Day institution partially closed	.	.	.	.	.	.	1	0
Daily institution secured department	9	1	20	1	21	1	35	2
General Section	156	10	173	10	193	11	201	11
Dietary / post-school	69	4	66	4	59	3	59	3

Category	2007 number	2007%	Number 2008	2008%	2009 number	2009%	Number 2010	2010 pct.
Social pedagogy	346	22	389	22	419	24	439	24
Ship project	8	1	9	1	7	0	10	1
Undisclosed	185	12	192	11	174	10	160	9
Total	1596	100	1741	100	1774	100	1823	100

Recalculated historical aftercare years; in 2010, trajectories with clear case events but no separate continuation decision are also included. Quality for 2007-09 is assessed as lower; the percentage cell 2007 institution 17 is retained.

T4.4 - Cessation of residential stays in aftercare

ASAN10, Physical PDF page 44, printed page 42. Unit: Termination and overlapping of causes. Limitation: 1091 cessation, of which 24 unknown cause; cause number of sums 1152.

Reason	Number	Printed per cent
Purpose achieved	376	33
Purpose not achieved	36	3
Filling 23 years	179	16
The place closes.	4	0
Suitable place cannot be found	1	0
New municipality of action	14	1
Young people leave the site	78	7
Place gives up.	18	2
Second Termination	446	39
Total	1091	100

The printed 376/33 does not agree with 1091 as the percentage denominator: own 34, 5%.33 rounded fits the sum of reasons 1152,but the source does not expressly state this denominator. No harmonisation.

F1.1 - Decisions and effectiveness

ASAN10, Physical PDF page 4, printed page 2. Unit: Annual events. Limit: Same number as 2.1 / 2.3; no addition.

Year	Decisions	Efficacy
2007	3749	3693
2008	3626	3502
2009	3186	3254
2010	2805	2864

Year mapping visually checked by root; the graph text’s extraction order is not year order.

F1.2 - Ultimo stock 0-17 years

ASAN10, Physical PDF page 5, printed page 3. Unit: Staff of the State. Limit: Same stock as 3.1.

Year	Number
2007	12629
2008	12801
2009	12833
2010	12565

No addition to 3.1.

F2.1 - Decisions by age

ASAN10, Physical PDF page 10, printed page 8. Unit: Rounded percentages. Limit: Annual Decisions 3749 / 3626 / 3186 / 2805.

Age	2007%	2008%	2009%	2010 pct.
0-3 years	9	11	12	13
4 to 6 years	6	6	5	6
7-11 years	15	14	14	15
12 to 14 years	29	28	27	23
15 to 17 years	41	42	42	42

Visually verified; no exact integers are recalculated.

F2.2 - Frequency of settlement by age

ASAN10, Physical PDF page 11, printed page 9. Unit: Decisions per 1000 of the same age group. Limit: Source of figure refers to population 1 Jan 2010.

Age	2007 per mille	2008 per mille	2009 per mille	2010 per mille
0-3 years	1, 36	1, 52	1, 44	1, 40
4 to 6 years	1, 12	1, 03	0, 88	0, 92
7-11 years	1, 63	1, 51	1, 3	1, 25
12 to 14 years	5, 09	4, 71	3, 99	3, 09
15 to 17 years	7, 67	7, 33	6, 44	5, 56

No number illegally placed. Root's visual control, PDF 11.

F2.3 - Signature of the municipal decision card

ASAN10, Physical PDF page 12, printed page 10. Unit: Class boundaries of the map. Limitation: 0-17 years of age per municipality; not exact municipality number.

Signature	Printed demarcation
Red	Exceeding 3 per cent
Green	2-3%
Orange	Less than 2 per cent
White	No decision to place

The figure does not print exact ratecels for each municipality. No rate guessed by colour; prose indicates 22 municipalities over 3 and 36 under 2.

F2.5 - First place by sex

ASAN10, Physical PDF page 16, printed page 14. Unit: Percentage of gender-specific effects. Demonstration: The figure does not indicate gender-specific integers.

Location	Boys per cent.	Girls per cent
Total family of care	29, 8	32, 6
Own room etc.	11, 3	15, 2
Daily institution	29, 1	28, 1
Dietary / post-school	6, 3	5, 6
Social pedagogical residence etc.	20, 4	15, 4

Visually controlled; remaining / unilluminated locations not shown separately.

F2.6 - Reasons for placing the claim

ASAN10, Physical PDF page 17, printed page 15. Unit: Percentage; several occasions. Limitation: 2010 provided the occasion, N 2748 from 2.4; earlier years precise information-denominators not here.

Feature	2008%	2009%	2010 pct.
The municipality's own initiative	34, 6	37, 2	46, 0
The child's contact	27, 8	27, 3	26, 8
Approach by the holder of parental responsibility	50, 1	46, 4	44, 6
Family / acquaintance	9, 9	9, 4	9, 1
School	28, 4	28, 9	22, 9
Day / leisure home	6, 4	6, 0	6, 4
Health services	9, 7	11, 5	12, 6
Police / Court	10, 4	10, 9	11, 7
Second municipality	3, 0	4, 0	3, 6
Others	21, 5	22, 7	22, 3

Visually controlled; causality rows overlap.

F2.7 - Parents / Home Local Authorities

ASAN10, Physical PDF page 19, printed page 17. Unit: Rounded causation markings. Limitation: Local authorities reported; several possible; figure no separate valid N.

Specified relationship	2010 pct.
Insufficient care	48
Other decisive factors	37
Violent disharmony	33
Abuse	18

Specified relationship	2010 pct.
Insomnia	14
No decisive relationship	12
Violence / threats to the child	9
Grove care failure	9
Physical poor health conditions	7
Development inhibition	4
Other criminal behaviour	4
Serious illness / other deaths	4
Physical impairment	2
Sexual abuse / incest	2
Parents deceased	2
For adoption	0

No independent control of the accuracy of the relationship. 0 rounded percentage has not been proven 0 events.

F2.8 - Local circumstances of the child

ASAN10, Physical PDF page 20, printed page 18. Unit: Rounded causation markings. Limitation: Several reasons possible; 18 shown rows include none-conditions; method calls 17 cause categories.

Specified relationship	2010 pct.
Outstanding behaviour / adaptation	36
School problems	33
Leisure / friends / networks	30
Other factors	24
Indademergent behaviour / adaptation	20
Self-harm / attention-seeking	19
No decisive relationship	14
Health / other	13
Developmental disorder: autism/ADHD etc.	12
Other criminal behaviour	12
Abuse	10
Missing family relations / street child	6
Insomnia	4
Development inhibition	4
Language problems	4
Unaccompanied refugee	3
Physical impairment	3

Specified relationship	2010 pct.
Youth asphyxia	1

No legal / professional verification of the recorded justification for these statistics.

F2.9 - Summary BFUs themes

ASAN10, Physical PDF page 21, printed page 19. Unit: Thematic markers. Limit: combined parents / children's reasons; unclassified omitted.

Theme	2010 pct.
Development / behaviour	61
Family conditions	89
School conditions	34
Health conditions	49
Recreation / friends	30
Other relevant factors	24

89% does not mean a lawful child welfare assessment; themes may overlap. Methodological rule reproduced in M1.9. The figure's reference to annex point 1.8 does not point to the actual classification matrix in point 1.9, physical PDF 55.

F3.1 - Appointed sex

ASAN10, Physical PDF page 23, printed page 21. Unit: Staff of the State. Limit: 12562 with enlightened sex as against 12565 total; 3 omitted.

Sex	Number	Printed pro sas%
Boys	6816	54
Girls	5746	46
Total gender	12562	100

No assumption of the same three as with undisclosed age.

F3.2 - Year-end placement frequency by age

ASAN10, physical PDF page 24, printed page 22. Unit: per 1000 population of the same age group. Limit: Population of Denmark's Statistics 1 January of the year; calculated ultimo stock.

Age	2008 per mille	2009 per mille	2010 per mille
0-3 years	2, 8	3, 0	3, 2
4 to 6 years	4, 4	4, 7	4, 9
7-11 years	8, 1	7, 8	7, 7
12 to 14 years	14, 8	14, 5	13, 7
15 to 17 years	25, 6	25, 8	24, 7

Visually controlled; not the same as 2.2 new decisions.

F3.3 - Municipal ultimo map signature

ASAN10, physical PDF page 25, printed page 23. Unit: Class boundaries of the map. Limit: Stock of the municipality of trade 0-17 years per 1000.

Signature	Printed demarcation
Orange	3 -9 per 1000
Green	10 -14 per 1000
Red	15 or over per 1000

No exact municipal ratecels in the map; no rate guessed. The printed intervals of the map shall be kept.

F3.4 - Movements per quarter

ASAN10, Physical PDF page 32, printed page 30. Unit: Moving events. Limit: Summer 1413 / 1476 / 1124 / 1044 corresponds to 3.7.

Quarter	2007	2008	2009	2010
Quarter 1	319	339	282	239
2nd quarter	287	357	263	260
3rd quarter	460	472	348	323
4th quarter	347	308	231	222

No confidence dedup over the year.

F3.5 - Movements between types of place

ASAN10, Physical PDF page 33, printed page 31. Unit: Marked moving cells. Demonstration: Five groups by previous location; total in the text 955 as against 1044 as a whole.

From	For food / after keel	To own room	Of a kind used on motor cars agologic	For foster care	For day-to-day testing ution	Printed running text total
Daily institution	12	60	124	85	110	391
Family of care	12	41	57	92	53	255
Social pedagogical residence	7	72	77	15	39	210
Own room	not printed,	31	8	not printed,	9	50
Dietary / post-school	12	20	7	not printed,	9	49

Visually 1450 and 2800 px. Small / unvalued segments not recalculated from row prosa. Outstanding site groups shall not be interpreted as 0.

F3.6 - Causes of movement

ASAN10, physical PDF page 34, printed page 32. Unit: Percentage with multiple causation markings. Limits: Movements, N 1413 / 1476 / 1124 / 1044; not fault counters.

Reason	2007%	2008%	2009%	2010 pct.
Planned development	36	32	33	35
Improving the child's condition	23	21	23	22

Reason	2007%	2008%	2009%	2010 pct.
Aggravation of the child's condition	20	21	20	15
Child leaves the place	17	18	20	17
This place is breaking down.	20	21	22	21
The place closes.	3	4	4	5
Other reasons	20	20	18	19

All years / categories visually controlled.

F4.1 - Survival by sex

ASAN10,physical PDF page 43,printed page 41. Unit:persons at the reference date. Scope:18-22-year-olds in residential placement at year end.

Sex	Number	Prose%
Male	1083	59
Women	740	41
Total	1823	100

Same N as 4.3.

FM2 - Reporting response time

ASAN10, Physical PDF page 52, printed page 50. Unit: Alerts; rounded percentages. Limit: From execution to last recorded reporting; exact N not disclosed.

Response time	Pct.
Pre-performance	5
Less than 1 month	35
2-3 months	23
4-6 months	18
7-9 months	10
More than 9 months	9

40% is called in time; 19% more than six months. Reporting deadline of four weeks from the decision and event → last reporting is different watches; not just 60% breach in unique children.

M1.9 - Method: thematic classification numbers

ASAN10, Physical PDF page 55, printed page 53. Unit: Classification codes, not number of events. Limit: The numbers refer to table 1 question 7 a / 7 b.

Initial code conditions	Theme
Child 1 / 2 / 3 / 4 / 5	Development / behaviour
Children 6 / 16 or parents 1 -12 / 14 -15	Family conditions
Child 7 / 8	School conditions
Children 3 / 9-14 or parents 13	Health conditions

Initial code conditions	Theme
Child 15	Recreation / friends
Child 17	Other relevant factors
None of the above	Undisclosed, omitted from the figure

The codes cannot be set as number of ratios. Child 3 goes in two themes.

MFAKTA - Method and denominator facts

ASAN10, Physical PDF page 50, printed page 48. Unit: Local method / register facts. Limit: No new populations at the same number repeated in report.

Locator physical / printed	Facts	Number / status
PDF 3 / s 1	Records retrieval	Early August 2011
PDF 11 / s 9	Local authorities over 3 decisions per 1000	22
PDF 11 / s 9	Local authorities under 2 decisions per 1000	36
PDF 28 / s 26	Children without informed custody	558 of 12565
PDF 28 / s 26	Former 2009 version without custody	4315 of 12654
PDF 44 / s 42	Absence of maintenance unknown cause	24 of 1091
PDF 47 / s 45	Municipalities with system specialty agreement	8, extract at least quarterly
PDF 50 / s 48	Contact April 2010 to municipalities with highest recorded falls	18
PDF 50 / s 48	Contact July 2010 for municipalities with highest recorded falls	14
PDF 51 / s 49	Reporting graph period	1 Jan 2010- 31 Jan 2011
PDF 53 / s 51	Total registry events 2010 and more time	Barely 139000
PDF 53 / s 51	Registered children since 1 Jan 2006	Some 30000
PDF 53 / s 51	Precise data demarcation	3 August 2011
PDF 54 / s 52	Causal categories of parents / children	15/17
PDF 55 / s 53	Unpublished post-mortem inspection	2008 and 2009
PDF 55 / s 53	Formerly 2007	Overrated according to the original
PDF 56 / s 54	Previous quality of defence	2007- 09 lower than 2010
PDF 56 / s 54	At 18 years of age, normally printed	With the exception of judgment / custody surrogate
PDF 56 / s 54	Compliance inclusion without separate decision	Clear case events can document continued residential placement

Barely / well kept as imprecise indications of size; not exact national personal unions over 20 years old.

Figure widget without guessed values

• F2.4, physical PDF 13 / press 11: Quarterly performance curves have no explicit point values. Annual numbers can be found in if1.1 / T2.1 / T2.3; no quarterly figures are guessed.

• FM1, physical PDF 51 / press 49: Weeks without explicit point values; axis division only. No reporting number guessed from the curve height.

Return and duration of placement: reconciliation of public publication

On 7. October 2026, StatBank's full available table catalogue of 5.737 metadata records was examined, including discontinued tables.44 relevant table metadata records were selected by the ANB/BU/BIS table series and titles concerning placements/children in care, supplemented by BU25/BU32. All 44 tables' variables, periods, units and update dates have actually been retrieved and read. This is **metadata and dimension verification**, not full reading of all 44 tables' value cells. The previously substantively checked population tables and original 2007-2015 reasons for cessation are in the chapter on individuals.

What the public register actually covers

Only BIS66 within the reporting period has a duration dimension: total duration among children in care on 31. December 2006-2009. Its figures have already been extracted in the person module and describe status, not completed processes. Table BIS7 on completed placements and duration of the most recent process covers 2001-2005, before the period. The newer placement tables show status/starts/causes, while BU25 and BU32 show changes and breakdowns. Within this specific 44-table scope, there is no public national 2016-2025 dimension for actual return home, destination after termination or completed placement duration. This is a documented **publication limitation**, not proof that the authorities do not have the information.

Danmarks Statistik's current documentation specifically states that the research registers contain changes, the reason for cessation and where the child moves afterwards. The data-quality section notes uncertainty about these details; changes are validated indirectly through status. A registered cessation therefore cannot automatically become a documented reunited child. National placement status minus the following year's status cannot provide returns home either: new and repeated trajectories, age, a change in the responsible municipality and other reasons for cessation must be included. [DST-PUB26A-C]

Table reconciliation with the entire controlled metadata delimitation

Table	Public period beginning	Latest period	Active Table	Dimensions that are actually controlled

BIS6	2001	2005	No	area, age, total duration of placement, time
BIS7	2001	2005	No	area, age, duration of last placement, time

Active is the publication status of the catalogue; a closed table is not a closed citizen's case. Several tables show the same register population with different dimensions.44 table metadata are not 44 independent studies or 44 child populations. Historical tables shall not be added to later recalculated versions.

Specific metadata errors and impact requirements

Registered legal basis may be constructed on the basis of an assumption

DST's quality description states that missing reports of changes may be replaced by assumptions of compliance with the law: provisional decisions are recoded after seven days, and decisions concerning unborn children are recoded at birth. The registered category therefore does not alone document the existence or lawfulness of the subsequent decision. This link must be checked against the contemporaneous decision record. [DST-PUB26C, »Other uncertainty«]

The description also states incomplete residential-stay data from Lejre for 2016-2020 of unknown scope and missing consent/reason data for Copenhagen initiations in 2019. Event dates may differ by up to one month; invalid person identification and a missing event date lead to exclusion. Not all variables and events are validated. This requires a separate account of exclusions and versions; the gaps must neither be assigned zero nor converted into an unknown count of unlawful placements. [DST-PUB26C,“Other uncertainty” and “Revision practices”]

The catalogues for ANB8 and ANB10 indicate: **31 June**, a date that does not exist; both are updated on May 7, 2026. The current statistical description indicates 30 June. The report retains this actually read metadata deviation and requires correction of the label; it is not in itself evidence of incorrect underlying numbers. The half-year definition used must be identified from tabular time and method, not just an erroneous heading.

Conclusion → proof → meaning → rule → omission → deviation → consequence → responsibility → requirements: An overall impact account cannot be completed from the public placement status alone. The 44-controlled dimension registers and DST's description of the research registers accurately document the difference between published status and existing cessation / removal information. The specific protection and restoration obligation shall be tested on the relevant right and event, as legal analysis indicates. If the authority does not follow an infamous decision on the actual contact / return of the child, a statistical closure may leave an unclaimed loss of entitlement. Therefore, an objective, unidentified coupling of initial interventions, test outcomes, actual cessation, new residence address and each relevant parental role is required. Mistakes or non-registrations must be verified against simultaneous decisions and actual residence. Responsibility for authority and personal liability shall be the responsibility of each individual.

The precise remaining material to obtain is raw reasons for cessation and destinations for 2006-2025, individual duration and linkage to appeal, remittal, annulment, new decision and actual reunification. No request to an authority has been sent. The gap concerns this data link; it does not change the already documented errors in the placement reviews.

Youth Crime Board 2019-2025:decisions, errors, time and return home

Controlled October 7, 2026. The name started 2019; 2006-2018 is therefore not missing the denominator. All 7 annual reports' key activity / outcome / complaint section are actually read. Compact JSON retains the original and later revised years separately.

Year	Head received / settled	Re-lodged received / settled	Complaints settled	Stated	Repealed / amended t	Rejected
2019	780 / 607	Not available / 82	24	13	11	0
2020	995 / 909	452 / 416	42	29	13	0
2021	927 / 1037	600 / 606	48	37	8	3
2022	898 / 880	655 / 658	60	42	17	1
2023	922 / 933	675 / 676	66	49	14	3
2024	950 / 967	820 / 813	59	49	9	1
2025	1034 / 1047	883 / 889	59	42	16	1

The categories of complaints of the originals sum up to 358 decisions and 88 totally / partially repealed or amended decisions. Repeated cases and overruns do not make the sum unique young, original interventions or families. Changes may be due to new information or modified consent; they do not automatically count as illegal placement.

Documented errors and concrete consequences

• 2019: 11 / 24 amended / repealed; a further 4 / 13 confirmed criticised; a repeal based on undocumented psychological examination reproduced in the second annex. [UKN2019] p.46-47. p.

• 2020:Two decisions lapsed after 1-2 months without implementation; a fresh submission produced identical decisions. After a notification and assessment, both the course and placement ceased; the actual move date is not published. [UKN2020]pp.45-46.

• 2021:10/37 affirmed decisions were also given a deadline for reconsideration. The 10 must not disappear from an account of errors or be called 10 additional alterations/remittals without a category note. One reopened case finally decided in 2022. [UKN2021]p.39.

