPLAN26, Direct aid
Task Force Capacity	4 children's courses per year; 2 years / years	BBPLAN26, Task Force Children

AS's full current publication catalogue shows barometers 2020-24 and not a release marked 2025. The dated 2026 plan describes the new edition as the first under the child's law. This documents a series and method break; therefore, an unread 2025 barometer should not stand as a known available original. It is still necessary to have the Authority's publication register confirm the full historical publication status. The 2026 figures are plans and capacities, not evidence of completed samples or breaches of law.

Own counting check:735+708+697=2.140, precisely the same three studies. The combined report adds no new cases. Adding 2023/24 yields 3.629 case entries in five publications; with the 2019 pilot now checked against the original, the result is 3.857=3.629+228 in six publications. Without identifiers, this is not a count of unique children or cases affected by error. The plan's initial≈1.000 cases and≈1.000 VIVE cases have not been documented as separate from one another; they must not be added together. Checking implementation status requires actual numbers of municipalities and cases submitted/reviewed. A maximum of 10 is not an actual 10 in every municipality. Unappealed placements are selected review populations and must be linked to the appeal population through stable case IDs before forming a union.

The pilot's original AS address still returns 404, but the official original and both separate annexes have now been rediscovered in the public archive and read in full in RAM:42+6+20 pages. All main figures' numbers, the methodological municipality table and 17 municipality figures/204 rows are included in boernesagsbarometer-pilot2019-originalkontrol.md and the reading annex. The outstanding task of obtaining the 2019 originals is therefore closed. Still required are the exact submission/exclusion counts, identifiers, the direction of the two outcome changes arising from consultation, actual redress/accountability follow-up and a publication/annex register for 2025-26. No external request has been sent.

The four handicap barometers: actual source control

Control 7 October 2026. Unit: measured municipal decision-making cases; neither unique citizens nor national errors. The four samples represent 1.540 case measurements. Individual overlap has not been published. Figures below are actual numerators of the originals, not conversions of rounded percentages. Several types of errors may occur in the same case.

Code / area	Barometer / Release / selection of decisions;	Case / k omune r	Legal deficiency	Would be overturned	Stadstis, of which with deficiency
HB23, escort § 97	2023 / April 2024 / latest 2019-20.12.2022; some later substitutes	385 / 98	198/385	180 / 385, total; no breakdown	205 / 385; derived 18 with deficiency
HB24B, additional expenditure children § 41	2024 / March 2025 / latest before 6.10.2023; some subsequent replacements	385 / 98	193/385	175/385 = 170 remitted for reconsideration + 5 amended	210 / 385; derived 18 with deficiency

Code / area	Barometer / Release / selection of decisions;	Case / k omune r	Legal deficiency	Would be overturned	Stadstis, of which with deficiency
HB24V, additional costs for adults § 100	2024 / March 2025 / latest before 1.12.2023; some subsequent replacements	385 / 97	50/385	39/385 = 33 remitted for reconsideration + 5 amended + 1 annulled	346 / 385; derived 11 with deficiency
HB25, lost earnings § 87	2025 / 2025 / latest around 6.7.2024; 11 later decisions	385 / 98	206/385	186/385 = 151 to be remitted + 29 amended + 6 annulled	199 / 385; derived 20 with deficiency

The derived numerators in the last column are deficiency counts minus overturning counts. In HB25, 206 is also 385 minus 179 without deficiencies in table 3.1. A full machine-readable record of the checked component figures is in handicapsagsbarometre-2023-2025.json.

Control Point	HB23	HB24B	HB24V	HB25
Insufficient information; substantial part in brackets	165/385 (162)	155/385 (150)	32/385 (26)	157/385 (157)

Complaint guidance missing / required	7/92	18/283	1/308	6/249
Insufficient guidance given	27 / 92 also includes 7 missing persons.	18/265	0/307	49/243
Overall assessment missing / can be assessed	157 / 299; 86 unknown by 385	40 / 385; 15 unknown	5 / 385; 56 unknown	12 / 385; 3 unknown

HB23:293 awards, 92 full/partial refusals; appealed decisions excluded. 14 municipalities had no suitable refusal that had not been appealed. Excluded decisions lacked decision documentation, were outside the period or had been appealed; the number is not stated. Additional request 15-20 %. Action plan:58 offered, 26 not offered among 84 assessable award cases; 227 of 311 unknown. Locator:pp. 4-8, 10-19, 21-23.

HB24B: 102 full awards, 218 full/partial refusals/awards, 65 mixed partial decisions. Appealed cases concerning the same additional expense and repayment cases excluded; exclusion count not stated. Extra 15-20 %. Deadline: 123 irrelevant, 42 unknown. Six cases could give rise to supervision; three from the same municipality led to one referral. Locator: pp. 6-12, 15-21, 24-33. The deadline-overrun heading »two out of three« on p. 25 does not match 102/220 on p. 27.

HB24V: 75 full appropriations, 193 total / partial refusals / appropriations, 117 mixed; one municipality without available cases. Appeals against the same additional expenditure are excluded, previous complaints may be made; number not disclosed. Deadline: 134 irrelevant, 29 unknown. Three cases from one municipality led to supervisory contact. Locator: p. 6-12, 14-18, 23-33. The 2025 file name is not the barometric year.

HB25: 135 full appropriations, 143 full refusals, 107 partial. 80 excluded: after the cut-off date, appealed or without a proper decision; causation not disclosed. The same alleged facts are excluded, previous complaints about other permitted. 102 follow-up; 28 unknown deadlines. 317 decided after 1.4.2024. Child involvement, descriptive measurement: 109 direct, 47 indirect, 194 none, 2 unknown / 352. This is not registered as 194 breaches of law. Party consultation provided that the documents did not show otherwise. Locator: p. 11-17, 38-50, 52-61.

Independent method assessment

The publication does not indicate a CPR-based register that can link case measurements to unique children, parents and adults across the reports. Deficiencies in one decision must also not be added together as multiple cases of error. Measurements shall be subject to submission of documentation. The Board of Appeal's statement on generalisability must be tested against the selection, distribution and separation of municipalities; the national error rates of the reports are not a total count.

Required additional extraction from Ankestyrelsen: all cases submitted and withdrawn by report and cause, anonymous decision and person keys, the outcome matrix, all subtabular counters, and the municipal measurement plan. The municipalities are the registries authority for the total population of their decisions; HB25 p. 52 documents the absence of a common national database and the lack of access of the Appeal Board to municipal professional systems.

Use of force 2018: the practice review's actual population

The original's preface, method and Table 1 are checked; Table 1 also visually. 46 interviews in seven municipalities, completed 2017. 15 preliminary interviews concern § 129: 9, § 125: 5, § 126 a: 2, § 126: 1, § 127: 4; categories overlap. The municipalities chose care centres / accommodation and facilitated contact with relatives. [PTMAGT18, PDF3-4 / 62-65]

Municipality	Management	Head care	Residential manager	Employee care	Employee other services;	Pears
Aalborg	4	0	2	0	3	3
Ballerup	3	1	1	2	3	3
Hillerød	4	2	2	3	2	4
Holbæk	4	2	0	2	0	0
Cold	5	2	1	3	3	3
Medium speed	5	2	1	4	3	1
Rudersdal	4	1	1	3	3	1

Table 1 indicates the number of participants, not the number of interviews or documented unique persons. The own sum is 96; role columns 29 / 10 / 8 / 17 / 17 / 15. Zero reproduces the dash of the table, not the absence of the problem. [PTMAGT18, PDF63 / print61]

The source describes locked exits with a single lift that not all residents can operate and the use of monitoring sensors; it fails to make a legal decision on the legality of each practice description. There is no public fault counter here. [PTMAGT18, PDF23-27]

Own analysis: It is concrete descriptions that require investigations into freedom interventions, consent and legal basis. The descriptive form of the report is not evidence of legality. Each course must be documented by the original report, decision, consent review, duration and access to the site; the number of interviews cannot be used as the number of illegal detention exercises. A separate control of public / private operations and responsible employees is required. The Ministry's subsequent service review is a source of its own, which is not counted as a new population of 46 interviews.

K05 remaining work: publication of the 2019 pilot barometer is documented, but the full original has not yet been located on the current public website. Its 228 cases cannot be replaced by the 2020 report’s 735 cases or the 2022 compilation’s 2140.2019 figures reproduced by Børns Vilkår remain secondary until checked against the original. There is not yet evidence that the practice-check list is exhaustive.

Use of force 2018: full verification against originals and safeguard problems

MAG18F. All 85 pages actually read in memory. 5 number / method blocks / 67 rows. PDF63 and 66- 85 visually read.

Limitation

46 interviews, seven selected municipalities, 15 interviews with relatives. A descriptive survey without a lawfulness assessment. Statutory-provision groups overlap. Municipalities provide contact with institutions/relatives. Figures measure interviews/participation/statements; no national error rate or union of persons. The methodology period is the 2nd+3rd quarter of 2017; the summary's 2nd quarter is retained separately.

M1: Method and demarcation

MAG18F PDF62-65; mentions 46; unit interviews. Descriptive; no quality / legality assessment. Municipality selection geographical / technological variation; administration selects institutions and communicates relatives. Selective transcription; quotes edited; institutions anonymised.

Measurement	Figures	N / unit
Municipalities	7	selectively selected
Interviews	46	Group / Single Interviews
Early interviews	15	interviews;
§ 129	9	15
§ 125	5	15
§ 126 a	2	15
§ 126	1	15
§ 127	4	15
Paragraftalker, sum	21	overlap; not 21 persons
Management groups	3-5	informants per group,
Data collection	2. + 3rd quarter 2017	PDF62; Summary 2nd quarter

T1: All original municipal cells, visually read

MAG18F PDF63; mentions 7; unit participants in role groups. No number of interviews or citizens concerned. The pear deceller sums up 16; method PDF64 indicates 15 interviews. Participants → interviews; no automatic error correction or personal union.

Municipality	Management	Head nursing centre;	Residential manager	Employee nursing centre;	Employee other services;	Pears
Aalborg	4	-	2	-	3	3
Ballerup	3	1	1	2	3	3
Hillerød	4	2	2	3	2	4

58	Child-like development is used in the desire for increased coercion	Interview statements; non-legal consent

Own evidence and impact assessment

The limited investigative method is not a defence of the actions the informants describe. When employees themselves discuss unlawful action, inadequate consent or missing registration, this is specific documentation that such problems were put before a State oversight authority. It supports a sustainable demand to investigate the underlying actions and the authorities' subsequent response. It does not on its own provide a precise national scope or evidence of a particular employee's criminal culpability.

The strongest documented criticism is the difference between known risk and lack of concrete response accounts. A consent based on a led hand or a lack of understanding shall be tested for effective decision-making and voluntary. Care needs do not replace the legal basis for freedom intervention. Technology can both limit freedom and make movement possible; its actual use must therefore be tested individually. Failure to register may, at the same time, prevent complaints, independent checks and subsequent documentation of the duration of the action.

Each claim should be linked to the original file, consent assessment, decision, registration, activation and possible complaint. The requirements are the cessation of illegal interference, effective participation, necessary less intrusive alternatives, independent investigation and appropriate repair. The trajectories cannot be deduced without the anonymised coupling keys and underlying acts. Suspicion of unregistered interventions, repetition after 2018 and lack of responsibility require precisely these concrete evidence.

All known readable pages and instrument attachments in this original have been reviewed. The remains are individual acts, full recordings / notes, switching keys and actual reaction / follow-up; no known unread table page stands as completed. Historical rule boxes are not reproduced as applicable 2026 law.

MAG18F — Ankestyrelsen March 2018, main report and annex. SHA256: c440304ce7c9071dcfbff1b8c691d54634dbb260a0d0d42371e39b211385409b.

Task Force 2012- 2024: the central forerunner list and report coverage check

The official list contains 43 courses of 42 municipal names; Odense is divided into two administrations. Parentheses are expected dates on 7.5.2024, not completed. The PDF text has been read; available image control is still being sought. The list is a search base, not a substitute for the content of the analysis and final reports.

Independent coverage analysis and necessary data request

The central list makes a proven difference between identified progress and actually read reports possible. A start in 2012 does not prove an analytical report dated 2012; an end in 2024 does not prove that the children concerned actually received help, came home or received compensation. Each course shall be balanced against analysis, mid-term status, final measurement and follow-up.

Social and Housing Authority and Ankestyrelsen shall provide the list updated by 7.10.2026, all analytical / final report titles, publication addresses, phase / data periods and anonymised selection accounts. Concrete municipalities must provide restoration programmes. A lack of a central publication link does not prove that the municipality's original does not exist.

Task Force: historical children's courses 2012- 2018, first 13 municipalities

Randers 2015 (72 pages) and Ikast-Brand 2015 (79 pages) are fully text controlled in RAM with separate visual control of the key figures. To this end, five related municipal primary sources have actually been read: Ringstedpressen 2014, Nyborgskab notat 2023, Ballerup 2017's children's section, Vejlebudget 2019's 4-sided children's section and Vejlekning 2016's family section. The 13 series individual original searches and exact original / personal remains are aligned at the bottom. Related sources have not been implicitly replaced with the missing Task Force reports.

Randers 12.11.2015 [TFRAN15]

Original report, public copy * 72 pp. · SHA256 cdf024cb1d6ebd1d9424038fb3aed302fbd89952670f49dea211a558cc2cd4b8.

20 legal cases:14 section 52 decisions,3 section 11 cases,3 safeguarding-notification cases; VISO5 is a subsample,6 interviewed children are separate. The municipality selected backwards before 15.4.2015, decisions from the most recent year and cases where it was the responsible municipality; cases already appealed/examined by Ankestyrelsen, including section 65, were excluded. Physical disability alone excluded. The same child may have several decisions; the latest/most intrusive is measured. Case trajectories are examined for the latest 2 years (PDF67-68).

Original deviation: PDF59 indicates the 12 / 20 course of criticism, PDF64 text of bread / Table 3.1 indicates 14 / 20. Both are preserved; 14 are visually confirmed. The deficiency tables overlap and shall not be added together to persons.

Consequences, causality and restoration

PDF63 describes a placement decision concerning a young person over 15 without informed consent; the mother’s subsequent email does not replace the young person’s consent. This is a specific legal-authority/consent issue in the case examined. The report does not state a compulsory decision, duration of intervention or actual return home for that case.

PDF65-67 describes the closure of the VISA Committee despite untreated notifications, repeated case-handling changes, up to 2 months of meeting waiting and a lack of investigation of violence / abuse. PDF72 reflects a young person's experience that late help contributed to later placement; it is the youth's causality statement, not an independently clarified individual causality assessment.

Own personal analysis: The 20 cases, 14 decisions, 5VISO and 6 interviews are different / overlapping units. No key for dedup between them is published; one unborn child is included in the decision-making committee. The percentage of errors cannot be multiplied by the population of children or the population of appropriations in the municipality. No registered individual restoration, repatriation or reunification is apparent from this baseline extraction.

Precise residues

- Case keys / personal dedup between legal sample, VISO and interviews not published
- Baseline analysis does not actually indicate individual resumption / return / reunification / replacement

• Randers key number figures without precise point labels: original back data required for exact graph cells

• Review / Final Report 2017 not yet obtained

Further discrepancy in the Randers original: Action plan only after the decision: PDF30/60 states 5 of 7, PDF61 states 4 of 7. Both original values are retained. Main text PDF24 calls the interview group 6 children in care, while methodology/detail PDF69-71 describes 6 interviewees, including 3 in care; the interview population is not homogenised.

Ikast-Brand 22.6.2015 [TSEK15]

Municipal original in a public archive ·79 pages ·SHA256 c5e134333558db447a8ffb23921f22da16ba52bfb9f6143f896cfcdc0be84867.

The sample is 20 cases, actually 14 under § 52/2 under § 11/4 concern reports. Overview PDF61 has 14/3/3, while detail/measurement PDF66-67/72-73 has 14/2/4. Most recent/most intrusive decision; the process is examined for the most recent year. Cut-off 1.11.2014; appealed/AS § 65 excluded. PDF73 specifically states 2 already appealed cases, 2 sibling cases in which only the oldest is measured, 2 cases opened after the cut-off and 1 decision after the cut-off; replacement cases are submitted, count not stated. These exclusion categories must not be assumed to be disjoint.

Parental action plan in place	2	2

Interview Group

PDF76; unit: interviewing children. 6 children aged 12-17; separately from 20 trials.

Relationship	Number	Denomination
Girls	5	6
Boy	1	6
Placed	3	6
Preventive	3	6
Positive continuous contact	4	6
Less positive contact placed	2	6
By how to obtain contact	3	6
Unknown number but can obtain	2	6

Interview outage

PDF77; unit: interviewing children. An ordered follow-up every 6 weeks without solo conversation; not representative national persons.

Relationship	Number	Denomination
No experienced § 50 involvement	6	6
Enlightened bet before start	4	6
Missing explanation for acute placement	2	6

Relationship	Number	Denomination
Very New Bet	3	6
Systematic follow up	2	6
Only a conversation after about 8 months	1	6
Conversation alone	2	6
Know the three-house method	2	6
Child conversation positive	5	6
Know Action Plan	4	6
Form of action plan	2	6
Unknown Action Plan	2	6
Undisclosed age rights	6	6

Own-initiative vote:10 decision errors + 8 preliminary criticism − 4 overlap = 14 criticized cases; 6 without criticism. It is an actual published case union, not 14 unique children / parents. VISO5 is a subcommittee; 6 interviewing children have not published the coupling key to the trial.

Consequences and redress: PDF69-72 describes records under the mother's CPR/shared sibling records that conceal the individual child's information, and changed interventions without an updated assessment. PDF71 states work towards return home/contact in 2 placement cases, but no actual return home, reunification date or compensation. PDF77 reproduces 2 placed children's lack of understandable reasons and 1 child's first follow-up interview after approximately 8 months; these are interview statements, not durations verified against case records for all placed children.

Concrete residues: PDF1-79 is now text read. Final 2017 report, underlying graph data, individual repair and dedup required separately.

Ikast-Brand, local original conflict: PDF28 calls the two late action plans urgent cases without any pre-decision requirement. Legal Table PDF63 at the same time counts two late plans as missing, of which one is missing. PDF64 indicates 2 ½ weeks waiting time. Both statements are maintained; the material does not explain the conflict.

The newer tfh-lfb-nyborg concerns the disability area, not this child welfare process.	Analysis presented 5.12.2016 and final report presented 4.2.2019;20+20 samples, precise legal n/N, contemporaneous briefings and actual redress

Registry responsibility and specific document ordering: For each of the above series, the appropriate municipality is responsible for the child / family administration and political secretariat, as well as the Legal Task Force section and the archives of the National Social and Housing Authority. The order is the named analysis / final report with version date, legal measurement form, originally offered / replacement / excluded cases and grounds for exclusion. The personal and impact accounts require anonymised case key linked to the start of the decision / action, the date of correction, actual termination / return and any compensation. No external enquiries have been sent.

Task Force: four courses 2018- 2021, material originals

Four concrete Task Force-children courses Morsø, Varde, Skive and Sønderborg. Originals are only read in RAM; own facts, source identification and deviations are saved.

Actual reading status

- TFSON19A - Sønderborg: 61 / 61 physical PDFs pages read. Task Force Analysis Report, February 2019.
- TFSON20S - Sønderborg: 50 / 50 physical PDFs pages read. Task Force Status Report, October 2020.
- TFSKI20P - Disc: 12 / 12 physical PDFs pages read. Development plan, January 2020.
- TFSKI20K - Disc: 2 / 2 physical PDFs pages read. Municipal presentation 15.1.2020.
- TFSKI21K - Disc: 2 / 2 physical PDFs pages read. Presentation of the final report 12.5.2021.
- TFSKI19O - Disc: 1 / 1 physical PDFs pages read. Orientation point 14.8.2019.
- TFVAR21K - Varde: 2 / 2 physical PDFs pages read. Implementation status 21.9.2021.
- TFMOR20K - Morsø: 2/2 physical PDF pages read. Half-year status 21.10.2020.
- TFMOR21O - Morsø: 1 / 1 physical PDFs pages read. Estimation 21.4.2021.
- TFVAR19A - Varde: 61 / 61 physical PDFs pages read. Task Force Analysis Report, 12 April 2019.
- TFVAR20S - Varde: 43 / 43 physical PDFs pages read. Task Force Status Report, September 2020.
- TFMOR18A - Morsø: 59 / 59 physical PDFs pages read. Task Force Analysis Report, November 2018.

TFSON19A - Task Force Analysis Report, February 2019

Measurement period 1.8.2016-30.7.2018. Pending municipally selected cases concerning ages 0-17; not solely physical disability, responsible municipality for at least 1 year, no multiple cases from the same family. Already appealed/AST-processed or section 65-processed cases excluded. Physical PDF page equals printed page+1. VISO8 is a subset of AST20. Not a representative consolidated register of individuals.

Unit: cases. Names: shown in rows delineation.

Cell	Original number
0-3 years	4
4 to 7 years	1
8 to 14 years	13
15 to 17 years	2
Total	20

Table 3: overlapping decision gaps - physical PDF page 34

Unit: cases. Denomination: 13.

Cell	Original number
BFU missing	0
Current BFU update missing	5
BFU4 month deadline broken	3
Reasoned position missing	1
BFU / update not finished before decision	2
Action plan missing	0

Cell	Original number
Action plan not before decision	5
§ 48 conversation broken	8

Involvement - Physical PDF page 34

Unit: cases. Names: 13; child 12 relevant.

Cell	Original number
Child: age makes assessment irrelevant	1
Child to some extent	3
Small children	8
Child not at all	1
Parents relevant and adequate	9
Parents' rings	4
Both sufficient	3
Neither of the parties is sufficient	4
Only parents sufficient	5
Adequate parents, child old age exemption	1

§ 48 Interview - Physical PDF page 35

Unit: cases. Names: 13 / 11 / 8.

Cell	Original number
Age exemption	2
Relevant cases	11
Rule respected, of 11	3
Rule broken, of 11	8
No conversation	3
Do not talk about the measure	2
Address by decision	3
Special insignificance among 8 fractures	0

BFU: actual needs and content - physical PDF page 36

Unit: cases. Denomination: 13.

Cell	Original number
Current requirements	12
Acute, no current prior requirement	1
Current BFU or Update	7

Cell	Original number
New BFU	3
Current update	4
Update should be available	5
Special insignificance of 5 deficiencies	0

BFUs deadlines - physical PDFs page 36

Unit: cases / months up to 4 months. Names: 3.

Cell	Original number
4-month deadline respected	0
Broken	3
First exceedance	2
Other exceedance	3
Third exceedance	9

BFU: justification / closure - physical PDF page 37

Unit: cases. Names: 7.

Cell	Original number
Reason for new BFU	3
Reasons for updating	3
Deficiencies of reasons	1
BFU / update completed before decision	5
Not done, should be	2
Special insignificance in the absence of justification	0
Special insignificance in late 2 studies	0

Information on decision time - physical PDF page 38

Unit: cases. Denomination: 13.

Cell	Original number
High degree	1
Some degree	9
Low degree	3

Action plan - Physical PDF page 38

Cell	Original number
Available	12
Acute, not claim at end of period	1
Before decision, of 12	6
By decision of 12 December	6
Of which legal emergency derogation	1
Time break	5
Late: placement	2
Too late: family care	1
Too late: relief	2

Action plan: materiality - physical PDF page 39

Unit: cases. Names: 5.

Cell	Original number
Special insignificance in 5 breaks	0

Main Text Deviation: Action Plan - Physical PDF page 28

Unit: cases. Names: main text 5 / 11 against Annex 6 / 12 including legal emergency exception.

Cell	Original number
Plan by decision	5
Denomination	11

Current aid, not original legality of decision - Physical PDF page 39

Unit: cases. Names: 20.

Cell	Original number
Relevant and sufficient support	17
Unsure support	2
Not applicable / sufficient	1
Created § 65 own-account case	3
Of which § 11 offers	2
Of which § 52- measure	1

Follow-up: actual subpopulations - physical PDF page 39

Unit: cases. Names: shown in rows delineation.

Cell	Original number
Current decision and follow-up	1

Cell	Original number
Follow-up only	4
Of which location	3
Of which relief	1
Total follow-up cases	5

Follow-up and personalised supervision - Physical PDF page 40

Unit: cases. Names: follow-up 5, personalised supervision 4 placement cases.

Cell	Original number
3 months: appropriate correct	1
3 months: not applicable during the period	4
6 months: appropriate correct	1
6 months: non-regulatory interval	4
Special insignificance in 4 fractures	0
Personal supervision achieved	0
Personal supervision not complied with	4

§ 11 aid - Physical PDF page 40

Unit: cases. Names: 3.

Cell	Original number
Can meet needs	1
Not delimited, requires BFU	2

Overall progress - Physical PDF page 41

Unit: cases. Names: 20.

Cell	Original number
Special Forces	1
Attention points	8
Longitude	6
Wrong professional assessment	2

VISO subpopulation - Physical PDF page 43

Unit: cases. Names: 8 of 20; § 11 and cases without current BFU excluded.

Cell	Original number
Total VISO	8
Current BFU	5

Cell	Original number
Follow-up	3

VISO: Parental / Follow-Up Plans - Physical PDF page 49

Unit: cases / finding; precise location not specified in this section. Names: shown in rows delineation.

Cell	Original number
Follow-up proceedings	3
Parental action plans in accommodation cases examined	none

Interview take-off - Physical PDF page 51

Unit: persons / interview. Names: shown in rows delineation.

Cell	Original number
Receipt	4
Youth team	7
Children's team	5
Intermediate managers	5
Senior management	2
Suppliers	6
Childhood / youth counselling services	6
General area	5
Total persons	40
Interview	8

Requested sample, not actual distribution - physical PDF page 52

Unit: cases. Names: shown in rows delineation.

Cell	Original number
§ 52	17
§ 11	3
Installation	8
Relief	3
Contact person	3
Family treatment	3
Old placement decisions for follow-up	3

Method deviation - Physical PDF page 57

Unit: cases. Denominator: template counts versus an actual 6 current placement decisions+3 placement follow-ups only.

Cell	Original number
Referral cases	5
Of which, old decisions sought	3

Concrete documented times - physical PDF page 41

Unit: year / month; anonymised examples, not new cases. Names: shown in rows delineation.

Cell	Original number
Contact person: notification of decision	1
Contact person: decision in favour of actual support	6
Installation: decision for performance	barely 3 months
First family consultant after birth	2
The next course after birth	approx. 1 year

Management supervision, interview information - physical PDF page 11

Unit: months / hours / months; not power / legality outages. Names: shown in rows delineation.

Cell	Original number
Individual range of supervision	1
Time per employee, minimum	0.5
Time per employee, maximum	0.75
Planned Thematic Supervisory Interval	3

Prevention and method, interview information - physical PDF page 12

Unit: employees / conversations; conversation limitation actually referred to PDF18. Names: shown in rows delineation.

Cell	Original number
ICS superusers	5
§ 11 (2) maximum conversations	3

Method, deviations and consequences

• No total deduced legality union print.8 Interface breaks + 5 update gaps + 3 deadlines + 1 justification + 2 late BFU + 5 late schedules + 4 follow-ups + 4 supervision overlaps. 17 / 20 currently appropriate support is not lawfulness review at decision time; method PDF56 does not test whether the specific measure is appropriate.

• PDF34: Mother is told that silence for 14 days is considered consent to BFU and future measures; no subsequent consent documented in the report. The source reproduces anonymous proceedings; original documents are not available here. This concrete proof of consent must not be converted into a national Union of convictions.

• PDF35/37:a 9-year-old's placement decision 15.9.2017; interview only approximately 2,5 months later and immediately before implementation. BFU update valid 29.11.2017, but also contains December information. The report calls the delay at least 1,5 months, while the stated dates give at least 75 days; the difference is retained without shifting the original's figures.

• PDF35 / 42: 12 years of violence notification awaited police / video interrogation over 2 months; the municipality had not documented the grounds for postponing child interview or seeking the guidance of the Children's House. November 2016 → June 2017- BFU example PDF37 and November 2017- police track PDF42 shall not be automatically identified as the same child.

• PDF36-37: all 3 new child welfare assessments exceed the 4-month deadline by 2/3/9 months; no special immateriality. The specific 12-year-old's source concerning violence 17.11.2016→child welfare assessment 23.6.2017. PDF41: contact person decision 1 year after a concern report, actual support only 6 months later; alternative assistance during the wait not assessed.

• PDF39-40: two 13-year-old § 11 offers despite serious suspicion / psychiatric concern; 3 actual § 65 self-handling cases are described, but new decision, actual support and termination date not published. PDF49 refers to estimated location basis January 2017, actual location almost 8 months later; this is a different time concept than decision → effectiveness.

• PDF28/38:5/11 plans in the main text against 6/12 plans after decisions in the annex, where 1 is a lawful urgent exception and 5 breach the rules. PDF52 requested 17 decision cases, actually 13 current+4 follow-up only. PDF57 methodology 5 placements against actually 9 placement-related cases. Original delimitations are retained.

• PDF49:no parental action plans in the placement cases examined; PDF46:a § 54 support person is offered, but recipient count or effect is not stated. No actual return-home/reunification date, duration of all interventions or follow-up on compensation. VISO is based on AST's event overview, not an independent person population.

TFSON20S - Task Force Status Report, October 2020

Development period May 2019-May 2020, October 2020 report. COVID changes method: 4 municipal cases with BFU / Action Plan instead of usual 20 cases. Not random, not representative or identity panel. General rules of service law tested, not COVID exceptions. State cases include 3 decision cases + 1 follow-up; the same cases are examined by AST / VISO.

Source: Task Force Status Report, October 2020; SHA-256 b818f2f4d5618of8ad72a06b157acd2731deef4a65543f955bea356f66a25f4.

Sample and methodological change - physical PDF page 4

Unit: cases. Names: shown in rows delineation.

Cell	Original number
Actual final measurement	4
Normal final measurement, unselected	20

Final Case Distribution - Physical PDF page 40

Unit: cases. Names: shown in rows delineation.

Cell	Original number
Family care / mother-child stay	1
Contact person	1
New-born placement	1
Only placement follow-up	1
Total	4

Case 1: time / consent track - Physical PDF page 40

Unit: age / day / month / finding. Names: shown in rows delineation.

Cell	Original number
Age of child	less than 1 year
Consultation prior to business meeting	6
Continued mother-child stay for home support	1
Consent for proposed placement	no.
Forced base according to visitation	not found

Case 1: assessment/intervention - physical PDF page 41

Unit: months / weeks / weeks / days / finding. Names: shown in rows delineation.

Cell	Original number
Notification of BFU decision	2
BFU- start before period	7
Birth before period	3.5
Massive home support per week	5
Family treatment plan at the time of the decision	Not available

Case 2: BFU and lack of effectiveness - Physical PDF page 42

Unit: date. Names: shown in rows delineation.

Cell	Original number
First relevant notification	start April 2019
Consent to BFU	13.5.2019
BFU Decision	start July 2019
BFU finished	end January 2020

Case 2: Legal and material outcomes - Physical PDF page 43

Unit: months / weeks / finding / case. Names: shown in rows delineation.

Cell	Original number
BFU deadline exceeded	5.5
BFUs start after consent	7
Actual support at end of review	none
Notification to the Technical Service of the European Communities	1
§ 65 own-account case actually created	not documented,
Contact person start-up meeting	not held

Case 3: new birth - Physical PDF page 44

Unit: notifications / months / finding / targets. Names: shown in rows delineation.

Cell	Original number
Notifications prior to mother involvement	4
Time for Mom's first involvement	2
BFUs time	barely 4 months
Installation	voluntarily immediately after birth;
Action plan	3

Case 3: end of observation - Physical PDF page 45

Unit: date / finding. Names: shown in rows delineation.

Cell	Original number
Installation	end April 2020
Acts submitted	end May 2020
Follow-up requirements at end of measurement	not yet entered

Case 4: Placing / Follow-up - Physical PDF page 45

Unit: date / follow-up / visit / finding. Names: shown in rows delineation.

Cell	Original number
Decision	September 2017
Actual placement	November / December 2017
6-Months Follow-Up 2019-20	2
Conversations at location 2019-20	2
3-month follow-up	outside the measurement period;
Action plan	similar from 2017, superior

Cross-cutting appendix conclusions, overlap - physical PDF page 46

Unit: cases. Names: 4.

Cell	Original number
Action plan in cases reviewed	4
Plan by decision	1
4-month period expired	1
Parents late / inadequately involved	2
Never put in place	1

Local authority's internal training and management supervision - Physical PDF page 23

Unit: cases / date / employees / date / months; not independent final measurement. Names: shown in rows delineation.

Cell	Original number
Specific level 2 cases compared with AST	3
Learning Day	January 2020
New Heads of Government	2
The leaders will join	1.7.2020
Level 2 interval	6

Actual reported activities of the programme - Physical PDF page 47

Unit: date/cases/meetings; section 11 sample PDF49. Denominator: follows from the scope of the rows.

Cell	Original number
Final day of learning	18.8.2020
2019 learning team concerning § 11 subsection 3, separate sample	4
Status meetings	7

Implementation and waiting times - physical PDF page 23

Unit: date/finding; waiting-time information PDF30. Denominator: follows from the rows' scope.

Cell	Original number
Final implementation of case procedures	end 2020, original deadline exceeded
Return / follow-up / change of location	procedure still missing
Waiting lists for internal bets	continued; no number
Need analysis	Not yet started

Method, deviations and consequences

• No generalisable before / after error percentage. Four final cases, three internal level 2 learning cases and four separate 2019 § 11 learning team cases do not have a public identity vote; shall not be counted as 11 unique children. The municipality's statement claims enhanced legality, but itself announces incomplete implementationPDF23 / 30 / 36 / 38.

• PDF40-41:case 1, the parents learn of the placement recommendation by telephone 6 days before the meeting, receive the material a few days before and are then notified of a meeting the very next day. The parents do not consent; the assessment finds no basis for compulsory placement. The family remains for a month in a mother-and-child home until home support. The actual calendar date of return home and the entire stay duration are missing; this is not documented as an enforced compulsory placement.

• PDF43: Case 2 exceeded the period 5,5 months; the child does not want contact person after authorisation, no alternative family / parental support or consideration documented. AST sends notification to the specialist office to assess § 65; this is not the same outcome as baseline 2019 s 3 created § 65 cases.

• PDF44:case 3, the parents are described as having intellectual disabilities; the mother is involved only after 2 months/four safeguarding notifications. The report's assumption that a contact person at the residential facility acted as an intermediary is not independent documentation that the mother was heard as a party. The placement is described as voluntary; actual capacity to consent and original consent have not been verified against documents here.

• PDF42- 45 repeatedly states that the AST only controls follow-up in case 1 and introduces case 4 as a review of case 1. The other concrete information shows that the historical post-placement follow-up is case 4. The original numbering error is preserved and no additional cases are created.

• Case 4PDF45: two legislative 6 months follow-up and two personal visits in May 2019-May 2020. The original 2017 decision shall not be tested in the status selected. The 2017 targets are applied unchanged despite broad wordings; VISO recommends revision. No public return, cessation of action, restoration or compensation after baseline error.

• PDF23: The municipality provides information on the lack of separate procedures for repatriation, maintenance and change of location; new workflows are expected only at the end of 2020. Organisational development does not demonstrate that each previous infringement has been remedied. The change of leadership / co-decision explanation is reproduced as the municipality's statement, not as a derogation from civil rights.

TFSKI20P - Development plan, January 2020

Additional municipal original, non-autonomous Task Force-legal final / baseline measurement. The same thing's recollection doesn't create any new children.

Source: Development plan, January 2020; SHA-256 89a798b74b544764582cd73dbfa2e37926c3f03fb773df495c8b475d69876d8f.

Pre-run plan - Physical PDF page 3

Unit: year / period of plan. Names: shown in rows delineation.

Cell	Original number
Time horizon of the plan	3
Internal procedures	2019-2020
Interdisciplinary cooperation	2020-2021
Policy / strategy / practice	2021-2022

Management and supervision, planned - physical PDF page 5

Unit: weeks / supervision. Names: shown in rows delineation.

Cell	Original number
Status Meetings Minimum Range	6
Status meetings maximum interval	8
Management supervision per year	2

Planned notification milestones - physical PDF page 6

Unit: date / target%; NOT actual result. Names: shown in rows delineation.

Cell	Original number
Clarification template / procedure	1.11.2019
Aim of hearings	50% of new cases as at 1.2.2020

Planned reassessment / BFU milestones - Physical PDF page 7

Unit: date / target%; NOT actual result. Names: shown in rows delineation.

Cell	Original number
Reconsideration template	1.10.2019
Documented use	All, except dental care per 1.2.2020
Leadership	at least 50% per 1.2.2020;
Comfortable information / guidelines	1.1.2020
Provisional investigation plan	1.6.2020

Planned BFUs - Physical PDFs page 8

Unit: month / target%; NOT actual result. Names: shown in rows delineation.

Cell	Original number
Notify before deadline	1
Timely BFUs milestone	50% as at 1.12.2020
Final target	time limits are respected in all cases;

Clause 11 / Action Plan - Physical PDF page 9

Unit: target percent / date / meetings; NOT actual result. Names: shown in rows delineation.

Cell	Original number
§ 11 / § 50 Statement of reasons	30% of new cases as of 1.3.2020
Ach-learning team course	before 1.6
Timely action plan	50% of new cases as at 30.11.2020
Follow-up Agenda	50% of relevant cases as at 1.6.2020
SOS course	1.12.2019
Role in Action Plan	30% as at 1.11.2020
Team meetings on objectives	6

Planned Network / Supervisory Targets - Physical PDFs page 10

Unit: target / target / date; last 3 rows PDF11. Names: shown in rows delineation.

Cell	Original number
Family involvement in action plan	75% as at 30.11.2020
Foster-care consultant/network mapping	5 cases as at 1.11.2020
Annual wheel / case file	1.1.2020
Initiation of proceedings	1.3.2020
Monitoring periods	February-April and September-November 2020

Further development tracks - physical PDF page 12

Unit: scheduled time; no target completion. Names: shown in rows delineation.

Cell	Original number
Revised preparedness	end 2020
Interdisciplinary meetings	summer 2020
Open anonymous advice	summer 2020

Method, deviations and consequences

• The plan sets an interim target of 50% timely BFUs/action plans by the end of 2020; this is a political/administrative implementation target, not legal authority to disregard time limits in the other cases. There is no legal outcome table or public count of actual redress.

• Physical 12 pages, but table of contents and page count on pages 1-11 of 12. No extra unseen page is deduced. Baseline / final report cannot be replaced by this development plan.

TFSKI20K - Municipal presentation 15.1.2020

Additional municipal original, non-autonomous Task Force-legal final / baseline measurement. The same thing's recollection doesn't create any new children.

Source: Municipal presentation 15.1.2020; SHA-256 4a728ae305125d586444ad4eed55b49c527a18f53b020c6a95a107a5e9094c59.

Document chain and prelude time - physical PDF page 1

Unit: identification / date / year. Names: shown in rows delineation.

Cell	Original number
Case	779-2019-26375
Document	779-2019-257833
Development plan Annex	779-2019-260467
Application	beginning 2018
Start of cooperation	end 2018
TFs follow-up	throughout 2020
Local government plan	3

Method, deviations and consequences

• The development plan was not yet finally approved by the Task Force at submission; approval expected January 2020. The decision of 15.1.2020 takes note of the information, without a legal outcome table. The municipality states that a review of § 11 cases has begun, but without n/N or redress outcomes.

TFSKI21K - Presentation of final report 12.5.2021

Additional municipal original, non-autonomous Task Force-legal final / baseline measurement. The same thing's recollection doesn't create any new children.

Source: Presentation of the final report 12.5.2021; SHA-256 bd058062712c9adfd4f1840cd9a4c60232b05d9b39e35775d7d8aaf133b60290.

Final measurement referred to by the municipality - physical PDF page 1

Unit: cases / date / identification. Names: shown in rows delineation.

Cell	Original number
Final cases examined by AST	20
Baseline submitted	14.8.2019
Final presentation	12.5.2021
Case	NATURE -2019 -26375

Method, deviations and consequences

• The entire original presentation has been read; a separate final report is missing as an annex in this portal result. The wording same format as baseline does not document the n/N distribution or a panel of individuals. The final report's criticism/follow-up outcomes cannot be inferred from 20 cases.

TFSKI19O - Orientation item 14.8.2019

Additional municipal original, non-autonomous Task Force-legal final / baseline measurement. The same thing's recollection doesn't create any new children.

Source: Orientation point 14.8.2019; SHA-256 8c6d2769e748352076c3036ffcf5418f0a92c5b186ddda22c24811a52820eb8b.

Method, deviations and consequences

• All 1PDFside is read. The resolution refers to the forthcoming December thematic meeting of the regional symposium; no Task Force report or legal measurement table. It shall not be marked as read 2019 analysis.

TFVAR21K - Implementation status 21.9.2021

Additional municipal original, non-autonomous Task Force-legal final / baseline measurement. The same thing's recollection doesn't create any new children.

Source: Implementation status 21.9.2021; SHA-256 3d3404b81e45757649428cb530d04896b6140347cf9d5c479fa1292092caafb5.

Subsequent policy orientation - Physical PDF page 1

Unit: date / months. Names: shown in rows delineation.

Cell	Original number
Initial final presentation	22.9.2020
Continued policy range	6
New orientation	21.9.2021

Method, deviations and consequences

• The administration reports continuing implementation problems and improvements, but no error/reparation outcomes or actual reunification series. The attached 2020 status at the new URL is SHA-identical to the original already read in full; the copy is not counted as a new measurement.

TFMOR20K - Half-year status 21.10.2020

Additional municipal original, non-autonomous Task Force-legal final / baseline measurement. The same thing's recollection doesn't create any new children.

Source: Half-year status 21.10.2020; SHA-256 6930a5b89f98555f53074af67d9fc7f5489a70206676f405c093ded9368fedcb.

Actual and expected lead times - physical PDF page 1

Unit: identification / date / meetings / week / PLANT cases. Names: shown in rows delineation.

Cell	Original number
Case	773-2018-9498
First political status	April 2020
Latest 6-month meetings	2
Cooperation extended to:	January 2021
Future meeting interval	every 3-4 weeks
Expected final submission	January / February 2021
Planned closing case roof	3-5

Method, deviations and consequences

• The development process continued in 2020 despite the originally expected end in 2019/early 2020. A final measurement of the planned 3-5 cases is not documented as completed. No n/N lawfulness results or individual redress in the municipality’s status statement.

TFMOR21O - Orientation 21.4.2021

Additional municipal original, non-autonomous Task Force-legal final / baseline measurement. The same thing's recollection doesn't create any new children.

Source: Estimation 21.4.2021; SHA-256 0eb8000cee63fc831ae29860f5f552de341a6ae2ab44d74e48e8efca23e72f22.

Method, deviations and consequences

• All 1 page read. Decision on intelligence includes oral Task Force status, but no report documents or results. This is not material reading of final 2021 report.

TFVAR19A - Task Force Analysis Report, 12 April 2019

Case processing 2.10.2016-1.10.2018. Municipally selected pending cases; ages 0-17,not solely physical disability, the municipality responsible for action in the most recent year. No cases from the same family. Already appealed/considered by Ankestyrelsen or considered under§65 excluded. VISO is a subset, not a nationally representative sample.

Source: Task Force analysis report, 12. April 2019; SHA-256 bbc5f7ee97a6b9aae646983f7f86cb4361d57ac3e54f256a33f49f487fe7565e.

Method, deviations and consequences

• Discrepancies retained:8/11 late action plans in the main text versus 8/10 in the annex;2/4 missing 3-month follow-up in the main text versus 2/3 relevant cases in the annex; VISO8 in the methodology versus 7 actual; desired sample categories are not realised categories.

• PDF51 indicates 6 interviews, but 7 named interview groups; the group's personal elements summer 35.

• Rule breaks can be essential without the source publishing a total deductive union. 19 / 20 actuarial aid is a test other than the lawfulness of the intervention; the method PDF56 does not examine whether the specific measure was appropriate.

• PDF37/44:11-year-old child without previous respite care for 1 year 5 months; a contact person after 10 months for 8 hours/week insufficient. PDF38:12-year-old child placed without a lawful interview, implementation almost 3 months after the decision. PDF39:7-year-old child placed on the basis of a 2012BFU without an update.

• PDF40:concern report July 2016,birth/placement February 2017,child welfare assessment not until May 2017; no special immateriality. PDF41:emergency placement action plan only after 7 months(requirement 4). PDF42:separate provisional infant placement, plan after 1 week, AST specifically assesses immateriality. These are the source's assessments, not independent examination of anonymised case records.

• PDF45: 17 years ago 2015, concerns September 2017, contact person January 2018, private accommodation September 2018; no precise action / termination dates. PDF48-49: Specific period of placement childhood → youth with conflict about participation / repatriation and lack of parental action plan; actual reunification and correction not documented. PDF49: Another release process ends at target reached, no date or duration.

• No printed aggregate union of legality findings or actual reunification/compensation follow-up. Safeguard deficiencies must not be added together as unique children. The absence of an anonymous case register prevents identity linkage to the appeals register.

TFVAR20S - Task Force Status Report, September 2020

Development phase May 2019-September 2020. COVID methodology change:4 municipally selected cases with a child welfare assessment and action plan, solely under the Social Services Act and not COVID rules; neither random nor representative. The usual 20-case status measurement was not used. Baseline 20 and closure 4 are different samples, not a panel of people.

Source: Task Force Status Report, September 2020; SHA-256 4633f147b4eb73475c73829b36e6a3eb2e9011a1a6caea2c403d2d60649509f0.

Unit: date. Names: shown in rows delineation.

Cell	Original number
Date	2.7.2020

Method, deviations and consequences

• PDF20: the municipality’s own statement establishes continuing legal procedural errors/deficiencies; full target achievement has not been attained. PDF30: parental action plans are assessed as implemented in new cases, but the municipality has not mapped all placement cases. Implementation of involvement is not expected until summer 2020. These self-reports are not independent error rates.

• Case 1PDF32-33:no lawful prior child interview and a 1-month breach of the child welfare assessment deadline. PDF33 mentions both a family consultant and a placement decision on the same day; the wording discrepancy is retained and no additional placement case is inferred.

• Case 2PDF34-35: aid is reduced despite notifications; 2 months without relevant observation, late identification of parental skills, slowness and incorrect professional assessments. Expected duration of placement is missing from the action plan. Case 3PDF36-38: The ability to care of new partners not uncovered; aid downgraded despite notifications. The same anonymised case may not be counted once per point of criticism.

• The case summaries document 4 cases, but there is no overall independent legality union and the material is selected for learning. Names 4 should not be compared as representative before / after rate versus 20 baseline.

• No date of actual return, termination of placement, actual replacement or restoration after the errors identified published in this original. Organisational change is not evidence of correction of each previous case.

TFMOR18A - Task Force Analysis Report, November 2018

Case processing 29.5.2016-28.5.2018. Municipally selected pending cases concerning ages 0-17, not solely physical disabilities; responsible municipality during the preceding year; no cases from the same family and none already appealed/AST-processed or section 65-processed. Baseline 20, VISO9 of 20; not a representative or complete national register of individuals.

Method, deviations and consequences

• PDF31 / 36-37: nine-year-old child is placed without BFU and conversation; only 14 months after the decision. Father has joint custody, is hardly involved; only mother's consent signature is documented in the report. This is a concrete material proof of consent if the original case is obtained, not documented national union of abductions.

• PDF38-39: 3BFUs break 4 / 10 / 14 months, no particular insignificance. The BFU of eight years by 29.9.2016 is first reviewed 14.8.2017; closing date is missing. three month-old child's removal decision fixed at 5.7.2017 on the basis of contract orientation; BFU's latest note 4.12.2017, at least 5 months after decision. The report does not document precise dates on all interventions.

• PDF40:a one-month-old child is placed with a network carer without sufficient investigation; breakdown after a few days, then a foster family. AST assesses that a prior assessment of the network could probably have prevented the breakdown. PDF41-42:2 own-initiative cases without a current holistic assessment; documented concern, but actual implementation/new respite care unspecified.

• PDF43-44:a 14-year-old in care is exposed to contact with a concerning partner; the municipality carries out neither a documented 24-hour assessment nor a second opinion; an 11-year-old's school case is marked inactive 2 times despite safeguarding notifications. These are different consequences and criticisms, not additional children for each mention.

• PDF24 / 45-47: accommodation parents are not systematically offered § 54-grants or separate action plans. The lack of targets / parental support actually complicates the reunification and testing of alternative support; the report does not provide any reunion dates or deductive parental numbers. PDF28: Head of Division states that closed cases are not counted.

• Cell deviation is preserved: PDF40 says 9 plans after decision, of which 2 legal emergency exceptions, but PDF41 distributes 7 breaks of 1 exceeded acute + 6 others. The acute lack of plan is also below 3 deficiency plans. No new Union is being reconstructed on the basis of these conflicting descriptions.

• PDF51/53 methodology mentions 17 decision cases; actually 15 in the measurement period+2 follow-up only. The methodology template's 17 must not be used as the result denominator. PDF54 describes a requested 3 of 8 placements for follow-up; actually 4 follow-ups out of 10 placement-related cases.

• 18 / 20 at present sufficient aid is not aggregate legality by decision; method PDF54 excludes verification of the appropriateness of the specific measure. AST and VISO re-use the same cases and VISO build on the ASTM event overview; the two assessments are not independent people populations.

Sønderborg

2019 analysis + 2020 status fully read

Register responsibility: Sønderborg Municipality and AST/SBST. Specific outstanding material: cases 19/7180 and 19/27198: original records on assumed consent/14 days of inactivity and dating of a child welfare assessment for a 9-year-old, 3 baseline § 65 outcomes and final case 2 concern-report follow-up, actual support/reparation/reunification, identity linkage between 20 baseline/4 final/other learning samples. No external request sent.

Search results without relevant findings only document the tested access tracks. They do not document that the originals were never published. The metadata lists only its own compact document identifiers; the original content was kept in RAM.

Final source control

Sønderborg2019 PDF34 error table and consent section have also been visually checked in RAM. The Morsø2018 PDF40-41 action-plan conflict is visually confirmed:9 plans after the decision, 2 lawful emergency exceptions; the next page has 7 missed deadlines divided into 1 emergency deficiency+6 others. All three original image pages were processed in RAM without a file copy. This check changed none of the recorded original figures.

Task Force: actual content control against 43 key events

The official 2024 directory records 43 courses / 42 municipal names in the scheme exposed children and young people. 28 now has partial or full control of an analysis / status original; 15 no one has provided such original. These are not 28 fully completed runs: each phase's reading and residue are shown separately. Five other schemes are listed below and are not counted into 43.

No	Kommun a	Width bår	Actual material checks	Module	Concrete residues

4	Rhinoceros	2013–2015	Original residue; development plan identified	taskforce-historical-feb-2012-2018. md	Analysis from end September 2013, master plan from 1.10.2013 and final report 2015 with legal annexes
5	Aabenra	2013–2015	Original residue after precise local / archive searches	taskforce-historical-feb-2012-2018. md	Analysis early 2014 and development plan published by 12.8.2014, end 2015 and target / exclusion schedules
6	Ringsted	2014–2016	Municipal press original 15.12.2014 all 2 pages read; 18 / 20 cases with error	taskforce-historical-feb-2012-2018. md	Analysis published 15.12.2014, Joint Committee 17.12.2014 Annex and end 2016; 18 / 20 definition, exclusions and individual repair
7	Norddjurs	2014–2017	Children's originals; disabled originals separated	taskforce-historical-feb-2012-2018. md	Analysis 2014 / 2015 and end 2017 on children with disabilities, not disabled task force
8	Ballerup	2015–2017	Accounting 2017 children's section read, end critical table 0 unknownN; original analysis / finish continued remainder	taskforce-historical-feb-2012-2018. md	Initial analysis 2015, final report June 2017 and precise legal / exclusion measurement forms; 7 / 20 from 1270 is index information only
9	Vejle	2015–2017	Budget 2019 children's section 4 pages as well as accounts 2016PDF24 read; no legal error table	taskforce-historical-feb-2012-2018. md	Analysis 2015 referred to 23.3.2015 and end 2017 with legal / exclusion measurement forms; economy improvement not legal test
10	Randers	2015–2017	Analysis 12.11.2015 all 72PDFpages text read; graph PDF47-57 / 64 visually read	taskforce-historical-feb-2012-2018. md	End 2017, underlying unlabeled graph data, anonymous case / child coupling and actual repair / repatriation
11	Ikast-Brande	2015–2017	Analysis 22.6.2015 all 79PDFsider text read; graph PDF48-59 visually read	taskforce-historical-feb-2012-2018. md	End 2017; table's 2 late action plans versus acute derogation PDF28; 2 graphs both 2012 clarified; exact unlabelled graph data and person repair
12	Peas (without pods)	2016–2018	Original residue; precise policy processing chain identified	taskforce-historical-feb-2012-2018. md	Analysis April 2016, KB28.4.2016 paragraph 10 + Annex DAPH290416.pdf and end 2018 as well as measurement / exclusion schedules
13	Nyborg	2016–2018	Local knowledge note 13.12.2023 all 6 pages read; 2016 / 2018 original measurements missing	taskforce-historical-feb-2012-2018. md	Analysis presented 5.12.2016 and final report presented 4.2.2019;20+20 samples, precise legal n/N, contemporaneous briefings and actual redress
14	Glostrup	2017–2019	Status 2019 all 49PDFpages fully read; 10 / 10 current decisions with legal shortcomings, 20 cases in total. 2016 start measurement only later reproduction	taskforce -glostrup-odander-fmk-svendborg -originer.md	Original 2016 analysis and sorting number; persondedup / § 65 outages and actual repair / reunion

No	Kommun a	Width bår	Actual material checks	Module	Concrete residues
15	Oats	2017-2019	Analysis 2017 all 48PDFpages and Status 2019 all 39PDFpages fully read; every 20 cases. Baseline a.k.a. Hashidentic; Slutalias only sidenumre / bulletcoding changed	taskforce -glostrup-odander-fmk-svendborg -originer.md	5 final § 65 outcomes, case overlap and actual redress/return home
16	Faaborg-Midtfyn	2017-2020	Analysis 2017 all 47PDFpages, status 2020 all 43PDFpages and consultation 2 pages fully read; 20 cases each. Timetable shapes visually RAMcontrolled	taskforce -glostrup-odander-fmk-svendborg -originer.md	2 baseline/3 final § 65 outcomes, person deduplication and individual redress course; no overall return-home population
17	Københavnn	2017-2020	Final January 2020 original all 48 pages fully RAM text read; Table 1 / 2PDF20 visually vetted .72 factorows / 5 local front chains; 19 legal cases, 10VISO recycled and 4 follow-up cases recycled.	taskforce-koebenhavn2020-full-original control.md	Initial April 2018 Task Force analysis not obtained; a separate 2017 Borgerrådgiveren study has been substantively checked, but does not replace this original. Self-measurements without N; actual case-by-case redress and a union of individuals missing.
18	Svendborg	2017-2019	Analysis 6.2.2018, all 81 PDF pages, and status September 2019, all 52 PDF pages, read fully as text; 20 cases each, separate sample/methodology. Baseline 4 § 65/final 2 § 65; final 3 points for attention are a different category	taskforce -glostrup-odander-fmk-svendborg -originer.md	§ 65 final outcome, persondedup and concrete individual repair; baseline return summer 2017 autumn series without documented professional basis, no full reunion / durability series
19	Morsø	2018-2021	Preliminary 2018 analysis all 59PDFpages as well as 2020 / 2021 municipal follow-up 2 + 1 page full read; finish 2021 report not provided	taskforce -forloeb-2018-2021original. md	Final 2021 report and actual learning take-offs; politically planned 3-5 cases have not been measured. § 65 Outcome, personal dedup and actual repair / repatriation missing
20	Stevns	2018-2020	Final 2020 -original all 52 pages textual and PDF22-23 tables visually RAM-controlled; 87 factorial rows / 17 time series	taskforce-stevns2020.md	Initial 2018 original not independently obtained; specific baseline 2017 figures reproduced in the 2020 original read;§ 65 outcomes/person linkage and actual redress missing
21	Product	2018-2020	Analysis 2019 all 61PDFpages and status 2020 all 43 pages fully read; 2021 municipal presentation 2 pages fully read	taskforce -forloeb-2018-2021original. md	No printed aggregate union of legal errors; VISO7/8 and conflicting plan/follow-up denominators are retained. The 4 selected COVID cases cannot be compared directly with the 20 baseline cases. Actual redress/person deduplication missing
22	Disc	2019-2021	Local development plan 2020 all 12PDFpages, references 2020 / 2021 every 2 pages and orientation 2019 one page full-read; report originals remain	taskforce -forloeb-2018-2021original. md	Analysis submitted 14.8.2019 and final report 12.5.2021, case EMN-2019-26375, with legal n/N/exclusion forms. 20 final cases are discussed only in the municipal submission; error outcomes/individual redress missing
23	Frederiksund	2019-2021	Central run metadata only; analytical / final originals not obtained	No material analyte original	Ankestyrelsen/ Social and Housing Board and the municipality: analysis, legal annexes, measurement / sorting schedules and final report
24	Sønderborgg	2019-2020	Analysis 2019 all 61PDFpages and status 2020 all 50 pages fully read; 20 baseline / 4COVID learning cases with delimitations and original deviations	taskforce -forloeb-2018-2021original. md	No union of legal errors or actual redress/return home. Outcomes of 3 baseline section 65 cases and follow-up on the notification in final case 2 are missing; original consent/BFU records and identity linkage required

No	Kommun a	Width bår	Actual material checks	Module	Concrete residues
25	Medium speed	2019-2022	Initial June 2020 all 69 pages and municipal development plan 2020 all 13 pages full text; PDF44 / 46 / 60 visual RAM controlled; 110 factor rows / 27 time series / 15 plan rows; final presentation 2022 read separately	taskforce -middle speed 2020-original.md	Final 2022 report not attached in read 14.6.2022 paragraph 33; five actually created notification cases end result, journal keys, actual dates of release and repair missing
26	Odense 1	2020-2022	Central run metadata only; analytical / final originals not obtained	No material analyte original	Ankestyrelsen/ Social and Housing Board and the municipality: analysis, legal annexes, measurement / sorting schedules and final report
27	Nordfyn	2020-2022	Introductory 2020-Child original all 58 pages text read; PDF34 / 48 tables visually RAM-controlled; 75 factor rows / 11 time series	taskforce-northfyn2020.md	Final 2022 original, separate quarterly briefings 155/143/116/103 and § 65 outcomes/actual redress are missing; different population slices from the 20 sample cases
28	Slaughter	2020-2022	Analysis 2020 all 61 pages and municipal status 2021 all 15 pages full text; nine table / figure pages visually aligned in RAM; 111 factor rows / 20 municipal target rows	taskforce slaughter 2020-2021original. md	Later actual final report not identified; individual decision tests, return and liability not personlinked. Current attachments Ider replaces previous empty / failed portal reproductions
29	Frederiksberg	2020-2023	Introductory 2021 -original all 69 pages text read; PDF42 / 43 / 59 tables visually RAM-controlled; 69 factor rows / 18 time series	taskforce-frederiksberg2021.md	The final 2022 original, the redress review of 1000 cases, actual return home/reparation and individual responsibility are missing; VISO10 versus 8 and plan 8 versus 9 discrepancies retained
30	Jammerbugt	2020-2023	Central run metadata only; analytical / final originals not obtained	No material analyte original	Ankestyrelsen/ Social and Housing Board and the municipality: analysis, legal annexes, measurement / sorting schedules and final report
31	Odsherd	2021-2023	Final 2023 original, all 44 pages read fully as RAM text;37 factual rows/4 case chains.3×3 learning-case reviews are not 9 deduplicated children or a new final legal cohort.	taskforce -odsherred 2023-full-originalkopel .md	Initial September 2021 analysis not obtained. Earlier 2017/2019 audits and 2020KLK are later accounts, not verification against originals. Exact deadline denominators, actual case-by-case support/redress and a union of individuals are missing.
32	Fredericia	2021-2023	Final October 2023 report all 47 pages and 22.8.2024 follow-up annexes all 4 pages actually read; references 26.1.2022 / 12.10.2023 all 4 pages. New model 3 reviews / 9 cases; own measurement 163BFU / 71 exceedances / 3 declared valid ground. Baseline 20 cases only late rendering and contact details	taskforce-fredericia-vejen-taarnby-herningoriginer.md	Baseline 2021 / 2022 original with full 20 s annual / 10VISOudtag / exclusions; gf-IDfc 7 cfda 4-f 598-ec 11-a 3 ae-00505688 ca 1 d iarchive page, currently 404 / exaktCDX0. Passenger coupling / § 65 outages / individual repair and actual reunification
33	Sunred	2021-2024	All 65 + 49 pages in analysis 2022 / status 2024 as well as baseline 2 / consultation 19 actually read; additional main text and final checks in two specific modules	taskforce -sunroot -ode nse -end2024-originalkontroll.md	342 is the municipality's preparation reports; no status cases with effort selection / follow-up / completion read; individual repair requires records
34	Odense 2	2022-2024	All 67 + 39 pages in analysis 2022 / status 2024 actually read; funnel 72 / 92 visually aligned; additional main text widget in special module	taskforce -sunroot -ode nse -end2024-originalkontroll.md	18 against 9 cases, 10 against 8VISO and 72 against 92 per cent retained; crude figures for management supervision and individual repair not published

No	Kommun a	Width bår	Actual material checks	Module	Concrete residues
35	Guldborgs und	2022-2024	Introductory 2022-original all 68 pages read, 64 factorial rows and 4 calculated times	taskforce goldcastle und2022.md	Final 2024 original and case-by-case actual restoration must be provided
36	Road	2022-(2024)	Baseline 10.3.2023 all 43 pages, end 2024 all 26 pages, mid 2024 all 3 pages, own summer 2023 supervision all 12 + 12 pages and all graph cells actually read. TF12 cases / 9 cases; BFU8 / 9 temptation error, § 48 8 / 9,2 notifications. Municipal 10 / 3 control and source conflicts preserved.	taskforce-fredericia-vejen-taarnby-herningoriginer.md	Person deduplication across four samples, outcomes of 2 concern reports to the Children’s Office, actual return home/individual reparation and responsibility.
37	Langeland	2022-(2025)	Introductory 2023-original all 41 pages and Ministry 2026-follow-up all 16 pages checked; 42 factor rows / 10 time series	taskforce -langeland 2023-2026.md	Task Force memoranda 28.5.2024/5.5.2026 cited in the Ministry's original, not independently obtained;2026 renewed supervisory processing ordered by the Ministry and actual redress/accountability outstanding
38	Tower	2023-(2025)	Mid-2024 all 4 pages, slutazapine 2025 all 23 pages, May 2026 follow up all 9 pages actually read. Development 3 reviews / 9 cases; 2026 three new cases, 2 inadequate closures / 1 notification. 2023 baseline only later reproduction; 2026RR level of knowledge documented.	taskforce-fredericia-vejen-taarnby-herningoriginer.md	September 2023 baseline full original/methodology; person deduplication, outcome of 1 children’s office notification and actual return home/individual redress/responsibility.
39	Næstved	2023-(2025)	Introductory 2023 -original all 42 pages text read; 38 factor rows / 5 time series, interview table PDF40 visual RAM-controlled	taskforce-naestved2023-2025.md	Final 2025 original and 4 referred children's offices / actual repairs not provided; final news is not final
40	Rudersdal	2023-(2026)	Introductory June 2024 all 40 pages and five later original annexes all 41 pages read: Final Report 2026, hearing 2026, mid / extra 2025 and 25-point municipal matrix; 14 rows / 25 series of matrix	taskforce-rudersdal2024-2026 original. md	Initial analysis in taskforce-rudersdal 2024-initiated -origin.md; slutPDF22 shows 3 / 3 lack of planning; case union, type of effort and actual repair not published
41	Herning	2024-(2026)	Baseline 2024 all 40 pages, interim 2025 all 4 pages, end of May 2026 all 25 pages actually read in RAM.12 baseline,9 support/3 prevention; all 3 preventive cases incorrectly delimited. Development 3×3 cases 2025/26; continuing deficiencies in concern reports, child contact, decisions and follow-up.2026 separate.	taskforce-fredericia-vejen-taarnby-herningoriginer.md	ICS81%/up to half, question/respondent basis; deduplication 12/9; actual return home/individual reparation/responsibility and later follow-up result.
42	Sorø	(2024) -(2026)	Children's analysis 2024 all 42 pages and closing 2026 status all 27 pages fully RAM text read; 70 factorows / 5 local front chains. Baseline 12 = 9 support + 3 preventative; development phase 3 × 3 case readings are not 9 unique children.	taskforce -soro- boern2024-2026-fulde-originaler.md	Actual delivery/redress by case and union of people; own unlawful eligibility-assessment arrangements acknowledged in 2026, a change in spring 2025 is not proof of reparation for earlier harm. Planned supervision in autumn 2026 has not been carried out.
43	Fax	(2024) -(2026 /2027)	Initial 2025 material 45PDFsidetals read	taskforce-fakate2025. md	End year 2026 / 27 was expected in 2024 catalog; completion and actual restoration not documented here

Tried access tracks and current source control

A historical first entry attempt is not the current status if the original page has been found. The column on actual control above and the exact URL / locator of the modules take precedence. CDX metadata are neither original text nor evidence of non-publication.