• 2022: 13 / 42 confirmed at the same time was granted a retrial period before amendment 1 July. Three of 17 changes are due to new circumstances. A resumed proceedings definitively decided on 2023. [UKN2022] p.32. M.

• 2023: 27 homelands: 8 forced returns, 1 continued placement, 3 cessation of the entire process, 15 municipal homelands. Three described homelands after about 1,5 years, about 0,5 years and 1 year. The time indications are course descriptions; no documented country distribution from repeal to actual reunification. [UKN2023] p.24-26

• 2024: Invalid change of location and delviturned institution: lack of necessary descriptions / young person's attitude. Deficiencies also occur in confirmed decisions. [UKN2024] p.32-34.

• 2025: Formally invalid change of location and institution secured: consent / competence not clarified. Two siblings supervised the interaction with one parent terminated. Number of complaints is not number of families. [UKN2025] p.32-34.

Benchmarking of the tempo series

2019 table 3:202 timely/607 decided, 17 over 4 weeks. 2020 figure 5:timely 5%/4% and over 4 weeks 54%/57% in the age groups; no exact figure denominator printed. 2021:timely 10%/12% of 394/643; over 4 weeks 26%/37%.2022:timely 126/880; over 4 weeks 155/880.2023:timely 126/915; over 4 weeks 249/915,18 refusals excluded. 2024:19% timely and 10% over 4 weeks of 954,13 refusals excluded. 2025:22% timely and 11% over 4 weeks of 1031,16 refusals excluded. All intermediate steps are in JSON.2020-2023 graphs checked visually against the originals; rounded percentages have not been converted into exact counts.

Actual reunification and continued intervention

The registered cessation of improvement is 37 / 2020,75 / 2021,93 / 2022,88 / 2023,117 / 2024,134 / 2025. The categories of municipal orientations mix the change of location and repatriation. 2020 p.9 explicitly does not provide municipal information on repatriation. The cessation or orientation figures should therefore not be called reunions.

The 2025 duration in Figure 13 is fixed for the duration of the proceedings, with 89 cases excluded; the basis is referred to as 958 main cases. Two-year programme: 25% of 10-14 years and 6% of 15-17 years.67 / 889 recoveries extended the duration. It doesn't actually describe time separated from parents. The Committee of 20 young people is a descriptive foreword; only one interview was conducted. [UKN2025] p.21-24,29-30

The precise number of unique young people, parents, placements and actual moves home requires case-record/person linkage at the board, municipalities and Danmarks Statistik. Necessary fields: pseudonymised trajectory key; decision, implementation, complaint, annulment and return-home dates; consent; placement location; reason for outcome; any new decision and responsible authority. The 2019 incoming count of resubmitted cases is not published exactly in the annual report read; a case-record extract is necessary. For several years the court sections provide only approximate proportions and provisional status, not a full exact series of judgments. No gap has been filled by inventing a number.

Research literature: children, parents and actual consequences

Conclusion and application

The studies document stress, limited contact and experience of insufficient involvement among the children and parents studied. The results provide the report with a documented language for losses and for the authorities' knowledge of the need for support. The investigations are not national records of illegal placement and their participants cannot be added to the wrong records of the Ankestyrelsen as new identified victims. Linking requires evidence of the same decision, person, actual breach of justice, time course and consistency.

The report should describe a documented separation and its actual duration even when a control source has only assessed a procedural error. The legal consequences of this particular error are specifically examined in the legal chapters of the report. The loss of the citizen must not be explained as a formal error or reclassified as a crime without verification of the conditions of the crime.

L01. Place without consent - A collection of knowledge, 2025

Original: Anne-Kirstine Mølholt, Emma Hoff Søegaard and Asger Graa Andreasen, VIVE, 2025, 106 PDF pages, ISBN 978-87-7582-406-9. Original report. Author names, title, year and ISBN have been checked on the original's title and colophon pages.

Population and method. The collection of knowledge includes 113 studies after screening 299; 186 were sorted out. The search is Nordic and restricted to Danish, Norwegian, Swedish and English. It cannot be described as a global total. There was no lower annual limit; the search was carried out in 2024. The record of the report indicates 10.982 children and young people placed by the end of 2022, of whom 2.718 were placed without consent, approximately 25%. This is an index at a date, not 10.982 new locations or 2.718 documented illegalities. Original: PDF p. 87 -94, in particular p. 91-93.

The statistical comparisons combine questionnaire waves from 2014-2022. The usual ages are 11, 13, 15 and 17; 2020 includes only 15- and 17-year-olds. Repeated participation across waves cannot be ruled out. A range of response counts across several questions is not a common denominator for all percentages or a count of distinct children. Original:PDF pp. 93-94.

Contact. Table 9.3 compares placement without and with consent. Mother contact weekly is 12 against 19%, every other week 34 against 38%, less often 54 against 44%. Father contact is 12 against 14%, 34 against 31% and 54 against 55%, respectively. The differences in weekly and less frequent maternal contact are statistically significant; the specified father differences are not. The number of responses varies between 2.332 and 3.286 on the contact questions, and the published rounded percentages of the report do not provide the basis for exact group counters. Original: PDF p. 76-78.

Involvement. Among those posted without and with consent 78 as against 72% indicate that the consultant listens; 68 as against 65% trust; 65 as against 59% experience being able to tell about problems; 71 as against 69% feel taken seriously; 61 as against 59% get explanations; 59 as against 57% feel involved. The desire for more involvement is 32 as against 31%, and at least three counsellors' shifts are 38 as against 37%. None of these group differences is referred to as statistically significant. The number of responses varies from 891 to 4.192. Original: PDF p. 85, Table 10.2. The results do not demonstrate that without positive answers everyone has suffered the same legal error.

Consequences. The review of qualitative studies describes children who do not understand the move, lose contact with family and networks or experience not being heard. Parents describe crisis, identity loss, shame, isolation and inadequate support. Experience of regulatory pressure may have an impact on whether consent is perceived as free and on access to assistance. It is a knowledge synthesis of the studies included; whether a concrete consent is invalid requires the original material from each case. Original: PDF p. 54 -61.

L02. Targeted support for parents with placed children - Final evaluation, 2023

Original: Mette Lausten, Hans Skov Kloppenborg, Amanda Engbo and Katrine Iversen, VIVE, 2023, **133 PDF pages**, ISBN 978-87-7582-143-3. Original report; official publication page, 19. January 2023. An earlier file trail with /8784/ is not the functioning original link. The report must not be described as a report of 178 pages.

Coverage. The project included Hallnæs, Herning, Vordingborg and Aarhus in 2020-2022: 111 families with 146 children placed. At the end 23 families had completed the effort, 61 were still active and 27 had stopped early;

the total is 111. Completed interventions lasted an average of 12,5 months. These are intervention participants, not a national or random sample of parents of placed children. Original:PDF pp. 3, 114-115.

Before and after are not all participants. The numbers of questionnaire responses at baseline and the subsequent measurements are 51, 39, 24, 18, 15 and 11. The published response rates in figure 4.1 are 46, 35, 22, 16, 14 and 10 %. These are repeated measurements of participants, not six separate populations. The actual paired comparison between baseline and FU4 over approximately one year comprises **11 parents, 10 %**, even though 15 answered FU4 in isolation. WHO-5 goes from 54,5 to 61,5, total PSOC from 64,5 to 70,3, mastery from 29,8 to 32,5 and satisfaction with the parental role from 34,7 to 37,7. The three main measures first mentioned, WHO-5, total PSOC and satisfaction, are significant at the 5 % level; mastery at the 10 % level. Original: PDF pp. 80-81, figures 4.1-4.2. There is no control group or randomisation; a positive change in these 11 responses is not evidence of a causal improvement for all 111 families. Original: PDF pp. 113-115.

The children's target does not support an overall positive effect claim. SDQ is based on 25 paired responses from locations. The average rises from 14,2 to 15,8, which on the scale represents several difficulties; the difference is significant at 10% level. The proportion outside the normal range ranges from 40 to 36% and the effect on daily function from 21,1 to 31,6%, but these differences are not statistically significant. These are adult responses about children, not 25 children's own answers. Original: PDF p. 84. The report finds no significant change in the contact or well-being of children in contact with the targets studied. All corresponding parents were in contact; it does not document contact with the non-corresponding or all children placed. Original: PDF p. 86 -87.

Selection and the authority's narrative. The municipalities' project managers helped select who could be contacted for interviews. The report describes a risk that they select parents with resources and positive experiences. Parents who had declined or discontinued the intervention were not interviewed. VIVE interviewed five parents and three young people; PwC's additional five parents are also included in the material. The total of 35 interviewees includes professionals and must not be described as 35 affected parents or children. The interviews focused on support; the interviewers deliberately refrained from asking about the placement itself. The survey therefore does not examine the truth, legality or appeal course of the basis for placement. Original: PDF pp. 110-111.

The report's professionals describe that an original negative description of parents could be changed when resources came into focus. It makes it necessary in this report to trace who first provided negative parental information and whether it has been verified; neither the previous nor later municipal characteristics become a proven personal fact by being repeated. Original: PDF p. 83.

L03. Children's and young people's well-being at risk 2023

Original: Mette Lausten, Katrine Iversen and Asger Graa Andreasen, VIVE,**2023**, 182 PDF pages, ISBN 978-87-7582-237-9. Original report. The file trail and subsequent use do not make it a 2024 publication.

Population and answers. The study concerns 11, 13, 15 and 17 years of age. It omits, among other things, young people under the age of young people, custody surrogate and serving as well as unaccompanied minors; it does not cover persons under 11 years of age. The groups are mutually exclusive in order to give priority to placing first. Data were collected from 12 September 2022 to 15 March 2023. Original: PDF p. 161-163.

Group	Population	Extracted	Response	Response
Placed	3.949	2.008	898	44,7
Personal preventive action	5.572	1.608	303	18,8
Family-oriented preventive action	5.386	1.737	370	21,3
§ 11 aid	3.644	1.321	358	27,1
None of the stakes	252.216	2.400	921	38,4
Total	270.767	9.074	2.850	31,4

Source: original PDF p. 163. The register population is not the number of complaints, errors or distinct individuals over 20 years. The representativeness check on PDF p. 168 has its own analysis population of 2.527 children in care and must not

be relabelled as the 3.949 in the sample table. Young people with a physical diagnosis, psychiatric diagnosis and a record of being a victim of violence are underrepresented among respondents in this review. Weighting includes, among other things, age, sex and placement location; it does not document representativeness for every unobserved burden. Original: PDF pp. 168-169.

Contact and self-determination. Among those placed, 82% are in contact with their mother and 58% are in contact with their father, 18% and 42% respectively without contact. Contact includes physical contact, telephone and internet. The total number of responses of the figures, 1.004 and 1.351, includes several study groups and cannot be used to calculate exact numbers placed in each contact situation. Original: PDF p. 101-102.

38% of those placed want more parental contact, 57% consider the scale appropriate and 6% want less; 101% are due to rounding. The specific denominator of the question is not given in this section. About the influence on when the contact takes place, 50% always corresponds, 25% sometimes and 25% never; Figure 6.5 has 783 answers. Where contact takes place: 76% at home with parents, 20% at the location and 14% neutral place, 782 replies with possibility of overlap. Original: PDF p. 103-105.

Search contact: 38% daily / weekly, 16% every other week, 17% monthly and 28% no contact, 732 responses, rounded sum 99%. Original: PDF p. 106. The attachment numbers 48% very strong, 23% strong and 29% less strong on PDF p. 108 have a total denominator of 2.666 across groups. It shall not be used as the number of children placed with lost parentage.

Involvement and a concrete blind angle. The investigation did not allow the applicants to reply that they did not know if they had an advisor. The reason for this was that the investigation was made aware of the consultant in the light of the legal requirement for child interview. As a result, this part of the questionnaire cannot demonstrate that all the persons actually employed had known the consultant, had the conversation or had the right to appeal. It is a concrete measurement design where a legal requirement was used as a prerequisite for fact. Original: PDF p. 135.

44% of those in the Chamber find information on the agenda good, 30% in part, 20% bad and 6% do not know. Explanation of the decision is assessed as good by 58%, partly by 17%, bad by 13% and unknown by 12%. Involvement is assessed as good by 56%, partly by 21%, bad by 14% and unknown by 9%. The denominator 1.400 in the three figures includes several support / placement groups; it cannot be used for exact counters for placed alone. Original: PDF pp. 141-143.

What the report is intended to do with this knowledge

1. Record actual family separation, cessation of contact and loss of participation before assessing redress; a new decision or remittal is not in itself reunification.

2. Distinguish research participants, decision instances and unique affected people. Always state population, responses, question denominator, wave, weighting and exclusions.

3. Please check the authority's original parental and child descriptions. Repeated use of the same description is not independent evidence.

4. Include persons who do not complain, do not respond, interrupt the effort or lose contact as a specific coverage limit. Do not calculate a number for them without documentation.

5. Write explicitly which repair actions are documented: support granted, contact restored, child actually repatriated, compensation paid or liability imposed. A research finding on improved well-being does not replace any of these stages of documentation.

Review scope: This module is based on verification against originals of the methodology, results and consequences sections identified above; it does not declare that all remaining pages of the three reports have been examined. The sources are included in the full report's final bibliography.

Children under 15:detention, seclusion and missing redress

The original opinions document detentions and solitary placements that, according to the regional public prosecutors' own review, did not comply with chapter 75 b of the Administration of Justice Act. A low number of interventions does not remove each child's right to statutory authority, necessity, proportionality and reparation. The oversight response must therefore be followed from the identified departure to actual cessation, an individual accountability response and redress for the child. The published figures end in 2023; the current statistics page expressly states that the annual opinion is no longer published. 2024 and 2025 are therefore not documented zero years. [B15-01-04]

All published annual figures and lawfulness assessments in the originals read

Year	Detention ed	After Chapter 75 b	Not by chapter 75 b	Enerumsanb Rings	Energy not after Chapter 75 b	Source
2016	132	Not specified in the Annex	Not available	21	Not available	B15-05
2017	127	Not specified in the Annex	Not available	16	Not available	B15-05
2018	102	Not specified in the Annex	Not available	10	Not available	B15-05 / 06
2019	122	Not specified in the Annex	Not available	7	Not available	B15-05-07
2020	117	Not specified in the Annex	Not available	5	Not available	B15-05-07
2021	113	88	25	3	3	B15-02
2022	127	97	30	5	5	B15-03
2023	105	87	18	4	4	B15-04

For 2021-2023, the printed annual rows give **345 detention entries, of which 73 were assessed as not compliant with chapter 75 b, and 12 instances of placement alone in a room, all 12 non-compliant**. Placement alone in a room may form part of detention;73+12 therefore does not represent 85 different children or incidents. A person may also appear several times. The figures cannot be deduplicated into counts of children, parents or police officers. According to the original, one person's 2022 detention should properly have been reported in 2021; it is not silently moved. [B15-02-04]

Specific conflict in the demarcation: The 2021- opinion p.5 states that very short identity checks without proper consultation are not already included in the 2021.2022- opinion p.5 link the clarification to January 2022 and says that they are not included in 2022. Both formulations are retained. A secure method break cannot be dated to 2022 alone; the original instructions and records retrieval shall match the actual boundaries of 2021. 2022 includes the police, the NSK and the Faroe Islands; the 2023 method also includes the Greenland Police. The historical graph records give occurrences, no correspondingly proven national error rate. [B15-02, p.5; B15-03, p.5; B15-04, p.4]

Area distribution: all numbers shown, no population emitted

The figures of the 12 Danish circles are reproduced from the charts. Earlier and later annexes overlap the same year; the repeated cells are control versions, not new interventions. The Faroe Islands, Greenland and the NSK are treated separately, where the later graph shows them. [B15-05-07]

Circles	2017	2018	2019	2020	2021	2022	2023
Copenhagen	41	36	34	25	24	24	33
The West Region of Copenhagen	12	4	12	5	11	7	8
Middle and West Zealand	9	2	7	12	11	10	3
Northern Zealand	14	14	7	6	13	16	16
South Zealand / Lolland-Falster	3	0	3	4	12	8	16

Circles	2017	2018	2019	2020	2021	2022	2023
Bornholm	0	0	0	0	0	0	0
North Jutland	4	3	2	6	2	10	9
East Jutland	12	13	27	19	12	15	4
Middle and West Jutland	14	4	9	19	7	10	5
South-East Jutland	10	11	2	1	5	5	3
South and South Jutland	3	3	6	6	8	13	2
Funen	5	12	13	14	8	8	3

Later graph attachments extra circuit	2022	2023	Limitation
Faeroe Islands	1	1	The geographical coverage of previous graphs is not automatically identical
Greenland	Not shown in the 2022 Annex	2	Added in 2023-graph; missing cell is not 0
NSK	0	0	Separate organisation from 2022

The district summs for 2017-2021 correspond to the year of the graph. For 2022, Danish circles give 126 + Faroe Islands 1 = 127; for 2023, Danish circles give 102 + Faroe Islands 1 + Greenland 2 = 105. The distribution of the circle is not a measure of the law-abiding action of each circle: the numerators of the circle of legality are not published in these annexes.

What the action and the delay of the control actually meant

Year	Documented concrete demarcation	Time information	Control reaction and lack of actual Subject-matter
2021	12 detentions in store theft: 2 assessed met, 10 not; subset of 113 / 25. Energy distributed in 3 circles; 9 circles did not use it.	3 detentions over 6 hours were estimated in time in accordance with § 821 a.4. Two enclosures lasted 5 minutes and 1 hour 45 minutes; third duration unknown, total retention 28 minutes.	Discussions and admonitions in three districts; training, local procedures and a new form in June 2022. No public linkage to compensation or personal sanction for the three specific solitary placements.
2022	17 detentions in store theft: 4 assessed met, 13 not; subset of 127 / 30. All 5 enumerated assessed without compliance.	All detentions below 5 hours; over 80% below 3 hours. Energy less than 3,5 hours; one only 5 minutes.	The public prosecutor's follow-up and local discussions are reported; it is not a register of actual child repair.
2023	8 out of 18 detentions in the case of shoplifting. All 4 rooms in 2 circles without compliance. About 20% of reported cases with handcuffs or pepper spray; more than half of the forms are not completed.	All detentions below 6 hours; over 4 / 5 below 3 hours. Energy less than 5 hours; one 25 minutes.	Admonitions, training and ongoing discussions are reported. Incomplete forms weaken verification; the precise number of uses of force and deficient forms cannot be calculated from the rounded formulations.

The originals describe both cases where a short identity check was based, while the subsequent detention did not exist, and cases where, according to the public prosecutor, the intervention could have been carried out after the police law. The latter is an assessment by the authorities of a possible other legal basis, no evidence that the conditions were actually met in each specific case. It shall be tested against the simultaneous fact, justification and timeline of the action. [B15-02-04]

Conclusion: The 12 non-compliant enclosures 2021-2023 are a repeated, original documented verification finding. **Statement by the Authority:** Low levels are mentioned in a positive way, and indentations are reported. **Original proof:** The number, duration and methodology of the annual opinions. **Deficiency:** Neither low incidence nor education shows that individual children got cessation, responsibility assessment and repair. **Rule:** Chapter 75 b of the Code of Procedure

and ECHR Article 5; the child’s special protection also follows from the Convention on the Rights of the Child. **Act:** Detention and separate accommodation despite non-compliance with the conditions applied. **Departure:** The legal basis and extent of the interference with liberty must be examined separately; closing the reporting process does not replace this examination. **Consequence:** The child actually lost freedom of movement and possibly contact, however few the minutes or hours. **Responsibility:** The deciding/implementing authority and the people whose specific duty, act and culpability can be proved. **Demand:** All 73 adverse detention entries and 12 placements alone in a room must be linked in de-identified form to the original decision, duration, use of force, oversight response, report, discipline and compensation decision. Actual criminal responsibility under, for example, § 261 or§ 155 is determined by the documented elements of the act and culpability; the general sentencing comparison in chapter 26 does not operate as an automatic judgment on 73 cases.