Other schemes, separate from the 43 schemes

Municipality	Scheme	Actual reading	Module	Specific residual amount
Lyngby-Taarbæk	Adult handicap 2015	All 80 original pages, 105 factorial rows, 13 time indications	taskforce -ltk2015.md	Other main-text/phase originals and actual redress; only the stated detailed review is attested
Egedal	Child Handicap 2020	The entire April 2020 child-disability analysis: all 119 pages read fully in RAM, including main text, VISO, material review and legal tables. Same 20 cases with subsamples 8/5; no new cohort total.	taskforce -egedal-full-original control.md	Later 15-month status / development end; personal connection 20 / 8 / 5 and actual resumption / provided support, loss time, compensation and liability.
Sorø	Adult handicap 2024	The entire original: all 119 pages fully read RAM, including main text, juridics, VISO and both material annexes. The same 18 legal cases and 5 re-used VISO cases; no new cohortesum.	taskforce -soro-norfyngrowthfull-originealcontrol.md	Later development/final review; case-specific actual delivery/redress, person linkage, time lost, compensation and responsibility are not published in this original.
Nordfyn	Adult handicap 2025	The entire original: all 103 pages fully read RAM, including main text, juridics, VISO and both material annexes. The same 14 legal cases and 5 re-used VISO cases; no new cohortesum.	taskforce -soro-norfyngrowthfull-originealcontrol.md	Later development/final review; case-specific actual delivery/redress, person linkage, time lost, compensation and responsibility are not published in this original.
Frederikssund	Adult handicap 2022	All March 2022 original all 133 pages of text read; Table 1PDF62 visually in memory. 3 Reader Tables 119 factorial rows. Legal 18 / VISO5, Annex version 5 of 20 retained; non-central child analysis 2021.	taskforce -frederikssund-adult 2022-full-original control.md	Later 15-month status, actual delivery/redress, union of case records/individuals, sanction and compensation; children 2021 separately remain outstanding original material.

Registry authority and necessary specific enquiry

Ankestyrelsen, Social- og Boligstyrelsen and each municipality: original analysis, legal/VISO annexes, submission/exclusion form, measurement case key, follow-up measurement and final report for each process with document date/version number/case-record number/URL. Exclusions of already appealed cases and repeated cases must be stated. Actual redress requires the date of a new decision and a separate date for delivery, return home or payment; the three dates cannot be replaced by a completed development process. No request has been sent.

Task Force: cases, selection and continued errors

These accounts distinguish between disability and vulnerable children. Analysis, development and follow-up are phases in the same course. The same cases can be dealt with several times. A review of the case does not necessarily constitute a statement of objections. The accounts are extended by actual original controls; it is not yet a full national inventory.

Models and selection

Source / period	Specific information	Meaning of counting
Handicap, current model 2026 [TFMODELH]	Six long courses per year; two years; first come, first served. 20 legal cases, five socially assessed by the 20.	Five is a recycled subcommittee; not 25 cases. Self-search affects the selection.
Handicap 2023-2025 [TFRES 25]	Eight programmes/year: four applied for, four reserved on the basis of overturnings in Danmarkskortet. With fewer applications, more may be reserved.	Capacity and offers are not completed or the number of illegal cases.
Ministerial letter 21.5.2025 [TFRES 25]	The road refused in 2025. Odsherred, who refused in 2024, accepted the available offer in 2025.	The municipality's reasons are a statement, not documented redress following all overturnings.
Exposed children, current website [TFMODELB]	Established 2012; four advisory sessions / year. The task force shall not take a decision on personal matters.	Control finds must be linked to a separate reopening, supervision or appeal in the event of actual legal proceedings.

Egedal: children's disability, analysis September 2019-April 2020

The original's legal annexes are checked for method, errors and denominators, PDF 49-81; Tables 1 and 2 are also checked visually. [TFEGEDAL]

Measure	Counter / denominator or categories	The original locator
Committee on Legal Affairs	20; additional expenditure 8, loss of earnings 8, relief 4; appropriation 4 / refusal including partial refusal 16	PDF 49-50, Table 1
Legal deficiencies	14 / 20; hypothetical remittal for reconsideration 9 / 20; confirmation despite deficiency 5 / 20	PDF 54 / 56
Information / consultation / discretion under rule	9/20; 4/20; 1/20	PDF 51 / 57 / 69
Deficiencies per case	Three types 3; two types 4; one type 7	PDF 56
Overall assessment is missing	4/20	PDF 71
Improper time limit for appeal / 15	20/20	PDF 73
Time-limit exceeded	11 / 20: additional expenditure 5, work earnings 4, relief 2; 2-20 weeks, average 8,5 weeks	PDF 73-74
Written delay message	2 / 11; both without justification	PDF 73
Parental involvement is missing	3/20	PDF 74
Follow-up	3; not applicable 5; 12	PDF 74-75
Subcommittee on vulnerable children	8 of the 20: § 52 5; § 11 2; other concern 1	PDF 76, Table 2
Current investigation	Two during the measurement period, two before the period (one obsolete), one defect	PDF 77
Deadline of four months/§ 48 interview/action plan before the decision	Error 2 / 2; 4 / 5; 2 / 5	PDF 77-78

The request for cases changed: first 20 submissions, then 15, five and one replacement case. At least five appealed/currently processed cases and two with appeal-instruction errors were excluded during these rounds. The submissions are not 41 unique cases. Decisions previously examined by Ankestyrelsen were excluded; measurement generally covers two years before 16.8.2019. VISO reused five cases. [TFEGEDAL, PDF 80-81]

Own analysis: A refusal of respite care corrected only after the wait cannot by itself restore the assistance actually lost. The source identifies one specific delayed process involving a benefit in kind that was not implemented, PDF 73-74. The documented loss of time and missing support must therefore be included in the assessment of redress. The error categories overlap and cannot be added to the 14. The original's summary states three cases with wholly favourable findings and appeal guidance, while the detail section states four; both versions are retained. Hypothetical appeal consideration of the nine is not proof that the municipality actually reopened them or compensated the loss.

Sorø: exposed children, analysis 2024

12 cases: nine § 52 and three § 11; April-August 2024. Interview participants 20: advisors 6, management 2, perform 7, general 5. No total error counter. [TFSOROE24, PDF3-7 / 40-41]

Original-controlled targets	Figures and demarcation	PDF page
Personnel supervision deficient	2 / 3	35
Wrong date of decision in case of placing	2 / 3; most of all dates of decision are disputed, without precise figures	32

Original-controlled targets	Figures and demarcation	PDF page
Insufficient support suspect; sent to Ankestyrelsen	3 / 12, May 2024; subsequent outcomes not disclosed	33
Preventive bets	2 / 3 insufficient information; third study required	32-33
Duration of the investigation	One two years after the investigation decision	29
Follow-up	One still without follow-up seven months after start	35
Late Childhood Treatment	One went three months; according to the report forgot the start-up plan	27

In one case, the school was asked to send concerns rather than notifications; requests were not treated as notifications. Therefore, recorded 24 hour assessments do not cover all worrying approaches. [TFSOROE24, PDF26-28]

Own analysis: the count of timely processing becomes distorted if the municipality lets concerning approaches fall outside the notification population. The different error measures overlap; they must not be added together as children. A two-year assessment process requires independent examination of actual access to support and harm associated with specific periods. Forwarding to the Appeals Board documents a review step; redress must be proved by the subsequent course of the case.

Odsherred: exposed children, status 2023

Development period October 2021-January 2023; initial analysis of 20 cases. Six status meetings; three case reviews with a total of nine case occurrences in March/September 2022 and January 2023. Whether these are newly unique cases or overlap with the 20 is not stated. The final report continues to record overruns of the four-month deadline in the majority of ongoing assessments, according to the municipality's report. No precise numerator/denominator. Handling of safeguarding notifications is described as improved, but action plans, assessment and involvement still require work. The source chain concerning earlier audits in 2017/2019 and KLK 2020 is a later account here; the original reviews must be obtained separately. [TFODSHERRED 23, PDF 3-9/43]

Own analysis: The final report's improvement assessment cannot be used as a factor for corrected illegality or restored citizens. It requires a connection from the original case to a new decision, the actual start of the aid and, where appropriate, continued intervention. Verification of the Authority's statement of progress does not replace this citizen-based follow-up control.

Copenhagen: Follow-up case review 2020

19 cases from two entities; measurement period 23.1-31.12.2019. Types of proceedings: placement 3, family treatment 4, relief 2, contact person 2, § 11 offers 4, follow-up of older places 4. Age 0-3: 2,4 -7: 1,8-14: 8,15-17: 8. VISO recycled 10 of 19; start 2017 had 20. [TFKK 20, PDF 18-20 / 28]

Error target	Counter / denominator
Child involvement / § 48	3 / 10; same three cases
Parental involvement	0/11
Investigation missing / update missing	0/11;1/11
Four-month period / reasoned opinion	2/6;4/10
Investigation not completed before decision	0/7
Action plan missing / late	3/10;3/5
Insufficient information	1/19
Three / six-month follow-up	3/4;2/4
Personal supervision	1/4

The table is the original's table 1, PDF 20, with separate denominators; tables 1 and 2 have been visually reconciled. Children under one year, urgent interventions and the measurement period explain several denominator changes, PDF 21-24. In one case, first follow-up was seven months after placement, PDF 26. New deadline, reasoning and follow-up problems are identified against the initial measurement. One autism case is referred for own-initiative action; the subsequent outcome is not stated, PDF 25-26. [TFKK 20]

Our analysis: The follow-up sample documents that a completed development process and an overall assessment of improvement may be accompanied by continuing or new breaches of statutory requirements. The 14 numerators must not be summed as unique children affected by errors. The specific seven-month delay must be included in the consequences analysis as a case in which review of the child's placement intervention did not occur within the statutory deadline. Own-initiative action requires separate outcome checks to prove actual redress.

Sorø: end April 2026 - separate by period

Prior to April 2024-April 2026; six status meetings, seven municipal status reviews, three case reviews with nine entries: May / October 2025 and March 2026. The 12 cases and between the rounds are not available. The initial material had personalised surveillance errors 2 / 3 placing cases and incorrect decision date 2 / 3; these are recycled 2024 findings. The final control had three cases, not a representative national committee. [TFSOROE 26, PDF 3-5 / 19 / 21-22 / 26]

The Task Force continues to record insufficient parental / network involvement, lack of information and slowness. The municipality's internal review every six weeks is not a follow-up to the law. Retesting of notifications and the child's plan were without sufficient end-control basis; therefore, new workflows do not prove directed practices in these areas. [TFSOROE 26, PDF 16-24]

Own analysis: A new procedure and the institution's development assessment do not prove that the specific child was given timely help or that the family was reunited. The necessary coupling data are case ID, actual date of decision, child / parent participation, start of aid, monitoring visits and, where appropriate, continued interventions. The follow-up 2026 control will not be added to 2006-2025 as new citizens.

Specific remaining work

Sorø adult disability 2024, Nordfyn 2025, Faxe 2025 and Sorø children's 2024 malfunctions are now materially controlled in the separate modules and this module. A full central list of participants with the start / end date, analysis, status, legal annexes, sorted cases and resumption must be settled at the Social Security and Housing Agency /Ankestyrelsen. Public participation pages indicate capacity, but do not themselves provide a complete historical list of cases. Several identified municipal originals are still being investigated. No data request has been sent.

Sorø Adult Disability 2024: concrete errors and cut-off complaint

The entire original is now fully read in RAM, including the main text, VISO and material annexes. See? full original checks;. Same cases are reused; no new population.

22 submitted cases, four sorted out, 18 evaluated; five recycled by VISO. Decision window 14.12.2021-14.12.2023, latest and complex cases; recent appeals / AS decisions already taken are excluded, previous complaints allowed by other circumstances. A maximum of three appropriations were actually 11. Seven refusals. Distribution § 84 / 85 / 104 / 107 / 108 / ABL105: 1 / 8 / 2 / 3 / 2 / 2. [TFSOROEV24, PDF49-50 / 70-71]

Measure	Counter / denominator	PDF page
Legal deficiencies, at least one	14/18	54
Information relating to proceedings	8/18	55
Home / Justification / Misassessment	2/18;12/18;6/18	57-60
Party consultation / discretion under rule	1/18;1/18	60-61
Complaint guidance missing	2 / 7 relevant; other 15 meet guidance requirements	62
Quality standard not referred	17 / 18; last irrelevant	63

Measure	Counter / denominator	PDF page
Time-limit exceeded	3 / 6; 1-41 weeks, mean 22; no written message 3 / 3	65
Guardian involvement inadequate	2 / 18; retail also relatives	65-66
Action plan offered / irrelevant	4 / 18; 7 / 18; two prepared, one complete	67
Overall assessment is missing	14/18	67
Follow-up unknown / sufficient / irrelevant	3/18;8/18;7/18	69

PDF55 also indicates information / justification errors 6 / 12; the denominator is not explained and is not changed to 18. Table 1 and PDF55 are visually aligned. [TFSOROEV24]

A § 85 accompanying complaint was rejected as a level of service instead of being transmitted to the Ankestyrelsen. A termination decision for a citizen without the ability to defend his or her interests had no legal basis; guardian came later. [TFSOROEV24, PDF57 / 61]

Our analysis: The complaint documents a specific denial of access to review. The committee's requirement to exclude decisions already appealed may also exclude other cases affected by errors. Neither the 18 nor the 14 may be presented as the municipality's total number of errors or people. No documented remittal, compensation or actual redress follows from this analysis alone. The original complaint, registration date, reconsideration, forwarding decision, Ankestyrelsen's subsequent outcome and period without support must be found. The guardian's later appointment does not prove that the unlawful cessation decision and its financial or health consequences were remedied.

The audience link requires anonymous reading cookie. Legal error / method section PDF49-71 actually read; other annexes not yet fully examined. No original saved.

Nordfyn 2025: all eligible cases and excluded complaints

The entire original is now fully read in RAM, including the main text, VISO and material annexes. See? full original checks;. Same cases are reused; no new population.

14 cases assessed: nine refusals / five appropriations; § 85 / 95 / 96 / 97 / 107 / 108: 6 / 1 / 1 / 1 / 3 / 2. Window 15.10.2022- 15.10.2024; latest, complex cases. The municipality states that 14 are all eligibility cases; Ankestyrelsen therefore considers its control to be comprehensive general practice. Recent decisions already appealed / AS are excluded; mainly mental difficulties are excluded as the main cause. [TFNORDFYN25, PDF46-47 / 62-64]

Measure	Error counter / denominator	PDF page
Legal deficiency at least one	8/14	49
Information / Statement of reasons	7 / 14; 7 / 9 relevant	50/52
Both above	6 / 7 not available	55
Home / Misassessment	1/14;2/14	50/55
Party consultation / discretion under rule	0/14;0/14	56
Appeal guidance	14 / 14; only written complaint indicated	56-57
Overshooting	4 / 14; 11-23 weeks, mean 18; no message 4 / 4	59

Measure	Error counter / denominator	PDF page
Action plan offers missing / prepared insufficient	2 / 3 relevant; 1 / 1	60
Overall assessment is missing	10/14	60
Follow-up unknown / enlightened / irrelevant	2/14;1/14;11/14	62
Citizens' involvement is lacking	0/14	59

Own analysis: The Board of Appeal's statement of general practice can only bear the criterion-defined population. Excluded complaints and other diagnoses cannot subsequently be considered as flawless cases. The eight are a union of certain types of legal deficiency; the 14 flawed complaint guides are another objective.

The original's only adequate follow-up is based on the announced three-month meeting, not documented. It proves a plan, not actually visit or directed support. [TFNORDFUN25, PDF62]

Legal error / method sections 46-64 actually read; other annexes not yet fully checked. Local authority Official publication page refers directly to the original.

Sorø 2024 and Nordfyn 2025:full checking of original adult disability reports

Both public originals have been read in their entirety in memory: Sorø 119 pages and Nordfyn 103 pages. The table below records review of both the main text and all embedded annexes. Originals or images have not been saved. The information supplements the earlier legal submodules; the same 18 and 14 cases are reused. VISO subsamples of 5 cases in each municipality overlap the legal sample. No new case total or person total is created and nothing is added to the 43 central child case trajectories.

The numbers contain survey outcomes, administrative time targets, organisational / method versions and rule statements with their own unit. Administrative promises are not counted as actual meetings or actual support. Examples without identifiable coupling have not been counted as new citizens. Locators are PDFs pages, not necessarily the printed page number of the report.

Original	The whole original	Visual checks;	Legal / VISO-udva ed	Source
Sorø Adult Disability 2024	119 pages	50	18 / 5; Annex denominator 20 retained	Public original

Resolution Template	Only the amount of the individual payment; oral complaint to named adviser	Self-payment requires a separate statement of reasons / redress; no specific complainant	PDF 117
§ 83 / 85 new practice	Cleaning every 3 weeks; care / structure § 83; transition 3 months	Individual derogation; correct provision § 85; no automatic time limit	PDF 117
Compact workflow	§ 82 a / b while considering § 85 application	The measures cannot be used for § 85 people; the target group's cut surface is cloudy	PDF 118

Documented consequences and source chains

• PDF 28 refers to legally inadequate case information as the majority of 18, while the detail numerator is 8 / 18. Maintain statements / counts separately, no majority derived from 8.

• PDF 32 municipal practice provides action plans on residential offers, not § 85 / mobile offers / day offers; legal obligation may also apply there. The accommodation framework alone without a specific aid decision is insufficient PDF 31.
• PDF 29-30 specific § 85 complaint rejected as service level; termination for legal inhabil citizen and other decision addressed to the supplier. Same 18 cases, not new fault counters.

• PDF 42-43 automatic handover only for residential accommodation; others through Kompasset as new applications. Interviews describe late adult assessment and a lack of coordinated transition for some young people covered by section 122 of the Children's Act. Number/period of loss unknown.

• PDF 68-69 support discontinuation followed by uncovered personal / practical assistance; functional level documented aggravated without reaction. Another case denies accommodation without assessing the need without parents' two daily visits. No period / payment / repair declared.

• PDF 66 guardians hear about the terminated supplement fee from the estate offer; the municipality considers payment / § 103 → § 104 as a supplier, fails citizen's decision, parties only later. Late consultation is not evidence of full repair.

• PDF 72-84 legal overview expressly states:formal failures of safeguards may invalidate a substantively correct decision; SEL § 82 care without consent but without physical coercion;§ 141 offer, RTL § 5 holistic assessment,§ 148 follow-up. PM 22-18:deficient guidance may permit assistance from an earlier date; the absence of an alternative move/support option breaches the duty of care. These legal descriptions are not documented redress outcomes in 18 cases.

• VISO PDF 87-90 citizens' statement on mistrust contradicted by conclusion, lack of medical clarity of ability, documented loss of function untreated, cooperation material from other departments unused and transition meeting without further start before STU / boarding. Actual cessation / loss time and subsequent repair is missing.

• PDF 92-103 material list is the gross list of existing documents already in force, without CPR / names; must be included even if website. There are document titles and political meeting dates, not reproduced citizen counts from Targit / census 2023. The Material List is therefore a source chain for the Authority's knowledge, not a new performance register.

• PDF 111- 118 legal material note 15.4. / updated 19.4.2024 automatically establishes the exclusion of light support needs, forced Compass advance, incorrect complaint limits, excluded § 85accompanying / nursing homes / clarification stay, illegal § 104 half-day / support aximum, progress requirements, time constraints § 84 / 104 / 107 / 85, estate related to budget and limited free choice. Self-payment without a separate reasoned decision and oral complaint to a particular adviser is criticised. Number of citizens actually affected, loss time / reoccurrence unknown.

Observed deviations between the original parts

• PDF 13 says all advisors completed 6 course days first semester 2024; PDF 23 says the same training planned. Same period, different status statements.

• PDF 25's list of strengths calls the handling of alterations/remittals established practice; PDF 22 limits the established practice to section 100 and states that there is no established team practice on remittals. No general compliance can be inferred.
• PDF 34 advisors / self evaluation claims continuous systematic follow-up; VISO and the executor find dissimilar practices. PDF 35 final assessment says fixed cadence, but the same main text does not document any fixed call / participant practice. Keep the method difference.

• PDF 33 Advisors claim uniform orders, exporters apply differences in Nexus / apply. None of the interviews can replace the specific case deficiencies.

• PDF 55 calls overlap 6 out of 12 after 8 undisclosed cases.12 corresponds to justification deficiencies in PDF 58; no transfer of 12 to the entire sample. Main text PDF 28 claims the majority undisclosed despite 8 / 18.

• PDF 65 states 2 insufficiently involved guardians, but PDF 66 examples show 1 guardian and 1 mother. Retain 2 cases as overall deficiencies in involvement of citizens/relatives; not 2 guardians.

• The PDF 71 refers to 20 analysis forms and 20 cases, despite 18. Method Template / Population Conflict is maintained.

• PDF 53 does not say variable follow-up, while the detail PDF 69 distributes 3 unlit / 8 enlightened / 7 irrelevant and the main text describes the inequal practices.

• PDF 77 headline calls § 84 social pedagogical support, while the rule text correctly deals with replacement / relief; the measurement continues to refer to § 84 relief.

• PDF 70 the first performance list of the call § 85 / 107 / 108 / 105, but later in fact § 84 / 104 and the other 18 distribution. In fact, keep the result population.

• VISO-original PDF 85 calls 5 of 20 submitted; legal PDF 49 says 22 submitted / 18 measured and main method PDF 6 says 5 of 18.5 is maintained, all three denominators with version / page are retained.

• TUT-main text PDF 42 says 1 meeting / month; the material list's municipal procedures PDF 108 says 2 times / month. Both periodic statements shall be retained; no automatic implementation figures.

Concrete lack of power and responsibility documents

• No unread pages in this 119 page original. Later status / end runs and documented individual repair outcomes do not appear here.

• Personal dedup between 18 legal, 5 VISO, examples and 22 submitted; citizen interview -n and document rules actually affected population unknown.

• Sorø Kommune / AS / SBST: concrete resignations, new decisions, aid delivered, termination periods, transmission of cut-off § 85 complaint and actual compensation / liability is requested coupled with dates.

Nordfyn Adult Disability 2025

Good previous action plan	1 example	Consistency / responsibility; no new cases	PDF 84
Orders	0 in the 5 cases referred to it;	May be located in Nexus without being transmitted; not proof of 0 produced	PDF 84
Annual follow-up	Example of annual / if needed	Action plan expectation; actual varied practice and lack of conclusions	PDF 84-85
Continued employment offer	1 Follow-up Case	Continued level at the individual’s request; future status for assessment of residential arrangement, not redress	PDF 85
Sectoral cooperation	1 respiration meeting; 1 job center / local psychiatric exam	Original one or two cases; non-independent personal elements	PDF 85
Transitional meetings	16 years / 17,5 years; VUM 8 months before transition in 1 case	Positive VISO practices and planning material; no overall implementation rate	PDF 86

The versions and source chain of the Material Annex

Information	Counter, measure or version	Names, units and boundaries	Original site
Political document base	2022-25/2023/2024-25/2024-27	Vision / master plan / trust strategy / health strategy / budget; documents themselves are listed, not separately fully read here	PDF 87
Management data versions	November 2024; § 82 / 85 and settlement 2023-24	Titles, no original population / amount cells in the Annex	PDF 89
Legal quality	Working methods + action plan + case presentation + minutes	The municipality's original learning link identified; execution not proven by title	PDF 91
Knowledge sharing	No written guidelines	Municipal material response; Campus / newsletter / circulation	PDF 91
VUM / FFB	VUM 2.0 4th edition; FFB 2.01	Method versions, non-citizens or pre-dates	PDF 93
Case flow / versions	May 2024; FSIII May 2023; decision guidance June 2020; out-of-municipality status August 2023	Action plan / order / follow-up integrated Nexus according to the municipality	PDF 93
Transitional and cross-cutting documents	8.10.2024; NOVA 2021; Question Survey 27.05.2024	Titles / dates; no answer number, compliance or person number	PDF 94
Organisational versions	2024 and 1.1.2025; 5 listed record documents	Organisation time, not five government officials	PDF 95

Legal material control: initial rule statements and documented deviation

Information	Counter, measure or version	Names, units and boundaries	Original site
Limitation	3 policy/strategy documents;6 standard groups;7 case-handling materials	Only measured areas of responsibility. No approval of all other municipal material	PDF 96
Masterplan 2023: bet staircase	Minimum intervention as best offer	Disability compensation must be based on the best possible practical compensation; the economic staircase cannot replace the	PDF 97
Digital welfare centre	Screen / Apps / Acute Contact	Concrete ability for actual use / physical visits to be investigated	PDF 97
Temporary residence allowance	Rehabilitation / progress	Current support without ex ante time limit, including maintenance; the actual suitability of the home must be clarified;	PDF 97-98
§ 82 b	Up to 6 months	Cannot be used as a mandatory assessment of needs; § 85 necessary for continuing needs	PDF 98
§ 85 supplier	Own municipal support teams	Suitable and actual reception shall be tested individually;	PDF 98
§ 85 self-care	Hygiene / clothing	Measured under correct § 83 / 85 according to purpose; also motivation in practical execution	PDF 98-99
BPA Persons	Physical and mental function	Physical or mental; incorrect narrowing	PDF 99
§ 97 Freedom of choice	Local staff	The citizen’s right to choose their own companion disregarded in a standard statement	PDF 99
§ 97 care / relocation	Entry into escort	Must be measured under § 83, even outside the home	PDF 99 / 102
§ 97	Deductions for integrated escorts	In fact, individual escorts must be examined, not just the possibilities of the offer	PDF 99-100
§ 97 Refusal	Insomnia or health observation	Non-autonomous automatic cut-off grounds; complete and actual reception must be clarified	PDF 100
§ 107/108	Minimum intervention; offers of accommodation include aid	Compensation individually; the Authority shall separately measure actual aid in accordance with appropriate rules;	PDF 100-101
§ 108 target group	Special social problems included	The required significant permanent impairment of the law shall be tested;	PDF 101
BPA Handbook	Social pedagogy / medicine / respirator monitoring	§ 85 separately; medical care; sectoral responsibility by respiratory system	PDF 101-102
Accompanying grant	Can-determination is abolished in the future	Guidance and individual derogation from quality standard continues	PDF 102
Nexus Complaint Guide	Mail or mail	Oral complaint also allowed; same original template as 14 case deficiencies, not extra 14	PDF 102

Documented consequences and source chains

• PDF 7 previous significant challenges and longer period without leader; management knowledge / efforts 2023-24 is documented as source chain, not evidence that all current errors have been corrected.

• PDF 21 overturning action plan 2024 requires collection every six months, but advisers/self-evaluation do not confirm established practice and collection of all remittals for reconsideration is uncertain. PDF 23 management supervision put on hold and revised after implementation that caused insecurity, with missing information/learning.

• PDF 27- 28 cash grants limited in time 1 year, incorrect assessment by practice, 14 written complaints requirements and 10 missing overall assessments; organisational improvement statements do not override these errors.

• PDF 32:follow-up postponed under workload pressure, prioritised if the provider requests a change; announced intervals do not become actual meeting statistics. PDF 36:transport/geography impedes community participation; number of citizens unknown.
• § 85 support stopped in isolated citizens without clarification of the ability to actually use unvisited social offers; justification example PDF 51 she describes, enlightenment example PDF 54 he. Identity has not been verified and examples are not counted as new persons.

• § 107- rejection of citizens with anxiety, cognitive difficulties and self-harm was based on undocumented help in their own homes and family help. The family's desire to help and nocturnal unpredictable needs had not been investigated (PDF 51 / 53).

• § 85 refusal with help needs left to mother, who himself explained difficulties in overcoming the help; wanted family assistance had not been investigated (PDF 52-53).

• Refusal under § 108 despite low cognitive functioning and isolation, without clarification of the suitability of the home, staffing close at hand throughout the day and night, or the ability to make an emergency call; the telephone had not been used for half a year (PDF 54).
• § 95- grant called BPA and day-to-day monitoring without clarification of compensation or accommodation needs; the report refers to imperfect assistance as an option, not verified subsequent losses (PDF 55).

• PDF 61 provides proof of cessation of residence at the request of the citizen without clarification of continued post / other support; a second cessation without taking a position on requested support in own homes and daily abuse treatment. No evidence of any subsequent support or compensation.

• PDF 61 documents isolated citizens without clarification of escorts / relationships / personal care and a § 85 cessation without assistance for laundry and reminder of care. Uncovered needs are described; duration and repair do not appear.

• The rule overview PDF 78 requires verification of actual appointment of a guardian at age 18 and separation of short-term support under section 82 b from assessment of needs. No number of specific guardianship deficiencies or register of reparation is given.
• VISO PDF 81 describes the expected legal status and long treatment in Familieretshuset with no number or duration. Parents' application for guardianship does not prove actual appointment.

• VISO PDF 82-84 identifies an assessment not updated when support changed substantially, missing diagnostic source references, limited analysis and a specific offer/level without reasons. Counts are not stated; the findings may overlap with the 14 legal cases.

• VISO PDF 84-86 gives documented follow-up/transition meetings actually held as examples, but no person register or proof of later redress for all the breaches of law described.

Observed deviations between the original parts

• The methodology footnote at PDF6 says the count is not representative of general practice; legal PDF46 says 14 are all cases meeting the criteria and therefore cover general practice. The criteria population remains limited by excluded appeal cases/diagnoses.
• PDF 17 self-evaluation says advisors are not currently presented for management information; interviews say hocogoft deadlines. Management raises learning, advisors do not experience learning use. No consistent actual practice is deduced.
• PDF 30 municipal claim all offered action plan contradicted by legal 1 of 3 relevant; VISO 5 contains 2 missing offers and a special good previous action plan. The same boundaries must not be imposed.

• PDF 33 management / executor says all citizens are offered minutes; no interviewer experiences reception (n unknown). PDF 34 Final assessment repeats the tender statement without making actual receipt proven.

• PDF 40 management denotes new workflow implemented; PDF 39 advisors say new agreement not yet implemented. Document / phase status may be different; no harmonisation.

• PDF 42 management describes clear role allocation, advisors describe ambiguity and need for revision. PDF 43 after aggregation unclear handling of § 83 / 85.

• PDF 60 first mentions 2 unoffered action plans and then 2 other cases without consideration. The unique selection of the original 1 / 2 / 11 shall be retained; a further 2 shall not be added as a new population.

• PDF 62 classifies the notice follow-up meeting after 3 months as sufficient follow-up. This is not proof of actual conduct.

• The PDF 62 methodology template calls 20 cases the incoming cases; actually 14 and at most 3 awards in the sample versus an actual 5. Both delimitations are retained.

• The VISO strength list PDF 80 describes continuous follow-up; PDF 84-85 details do not say uniform / sufficient process and multiple cases without conclusion of continuing sufficient support.

Concrete lack of power and responsibility documents

• Nordfyns Municipality: obtain the actual new decisions, delivery of support, loss/back payment and dates from original refusal/cessation to redress for 14 anonymously linked cases. The report does not publish this person/effect register.

• Ankestyrelsen/ SBST: obtain documented subsequent development / final controls and which standard deficiencies were corrected when. Planned revision and elimination of standards does not document the repair of all individual cases.

What the originals prove and what should continue to be disclosed

The Board of Appeal's own reviews demonstrate concrete legal shortcomings, cut-off of the right of appeal, misdemarcation of aid and failure to investigate actual aid needs. Interviews in the main text, municipal self-evaluations and material titles verify the Authority's statements and knowledge, but not the material correctness of the statements. Documented contradictions can be seen above with both locators.

The originals do not publish case-by-case follow-up checks with new decisions, the date support was actually delivered, the period of loss and individual compensation. Deadline overruns are measured in bounded cases; they must not be used as the duration of all cessations of support. The strongest source-supported next demands are case-by-case redress and documentation of actual delivery, processing of a complaint denied review, lawful standards and preservation of the citizen's rights as a party. Municipal management and the competent supervisory bodies must be able to show what they did after acquiring this documented knowledge.

Fax 2025: child's law, loss of time and control of placement

12 cases: nine § 32/46 and three § 30; new/reassessed after 1.1.2024. Submitted March 2025; other collection March-June 2025. Three interviews/22 participants: advisers 7, providers 7, mainstream services 8. Earlier advice in 2024 assessed four cases; overlap not stated. Exclusion of already appealed cases is not specified in the methodology annex. No overall error count. [TFFAXE25, PDF3/5-7/43-44]

Specific objectives	Figures	PDF page
Child welfare assessment relevant	4 / 12; two finished / two unfinished	30
Four-month period between completed	Over 1 / 2	30
Ongoing progress without a position on parallel aid	One survey eight months	30
§ 30 Insufficient information and reasons	3/3	34/36
Placement plan later than three months	2/4	35
Personal supervision not implemented	Four placement cases; one interview after 14 days wrongly designated supervision	38
Efficacy after a written decision	Typically 1-1½ months; several decision letters just under one month after the eligibility decision	33

The check describes the lack of parental involvement and worrying approaches that are not treated as notifications. Therefore, a 24-hour notification target only covers registered notifications. The course was expected to be completed by mid-2027. [TFFAXE25, PDF5 / 21-31]

Own analysis: absence of supervision must be assessed against the placement date and applicable time limit in each of the four cases; without this link, it cannot be termed four concluded decisions establishing unlawfulness. The two exceeded plan time limits, however, have been specifically counted. Repeated deficiencies in participation, fact-finding and support must be followed through to an actual change of intervention, cessation or reunification. The report’s descriptions and new procedures contain no such overall redress count. Case ID, original decision date, letters, a timeline for support and supervision, and documented consequences and responsible decision-makers are required.