For 2006-2015, the previous annual originals are required; for 2016-2020, the annual opinions' legality review is required rather than the total of the later graphs alone. For 2024-2025, the six-monthly reports, any follow-up and explanation of the cessation of public publication are required. The termination of publication is documented; it does not demonstrate that the underlying alert or all control tasks have ceased.

9. Health, Compensation and Psychiatric coercion

Date: 6 October 2026. Public primary sources; compact statistical items, no original PDFs files saved.

1. Disciplinary Board of Health

Annual report 2025, pp. 6-8 and 15-18, Figures 1-5. Percentages: rounded outcome, not exact number of criticisms. Extract: June 2026.

Year	New fist Case	Completed Done		Not critique%	Critical%	Inner pelse%	Reverse etaling%	Months	Genopta Females m aturation; no	Rejected ntoppel see
2022	3.047	4.026	3.414	79	17	2	2	11,4	145	113
2023	3.742	3.637	2.609	78	18	2	2	9,1	112	86
2024	4.253	3.764	2.739	80	16	2	3	8,2	109	85
2025	371	2.365	2.042	79	17	3	2	10,3	107	84

Reimbursement also involves criticism / intensification. Processing time excludes early completed / dialogs. From 2025, complaints will be searched as a starting point for preliminary complaints; therefore, the decrease in the number of cases should not be read as a reduction in errors. Private dental complaints with self-payment are excluded from 2025. Geography also includes the Faroe Islands / Greenland. Public / private employment is not divided. No exact critical, personnel or police reporting figures are identified in the key figures.

Graph values check: The coordinates of the PDFs text are read in memory; Figure 3 indicates the percentage distribution above. Rounding in some years gives 101%. The calculation, for example, 17% × 2.042 would be an estimate based on rounded percentages and should not appear as the exact number of criticisms of the Board. With two percentage columns and the reimbursement of dentists, the definition of exit categories must be respected.

2. The Psychiatric Patient Complaints Board

Annual report 2025, p. 7-9 and 15-18, Figure 1 / 3, Table 2 / 3 / 11 / 12. Cases are complaints; repeated complaints from the same patient are counted again. Decisions are complaints / interventions.

Year	Cases received	Completed cases
2021	1.733	1.633
2022	1.731	1.714
2023	1.725	1.622
2024	1.926	1.288
2025	2.070	2.289

2025 complaint points:2.742 approved; 96 approved/formally unlawful; 419 set aside; 487 withdrawn; 349 dismissed. Total 4.093; on the merits 3.257.

Interventions, 2025	Reality decisions	Set aside
Comfortable medicine	782	158
Door locking	13	2
Physical power	71	9
Return	8	3

Interventions, 2025	Reality decisions	Set aside
Forced treatment	879	146
Coercive restraint,initiation	235	28
Forced admission	541	38
Compulsory detention	728	35
Patient / Screening / Other	0	0
Total	3.257	419

Duration of restraint is excluded from the total above: among 207 approved initiations, 103 durations were approved, 82 set aside and 22 had no duration decision. Average 2025: cases with suspensive effect 6,4 working days; other cases 216,9 calendar days. Rejected/withdrawn cases are excluded from time measurement.

2.1 Self-importance of the denominators

The 419 decisions setting aside interventions are a precise intervention count within table 11. This is not a complete count of all instances of unlawfulness established in the year's material:96 decisions on involuntary admission or compulsory detention are registered as approved, formally unlawful, and 82 durations set aside appear separately. The ordinary approval rate therefore cannot be used as the percentage of fully lawful interventions. A specific intervention may be substantively justified and at the same time formally unlawful during part of the period.

419 + 96 + 82 = 597 adverse partial results in these separate categories. This is a calculated category count,not 597 unique patients or whole cases. Initiation and duration of coercive restraint are two different parts of a decision; the latter must not disappear in a conclusion approving initiation. Other interventions decided upon may also belong to the same patient's complaint.

The full number of coercive interventions never appealed is not the denominator in complaints-board statistics. Withdrawal is not proof of legality either. The statistics document decision outcomes; actual cessation time, physical/psychological harm and compensation require their own documentation. A lengthy appeal case does not automatically mean coercion continued for that whole period, but the wait for review is itself a separate consequence.

2.2 Current documentation problems in the report

The report's own tables have different historical totals and denominators. Historical years must not be mixed without reconciliation: p. 16 states that the 2023 regional total includes dismissals/withdrawals, while 2024-2025 are complaint points determined on the merits. The count of restraint duration also changes for brief restraints. The report's main text has differing rounded rates of adverse findings; use the verifiable fractions instead.

The specific 2025 fraction 419/3.257 is 12,86 %. The annual review uses both 12 % and 13 % for these points of complaint. For duration, 82/207 = 39,61 % when cases without a duration decision are included in the denominator; 82/(103+82) = 44,32 % when only duration decisions are included. The two percentages describe different denominators. There is no reason to conceal the difference or interpret 40 % as an unambiguous proportion of all actual compulsory restraints.

2024-endings have been revised in the report; these must not be added to the previous annual report as additional cases. Old and new publications are versions of the same registration.

3. The Psychiatric Appeal Board

Annual report 2025, p. 7-9, Figure 1-3.

Year	Received	Cases decided	Completed without Decision	Total completed	Amending procedure nt	Months
2021	159	156	7	163	8,4 %	5,8
2022	177	164	15	179	7,47 %	4,3

Year	Received	Cases decided	Completed without Decision	Total completed	Amending procedure nt	Months
2023	173	163	5	168	7,69 %	4,2
2024	162	129	9	138	10,31 %	4,6
2025	239	201	18	219	5,4 %	6,9

2025:296 partial decisions,16 amended;16/296 = 5,405 %. This is not 16/201 cases. The Patient Complaints Board's report, pp. 20–21 states the explicit partial-decision denominator. Deprivation of liberty/restraint reviewed by courts falls outside this appeal board's jurisdiction. Both sides may appeal certain interventions; without a breakdown by direction,amendments must therefore not be called newly established unlawful interventions against the patient.

The national report must keep the first instance's 419 findings setting measures aside, the 16 alterations on appeal and any alterations by courts separate until case IDs and the direction of change are reconciled. An intervention may appear both at first instance and in subsequent review. Such a process is a source chain, not several unique victims.

3.1 Judicial review in 2025

The Patient Complaints Board's report, p. 20, table 13:102 court outcomes;59 upheld,8 amended,34 discontinued and 1 dismissed. The amendments comprise 4 concerning deprivation of liberty and 4 concerning coercive restraint. Upheld:52 concerning deprivation of liberty,6 concerning restraint and 1 concerning both. The discontinued category is placed under "not in the court record". The statistics show neither unique patients nor employees' punishment. These results must not be added to the board's first-instance results without case reconciliation.

4. Penalties, Liability and Data Lack

Disciplinary criticism confirms the actual professional / legal difference within the board's competence. It's not a punishment. The lack of police reporting by a public statistician cannot be reinterpreted as zero notifications. No cross-table of criticism has been found in the controlled ratios,> notification -> indictment -> Judgment -> disciplinary action.

Similarly, no unique patients or number of separate employees have been published in the listed ratios. A disciplinary board case may concern several health professionals; a patient may have several complaints and interventions. The treatment of individuals is part of disciplinary proceedings, so the total figure must not be considered merely as a breach of the law of public servants.

Strongest documented conclusion: Appeals board totals inform the reader about decision outcomes, but a complete account of consequences must also include formal unlawfulness, duration set aside on review and the period until actual remedial action. The accountability track requires the intervention's decision-maker, institution, rule, error, causal significance and specific legal consequence.

Additional necessary data: public / private and geography; exact number of criticisms and unique employees; unique cross-case patients; direction and extent of appeal changes; actual cessation of unlawful interference; compensation / compensation; police notification, indictment and punishment if registered; separate inventory of minors and patients with disabilities.

5. Coverage Control

Verified: the above tables and denominators in the three main 2025 reports. The historical series cover 2021-2025 or 2022-2025, as indicated. These aren't a full 2006-2025 series. The other regional, special and meeting participation figures of the sources are not reproduced here. No individual case or private database has been read.

Health wound series - controlled compact factcards

Status 7 October 2026: developing. The figures describe the registers and the accounting practices of the authorities. They are not in themselves independent evidence that any non-critical treatment was lawful. A decision, notification and person are different entities. Award is not proof of actual payment. This annex complements health responsibilities.

Patient Ombudsperson: Annual Report 2014

Priary source: https://stps.dk/media/9203/07757CE5BA2446F2993D7AD0C97DBF60.pdf - PDF page 20 -21,26,34 -36. Original read in memory. All figures below are cases / decisions, not employees or patients.

Year	Treatment d: no criticism	Criticism	Reality denominator	Justice complaints R Received	Rule of law ed	Early rejected rights complaints;
2011	179	73	252	945	590	153
2012	795	483	1278	1116	752	308
2013	1060	466	1526	981	823	not quantified,
2014	970	527	1497	1106	595	234

Year	Right of appeal: confirmed	Modified	Remitted	Appeals
2012	515	48	67	630
2013	519	90	49	658
2014	401	64	45	510

Treatment-facility total 2014:1537 including 40 refused reopenings. 2013 dismissals are missing due to a change of case-record system. Competence: publicly financed treatment, including private providers. After criticism of a treatment facility, the same course could be brought before the disciplinary board:26 uses in 2011-14. Disciplinary 2014:1490 decisions, 445 with criticism including aggravated criticism; 17,1 months. Psychiatric appeals 2014:176 received, 183 closed, 145 decisions on the merits, 63 upheld, 75 amended, 4 remitted for reconsideration; 6,3 months. The last three merits outcomes are not specified in this compilation. Patient-injury appeals 2014:2870 new, 2969 closed; 372 amendments. Subcategories total 2971; the stated 14,6% has no unambiguous denominator here. Medicinal-product appeals 2014:181 new, 168 closed; 7,5 months.

Own method: keep the above local differences open; do not reconstruct hidden categories based on rounded percentages. The right-appeal table is only a subset of rights decisions. Treatment site / disciplinary should not be summed up to persons.

Patient compensation: treatment damage, version 27 May 2026

Priary source: https://patienterstatningen.dk/Media/639160013922933960/behandlingsskader-2025-hele-landet-27-05-26.pdf - PDF pages 2-9. Original read in memory. Recognition includes several rules on compensation, including the rule of equity; not all recognition has been found to be professional errors.

Year	Notification r	Somatic: rsubstitutionb right decisions	Somatic: recognised;	Somatic: rejected	Psychiatric: replacement; eligibility; Decisions	Psychiatric: recognised;	Psychiatric: rejected	Total recognised;
2021	10770	9541	2363	7178	220	7	213	2370
2022	10974	9312	2055	7257	144	12	132	2067
2023	11789	11831	2753	9078	321	38	283	2791
2024	13316	12461	2790	9671	219	20	199	2810
2025	16621	13479	3431	10048	434	51	383	3482

Year	Granted somatic DKK million	Granted psychiatric mio.kr.	Public somatic hospitals, notified;	Private hospitals, notified	Dentists, notified
2021	664,53	4,75	7170	613	0
2022	697,13	3,14	7285	671	0
2023	820,63	9,50	7763	812	0
2024	832,21	3,44	7939	888	1001
2025	891,65	7,30	9098	975	2261

2025:13913 eligibility decisions; 7212 amount decisions; 898,95 million kroner awarded. Privately insured treatments:785 new, 751 eligibility decisions, 29,4% recognised, 30,61 million kroner awarded. Public/private are mixed in the home-care group; other includes, among other things, prison/police/defence; unspecified also includes early closure and treatment abroad. Dental jurisdiction changed 2024. Minimum rules changed 1/7/2018.

Own method: the two psychiatry / somatic amounts can be summed up within this version, but the same patient may have several reviews and decisions. Public hospitals are a subset; private suppliers can treat publicly funded patients. A series of notifications is not a series of errors and the year of decision is not necessarily the year of damage.

Patienterstatningen: medicine damage, version 27 May 2026

Priary source: https://patienterstatningen.dk/Media/639160017661448385/laegemiddelskader-2025-27-05-26.pdf - PDF page 2-5. Original read in memory.

Year	Notifications	Eligibility decision Oysters	Recognised	Rejected	Recognition p Rotent	DKK million accepted
2021	1632	1128	418	710	37,1	35,6
2022	1546	1611	361	1250	22,4	49,3
2023	1818	1859	382	1477	20,5	52,7
2024	1427	1580	250	1330	15,8	65,6
2025	1238	1149	225	924	19,6	62,9

2025:435 decisions on amounts; 62,87 million kr. awarded. COVID vaccines 2025:186 claims, 306 entitlement decisions, 13,1% recognised. Grounds for rejection in 2025:831 non-compensable injuries, 47 minimum threshold, 31 limitation, 14 other medicinal-product rules, 1 other. Compensation awarded for a side effect is not automatically an employee error.

STPK: historical statistics, separate 2023 version

Priary source: https://www.stpk.dk/media/gdpnn3nn/stpk-i-tal-opdateret-2023.pdf - PDF page 2-8,12-15. The version is not updated; subsequent post-registrations must not overwrite it unnoticed.

Year	Complaint received	Complaint cleared	Months	Dialog Quit t	Anke received	Appeals closed	Anke months
2015	6612	6885	12,8	484	3089	3148	5,3
2016	6335	6953	12,8	513	3203	3122	4,9
2017	6848	6579	13,6	520	3056	3199	5,2
2018	7369	5835	12,8	453	3131	2431	5,4
2019	8146	5485	14,9	304	2988	2769	7,1

Year	Complaint received	Complaint cleared	Months	Dialog Quit t	Anke received	Appeals closed	Anke months
2020	8309	9263	14,0	705	2686	3403	7,2
2021	8972	10855	13,9	918	3006	3019	5,0

Complaints: treatment, disciplinary, rights, compulsory treatment, psychiatric appeal. Appeals: treatment/drug injury, abortion and asbestos/thalidomide first instance. Complaint duration excludes dialogue/early closure; appeal duration covers only treatment/drug injury and excludes early closure. Criticism percentages exclude dismissed reopening requests; disciplinary includes the dental transfer on 1/6/2019.

STPK: current public statistical version, 7 October 2026

Source: https://www.stpk.dk/viden/stpk-i-tal/ - public aggregate display, last updated 5 / 10 / 2026 23: 13: 26UTC. Compact figures in health-public-aggregations.json. Own extracts follow all the view's main filters: only treatment / rights cases and their case groups; exclude test / error records and historical transfers. No personal or case number data have been retrieved.

STPK announces a changed complaint/rights breakdown on 18/2/2026. Treatment-provider/hospital registration before 2023 may be deficient. Repayment following a dental complaint requires prior criticism; outcome categories are the published closure category. Early rejection/closure and dialogue are not included in the denominators for criticism percentages. Historical transfers are excluded;2018 and earlier are clearly incomplete,2019 has only 869 disciplinary criticism classifications. The extract is not used as an unchanged complete historical series of annual originals.

Own method: current precise outcomes are a separate version layer. Compare with the number of annual reports; the exit category of repayment shall not be excluded from critical outcomes or be double counted with the criticism which was its prerequisite. Personal and employee dedup requires separate data.

Precise outstanding aggregate requests

Status after the expansion:the 20-year period has actual accepted-treatment-claim figures in different source versions;STPK activity for 2006-25 is represented. This is not 20 fully harmonised annual outcome tables.

Registrar	Periods / fields that continue to require delivery;	Precise question and vote
Administration of Patient Complaints / STPS, legacy PKN / Patient Offer	2006-10,2013-14,2018-19 exact criticism / insert / indictment / no criticism; place 2018-20; rights 2007-08 / 2018-20	Annual original and current aggregates; date of decision, type of competence, theme of complaint, rejection / dialogue / resumption, public / private and DK / FO / GL; separately historical migrated rows; starting year denominator and all outcome definitions. Determine against reported activity figures and percentage tables without rounding.
Patient Complaints Board, Disciplinary Penalties	2006- 25 combined full criminal follow-up	Requests → end of police / indictment → judgment / penalty per original reference year and year of decision; authority's deduced employees / patients; vote 3 / 2 doctors 2012 / 14 in 2015 statistics as against 4 / 4 in 2016-17.
Patienterstatningen	2006-11 exact treatment-decision denominators/grounds for rejection; drugs 2012; original 2012 annual statistics	Original eligibility decisions/recognised/rejected/annual amounts and current revision version; the same year alone cannot determine the denominator in percentage calculations. Reconcile the 2012 register publication’s 2783/8408 and 9628 claims with the original statistics.
Patient compensation and paying regions / state / insurance companies	All 20 years actual payment / time / persons	Annual book cash payments + interest / repayment, to date, account / final payment date; aggregates for number / p 50 / p 90 / max / main party waiting time; unique patient count per year and entire period, age / disability status, méndegree, death and survivors, public / private / DK / FO / GL. Determine about 8600 interest rate recalculations after H 2022 for actual differences + payment.

Registrar	Periods / fields that continue to require delivery;	Precise question and vote
STPK, Patient Injury Appeals Board / L egg remedy	2006- 07 and 2014- 25 full patient benefit / injury	Each original year's complete outcome denominators including chairperson decisions and early closures;liability/compensation altered to advantage/detriment,remittal and actual new decision/payment;2013 definition as an explicit reference.

Own methodology:these are specific remaining gaps following substantive source checking. No approach to an authority has been sent. Fields not published are not assigned zero; they are included in the account of gaps.

Patient compensation: treatment damage, version 27 June 2022

Source: https://patienterstatningen.dk/Media/637976131119058227/2021-Behandlingsskader-Hele-landet%20-%20tilgangely.pdf - PDF page 3-8. Original read in memory.

Year	Date of notification no	Somatic decisions	Somatic recognised;	Somatic rejected	Psykiatris rod decisions	Psykiatris k recognised;	Psykiatris k rejected	Somatic awarded DKK million	Psykiatris k awarded DKK million
2017	9474	9985	2498	7487	179	15	164	696,99	0,34
2018	9571	9221	2204	7017	145	22	123	678,99	6,40

2020	9618	9086	2108	6978	180	14	166	654,93	3,38
2021	10773	9540	2386	7154	220	8	212	661,88	4,85

Notifications of public somatic hospitals: 6671,6780,7374,6607,7174; private hospitals: 466,418,509,466,613. Somatic speciality 1666,1376,1430,1377,1571; equity rule 674,661,634,618,685. Unit: decisions / notifications / awards, not persons. The table is historical version; 2021 is specifically revised in 2026 version above.

Disciplinary Board: Annual Report 2017, June 2018 version 1.0

Source: https://www.stpk.dk/media/wyug3suu/%C3%A5rsberetning-2017-disciplin%C3%A6rn%C3%A6vnet.pdf - PDF pages 5-11 (physical pages 4-10).

2017:1824 decisions;1373 without criticism;417 criticism;34 admonitions;0 requests for prosecution. 63 requests to reopen:50 rejected,13 reopened. Processing time 2016/2017:15,4/15,4 months. Complaint system 2017:6841 new,4790 admitted,1742 rejected/withdrawn;52% courses of treatment and 48% disciplinary. Geographical jurisdiction Denmark, from 19/12/2011 the Faroe Islands,from 1/10/2012 Greenland. Criticism concerning a course of treatment may be followed by a disciplinary case concerning the same incident.

Year	No criticism%	Critical%	Increase%	Request to bring charges %
2012	68,9	26,1	4,9	0,1
2013	71,5	25,6	2,9	0,0
2014	68,7	27,2	4,0	0,1
2015	72,7	25,4	1,9	0,0
2016	75,0	23,0	2,0	0,0
2017	75,3	22,9	1,9	0,0

Own method: percentages cannot be multiplied to exact numbers. 6841-4790-1742 = 309 is a local unbalanced difference in the annual report's ratios, not evidence of 309 decisions. Historical STPK 2023 version renders 6848 received 2017; hold both versions.

Patient insurance 2006-2011: Analysis version 2012

Source: https://cdn.patienterstatningen.dk/patienterstatningen/Media/637810534607166501/Stigningen%20i%20anmeldelser%20til%20og%20erstatningstilkendegivelser%20fra%20Patienterstatningen%202006-2011%20-%20analyse%20af%20baggrunden%20og%20prognose%20for%202012-2015.pdf - PDF pages 2,10,13(table 3)/web text P12;the document's printed page 13. 2011 figures provisional before the 2012 annual report. Scope:treatment injuries;not the medicinal-product series.

Year	Notifications	Finding in the party's favour	Findings in the party's favour %	Compensation prices at current prices
2006	4861	1482	33,3	380,3
2007	5416	1488	30,5	351,7
2008	5519	1506	32,3	438,0
2009	6319	2379	35,3	562,9
2010	7489	2518	35,8	659,2
2011	7993	2712	34,4	766,3

The denominator for the rate of findings in the party's favour is the year's decisions; the exact decision count is not given in table 3. Several responsible treatment facilities can produce several cases per patient. The source calls amounts compensation awards in the title and payments in the explanation; the cash-payment date/accounting definition is therefore a separate data requirement. No decision counts have been calculated from rounded percentages.

Patienterstatningen 2013- 2017: original 2017 treatment statistics

Source: https://patienterstatningen.dk/Media/637811297745313048/Aarsrapport2017-Behandlingsskader.pdf - PDF page 11,13 -18 (tables 1 -6), read via the index of the source of the prize. The year of notification (s) and the year of decision (s) may not be assimilated.

Year	Notification r	Notified e persons	Somatic decisions	Somatic recognised;	Somatic rejected	Psychiatric disorders recognised;	Total recognised;	Compensation Table 4
2013	9312	7993	9610	3043	6567	12	3055	749,5
2014	10300	8572	9474	2817	6657	48	2865	723,0
2015	9707	8189	9710	2588	7122	39	2627	684,8
2016	10189	8562	10056	2632	7424	38	2670	704,3
2017	9464	8113	9942	2590	7352	15	2605	693,3

Table 5 amounts in 1.000 kroner:749701,723181,684924,704362,693404. Small differences from table 4 are retained.2016 jurisdiction expanded to prisons/remand prisons/defence; care homes/residential facilities from 1/7/2018. The negative psychiatric compensation entry in 2017 is due to repayment following the region's appeal. People are patients reporting claims; not solely favourable findings and not unique across 20 years.

Own methodology: an actual person series now exists within this scope. It must not be summed as unique people across several years or combined with the people in drug claims without shared identity checks. Substantive harm to health depends on the individual recognition rule,not solely a favourable finding.

Patienterstatningen 2013- 2017: original 2017 drug statistics

Source: https://patienterstatningen.dk/Media/637811297700806608/aarsrapport-2017-Laegemiddelskader.pdf - PDF page 7,11 -14 (tables 1,3-7), read via the index of the source of the prize.

Year	Notifications Table 1	Persons Table 1	Decisions Table 4	Recognised Table 4	Rejected Table 4	Replacement 1.000 Cf. Table 6
2013	480	475	480	121	359	46304
2014	593	580	570	176	394	44487
2015	862	857	658	244	414	55698
2016	1003	996	1202	614	588	46428
2017	910	892	967	493	474	50734

Local source differences:2016/2017 table 3 accepted 615/491, while table 4=614/493. 2017 body text 909 notifications,table 1=910. Misdiagnosis/medication errors are counted as treatment, not adverse drug reactions. Table 6 concerns payment year, table 7 closure year. 2017 overall processing time 187 days,56% of decisions within 6 months,8% over 1 year;the administrative 2017 report has 186 days. Vaccine adverse reactions account for a large share of successful claims;this is not automatically employee responsibility.

STPK 2025: the original's 5 annual figures and internal voting

Source: https://www.stpk.dk/media/yu1bsrdl/aarsrapport-2025.pdf - PDF page 8,11-13, figures 1-4. Parallel File https://www.stpk.dk/media/hx0bbsls/stpk-aarsrapport-2025.pdf controlled: same number.

Year	Complaints Figure received 1	Closed Figure 1	Months Figure 2	Anchor received Figure 3	Closed Figure 3	Replacement appeal months Figure 4
2021	9016	10856	14,0	3009	3017	4,8
2022	9393	11381	9,8	2802	2914	4,9
2023	10254	9997	7,8	3327	2909	4,8

2025	12010	10096	8,7	3825	3623	7,2

2025 bread text: complaints 12003 / 10100; anchor 3798 / 3601 (of which 3749 / 3554 replacement anchor). Internal chart / text differences are 7,4,27,22 cases respectively. Post-registration / reopening is indicated as possible deviation from previous reports, but the internal difference is not explained. Complaint reduction without initial closures / psychiatric appeal. Anchorage only treatment / drug damage without initial closures. Competence lapsed dentist / transport 2025.

Own method: graph and bread text are separate observed rows. None of them has been designated as trustees; the authority must reconcile the differences. The table can be used as a figure series with documented local 2025 differences.

Patient complaints 2007-2016: original statistics 2016

Source: https://www.stpk.dk/media/piqepcvt/statistiske-oplysninger-om-patientklager-2016.pdf - May 2017, version 1.0, PDF page 5, table 3(printed 4). Figures are cases,not people.

Year	Newly created complaints	Rejected	Assumed	Done	Current 31 / 12
2007	3969	869	3215	2387	4146
2008	3822	946	2947	3940	3190

Year	Newly created complaints	Rejected	Assumed	Done	Current 31 / 12
2009	4235	1051	3294	3094	3448
2010	4770	949	3910	4221	3045
2011	4896	1350	3104	3276	3235
2012	5411	1576	4676	3732	3663
2013	6123	1630	4377	3901	4255
2014	6945	1906	4993	3768	5137
2015	6743	1878	4182	4569	5238
2016	6436	1820	5211	5119	4815

Source scope:2016 admissions of 5211 exclude 1099 rights cases and 201 psychiatric appeals; admissions exclude psychiatric appeals from 2010. Registration may occur later than receipt. Requests to reopen 2015=146,2016=215; earlier years were not separately registered on a comparable basis. Decisions include more case types than disciplinary criticism.

PDF pages 8-16(printed 7-15): disciplinary 2016 decided 1927, but criticism denominator 1860=1396 without criticism+428 criticism+36 admonitions+0 charges; excluded 66 refusals to reopen+1 other. Treatment facilities 2099 decided, but 2024 criticism denominator=1292 without+732 criticism; excluded 68 reopening cases+7 other. Total 4026 decided, 3884 criticism denominator. Individual partial decisions concerning professionals with criticism 602=559 criticism+43 admonitions; not 602 unique employees. Treatment facilities 760 critical partial decisions; the total of 1362 partial decisions must not be added to cases. The disciplinary criticism denominator includes 95 Greenland/Faroe Islands.

Own method: the columns are the annual activity report, not the same reception cohort; rejected + assumed may not be forced to be newly created. Cases cannot be converted into unique patients, employees or families without a register of identity. The 134 rejected resignations in both types of decision are complaints, but not new material criticisms.

Original 2015 statistics: 2006, rights and critical denominators

Source: https://www.stpk.dk/media/szvji0bv/statistiske-oplysninger-om-patientklager-for-2015.pdf - PDF-page 4, Table 3; page 7-9,19-21 (tables 4-6,16-18).

2006 newly opened 3381, dismissed 686, admitted 2783, decided 2305, pending 3372. The 2007-2015 table 3 figures are identical to the retrospective figures in the 2016 statistics. The 2015 admitted figure of 4182 excludes 1096 rights cases and 162 psychiatric appeals; rights table 16 states 1097 admitted. 2015 disciplinary:1575 decided, 1522 substantive=1108 none+386 criticism+28 admonitions+0 charges; 53 refusals to reopen excluded. The 2015 disciplinary annual report states 415 critical outcomes versus this statistic's 414; no harmonisation. Treatment facilities:2055 decided, 2010 substantive=1247 none+763 criticism; 45 reopening cases excluded. Individual decisions concerning professionals 1760, not unique employees.

Year	Right created	Rejected	Assumed	Done
2009	256	49	251	232
2010	341	5	330	300
2011	945	153	688	590
2012	1130	297	1074	753
2013	1004	82	1240	823
2014	1098	233	1087	595
2015	1118	270	1097	796

2015 rights outcomes:denominator 796=77 remitted+537 approved+81 amended+50 no criticism+46 criticism+5 other. Municipal cases appear under the geographical region.

Own method: Regional declaration 2015 cannot be used as the region's legal responsibility; it includes municipalities. Critics and amended / returneddecisions are different outcomes and can be summed up as separate exit categories within the same population, but remittal for reconsideration does not in itself tell what the new decision was or when the citizen received the help.

Original 2016 statistics: rights and criminal follow-up

Source: https://www.stpk.dk/media/piqepcvt/statistiske-oplysninger-om-patientklager-2016.pdf - PDF-page 18-21 (printed 17-20), tables 15,17,18.

2016 rights cases 1125 created,288 rejected,1099 admitted,921 decided. Denominator 921=139 remitted+530 affirmed+84 altered+85 no criticism+71 criticism+12 other. Municipalities/State/other 297=108 remitted+167 affirmed+15 altered+5 no criticism+1 criticism+1 other. The region is not the same category as in 2015, which placed municipal cases in the region.

Requests to bring charges concerning doctors in 2012-16:4,0,4,0,0(total 8). A separate chiropractor referral in 2012 ended in limitation during police handling. The outcome table gives a total of 1 discontinued prosecution, 2 accepted penalty notices, 4 convictions with a fine/imprisonment, 0 acquittals. Pending annual status 3,0,3,1,1; status repeats across years.

Our methodology:8 requests concerning doctors+1 chiropractor referral do not document 9 unique patients,9 employees or 9 cases involving criticism. Criminal outcomes occur in different years from the requests; annual pending stocks cannot be summed. The police's specific limitation decision is a separate follow-up outcome, not a judgment on the underlying treatment.

Criminal-prosecution series 2006-2015:original 2015 version

Source: https://www.stpk.dk/media/szvji0bv/statistiske-oplysninger-om-patientklager-for-2015.pdf - PDF-page 22-23, tables 19-20.

Year	Doctors: request	Nurses: request
2006	2	0
2007	2	3
2008	0	1
2009	1	1
2010	3	0
2011	1	0
2012	3	0
2013	0	0
2014	2	0
2015	0	0

2015 report number doctors 14 requests, 6 charges dropped, 2 fines adopted, 3 fines, 0 acquitments; nurses 5 requests, 4 quits, 0 fines / sentence. Nursing pending 1 repeat 2011-15. 2016 and 2017 reports change 2012 / 2014 medical requests to 4 / 4 versus 3 / 2 here. No tacit rectification.

Original 2017 statistics: complaints, rights outcomes and follow-up

Source: https://www.stpk.dk/media/5tibzo42/statistiske-oplysninger-om-patientklager-2017.pdf - June 2018 version 1.0, PDF-page 4-8,18-19; tables 1,3-5,17-18.

2017 newly opened 6841, dismissed 1742, admitted 4790, decided 4836, pending 4927, requests to reopen 202. Admissions exclude 994 rights cases+144 psychiatric appeals. Decided=1875 disciplinary+1950 treatment-facility+152 psychiatric appeals+859 rights cases. Disciplinary denominator 1824=1373 no criticism+417 criticism+34 aggravated criticism+0 prosecution; 51 reopening cases excluded (the original board report gives 50 refused reopenings). Treatment-facility denominator 1905=1306 no criticism+599 criticism; 45 reopening cases excluded. Rights 859=52 remitted for reconsideration+536 upheld+69 amended+115 no criticism+68 criticism+19 other. Of these, municipalities/State/other 284=26+234+14+0+4+6. Average 13,6 months for 4836 decisions; dialogue time included from 2016. Criminal-case total for 2012-17, doctors: 8 requests, 2 discontinued (2017 adds 1),2 penalty notices, 4 criminal convictions, 0 acquittals; 2017 pending 0. Separate chiropractor case in 2012: limitation during police handling.

Own method: Annual denominator 4836 decisions are not the historical 2023 layer 6579 closed complaints 2017; termination includes multiple closure outcomes. Both are actual statements with different boundaries.

Patienterstatningen 2017-2021: original drug version 30 June 2022

Source: https://patienterstatningen.dk/Media/63797613120345667 9/2021-L%C3%A6gemiddelskader-Hele-landet%20-% 20available .pdf - PDF page 2 -5.

Year	Notifications	Eligibility decision Oysters	Recognised	Rejected	Findings in the party's favour %	DKK million accepted
2017	915	968	492	476	50,8	50,4
2018	1037	905	421	484	46,5	35,9
2019	1092	1037	475	562	45,8	27,8
2020	1015	972	446	526	45,9	37,0
2021	1632	1128	420	708	37,2	36,2

2021 amount decisions 517; COVID 616 claims, 152 eligibility decisions, 8,6% recognised. 2021 combined treatment/drug figures in this report's text:12404 reported, 10887 eligibility decisions, 25,8% recognised, 5882 amount decisions, 702,33 million kroner. The 27. June 2022 treatment report's 2021 figures+30. June drug figures yield 12405/10888/702,93:version differences retained. The current 2026 version has 2021 drug claims 418 recognised versus 420 here.

Patient compensation 2017: Annual administrative report and payment time

Source: https://patienterstatningen.dk/Media/637811297663901902/aarsrapport-administrativ-2017.pdf - PDF page 6-8; indexed text of the original.

2017 received 10391=9483 treatment injuries+908 drug injuries; 11154 eligibility decisions; 11452 closed. Awarded, million kroner, 2015/16/17:treatment 691,0/713,0/695,6; drugs 55,7/46,0/50,7; total 746,7/759,0/746,3; excluding interest. 2017 average 186 days to an eligibility decision; 242 days from recognition to final payment. Advance payment may occur earlier. Annual Statistics 2017 has 187 days and different counts; the versions are kept separate.

Own method: 242 days is an actual published time goal towards payment, but an average period is not evidence of how long all patients were waiting or whether all decisions were implemented. Additional amounts in the table may not be automatically renamed into the cash payment of the year.

Disciplinary Board 2011- 2012: original annual reports

2011 source:https://www.ft.dk/samling/20111/almdel/SUU/bilag/344/1131055/index.htm - printed pages 8-9,table 1. 2437 decided=1721 no criticism+629 criticism+86 admonitions+1 request to bring charges; 716 critical outcomes including aggravated criticism/prosecution. Originally 70,6% no criticism/25,8% criticism; the later 2015-17 retrospective distribution for 2011 of 72,4/24,0/3,5/0,1 differs and is retained.

2012 source: https://www.ft.dk/samling/20121/almdel/suu/bilag/363/1264080/index.htm - printed pages 8-10, table 1. 1702 decided=1171 none+444 criticism+83 admonitions+4 requests for prosecution;531 critical. The table's prosecution percentage 0,1 does not match 4/1702;later 2016 statistics 0,2. 90 requests to reopen:70 rejected,20 reopened(2 none→criticism,8

criticism → none, 4 criticism maintained, 6 none maintained). 13,5 month average all; 9,7 months new cases from 2011. By 2012 decisions 439 concern inherited cases; 226 remainder from originally 3045.

Own method: inherited cases are already part of the decision number; they must not be added again. Resumption may change the previous legal classification without a new patient. The 2012 version retrospective 2011 percentages summed 104,5%; the retrospective is not used for person or end-of-life counting.

Disciplinary Board 2020: Original version layer

Source: https://www.stpk.dk/media/z41lc1wx/sundhedsv%C3%A6senets-disciplin%C3%A6rn%C3%A6vn-2020.pdf - PDF-page 11,13-14 (printed 10,12-13).

2020 substantive decisions 2339 excluding refusals to reopen; outcome percentages 78,5 none/20,2 criticism/1,0 admonition/0,3 request for prosecution. Exact category counts not printed. New treatment complaints 8160 against 7640 in 2019;52% treatment provider,48% individual. Disciplinary processing time 2017-20:15,3/15,1/17,1/16,0 months. Requests to reopen 2017-20=62/110/68/107; refused 51/87/62/85;2020 reopened 22. The original 2017 annual report had 63/50 and 15,4 months:a version difference. The statement on dental jurisdiction gives 1. June 2018 in the 2020 source against 1. June 2019 in the 2023 statistical layer; the legal date must be checked separately.

Own methodology:the 2026 register aggregates' classification of criticism for 2020 totals 2368(1858+477+28+5 repayment),whereas 2019 has only 869.2018 has only 25 registrations within this scope. Exclusion of historical transfers prevents these early public register extracts from being presented as complete original annual counts. Rounded prosecution percentages are not converted into exact requests.

Patient compensation 2012: primary registry survey 2015

Source: Tilma and others (2015), dois10.2147 / CLEP.S84162, https://pmc.ncbi.nlm.nih.gov/articles/PMC4514350/ - section DPCA, DPCA database (Figure 1-2), Data link possibilities; co-author from Patienterstatningen. Original registry analysis, unchecked annual report 2012.

2012 claims 9628. Closed treatment-injury claims 8408,recognised 2783(33,1%);thus 5625 other closed claims by own subtraction,not automatically all rejected. The figure distributes closed claims by calendar year. The register has CPR,case number,injury/decision date,death,death resulting from treatment,degree of permanent impairment and loss of earning capacity. The DPSD incident register had no CPR linkage in the source's 2015 description. Grounds for recognition include the specialist rule and the reasonableness rule. Original 2012 annual-statistics reference: http://patienterstatningen.dk/da/Udgivels
er-og-tal/Statistik/~/media/Files/Statistik/Statistik%202012/hel%C3%A5rstal_2010_2012_12.ashx - not available in the current web check.

Own methodology:2012 is now represented by actual register figures with explicit publication/scope. The list of recognised treatment injuries for 2006-25 may be assembled with version breaks, but is not a homogeneous unchanged annual-report series. The scope of the 2012 figure of 9628 claims must be reconciled in the original statistics rather than assumed identical to closed treatment claims.

Current register version 2026: exact outcomes 2021-2025

Source: https://www.stpk.dk/viden/stpk-i-tal/ - compact public aggregate extract health -public -aggregation.json, registration version 5 October 2026.