Guldborgsund 2022: fully original-controlled task force accounting

All 68 PDF pages read. Table 2 and the methodology discrepancy visually checked. The original’s printed page is the physical PDF page minus 1. Study interval 28.2.2020-22.2.2022; interviews May-June 2022. Children and Family, not the entire youth department. Closed, already appealed/considered by Ankestyrelsen, §65 cases, duplicate families and solely physical disability cases are excluded(PDF59). VISO is a subset of the 20 legal cases.

Documented timeline

Progress	From	To	Calendar days, own calculation;	PDF Page
BFU by deadline	2021-11-05	2022-02-11	98	47
First status after the three-month period	2021-04-04	2021-07-26	113	50
Implementation for first status	2021-01-04	2021-07-26	203	50
Between personalised visits	2020-06-11	2022-02-25	624	50

Other time / number indications: late schedule 3 days-7 months (PDF49); VISO example more than 1 ½ years of delay (PDF55); two prevention cases with Visos assessment of placement needs (PDF57); no PPRs knowledge in 10VISO cases (PDF39); planned supervision 2 hours every 6 weeks (PDF16). No documented date of restoration or repatriation.

Independent evidence and impact assessment

The 14 missing or outdated assessments are specific recorded deficiencies in the basis for decision-making. They may overlap with the 13 missing child interviews and the missing or late action plans. There is therefore no basis for adding the counts together into a number of different children, unlawful placements or responsible employees. This delimitation changes none of the recorded errors.

The time courses make the duration of the breaks visible. The 624 calendar days between the listed visits include the whole of 2021 without personal visits in the described course. The 113 days are the period after the three-month deadline for the first status, not a documented return process. The material provides a basis for a case-by-case review of the current basis of aid and action, as well as evidence of when each error was actually remedied.

The original's VISO figures conflict: the main text/annex states 10, the methodology section 9. The free municipality information concerning one case cannot be extended to all 20 either. Four additional clarification memoranda are mentioned without assessment of their content. The specific selection and measurement forms must be obtained to clarify the denominators. A standardised methodology section cannot negate the documented contradiction.

Required specific data request

Ankestyrelsen and the Social Protection Agency: the 20 selection forms, the VISO list 9 / 10, the anonymised criteria / case keys and, if applicable, the 65 follow-up. Guldborgsund: date of correction of the error, continued effort / intervention, actual repatriation and, where appropriate, disciplinary, criminal or compensation outcomes. None of these national figures can be derived from the sub-denominators of the report.

Lyngby-Taarbæk 2015: all original Task Force tables and denominators

All 80 pages of reports read (physically 56-135 in the 375 pages of the municipality). Measurement: two years before 1.1.2015. Adult disability § 85 / 96 / 97 / 107. Cases already complained of shall be omitted. Five citizen cases, each with two decisions plus 15 individual cases, give 25 decisions, a maximum of 20 case clusters without any person delusion. VISO: seven decisions in six ways, subset. Interview: five citizens and one relative; not representative.

Source's own number deviations

Subject	Information A	Information B	Precise demarcation
Action plan	10 prepared / 15 missing printed 57 / PDF112	9 produced / 16 missing printed 30-31 / PDF85-86	Only nine plans are included; the difference cannot automatically be changed to 16 breaches of the law without the measurement scheme.
Authorisation	17 full, Table 1.2 printed 45 / PDF100	Summary printed 47 / PDF102 mentions 3; printed 55 / PDF110 mentions other 19 full after one incorrect	19 plus one is contrary to table 17; both sides are visually controlled
Parties' consultations	2 high + 6 none + 17 not applicable, Table 1.5	Printed 50 / PDF105 refers to 19 to a large extent	17 not applicable is not 17 actually heard
§ 107 Time-limit	7 months minus 2 months should be given about 20 weeks	The same time-limits are later specified 28 weeks	Original figures retained, no tacit harmonisation
Disability policy	2007 in analysis printed 11	2008 in material list printed 74	The year of adoption and the title of the document may be different, unchecked original policy

Concrete consequences, responsibilities and lack of recovery data

Case Key in report	Municipal action	Documented deficiency / assessment	Consistency of report	Printed / PDFs idea
1	§ 85 support 6 → 4 hours per week	Failure to consult parties	Reduction 2 hours / week; AS cannot rule out other outcomes	60-61/115-116
5	Residential offers granted, seat only five months later	AS estimates 8- 10 hours § 85 aid insufficient	Five months intermediate period; increasing anxiety / isolation described	61/116
10	§ 85 support 9 → 6 hours, August 2013 until May 2014	Failure to consult the Parties on status bases	Reduction 3 hours / week	61-62/116-117
18	Refusal Article 85	2009 information, sparse current knowledge; faulty justification	Aid applied for cannot be granted; AS cannot exclude the impact of the results	62-63/117-118
3	Refusal § 107, Application February 2014 / Refusal April 2014	Absence of party consultation / note; contradiction in supporting information	AS indicates possible unmet support needs	63-64/118-119

Independent analysis of the scope of the evidence

The overall assessment of five decisions cannot replace the accounts of the six consultation gaps and nine breaks. An error may persist even if the study does not demonstrate a change in the outcome. The reductions and the five-month waiting period are concrete consequences; the report does not publish any subsequent reversal of the decision, refund, compensation or staff appeal. VISO repeats several of the same procedures and therefore does not provide seven additional failed persons.

Specifically necessary next document base

Appeals Board/Social Agency: anonymised assessment forms, linkage of 25 decisions to person/case keys, plan status 9/10, refusal/finding in the party's favour 17/19 and time-limit calculation 20/28 weeks and follow-up measurement. The municipality: case-specific dates for correct support, back payment, any compensation and a specific assessment of responsibility. The public report documents the deficiencies; it does not document their full duration after 2015 or a national person count.

Solrød and Odense: legal samples, baseline and actual follow-up

Limitation and original checks

Solrød's legal results, VISO and methodology annexes have been read on PDF40-65; Odense's on PDF42-67. The tables have been visually checked. The two-page municipal baseline and all 19 pages of the consultation annex have been read in full. All 65+67 pages of the 2022 analyses and all 49+39 pages of the 2024 status reports have now actually been read as text. The main-text and final-review supplements are set out in taskforce-solrod-odense-hovedtekst2022.md and taskforce-solrod-odense-slut2024-originalkontrol.md. There are no unread pages in these obtained originals. Original files have been processed only in memory.

The sample includes pending cases, the municipality having acted as the responsible municipality for at least one year, new decisions and three older placements. Cases already appealed/examined in Ankestyrelsen, cases examined under section 65, completed interventions, multiple children from the same family and cases concerning physical disability alone are excluded. Exclusion counts are not stated. The review covers selected statutory requirements, not overall lawfulness. Ankestyrelsen's assessment of materiality does not in itself change statutory requirements. VISO is a subsample. [TFSOL22,PDF57-62;TFODE22,PDF59-64]

Source deviations preserved

Solrød: deadline of four months, table 4/6 versus body text 4/5; four late action plans versus a list of 3+1+1=5; sample target eight placements, actual six, another methodology sentence five. Odense: VISO result 10 versus methodology 8; minutes 18 follow-up cases versus report 9; funnel process 72% in the main text versus 92% in the municipal annex. The report is dated June 2022, but PDF3 states an interview/data period of February 2022-April 2023. No discrepancy is corrected by guessing. [TFSOL22,PDF42/44/46/57/61;TFODE22,PDF3/42/64;TFODE24,PDF5/11/24/38;TFODESAG24,pkt7]

What the figures document and what the requirement must be

The baseline categories 202 + 71 + 143 = 416 are disjunct in the municipality's own registration; 273 red / yellow can therefore be calculated within that registration. The actual types of overlaps .28 notifications are hands.416 cases are not evidence for 416 different children and their overlap with Task Forces 20 or the 342 subsequent explanations are not published.

Solrøds 342 is the municipality's preparation report as at 31.8.2023, continued in the Task Force progress report. At PDF20, the Task Force explicitly states that it did not read cases of choice of effort, follow-up and end of final control. This does not document 342 controlled returns, discontinued interventions or replaced losses. A coupled series of cases must be obtained: actual deficiency, date of recognition, corrected decision, actual change, reunification, compensation and liability. [TFSOL24, PDF5 / 20 / 45]

Odense’s management-supervision percentages are based on the municipality’s own statistics with unspecified denominators. The specific waiting-time measurement concerns the ten most recently transferred notifications. The results are neither a national error rate nor a union count of individuals. The decline in documented child involvement in BFU96→90% and professional network involvement 54→48% is retained alongside the rows showing improvement. [TFODE24,PDF27/29/31]

The Odense example of a father’s consent only one week after the placement decision requires the contemporaneous decision, consents and physical moving date. A subsequent signature alone does not document a valid basis at the time of intervention. The information about one decision case before birth similarly requires original dates and the legal authority then in force. Actual movement before birth cannot be inferred from the report’s statement. [TFODE22,PDF44-46]

Consultation response and source chain

The 342 cases were instituted after the municipality's consultation point 4 on all cases opened 1.9.2022. It is the same municipal statement, continued in the progress report. Paragraph 5 maintains an assessment of particular focus areas; paragraph 15 delimits the course from the disability and family care area. Point 16 addresses the start of supervision until January 2023, while the municipal annex continues to indicate the end of 2023. Paragraph 21 maintains involvement / infringement problems in all three status meetings against the municipality's objection to one case. None of these units is an additional children's union. [TFSOLHOR24, PDF4-5 / 11 / 14]

All main parts of text are now actually text read: Solrød 2022 alle 65 / Odense 2022 alle 67 and Solrød 2024 alle 49 / Odense 2024 all 39 original pages. The number-passing control is thus supplemented by full text reading in the separate main text / end modules. Concrete 14 notifications and up to 3 months of waiting are recorded separately above.

Solrød og Odense: full main text control of the analyses 2022

Solrød's 65 pages and Odense's 67 pages have now all actually been read as text. The annex figures already recorded recur in the main text; they are not counted again. This supplement records main-text figures, management's knowledge links and specific descriptions of consequences. The remaining main text of the status reports remains a separate reading item.

Independent review of significance and responsibility

The specific placement examples require an assessment based on time and decisions:what documented assessment and valid legal authority supported the intervention on the day the child was moved? A later assessment cannot in itself prove that the decision's earlier basis was sufficient. Nor can it replace evidence of when contact, the intervention or the loss actually ceased.

Sunscreen's description of unnecessarily extended measures is a concrete evidence of continued intervention, not just a statistical lack of registration. The number and duration are still unknown. The statements of advisers and managers about meetings, system registration or ignorance of legal requirements shall be tested against simultaneous acts. They shall not cancel any breach of the guarantee. The regulatory guidance link of Florence must be traced to the original 2020 guidance, its approval, use and the decisions that followed it.

The requirement of working procedures and positive quality assessments do not prove the actual restoration of the child, legal continued intervention or freedom of responsibility. The requirements are therefore case-specific original decision, timeline, underlying information, review of the legal conditions, termination / reunification certificate and separate staff / criminal / replacement decision. No collective personal union can be formed by this supplement.

Versions and reading control

Answers front page jun 2022, PDF3 indicates interview / data period feb 2022-apr 2023; original pressure deviation, no guess main text 10VISO vsmethod 8 is retained in existing module

Solrød and Odense: full original control of the final reports 2024

All 49 + 39 physical PDFs pages are now read, including municipal reports and delivery documents. Ancillary PDF11 / 24 is also visually aligned in memory. This concludes the previous reading test for these two main texts. The table complements the already recorded 2024 figures; overlapping rows shall not be counted again.

TFODE24 / 38	Additional short sparring meetings	2	-	meetings;	In addition to 6 status meetings; no new cases

Control limits and specific discrepancies

TFSOL24 PDF4 / 20 / 42: bet selection, follow-up and termination delayed; no cases with these steps read. PDF16: continued lack of child involvement / justification. PDF18: Insufficient information about the next step / safety person. PDF27 indicates the start of supervision at the end of 2023, but PDF11 indicates January 2023. PDF45: 342 pre-reported by the municipality's advisors.

TFODE24 PDF14/17/19:the Task Force finds continuing insufficient child involvement and missing professional assessments. PDF11 states 72% funnelling in May 2023; municipal annex PDF24 states 92%=21%+71%. Both have been visually verified. The other management-supervision percentages have no public denominator in raw counts. PDF27 limits the 90% measurement to the 10 most recently transferred notifications.

Own evidence analysis and requirements

Conclusion: Organisational change and a declaration of completion cannot be equated with documented individual redress. Solrød's review exclusion leaves precisely the scrutiny of continuing intervention, follow-up and closure without a case-specific final check in the report. The already documented 2022 placement/safeguard errors must therefore be followed through their own records, rather than an assumption that 342 completed administrative remedial tasks repair all effects of the interventions.

The continuing lack of relevance assessment by Cedefop is central to whether action continues longer than necessary. Legal review requires current case information, the child's perspective and a reasoned assessment of necessity / proportionality. The transfer measurement of the local 10 notifications shall not be interpreted as the total processing time or reunification time of the municipality.

Requirements: Provide the basis for verification and the effective date of correction for each case, the 342 clarification criteria / verification, the basic figures and the inclusion rules of the management supervisors, as well as documented decision, type of action, termination / return and repair. Identify the conflicting tragedy figures and supervisory starting dates of the report issuer. No concrete criminal / employment response or person union can be deduced from courses and number of meetings.

Langeland: Task Force -original 2023, warranty error, time and oversight correction 2026

All 41 pages of the analysis and all 16 pages of the ministerial opinion are read in memory. Interview Table PDF39 is visually controlled. 2026 shall be treated separately from 20 years of age. No original file / image is stored.

Original find and method

2023 the committee has been submitted to the local authority, not by chance at national level. Exclusion of cases already pending has not been indicated; it cannot be borrowed from other investigations. The Task Force notes a lack of consultation, re-evaluation, relevant child involvement, support for accommodation families, professional match and documented decision dates. The formal compliance with the time limit for the acute assessment does not demonstrate the professional content of the assessment. [TFLAN23, PDF21-35]

The 2026 opinion rejects the basis for AS' rejection. The Ministry requires a fresh review of lawfulness, assessment of sanctions under sections 50 a-50 d and the duty to reopen. In the Ministry's assessment, organisation/increased staffing is not evidence of lawful practice. The resumed Task Force process extends to January 2028 and can realistically work only on involvement/assessment; other parts require longer development.26 supervisory records are neither 26 children nor 26 independent breaches of the law. The period-date difference 2025/2022 is retained. [TFLANISM26,PDF8/10-16]

Own evidence and requirements

Conclusion: Drawing up a plan 11 months after a placement leaves the documented period without the planning basis intended to govern objectives, choices and follow-up. The original evidence is the specific placement example TFLAN23-SAG-P29-ANBR. It documents a specific safeguard error and its duration; it does not yet document the lack of legal authority for placement, all individuals' identities or the actual return-home date. These links must be examined in contemporaneous records.

The chain of responsibility must include the municipality, the specific decision-maker, professional management, politicians' knowledge and the supervisory body's own omissions. Criticised redress without follow-up checks requires case-by-case evidence of correction, effective support, any cessation/reunification and compensation. Development agreements and closure of supervision cannot alone prove these outcomes.

Prioritised arguments: lack of a timely and documented basis for decisions; disregarded involvement and support for the family connection; missing effective follow-up; rejection of supervision on an insufficient factual basis. The demands are a fresh specific examination and actual redress, documented assessment of legal authority/proportionality and an assessment of responsibility linking knowledge and continuing omissions to each actor. No criminal culpability is derived from institutional statistics.

Documented errors are the declared guarantee deficiencies and the Ministry's corrected supervisory basis. Hypotheses: actual harm to each child, unlawful continuation of placement, individual guilt and causality. Evidence required: original records / decisions, Task Force notes 28.5.2024 / 5.5.2026, municipality review forms, supervisory review and effective compliance. Quotes of these joints in the ministry's original are preserved as a source chain, not as an autonomous full control of each quoted document.

Source-derived findings and method

The sample is current and submitted by the municipality; exclusion of cases already appealed is not stated. Three follow-up cases cannot be measured in time and must not be included in the six-case denominator. Concerning information about suicidal thoughts was not processed as a concern report. The documentation shows deficient child involvement, including children in care whose contact person replaced the child's own interview. According to adviser interviews, professional assessments were postponed until the possibility of granting assistance had been investigated. The Task Force characterises this as unlawful. Workflows sought a child welfare assessment that would last over time rather than ongoing updating. There is no exact aggregate error count. [TFNAE23,PDF24-36/40-41]

The municipality's news item of 3.10.2025 announces completion, continuing documentation/urgent-assessment challenges and follow-up after 6-8 months. It is not the final report's original tables or evidence of individual redress. [TFNAENY25]

Own evidence, responsibilities and requirements

Conclusion: Compliance with deadlines for registered concern reports does not erase the documented failure to process other concerning information. A formally correct 24-hour marker does not prove a professionally sound risk assessment. The connection between incomplete assessment, choice of support and missing follow-up must be examined in each child's contemporaneous case record.

The documented failures of safeguards require a fresh specific assessment of legal authority, need and proportionality, timely effective support and subsequent verification of redress. The established deficiency in individual supervision is not in itself evidence that all three placements lacked legal authority. Return home, actual reunification, harm and individual culpability require specific decisions, dates and evidence from the records. The chain of actors includes the adviser, management responsible for awards, professional management and supervision.

Documented errors: the precise deadlines / supervisors / BFUs and qualitative guarantee deficiencies above. Hypotheses: damage to each child, lack of home space and individual responsibility. Lack of evidence: original final report 2025, notification / recovery results for the 4 cases referred, anonymised cases, actual aid / reunification and sanctions. Priorities are effective emergency protection, documented decision-making, child involvement and effective post-control. The figures are traced to PDFside and SHA; no personal union is constructed.

Source-derived method and finding

The status measurement covers one year until 17.2.2020 and 20 municipal pending cases. VISO5 / 20 has been selected from BFU cases; this explains why the VISA assessment does not cover missing BFU. Three older locations are measured only on follow-up; their 3 month period is before the measurement period. The absence of a starting date before the measurement period shall be replaced by the start of the measurement period, unless the municipality itself has an earlier date. This may shorten the measured delay. The exclusion of pending cases shall not be disclosed. Baseline 2017 is reproduced, not independent control of the entire starting original.

The municipality acknowledges that almost all 20 cases submitted had deficiencies (PDF50), without an exact numerator. Its own supervision figures of 18/20 child interviews and 19/26 action plans concern different selections from AS. Missing professional assessments and record-keeping persist. Training and case-file clearance do not prove individual legal redress. [TFSTE20,PDF21/27/33/36/49-51]

Own legal evidence and requirements

Conclusion: the documented failure to update the basis for the decision is not corrected by reaching the age of majority. The original reproduces the municipality's acknowledgement in February 2020 and its decision not to make a correction. This makes knowledge and continuing omission specific, but does not identify the individual decision-maker's criminal culpability.

An old child welfare assessment, a missing child interview before transport and insufficient support before emergency placement must each be examined against the contemporaneous requirements for investigation, involvement, proportionality and effective support. An overall legality conclusion requires the specific placement decision and the consent/coercion basis. The original's professional statements about parenting capacity must not be accepted as true without the underlying assessments.

Documented errors: the precise legal numerators and local courses above. Hypotheses: a need for placement created by errors, unjustified separation, each child's actual harm and individual responsibility. Necessary documents: initial analysis 2018, contemporaneous decisions/BFUs/interview records, anonymised record keys, actual return home and § 65 outcomes. Strongest arguments: an acknowledged unremedied deficiency in safeguards; a decision before the child was heard; a long-outdated factual basis; missing effective support and subsequent oversight. Demands: a fresh specific assessment, documented redress/reunification, compensation for loss where causation is proved and assessment of each actor's responsibility. No union of errors or persons has been derived from the subgroups.

Committee and internal deviations

The municipality selects pending cases according to criteria. The complaint / Assereret / § 65 cases and several cases from the same family are already omitted (PDF60). Only selected § 50 / § 140 requirements are measured. Current support is a concern assessment; AStests not the accuracy of the specific measure (PDF64). VISOomits missing BFUand § 11. The Committee is not representative (PDF8).

Deviations: VISO10 cases (PDF7 / 52 / 54) compared with 8 in method (PDF66). Plan error 8 in text versus 4 + 3 + 2 = 9 case types (PDF29 / 50), for which acute plan 10 months; main table has 9 / 15 (PDF43). No harmonization or new

union of errors. Calculating delay from 4.11.2018 conceals earlier concerns in summer 2018(PDF47). The measurement period ends 3.11.2020,but certain examples include later 2020 information(PDF46). The back cover’s May 2021 date and other dating must be reconciled by version.

Self-certification, responsibility and requirements

Conclusion: a positive assessment of current aid does not eliminate any substantiated breach of the guarantee. The proof is the separate counters, times and exclusions. The obligation to protect also concerns effective timely investigation, child participation, proportional action and effective post-control. The assessment of PDF31 on secured legal requirements is contradicted by the same original's 8 / 8 break, 5 / 11 decisions before BFUand 5 / 17 § 48 are missing. This is a demonstrable difference between the Authority's overall formulation and its own precise control findings.

The course of the unaccompanied young person requires verification of the duty of protection and investigation; the absence of follow-up requires verification of the need for continued action. VISOindicates unfocused clipping and targets where responsibility is placed with the child without adequate analysis (PDF56-58). The underlying parental / child descriptions are statements of authority, not independently verified guilt of the family.

Documented errors: the numerators and courses above. Hypotheses: a need for placement caused by errors, unjustified separation, specific harm and individual criminal culpability. Next evidence: contemporaneous decisions, the basis of consent/coercion, original assessments, the redress review and final measurement 2022; actual returns home, compensation and individual responsibility. Strongest demands: individual reopening, a specific lawfulness assessment and documented redress; investigate the actor’s knowledge and continuing omission without automatic institutional exoneration. No national sum of persons can follow from this sample.

Nordfyn 2020: assessment backlog, financial management and missing placement follow-up

All 58PDFpages text read in RAM; PDF34 / 48 tables visually RAM-controlled. Printed page = PDFside − 1. The public PDFwas found via links from the municipality's official archived publication after the FTcopy gave 403.

Source-derived method and source deviations

The Committee has been selected by the municipality and not representative (PDF6 / 32). All appeals / Assereret / § 65 cases, completed interventions and several cases from the same family are omitted (PDF49). Pure physical disability is omitted. Only selected § 50 / § 140 requirements are measured. The BFU 2 / 4 deadline covers investigations carried out, not all 16 decisions or 143 ongoing decisions of the municipality. VISOomit missing BFUand § 11 (PDF55).

Discrepancies: VISO7(PDF6/32/41) against 8 in the methodology(PDF55); planned 17 section 52 against actual 16+1 older follow-up(PDF33/49); methodology mentions 3 of 5 placements(PDF53), actually 7 new+1 older. The main table's § 484/12 corresponds to the text's 4/16 with 4 immaturity exclusions. PDF39-40 includes February/March 2020 after the 1.2.2020 measurement boundary. No harmonisation/union of individuals. Municipal 155/143/116/103 are separate population subsets, not additional sample errors.

Independent evidence and legal consequences

Conclusion: documented breaks in time and guarantees must be tested together with the management of the lack of aid. The original's PDF8 reproduces the Director's statement that previous strategy / quality standards put too much emphasis on the economy and contributed to the sub-measure. PDF21 describes the management's prioritisation of investigations started after 1.1.2020, while old cases continued to lack investigation. The evidence is the report's reproduction of management statements and quarterly data; the original decisions and individual records are the next level of evidence.

Current legality, knowledge and responsibility must be examined actor by actor against the contemporaneous duties to establish facts, investigate, involve and follow up. Closing a case because the family is described as unwilling does not prove that the need for protection has ended. A child in care being subjected to several uses of force without follow-up requires specific investigation of continuing necessity, protection, proportionality and possible redress. Financial priorities or organisational corrective work do not automatically exempt anyone from responsibility.

Documented errors: review numerators and local courses above. Hypotheses: deterioration created by management, error-induced placement, unjustified continued separation and individual criminal culpability. Evidentiary gaps: quarterly information reports, budget/competence decisions, original decisions/BFUs/basis of consent/coercion, use-of-force reports and § 65 outcomes. Strongest demands: reopening cases lacking a current factual basis; specific legal review after use of force; documented timely support and actual return home/reunification where the legal basis requires it; individual assessment of loss and responsibility. No national total can be derived from overlapping reviews.

Rudersdal: continued guarantee deficiencies after Task Force progress, 2024-2026

The final report was published in 2026 and examines 2024-2025. It is included separately from the reports for the 20-year period. Five original annexes, totalling 41 physical PDF pages, have been read in memory. PDF7 in the final report has been visually checked: a photograph without statistics. The original analysis report from June 2024 has now been read in full in taskforce-rudersdal2024-indledende-original.md, a further 40 pages. The municipality's recommendation matrix remains a different source.

Original numbers and denominators

Source / PDF page	Measurement	Counter	Denomination	Unit	Period / selection
TFRUD26 / 5	Status meetings	6	-	meetings;	2024-2025; Development

TFRUD26 / 5	Local status reports	6	-	explanations;	2024-2025; the municipality's own description of target attainment
TFRUD26 / 5	Self-evaluation areas	5	-	areas	start / end; Not five errors / persons
TFRUD26 / 6	Further follow-up meeting offered	6-8	-	months	after completion; offers; actual holding not documented
TFRUD26 / 22	Absence of a position on the need for the child's plan	3	3	cases	October 2025; Latest review; steps to be taken
TFRUD26 / 25	Cases at each meeting	3	-	cases	status meeting 2 / 4 / 6; same nine readings as PDF5; not added to 9
TFRUD26 / 25	Workshops on the development plan / management system	2	-	workshops	2024-2025; Activity, non-outcome
TFRUDM25 / 4	Thematic management oversight carried out	1	-	supervision;	until April 2025; Process control; case not disclosed
TFRUDM25 / 4	General management supervision carried out	2	-	supervision;	until April 2025; Process control; case not disclosed
TFRUDE25 / 1	Statusmeetings with counsellors	3	6	meetings;	development phase; Also the final report's 6 meetings; not to be added
TFRUDE25 / 1	Background to experience other municipalities	more than 40	-	municipalities	23.10.2025; Experiences, unchecked national error rate
TFRUDH26 / 2	Municipal consultation response	2	-	answer	04.02 / 17.02.2026; given after consultation 30.01.2026

All rows have separate units. The nine readings, three meetings and 3 / 3 plans are not to be added together. The selection framework, personalkeys, already-pending exclusion and overlap between January / May / October is not published here. No calculation of national errors / personalities.

Guarantees and authority knowledge

TFRUD26 PDF16: continued incomplete child involvement. PDF18: imprecise / long-term declines and standardised 24-hour assessments. PDF20: recent case examples do not clearly justify the suitability of the action. PDF22: 3 / 3 without a statutory position on the child's plan; also lack of justification for the time / purpose of follow-up. No misunion has been published for these categories.

TFRUDH26 PDF2-3: The municipality did not indicate any factual errors; the summary was contested and amended. The mid-term assessment relates to development work, not to the legality of all decisions. TFRUDM25 PDF4: Management action on supervisory findings is assessed only to some extent. TFRUDE25 is a development / anchoring note without individual legality checks.

The municipality's own 25-point matrix

No	Zone	Municipal status	TFRUDK25 / PDF page
1	Common view of children	not started	1
2	Political / professional orientation	in progress	1
3	Working procedures / quality	in progress	1
4	Management information	in progress	2
5	Management supervision	in the target	2
6	Technical Forum	in the target	3
7	Court sparring	in the target	3
8	Interdisciplinary roles	in progress	3
9	Common language	in progress	3
10	Preventive advisers	in the target	3
11	Transfer of experience	in progress	3
12	Role of the Authority	in progress	4
13	The child's perspective	in progress	4
14	Quality of conversation	in progress	4
15	Current involvement	in progress	4
16	Network	not started	4
17	Concern as notification	in the target	5
18	Review	in the target	5
19	Network in the assessment	in progress	5
20	Parental competences	not started	5
21	Professional analysis	in progress	5
22	Options for action	in the target	5
23	Family coordination	split: in target / in progress	6
24	External cooperation	in progress	6
25	Follow-up / closure	in progress, close to target	6

Status 23 is divided between siblings and coordination across child / youth / adult areas. Status 25 is in progress, close to target. This is municipal self-evaluation; not 25 legally tested decisions.

Own evidence analysis, legal proceedings and necessary documents

Conclusion: The termination of the extension does not prove that the child's guarantees have been restored. The concrete evidence is the 3 / 3 lack of the latest review. Plan requirements and reasoned follow-up must be met in each case; an assessment of organisational momentum does not meet these requirements. The lack of assessment of support needs, the suitability of action and the child's perspective weakens the evidence that continued action is necessary and proportionate. The published material does not identify the placement for the particular three cases: the duration of the placement, illegal detention or actual repatriation cannot therefore be attributed to those three without a certificate of record.

Management and the State oversight authorities had specific knowledge of the deficiencies no later than the review in October 2025. The necessary demand is individual verification of safeguards and documented redress: original and

current decisions, type of support / placement, plan assessment, child involvement, reasoned follow-up and time of actual correction. Liability shall be tested against proven knowledge and subsequent omissions. Neither courses, future 2026 plans nor summary changes are proof of the repair of a particular family.

Documented errors: the planning deficiency and the specific guarantee deficiencies listed above. Additional evidence requirements: individual records, type of action, case union, impact time and track of responsibility. The starting dates vary in the originals: mid-term status September 2024, extraordinary status June 2024, end report review period November 2024. They are preserved as source versions without harmonisation.

Rudersdal 2024: the initial Task Force original

The original analysis is now provided and all 40 physical pages of text read. Interview table PDF39 is visually aligned in RAM. Together with end / consultation / middle / additional / status matrix in taskforce-rudersdal2024-2026 original.md 81 original pages are actually read. Home June 2024, bread text prepared May 2024 and data base November 2023-March 2024 are separate date entries. PDFprint page = PDFside − 2.

15	Joint meeting of the Authority	6	-	weeks	Adult and child areas, not a sampling interval

The original has 12 current cases, 9 § 52 and 3 § 11. It provides patterns and specific cases, not a legal outcome matrix for every requirement. The methodology does not specify exclusion of appealed or § 65 cases, the same family or disability; such filters therefore cannot be imported from other years. The abuse-preparedness plan is expressly omitted because of ongoing revision. The denominator for necessary reassessments and uniqueness between cases are not published.

Specific action, guarantee and significance

An actual placement occurred before completion of the BFU without a sufficient specific assessment; a young person actually returned home was asked to assess their own support needs. One child was not heard until after 4 months, with the BFU completed beforehand. Concerns about the use of force were not followed by an assessment of the intervention. Inadequate information about a support person weakened the child's actual choice. Referral of 2 cases to the children's office in January 2024 does not document their subsequent outcomes. [TFRUD24 PDF22-33]

The independent analysis is that placement and return home require a documented, individual basis. The parents' wishes cannot replace the assessment and reasons that the original itself finds missing; nor must the child bear the authority's responsibility for necessary support after return home. A subsequent development process does not prove that the earlier decisions were reviewed or their consequences repaired. The 3/3 failures to address the child's plan in October 2025 are therefore a new safeguard observation, not redress for the 2024 cases and not documented as the same three individuals.

Specific demand on the register authorities: file numbers for the two referrals to the Children’s Office, next action, date, outcome and implementation, and anonymous linkage to the underlying cases. Actual compensation or return-home claims require the original decision, applicable legal authority, investigation of the case, proportionality, duration, actual cessation and loss. The published patterns must be criticised fully; an aggregate number of placements without legal authority cannot be established from this original.

Slagelse: legal guarantees, waiting time and municipal control 2020- 2021

Two originals on 76 physical pages are fully textured; tables and figures on nine pages are visually aligned in memory. PDFside indications apply to physical pages; TFSL20 printing page = PDFside − 1. Previous empty portal views are replaced by current working original attachments.

Population and separation

TFSL20: 20 municipal selected pending cases, 17 decisions and 3 § 11 offers. Places 8 of which 3 older follow-up cases. Complaints / dealt with Assages and 65 cases, completed interventions, same family and children alone with physical disabilities excluded. VISO10 is a subset with document conditions, not an additional 10 children. The control includes selected requirements, not all of § 50 / § 140 requirements. Assay of current support is concern screening, not approval of the specific measure.

The municipality's own control: all targets, milestones and September 2021 cells

The percentages are published rounded values. Exact outcome counts are unpublished and have therefore not been back-calculated. Partial compliance cannot be renamed full legality. 14 days/4 weeks are the municipality’s indicators; their legal basis is not established by the table heading alone.

PDF	Checks	Final target%	Milestones% / time	Status%	N	Original qualification;

Documented consistency and verification of sources

The placement interviews took place after the decision in two specific cases: the day before a move to a foster family and more than 10 days after separation from the mother at an institution. Child welfare assessments and plans were deficient or late; each safeguard requires its own denominator. AS assesses materiality specifically and finds no special circumstances rendering the identified safeguard failures immaterial. A § 11 case was sent to the specialist office; the report does not prove that the § 65 case was actually opened. [TFSL20 PDF40-46]

The independent analysis is that a subsequent interview cannot give the child influence over a separation already carried out. Quality targets, organisational measures and a later screening for support concerns likewise do not document that the decision's earlier legal deficiency has been repaired. The specific legal consequence requires the decision's legal basis, case records, annulment or fresh review, effective period and actual reunification. None of the published tables supplies this chain. The error must therefore be described fully and specifically; unlawful placement or abduction requires further individual application of the legal rules to the facts.

Parental planning status 35% / 23 in 2021 demonstrates that the municipality's own control still did not reach its target 100%; also, part-classified fields do not show any certainty of legal legality. No amount of persons involved or percentage of improvement between the two completely different samples shall be calculated.

The differences between the original and the necessary documents

The three-month requirement's overall 0/3 is consistent. PDF30 nevertheless says that all 3 time limits were exceeded, whereas PDF46 generally says 2 late and 1 timely with a content deficiency; the specific example at the same location describes both time and content deficiencies. June→November 2019 is also called 4 months. These statements are retained with page references without harmonisation. Requirement denominators 16/7/9/11 cannot be replaced by the T3 heading's 17. The expression 19/20 relevant support is limited by the methodology's screening for concerns and does not contradict the 2/3 insufficient § 11 offers at the time they were offered.

Lack of personal evidence: individual decision-making exercise, actual repatriation, duration until termination, compensation and employee responsibility. An actual later final report has not yet been identified in this module. Initial policy decisions on prevention and maximum waiting time have only been reproduced, not independently provided.

Middelfart 2020: original figures, action programmes and development plan

June 2020 analysis has 69 physical pages, all text read. PDF44 / 46 / 60 is visually aligned in RAM. The municipal development plan has 13 pages, all read; item 33 / 14.06.2022 has been read separately. The actual tabular outcome of the final report has still not been provided. Pressure side in the analysis = PDFside − 1.

TFMIDV19 / Point 103	Subsequent management follow-up	1	-	monthly meeting;	Number actually held not disclosed

The sample is 20 cases, not 20 new decisions:16 under § 52,1 older placement follow-up and 3 under § 11. Already appealed, AS-considered/§ 65, same-family and solely physical disability cases are excluded; the disability team is outside the analysis. Denominators vary by duty and exemption. Error types and the VISO subset overlap. Opening 5 concern-report cases documents no final § 65 decision. [TFMID20 PDF9/44-66]

Actual timeline and local examples

PDF	Local example ID	Action / omission	Date or interval	Precise meaning
49	MIDE-AN-BFU-A	BFU update after the placement decision	approx. 7,5 months	Non-compliance with the legal requirement prior to decision; actual date of removal / termination unknown
49	MID-AN-BFU- B	BFU update after the placement decision	about 2,5 months	Same requirement; not documented entire duration of placement
46	MID-AN-MOR15	First contact with mother with joint custody	4 days by decision	Mother not tried contacted before placement decision
47	MID-KON13	Outstanding follow-up conversation → first conversation	10 months	No § 48 pre-decision interview; intervals should not be interpreted as the duration of placement
47	MID-KON13	First conversation → Contact person decision	additional 5 months	No § 48 pre-decision interview; intervals should not be interpreted as the duration of placement
47	MID-KON13	Decision → First opportunity for the child to take action	approx. 2 months	No § 48 pre-decision interview; intervals should not be interpreted as the duration of placement
48	MID-FAM5Y9M	Decision → conversation	approx. 1 month	The child's behaviour subsequently gives concrete doubts about relevant action.

10	BFU direction / deadline	Process milestone missing	Project responsibility team manager; no outcome measurement
11	Business model	January 2020	Visiting committee / House of Broachs; original date retained
12	Network procedure	August 2020-June 2021	Team Managers / Professional Coordinator
13	Professional network	?2021	Coronaexposed; not actually implemented

The plan is a plan, not proof of redress. The 2022 meeting item describes a process from August 2020-February 2022 and announces a new plan in August 2022. It publishes no case-by-case implementation or follow-up measurement. Management's 14 years of continuity and acknowledged formal deficiencies are municipal statements about the background to commissioning the work. [TFMIDP20 PDF1-13;TFMIDM22punkt33]

The separate municipal welfare check includes 101 placement cases. 11 were selected for possible repatriation with increased support; the municipality informs 5 actually repatriated children in October 2019,4, still possible and 2 without short term potential. This is a different population than the Task Force's 20 and cannot be added to them as new children. There is no public case coupling for the 14-year-old or the two late BFUupdates and no declared invalidation / repair cause. [TFMIDV19punkt103]

Independent analysis of guarantees, consistency and necessary requirements

The documented prior requirements had a specific function: the child had to be able to influence the decision that changed their life, and the authority had to know the individual support need before choosing an intervention. An assessment 7,5 months after the placement decision cannot retrospectively document what information was actually available when the decision was made. Failure to contact a joint holder of parental responsibility before the decision requires individual scrutiny of hearing of the parties, consent, reasons and significance for the outcome. The public report examines selected requirements; it does not publish the original decisions or a judgment declaring them invalid. The strong documented criticism is therefore the actual breach of the safeguards and the authority's absence of published reparation for their consequences.

The knowledge timeline from 7.12.2017 must be assessed from the information actually received, not the later registered start of 2.3.2018. Development targets for timeliness cannot move the historical deadline or make the elapsed waiting time lawful. The April 2019 return-home decision proves that cessation of the intervention was later decided; it does not prove when the child actually came home, what contact there was, or whether support and loss were remedied.

The necessary specific demand addressed to Middelfart and the Appeals Board is for the anonymously linked original decisions, legal authority and basis of consent, BFU documents with version dates, hearings of the parties, actual move/return-home dates and the 5 notification cases’ record numbers, subsequent decisions and implementation. For the responsible management and staff, contemporaneous evidence of knowledge, instructions and follow-up is also required, together with documentation of legal reassessment and compensation. This is necessary linkage of evidence; it must not be used to tone down the already documented breaches of prior requirements.

Task Force: Glostrup, Odder, Faabors- Midtfyn and Svendborg

Four children's TaskForce programmes; original municipal reports, 2006-2025, with follow-up separately. Only own compact facts; all original pages of RAM.

The tables and main text of the originals are checked in the memory of the specified pages. Figures are cases or actions assessed; categories overlap. Start and end measurements are different samples, not documented personal events. Self-reporting and the assessment of the Task Force are described separately. No total unique debug population or actual reunification series can be derived from these reports.

OD17 - Otter analysis report, 10 March 2017

Original: Odder analysis report,10. March 2017. SHA-256 feba3af87eba229ec8d6cd73bb577c6e22acd02cecfffcbe290b16bff4c1c5f2. 48 PDF pages; read 1-48, the entire original. Measurement period 1.8.2014-1.8.2016. Municipally selected pending cases concerning ages 0-17; no cases involving only physical disabilities, completed interventions, sibling cases or cases previously appealed/considered/under § 65. The municipality responsible for action during the most recent year. New decisions within the most recent year; three older placement cases for follow-up. No representative municipal error rate.

Documented waiting times and consequences

Item	Figures	Denominator/scope	Original location
BFU time-limit breach, contact person	approximately 16 months	EXPRESSED 4 Months	PDF36
Child welfare assessment deadline exceeded, placement	good 2 years	EXPRESSED 4 Months	PDF36
BFU completed after the placement decision	Ca.1 year	a case;	PDF37
Supplement completed after the placement decision	Ca.1 month	a case;	PDF37
Plans for children already placed	approximately 5 weeks × 2	2 cases	PDF39
Plan after child actually scanned	approximately 11 months	1 case	PDF39
Plan on the placement day after the decision	3 months	1 case	PDF39
Legally assessed plan delay location	21.-26.2.2016	Aged 15; 5 days from actual placement to plan	PDF39
Discharge plan	ca.1 week	1 case; continued uninitiated 9 months after decision	PDF39
First follow-up December 2014 placement → June 2015	ca. 3 months late	1 topical follow-up case	PDF42
Observed relief + contact person → new contact	November 2015- August 2016	At least 9 months without measures; no respite family found	PDF44
Barnanbraguten BFU	August 2015- yardstick 1.8.2016	7 year example; no BFU at end of measurement	PDF44
Barnanbragtknob 1 year old → BFU	well over 1 year after placement	The same case trajectory may overlap other figures; no person total	PDF44
VISO first notification → BFU	4 months 4 years	5 case-social assessments	PDF45
Monitoring not correct	2 conversations in 2 years	Aged 8; both at the office; no visit to the placement location	PDF43

The failures of safeguards have a specific temporal effect: children were already placed while the BFU/plan was still missing, and granted respite care was not implemented for at least nine months. This original contains no dated record of return home, reunification, compensation or individual redress. What is documented is intervention without prior procedural steps required as safeguards; the question of legal authority/invalidity requires the full basis of each decision. Source conflict: the main text PDF25 discusses 4/13 current BFUs, whereas the legal annex PDF35 additionally gives 2 current supplements. The fuller breakdown is retained. PDF13 gives child interviews as 5/12 relevant cases against the annex's 5/14 including 2 age exceptions. This is a denominator difference, not additional cases.

OD19 - Otter Status Report, October 2019

Original: Odder status report, October 2019. SHA-256 00f7746ccd50468d37900eb6dc8af6450d0765f3f479d0c8146a292b004fe812. 39 PDF pages; read 1-39,the entire original. Measurement period 16.4.2018-15.4.2019; development process November 2017-June 2019.20 pending cases submitted by the municipality; VISO 5-case subsample selected with BFU+plan. The original does not repeat the initial measurement's complete specific exclusion list; it is therefore not silently transferred.

All legal deficiencies, original Table 1

Overlap; not 13 self-employed fault groups. § 65 was only created after measurement.

Time and action

Item	Figures	Denominator/scope	Original location
Child welfare assessment deadline overruns	5 days / 6 weeks / 6 months / 7 months / 7 months	5 cases; 4 months	PDF21
Plan after decision	23 days -6 months	5 cases	PDF23
New BFU decided but not executed	summer 2016 → March 2018	later 3 ½ months + almost 5 months BFU	PDF26
Absconding before a new decision on a secure institution	20-30	1 young; number of vacations, not persons	PDF27
Parental plan explains the requirements for return home	1	No return-home date/outcome	PDF30

The Task Force finds that the municipality has not improved the overall measurement of statutory compliance, although professional systematic working in the VISO subsample has improved. Budget balance in 2019-2021 and a postponed ICS course are specifically discussed in the original; this documents known priorities, not a general excuse for failures of safeguards. Source discrepancies: PDF12 describes 8 compliant § 48 cases and places the child's refusal as the last separate case. The detailed annex PDF20 includes the refusal in 8 and separates disability as 1 not relevant. Both formulations are retained; the 14-case distribution 8+1+5 comes from the detailed annex. Table 1 describes 5/20 as "not sufficient/relevant support"; the main text PDF24 calls uncertainty about support grounds for § 65. The parent plan's clear conditions for return home are not actual reunification. The final outcome of 5 own-initiative cases, compensation, individual redress and placement duration until final return home are not stated.

GL19 - Glostrup status report, April 2019 (front page), May 2019 (kolofon)

Original: Glostrup status report, April 2019(front cover),May 2019(colophon). SHA-256 2e90a70fbe8cde32527203de208cf972a4519199dfc780ec74dc195fc1143941. 49 PDF pages; read 1-49, the entire original. Status measurement 2018, measurement period 5.11.2017-4.11.2018.20 pending cases submitted by the municipality, 10 current decisions. The requested 14 decisions could not be supplied; § 11 and concern reports substitute. Already appealed/considered and § 65 cases excluded; 0-17 years old, not solely physical disability, the municipality responsible for action during the most recent year, most recent decisions working backwards from the cut-off. The report reproduces 2016 baseline figures; the 2016 original's own methodology has not yet been found.

Original Table 2.1: Causes and Union of Decisions

Actual unions of 13/14 and 10/10 are available; reason categories must not be added together. The 2016 cells are later reproductions, not a 2016 original read directly.

Time, intervention and actual source deviations of the measurement period

Item	Figures	Denominator/scope	Original location
2018 BFU time-limit breaches	3 days / approx. 5,5 months / barely 7 months / 7,5 months / 9 months	5; Udover4 months; municipal start-up	PDF19-20
2016 child welfare assessment deadline overruns	3 months × 2 / 4 months × 2 / barely 8 months	5; tendon rendering	PDF20
Plan after the placement decision	approximately 2,5 months	1 case	PDF21
Child interview after the placement decision	Ca.2 and 4 months	2 children,5 and 8 years old; before actual implementation	PDF21
Placement decision→actual placement	June → November 2018	Aged 5; the report calls the interval 4 months	PDF25-26
Placement decision with an outdated BFU	June → November 2018	8 years; BFU 2016, lovedrefresh-page18, still at end of measurement	PDF18-19
BFU municipal start / finish	15.9.2017/18.1.2018	3 day calculation; ASmente startburdebe 9.8.2017	PDF20
Contact person decision→child welfare assessment completed	June → September 2018	12 years; AS criticises 8 months from concern report to contact	PDF19
Age 14, family BFU decision without a completed BFU	April → November 2018	family treatment June 2018	PDF18
§ 11BFU	28.2.2018 notification → November 2018	7 years; slowly	PDF25
§ 11 concern → BFU decision	May / June → October 2018	17 years; non-finished	PDF25
VISO outdated information	over ½ years	No assessment of whether information is current	PDF31

The criticism concerns all 10 current decisions examined. The fact that 3/20 case trajectories have particularly problematic circumstances is a different indicator and cannot replace 10/10 failures of safeguards. The municipality's meeting item 19.6.2019 states that no own-initiative cases were opened at the start/end; the original PDF contains no separate section 65 outcome register. The absence of own-initiative action does not document lawful decisions. Source conflicts are retained: PDF17 body text states 4 deadline errors, table 2.1 and its detailed breakdown 5; PDF27 first states a decision deadline of 5. November 2018, finally 5. October 2018, while PDF28 limits the review to 4. November. PDF20 calls 16.8.2017 within the measurement period, which otherwise starts on 5.11.2017; both dates stand without harmonisation. PDF29 main text calls the age group 15-18, the table 15-17. Cover April 2019, colophon May 2019. VISO PDF32 finds that the goals do not describe follow-up and thus make it difficult to assess when a measure can cease. This is a specific risk of continuing interventions without documented review of goals; the original does not state actual return home or total intervention duration until reunification.

FMK17 - Faabor-Midtfyn Analyst Report 31.8.2017

Original: Faaborg-Midtfyn analysis report 31.8.2017. SHA-256 5d926e832f54780b26ade9a0a3f331bdda584dcfae9adf06fc8825d4201acfd8. 47 PDF pages; read 1-47,the entire original. Measurement 1.4.2015-1.4.2017.20 pending cases=17 § 52+3 § 11. The 3 older placements with follow-up are included in 17 and 8 placements, not additional cases. Excludes cases already appealed/considered by the Appeals Board including § 65,sibling cases, physical disability alone, completed interventions; responsible municipality during the last year; 0-17 years. VISO 5-case subsample with BFU+plan.

Time and actual action

Item	Figures	Denominator/scope	Original location
BFU deadline overrun	5 ½ months	1 location case; in addition to 4 months, early notifications control take-off	PDF35
BFU by decision	1 ½ and over 2 months	2 cases, location / contact person	PDF36
Old BFU without update	2013 × 1 / 2014 × 3 / 2015 × 1 / m aj 2016 × 1 / Aug 2016 × 2	8 cases	PDF34-35
BFU assessed no → decisions yes without update	August 2016 → January 2017	2 cases, location / family	PDF35
Plan after actual placement	6.12.2015→21.12.2015	15 days; Decision September 2015	PDF38
Family plan by decision	January → February 2017	plan assessment does not correspond to actual effort;	PDF38
Contact plan after decision	18 days	Decision 10.10.2016	PDF38
Plan delayed, special conditions	ca.2 weeks / next day / not reported	3 cases; first relief → placement, second removal, third-party care	PDF38
§ 11 Contact → Offer	less than 1 month	3 cases	PDF40
Actual return after placing	Ca.2 ½ years	1 child; respite, previous foster care+mother's treatment; no date/cause of error	PDF41
Baby BFUs supplement decided / unmanufactured / reloading extended	Dec 2015 → Jun 2016 → Oct 2016	ca .1 years; restocking feb 2016; corn condop claims on-going supplement	PDF41-42
VISOnotification→ BFUend	½ -4 years	5 cases; 1 should start earlier	PDF43
VISOinformation old	more than ½ -1 years	without a reasoned assessment of whether it is still current	PDF43
Waiting time for a measure	up to 6 months	interview statements; non-register targets;	PDF27
Unlawful local concern-report thresholds	3/5	Interview: second opinion/in-depth review; § 155 any concern report in an existing case	PDF22

Local municipal thresholds of 3 / 5 notifications may exclude regulatory reassessment of new notifications. Interview statements about deliberately postponing the action plan to expected action may begin describing a known practice contrary to the legal requirement; up to 6 months waiting are statements, not a counted national duration of proceedings. The 2 § 65 creation documents uncertain support in relief and contact cases; the original does not have the subsequent outcome. The actual return after about 2 ½ years is actually reunification but not documented repair of one of the listed errors; no date or identity coupling provides the basis for that conclusion. In 4 / 5 cases, the Visos plans lack concrete objectives and, among other things, conditions for children to return home. It demonstrates a lack of the basis for the cessation exercise, but not a fixed duration of placement. All categories are kept with their own denominators; no union of errors or persons is constructed.

FMK20 - Faaborg-Midtfyn Status Report, March 2020

Original: Faaborg-Midtfyn status report,March 2020. SHA-256 736cd722387e240de10f42119d42cd3f439048c70ead8e85814eefdbb3e614fe. 43 PDF pages; read 1-43, the entire original; figures without textual values remain a separate outstanding item. 20 pending cases; measurement period 28.10.2018-28.10.2019.14 current section 52+3 section 11+3 older placement follow-ups. VISO5 selected by BFU+plan, but the review actually finds only 3 plans; this sampling/result conflict is retained. The 2017 exclusion list is not repeated in full and is not transferred automatically. Development period March 2018-October 2019; municipal plan 2018-2021.

Cross-cutting qualification / audit	January-May 2020	phase planned;	PDF35 Figure
Implementation	August 2020 and onwards	phase planned;	PDF35 Figure

The municipality's own final statement describes specific consequences of cuts: slower support, exceeded time limits, outdated assessments and a risk that ineffective measures are not brought to an end. These are contemporaneous statements about the municipality's knowledge, not hypothetical counterarguments or an excuse as to legality. The Task Force's final measurement documents a decline in lawfulness. VISO finds missing answers to parents who specifically ask what is required to get their child home. The two references to actual returns home in the 2017/2020 measurements are separate source examples without identity linkage; they cannot together be presented as two unique remedied cases involving errors. Withdrawn consent in another case is not evidence of return home. The sample is described as 5 VISO cases with BFU+plan, but the substantive review finds only 3 plans. This internal conflict must not be concealed through an automatic plan denominator of 5/5. The municipal self-report claims progress while the external final measurement finds a decline; the self-measurement's 23/25 funnelling cannot be added to 20 TF cases.

FMK20H - Faaborg-Midtfyn consultation response 20.3.2020

Original: Faaborg-Midtfyn consultation response 20.3.2020. SHA-256 5858fba5ab006c96ce72c480f6926c19441c49d525b2d2b40e8cd12be9b13d37. 2 PDFs pages; read 1-2, the entire original. Municipal Party opinion on TFs final report; no new external legality measurement.

Consultation information

Item	Figures	Denominator/scope	Original location
Active Case Tribe	699-907	active cases through 18 months; not unique children	PDF2
TFsample	20	municipal objection concerning representativeness	PDF2
Continued development plan	to 2021	future commitments, unexecuted repairs;	PDF1

Municipal management states its basic agreement with the analysis's substantive content and recommendations, but raises the size of the case population against representativeness. This does not alter the specifically documented failures of safeguards; the reply letter states no individual reopenings, compensation or reunification outcomes.

SV18 - Svendborg Analysis Report 6.2.2018

Original: Svendborg analysis report 6.2.2018. SHA-256 fb92f69cb071785620a76b2ed9e2180f4ab82e795471ad6c8f5f1116de695ce2. 81 PDF pages; read 1-81, the entire original. 20 pending cases, measurement period 18.9.2015-18.9.2017. Actual 16 § 52+4 § 11 against the requested 17+3. Three follow-ups on older placements included in 8 placements/16 § 52. VISO 7 of 20,includes 3 follow-ups; no § 11/cases without a current BFU/notification cases selected, but 2 VISO cases actually lack a current BFU. Excludes cases already appealed/considered by AST including § 65,multiple cases from the same family, physical disabilities only and completed interventions. 0-17 years, the responsible municipality during the last year, a decision as recent as possible in the last year except for 3 older placements.

Time, return and intervention

Item	Figures	Denominator/scope	Original location
Child welfare assessment deadline overruns	6 / 8 / 10 months	3; 4 months	PDF59
Placement decision→updated BFU	June 2016 → February 2017	Elder BFUApril 2013; about 8 months after the decision	PDF60
Children's interview by decision	4 months	8 years; actual location at present over 4 months after interview	PDF58
VISO placement decision → actual placement	8 months	1 case; possible same case § 48, non-additivepersons	PDF70
Child welfare assessment→placement decision →actual placement	Dec 2016 → Apr 2017 → Jun 2017	6 months to actual placement; sttask contact / family outreach.	PDF68 / PDF70
Frame after placing	1 week	1 § 65 case; subsequent aid unsubstantiated	PDF62
Actual return	Summer 2017	1 section 65 case;in care for a number of years;professional basis unspecified	PDF63
Aid after return	6	hours § 11 perweek; original family + psychological commitment	PDF63
Relaxation case no record	February → August 2017	BFU 2012 unupdated; Entrepreneurship unclear	PDF62
Suicide burden young without new support	Sep 2016 → Sep 2017	psychologydiscontinuation p. 16; contact type 17 / Decision week 17 / not initiated 18 Sep 17	PDF64-65
FFT Offer → BFU → location assessment	Jan 2016 → Aug 2016 → May 2017	Police / school notifications; not launched pgamanglende attendance	PDF64
VISO first follow-up	4 months	1 of 3 follow-up cases; 3 months	PDF71
Dialog notification wait	multiple weeks	interview; 24-hour assessment postponed until meeting/minutes	PDF31-32
Local reception deadline	4 weeks	interview: non-compliance; non-compliance	PDF29
Short meeting of young children	14 days	Interview example; not a replacement for statutory follow-up	PDF45
Planned end of effort	1-1 ½ month	Interview example of a process; not an account of actual returns home	PDF45

The safeguard errors have been checked against primary material, including missing assessment, plan, child interview and statutory follow-up. No aggregate union of legal errors is published;10/20 special points for attention are a different assessment category. The 4 cases opened under § 65 have no final decisions in the original. The return home in summer 2017 is actual reunification after years in care, but the original finds a lack of documented professional reasons and uncertain support needs afterwards. It must neither be called error-free redress nor automatically attributed to a particular counted placement error. A young person disappearing after 1 week is absconding, not reunification. Source discrepancies: PDF72 prints 32 interviewees, but 6 group counts total 31. Methodology PDF73 requests 17 under § 52+3 under § 11, actual 16+4; standard text PDF74/76 continues with 17 and PDF78 with 3 under § 11 and 3 of 5 placements versus an actual 8. The VISO selection criterion of a current child welfare assessment excludes missing-assessment cases according to PDF79, but 2/7 do not in fact have a current child welfare assessment. PDF33 calls 5/15 current, while the detail at PDF59 has a further 1 old assessment still current; each population is retained. The interviews document known postponement of 24-hour assessments until a dialogue meeting several weeks later and subsequent minutes. This is specific organisational knowledge of the departure from the law. Plans lack objectives and expected duration, weakening review of cessation; the original reports no national population of delayed returns home.

SV19 - Svendborg status report September 2019

Original: Svendborg status report September 2019. SHA-256 89cf7766191ddca603a20e4fc322c58efbae3a10dd9483f241bdeb0842b92636. 52 PDF pages; read 1-52,the entire original. 20 pending cases; measurement period 29.4.2018-29.4.2019. 14 current § 52,3 § 11 and 3 follow-ups on older placements. 5/14 current cases opened during the period; decisions November 2018-March 2019. VISO10/20=7 current+3 follow-ups. Methodology PDF22 expressly refers to the same methodology in baseline 6.2.2018 annex 2,which excludes cases already appealed/considered by the Appeals Board including § 65,multiple cases from the same family, physical disability only and completed interventions; 0-17 years and the responsible municipality during the most recent year. Older follow-up cases are assessed only as to plans/follow-up.

All original Table 1: Errors, Filing and Own denominators

15 original rows, of which one positive. Guarantee errors overlap; no overall error union or total unique person population is published.

The status documents continuing safeguard errors after the development process. Missing child welfare assessments/assessments requiring updating, six missed deadlines, six errors concerning child interviews and continuing late planning weaken the documented grounds for current interventions. Two new § 65 cases are opened; the original documents their opening, not outcomes or actual redress. The two cases with insufficient parental involvement are also among the four with insufficient child involvement. Child involvement has a denominator of 14 in the main table but 12 relevant cases in the detailed examination. The VISO summary's no actual analysis cannot be silently harmonised with the detailed 1/7 analysis at PDF36. The municipality states that new child welfare assessments now meet the deadline of four months and that more interventions end or cases close. This is self-reporting without a counted series of returns home/reunifications identifying unique children or documented reduction in duration. The status gives no new actual return-home dates. The municipality's earlier dialogue-based concern-report model was abandoned because it did not meet statutory requirements. The baseline documents postponed 24-hour assessment; the status documents organisational change. The originals do not document retrospective redress for the individual children's earlier losses.

The portal warning of incomplete search after 18.12.2025 is maintained; no zero result is used as unpublished proof.

Specific residual amount

Glostrup: the original 2016 analysis with its methodology/sampling tables has not been obtained through the specific routes tested. Later 2019 before/after cells are sourced as a later account. Specific document request to Glostrup Kommune's Børne-/Familieafdeling and the central Task Force at Ankestyrelsen/Social- og Boligstyrelsen: original 2016 analysis report, annexes/methodology, final version and case-record/meeting reference. The request has been prepared, not sent. All four municipalities: anonymous case examples and samples cannot be deduplicated by person across baseline, status, VISO and section 65. A national or municipal population of unique people affected by errors requires a documented linkage key and legal authority for linking individuals; the reports provide no such key. Odder: baseline 4 section 65 cases were later administratively closed as sufficiently supported;5 section 65 cases from the final measurement have no final outcomes in the status report. Faaborg-Midtfyn:2 baseline+3 final section 65 openings; Svendborg:4 baseline+2 final section 65 openings. These counts must not be summed as unique individuals or completed return-home/compensation cases. Specific final decisions, reopenings, timelines and actual reparation are missing. Actual return home is found as bounded case examples in Faaborg-Midtfyn and the Svendborg baseline. The originals do not document the number of children with delayed reunification or a complete duration series. Continuing support/withdrawn consent/absconding/case closure are separate events; they do not constitute documented return home. Before/after comprises seven independent 20-case measurements=140 case observations, our own addition; VISO consists of subsamples, and status may include old follow-up cases.140 therefore represents neither unique children, families nor people affected by errors. Eight originals read comprise seven central measurement reports and one municipal consultation response,361 PDF pages. Identical publication aliases are not counted again.

Task Force: Fredericia, Vejen, Tårnby and Herning

Four existing child Task Force processes:Fredericia 2021-23,Vejen 2022-24,Tårnby 2023-25 and Herning 2024-26.15 originals, 256 PDF pages have been fully checked substantively in RAM; 2026 follow-up/final review separately. The baseline originals Fredericia 2021 and Tårnby 2023 are specific outstanding access gaps, not declared unpublished. Only own compact facts/metadata have been saved.

Only the specified originals and pages are materially controlled. Figures are cases or actions assessed; categories overlap. Local self-measurement, external control and organisational self-evaluation have different denominators. No total unique fault person population or actual reunification series can be derived without documented person coupling.

FR23 - Fredericia Final Report October 2023

Original: Fredericia final report October 2023. SHA-256 c1aad7958b305a401fdf7c0ab1bf21b83378a08543567c856fc025abe0630c25. 47 PDF pages; read 1-47, the entire original. Newer process model:an initial analysis of 20 cases is referred to; the development process contains 3 reviews with a total of 9 cases in September 2022/February 2023/June 2023. There is no new legal final measurement of 20 cases or complete error-cell table in this final report. Development period February 2022-June 2023, the municipality’s own August 2023 measurements. Selection/exclusion of cases already appealed must be checked in the still missing baseline original, not assumed from previous TF standards.

Control populations and own municipal error / temptation bills

Names 163 is a stock of ongoing investigations. Name 15 is the municipality's own actuality sample. None of them should be summed up with Task Force 9 reviewed cases or converted into unique national defaults population.

The original documents persistent legal deficiencies after the development process. The Task Force has not seen the procedures put into practice in the 9 cases examined and finds lawfulness approximately unchanged throughout the process. The municipality's own statistics of 29.8.2023 give 71 breaches of the time limit among 163 BFUs; 68 without a stated valid reason. The municipality has specific knowledge of these circumstances and of 7 assessments that are not current in its own 15-case sample. The original's 58% still within the time limit conceals a local counting discrepancy:163−71=92,56,44%; only when 3 exceptions stated by the municipality are included does the result become 95/163=58,28%. Both original counts and the percentage are retained; none of the authority's statements of a valid reason is treated as independently verified legal authority. The municipality describes deliberate reluctance to remedy the requirement for an action plan before the decision because of expected new legislation. The Task Force criticises this on PDF 20; the contemporaneous, specific omission can be documented without a hypothetical defence against responsibility. A future change in the law documents no remedy for decisions already made. Missing/late plans and imprecise objectives weaken oversight of when interventions should cease. The original specifically describes this risk but gives no counted or dated actual return home/reunification, compensation or completed individual reopening. The closure procedure and expected targets for 2024 are not actual redress.

FR22P - Fredericia presentation 26.1.2022

Original: Fredericia presentation 26.1.2022. SHA-256 b9d298c82b58e5c52e082c526bea54528of525138fd78ad3ca8d96a9f3b6f619. 2 PDFs pages; read 1-2, the entire original. Communal submission, not the analysis report of the original 20 cases.

Children / Youth Consultants	19	organisation of the application;	PDF 4
Head / Team Managers	1/3	Head and Team Managers	PDF 4
Backland / front	3/1	teams;	PDF 4
Prevention range	30	offers, not children	PDF 10
§ 52offers / group offers	9/4	4 is subset of 9	PDF 10
§ 11 offers / group offers	8/3	3 is subset of 8	PDF 10
Additional group offers	5	health etc.; not sum of persons	PDF 10
Unofficial limit of authorisation	5000	DKK; not written competence plan	PDF 15 / 31
Joint technical conference	1	at the time of the investigation;	PDF 17
Delayed BFUs launch	almost 4 months	concrete example from notification to start note	PDF 24
Placement before action plan	9	months in specific cases; actual return not indicated	PDF 33
Unchanged course without impact assessment	4	years in concrete case; child does not want continuation	PDF 35
Budget rule for § 11	5	interviews at most; the Task Force finds the fettering of discretion unlawful	PDF 32
Priority recruitment	4	start 2023 against waiting list, unmeasured power	PDF 32
Follow-up minimum first / later	3/6	months, rule indication not observed duration	PDF 34
Minimum supervision / child interview placement	2	annual; available examples of untreated child's criticism	PDF 34 / 36

The road has documented the lack of timely BFU in 8 of 9 and the lack of statutory section 48 interview in 8 of 9. The two populations are the same nine cases, but identity coupling between errors has not been published. The absence of a plan of action prior to deployment is specifically fixed to nine months after the intervention; this is not an indication of actual reunification. The Authority's statement on well-placed children is contradicted by the original description of the case: the child asked for a conversation and said that it was not well with the foster family; no documented follow-up and foster parents participated. TF documents the lack of PDF 36. Identity, termination and possible replacement are not shown. Non-response is concrete: a child continued the same course for four years without a documented assessment of progression, despite the child's reluctance. The management's knowledge of capacity-determined incorrect support and a maximum of five conversations is documented in PDF 30-32. The five-conversation rule is explicitly criticised as an estimate under the rule.