Year	Type of action	No critique	Criticism	Indentation	Repayment g	Classification name;
2021	Disciplinary Board cases	2205	527	50	84	2866
2021	Pre-trade claim	2424	1013	0	26	3463
2022	Disciplinary Board cases	2613	548	64	63	3288
2022	Pre-trade claim	2641	1183	0	21	3845
2023	Disciplinary Board cases	1971	464	43	38	2516
2023	Pre-trade claim	2159	1043	0	33	3235

Year	Type of action	No critique	Criticism	Indentation	Repayment g	Classification name;
2024	Disciplinary Board cases	2117	410	40	74	2641
2024	Pre-trade claim	2432	984	0	22	3438
2025	Disciplinary Board cases	1540	329	49	40	1958
2025	Pre-trade claim	2955	1075	0	18	4048

Own methodology: the column sum is our recalculation of the four separately published closure categories, not an authority-stated substantive total. Other outcomes, closures, reopenings, dialogue and any special police process fall outside this classification denominator. Repayment is counted once and, according to the publication's methodology, is based on criticism. These figures must not be added to the same years in the annual reports.

Year	Rights: tiltr dead	Modified	Remitted	No critique	Criticism	These 5 the outcome room;
2021	562	107	76	87	48	880
2022	466	97	57	71	97	788

2025	175	54	36	47	97	409

Patient Injury Appeals Board 2008-2012:original 2012 decision series

Source: https://www.ft.dk/samling/20121/almdel/suu/bilag/303/1249963/index.htm - printed pages 9-11, tables 1-2. Table text says 2001-2011, but the actual rows are 2008-2012.

Year	Acceded	Remitted	Responsibilities ring	Replacement change	Other	Defeat fist Conference of Presidents	Exposed	Considered at board meeting
2008	1154	16	126	71	1	1368	66	1434
2009	1177	9	145	71	1	1403	54	1457
2010	1315	20	142	88	2	1567	51	1618
2011	1419	13	125	70	41	1668	46	1714
2012	1595	13	137	92	48	1885	62	1947

2012 chairperson decisions 261=128 affirmed+5 remitted+1 liability+4 compensation+123 other;closed without a decision 127;total closed 2273. Received 2417;5,2 months including time for Patientforsikringen's opinion. 2011 Other definition changes. 2012 Faroese jurisdiction for treatment from 1/1/2012.

Own method: the denominator alone is a reduced denominator. 2012 full decision denominator 2146 = 1885 + 261; correction result 252 = 242 Board meeting + 10 Chairman. Change may decrease / discontinue replacement; the table does not share patient benefit from patient injury.

Patientskadeankenævnet 2013:new ESDH division

Source: https://www.ft.dk/samling/20131/almdel/suu/bilag/599/1398320/index.htm - printed pages 8-11, Table 1.

2013 received 2677, closed 2336, decisions 2224, without decision 112, chairperson decisions 329. Substantive determination 2009=1735 affirmed(1181 liability+369 compensation+185 other)+274 altered(65 liability to detriment,102 liability to advantage,15 other altered,69 compensation increases,5 reductions,18 remitted). Other 215=41 deadline rejections+21

resumption + 118 none -resumption + 35 other. Internal time 5,17 months excl. Private financing under force 1 / 9 / 2013 versus previous plan 1 / 7 / 2013.

Own methodology: of 274 amendments, 171 favour the patient and 70 are adverse under express categories; 15 other+18 remitted are kept separate. Reopening 21 and 118 refusals are other decisions, not new established treatment errors. 2013 includes all chair's decisions; version break from the reduced board-meeting tables before 2013.

Patienterstatningen 2025: Annual Administrative Report

Source: https://patienterstatningen.dk/Media/639268050936165809/aarsrapport_2025_patienterstatningen.pdf - PDF-page 11-12 (printed 10-11), Table 2.

2025 decisions on amounts 7672 against 6939 in 2024; closed 14388. Awards in million kr. for 2023/24/25:treatment 833,8/838,6/898,3; medicinal products 52,7/65,6/62,8; total 886,5/904,2/961,1. The main text discusses 2022-24,but the table rows are 2023-25. PDF page 12 gives judgment conclusion in 2022,but original page 13 identifies a judgment of 4. December 2020; an internal year conflict concerning approximately 8600 recalculation cases. Approximately 75% receive full/partial compensation on recognition. The target of 200 days from recognition→final payment was met by the end of 2024; the exact 2025 duration is not stated. The quarterly figure shows times, but no exact point labels.

Our methodology:approximately 8600 recalculations constitute specific State knowledge/follow-up, not 8600 unique people or necessarily the same interest deficiency in each case. Table 2 is called compensation payments in the body text, but the table itself says awarded; bank payments or booked payments must be reconciled before analysis of cash amounts.

STPS 2018 / STPK 2019: original connections and breaks

2018 source: https://www.stpk.dk/media/3kuppomv/%C3%A5rsrapport-2018-stps.pdf - PDF pages 13-14(printed 12-13). Complaints 7397 received,5882 closed,6476 pending,12,8 months. Compensation appeals 3131 received,2432 closed=2244 treatment+185 medicinal product+3 other;approximately 1700 pending,5,4 months. 2018 complaint closures/inflow differ from the later historical version 5835/7369.

2019 source: https://www.stpk.dk/media/fqmnid5k/%C3%A5rsrapport-2019.pdf - pages 8-9. Complaints 7640 received, 5485 completed including dialogue, 9129 pending, 14,9 months. Anker 2988 received, 2769 completed = 2569 treatment + 169 drug + 31 others; 2120 verserendeink.ca 500 lawsuits; 7,1 months. 2019 asbestos 12 definitely, 7 awarded; thalidomide 16 treated, 11 paid out January 2020. May 2019 journal system change: two systems / different registration practices. Historical 2023 version 8146 complaints received 2019 against 7640 here.

Own methodology: thalidomide 16 and 11 have the same scope at treatment/payment stages and must not be added as 27 victims. Pending appeals include court proceedings; backlog is not solely administrative waiting time.

Patient complaint time 2006-2017: controlled original coordinates

Source: https://www.stpk.dk/media/5tibzo42/statistiske-oplysninger-om-patientklager-2017.pdf - PDF page 7(printed 6),figure 2. Figures verified by increasing x-position:1995 starts at 112,5 points;2006 x 314,5;2017 x 516,5. Not merely text-extraction order.

Year	Average months
2006	13,8
2007	15,9
2008	15,1
2009	13,8
2010	12,7
2011	11,3
2012	10,2
2013	13,3

Year	Average months
2014	13,3
2015	12,8
2016	12,4
2017	13,6

From 2006,time is measured from opening rather than admission. From 2016,dialogue time is included. Denominator 2017=4836 decisions(psychiatric appeal, disciplinary, facility, rights),not all closures. The original 2015 report's body text has 12,7 versus a later 12,8 in this graph. A later historical 2023 layer has 2016=12,8 with a different scope. An average is not the actual healthcare treatment delay for each patient.

Health module delivery status 7 October 2026

Actual figures have been provided, not merely source lists: patient complaints 2006-17 new/dismissed/admitted/decided/backlog; STPK 2015-25 received/closed/time in specific versions; criticism of professionals and treatment facilities 2011-17 selected originals and 2021-25 exact current register categories; 2006-15 requests for criminal prosecution and 2012-17 follow-up; patient compensation 2006-25 recognised treatment injuries with the 2012 primary register study; 2013-25 drug outcomes; 2013-17 people reporting claims; 2017 actual assessment time versus final payment; 2008-13 compensation appeal outcomes, including outcomes favourable/adverse to patients in 2013. Outstanding items appear in the precise request table above.

sundhed-20aar-kompakt.json has 20 rows with actual recognised treatment injuries, URL, locator, version layer, status and person/public-employee flags. No sum of unique people over 20 years has been calculated. The sum of the selected annual recognition rows, 48698,is solely our mixed-version decision sum and must not be described as 48698 unique errors or people.

Historical registry supplement 7 October 2026

See patient insurance-historical-registertal.md / .json: actual drug decision / recognition series 2006-2011 and annual unique notifiers, both injury areas, 2006-2011 in original version 9 March 2012. Table 20, page 46, closes the specific pharmaceutical denominators; Table 6, page 19, expands the person-series. Table 21 is forecast, and 2012 drug outcomes remain a separate residue.

Psychiatric compulsion: original annual outages and boundaries 2006-2025

Updated October 7, 2026. Public originals read in memory. Version rows are alternative statements of the same year and shall not be summed. JSON contains all controlled compact number cells, sources and locators.

Interpretation of units

Own method assessment: A complaint is not a unique patient. Several complaints from the same patient and several interventions per complaint are counted separately. Implementation and duration are autonomous parts of decision-making. The Court of First Instance, the Appeals Board and the Court of Justice shall not be summed up as unique unlawful interference without a case-coupling. Unchallenged coercion is outside the complaint population. Revocation / rejection does not prove legality.

Versionsdivided case series

Year	Version	Received	Completed	Revocated	Rejected	Reality / meeting case
2011	P13	1293	-	159	51	1083
2012	P13	1365	-	166	41	1158
2012	P14	1365	-	166	41	1158

2023	A25	173	163	5	-	-	-	-	-	4.2
2024	A24	162	129	9	223	-	23	-	-	4.6
2024	A25	162	129	9	-	-	-	-	-	4.6
2025	A25	239	201	18	296	-	16	-	-	6.9

2014-2017 also contains case outcomes in JSON:2014 approved 63/amended 75/remitted 4 versus 145 cases determined on the merits; 2015 93/44/2 versus 142; 2016 115/47/5 versus 172; 2017 126/22/2/annulled 2 versus 152. The first three years' category sums are respectively 3/3/5 below the total. Without documentation, the difference cannot be called a particular decision type.

Version and source check: A 21(version 2 January 2023) states 181 approved parts, 17 amended, 4 remitted, 1 annulled versus 202 total; the figure 89,11% corresponds to 180 approved. A 22's pie chart states 65,49/30,99/1,41%,but the text 219/18/4 of 241. Both discrepancies are retained. A 25 revises 2021-23 received cases from 161/174/171 to 159/177/173 and substantive cases from 157/162/165 to 156/164/163. Original 2022 time 4,2 months becomes 4,3 in A 25. A 17 time 4,8 months becomes 4,99 in A 18. Undocumented cells remain blank, not 0.

Own methodology:amended elements are not automatically findings in the patient's favour; both the patient and hospital authority may appeal. Case outcomes and intervention outcomes cannot be added together. Without consideration on the merits primarily covers withdrawals, but is not documented as withdrawals alone. Total closed cases from 2019 is the own sum of decisions on the merits and cases without consideration on the merits, and the row is marked accordingly in JSON.

Key problems encountered in counting

• P17 p. 23:50 durations set aside among 170 approved restraint initiations in 2017 are omitted from the main statistics. P17 p. 14:the 2015 time is 17 days with an exceptional case/226 decisions, 10 without; 2017 changes the weighting to one code per case.

• P 17-P 22: partially set-aside judgments are counted as upheld. P 22 p.18: an appeal with both upheld and amended interventions may be counted as upheld. P 23 p.14 changes judgment categories and makes mixed outcomes visible.

• P19 table 1 calls 1.452 incoming, but the footnote states actual inflow of 1.589; 1.452 is processed cases. The 2017 breakdown by type has 383 findings setting measures aside, the regional table 382; 2019 approvals 1.920 by type versus 1.921 regionally. The differences are retained.

• P22 manual urban-type tables differ from regional totals. Duration of restraint is separated and must not be set to zero when unpublished.

• P23:3.950 complaint points, 2.484 approved, 497 set aside, 640 withdrawn, 329 dismissed. Regional denominator 3.939. Bytype total 2.848 and 497 set aside in the original; the next version gives 430 excluding duration. Categories for small interventions are combined under other.

• P 24: figure 7.1 has 1.713 approved, 46 formally unlawful, 279 set aside, 280 withdrawn, 148 dismissed =2.466. Sum of substantive figure categories =2.038; regionally 2.030/1.751 approved is printed. Bytype total 2.023/1.750,set aside 277 with separate 4 hand/foot straps, but P 25 states 273. No forced reconciliation.

• P25 figure 3:2.742 approved, 96 formally unlawful, 419 set aside, 487 withdrawn, 349 dismissed = 4.093; on the merits 3.257. The approval rate includes formally unlawful deprivations of liberty. 2024 intake/closures revised from 1.920/1.287 to 1.926/1.288.

• P25 table 12:2023/2024/2025 durations set aside 54/39/82 among 124/98/207 approved initiations; approved duration 66/53/103,no decision 4/6/22. The P23 original has 67 durations set aside; the P24 original shows 0. From 2025,duration is registered only above 4 hours. Breaks in version/scope are retained.

• From 2024, the approval denominator will be changed to material complaints; rejected / withdrawn shall be omitted. Time shall be divided into working days for suspensive appeals and calendar days for other material cases only. 2024 = 6,7 / 85,6; 2025 = 6,4 / 216,9. Average is not the number of breaks or the length of actually continuing coercion.

Own impact and responsibility assessment

Formal illegality and unlawful maintenance are real autonomous deviations which a materially approved implementation does not eliminate. A full statement shall include all those parts of the decision and the date of effective termination. An annual outcome may provide evidence of the Board's findings, but only cannot determine the amount of the person's loss, the extent of the damage, the employee's debt or compensation paid. Later confirmation requires verification of the original's parts and scope, especially by the old mixed counting gel.

Sources and concrete residual controls

• P17: 2017-original, physical page 9-14, 21-26. Status original checked for the statistical sections given.

• P18: 2018-original, physical pages 4-12. Status original checked for the statistical sections given.

• P21: 2021 -original, physical pages 5-7,11-16. Status original checked for the statistical sections given.

• A14: 2014-original, physical page 7.

• A15: 2015-original, physical page 7.

• A16: 2016-original, physical page 8.

• A17: 2017-original, physical page 8.

• A18: 2018-original, physical page 8.

• A19: 2019-original, physical page 8-9.

• A20: 2020 -original, physical page 8-9.

• A21: 2021 -original, physical page 8-9.

• A22: 2022-original, physical page 8-10. Status original checked for the statistical sections given.

• A23: 2023-original, physical page 7-9.

• A24: 2024-original, physical page 7-8.

• A25: 2025-original, physical page 7-9.

• N10: 2010- original, physical page printed 4-12. Status original checked for the statistical sections given.

• M11: 2011-original, physical page 8-10,15-16,19. Status original checked for the statistical sections given.

• M12: 2012-original, physical page 8-9,14-15. Status original checked for the statistical sections given.

• H12: 2012-original, physical page 9-10,16-19. Status original checked for the statistical sections given.

• 2006-2010,PPKN first instance:national and all regional outcomes are missing; the 2007 reform and national unit administration in 2013 must not be homogenised. Ask STPK/Nævnenes Hus and the National Archives for all predecessor annual reports and registration manuals..

• 2006-2013,central psychiatric appeal: full original tables from the body itself are missing for 2006-13,apart from 2013 received/time from A14. PP retrospective received figures are not the appeal board’s annual output. Ask STPK for Patientklagenævnet 2006-10 and Psykiatrisk Ankenævn 2011-13,including jurisdictional changes by coercion type..

• 2006-2025, unique patients, employees, actual cessation and compensation: Annual tables do not contain person dedup, actual cessation time or compensation payment; requires data coupling per complaint and intervention.

Accidental events: controlled annual data, demarcation and follow-up

All 20 years now have at least one concrete public figure. It is a source-divided 20-year review, not one harmonised series of public servants' illegality. The statistics, methodology and regional annexes of the 2007 annual original are now checked in public archives; 2009 remains the figures of the ministerial debt, while the actual annual original has not been provided. 2006 / 2008 / 2010 are original publications read in public mirror, verified by colophon, publisher and title. 2012 autoPart 1 is now all 18 pages controlled with separate creation / closing sections; 2012 / 13 retrospective tables in later originals are preserved as other versions. See dpsd2007-2012-historical original.md / .json.

1. Year by year

Year	Population / version	Number	Locator / source
2006	primary approach / 2006	15,556	printed 3 / 7 [UTH 2006]
2007	primary approach to regions / 2007 original	20,368	PDF3 / 6 [DPSD2007OR]; same number also in [UTH2007]
2007	secondary / analysed approach to SST / 2007 original	19,217	PDF3 / 7 [DPSD2007OR]; overlap with primary
2008	primary approach / 2008	21,279	printed 6-11 [UTH 2008],
2009	secondary / analysed at SST / 2009	25,249	SUU 583, response 2010, last text section [UTH 2009]
2010	primary approach / 2010	41,501	printed 7-15 [UTH 2010],
2011	primary approach / 2011	98,669	PDF 4 / 6-14 [UTH 2011]
2012	newly created / 2012 egenoriginal	155,791	PDF4 / 5 / 7 [DPSD2012OR]

2025	year of creation, subsequently closed / anonymised / 2025	589,888	PDF 11-12 Figure 1 [UTH 2025]

No sum of the above: 2009 is secondary, other early years primary, and later years include selected closed population. Details, all controlled version rows and population overlap are in the accompanying JSON.

2. Central version and selection breaks

• 2006: 15.556 primary, 12.370 secondary; 320 SAC 3,52 analytical sums. 2008: 21.279 / 19.866; 324 SAC 3,73 summaries; 21 other summaries. SAC 3 combines severity and frequency and cannot be counted as death.

• 2010: 41.501 primary, 34.418 secondary; old system 34.208 of which 492 SAC 3; new 210 of which 5 severe + 1 fatal. New categories may overlap.

• 2011: 98.669 primary; preface 78.038 finished against bread text 78.036. The classification table omits hospital reports January-May in old version. Approximately 20.600 in the task's backlog have not been documented 90-day overruns. Patient / relative reports 693 as against 255 completed in September-December.

• 2017 uses year of creation, 2018 year of closure, 2019 year of first closure and 2021 returns to year of creation. Only closed/anonymised data are included centrally; reopened cases are excluded at data extraction. The 2017 creations of 211.873 and closures of 197.722 must not be conflated.

• 2021 original 326.416,2022 retro 334.712,2023 retro 335.381,2024 retro 335.654,2025 retro 336.083 for the same 2021.2024 original 489.361 versus 2025 retro 501.969. Keep each version without summing them.

* From 1 July 2023, the reporting obligation, actual / possible consistency and the geographical / organisational scope of the collection report will be changed; 2024 the types of events will be extended further. 2025 batch 478.356 plus individual 111.532 = 589.888.

3. Public and private cannot be read as employees

Hospital covers public hospitals. The municipality also includes private social housing services; other regions include practitioners and pharmacies. The location groups are therefore not a full breakdown after public / private employment. The boundaries are checked in 2014 PDF 22,2015 PDF 17,2016 PDF 17,2021 PDF 24 and 2023 PDF 14.

4. Actual injury and potential injury

Period / version	None / unknown	Easier / moderate	Serious	Fatal	Population
2023 first semester	50.434	20.277 mild + 10.347 moderate	1.613	312	82.983; PDF 17 fig 9
2023 second half	44.882	21.980	2.173	273	69.308; PDF 17 fig 10
2024 original	82.032	39.808	5.356	654	127.850; PDF 16 fig 8
2025 original	71.549	34.503	4.843	637	111.532; PDF 17 fig 8

2024 potentially fatal 6.010 and 2025 potentially fatal 2.864 are variables other than 654 / 637 actually fatal. 2025 potentially severe 27.940 should also not be added to 4.843 for unique events. Two registrations of the same patient may occur; no nationwide person dedup is documented here.

5. Documented Follow-Up Problem

DPSD 2021 PDF 35 / printed 34, section 4.11: by the end of 2020 around 70.000 events were not formally completed locally by the deadline 90 days. By request, the Board instructed municipalities, regions and private individuals to conclude. Their explanation of learning already carried out is institutional statements. The original does not provide a controlled number of self-employed patients, individual convictions or effects on injuries.