VE24 - Road closing status November 2024, kolofon December 2024

General management / professional management	some degree	no%	PDF 8
Quality of proceedings	lower degree	no%	PDF 15
Choice of intervention/follow-up reviewed during development	cannot be assessed / cannot be assessed	the work had not been completed;	PDF 22-23

Time and implementation

Item	Figures	Denominator/scope	Original location
Strategy for the Family Department	Spring 2024	municipal information,	PDF 9
Input catalogue expected implemented	end October 2024	expectations, not documented all cases	PDF 10
Team meetings extended from:	1.11.2024	an extra hour per week,	PDF 12
Competence plan	June 2024	municipal plan	PDF 21
Visiting meetings established	1.10.2024	municipal information,	PDF 21
New law	1.1.2024	rule / procedure break in the year series	PDF 6
Home / colophon	November 2024 / December 2024	same original; keep the date deviation	PDF 1 / 26

The progress report demonstrates that described workflows are not yet reflected in the cases reviewed and that systematic management oversight is not in the target (PDF 11-13). Professional assessments and justifications are still missing and BFU deadlines are still being exceeded (PDF 16 / 20), without any reported misunion. The municipality's statement on waiting list zero cannot be used as proof of proper support: TF has not reviewed § 30 offers in development and has not been able to assess the development of the choice of effort or follow-up (PDF 22-23). Nor has TF verified actual return, reunification or termination after error. These specific control holes have been preserved locally.

VE24M - Road Mid-Term Status January 2024, presented 20.2.2024

Original: Vejen mid-term status January 2024,submitted 20.2.2024. SHA-256 745cb82fbed4b7db388a0cee3a1793cdaaed077458918e346edcff6be76ac728. 3 PDF pages; read 1-3,the entire original. Political status, the first development case review discussed; no new counted population of persons affected by errors.

Status and scale

Item	Figures	Denominator/scope	Original location
Development plans	4	first plan lawfulness/Children's Act active	PDF 2
Development impetus / priority	high / high	Organisational scale	PDF 1-2
Work reflected in operation	low	no percentage scale	PDF 2
Management supervision applied	high	Organisational scale	PDF 3
Management acts on results	someone	Organisational scale	PDF 3
Employee involvement/quality descriptions	high / some	Organisational scale	PDF 3
Plan reviewed with employees	1	time per month; procedure	PDF 3

Policy presentation documents the management's and the committee's knowledge of low daily turnover. It only refers to some action on monitoring results and continued problems with concrete child involvement.

VE23L - The road overall management supervision summer 2023

Original: Vejen overall management supervision summer 2023. SHA-256 8ed472c2582da89cb04f68480bd0d5aac43ebaca54fafe5f5e4d05ff605142ee. 12 PDF pages; read 1-12, the entire text; all graphs PDF 6-11 visually checked in RAM. The municipality’s own review of 10 cases, 3 front-line and 7 back-office cases; not the external TF 12/9. Criteria-based selection: most recently initiated intervention for assessment/choice; at least two action plans for follow-up. The municipality’s statement of random selection does not document representativeness.

All original graph cells

Yes / no / not applicable are case categories; comment is overlapping selection and may not be added. Percentages are the rounding of the originals; the third BFUs limit category is 17%, so the original percentages add up to 101%. Siblings and SOS have source deviations below.

Samples and source discrepancies

Item	Figures	Denominator/scope	Original location
Cases before / hinterland	10/3/7	10 total; 3 + 7 subpopulations	PDF 4
Follow-up take-off minimum	2	action plans, excludes cases without at least 2 plans	PDF 3
Siblings studied - Bread text	3	10	PDF 10
Siblings studied - graph	2	10	PDF 10
Siblings not studied - graph	1	10	PDF 10
SOS sum yes / no / not applicable	11	1 + 9 + 1 despite 10 cases; same conflict in text / graph	PDF 11
BFU deadline summary	1	6	PDF 5 indicates only 1 deadline; detailed PDF 8 adds 1 not applicable
Sibling Summary	2/3	PDF 5; not for graph 2 / 10 or text 3 / 10	
The Orient informs summary	1/14%	PDF 4; 14% applies to relevant 7, graph 10% of 10	
Missing written§50 decision	1	comment, not new unique case number	PDF 11
Post-school authorisation registered under wrong §	1	comment, overlap unknown	PDF 11
Youth study not party-consulted	1	comment, overlap unknown	PDF 11

The municipal conclusion on PDF 12 states overall compliance with statutory requirements. At the same time, the checked original graph cells document 4 BFU time-limit breaches among 6,3 missing current BFUs among 10,5 missing child interviews concerning notifications among 10 and 6 failures to inform among 10. The conclusion therefore cannot be used as an absence of breaches of law in the sample. The graph for sibling assessments says 2 yes/1 no/7 not relevant, the main text says 3 yes/7 not relevant, and the summary says 2/3. SOS says 1 yes/9 no/1 not relevant among 10. All figures are retained; there is no harmonisation. The legal start of the BFU time limit is incorrectly given as the decision date in summary PDF 5, whereas the review question itself on PDF 8 uses the municipality's first awareness of a need for support.

VE23T - The road to thematic management supervision summer 2023

Original: Vejen themed management supervision summer 2023. SHA-256 f84ad391deb3d8b672c8a6ccb3537486aca9bc9764e9944a402d9d5d88001895. 12 PDF pages; read 1-12, the entire text; all graphs PDF 5-12 visually checked in RAM. Municipal quality review of 3 cases selected according to trends from overall supervision. Two before and one after new workflows. Shared identities with the overall sample of 10 are not documented.

All original quality graph cells

Each of 23 questions has the same 3 case denominators; each observation is not a new person. Comment is a separate overlap category, here 0. Original 33 / 67 rounding is retained.

Samples and time consequences

Item	Figures	Denominator/scope	Original location
Case	3	two old workflows / a new one	PDF 3
Before / after new workflow	2/1	3	PDF 3
24-hour deadline met	3	3	PDF 3; quality distributed 1 / 1 / 1 on PDF 5
Internal 4-week treatment deadline met	1	3	PDF 4 / 11; not the 4 months BFU deadline of the Act
Child unborn	1	3	explanation of non-relevant conversation; PDF 6
Too narrow for final conclusions	3	the express demarcation of the municipality;	PDF 12

The municipality documents a low level of information of the child on rights in 2 of 3 cases, inadequate private / professional network retrieval in 2 of 3 and low timeliness in 2 of 3. A general assessment of positive change after new workflow is based on only 1 case and cannot eliminate the actual errors or become a general effect.

TA24M - Tårnby mid-road status, submitted 13.11.2024

Original: Tårnby mid-road status, submitted 13.11.2024. SHA-256 7337f6a24768739ed9a338d4ed66c615d404350047569ae431a1039ae0c343b8. 4 PDFs pages; read 1-4, the entire original. Political status on development; first three development cases are mentioned, not an independent new population.

All delimited numbers and status levels

Item	Figures	Denominator/scope	Original location
Cases at status meeting 2	3	Part of later 9 development cases	PDF 2
Case Review Interval	6	weeks, municipal practice	PDF 3
Thematic supervision carried out	1	no information given on the case	PDF 3
Exhaust / priority / operation	someone / high / someone	organisational degrees;	PDF 1-2
Management’s handling of challenges	someone	degree of organisation;	PDF 3
Management supervision / use of results	low / low	no systematic continuous practice;	PDF 3
Employee involvement/quality procedures	someone / low	organisational degrees;	PDF 4

The management and the Political Affairs Committee are specifically informed about the low use of management supervision and low action on the results. The guidelines are not implemented in the proceedings. Organisational momentum cannot therefore be equated with the correction of individual cases.

TA25 - Tårnby Final Report April 2025 submitted 10.9.2025

Original: Tårnby Final Report April 2025, submitted 10.9.2025. SHA-256 11efc70db6c629ed3c009fdebb74e21a2c9d769b04d727d4bde9d79654799ed3. 23 PDFs pages; read 1-23, the entire original. Development December 2023-February 2025. Nine cases April / September 2024 and January 2025, focus preliminary proceedings. The report reproduces baseline if original is not yet retrieved; no exclusion rule or representative error child count.

Control population and omitted control stage

Item	Figures	Denominator/scope	Original location
Status meetings / statuses	6/6	the municipality's statement and status are other sources of knowledge;	PDF 4-5
Cases examined	3/9	April 2024, September 2024, January 2025; 3 cases at meeting 2 / 4 / 6	PDF 4 / 22
Self-evaluated areas	5	organisational, not individuals;	PDF 5

Time limits and implementation

Item	Figures	Denominator/scope	Original location
Parental contact after notification	2	days, municipal objectives, not all cases met	PDF 17
Party consultation after notification	4	weeks, municipal objectives, not all cases met	PDF 17
Case Review Interval	6	weeks	PDF 11
Annual reel themes	4	monthly trade days and quarterly re-evaluation;	PDF 9
Working Group Violence / Violence Range	6	months	PDF 12
Other municipalities in Onward without violence	2	project population, not error persons;	PDF 12
The child's law course duration	2	days, number of advisers not disclosed	PDF 14
Upgrading	1	Adviser from 1.1.2025	PDF 17
Team manager staff / professional management from	1.2.2025	organisational change;	PDF 9
Management information expected to be implemented	end 2025	future objectives;	PDF 11
FIT planned from	summer 2025	unmeasured citizen repair;	PDF 19
The child's plan / youth plan planned theme	2026	future activity	PDF 19

The report’s assessment of improved involvement mainly concerns the beginning of the case, not the entire process. TF finds continuing insufficient professional reasons and problems with late child interviews, rights information and the choice of § 30 support. Several cases close after preventive intervention and reopen a few months after a new concern report (PDF 19-20); this is specific inadequacy of support, not proof of return home. The final report documents that workflows and ICS are not sufficiently reflected as implemented in the cases (PDF 10/18). There is no documented final examination of child welfare assessment, choice of intervention and follow-up as complete processes, no new aggregate union of errors and no actual reunification, compensation or accountability series.

TA26 - Tårnby follow-up note May 2026 submitted 10.9.2026

Original: Tower follow-up note May 2026 submitted 10.9.2026. SHA-256 5a4cd382bbe215f7431d0f772883b7fe44ddf9651b6483d6a9696ee17234d1c8. 9 PDFs pages; read 1-9, the entire original. 2026 separately. Three municipal cases selected after agreed focus: 24-hour assessment, screening, hedging. No representative municipal error rate.

New external controls and knowledge levels

Upgrading	4	advisors, municipal information	PDF 3
Management oversight interval	3	months, quarterly new cadence	PDF 5
Same theme on trade days	3	previously 1; not persons	PDF 5
Choosing action / follow-up planned	May-June 2026	not working on at the follow-up meeting	PDF 3

The municipality has specific knowledge from Rigsrevisionen’s placement sample for 2022-24 and its own management supervision of deficiencies and inconsistent practice (PDF 3). Nevertheless, the follow-up memorandum states that recommendations from 2023 on choice of intervention and follow-up have not yet been addressed. This is a documented time/knowledge link, not a presumption that interventions actually ended. TF still finds insufficient reasons for 24-hour assessments, late child involvement, retrospective screening and insufficient rights information. Both completed preliminary assessments are insufficient, and one case has been reported to the Children’s Office. No actual § 65 decision, change in support, return home, compensation or disciplinary responsibility is stated.

HE24 - Herning analytical report September 2024 submitted 23.10.2024

Original: Herning analytical report September 2024 submitted 23.10.2024. SHA-256 7d8a25dc3c5a24e7805808fdfa82fa2d209778a0191364944998b946709ebeed. 40 PDFs pages; read 1-40, the entire original; page PDF 8 separately visually controlled in memory. 12 current cases; qualitative, not representative. PDF 6 describes both service law and child law; method PDF 39 describes service law. No precise decision dates or already pending exclusions indicated. Initial decisions may be taken before 2024.

Sample, methodology and case counts actually established

Assessment of a safeguarding notification	24	hours; all cases assessed; number of notifications unknown	PDF 24
Yellow / green contact dimensions	14/14	days; followed by red	PDF 23
BFU deadline	4	months; incorrect start date causes an overrun	PDF 26
Personal supervision	2	times / year, reported minimum requirements	PDF 31
LATE PROGRESS	3	months, municipal description	PDF 32

The Task Force's documented criticism includes unprocessed expressions of concern, failures in abuse procedures, insufficient child/parent involvement, an incorrect start for the child welfare assessment deadline, outdated assessments and missing placement supervision/follow-up assessments. PDF 24-25 describes, among other things, sexual abuse with anxiety attacks without processing of a concern report, and digital abuse that the school reports only after the family contacts it. No aggregate union of errors can be formed from the examples. Management states that legality and quality supervision has been paused to await the Children's Act/Task Force, while financial controller checks continue (PDF 13). The source documents the basis for case processing and waiting time, but not actual return home, compensation or personal responsibility. TF's assessment of reconsideration arrangements (PDF 25) is retained as TF's specific assessment, not an independent legal conclusion derived from authority status.

HE25M - Herning midway status June 2025, presented 13.8.2025

Original: Herning midway status June 2025, submitted 13.8.2025. SHA-256 a6b3aac8e8adea11b08c106a3aab13821a13aaf392193d262d50634a167a55fa. 4 PDFs pages; read 1-4, the entire original. Organisational degrees and preliminary development control; no new case / person denominator.

All concrete counters, time and status levels

Item	Figures	Denominator/scope	Original location
Start of course	March 2024	municipal submission 29.5.2024 refers to April; phase / version difference	PDF 1
Development period	November 2024-June 2025	not full 2024 / 25 years	PDF 1
Thematic management oversight	2	reviews; case denominator unknown	PDF 3
Senior management oversight	4	reviews; case denominator unknown	PDF 3
Propulsion	high	Organisational	PDF 2
Relevant priorities	high	Organisational	PDF 2
Advice involvement	high	Organisational	PDF 2
Workflow support	someone	values / quality not yet incorporated	PDF 3
Management supervision	high	Organisational	PDF 3
Management action on results	high	Organisational	PDF 3
Challenge Management	not relevant to assess	no numeric zero	PDF 4
All recommendations are to be implemented	2025	municipal ambition; not result	PDF 2

TF does not yet see any significant change at case level (PDF 1). The management itself has seen the same cause problems and brought them into the development plan (PDF 4): concrete level of knowledge. Overall management supervision is being adapted to the requirements of the National Audit Office (PDF 2-3); no individual repair is provided.

HE26 - Herning Final Report May 2026, submitted 11.8.2026

Original: Herning Final Report May 2026, submitted 11.8.2026. SHA-256 b472d4413937db3e704f4515ab3bee5ea17912970725d19ed9ab6c25dceb1b13. 25 PDFs pages; read 1-25, the entire original; page PDF 8 separately visually controlled in memory. 2026 closure separately. Development November 2024-March 2026; nine development cases: 3 in April 2025,3 in September 2025,3 in February 2026. Not 9 new 2026 people. Dedup with baseline 12 not stated.

Control, self-reporting and time limits

Item	Figures	Denominator/scope	Original location
Status meetings	6	organisational; 2. / 4. / 6.	PDF 4 / 24
Written development status	7	population other than 6 meetings;	PDF 5
Cases examined	3	April 2025 / September 2025 / February 2026	PDF 4
Case	9	3 at each meeting; not unique person-dedup	PDF 4 / 24
Development cases 2025	6	own sum 3 + 3; not 2026 cases	PDF 4 / 24
Development cases 2026	3	February 2026; non-full year	PDF 4 / 24
Self-evaluation themes	5	start / end, not individuals	PDF 5
Self-assessments / ICS measurements	2/2	start / end; respondent unknown	PDF 5
Competent ICS respondents	81	%; n unknown	PDF 11
Inadequate clothing	up to half	the same section; question / denominator relationship not clarified	PDF 11
Further follow-up offered	6-8	months; not yet an actual result	PDF 6
The course referred to as	approximately 1 year	calendar November 2024-March 2026 shall be maintained;	PDF 3 / 6
Children's House Mid-Term Meetings	2	times / year	PDF 13
Emergency review	1	time / year, planned	PDF 13
Long wait municipal border	2	months; schedule waiting time	PDF 19
§ 30 examples observed	0	no actual testing of the correct use;	PDF 20
Emergency equipment actually used	cannot be assessed;	No examples of rape / assault cases	PDF 14
Methodology / practice courses	1/1	adoption without consent / systematic; participant n unknown	PDF 24
Workshops	1/1/2	Quality / workflows / level supervision; own sum 4	PDF 24

The final review documents continuing unprocessed notifications and, in several cases, actual development of problems before notification (PDF 18). TF finds a lack of direct contact with children contrary to § 5, subsection3, and stresses the requirements for exceptions under subsection4 (PDF 16). PDF 20 describes long periods before support and interventions initiated without a documented decision. PDF 21-22 finds a continuing insufficient basis for follow-up, including missing provider status reports and assessment of duration/scope. Organisational improvements and municipal self-evaluation are separate evidence populations. The 81% competent ICS respondents and up to half insufficiently equipped cannot silently be combined or harmonised; the questions/respondents are not published here. Missing § 30 examples and missing preparedness examples mean that actual correction of these elements has not been checked. No individual return home/reunification, cessation of support, compensation or accountability response is stated.

Checked access and version control

Municipality / source	Test and result
Fredericia Baseline Original Track	The current FirstAgendaAPI26.1.2022 presentation has been read, but has no public annex list. WaybackCDXdomainfredericia.dk/,regexTask/analyserapport/forunders yielded the municipal page, archived 2.12.2022. The page has actually been read in RAM and describes the Task Force baseline in autumn 2021 with annex name 2022; link https://www.fredericia.dk/os2web/service/gf/v1/fc7cfda4-f598-ec11-a3ae-00505688ca1d is currently 404; exact CDX status 200/collapsedigest yielded 0 entries. Archive page https://web.archive.org/web/2022120206 3224id_/https://www.fredericia.dk/borger/familie-boern-unge/raadgivning-hjaelp-stoette/analyserapport-om-myndighedsarbejdet-paa-boern . Publication of the report at that time is documented;404 and CDX0 do not prove the absence of another public copy.
Tårnby baseline 2023	FirstAgenda 2023 searched using Task Force/Taskforce/analyse/Familierådgivning/kvalitet; all returned item and annex metadata checked. Analyse 54,Familierådgivning 16,kvalitet 62 results; the API may return more than limit 50 with MoreToBeSearched=false. The submission of 5.10.2023 has implementation plan ab 7 e 19 c 5-34 e 3-4 dcd-b 16 b-acf 7 c 6 a 3 ab 38,no central report. An exact web search for Tårnby Task Force analyserapport/oktober 2023 produced no report link. CDX status 200/prefix/filter original.*(ask|analyse|nalyser)*./collapse digest:taarnby.dk 428 candidates, no Task.?force/analyserapport match; dagsordener.taarnby.dk 0. This does not rule out other public copies.
Herning Central originals	The FirstAgenda agenda/annex API yielded analysis a 0 fd 4 b 71-49 d 6-4 c 63-97 ad-659 d 3057 c 6 f 6, midpoint 3 d 6 e 2 e 40-9 d 00-44 c 7-b 0 ad-e 139617635 cf and final 9109 b 2 cf-2 c 5 f-4 ed 4-ae 1 f-f 772 f 18 be 2 c 8. Lowercase /vis/pdf/bilag/{id}/?redirectDirectlyToPdf=true with a RAM cookiejar yielded all three complete originals, 69 pages. No original saved.

Specific residual amount

Fredericia: Original baseline 2021 / 2022 with 20 cases' legal outcome table, 10VISOtake and exclusions are specifically identified via the municipal archive page, but the annex is not retrieved from the tested tracks. Document request to the municipality /Ankestyrelsen/ SBST: original PDF baggf-IDfc 7 cfda 4-f 598-ec 11-a 3 ae-00505688 ca 1 d, including method attachments and any new publication URL. End 2023 and follow-up Annex 2024 are fully read. No external request sent.

Tårnby: the original analysis report September 2023 with full method and original numbers missing after the exact tracks above. Against Tårnby Municipality, Social- og Boligstyrelsen and Ankestyrelsen on the report, the version received by the municipality and the specific published annex. Portal zero is no evidence of unpublication.

Vejen: documented person linkage between TF baseline 12, development sample 9 and the municipal samples 10/3; actual outcomes of the two concern reports to the Children’s Office.

Tårnby:outcome of the children’s office notification in 2026. Herning:ICS questions, respondent denominators and the relationship between 81% competent and up to half insufficiently equipped; person linkage between baseline 12 and development sample 9.

All four stages: individual decisions to resume, change of aid, return / reunification or cessation of action with date / duration, as well as actual compensation and liability. These legal consequences are not disclosed in the original texts read. They must be demanded as separate outcomes, not replaced by organisational improvements.

Egedal Child Disability: Full Original Control of Analysis Report April 2020

Original **ELEMAL20**: Egedal Analysis Report April 2020. SHA-256 c875b4ff8b2e47d9071d49302ea1b06efab142f2b5a5e29f17eae6ecdccc61f5.

All PDFs pages 1-119, full text control; PDF 6 / 7 / 50 / 76 also visually RAM-controlled. Former sub-control 49-81 is now completed and aligned, the same original and the same cohort.

Analysis September 2019-April 2020; legal measurement as a starting point 16.8.2017-16.8.2019; VISO November 2019; interviews 2019 / 2020.

Municipal selected cases, extracts, steps, document rules and organisational cadences; no national or municipal representative error rate.

Legal 20, child part take-off 8 and VISO 5 are recycled subsets. Submission rounds 20 / 15 / 5 / 1 are not 41 unique cases. No extra cohorts in 43 central courses.

Legal outcomes and overlapping deficiencies

The outcome of the trial is hypothetical, not actual, complaints or return. Deficiencies and time can overlap. The original's 14 cases with legal shortcomings and the 20 wrong time limits for complaints are separate measurements. Own voting: at least one complaint-free error has been detected in each of the 20 cases examined; 20 + 14 must therefore never be used as 34 different cases. No person count is available.

General management information for employees	1	time / year	PDF 45

Document rules, amounts and time limits - statements criticised, not actual citizens' outcomes

The amounts, ages and thresholds in this section are the verification of municipal documents' rule description 2019 / 20. They are not citizens, they are actually substitutes or present-day rates.

Item	Figures	Denominator/scope	PDF Page
Temporal standard calculation	1/8	minimum of standard amounts; AS criticism	PDF 101
Model distribution for two children	1 / 3 + 2 / 3 or ½ + ½	municipal text; AS requires calculation for each child	PDF 102
Local transport limit	2	km; AS rejects as a fixed rule of refusal less than 2 km	PDF 103
Local low rate of transport	2,05	kr / km; obsolete	PDF 103
Local car tariffs for disabled people	2,65	DKK / km; specific calculation required	PDF 103
Municipal tariff difference	0,60	kr / km	PDF 103
AS indicated 2019 transport tariff	1,98	DKK / km = 1,73 variable + 0,25 value loss	PDF 103
Hospital transport distance	50	km; historical rule reference	PDF 103
Local equalisation limit	24.000	km / year; insufficient individual assessment	PDF 104
Municipal countervailing charge	1.203	kr / year; explanation not validated by AS	PDF 104
Blood-sucking apparatus / own-account payment	60/40	per cent; distinction between assistive devices and treatment	PDF 104
Municipal diabetes startup	14	days TA; specific needs to be assessed	PDF 104
Local diabetes course limit	1	course by new diagnosis; AS requires concrete assessment	PDF 104
Municipal introduction to an insulin pump	3	days; AS requires concrete assessment	PDF 104
AS indicated medical fee	4.110	kr; historical control reference; not 2026 tariff	PDF 105

Item	Figures	Denominator/scope	PDF Page
Municipality 2019 minimum limit	4.900	kr / year; AS records correct 4.945	PDF 106
AS indicated 2019 minimum limit	4.945	DKK / year	PDF 106
Rounding	100	kr; not that the minimum limit is divided by 100	PDF 102 / 106
Observed website limit	4.368	DKK / year, 2012 level	PDF 108
Municipal limit on frequency of checks	more than 6	times / year; AS requires concrete assessment of significant absences	PDF 108
Stated absence of case-law references	2-3	working days / year usually not significant; not fixed count	PDF 108 / 110
Local authority allocation start	1 following month	AS specifies the date of application	PDF 109
Load Degree Example	1 versus 2	fixed degree condition; illegal discretion under rule	PDF 109-110
Local hospital limit	more than 3-4	checks / year; AS requires specific care needs;	PDF 110
First follow-up	3	months, historical rule	PDF 106
Specified follow-up at a maximum later date	6	months, historical rule	PDF 106
Specified placement interview	2	times / year, history rule	PDF 106
The historical minimum limit of the law review	4.596	DKK / year, 2015- level; neither 2019- nor 2026-rate	PDF 86

Consistency / timeliness of the case, recycled examples

Item	Figures	Denominator/scope	PDF Page
TA in case of lack of information: authorisation / application	10/37	hours / week; contact scale unknown	PDF 58-59
TA cessation before full need training	August 2019	parents want jobs October 2019; 37 hours / week	PDF 63 / 67
Same termination: municipal notice	3	months	PDF 63 / 67
Same termination: correct warning	14	weeks; hypothetical AS correction	PDF 63 / 67
Justification: care	7	hours, period not specified	PDF 65
The same case: Termination of TA	18	hours / week	PDF 65
The same case: termination of the procedure	10	hours / month	PDF 65
The same case: cessation of activity	2,5	hours / week	PDF 65

Transition from child to adult	to some extent	municipal self-evaluation; no error rate	PDF 37
Management information for management and development	to some extent	municipal self-evaluation; no error rate	PDF 43

Documented find

Documented legal findings: 14/20 union of deficiencies; 9/20 hypothetical remittals for reconsideration; 20/20 incorrect appeal time limits; 11/20 time-limit breaches. Deficiencies without a hypothetical overturning remain documented deficiencies. None of these is an actual appeal decision or return home.

VISO finds no documented child/parent involvement in concern reports, insufficiently investigated concerns dating back several years, termination of§52 support without an overall assessment, missing specifically recommended family treatment, deficient action plans and irregular adjustment of objectives(PDF96-100). Professional follow-up in all 5 cases is a different measure from timely statutory action-plan follow-up.

In fact, loss of benefits in kind: 1 out of 11 temptations affects the legal position because relief is not initiated and cannot be delivered retroactively (PDF 73- 74). The source does not indicate the length of each delay or actual compensation. The loss of support period must therefore be demanded separately.

The review of materials documents outdated/unlawfully fixed rules on transport, assessment of amounts, start dates and degree of burden (PDF 101-110). The review does not cover all municipal materials; the adult additional-expense section is expressly not examined (PDF 101/105). The number of citizens affected by each documentary rule is not stated.

Precise original inconsistencies

PDF 52 summary: 3 instances of appeal guidance for findings wholly in the party’s favour; PDF 25/73 detail: 4. Both original values are retained.

PDF 95 / 97: VISO 5 cases have BFU, several outside the measurement period; PDF 77: Legal § 52- sub-take 5 has 1 completely missing BFU. VISO has been selected from 20 with § 52 using method PDF 81, but identity / time has not been published; no required harmonisation.

PDF 79:the 2 § 11 cases in the legal review are assessed as relevant; PDF 98:VISO discusses concurrent § 11 intervention in § 52 courses with expected longer-term need. Different case/decision elements; no erroneous inference of 2 additional cases involving errors.

PDF 116 mentions analysis of the adult-disability sector, but the same page states a legal review of 20 child-disability cases and the entire main text/annexes concern children. The template conflict does not change the verified child population.

PDF 7 Figure 2: Organisation per. 1.4.2020 but source March 2019. The figure approximately 350 / 1 / 3 / 15 is the entire organisational data of the Centre, not the child disability population or the fault population.

PDF 17 self-evaluation 6 annual supervision; interview: no current. Plan / cadence is not actually completed activity.

Own analysis and strongest durable requirements

Our analysis: known errors are documented on an individual decision basis, while the main report's positive overall assessments rely on other methods, including interviews and five reused VISO cases. No positive organisational description documents reopening of the nine decisions that would be remitted following review or replaces the lost periods of support.

Own analysis: The sample excludes appealed/already considered decisions and two appeal-guidance errors that could allow a late appeal. At the same time,20 incorrect time-of-day deadlines are found in the retained sample. Exclusions are therefore necessary to describe the scope, but their errors/people cannot be counted without original individual examination.

Specific requirements for further documentation: Egedal Kommune /Ankestyrelsen/ The Danish Social Security Agency should be able to connect the 20 measurement cases to actual resumption, new decisions, payment or delivered relief with dates and loss time. The 15-month status measurement shall be identified and read if available; the April 2020 report is baseline and does not prove later implementation.

Specific residues and hypotheses

No unread pages in this 119-page original. Later status measurement after 15 months / end of development and actual individual repair is not included in the original.

Identity coupling between 20 / 8 / 5 and submission rounds, number of parents / families interviewed and citizens affected by standard rules have not been published here.

Suspicions, not new evidence: number of additional refusals / persons affected by the general document rules found and whether they were actually resumed. No national extrapolation.

Frederikssund: adult disability, the entire Task Force original 2022

All 133 physical PDFs pages are actually text read in memory; Table 1 (PDF62) is also visually controlled. This is the adult scheme. It does not close the separate children's original 2021 in the 43-course directory. No official original or original image is stored locally.

Legal sample 18; VISO5 subset. The original states both 5 of 18(main methodology) and 5 of 20(VISO annex). The refusal denominator of 12 in the appeal-guidance section conflicts with table 1’s 8 full+2 partial=10. Selection ceilings of 2 under§97/7 full grants differ from an actual 3/8. All versions retained; no artificial harmonisation.

Evidence chains and real consequences

Local case reference	Original	Specific action / omission	Meaning and necessary level of evidence
FSA-C01 · Moving / living offers	PDF66-67	Consciousness, jurisdiction and the circle of persons were not sufficiently tested; there was no municipal competence.	Actual date of removal and physical stay not published; FRH verification and, if applicable, invalidity shall be proved.
FSA-C02 · Accompanying refusal, cognitive level described as 6 years	PDF66 / 75	Need for guardianship/consent not investigated; a later financial-administration agreement does not alter the duty.	Level 6 years is the description of the report, not the actual age of the citizen; the repetition is the same.
FSA-C03 · § 85 refusal awaits rehabilitation	PDF69	Only the exporter received a decision; current assistance is assumed to be replaced by future recovery.	Request for a decision to the citizen / representative and assessment of assistance now.
FSA-C04 · BPA refusal	PDF69 / 88	Accompanying needs could, according to the Authority, be met elsewhere, but other aid not granted at the same time.	The grounds for refusal do not actually demonstrate compensated needs.
FSA-C05 · Physical function reduction / bed 2 floor	PDF70-74	§ 85 / § 97 refusal and insufficient objective information on specific function.	Can be the same citizen across examples; no extra person sum.
FSA-C06 · Cleaning aid without compensation	PDF88	§ 85 end February 2020; § 83 a first granted November 2020.	Documented multi-month uncompensated needs; not only slow administrative expedition.
FSA-C07 · Played young, comprehensive disability, transition 18 years	PDF115	Outside consent, family return wish, no formal transition plan; family participation not demonstrated.	The information triggers the verification of continued residence and family life; actual return and legality are not determined by this report alone.
FSA-C08 · Residence offers granted without start-up	PDF89	Suitable temporary accommodation offer not yet found; no start date.	Authorisation is not delivery; intermediate help and actual stay require subsequent documentation.

The local references are the report's own tracking keys, not municipal journal ID. They do not constitute 8 proven different persons. Identity between examples and between VISO / legal material is only used when the text itself connects them.

Independent legal assessment and requirements

A decision, physical delivery and redress are three different events. Assistance in the cleaning case ceased before replacement assistance was awarded; a later new award does not remove the documented intervening loss. The citizen's specific loss, actual assistance in the intervening period and arrears/damages tracks must be examined in contemporaneous decisions and delivery records.

Movements, valid consent, free choice and effective participation by parties are independent guarantees. Inability to participate makes adapted participation and legal representation more necessary. The transition to adult rules requires the demonstration of the new basis of residence and assistance; the previous intervention and an internal meeting are not in themselves sufficient legal basis.

The demands are therefore: lawful fresh examination, access to the original basis of decisions/consent/guardianship, immediate provision for current assistance needs and documentation of actual cessation or redress. Individual criminal/disciplinary responsibility requires identification of the links in decision-making and knowledge; the report must not be converted into an undocumented number of culpable employees.

Limits and residues

The fully read original ends this specific reading hole. It does not contain national persons, exact number of discards, subsequent return, actual relief, sanction or compensation. Planned 15-month status is not an actual follow-up. The original's final annex refers to child disability in an adult report; this metadata deviation is retained.

Sorø: children's analysis 2024 and final report 2026, full originals

Both originals are now actually text read: 42 + 27 pages. Interview Table 2024PDF40 is also visually controlled. 2026 is separate after 20 years.12 baseline cases are repeated in 2026; 9 status readings are 3 rounds of 3 cases, not a documented union of 9 new children.

Specific source and impact chains

Local track	Original	Action and consistency
SB24-01	TFSOROE24 PDF27	School asked to avoid the concern-report label; severe neglect; concerns registered without activating safeguards. No formal requirements for concern reports. Number affected across the municipality unknown.
SB24-02	TFSOROE24 PDF27	Childhouse start 3 months late; start-up form allegedly forgotten; delayed trauma treatment, simultaneous concrete acts and actual start date remainder.
SB24-03	TFSOROE24 PDF29 / 36	BFU2 years of decision; same case repeated; proof of time not counted twice.
SB24-04	TFSOROE24 PDF35	Family treatment for 7 months without follow-up; sexualised behaviour; known concern and no timely review of effects. May overlap the Børnehus case; no person total.
SB26-01	TFSOROE26 PDF14	Municipally acknowledged previous unlawful organisation; district advisers without authority-facing functions until spring 25; children required to remain in mainstream interventions. The denominator for individual errors/losses is not stated.