6. Numbering and further necessary proof

2014 original figure 4: 2013 sectoral rows sum 165.356 against bread text 164.850, difference 506; 2014 sum 167.084 versus 167.098, difference − 14. The source does not explain these differences; they are preserved. In 2023, half-year figures 82.983 + 69.308 = 152.291, while the annual figure indicates 152.290 individual events. The difference on one event is an internal source deviation that is not corrected by assumption. 2016 Table 2 sum 170.708 plus 2.000 batch = 172.708; 2018 Table 2 sum 178.220 plus 16.953 batch = 195.173.2015 Table 2 sum 175.243.

The statistical/methodological section and complete regional annex of the 2007 annual original, together with 2012 Part 1, have now been checked. The 2009/2013 annual originals remain precise retrieval items in dpsd2009-historisk-original.md and dpsd2013-historisk-original.md;2012 Part 2/learning annexes are separate outstanding items, as are local contribution reports for 2014/15 and precise severity cells in older annual figures. For missing registration variables, Sundhedsvæsenets Kvalitetsinstitut as DPSD administrator and historically STPS/SST must be asked for version-preserved annual tables, metadata for created/first completed/last completed/closed, aggregate reporting, local 90-day overruns and public/private operation. A separate lawfully pseudonymised deduplication is necessary for individuals; reporting alone does not prove disciplinary or criminal culpability. No request has been sent.

DPSD 2007 and 2012: historical annual originals, table figures and selection

The 2007 original 67 pages are provided in public archives; statistical sections, risk method and the entire regional annex have been checked. 2012Part 1: all 18 pages checked. Table names, units and original cells below do not replace the versions of other annual editions. 2007Table I / II and the tables of the RHannex as well as the 2012Figure 3 / 6 and Table 1-3 are visually controlled directly in memory. No original text / PDF / image is stored locally.

All controlled table rows

2007 Annual Report - PDFside 3

Unit: reports / summaries; mentions: -. Different and overlapping steps. Secondary after local treatment; 90 days' agreement, not 20368 + 19217 persons.

Cut	Number
Primary	20368

2012	T4 Rapporteurs	124234+1200+436=125870	Adjust

Method, concrete consistency and evidence requirements

2007 archive version: the version date of the colophon is empty as XX.March 2008, version 1,0. No other version with a completed date has been checked. 2007: primary / secondary has different treatment times; the agreement indicates 90 days. SACC3 may include both permanent disability and death as well as frequency; no death / disability union can be formed. The 37 unidentifiable reports of the Equipment Committee show a concrete barrier to follow-up: anonymisation / lack of equipment information and time until discarded / repaired equipment. OuH20 plans / 9 full / 3 partial is follow-up control, not proof of actual prevention of new injuries. [DPSD2007OR, PDF6 / 36 / 45-46 / 59]

2012: public hospitals are listed separately; municipal locations and other regional locations are not employment status. Classification percentages use classified cases, severity uses completed/closed cases, and the reporter total uses a larger closure subset. The institutional explanation of the increase as cultural change is not an independent measurement of actual error frequency. Healthcare professionals/patients/relatives 124234/1200/436 describe the reporter’s role, not unique injured people. [DPSD2012OR, PDF4/7/9-11/15]

Own evidence: Documented statistical / follow-up failures must not be obscured by an overall learning tale. Each specific event requires initial record, report, simultaneous examination, responsible actors, time for treatment and documented actual damage. A subsequent action plan does not document timely treatment, compensation or concrete employee responsibility. The requirement is version-preserved tables, separation, stable event key and legal person coupling as well as concrete compliance / responsibility logs. No new numbers of people are derived here.

Documented errors and separate hypotheses

Documented: the internal number deviations shown; non-identifiable equipment and the reported limitations in case processing; incomplete implementation of the defined OUH plan committee. Hypotheses requiring additional original proof: which equipment / treatment events involved individual responsibility, actual death / permanent disability and causality; whether the annual / sector difference is due to cohort filters; whether concrete plans were subsequently implemented and damage replaced.

Precise residues

2007Figure 1-3 has columns without exact data cells; national quarterly figures may not be guessed. 2012Figure 1 / 2 a / 2 b / 4 / 5 / 7 / 8 / 9 requires underlying graph data for exact full series; several are columns without number labels. 2012Part 2 and the Learning Annex are separate originals; read Part 1 is not full control of the other two parts. 2009 / 2013 own annual originals shall be aligned in separate access modules. Non-public person / error / sanction coupling is a separate registry requirement. No message / data request has been sent.

DPSD 2009 - control of the official source path of the original report

Checked on 7. October 2026. A specific examination of the Danish Health Authority's *Annual Report 2009 - DPSD Danish Patient Safety Database*. The original report's PDF was **not read** in this check. This is a specific source gap; finding an original link or archive metadata is not a check of the report's content.

Documented source path

The archived primary portal from 6 June 2013 was read in memory and contains the following PDF link: Original DPSD- Annual Report 2009 of the Danish Health Board.

SHA-256 of the downloaded portal response: a723of1d4e25fcf3bf4bec21c36aba8a77895f896bff1a80f004en5bda1f43 (12.750 bytes). Hashen refers to the portal page's HTML, not the PDF.

A targeted CDX search on the sst.dk / publ / publ2010 / Oversight / DPSD / and a variant with Publ2010 found for the PDF path only a registration from 20240713221352, with MIME-type text / html and HTTP status 404. It's metadata on a bug page, **not an archived PDF**. The targeted replay with October 16, 2011 as desired date gave HTTP 404. Current official domain and migration variants gave HTTP 429. It documents the outcome of these checks; it does not prove that the original does not exist in another public archive.

Figures that can be documented without pretending to read the annual original

Year	Figures	Unit of measurement and demarcation	Source and locator	Overlap and counting
2009	25.249	Analysed reports received by the Danish Health Service from the regions	SUU general part 2009-10, reply on question 583, the section with the Danish Health Service's DPSDinformation	Already included as the year 2009 in the main note. Do not re-add. The number of reports is not unique patients, all actual events or observed illegality.
2009	50	Events registered under the category "Cardiac arrest or unexpected fatalities"	The same ministerial answer, the same paragraph	Subset of 25.249; not to be added. The collection category does not give a separate number of deaths, deaths caused by errors or unique deaths.

The answer describes DPSD as a reporting system, the number of which depends on the submission of the healthcare provider. Therefore, it cannot quantify the full scale of events or exact deaths resulting from mistreatment. This information is from a later official source, not an independent reading of the annual report.

What remains to be checked in the annual report itself

• All tables, figures, category numbers and annual comparisons.

• The actual date of the report, the inclusion and exclusion rules, any cancellations and status requirements prior to submission from the regions.

• Any differences between locally reported events and analyzed reports received centrally.

• The report's own definition of events, degree of injury, treatment site and reporting group, and overlap between classifications.

• The page number of the annual report and PDF-hash. No PDF-hash is available because the PDF was not downloaded.

No missing category counts have been inferred from rounded percentages in presentations or secondary accounts. Sundhedsstyrelsen's ordinary institutional annual report for 2009 is a different document and cannot replace the DPSD annual report.

Storage and traceability

The check retrieved the portal and archive metadata directly to memory. No original PDF, HTML, text extract or page images were stored locally. The corresponding JSON note contains only its own control results, source references and any hashes, with explicit indication of their source object. The archive's poem for the HTML bug page is not a hash of the original report.

DPSD 2013: defined control of the original annual report

Result: National *DPSD Annual Report 2013, Part 1* are identified by simultaneous bibliographical references, but not retrieved or materially read in this check. Its original statistical cells, denominators and method therefore remain a concrete original residue. A separate Part 2 for 2013 has not been documented by the verified references. Failure to access does not mean zero events, and the file searches do not prove that the original has been lost.

The verification only covers the 2013 original; 2007, 2009 and 2012 are dealt with in other modules. Public HTML / PDF originals were processed in memory, never saved on disk. Metadatafund is not similar to material reading.

Original and source chain

Search	Precise source / locator	Actual control	Meaning
Historical Part 1 Address	Previous file address of the patient pass and DPSD's previous file address	Reference chain; no retrieved year original	Report title and concrete demand targets; no verified annual cells
Institutional bibliography	Hospital pharmacy, North Jutland Region, Research report 2016, references p.21	Bibliographical reference checked; not the entire research report	Points at the old DPSD Part 1 address; does not document its statistics
Subsequent, separate primary method	Patient Information / Ministry, Service Oversight July 2014, PDF-p.18, note under development figure	Title pages and specific annual report references / methodology e read in RAM; 51 pages identified, not full material review	The source indicates that 2012- 2013 is based on database features; ongoing case work may lead to deviations from the annual reports. The numbers are therefore not automatically the original 2013 version
Current institutional responsibilities	STPS, Annual Report page, section before the annual report list	Primary page read	Operational and national UTH tasks were transferred to the Health Service Quality Institute 1.5.2025; historical archive search tracks at STPS and current DPSDs at SundK

Actual delimited archive control

CDX rows are metadata records after the specified filters and digest coincidences; they are neither events, report number nor a complete archive register. Searches without a finding of the original do not prove that no other URL / copy exists.

Search	Filters and demarcation	Returned metadata tree sker	Actual read original content / result
dpsd.dk, the whole host's prefix	URL with 2013; status 200; digest coincidence	4	Metadata; news / newsletter, no year original
dpsd.deme.privatsite.dk, prefix	URL with 2013; status 200; digest coincidence	5	Metadata; No Annual Original
patient ombuddet.dk, prefix	URL with 2013; status 200; digest coincidence	21	Metadata; No Annual Original

Search	Filters and demarcation	Returned metadata tree sker	Actual read original content / result
stps.dk, prefix	URL with 2013 and DPSD; status 200; digest-coincidence	2	Metadata; later guide with 2013 in datoid, no year original
dpsd.dk, prefix	All years; MIME application / pdf; status 200; digest coincidence	64	Metadata; no 2013annual file identified
dpsd.deme.privatsite.dk, prefix	All years; MIME application / pdf; status 200; digest coincidence	0	No match; no proof of no archived PDF under other address
stps.dk, prefix	All years; PDF and DPSD in URL; status 200; digest coincidence	15	Metadata; no 2013annual file identified
dpsd.dk / ~ / media / Foundry / Sit es / DPSD / Files / Years reports /	No status filter; digest coincidence	4	Abbreviated 2013 address, capture 20230614112709, status 302, actually followed to general STPS-UTH page; not annual report
EMEA Annual Report / ~ / medi a / Learning	No status filter; digest coincidence	0	No match
• • • • • • • •	HTML; Status 200; digest coincidence	0	No match
patient ombuddet.dk / en / Publications / Years reports	Status 200; digest coincidence	0	No match
stps.dk / en / releases /, URL with 2013	Status 200; digest coincidence	15	2013-index, capture 20160704154345 actually read; no national 2013annual report reference in the read index
stps.dk / en / releases /, URL with 2014	Status 200; digest coincidence	20	2014-index, capture 20160710050650 actually read; no annual report link. Two GUID-PDF title pages actually read: *Dose Dispensation Version 1.2* (54 pages), *Service overhaul July 2014* (51 pages). No one is DPSD 2013 Part 1
ODA Document of the Folketing	Title contains DPSD or Patient Safety, document date 2014; File extended	0	No match within precise title delineation
ODA Document of the Folketing	Title contains Patient Ombuddens, document date 2014; File Extended	4	Metadata: Document 26279 / SUU Annex 599 has 6 files: Patient revolving, four boards, transfer letter. No Independent DPSDs Year File
Current Annual Report page of STPS	Actual HTML line control and search for 2013	Not an annual statistic	No 2013-PDF reference in the downloaded HTML; unfolding / loading function may delimit the HTML extract

The 51 and 54 pages are document size, not a claim for full report reading. All above counts are own search results. The web search engine's report title, Part 1 / Part 2, government and bibliography searches were used for localization; secondary reproduced 2013 numbers have not been transferred to the original column.

Countable status and precise remainder

Year / version	Counter	Denomination	Unit / population	Samples, exclusions and overlap	Status
2013, Original DPSD Part 1	Not original erified	Not original erified	Reports / incidents according to the original's even unread definition; not automatically unique patients or public servants	Year of occurrence / reporting, closure time, deletions, duplicates, reports transmitted / rejected and public / private sector shall be read in the original;	Actual original balance
2013, later service page n July 2014	Not extracted in this module	Not extracted in this module	Separate database output according to the primary source PDF-p.18	May differ from original annual report; no automatic version harmonisation	Methodology point o riginal controls one; not replacement for Part 1
If applicable, DPSD 2013 Part 2	Existence not verified	Not applicable before identification	Unknown	2012 Part 2 or other learning reports do not document a 2013 Part 2	Title / Original

Explicitly necessary catch up, not dispatched: The historical publication archive of the STPS and the DPSDfunction of the Health Service are requested to locate the original published *DPSD Annual Report 2013, Part 1*, if applicable Part 2 and bibliographic release date, journal number, internal media GUID and previous URLs. In addition, any corrections / new versions and documentation of the exit date, reporting year, report / event definition, duplicate / delete / rejection rules, sector categories, severity and transferred versus locally completed events are requested. If the file has been delivered to another archive, the specific delivery / journal chain is necessary. No statistical gaps are coded as zero.

DPSD 2012: Health Service Contribution and Learning Annexes

The learning annex is text read on all 12 pages and the project table PDF11 is visually controlled. Part 2 is materially read on all 389 pages, with visual RAM control of PDF384. FrAPDF55 is only omitted contact blocks and repeated questions from the RAM view; all response fields are preserved. The extracted text is only processed in memory.

Figures and units

The rows refer to 2012, with clearly marked historical years of comparison. UTH, analyses, meetings, participants and waiting list items have separate units. No sum is a number of illegalities or citizens affected.

Source / locator	Year / Period a	Organisation	Indicator	Counter	Denomination	Unit	Limit / upper limit ap

Methodology and concrete evidence chain

Regions, municipalities and private treatment sites report their own activities. Regional figures may include the same events as hospital contributions. Several municipalities have more contributions. The number of analyses is not the number of independent incidents. The yearly deviation of PDF6 is maintained.

• Himmerland: Maravan is handled outside the new medicine module after severe events [DPSD12D2, PDF15]. The institution's simultaneous annual information; clinical records / fault / repair not provided.

• Thy-Mors: Spring 2012 annual report did not give any concrete areas of action [DPSD12D2, PDF18]. Self-report; no automatic end of 0 necessary bets.

• Vendsyssel / regionIT: Papiradvi abandoned while electronic X-ray advi could not be sent 6 months; Reference department was missing message [DPSD12D2, PDF21]. Documented risk description and decision chain, undetermined damage / liability / judgment.

• Vendsyssel / psychiatry: Cross-sectoral analysis after death after suicide attempt [DPSD12D2, PDF21]. No union with other analytic / psychiatric contributions.

• Patient revolving: OBS-notification of acidosis, 37-year-old deceased [DPSD12L, PDF8]. Source case description; primary clinical records not provided; no Union with Part 2.

• Frederikshavn: Halved pain patches: contacting the doctor did not produce a changed prescription; no specific patient information; unclear complaint track [DPSD12D2, PDF36-37]. The institution's contribution; separate clinical/individual redress not quantified.

• Hospitalsenheden Midt:Compliance with recommendations not systematically checked; effectiveness was a perception [DPSD12D2,PDF57]. Institution’s contribution; independent clinical/personal redress not quantified.

• Hospitalsenheden Vest: Safe medication reconciliation not yet established; dictation errors delayed diagnostic assessment [DPSD12D2, PDF60]. The institution's contribution; separate clinical/individual redress not quantified.

• Randers:Incorrect labelling continued after earlier measures; EPJ acknowledgment could not document actual medication administration [DPSD12D2,PDF66-67]. Institution’s contribution; independent clinical/personal redress not quantified.

• RM social: known information barrier for residents/relatives; the problem of analysis confidentiality was raised by the region and Patientombuddet [DPSD12D2, PDF76-78]. The institution’s contribution; independent clinical/personal redress not quantified.

• Herning: DPSD2 access/report module caused known caseworker and dissemination problems [DPSD12D2, PDF93]. The institution's contribution; separate clinical/individual redress not quantified.

• Holstebro: No fixed criteria for in-depth analysis [DPSD12D2, PDF95]. The institution's contribution; separate clinical/individual redress not quantified.

• Ringkøbing-Skjern: No maximum response time for emergency calls or fixed analysis criteria [DPSD12D2, PDF105-106]. Institution contribution; independent clinical / personal recovery not quantified.

• RSD practice: All responses refer to another primary-care contribution; no independent additional cohort [DPSD12D2, PDF127]. The institution's contribution; separate clinical/individual redress not quantified.

• Esbjerg: Central reporting made subsequent work in the administrations difficult to trace [DPSD12D2, PDF149]. The institution's contribution; separate clinical/individual redress not quantified.

• Middelfart: disability/psychiatric residents dependent on employee reporting; general criteria missing due to resources [DPSD12D2, PDF164-165]. The institution’s contribution; independent clinical/personal redress not quantified.

• Nyborg: 12 CPR identifiers linked to incorrect dose packaging; withdrawn and correct medicine the same afternoon; doctor UTH results not received [DPSD12D2, PDF169]. The institution's contribution; separate clinical/individual redress not quantified.

• Odense: Missing overview for doctor/pharmacy; alleged restriction of access not independently legally verified [DPSD12D2, PDF171-172]. The institution's contribution; separate clinical/individual redress not quantified.

• Svendborg:A fire at a care centre led to procedures; number affected not stated [DPSD12D2,PDF174]. Institution’s contribution; independent clinical/personal redress not quantified.

• Vejen:Two contributions; no patient information initiated and in-depth analyses not yet used [DPSD12D2,PDF182-185]. Institution’s contribution; independent clinical/personal redress not quantified.

• Vejle: repeated near misses not yet systematically analysed proactively [DPSD12D2, PDF187]. The institution’s contribution; independent clinical/personal redress not quantified.

• SygehusNord: Acidose-OBS arose from an incident in the organisation; overlaps the DPSD12L fatal case,not a new death [DPSD12D2, PDF192-193]. The institution's contribution; independent clinical/personal redress not quantified.

• SygehusSyd: delayed-diagnosis analysis without the GP concerned; individual process dates not stated [DPSD12D2, PDF196]. The institution's contribution; independent clinical/personal redress not quantified.

• HospitalValdemar: oxygen valve inaccessible from the department during a fire; correction planned Feb 13 [DPSD12D2, PDF213-214]. The institution's contribution; independent clinical/personal redress not quantified.

• Køge: many medication cases did not receive in-depth analysis [DPSD12D2, PDF230]. The institution's contribution; independent clinical/personal redress not quantified.

• Næstved:13 people with legionella,death in a fire and 4 restraint descriptions; Social Services Act→adverse-event report is not a review of legal authority [DPSD12D2, PDF236-237]. The institution's contribution; independent clinical/personal redress not quantified.

• Roskilde Municipality: new RM does not know all activities in the first 10 months; missing verification of learning must not be coded as 0 [DPSD12D2, PDF243-244]. The institution's contribution; independent clinical/personal redress not quantified.
• Amager/Hvidovre: DPSD access prevented extraction of own reports with incident locations in primary care [DPSD12D2, PDF257]. Institutional contribution; not an independent clinical judgment/union of individuals or actual redress.
• Bornholm Hospital: Identification wristbands discontinued after ¾ year: effect undocumented, confusion/stigmatisation stated [DPSD12D2, PDF261]. Institutional contribution; not an independent clinical judgment/union of individuals or actual redress.

• Bornholm Hospital: poisoned emergency-department employees; patients/relatives contacted/tested and department closed/repaired; affected N unknown [DPSD12D2, PDF262-263]. Institutional contribution; not an independent clinical finding/union of people or actual redress.

• Gentofte:Five analysis themes cover head trauma from falls, medication information, surgical mix-ups, discharge involving withdrawal and critical transfer [DPSD12D2,PDF268]. Institution contribution; not an independent clinical determination/union of persons or actual redress.

• Herlev:In-depth analyses took a long time; sustainable action plans described as difficult [DPSD12D2,PDF273]. Institution contribution; not an independent clinical determination/union of persons or actual redress.

• RHP: death during complex high-dose antipsychotic treatment; regional warning/root-cause analysis,overlap unknown [DPSD12D2, PDF282]. Institutional contribution; not an independent clinical finding/union of people or actual redress.

• Rigshospitalet/RH:Transport delays shortened dialysis time; also wrong addresses/patients left behind, the same regional course [DPSD12D2,PDF285/301]. Institution contribution; not an independent clinical determination/union of persons or actual redress.

• Rigshospitalet:Test results not updated in real time; DECT phones unintentionally silent/disconnected [DPSD12D2,PDF285]. Institution contribution; not an independent clinical determination/union of persons or actual redress.
• RH practice/regional:Metex substitution and insulin units led to national system corrections; repeated contributions are not new incidents [DPSD12D2,PDF289/300]. Institution contribution; not an independent clinical determination/union of persons or actual redress.

• RH regional: Complaint decisions from 2 specialties: time lag and lack of focus on preventability hindered learning; no quantified criticism proportion [DPSD12D2, PDF298]. Institutional contribution; not an independent clinical judgment/union of individuals or actual redress.

• RH regional: FMK→EPM weekly prescriptions became daily; further recertification errors led to a stop ordered by executive management [DPSD12D2, PDF299/302]. Institutional contribution; not an independent clinical finding/union of people or actual redress.

• RH regional: Changes in GTT personnel/catchment areas made comparable harm rates difficult; more experienced reviewers found more harm [DPSD12D2, PDF302]. Institutional contribution; not an independent clinical judgment/union of individuals or actual redress.

• RH regional:Cross-sector analysis abandoned because of a high level of conflict; the incident's clinical/redress outcome unspecified [DPSD12D2,PDF303]. Institution contribution; not an independent clinical determination/union of persons or actual redress.

• Københavns Privathospital:Criteria for in-depth analysis not yet developed [DPSD12D2,PDF319]. Institution contribution; not an independent clinical determination/union of persons or actual redress.

• Øjenhospitalet Danmark: all substantive response fields blank; must not be coded as zero incidents [DPSD12D2, PDF325]. Institutional contribution; not an independent clinical finding/union of people or actual redress.

• Ballerup:Frequent recurring incidents not analysed because of insufficient time [DPSD12D2,PDF331]. Institution contribution; not an independent clinical determination/union of persons or actual redress.

• Dragør: Two contributions; electronic reporting only from 2012, training requested and criteria incomplete [DPSD12D2, PDF336-339]. Institutional contribution; not an independent clinical judgment/union of individuals or actual redress.

• Egedal:Cross-sector incidents incorrectly reported to the organisation itself; birth notifications missing [DPSD12D2,PDF341]. Institution contribution; not an independent clinical determination/union of persons or actual redress.

• Frederiksberg Kommune: Suicide 4 days after discharge; joint action plan, the timeline is not in itself an examination of culpability [DPSD12D2, PDF344]. Institutional contribution; not an independent clinical judgment/union of individuals or actual redress.

• Several municipalities: patient information not selected/not prioritised/not implemented; the respective local information is not a union of individuals [DPSD12D2, PDF348/349/355/357/367-368/371/377/386/388]. Institutional contribution; not an independent clinical finding/union of people or actual redress.

• Hillerød Municipality: missed hip fracture in an older person with dementia; cross-sector analysis,specific treatment time/redress unknown [DPSD12D2, PDF363]. Institutional contribution; not an independent clinical finding/union of people or actual redress.

• KK Social:Four analyses of courses ending in death, nine internal analyses since the start and ten pending;"high-speed staffing" and confidentiality stated; no union of persons [DPSD12D2,PDF375-376]. Institution contribution; not an independent clinical determination/union of persons or actual redress.

• KK Social/RHP: Clozapine/polypharmacy involving a private psychiatrist and contact with Rigshospitalet may be the same case as RHP282; not an additional death [DPSD12D2, PDF376]. Institutional contribution; not an independent clinical judgment/union of individuals or actual redress.

• Rudersdal:Cross-sector discussions without systematic analysis; actual severity confused with potential risk [DPSD12D2,PDF380]. Institution contribution; not an independent clinical determination/union of persons or actual redress.

• KK Health/Care: medication audit found quality failures; the 90% reference has an unknown selection denominator and no population representativeness [DPSD12D2, PDF384]. Institutional contribution; not an independent clinical finding/union of people or actual redress.

• Tårnby: training/analyses incomplete; RM vacancy Oct 12-Jan 13 and missing discharge summaries/prescriptions [DPSD12D2, PDF386-387]. Institutional contribution; not an independent clinical finding/union of people or actual redress.

Meaning and necessary documents

Knowledge of a specific risk must be connected to the responsible decision and subsequent action. A corrected technical function does not in itself document redress for a patient already harmed. The X-ray process requires decision logs,receipt/response logs and specific patient histories to establish delays and responsibility. The Maravan process requires incident and medication logs. Person counts and reparation therefore cannot be inferred from meeting or analysis counts. This is our evidential analysis,separate from the source's activity information.

Additional original health outcomes: complaint statistics 2014 and replacement anchor 2018-2025

Controlled October 7, 2026. 122 factorows in the corresponding JSON file. Findings are decisions and sub-decisions, not unique patients or employees. PDF pages below are physically counted from the first PDF page.

Patient complaints statistics 2014: exact denominators and outcomes

Source: Statistical information on patient complaints 2014, pp. 7-9 and 13-21, tables 4-6 and 9-18.

Type of decision	Total	Outdated gene absorption view	Equipment name;	No criticism	Criticism	Insecticides a	Opposition no
Disciplinary	1.490	65	1.425	980	389	54	2
Place of treatment	1.538	40	1.498	969	529	-	-

Rightout falls	Remitted	Acceded	Modified	No criticism	Criticism	Other	Total
2014	48	403	64	34	36	10	595

The 1.682 partial decisions concerning health professionals are distributed across all 20 professional groups in JSON;including 1.377 doctor, 161 nurse and 31 social and health-care assistant decisions. Greenland/Faroe Islands: 99 partial decisions. The incident-location table comprises 3.244 partial decisions and excludes 48 rights cases; all 18 location categories are recorded. Hospital does not automatically mean public employment. Municipal rights cases are included regionally. Record registration changed in 2013. The treatment-site figure of 1.538 is retained alongside the earlier text version’s 1.537.

Replacement anchor: actual changes and subsequent court outcome

Year	Manage Ratitive amended	Printed % change ocent	José Manuel Barroso Safflower see	Case no cleared	Judgments	Amended / convicted by judgment	Original and physical pages
2018	247	12	298	Not specified	73	11	2018, 13, 17-18
2019	370	15	332	Not specified	80	18	2019, 11, 15-16
2020	365	13	361	105	37	8	2020, 12, 19
2021	288	12	333	154	52	5	2021, 10, 16-17
2022	320	13	278	208	55	18	2022, 13, 21
2023	245	10	312	160	71	13*	2023, 11, 20
2024	268	10	Not included here	213	60	7	2024, 16, 21
2025	313	11	135	131	48	13	2025, 14-16, 21

The exact denominator of the alteration rate cannot be reconstructed from a rounded percentage. 2021 excludes remittals, rejections and reopenings; 2022-2023 includes remittals. Chairperson decisions are included; from 2024 secretariat decisions are also included. An alteration can increase or reduce the patient's entitlement to compensation. Judicial review is later processing of the same trajectory and must not be added as new patients.

*The 2023 original's outcome section says »2022«, but states 13/71, while the same page gives 71 judgments in 2023. The 2022 original states 18/55. The year-label conflict is recorded separately. The 2022 original also states 13 per cent, while newer original compilations state 12 per cent historically for 2022. No silent harmonisation.

Cases withdrawn before judgment may include reopening and a new decision finding wholly or partly in the party's favour. The boards' reports do not publish an overall count for this outcome. Court cases concluded without judgment are therefore not documented losses for patients.

Patient benefit, patient disadvantage and actual time 2025

2025-original, p. 9 and 13-21:

Change direction	Number
For the benefit of the patient	152
For the benefit of the patient	140
Other change	21
Total	313

3.558 closed: 3.200 treatment, 357 medicinal-product and one access-to-records case. Decision form: 1.461 board, 135 chairperson, 1.829 secretariat and 133 without decision. The thematic graph gives 131 without decision, a separate source conflict. The dental scheme's jurisdiction changed on 1. July 2024; since then 139 dental-injury cases received and 59 decided. Average time 7,2 months; from 2025 rejections for missing the appeal deadline are excluded. Time spent obtaining records and Patienterstatningen's opinion is included. A favourable appeal decision does not in itself document later payment.

Concrete residues and measures of investigation

The open register of the Folketing documents the annual reports 2006 and 2007: Documents 490303 and 518897, respectively SUU 2006-07 Annex 556 and SUU 2007-08, second collection, Annex 363. The File API box is empty. Direct attachment pages gave 403; the historical STPS statistics links 2010 and 2013 gave 404 and are not available in the current page card. The registry entry is the documentation for the publication, not for the figures in the report.

Exact original criticism counts for 2006-2010, 2013 and 2018-2019 are still missing; annual registration of amendments favourable/adverse to patients before 2025; cessation,payment and reopened litigation with a favourable finding; public/private employment and person deduplication. Request to STPK: each year's original decision extract with case type,decision date,type of criticism,partial decision,reopening,complaining party and direction of amendment,and reconciliation with the original annual statistics. Patienterstatningen's outstanding denominators and person deduplication appear in sundhedsaar-serier.md. No request has been sent.

The Patient Complaints Board 2010: original time goals, production and historical version differences;

The scanned annual report from Patientklagenævnet has now been recovered through Patientombuddet's official archive address. Its 21 pages can be retrieved in memory; the text layer provides no readable body text. The contents page and the original's physical pages 4-5 and 9-11 have therefore actually been read visually. All values in tables 3-5 are recorded. No attestation is given of the content of all other accounting pages. This is an annual report with targets and production information; it does not replace the separate annual statistics' missing exact criticism categories. [PKNA10]

Original objectives and results achieved

Table 3, physical/printed page 9. Degree of target achievement is the authority's performance-contract classification, not the proportion of patients with a timely course.

Result requirements	Measure	Actual result	Unit	Targets %	Weight%	Weighted % result
Decommissioning	4560	4247	decisions	50	25	12,5
Case-handling product	120	114,9	Decisions / Annual Work	50	20	10
Average length of proceedings	12	12,7	months	50	20	10

Result requirements	Measure	Actual result	Unit	Targets %	Weight%	Weighted % result
Unit cost	9000	10670	DKK / closed case	0	25	0
Employee satisfaction	Measurement	Implemented	action	100	10	10

The weighted total is 42,5 per cent. The original states five performance requirements:one met, three partly met and one unmet. The well-being measurement concerns employees; it does not document patient satisfaction or redress. The original's comparison with 2009 is 65 per cent target attainment, but a decline in the contract score does not in itself prove worse actual outcomes. The measured quantities and time targets must be shown separately. [PKNA10,PDF4-5,9]

All original cells in the production matrix

Table 4, physical / printed, page 10. The same annual registration is not necessarily the same reception cohort.

Measure	2009	2010	Unit
New cases	4235	4805	cases
Assignments	3416	4147	cases
Decisions	3098	4247	decisions
Total annual work of the Secretariat	65	76,8	year work;
Annual work of the cashier	30,7	37	year work;
Decisions per total annual work	47,7	55,3	Decisions / Annual Work
Decisions per year's work	101	114,9	Decisions / Annual Work

The original's prose rounds 114,9 to 115. The target basis was 38 case-handlers' annual work × 120 = 4.560 decisions; in fact, 37 annual work is reported. These are production and capacity targets, not a count of responsible employees, errors or patients. The original indicates unit costs of DKK 10.921 in 2009 and DKK 10.670 in 2010, against a target of DKK 9.000 per case closed. [PKNA10, PDF5,10-11]

The full original time series in Table 5

Year	Average, months
2007	15,9
2008	15,1
2009	13,8
2010	12,7

The 2010 original target was no more than 12 months; in fact 12,7. A reduction from 13,8 is not the achievement of the 12-month target. The average also does not indicate how many people waited longer, maximum waiting time or time for actual treatment, compensation or payment. [PKNA10, PDF11]

Own voting for the later original statistics

The original complaint statistics 2016, May 2017 version 1.0, provides another historical activity sample. The original cells already registered shall be retained alongside the annual report; the differences shall not be explained away without the vote of the Authority.

Year	Measure	Annual Report 2010	Statistics 2016	Own difference
2009	New cases	4235	4235	0
2009	Assignments	3416	3294	122

Year	Measure	Annual Report 2010	Statistics 2016	Own difference
2009	Decisions	3098	3094	4
2010	New cases	4805	4770	35
2010	Assignments	4147	3910	237
2010	Decisions	4247	4221	26

The 237 is a recorded difference between acceptance versions, not 237 proven unrepresented victims. Statistics 2016 describes separate exclusions and subsequent recording of assumptions; they do not explain without a specific data coupling each above cell. No sum of both versions is formed. Both originals must be followed for delimitation, case type, journal ID and version date. [PKNA10, PDF10; PKNS16, PDF5 / tryt4]

Consequences, responsibilities and concrete remnants

In conclusion, the Authority had specific targets and recorded long averages even before the 2011 reform. The original describes a goal of rapid, correct and transparent decisions, while the 2010 performance contract concentrated on production and productivity. There were no performance requirements for the practice dissemination. It documents organisation and knowledge; it does not document the prevention of the actual injuries or a criminal omission of each employee. [PKNA10, PDF4]

The citizen's remedy must be measured from harm or administrative intervention to complaint, decision and actual reparation. A closed complaint may be followed by continuing loss of treatment, refused compensation or delayed payment. The specific demand concerns original decisions' outcomes and dates, known case/person linkages, public/private employment, reparation and actual effect. Proof of individual criminal responsibility is not required before an institutional accountability track can be investigated; every accountability claim must satisfy its own rule.

Remaining gaps: Exact criticism classes 2006-2010/2013/2018-2019 are not resolved by this production annual report. Folketinget’s 2006-/2007-document entries still have an empty File field. Old STPS statistics addresses, the former PKN/Patientombuddet archive registers and current publication lists have actually been examined. The archive’s PDF register for patientombuddet.dk yielded 195URL rows, with only this PKN annual report and three 2012DPSD parts among the annual-report/statistics names. This is a specific search boundary, not evidence of statistics originals never published or lost. Access failures,0 matches and unread sources are recorded separately. No external request has been sent.

Patient complaints 2006: original critical classes, actual waiting time and source conflicts;

The original statistics for 2006 document **567 critical decisions and 2 requests for redress of 2.217 cases decided without psychiatric appeal**. The other 1.648 cases stand as no criticism. These are the actual original categories; the report does not have a separate category of criticism with invigoration. A request for indictment shall document the action of a control body, not the execution of the charge, the sentence or the penalty. PKS06, p.11, Table 6.

The corresponding regional table indicates: **590 critical decisions and 2 indictment requests among 2.305 decisions including 88 psychiatric appeals**. The other 1.713 stands as no criticism. These figures are also included. The difference between 567 and 590 must not be deleted as a clerical error or simply translated into 23 new citizens. The populations are different, and the statistical original does not explain a complete case union between its critical and psychiatric codes. PKS06, p.18, Table 13; p.11, Table 6.

Cases, decisions concerning healthcare professionals and numbers of citizens

The original sets out 4.114 individual decisions, excluding 118 individual psychiatric decisions. In a complaint, several health professionals can have their own decision, and the same health person can appear in several cases. The 4.114 are therefore neither 4.114 patients nor 4.114 different employees. The table gives 18,4% under the category of offence, but does not give the exact number in the total category. Rounding must not be transformed into a fictional integer. For non-authorised professional groups, the methodological section describes the assessment of professional correctness; the common tabular heading does not prove an identical offence for any professional group. PKS06, p.12-13, Table 7-8 and delimitation sections.

72 cases gave 76 individual decisions published with names. Of these, 41 came from the National Health Service's reports and 35 from complaints. The number 76 does not document 76 different health professionals. The original tables allocate these individual decisions by subject group, specialisation, place of treatment and criterion. The hospital is not in itself a proven public employment status. PKS06, p.23-25

Psychiatric coercion and resumption

The 88 psychiatric appeal decisions comprise 56 upheld decisions, 29 amendments, 2 remittals for reconsideration and 1 annulment. The 32 decisions involving amendment, remittal for reconsideration or annulment are a delimited appeal-outcome group, not a deduplicated person count or automatically 32 criminal abuses. These interventions concern coercion and must therefore be shown separately from ordinary criticism of healthcare treatment. The original's prose says 62,5% upheld, but its table gives 56/88=63,64%; both evidentiary leads are retained, and the table counts have been visually checked. PKS06,pp.21-22,tables 15-17.

84 decisions concerned requests to reopen:68 refusals and 16 reopenings. Of the 16, 1 decision was upheld without further specification of outcome, 7 remained no breach of law, 1 psychiatric upholding was maintained, 1 was changed from no breach of law to a breach of law and 6 were changed in the opposite direction. These 84 are part of the year's production, and the 16 and their subgroups must not be added as new cases or citizens. Reopening is also not documentation of actual restoration of health. PKS06,pp.11 and 19.

The citizen's waiting time is longer than the Authority's recruitment time

The average of 13,8 months runs from the Authority's acceptance of the complaint to the decision. From the citizen's submission of the complaint, the average is 14,3 months. The original explicitly describes this second starting point after the criticism of the National Audit Office. The final objective includes a greater proportion of the time that the citizen is actually waiting for the test. None of the targets documents when the processing was corrected, an injury compensated or the citizen's rights were actually restored. PKS06, p.19, Section 3.7.

Figure 4 places 6,3 months in 2000; the prosas places the same historical minimum in 2001. The figure all 13 data points are visually read and included with the actual year location. The conflict is local and does not alter the original's documented two different timeframes for 2006. PKS06, p.19-20

Concrete data conflicts to be preserved

• Table 1 lists 2.783 admitted; the prose 2.704. The latter plus 79 admitted psychiatric appeals gives 2.783, but this calculation must not purport to explain the population in greater detail than the original does. PKS06, pp.4-5 and 21.

• Figure 3 gives 478 as the year's difference between assumed and determined. Stock increases from 2.934 to 3.372, i.e. 438. Flow difference and inventory change are not the same objective. Revocations and other changes in stocks are mentioned in the methodology footnote, but there is no complete numerical reconciliation. PKS06, p.5-6

• Annex 1's regional estimates are 2.868, whereas the main table gives 2.783. The difference 85 has been documented; it has not been identified as 85 persons, new cases or resumption. All annexes have been visually read and preserved. PKS06, p.10 and 26-27.