Independent judicial review

Changing the label on an expression of concern does not change its content or the statutory duty to act. The documented trail shows why the number of registered concern reports cannot measure all known risks: the municipality may receive knowledge without activating the registration and safeguard process counted by the statistics. At the same time, responsibility must be linked to specific receipt, decision and omission; an assumed union of people must not be constructed.

A written procedure and a completed development process prove neither timely actual assistance nor redress for earlier losses. The final report primarily examines initial processing; reassessment practice, the quality of plans and follow-up have not been independently measured afterwards. The known period of harm/risk therefore does not automatically end at the report's closure. The demand is for examination against the originals of the three referrals to the children's office, actual assistance and supervision, correction of every failure of safeguards, and specific losses and responsibility.

Checks carried out and precise residues

No unread page in these 42+27 pages. Final own-initiative outcomes of three children's office referrals, the municipal statement of 6.5.26 and current links to delivery/redress/persons have not been obtained.

2024 front page October and colophon November to be preserved. 2026 distinguishes the municipality's 6.5.26 self-statement from the Task Force's own 3 status 6 cases. The fact that the workflow entered into force February 26 has not measured compliance. Internal indicative deadlines cannot replace legal deadlines; source 2026PDF24 points to this difference.

Copenhagen 2020: full control of the status original

All 48 physical pages have been read as text. Tables 1 and 2 PDF20 have been visually reconciled in RAM. Baseline 20, status 19 and VISO10 are different or nested measurements. The municipality's own account is not independent evidence of redress.

Concrete source chains

Local track, not person ID	Locator	Consistency and proof
K20-C01	PDF21	Contact person refused at the child's request; just under 1 year later an award without a current child interview. No actual delivery date.
K20-C02	PDF25-26	PsykiatriNov 19 warns of serious risk; contact person found 29Jan 20, new notification on the same day of insufficient support. § 65 reference has not been proven.
K20-C03	PDF27	Fog exposure known 10 d prior to acute placement; previous concerns. No original physical location / return date.
K20-C04	PDF27 / 29	11 year old tells about violence; counselor fails conversation with reference to alleged withdrawal, which has not been recorded. Same case in Visos division.
K20-C05	PDF29	Teenager with pregnancy plans and referred to suicide attempts; child interview failed to be assessed by parents. Original health / conversation act not provided.

Independent review

The absence of a current child interview, an undated assessment and missing follow-up deprive the child of specific safeguards: the support decided upon is not examined in time against the child's current needs. Here, one case shows a known serious psychiatric risk while relevant support continues to be requested after the measurement period. This requires obtaining contemporaneous records and actual delivery; a report's referral to the Children's Office ends neither the risk period nor the accountability track.

Supervision percentages without a denominator cannot be converted into citizen counts. The same three errors concerning children's involvement must not be counted twice. Development recommendations and planned training do not change the time-bound statutory duty in each case. The demands are individual correction, a current needs assessment, actual support and documented remediation of loss; a union of individuals, invalidity and criminal responsibility require the specific records.

Control status and sources

No unread page in this 48-page original. The 2018 baseline original, individual records, § 65 closure, actual assistance/redress and sanction processes are not documented by this status report.

Knowledge and impact chains

Local track	Locator	Proof / residue
ODS23-01	PDF5 / 7 / 18 / 35-36	2017 / 2019 review knowledge → 2020KLK / plan → 2021TF → 2023 continues to be the top BFUs. Original revision / KLKkunde independently read; DUBUwithdrawal denominator not published in status.
ODS23-02	PDF15 / 32-34	Concerning approaches previously not processed as notifications; 24-hour assessment/reconsideration not always activated. Not all § 11 courses had been finally reassessed at closure; no N.
ODS23-03	PDF19-20 / 38-39	Waiting time family treatment and missing / delayed plan / follow-up; no exact waiting time denominator or actual delivery date. Course not sufficient quality training.
ODS23-04	PDF14 / 26 / 41	Oversight/implementation work put on hold because of a leadership vacancy; plan May 23,supervision Feb 23→autumn 23. No individual safeguard obligation was thereby suspended.

Independent judicial review

The closure of development efforts cannot end the lawlessness of a citizens' act. When time overruns and inadequate information persist, the decision still lacks the timely review to ensure the child's current needs and proportionality of the intervention. The guarantees are also valid under management vacancy.

The knowledge timeline makes the authority’s response after earlier warnings open to examination. The decisive evidence is each specific risk signal, receipt, deadline, decision and actual assistance. There is no complete national or municipal person linkage here, and a later account of an audit is not the original audit. The specific demand is DUBU deadline extracts, contemporaneous concern-report/assessment records, the status of all ongoing § 11 reassessments and actual assistance and redress for losses. These gaps must not be rewritten as measured redress.

Control status and source

No unread page in the 44-page original status report. The 2021 analysis original,2017/2019 audit originals,KLKJan 20, the underlying DUBU figures, specific reassessment/delivery/redress/responsibility and status after May 23 have not been obtained through this file.

TFODS23F, all 44 physical pages; SHA256 16432b428157f249d346ecc750d59e5995aab74a41e13cb79d9842806efd39db.

Replaces: National Audit Report 11 / 2025 and follow-up in 2026

The report has been published on 9 April 2026 and includes Decisions 2022-2024. All 54 pages, the four pages of the ministerial statement and the seven pages of the follow-up note have been checked. The municipal annex is visually aligned. The report number is not the year of observation. [RRAN26; RRANSM26; RRANC11126]

Footnotes: (1) discretion; Mariagerfjord is deleted due to time limits. 2) Registration practice; Esbjerg's plan population is partial. (3) only the pre-decision requirement assessed, not the legal postponement of the four-month period. 4) Læsø is part of Frederikshavn. A line is never zero. Visible BFU denominators summer to 2748; visible plane denominators to 2252. The difference to 2818 / 2338 is due, inter alia, to retained cells; the summers are not misplaced. [RRAN26, PDF52-54]

The following 14 municipalities are outside the survey: Dragør, Fanoe, Frederikssund, Gladsaxe, Holstebro, Horsens, Ikast-Brande, Ishøj, Norddjurs, Odense, Rødovre, Struer, Sønderborg, Aarhus.

Measurement method and exclusions

Search	Precise measurement gel	Original page
Population	Refund; the municipality of both the municipality of action / payment; the first course per child; children under 6 m and UKN decisions are omitted.	PDF38
DUBU	First 4 m after system start is omitted; Hillerød completely out; other municipalities and years partly out.	PDF39-40 / 43 / 46-48
Acute	Legal basis and text search emergency / immediate / concurrent / foreman as well as manual control and municipal corrections.	PDF39
Deadline	Seven additional days of measurement; no change in the legal deadline.	PDF39
BFU	Primary closure one year before decision; municipal relevant elderly are included. Cutoff 16.8.24; six-month analysis before 1.7.24.	PDF42-44
BFU acute	The four-month time limit alone is checked; since requirements have not been operationalised independently. Four municipalities are assessed only pre-decision requirements; their completed acute studies are therefore timely.	PDF43
Involvement	1972 children, but no overall percentage of offences. Scheduled cancelled conversations are counted held, without valid reason can be determined.	PDF44 / 49
Plan	Completed / attached document, search 3 m before / 6 m after; municipal relevant plan can be added. Requirements shall be maintained even on expiry date.	PDF44-46
Follow-up	At least 3 m of placement; start to 30.6.24; start up to 1 m before the decision is accepted by computer, not legal approval.	PDF47
Supervision	At least 1 year; start 2022-2023; scheduled and cancelled conversations are counted. If the deadline of 2024 applies, an annual deadline shall apply.	PDF48
Union	At least one finding among available measurements; not all children are measured at all requirements; RR calls result lower-end estimates. No already-pending exclusion indicated.	PDF49
Publication	Municipality cells only if at least 10 children and at least 3 temptations; Læsø is part of Frederikshavn.	PDF54

Knowledge, response and actual redress

Time	Documented indent	Certificate status
2016,2021,202 3	Previous Criticism / Commitment and Children First	RRAN26, PDF12 / 18 / 33 / 36; historical originals are processed in other modules. Not a new individual guilt.
2022	STAR identifies possible reimbursement importance of BFU- / plan deficiencies	RRAN26, PDF36; the STAR note is reproduced, not independently checked here.
2026	Central audit control point on BFU; no similar plan point established	RRAN26, PDF37.
10.6.2026	Minister accepts criticism, warnings invigoration, KL dialogue and quick interpretation; evaluation at end 2027 / 2029	RRANSM26, PDF1-4; commitments, not completed individual redress.
June 2026	Letter sent to the municipalities	RRANC11126, PDF2 / 4 / 6; letter itself and receipt / compliance logs not originally checked here.
24.6.2026	Five continued points of control; the case is followed	RRANC11126, PDF2-3; not completed error recovery.
2026	Financial Committee 7.5; Social Committee 10.6; 22 June 2026 to be indicated five times during consultation calls; § 20 notified 18.6	RRANC11126, PDF7 visually aligned; repeat data fields are not evidence of five distinct meetings conducted.

Independent evidence testing and specific requirements

Conclusion: The documented breaking of law union must be treated as a serious failure in the selected placement processes. **Proof:** Figure 2, Table A and the annex to the method show 69% among the first 3148 children's courses, while separate process analyses and durations show which shortcomings are measured. **Meaning:** These are more than complaints: concrete legal requirements are measured. Registration supplements, emergency demarcation, dissorted municipalities and cancelled calls may leave additional failures outside the measurement. A row per child must be required with each controlled and uncontrolled requirement, original document date and actual action.

The Minister refers to 98% upheld in coercion cases. The two 98% counts concern selected appeal and further-appeal populations; they are not linked to 3148 children and do not examine the same five procedural requirements. The statement therefore cannot negate the documented procedural breaches or prove that the factual basis was sufficient when the intervention occurred. That requires the original decision, contemporaneous evidence, consents, the emergency basis and a precise assessment of the safeguards that failed. [RRANSM26,PDF2; RRAN26,PDF20]

A subsequent completed BFU or plan does not in itself restore the prior legality, child's lost time or family contact. The three duration tests include completed delays; they are not homecoming times and cannot be used to describe the full duration of unfinished interventions. Registers finding a start up to one month before the decision requires original verification of the existence of another valid decision; acceptance of the method of measurement is not a legal basis.

Responsibilities and requirements: The relevant day-to-day rules shall apply to each intervention, including the BFU, the level, follow-up, supervision, consent / emergency conditions and effective review. The level of knowledge and reaction of the Ministry must be tested separately from the fault of the individual staff member. Evidence of a breach of warranty or of a home requires a specific statement of invalidity, immediate protection, effective cessation / reunification where the conditions are fulfilled, compensation and liability for the service / criminal liability. The relevant liability rules; and EMRK-review shall be dealt with in the legal modules of the report.

Evidence, hypotheses and lack of evidence

Documented: the breach-of-law percentages with their populations; the three completed-delay distributions; the methodology’s treatment of registration/cancellation; the ministry’s response and continuing oversight. Hypotheses requiring original records: which children were actually moved without a valid basis; further failures in withheld/excluded data; specific harm, each employee’s knowledge and actual redress. A statistical procedural error alone is not a criminal conviction for abduction.

Required data from Rigsrevisionen and the municipalities: precise counters behind rounded percentages, n for the six-month BFF analysis, separation per cause / year / municipality, anonymised dedup key and connection to complaints, all calls' implementation / cancellation logs and valid cancellation grounds. The ministerial statement 2016 and the STAR note 2022 are now original verified in the National Audit Posts 2026 -kknosning.md / .json; precise linkage of the quoted STAR act and actual implementation is tested separately. Necessary remains from the Ministry / STAR: June 2026 letter and documented subsequent enforcement. Non-public individual certificates shall include the final decision of the residence / contact / payment log and the liability case. No request has been sent.

Places: original control of the Ministry's knowledge and reaction

Controlled October 7, 2026. The original ministerial commitment from 2016 and the public memorandum of the STAR dated 2022 have now been read original. The June letter has been identified as a concrete public municipal annex, but the content of the original could not be retrieved. The Minister's own later mention of the letter is read original. This module does not add any children, breaches of law or replacements to the statistical accounts.

The Minister's statement of 14 October 2016

RRAK16: Karen Ellemann's statement on Report 21 / 2015; Case 2016- 6165, Document 394756, addressed to the Secretariat of the State Auditors. All four scanned original pages are visually read directly in memory. Original statement.

Search	The Minister's own statement or undertaking, initialled	Original page
Knowledge	The Ministry had collected knowledge of municipal practice and knew the case-processing problems; this had provided the grounds for supporting initiatives.	2

Search	The Minister's own statement or undertaking, initialled	Original page
Lack of documentation	The Minister noted the criticism that, after ten years of effort, better case handling and a deliberate effect could not be documented.	2
Responses to future reforms	The Minister would lead the way for better follow-up to new reforms and major changes.	1-2
Ongoing control	Local practice had to be followed through practice / welfare studies, well-being studies, statistics and task force feedback.	2
Efficacy and data basis	The Minister agreed to the need for impact knowledge; described the data lift towards 2020 and annual social policy statement with ten objectives for social mobility.	2-3
Priority	The Minister continued to promise targeted prioritisation of active long-term initiatives; copies were sent to Rigsrevisionen.	4

STAR's note of 21 November 2022

RRAK22: *Guide to categorising errors in the digital municipal audit scheme*, journal 22 / 01328. All five original pages are text-read in memory; page 2's highlighted examples are visually controlled in memory. Original STAR note.

Search	Content of the note, initialled	Original page
Basic conditions	Article 3 of Decree 1265 / 2022 requires the lawful award, proper registration and fulfilment of the requirements of the notice.	1
Subsequent documentation	Reimbursement may be retained by obtaining evidence that the payment was correct at the time of payment.	1
Children's cases	Undocumented statutory child welfare assessments and action plans are among the examples of errors with reimbursement implications.	2, framed box
Start of effort	In particular, for day-to-day stays, documentation of the target group is mentioned at the time of implementation, decision-making, significant steps in the matter and basic conditions.	3-4
Other error category	Overshooting and lack of evidence of justification, hearing of parties and complaint guidance are categorised without any reimbursement effect. The list is not exhaustive.	1/4
Reporting	Errors detected must be reported, even after correction. A matter which the auditor no longer assesses as an error after dialogue shall not be reported as an error.	5

Identity vote: The year, sender and actual BFU / action plan content of the note corresponds to the reference in RR11 / 2025, Paragraph 47, printed page 27 / PDF36. Rigsrevisionen does not indicate the file number or title there. A definitive link between the quoted act and journal 22 / 01328 requires the reference of the National Audit Office; the contents of the public note have been independently verified. The leadership is about reimbursement and financial audit control.

June 2026: the letter itself and the Minister's own later mention

Document	Finds and actual reading status	Locator
The June Letter	Specific Annex ID **834130 f 7-3232-4273-9 e 9 a-159 a 2 bbfc 67 d**, name *Annex 1 - Letter of shepherds to municipalities*. Frederiksberg, Case **00.22.04-G01-9-25**, agenda item **57**, Agenda ID **56 ad 854 e-f 05 a-4 aa 1-995 f-0 ddaa 00 eb 6 a 1**. The original text has not been read.	Annex link of the municipality
The source of the metadate	The annex was located through an external copy of the municipality's case sheet. The copy shall indicate the receipt on 22 June 2026. The date is a search track, not original controlled message / delivery date.	Copied case presentation with direct attachment link
The Minister for Foreign Affairs	**RRAK26S70**, reply to S 70, 26 June 2026, Case **2026-3168**, document **69859952**. Both original pages have been read.	The Minister's original answer

The Minister's later statement, paraphrased	Original page in S 70
Lawful case processing is crucial, even where the placement decision itself may be correct.	1
The Minister recently reported writing to all municipalities about process requirements, fair registration and reimbursement conditions.	1
The minister acknowledges that the letter does not by itself solve the problems, and intends to discuss binding municipal cooperation.	1-2
The Minister agrees with the need for knowledge of the impact of initiatives and the causes of continuing problems; refers to the evaluation initiated.	2

S 70 is an independent original ministerial statement about the letter. It is not the letter itself or a receipt from each municipality. The later references of the National Audit Service can be found in C111 / 26, the conclusion as well as Sections 6, 8 and 12; the locators are in the main module National audit posts 2026.md.

Precise evidentiary meaning and requirements

Documented: The then Minister personally described known municipal case-processing problems and made commitments concerning oversight, knowledge of effects and prioritisation. The public STAR original describes a financial oversight mechanism expressly covering BFUs and action plans. The later Minister personally states that a reminder of the requirements has been issued.

Independent assessment: These statements can be tested against documented actions and outcomes over time. A categorisation without an effect on reimbursement does not answer whether the citizen’s right was infringed. Subsequent production of evidence of an earlier correct payment must likewise not be confused with later fulfilment of a statutory requirement. A commitment, course or letter does not in itself document actual correction, valid legal authority for intervention, return home or reunification.

Hypotheses not proved here: the individual employee’s culpability; which named children were moved without a valid basis; actual receipt in all municipalities; actual enforcement and individual redress after the letter.

Specific demands for documents: The Ministry of Social Affairs should supply the original June 2026 letter with date, record/document number, all annexes, recipient list, dispatch log and documented follow-up. Frederiksberg should supply the already identified annex and receipt record. STAR and the National Audit Office should state whether the cited 2022 memorandum is record 22/01328,with the original document reference, any versions and evidence of dispatch/implementation. The Ministry and agencies should present testing of effects and enforcement actions linked to the commitments; the municipalities should present the specific original case records and actual remedial dates. No inquiry has been sent.

Targeted search and concrete remainder

Search / Control	Actual result
Rigsrevisionen's official 21/2015 case register, ministerial statement link	The original of 14 October 2016 found; four pages visually original checked.
site.star.dk "refusionsmæssig betydning" børnefaglig	Note of 21 November 2022 found on STAR's own server; five pages original checked.
"2022" "notat" "refusionssystemet" STAR and "refusionsmæssig" "børnefaglige" "2022" "notat"	Reference and content aligned; the precise asset identity of RR has still not been published in the reference.
"Information on the circular letter" "National Audit Office's", "22. June 2026" "National Audit Office's" "municipalities'", "Circular letter to municipalities" "National Audit Office's"	Frederiksberg annexes located through the copied case sheet.
Commune specific address, normal / direct-PDF variant, RAM session manager	View page could be downloaded; the PDF variant returned HTTP 500. Without session management, the diversion loop occurred. No original text read or saved.
Folketingets ODA: title includes placement, date 1 June-1 July 2026; full result, no next page	Five document registrations: statement, S 70 question/answer, family-placement question and RR memorandum. No separate letter registration in this delimited extract. S 70 answer checked against the original.
ODA: title contains shepherd's letter, date 1 June-1 August 2026; full result	No document records. This is a specific title search, not proof that the letter does not exist elsewhere.

The only original identified in the three indents of this order, whose text remains missing, is the June letter. The identity between the STAR act and the RR reference and the delivery / compliance tracks are distinct precise remains. All original material and visual side controls are processed in memory; only own compact facts and metadata are stored.

8. Children, parents, disability and the Youth Crime Board

Date: 6 October 2026. Working Annex to the National Report 2006-2025. Public data alone.

1. Main result and limit of person count

Denmark publishes figures on placed children, disability interventions and diagnostic assessment courses, and separate figures on errors by authorities. The checked public tables do not connect this information at individual level. A national count of how many children or parents were affected by an unlawful placement, and how long separation continued after the error was established, therefore cannot be derived from the population figures below. This is a specific deficiency in the publicly available linkage; it does not refute the established errors in appeals and surveys.

The count must keep four levels separate: decisions with errors, unique people in those decisions, intervention actually corrected, and continuing harm/time after the error was found. Remittal is reconsideration. Return home is termination of placement. Reunification is the child's actual return to parents. None of the three may be replaced by the other two.

2. Nationwide series for locations 2006-2025

Unit: persons placed per unit 31 December, not new decisions and not wrong people. Historical years 2006-2010 are BU04, the whole country, FORAN = 001 (net placed), AGE = TOTAL, SEX = TOT. Minors are calculated as 0-5 + 6-11 + 12-17. Historical age figures include the category 18 and above. Years 2011-2025 are current ANB6 and ANB7, all over the country 000, Time = yearH2, Total / 0-17 years. Without consent, BU04 FORAN120 or ANB6 FORAN102, i.e. SEL § 58 / BL § 47, is not all types of coercion. Implementation is ANBIVS1, ADMKOM000, ALERAMSIALT, unit: placed in place, not necessarily unique children.

Year	Placed at end all ages in the table,	Of which 0-17 years	SEL § 58 / BL § 47 without consent, table age	Implementation in the year
2006	13.633	12.235	1.329	Not retrieved
2007	14.224	12.625	1.383	Not retrieved
2008	14.542	12.799	1.554	Not retrieved
2009	14.666	12.890	1.720	Not retrieved
2010	14.597	12.677	1.713	Not retrieved
2011	14.981	12.814	1.779	4.024
2012	14.975	12.710	1.942	3.984
2013	14.785	12.442	2.085	3.737
2014	14.489	12.116	2.165	3.953
2015	14.245	11.959	2.277	4.142
2016	14.131	12.016	2.356	4.502
2017	14.063	11.921	2.403	4.408
2018	13.877	11.703	2.472	4.225
2019	13.435	11.421	2.501	3.674
2020	13.421	11.469	2.513	3.677
2021	13.329	11.426	2.521	3.595

Year	Placed at end all ages in the table,	Of which 0-17 years	SEL § 58 / BL § 47 without consent, table age	Implementation in the year
2022	13.629	11.608	2.633	3.686
2023	13.863	11.695	2.786	3.574
2024	13.842	11.646	2.876	3.580
2025	13.977	11.675	2.971	3.641

Sources and reproduction: BU04, ANB6, ANB7, ANBILS1. Read from Denmark's official API6 October 2026: tableinfo / {table}? format = JSON&long = en and POST / v1 / data with the above dimensions. API. Compact numbers stored here; no full public sources stored locally.

The annual totals sum to 282.704 observations at year-end, including 241.847 observations of minors and 43.979 observations in the stated category without consent. These sums are repeated status observations; the same child may appear in many years. They are neither 282.704 unique people, placement days nor a measure of unlawful placements. Starts in 2011-2025 total 58.402 events, with possible person overlap and repeat placements. Status and starts must not be added together.

2.1 Limitations and revisions

• DST describes current placement statistics as comparable from 2011. The history for 2006-2010 must therefore be shown as a separate table basis, although it may appear in the same table for readers. DST specifically describes 2006 as subject to greater uncertainty due to new data capture and transfer to the Appeals Board. PGF, quality notes.

• Current ANB6 / 7 provides incomplete data for Copenhagen 2019. No number correction has been invented here.

• Current figures cover ages 0-22 and also certain foreign nationals with person IDs. Institution types, reports and legal bases change. The municipality is the municipality responsible for action. The basis for placement is the registered statutory basis, not an independent finding of valid legal authority. DST: Content, population/classification.

• Other in ANB6 may include provisional decisions, Ankestyrelsen’s own-initiative cases, the Youth Crime Board and other interventions without consent. Category 102 is therefore not an exhaustive coercion count.

• NYT published on 23. May 2025 showed the 2024 age groups as 4.799+6.830+2.319=13.948. Current ANB7 shows 13.842. The earlier publication and current figure are different versions of the same statistics, not two populations that can be added together. NYT 51309, table. The report uses the current API version in the series and retains the earlier publication scope separately.

• Data from 2025 published in 2026 are still the year of observation 2025. There are no 2026 observations in this Annex.

3. Actual return, reunification and duration

DST’s individual registers contain reason for cessation, destination after placement and implementation date; the research register BUAF is a process register, BUAH an event register. This makes a precise timeline possible with lawful register access and linkage to decision/appeal data. However, the checked public placement tables contain no national cross-table of error finding -> remittal/annulment -> actual return home -> reunification -> repeat placement. DST: Content, register information, BUAH: effective date and cessation information.

Minimum for a real count of consequences: first actual separation date; legal basis and period of validity; error type and date identified; complaint submission and decision; suspensive effect; new decision after remittal; cessation of placement; actual move home; actual resumption of family life; any further placement and number of days in all intervals. Cessation of placement at age 18 or moving to one's own room does not document a return to the parents. A return-home decision alone does not document implementation.

SFI / VIVE report *Continuity in placement*, Annex B1.7 printed p. 105 (PDF-page 107), shows a deduced narrow population: children born after 1999, returned on parental request: 35 in 2006, 57 in 2007, 51 in 2008, 58 in 2009, 72 in 2010, 64 in 2011 and 84 in 2012. The same child is not counted again at the later date of return in the following years; 143

2006-2008 and 220 in 2010-2012 are such group numbers. These are research committees, not national return figures or the cessation of illegal interference. VIVE, Annex B1.7.

4. Controlled example: error in movement and return 2011

The Board of Appeal's practice study included 81 cases from 16 municipalities for 12-17 year olds. 67 did not comply with the rules: 40 out of 50 moving cases and 27 out of 31 returning cases. 57 had errors in the child interview, 42 in the action plan, 19 had no consent to move from the relevant party without treatment by the Children's and Young Committee; 22 had no decision on the period of return. The mistakes overlap. The selection focused on municipal decisions; 26 cases were assessed as child-friendly and inadequately documented cases were selected. The study shall document the errors of these decisions, but shall not be transmitted to all children placed. Ankestyrelsen 2011, printed p. 2,8-12 and Annex 1.

5. Children with Disabilities: People and Bet 2022-2025

HANDBU01, all over the country 000, gender 0, bets 0100 and 0110. Unit in the first number column: unique 0-17 year-old recipients in the year; second: disability interventions.

Year	Unique children / young people in the year	Inserts
2022	10.850	12.958
2023	12.140	14.460
2024	13.095	15.816
2025	13.276	15.850

HANDBU01, API picked up October 6, 2026. The statistics begin at 2022. Each child is counted once at national level, also at several stakes / municipalities, but from the publication in 2026 can be included in several municipal totals; therefore, these cannot be summed up into the national total. Nine categories of action in the current publication replace eight. These are selected BL / SEL benefits, not all disabled children, and refusals do not appear as recipients. DST: Accessibility, table definitions, NEW 54493,28 May 2026.

The annual numbers of beneficiaries sum up to 49.361 persons' annual records; the stakes to 59.084. First sum is not 49.361 unique children. There is no controlled person connection to error statistics or number of parents / relatives.

6. Adults with Disabilities or Defatment

DST NEW 2 July 2025 represents 87.600 recipients in 2024 K4. Comparable benefits from 2018 to 2024 give 74.800 in 2018 K4 and 80.100 in 2024 K4. NYT 27 August 2026 indicates 88.400 in 2025 K4. These are recipients of selected benefits, not all people with disabilities. 98 municipalities are covered from 2018; 73 have history until 2015. Paragraph 82 a / b became mandatory from 2020 H2, other categories later. Persons refused are not covered as recipients. NEW 51369 demarcation, DST reporting page, NYT 27 August 2026.

HAND02A counts once nationally per person, quarter and type of benefits. A person with multiple types of benefits can therefore be counted several times by summing up the benefits. HAND07 counts per municipality, giving additional possible overlap. API metadata indicates about 175 missing benefits for Aarhus, of which approx. 90 in § 97 in over 67-year-olds, and inaccurate § 82 a / b figures for Holstebro 2024 K3 / K4. Current topic page shows 115.909 under a reception label for 2025 K4 versus NYT 88.400. This difference is not matched to a comparable person definition; 115.909 is therefore not used as a unique number here. HAND02A, HAND07, DST Subject Page.

7. Patients:the right to diagnostic assessment in child psychiatry

The data basis in Rigsrevisionen's report 10/2023 included 54.536 reported processes in 2019 Q3-2022 Q4. The register analysis of referrals up to 2022 Q1 comprised 42.252 processes; 1.759 without an indication of completion were excluded, leaving 40.493 included. Around 70 %/more than 27.000 processes exceeded 30 days. One patient may have several processes. This therefore does not establish more than 27.000 unique children. The suspension from 18. March-1. September 2020 is included as a special period; the sample's legality assessments exclude referrals from 16. February-1. September 2020. Average assessment time increased from 76 to 115 days. The sample had 382 processes:341 in the 8-day information analysis, 260 in the assessment-plan analysis(52 % without a plan),252 in information on choice of provider(63 % without information). The same process may have several errors. Rounded percentages must not be converted into exact cases. Rigsrevisionen, printed pp. 8,13,16,18,28–31.

8. Parents, Families and other indirect rightholders

Neither the placement population nor the disability recipient count documents the number of unique parents affected. A child may have one or two parents, foster parents and other close relations; the same parent may have several children. Registration of the child is therefore not a family account. A documented count of 2 parents per child must not be assumed. Counting parents with specific lost contact, earnings, treatment opportunities or strain requires a separate count with person deduplication and a proved connection to the authority's action.

9. Documented results and necessary investigation steps

Documented: 20 years of placement status; 15 years of start-ups; 4 years of disability interventions and unique year-recipients; delimited 2011 error investigation; delimited child psychiatric initiation study. None of the general population registers even classifies breaches of law.

Not documented here: a national unique number of victims of illegal placement; number of unique affected parents; a national number actually released after reversed decisions; number of days in continued intervention after detected errors; year series 2006-2025 for all disability refusals; unique patients across all misinvestigations.

Necessary: a disidentified link between the complaint / judgment / practice investigation ID and the individual registers, with the basis of decision, date of performance, end-of-life destination and timeline. Otherwise, the report shall present the documented decision-making error and the documented personal consistency separately and indicate exactly which connection is missing. No new private case review has been carried out.

Personal and time series: material extension

Date: October 7, 2026. Public primary data. Supports personstatistik.md. No personal connection to private cases.

1. Disabled cars: decisions, re-treatment and waiting time

DST HANDBIL1 / 2 / 3, country 000, edition 27 August 2026. The table counts cases. An applicant may appear again; refusal is not an assessment of legality. Authorization and refusal shall be added together only as the two categories of decision published in the year. Re-treatment is not added as a new citizen.

Year	Appropriations	Refusal	- - - - - - - weeks	Decision time, weeks	Allowed DKK
2010	Not published	1399	Not published	32	Not published
2011	1793	1356	33	33	333624015
2012	1657	1228	33	33	278462466
2013	1678	1144	32	33	320350173
2014	1598	1035	33	32	320703578
2015	1557	1027	34	32	416378179
2016	1620	1047	35	35	305552990
2017	1507	849	36	34	262774067

Year	Appropriations	Refusal	- - - - - - - weeks	Decision time, weeks	Allowed DKK
2018	1465	888	39	40	265760823
2019	1479	1106	40	38	274821680
2020	1333	970	42	39	263367482
2021	1391	886	41	39	287429560
2022	1212	940	41	38	289763999
2023	1085	843	37	37	305018968
2024	1044	983	37	37	318530134
2025	975	927	34	35	289026006

2025 re-examination: 324 cases, 67 cases of change in outcome, 40 weeks on average (HANDBIL3). There are 1902 grant / refusal cases; 67 / 324 = 20,68% have changed the outcome of the retreatment's own population, not a national level of illegality.

Sources: HANDBIL1, HANDBIL2, HANDBIL3; precise selections are in JSON. Content, Concepts and definitions: § 114- purchase, not special features. From 2023 first municipal decision before complaint; municipal reassessment and ASTM time omitted. Remittal for reconsideration shall not be registered as a new case or as an original case. From 2025 both first / final date and significantly changed outcome. Precision, Other Uncertainty: before 2023, a complaint may be made in time, without the possibility of correction. Failure to report / audit possible.

Own methodological inference:a complete citizen journey cannot be derived from the HANDBIL1/2 waiting time. The 2025 innovation gives actual partial follow-up, but not all years' appeal/post-remittal times. Counts are missing for 2006-09; awards are missing for 2010. Register authority:DST/Ministry of Social Affairs and Housing, predecessor AST before 1. July 2016. Specific inquiry:historical 1998-2010 tables, case deduplication, first/final decision dates, remittal and reassessment courses for 2006-24.

2. Vote of 115.909 against 88.400 adults

The topic page 115.909 is exactly reproduced by summing HAND02A 2025 K 4 over 23 types of benefits × 9 age groups × 3 sex. The sum contains recipients once per type of benefit, but the same person may receive several types. It must not be used as 115.909 unique people. NYT 27 August 2026 lists 88.400 persons with one or more benefits.

4th quarter	Sum of numerical person performance cells
2018 K 4	100327
2019 K 4	100671
2020 K 4	105524
2021 K 4	109008
2022 K 4	111040
2023 K 4	112630
2024 K 4	114950
2025 K 4	115909

HAND02A,updated 11. September 2026; selection in JSON. Non-numerical historical cells arise partly from statutory categories not yet in force; they have not been converted to zero. DST topic page has 115.909 and also refers to NYT 88.400. This is a reconciled difference in units, not 27.509 additional unique citizens. Categories were expanded in 2020/2024/2025; the benefit basket is therefore not homogeneous.

3. Historical Children with Decisions and Current Begins

BU20/BU21 are separate historical decision populations, not substitutes for initiations. The outcome series show differences between the two tables' totals for 2006-13. They are not added together.

Year	BU20 children with decisions	BU21 children with decisions
2006	3356	3152
2007	3405	3257
2008	3422	3276
2009	3068	2937
2010	2957	2808
2011	2774	2681
2012	2565	2486
2013	2172	2098
2014	2577	2577
2015	2608	2608
2016	2768	2768
2017	2188	2188

BU20: AREA 000, ANBRINGAARSAG 003, ALDERIALT, KONTOT. BU21AREA 000, ANBRINGAARSAG 003. Inactive tables, replacing ANBAAR10 from 13 November 2019. P01 carried out in 2006-10 has thus still not been resolved by these tables.

ANBIVS4 gives 2011-25 actual start-ups by legal basis, all ages / sex. The 15 years of consent / without / other / unknown are in JSON. The others may not be renamed volunteers; without consent only SEP 58 / BL 47, not all legal bases are enforceable.

4. Continued material control

Return home, remittal on appeal and reunification must be recorded separately. A nationally linked 2006-25 register of individuals/time after remittal is not published in the tables checked. P02/P03/T 02/T 03 requires decision ID→child/parental role→effective return-home/contact/continuing-intervention date and original placement date. No alteration/remittal rate is multiplied by population counts.

5. Return and termination: all controlled reasons tables, all versions

Three AS originals show actual cause numbers 2007-2015. No version is added with another version of the same year. Mentors are termination events; causes may overlap. Filled 18 means registered termination also for continued stay. That is why it is not reunification. The entire 14 / 15 causal series are in JSON.

AS 2010, 3.10, printed 36 / PDF 38 original.

AS 2014 s 27 bread text says 2010 = 3153, while the table says 3469 (3153 is the 2013 column). The table is retained as a table find; the text number is an internal inconsistency. The AS 2015 table is image based and is visually read directly from PDF 20 in memory. AS 2014 copy actually read from https://viden.sl.dk/media/4520/anbringelsesstatistik-2014.pdf, AS 2015 as at https://viden.sl.dk/media/8922/ankestyrelsens-anbringelsesstatistik-2015.pdf.

Original 2007 (Ministerial response 5 January 2009) gave up 2831; AS 2010 version gives up 3375 for 2007. The inventory / maintenance breach shall be maintained. Original of the Minister.

P01 partially closed: AS 2010 Figure 1.1 printed 2 / PDF 4 gives effective 0-17-year-olds 2007-10 = 3693 / 3502 / 3254 / 2864. 2006 is still missing. These older counts are not silently inserted into the current ANBIVS1 all ages 2011- 25 series.

Figure 1.1 is visually checked on the original PDF4 on 7 October 2026: the actual placement is 3.693 in 2007 and 3.502 in 2008, not vice versa. The figure actually separates the move from the decision of the year; the figures cannot be counted as national children who are misrepresented.

Precise outstanding inquiry P02: DST/AST's historical placement register 2006-2025,raw categories for actual cessation/return home/aftercare, duration from move-in date, multiple-response reasons, unique children within the year/entire period, recoding and all revision dates; obtain the public aggregates for 2006 and 2016-25. The register is described as CPR-based with parental-responsibility roles (AS 2015 printed 29/PDF 31),but the public tables read do not link to errors on appeal or effective family contact.

6. Multiple placement bases; own type of intervention statistics

BU03A, country 000, 2006-10, all ages:

Basis	2006	2007	2008	2009	2010
Placement with consent (§ 52.3 (7))	10469	10847	10879	10848	10522
Placement without consent (§ 58)	1329	1383	1554	1720	1713
Youth (§ 74 (a)) (Penal Code)	125	126	124	143	145

Basis	2006	2007	2008	2009	2010
Aftercare with residential placement(§76.3 no.1)	1372	1542	1668	1693	1802
Serving a sentence (§ 78.2) (Sentence Enforcement Act)	0	0	0	0	10
Article 765 of the Code of Civil Procedure	0	0	0	0	37
Decision of the Presidency (§ 75.1)	0	0	0	0	56
Unstated placement	338	326	317	262	312

BU03A, selection and cause number in JSON. The 0 published for 2006-09 in subsequent imported categories is not used as proof of 0 actual interventions. AS 2010 Table 2.1 says settlement / custody could not be reported separately before 2010. The codes of consent also contain 18 + compliance / other ratios depending on the table; a compulsory union figure requires more than adding SEL 58 with the others.

ANB6 -Other 2011-25 = 143 / 126 / 110 / 115 / 124 / 131 / 159 / 167 / 170 / 229 / 306 / 366 / 417 / 397 / 382; not available = 369 / 391 / 415 / 460 / 408 / 351 / 274 / 239 / 215 / 175 / 118 / 91 / 72 / 60 / 52. All four categories plus total controlled. ANB6.

P07 specific outstanding item: obtain separate coding of the legal basis for SEL 65/75/76, Criminal Code 74 a, Sentence Enforcement Act 78, Administration of Justice Act 765, Aliens Act 36 and Youth Crime Act 14, together with BL 46/47/49/62/143/151 from 2024. DST Contents, Content description states the bases and that ongoing older decisions continue under their original legal basis until a new BL decision. Other in the public table provides no internal breakdown.

7. Separate Appeals Times; updated 2025 and separately 2026 Semester

Time of public proceedings of the Board of Appeal, extract 25 August 2026, table Average length of proceedings.

Type of action	2025 weeks	2025 determined	2026 to 2. kvt.weeks	2026 determined
Local social / employment	35,1	22927	32,0	14706
Committee on Children and Children	6,9	2272	6,6	1158
Notification	6,7	1726	7,5	712
Use of force	6,2	25	14,4	15
Ungdomskriminalitetsrådet (Youth Crime Council), the source's designation	6,3	81	6,2	42
Social supervision	6,9	46	17,4	31

Ongoing late registrations may change annual data. The average for closed cases is not the duration of placement, continued denial of contact or the municipality's new decision after remittal for reconsideration. The 25 use-of-force cases form a separate appeal category, not all reported uses of force. None of the annual counts of decided cases is a unique citizen population.

8. Original Case and Time Series, Unhomogenized

Original, Table 4.21 / 4.22, p. 13 / 14, extract February 2020; 2017 / 18 locked. Unit: months.

Category / Objective	2017	2018	2019
Municipal cases, proceedings	4,7	4,8	4,2
Municipal matters, recess	3,1	3,3	3,0
Compulsory placement and use of force,case processing	1,7	1,8	1,9

Category / Objective	2017	2018	2019
Compulsory placement and use of force,time pending	0,9	1,4	1,0
Information, handling of cases	2,6	2,8	3,4
Information, time of birth	1,8	2,0	1,0

Reality cases. Procedure: Receipt → decision. Lesson: pending cases at the end of the year. Forced and powerful are combined.

Original, Table 4.1 / 4.2, p. 24 / 25; Method p. 23, extract 3 July 2023. Unit: weeks.

Category / Objective	2020	2021	2022
Municipal cases, proceedings	17,5	14,4	14,6
Municipal matters, recess	11,1	11,6	10,6
Forced actions in the field of children, proceedings	6,5	6,2	6,8
Children's forced labour, rest period	3,9	3,3	3,9
Information, handling of cases	6,7	6,8	6,7
Information, time of birth	4,2	4,0	4,0
Other, handling	6,9	6,1	6,0
Other, recess	13,0	13,9	12,3

Cases determined on the merits. For reopened cases,the measured time starts on the reopening date. Other includes access to records,use of force and assisted reproduction; use of force cannot be isolated from this category.

These original annual versions differ slightly from the annual statement's municipal 2020-22 time of 17,4/14,3/14,5 weeks; time pending 10,6/11,0/10,7 weeks. Both versions are retained,and their values are not additional cases relative to one another. The combined 2017-19 coercion/use-of-force population must not automatically be joined to the 2020-22 child-coercion population,in which use of force is part of Other.

Verified outstanding item T01: Full originals for 2011-14 with separate categories, the social appeals boards' and employment appeals boards' own time series for 2006-12, and separate child coercion/use-of-force series for 2023-24 are missing. Table 3, printed p. 41, in Annual Report 2010 has been located in the search index, but the full original has not yet been secured. The request to AST/the ministry/the National Archives must specify year, categories, scope of merits consideration, case ID, the measurement date for time pending, first appeal receipt/reopening and extract version. Months are not converted into weeks without a stated convention. Case-processing targets are not measured process durations.

9. Register assumptions, historical versions and P06

Source card: DST Accuracy and reliability,especially Other uncertainty and Revision practices. Event dates may differ by up to a month. Missing CPR/person ID or event date leads to exclusion. The register is corrected on an assumption of processes complying with the law: a provisional decision is assumed recoded to without consent within seven days; decisions concerning unborn children are assumed recoded at birth if a change has not been reported. Not all events/variables are approved. Copenhagen 2019 has deficiencies in consent and decisive reasons for starts following a 2020 system change; Lejre 2016-20 has incomplete residential-stay data to an unknown extent. New publications replace the entire series, including corrections to historical years.

Own methodological meaning: Registered legal basis cannot prove the actual simultaneous decision or the timely approval of a preliminary decision. Automatic assumptions require separate checks against decision document and date of execution. Non-registration shall not be counted as zero intervention. The rest of the P06 is concrete: DST / Copenhagen must provide scope, affected rows / variables, decoding rule and date / version for each subsequent correction of

2019. The read documentation does not identify a complete numerical post-correction. Lejre requires an independent request for 2016-20.

DST NEW 30567, published 21. September 2020, corrected 23. June 2021 kl. 08.00, renounces 2019 status 13.600 placed and 2.624 without consent. The correction note applies to the age distribution. The current ANB6 version gives up 13.435 and 2.501 for the same year. Differences between annual versions are no more persons; deviations 165 and 123 cannot be attributed to Copenhagen without an audit account because the same correction may affect several categories and municipalities.

10. Historical duration and actual breakdown

BIS66, country 000, age ALT, edition 17 May 2011. Status 31 December by total duration; 2008 excludes all over 17 years according to the table. It's not a complete homecoming cohort.

Duration	2006	2007	2008	2009
Total	14156	15273	12747	12589
0 - 2 months	504	551	531	434
3 - 5 months	726	733	730	573
6 - 11 months	1220	1112	1155	1028
1 - 2 years	3926	4431	3605	3805
3 - 6 years	4120	4298	3431	3441
7 years and over	3658	4145	3295	3307
Undisclosed	2	3	0	1

Own delineation: Containers of the various years' denominators; population of the duration table is not automatically added to BU04A or ANB6. P02 / T03 is only partially covered: total current duration is not the time from a faulty decision to actual reunification.

BU25, land 000, all ages / sex in table, edition 15 October 2019. Reasons for amendment, not homecoming. Århus / Copenhagen 2018 is deficient according to the table note.

Reason	2014	2015	2016	2017	2018
Total	1182	991	1092	917	712
The change follows a planned course of development	233	231	237	196	119
Improvement of conditions for the child / young person	148	118	118	113	72
Absence of conditions for the child / young person	188	129	160	110	92
The child / young person leaves the location (will not be there)	173	122	150	102	98
Placement has collapsed (location has abandoned)	213	170	190	185	126
Ambient location closes	31	57	35	27	33
Priorities of the municipality (2007-09)	0	0	0	0	0
Other reasons	171	149	175	142	97
Undisclosed	25	15	27	42	75

BU32, land 000, all sexes, edition 11. October 2017. All 48 cells (cause × change / cessation × year) in JSON.

Follow-up, all causes of breakdown;	2013	2014	2015	2016
Total	545	549	426	447
Amendment	308	340	257	293
Termination	237	209	169	154

Own delimitation: Crash is concrete recorded events. A termination after a breakdown shall not document a timely return or reunification after a proven regulatory error. The same sequence may be recorded in BU25, BU32 and AS 'cause tables. Therefore, no cross-add-ons.

11. The names wait before the reform; the original versions are retained

Reference time _ RR2008, Table 1 s 2 and Table 2 s 3.

Category, whole country	2007	2008H1
Total	14	14,6

Table 2 separate 2007 social / employment below

Reference time _ RR2010, Table 1 s 3; Table 2 / 3 s 4.

Category, whole country	2007	2008	2009JanNov
Total	14,4	15,3	16,1
social	13,6	14,3	15,6
employment,	14,3	16,2	16,7

2009 excluding December; source extract 5 Jan 2010; 2007 deviates from RR 2008

Reference time _ RR2011, Table 2 s 4; Table 3 s 5.

Category, whole country	2009	2010	2011Q1	2011Q2
social	15,6	17,05	17,2	17,35
employment,	16,7	18,03	15,2	16,43

The whole country is unweighted average of the average of the regions. 2009 recycled from RR 2010.

RR 2008 Table 2 gives separately 2007 social 13,3 and employment 14,7 weeks. RR 2010 gives up 13,6 / 14,3 for the same year, and total 14,4 against previously 14,0. The version difference is retained; 2009 in RR 2010 is missing December. RR 2011 recycles the 2009 figures and is therefore not an independent full-year confirmation. The entire country's average in RR 2011 is explicitly unweighted between regions.

RR19 / 2013, Figure 5, p. 18, Annex 2, p. 28 and Figure 6, p. 22, visually original controlled. All 83 readings in JSON.

Quarter	Social	Employment
2011Q1	17	15
2011Q2	17,8	16,5
2011Q3	20,3	20
2011Q4	18,3	19,7
2012Q1	19,1	18

Quarter	Social	Employment
2012Q2	21,7	19,1
2012Q3	22,2	20,4
2012Q4	25,1	22,2
2013Q1	28,9	22,5
2013Q2	28,3	24,7

Annex 2 whole-country average 2011 / 2012 / 2013H1: social 18,2 / 21,9 / 28,6; employment 17,7 / 19,8 / 23,6 weeks. Figure 6 after the reform has new legal division; March 2014 children / family / service law 36,4, other social 42,7 and employment 34,4. Name averages are regional averages, not calculated directly by all cases. Times are not directly comparable across the reform.

Own final specification: Term 2007-12 is now documented in original versions with their periods; 2009 remains a Jan-November population in these versions. The year 2006, full 2009 and separate child / power 2006-14 require the concrete historical originals. KOU 239 (2009-10), reply 12 October 2010, document 900515, contains 2007-10 time data; KOU 7 (2010@-@ 11), reply 1 November 2010, asks separately for state figures 2001-07. They are localized sources, not yet fully tabulated here.

Placement statistics 2010: all annual-original figures, charts and methodology

The original of the Appeal Board was published in October 2011 and is based on register status on 3 August 2011. All 56 physical pages are text-read. Tiny category and year couplings in figures are also visually controlled in memory. Physical PDF page is usually the printed page plus 2; covers, table of contents and annex cover have special formatting.

Main analysis: consent, termination and effective protection

The figures describe several stages of a placement process. The 2.805 decisions in 2010 include 2.703 municipal and 102 court-determined locations. The 311 municipal decisions without consent represent the printed share of 12 percent of the 2.703 municipal decisions. The category of consent shall record the classification of the authority; it shall not test voluntary, on the basis of information or legality. The 118 changes from coercion to consent are recorded incidents in existing processes. A modified classification does not in itself document the repair of a previous error. [ASAN10, T2.1 and T3.7, PDF 8 and 31]

The cessation table records 3.253 cessations in 2010,including 2.280 upon reaching age 18. The young person may continue in residential placement as aftercare. The new counting rule makes cessations markedly more numerous than in earlier publications. The figures therefore require separate linkage to actual return home, family contact and reunification. Individual reasons for return home may overlap. The table records one annulment by the High Court; dash cells for Ankestyrelsen and the Children and Young People Committee are retained as original markings. The table does not state the appeal duration, the date of physical return home or compensation. [ASAN10,T3.10,PDF37-38]

The compliance table includes 559 decisions on needs and omits decisions on no need. In 53 registrations the need has been decided, but the offer has not yet been determined. The source does not provide the necessary linkage between these 559 decisions and all the 2.280 young people aged at 18. The difference is therefore not a statement of refusal or illegal refusal of assistance. The original describes the absence of post-clearance reports, an overestimated stock in 2007 and the absence of published post-clearance data for 2008-2009. This version recalculates the historical years. Need decision, established offer and actually continued help each requires its registration. [ASAN10, T4.1-T4.3, PDF 40-42 and 55-56]

The authority’s knowledge of registration problems is specific. The original describes a four-week reporting time limit. The response-time figure instead measures from implementation to the latest registered report. The source classifies 40 per cent as reported on time; 19 per cent are more than half a year after implementation. This measures the delay in the statistics using that clock. A count of distinct children without lawful assistance requires further case linkage. CPR and parental-responsibility information make the chain possible in the underlying register, but the annual edition does not link errors and appeals to return home, contact or payment. The demand is de-identified, version-dated course data showing these links. [ASAN10, PDF 47 and 49-54]

Reading and counting rules

All 18 numbered original tables, figures' explicit data values, map legends, the methodology's classification matrix and key facts about denominators and versions are reproduced below. F2.4 and the methodology's weekly figure have no printed point values. In F3.5,small cells without a printed number are marked as such, even where subtraction from the prose total might suggest a value. Axis increments are not observations.

Prick, line, zero and "not printed" have different meanings. Pots before 2010 refer, inter alia, to categories which could not be reported separately. Percentages are the original rounds; exact counters are not recalculated from them. Subcategories, totals, causes and several references in the same case may overlap. A sum of all rows would therefore not be a number of citizens or errors.

Specific internal votes

In the T3.5, the child delimmer summers are 3.567, while the original's total is 3.566. In T3.6, the size columns are 1.078 against the total 1.079. The last column is printed "6 ', where T3.5 uses" 6 and over'. The original cells are preserved. In T3.4 the rows of known age give 12.562 against 12.565 including three of unknown age. F3.1 also has 12.562 with enlightened sex, but it does not prove that the three with undesired sex are the same persons.

In T4.4,the reason rows total 1.152 against 1.091 cessations; 24 cessations have an unknown reason. Multiple reasons may be registered. The printed 376 and 33 per cent do not match 1.091 as denominator:own calculation gives 34, 5 per cent. A rounded proportion of 33 per cent is consistent with 1.152 reason selections as denominator, but the original does not expressly give that denominator. The figures and local discrepancy are retained.

T2.3 counts 2.864 effectuations. The prosas on PDF 27 use 2.805 when referring to the first day institution; this is the decision number. The correct source of the first actual location is therefore T2.3. The same year is shown several times in figures and tables. These views document the same population and do not need to be merged.

Original tables and figure cells

T2.1 - Decisions after consent and judgment

ASAN10, Physical PDF page 8, printed page 6. Unit: Decisions. Limitation: municipal decisions and judicial positions separately.

Category	2007	2008	2009	2010
With consent (§ 52)	3388	3231	2783	2392
Without consent (§ 58)	197	217	207	221
Decision of the Presidency (§ 75 (1))	72	105	130	90
Total municipal decisions	3657	3553	3120	2703
Youth asphyxia	77	69	60	35
Reconciliation	.	.	.	15
Product-strength surrogate	.	.	.	52
Unstated	15	4	6	0
Total	3749	3626	3186	2805

Municipal compulsion 2010 = 221 + 90 = 311 of 2703, not of 2805. Remuneration / custody could not be reported separately before 2010; dot is not 0.

T2.2 - Decisions by sex and age

ASAN10, Physical PDF page 9, printed page 7. Unit: Decisions and rounded percentages. Limit: N = 2805; sex columns 1534 / 1271; age of decision.

Age	Number of boys	Boys per cent.	Number of girls	Girls per cent	Total	Total
0-3 years	209	14	157	12	366	13
4 to 6 years	101	7	80	6	181	6
7-11 years	242	16	174	14	416	15
12 to 14 years	330	22	321	25	651	23
15 to 17 years	652	43	539	42	1191	42
Total decisions	1534	100	1271	100	2805	100

Percentages don't necessarily add up to 100.

T2.3 - First location, effective location

ASAN10, physical PDF page 15, printed page 13. Unit: Number and rounded percentages. Limit: N = 3693 / 3502 / 3254 / 2864; actual occupancy.

Category	2007 number	2007%	Number 2008	2008%	2009 number	2009%	Number 2010	2010 pct.
Total family of care	928	25	941	27	883	27	891	31

Total	3693	100	3502	100	3254	100	2864	100

Network definition specified 2010. Hybles are included in their own room from 2010, previously often municipal daily offers. A few 2010 events in 2009 schedule; dot not 0. Care / institutional totals overlap subcategories.

T2.4 - Reasons for placing the claim

ASAN10, physical PDF page 18, printed page 16. Unit: Decisions; several occasions possible. Limitation: 2748 of 2805 has given rise. The% column uses the number of rows.

Feature	Decisions the occasion;	Only this occasion	Only this occasion %
The municipality's own initiative	1265	279	22, 1
Advice from the child / young person	736	104	14, 1
Contact from a holder of parental responsibility	1226	315	25, 7
Information from family / acquaintance	251	31	12, 4
Information from school	629	47	7, 5
Information from day / leisure homes	176	11	6, 3
Information from healthcare / health services	347	64	18, 4
Information from the police / court	321	140	43, 6
Notification from the other municipality	98	16	16, 3
Information from others	614	99	16, 1
Total decisions with informed reasons	2748	1106	40, 2

57 of the diffusers; the rows must not be summed up to the number of cases.

T3.1 - Children and adolescents aged 31 December

ASAN10, Physical PDF page 22, printed page 20. Unit: Statusmen at December 31. Limit: Stock calculated from reported approaches / departures; not directly municipal ultimo reported.

Category	2007 number	2007%	Number 2008	2008%	2009 number	2009%	Number 2010	2010 pct.
0-3 years	664	5	737	6	788	6	834	7
4 to 6 years	893	7	869	7	912	7	957	8
7-11 years	2773	22	2759	22	2633	21	2580	21
12 to 14 years	3126	25	3165	25	3102	24	2895	23
15 to 17 years	5172	41	5270	41	5396	42	5296	42
Age not known	1	0	1	0	2	0	3	0
Total 0-17 years	12629	100	12801	100	12833	100	12565	100

Annual population cannot be summed up to 20 years of unique children.

T3.2 - Placed by location, end of year

ASAN10, Physical PDF page 26, printed page 24. Unit: Number and rounded percentages. Limit: Ultimo stock 12629 / 12801 / 12833 / 12565.

Category	2007 number	2007%	Number 2008	2008%	2009 number	2009%	Number 2010	2010 pct.
Total family of care	5974	47	6149	48	6280	49	6351	51

Category	2007 number	2007%	Number 2008	2008%	2009 number	2009%	Number 2010	2010 pct.
Network family outside the genus	333	3	424	3	475	4	409	3
Network family within the genus	236	2	210	2	209	2	305	2
General care family	5405	43	5515	43	5596	44	5637	45
Own room / coll egium / residence	441	3	431	3	440	3	501	4
Total institution of the day	3078	24	3079	24	3037	24	2858	23
Local authority offers (2006-09)	619	5	693	5	774	6	511	4
Actuarial institution (2006-09)	286	2	316	2	300	2	192	2
Day institution partially closed	-	-	-	-	-	-	15	-
Daily institution secured department	58	-	52	-	53	-	64	1
General Section	2115	17	2018	16	1910	15	2076	17
Dietary / post-school	626	5	571	4	536	4	459	4
Social pedagogy	2182	17	2268	18	2254	18	2114	17
Ship project	39	-	40	-	36	-	32	-
Undisclosed	289	2	263	2	250	2	250	2
Total	12629	100	12801	100	12833	100	12565	100

Undisclosed is due to a lack of adequate municipal reports. Old institutional types continue in stock; totals overlap with sub-groups. Original line is preserved.

T3.3 - End of period of consent

ASAN10, Physical PDF page 27, printed page 25. Unit: Staff and percentages. Limit: N = annual total stock; 2010 N 12565.

Category	2007 number	2007%	Number 2008	2008%	2009 number	2009%	Number 2010	2010 pct.
With consent (§ 52)	10809	86	10814	84	10649	83	10298	82
Without consent (§ 58)	1412	11	1594	12	1754	14	1763	14
Youth asphyxia	82	1	64	0	67	1	49	0
Reconciliation	.	.	.	.	.	.	7	0
Strength surroga t	.	.	.	.	.	.	32	0

Category	2007 number	2007%	Number 2008	2008%	2009 number	2009%	Number 2010	2010 pct.
Undisclosed	326	3	329	3	363	3	416	3
Total	12629	100	12801	100	12833	100	12565	100

Unspecified consent 416; judgment/serving a sentence/remand detention kept separate; a dot before 2010 means no separate reporting option.

T3.4 - Played siblings by age

ASAN10,physical PDF page 29,printed page 27. Unit: children with recorded full siblings, not families. Scope: siblings defined by identical registered holders of parental responsibility; 558 children lack this information.

Age	Sibling number	Sibling percent.	All numbers	All percentages.
0-3 years	204	6	834	7
4 to 6 years	373	10	957	8
7-11 years	1101	31	2580	21
12 to 14 years	966	27	2895	23
15 to 17 years	922	26	5296	42
Total	3566	100	12565	100

All age ranges total 12562; total 12565 includes 3 with undisclosed age from T3.1 No record of all biological siblings.

T3.5 - Sequential flocks by size and type

ASAN10, Physical PDF page 29, printed page 27. Unit: Packs; last row of children. Limit: Type of location, not the same physical location; maximum number of siblings recorded 7.

Category	2 numbers	2%	3 numbers	3%	4 numbers	4%	5 Number	5%	6+ number	6 +%	Total number	Total %
Different type	332	27	107	45	31	42	8	67	3	50	481	31
Same type	900	73	129	55	43	58	4	33	3	50	1079	69
Total siblings	1232	100	236	100	74	100	12	100	6	100	1560	100
Total children	2464	69	708	20	296	8	60	2	39	1	3566	100

Children's allowance 3567 as against printed 3566. Original cells retained; no correction of the number of persons by own sum. The 69% printed proportion corresponds to 1079 of 1560 sibling flocks. The wording of the text on all siblings does not document a person's share or physical common stay.

T3.6 - Sequence flocks in the same type of location

ASAN10, Physical PDF page 30, printed page 28. Unit: Pack in the same type of place. Limit: Column totals 900 / 129 / 43 / 4 / 2; source prints last size 6, not 6 +.

Location	2 numbers	2%	3 numbers	3%	4 numbers	4%	5 Number	5%	6 numbers	6%	Total number	Total %
Total family of care	681	76	89	68	30	70	3	75	2	100	805	75

Location	2 numbers	2%	3 numbers	3%	4 numbers	4%	5 Number	5%	6 numbers	6%	Total number	Total %
Non-family networks	28	3	3	2	3	7	1	25	0	0	35	3
Generic networks	15	2	3	2	0	0	0	0	1	50	19	2
General care family	638	71	83	64	27	63	2	50	1	50	751	70
Total institution	133	15	20	15	9	21	1	25	0	0	163	15
Municipal round-the-clock service	24	3	3	2	3	7	0	0	0	0	30	3
Akutinstituutno	15	2	4	3	2	5	0	0	0	0	21	2
Partially closed institution	1	0	0	0	0	0	0	0	0	0	1	0
Security section	2	0	0	0	0	0	0	0	0	0	2	0
General Section	91	10	13	10	4	9	1	25	0	0	109	10
Dietary / aftershave	3	0	0	0	0	0	0	0	0	0	3	0
Socialpedagogisk opholdssted	71	8	15	12	2	5	0	0	0	0	88	8
Ship project t	1	0	0	0	0	0	0	0	0	0	1	0
Undisclosed	11	1	5	4	2	5	0	0	0	0	19	2
Total	900	100	129	100	43	100	4	100	2	100	1079	100

The column totals 1078 against total 1079; the T3.5 has 3 flocks in 6 + the same type. No assumption of the same physical location. The 805 / 1079 and the rounded 75 per cent in the case of a foster family are counted as sibling flocks. A share of the population requires the weighting of the group sizes; the same type of place does not document the same address.

T3.7 - Follow-up and other incidents

ASAN10, Physical PDF page 31, printed page 29. Unit: Case, not persons. Limit: Decisions / follow-up / cessation in 0-17 years of age.

Category	2007 number	2007%	Number 2008	2008%	2009 number	2009%	Number 2010	2010 pct.
Place of relocation / change of location	1413	12	1476	12	1124	10	1044	8
Without consent modified to with consent	120	1	100	1	95	1	118	1
General follow-up action / action plan	5813	49	6330	53	6451	56	7297	59

Category	2007 number	2007%	Number 2008	2008%	2009 number	2009%	Number 2010	2010 pct.
Presented children and the Youth Committee	489	4	564	5	526	5	520	4
Return and other termination	3375	28	3335	28	3187	28	3253	26
The transfer to the second municipality of action	89	1	84	1	90	1	71	1
The transfer from the other municipality of action	559	5	40	0	64	1	37	0
Total cases	11858	100	11929	100	11537	100	12340	100

Cessation at age 18 is also included where full-time residential placement continues in aftercare; revised cessation counts exceed those in earlier annual editions. Transfers in/out reflect, among other things, age/reporting delay.

T3.8 - Causes of movement

ASAN10, Physical PDF page 35, printed page 33. Unit: Movements with multiple initiators possible. Limit: N 1413 / 1476 / 1124 / 1044; several markings.

Category	2007 number	2007%	Number 2008	2008%	2009 number	2009%	Number 2010	2010 pct.
Municipality	831	59	955	65	798	71	721	69
Location	520	37	610	41	440	39	408	39
The child / child	574	41	560	38	485	43	436	42
Parental authority	406	29	408	28	347	31	301	29
Court of Justice	47	3	55	4	21	2	20	2
Police / prosecution	26	2	25	2	7	1	21	2
Appeal authority	0	0	0	0	0	0	0	0
Undisclosed	196	14	82	6	19	2	12	1
Total removals	1413	-	1476	-	1124	-	1044	-

The original's running text incorrectly refers to table 3.9; the printed table is 3.8. Zero initiation by an appeal authority does not mean zero appeals/errors.

T3.9 - Referral by children and youth committees

ASAN10, Physical PDF page 36, printed page 34. Unit: Questions asked, not 572 children. Limitation: 520 cases with 572 references; several questions same decision.

Type of decision	Acceded	Not accepted	Total	Acceded%
Voluntary section 52 to coercion section 58	53	2	55	96
Maintenance / extended duration § 62 stp.1-4	364	4	368	99
Extended retreatment period 3 annual rule 0 years	15	3	18	83
Continuation of association § 68 a	16	3	19	84

Type of decision	Acceded	Not accepted	Total	Acceded%
Amended place § 69 stk.4-5 after § 58 / 68 a	18	1	19	95
Refusal of a return application § 68 / 68 a	26	1	27	96
Maintenance after preliminary decision § 75 stp.3-4	41	1	42	98
Communication restriction under section 71 subsection 3, read with subsection 5	21	3	24	88
Total submissions	554	18	572	97

Accession is the outcome of the committee, not independent proof of the correct basis. Quotas are the historical names of the original.

T3.10 - Registered returns and other termination by cause

ASAN10, Physical PDF page 38, printed page 36. Unit: Termination with overlapping causation markings. Limit: N 3375 / 3335 / 3187 / 3253; not sum of causative series.

Category	2007 number	2007%	Number 2008	2008%	2009 number	2009%	Number 2010	2010 pct.

Place gives up category from 2010	-	-	-	-	-	-	86	3
Second Termination	601	18	504	15	373	12	217	7

Category	2007 number	2007%	Number 2008	2008%	2009 number	2009%	Number 2010	2010 pct.
Total	3375	-	3335	-	3187	-	3253	-

Excludes changes of responsible municipality where placement continues, cf.3.7; nevertheless a row of 39 other transfers, which must not be harmonised with 71. Cessation at age 18 also occurs with continuing aftercare. New 2010 categories; original dash retained, not 0.

T4.1 - Decisions on the need for protection

ASAN10, physical PDF page 40, printed page 38. Unit: Need decisions with multiple offers. Decrease: 559 positive needs decisions; per cent gender distribution within each row.

Tenders	Male Number	Male percentage points	Female Number	Women%	Total	Total
Visits	161	59	113	41	274	100
Personal Adviser	15	42	21	58	36	100
Permanent contact person	99	51	94	49	193	100
Closing-out scheme	58	53	51	47	109	100
Tenders not decided	25	47	28	53	53	100
Total required decisions	305	55	254	45	559	100

Excluding decisions on no need. Special after 18 years' decisions are taken. Not 559 decisions by all 2280 young people who turn 18. 53 needs without a decision to offer.

T4.2 - Established/re-established residential stays in aftercare

ASAN10, Physical PDF page 41, printed page 39. Unit: Number and rounded percentages. Limitation: Establishment / re-establishment / continuation 18-22 years.

Category	2007 number	2007%	Number 2008	2008%	2009 number	2009%	Number 2010	2010 pct.