• Table 14's record-keeping row states 21 individual decisions and 70,8% breaches of law. The visually confirmed cells cannot represent an integer count of legal breaches with the same denominator of 21 and ordinary rounding to one decimal place. Other percentage/count rows also have discrepancies. The source cannot be repaired by back-calculating percentages. PKS06, p.19.

• The psychiatric rate, the historical time limit and several regional percentages have the discrepancies listed above. They will not be allowed to conceal the exact number of decisions given. PKS06, p.18-22

Determined coverage lift

H04's concrete remnants on original classes of criticism for 2006 are materially closed to this 27-page statistical version. The 36 reading tables / 328 numerical series comprise all the tables, the regions of the annex, the marked autonomous figures of the figures and the relevant figures of the text. Historical comparison figures before 2006 are maintained as source boundaries and are not counted as new events during the 2006-2025 period of the report. Figures without independently marked numbers do not provide additional observations.

The actual outstanding items are person deduplication, public/private employer status, the outcome following the two requests for prosecution, actual redress and the specifically identified source conflicts. They must not be filled in with assumptions. New criticism categories for other years remain a separate original-source question.

Source Cards

PKS06. Health Service Patient Complaints Board,*Statistical information 2006*,27 pages. Public original, archive capture 20070606212828. Original public authority address http://www.pkn.dk/public/dokumenter/stat_06.pdf.173.750 bytes. SHA256 651f4ac3c0496a22fd727bb1015e98db3e5a96fd7cfb7a748a1589af3017ef6d. Total	3430	100	2847	100	694	100

T4 - Regional approach

PKS06, p.10. The 2007 regions will be spent behind schedule in 2006; they will not be able to match one entry year.

Region	Received	Assumed	Rejected
Capital	1267	1018	288
Zealand	515	443	83
South Denmark	653	558	125
Central Jutland	587	472	125
North Jutland	283	233	46
Greenland	62	52	13
Faeroe Islands	8	7	1
Not available	6	0	5
Total	3381	2783	686

T5 - Requests for reopening

PKS06, p.10. Requests, non-response.

Year	Number
2002	98
2003	88
2004	92
2005	83
2006	86

T6 - Classes of criticism of decisions

PKS06, p.11. Excludes 88 psychiatric appeal decisions. No separate category for formal reminders of duties. A request for prosecution is not an indictment/judgment. The no-criticism category may include remarks on appropriate conduct.

Outcome	2002 %	2003 %	2004 %	2005 %	2006 %	2006 number
No criticism	77	77,3	77,6	73,4	74,3	1648
Criticism	22,7	22,1	22,1	24,8	25,6	567
Request for an indictment	0,3	0,5	0,2	1,8	0,1	2
Total	100	100	100	100	100	2217

T7 - Cases decided by subject group

PKS06, p.12. Trade unions overlap in the same case. Doctors include 88 psychiatric appeals. Pharmacopoeia 7 comprises 6 pharmacopoeia, see footnote 2; not 72.

Professional group	Number	%
Doctors	2089	83,1

Professional group	Number	%
Dentists	80	3,2
Nurses	179	7,1
Midwives	35	1,4
Physiotherapists	22	0,9
Clinical dental technicians	18	0,7
Peas (without pods)	1	0
Nursing workers	8	0,3
Dentists	2	0,1
Kiropractors	16	0,6
Psychologists	8	0,3
Bioanalysts	3	0,1
Social and health assistance	21	0,8
Radiographs	3	0,1
Pharmacy	6	0,2
Opticians	2	0,1
Pharmaceutical products	7	0,2
Ambulance editors	14	0,6
Total	2514	100

T8 - Decisions by subject group

PKS06, p.13 Excludes 118 psychiatric individual decisions. A case may have several individual decisions; repeated health professionals did not deduce. Unauthorised professional groups shall be assessed according to professional correctness; the table designation shall not prove an identical offence for all professional groups. Rounded percentages do not give exact number of criticisms.

Professional group	Number	No offence%	% offence
Doctors	3494	84,1	15,9
Dentists	108	41,7	58,3
Nurses	254	76,4	23,6
Midwives	67	77,6	22,4
Physiotherapists	30	83,3	16,7
Clinical dental technicians	28	46,4	53,6
Kiropractors	18	83,3	16,7
Social and health assistance	34	70,6	29,4
Dentists	4	0	100
Pharmaceutical	10	30	70
Pharmaceutical products	8	12,5	87,5

Professional group	Number	No offence%	% offence
Others	59	78	22
Total	4114	81,6	18,4

T9 - Class of position of hospital doctors

PKS06, p.14. 2.459 hospital doctors - individual decisions of 3.494 doctor -individual decisions; none given by category of post.

Category	No offence%	% offence	Share of individual decisions%
Chief Executive Officer	91,4	8,6	2,4
Chief medical officer	82,4	17,6	39,5
Departure doctors	82,7	17,3	10,3
1, spare doctor	86,5	13,5	6,6
Reserve doctors	86,3	13,7	17,2
Other doctors	91,5	8,5	24

T10 - Individual decisions by specialty

PKS06, p.15. Individual medical decisions; psychiatric appeals not included.

Residential home	50	50	0	12
Pharmacy	20	80	0	5
Ambulance	63,6	36,4	0	11
Prison	100	0	0	26
Other private practices	46,6	53,4	0	133
Home care	66,7	33,3	0	6

Place of treatment	No criticism%	Critical%	Assignment request%	Number
Municipal dental care services	73,1	26,9	0	26
Miscellaneous	56,3	43,7	0	16
Total	74,3	25,6	0,1	2305

T13 - Critics by region

PKS06, p.18 Including 88 psychiatric appeals. Regionalization to the 2007 regions Several printed percentages do not match the printed n; the cells of the source are preserved.

Region	No criticism number	No criticism %	Critical number	Critical%	Opposition Number of	Opposition %	Total
Capital	640	73,7	228	26,2	1	0,1	869
Zealand	215	65,8	111	34,2	0	0	326
South Denmark	361	77,9	102	21,9	1	0,2	464
Central Jutland	332	78,9	89	21,1	0	0	421
North Jutland	126	73,1	46	26,9	0	0	172
Greenland	36	78,3	10	21,7	0	0	46
Faeroe Islands	3	42,9	4	57,1	0	0	7
Total	1713	74,3	590	25,6	2	0,1	2305

T14 - Medical decisions by legal theme

PKS06, p.19 Themes include parts of 3.494 individual decisions, may also include treatment; not a personal union. Record keeping 21 and 70,8% visually confirmed; percent / n-conflict must not be repaired by guess.

Theme	No offence%	% offence	Number
Record keeping	29,2	70,8	21
Information	71,6	28,4	226
Consent	77,6	22,4	126
Access to documents	71,2	28,8	52
Professional secrecy	54,5	45,5	11
Medical certificates	81,8	18,2	45

REOPEN - Reopening decisions

PKS06, p.19 The last five cells divide 16 reabsorbed; not additional 84 + 16 + 16 cases.

Outcome	Number
Rejection	68
Recorded	16
Total decided	84
Maintained decision, type unspecified	1

Outcome	Number
Continued no offence	7
Psychiatric accession maintained	1
No offence changed to offence	1
Code changed to no offence	6

TIME - Two different time targets

PKS06, p.19 Two starting points, not a version correction of the same time-scale. Prosa s.19 places 6,3 months in 2001, while Figure 4 p.20 places 6,3 in 2000.

Start Point	2006 months
From assumption to decision	13,8
From citizen's complaint to decision	14,3

F4 - Average length of proceedings, figure

PKS06, p.20 All data points visually read; figure 6,3 is 2000, not 2001 as prosa p.19

Year	Months
1994	12
1995	19,7
1996	16,2
1997	14,8
1998	11
1999	6,8
2000	6,3
2001	8,2
2002	8
2003	8,2
2004	9,7
2005	12
2006	13,8

T15 - The development of psychiatric appeals

PKS06, p.21 Complaints about coercion; access and decision-making years are different populations.

Category	2002	2003	2004	2005	2006
Received	114	111	110	132	83

Source Cards

PKS06. Patientklagenævnet, *Statistical information on patient complaints 2006*,27 pages. Public original in a web archive; original address http://www.pkn.dk/public/dokumenter/stat_06.pdf. SHA256 651f4ac3c0496a22fd727bb1015e98db3e5a96fd7cfb7a748a1589af3017ef6d. All 27 pages read as text in RAM; pp.11,18,19,20,22,25,26,27 visually checked. Physical page = printed page.

H04: original access and version control of historical critical classes

Controlled October 7, 2026. This limited extension closes original statistics 2006 and specifies which other historical counters still cannot be deduced from the public sources. The actual searches are not proof that the documents have never existed or are not located in another public archive.

Materially closed 2006 and disciplinary outcome 2011

PKS06 is the original 27-page statistics, not the annual report's production table. All 27 pages are text-read in RAM, and the crucial conflict cells and regional annexes are also visually controlled. The original's three common classes of criticism are no criticism 1.648, criticism 567 and request for admissions 2, mention 2.217 without 88 psychiatric appeals. The regional table, on the other hand, has 1.713 / 590 / 2 among 2.305 including psychiatric appeals. All 36 own reading tables / 328 rows can be found in *patient complaints 2006- original -tables.md*(i) the control system; *patient complaints 2006- original control andnamescritic.md*.

H04 must therefore no longer say that the original criticism classes for 2006 are generally missing. Person deduplication, public employment status, criminal prosecution following the requests and actual redress remain missing.

In addition, the entire Folketing official text reproduction of the Disciplinary Board’s 2011 annual report has now been read, 34 pages, SDN11FT. Exact outcomes are 1.721 without criticism, 629 criticism, 86 admonitions and 1 request for prosecution, a total of 2.437 decisions. There are 100 decisions on reopening requests, including 75 dismissed and 5 amended outcomes. The separate 2011 statistics file remains a different document. All historical percentage cells for 2006-2011 and denominator criticism appear in *disciplinarnaevn2011-originale-udfald-og-bevismangler.md*.

Reported publication pages are not rediscovered statistical originals

Year	Actually read publication metadata	Identified download ID	Document control	Meaning
2010	STPK publication page, capture 20190923130030	640FFB81C5BB47889FD1D7F437EFA31B	The current root address and publication relative address on STPK / STPS as well as both STPK archive routes gave 404. GUID searches on STPK / STPS / P to the ombudg / SST found no capture.	The title and the exact old document link are covered; the criticism classes of the statistical report have not been read.
2011	STPK publication page, capture 20190923130539	5BF1AA6B038D4D978C01F2176F75196E	The exact current publication relative download route gave 404; GUID-CDX at the four relevant government domains gave no capture.	Metadata supports the retrieval trail; it is not full reading of the annual statistics. Other annual reports already read remain separate.
2012	STPK publication page, capture 20190923125856	FCCA1474E4CF45B78287FFB178925CF9	The exact current publication relative download route gave 404; GUID-CDX at the four relevant government domains gave no capture.	The same local restriction as 2011. The readable Disciplinary Report 2012 is another source.

Download routes follow the publication pages' actual relative paths ~/media/[ID].ashx. No ID has been invented. A 404 documents the specific procurement attempt, not that the statistical value is zero.

2007-2009 and 2013: public archives

The CDX check used authority domains with matchType=domain, separate checking of all PDF registrations and searching across all MIME types. Title checking was also performed in RAM after URL decoding and lowercase normalisation. This actually found stat_06.pdf, which does not contain the word statistics.

The Patient Complaints Board's PDF registry provided 283 URL registrations; the relevant named statistical files were 2000-2006, with duplicates of the older address versions. The originals 2007-2009 / 2010 were not identified in this register. A 2021 response under the address Annual Report 2007.pdf / was HTML from the later domain, not the original Annual Report PDF; it was omitted. Contemporary 2007 news routes were tried but could not be read due to connection timeouts.

All 964 URL registrations, regardless of MIME and HTTP status, were examined in the patient Ombudden Registry. The relevant 2010 finding was the 21st-page annual report, which has already been read separately in *patient complaint referred to in the 2010- original -target-and-versioner.md*. It shall not count as a recovered original critical statistic. The 2013 statistical report was not identified. The STPK registry containing all 8.349 URL records contained the rediscovered publication pages 2010 / 2011 / 2012, but did not contain these three download originals.

STPS's 6.650 PDF-URL registrations were filtered in RAM for statistics and the relevant older publication years. Five generic 2011/2013/2014 document addresses were retrieved and their title pages checked. They proved to concern medication handling, meningitis, supervision of private treatment, dose dispensing and a service review of the UTH system. They did not contain the requested annual statistics and were not read in full or introduced as new general subject sources. The precise known 2010/2013 publication paths yielded no new originals.

The parliament's already known 2006 / 2007 document - ID490303 / 518897 was tried as indexing and in narrow CDX address prefixes. The index pages could not be opened via the web tool; the archive prefixes gave no capture. The existing ODA registry entries remain release metadata. They are not a basis for reconstructing the missing original number of criticisms.

The Health Service's wide PDF registry trial got connection timeout. It is described as a failure of procurement and must not be rewritten into the fact that the whole SST register is checked without finding. Regional official web search tracks for the concrete statistics provided references to the evaluation 2015 and other known sources, but not new readable statistical originals 2007-2010 / 2013.

2018- 2019: post-registration changes the published class shares

Publication version	Year	None critique%	Critical%	Critics included in Pipe coat e%	Request for % admission	Source locator
Disciplinary Annual Report 2020	2018	85,0	14,0	0,9	0,1	Physical / printed p.12, Section 6.2
Disciplinary Annual Report 2020	2019	82,0	16,0	2,0	0,0	Physical / printed p.12, Section 6.2
STPK in figures, fixed 2023 version	2018	85,0	14,3	0,7	Not shown separately	Physical/printed p.7, graph of disciplinary decisions
STPK in figures, fixed 2023 version	2019	83,2	15,5	1,3	Not shown separately	Physical / printed s.7, same graph

The 2023 version's graph has been checked against the original in this expansion. It shows only three categories and does not give exact counts in these historical category cells. This does not document zero requests for prosecution. The count excludes rejected requests to reopen and includes dental cases taken over from the regions from 1. June 2019. The category percentages have thus already changed in a later fixed public version; the current 2026 display, excluding historically migrated cases, cannot replace a complete original annual series.

Fixed 2023 version, places of treatment;	No criticism%	Critical%	Locator
2018	68,2	31,8	Physical / printed p.8
2019	65,4	34,6	Physical / printed p.8

These shares are also retained, but do not give exact number of criticisms. An integer shall not be calculated by multiplying a rounded percentage by an activity number from another version or case limit.

Accurate residual H04delineation

For 2013,exact treatment-facility figures already exist in Patientombuddet’s 2014 annual report:1.060 without criticism and 466 with criticism among 1.526,i.e.30,5% criticism; physical/printed p.21. These must remain in the annual health series. By contrast, the separate 2014 statistics reproduce 2013 as 37,3% criticism in table 5,p.8. This is a specific version conflict that an as-yet unread original 2013 statistics report may help clarify. It must not say that all 2013 criticism figures are missing. The exact original disciplinary classes and reconciliation of the 2013 statistics version remain specific outstanding items.

The original 2006 statistics have been read and their figures supplied. Original criticism categories for 2007-2010 and 2013 and exact original 2018-2019 counts remain missing from readable annual originals. Publication metadata for 2010-2012 are now more precise, and the exact outcomes in the original 2011 disciplinary annual report have been separately recovered and read. Other originals already read and their later retrospectives are retained with version labels. The historical gap in originals itself must not be described as an absence of all health data for the years concerned.

The necessary next evidence is the identified original statistical files or a documented original annual extract with criticism categories, rejected reopenings, case type, dental-case transfers and denominator reconciliation. Cases and individual decisions must then be linked without creating new patients from the same trajectories. No request to an authority has been sent.

Sources of the specific version matrix

PKS06: Statistical information 2006, p.11-27; total source identity and hash in the 2006 module's source map.

SDN20V: Annual Report 2020, Disciplinary Board of the Health Service, p.12, Section 6.2. Here only the actual original index extract of the key figures section has been checked, not claimed new full reading of all 17 pages.

STPK23V: STPK in figures, updated 2023, p.7-8, concrete RAM PDF text widget. The document is 15 pages; this check reads the two relevant graph / method pages, not all other pages.

The three publication metadata records for 2010-2012 are linked in their respective table rows. The archive-register check can be repeated via Internet Archive's CDX interface with the stated authority domains and delimitations. Registration figures are URL entries in the procurement work, not health statistics or person counts.

Health Disciplinary Board 2011: original outages, resumption and evidence deficiencies;

Checked on 7. October 2026. Source SDN11FT is the Folketing's official HTML reproduction of the complete 34-page *Annual Report 2011 of the Healthcare Disciplinary Board*. The appendix's overall title mentions Patientombuddet and four boards; this specific file concerns the disciplinary board. It must therefore not be described as Patientombuddet's overall annual report or the separate patient-complaint statistics. The entire text reproduction has been read, including rules of procedure and membership composition. The PDF and page images could not be opened in the specific attempts; a graph without figures in the HTML text has therefore not been checked visually. The original text's figures and tables are reproduced with printed-page locators. Public original files have not been saved locally.

Limitation of the original vintage

Information	Number or share	Unit and delimitation	SDN11FT
All new patient complaints	4.893	Received by the Patient Ombudsperson; more types of complaints than treatment	p.8
Increase from 2010	2,6%	The rounded comparison of the original; amended review access is included	p.8
five years of growth	about 1.000 / 23%	Two rounded descriptions; no exact calculation of previous input figures	p.8
New Treatment Cells	3.950	Subset of 4.893	p.8
Of which for Patient Return	1.200	Elected institutional exercise	p.8
Of which to the Disciplinary Board	2.750	Elected personal examination; 1.200 + 2.750 = 3.950	p.8
Complaints of the Disciplinary Board	2.437	2011 marketing year; includes older cases taken over	p.8-9
Cases decided	barely 2.250 / more than 90%	The rounded description of the original; not an exact separate number	p.9
Decisions with criticism, all degrees	716 / 29%	629 + 86 + 1 = 716; 716 / 2.437 = 29,38%, own calculation	p.9, Table 1
Average length of proceedings	12,9 months	Cases decided; not the duration of all pending complaints	p.9
Comparison 2010	12,7 months	The Board's own review	p.9
Expert consultants at end of 2011	322	Staff consultants, uncriticised health professionals	p.11
Case processing team	7	Organisation; plus business team	p.10-11
Management of patient complaints centres	2 Head of Unit and 1 Chief Medical Officer	Not a population of responsible persons in critical cases	p.10

Complaints received and closed complaints cannot be merged into new patients. The figures 4.893, 3.950, 1.200 and 2.750 are interdependent figures. The 2.437 decisions are in a different time frame because older complaints are being finalised. More than 90% of decisions relate to cases taken over; therefore, the year 2011 does not necessarily indicate the date of the original act or injury.

All original critical classes and historical percentage cells

Year	No criticism	Criticism	Criticism with indentation	Request on address travel;	Original total	Limitation
2006	74,3%	23,3%	2,3%	0,1%	100%	Historical retrospective in Table 1, p.9
2007	77,4%	20,7%	1,7%	0,2%	100%	Same; no exact class counters
2008	78,5%	19,5%	1,9%	0,0%	100%	The same; rounded cells summer to 99,9%
2009	78,9%	18,7%	2,5%	0,0%	100%	Same; rounded cells summer to 100,1%
2010	72,2%	24,3%	3,3%	0,2%	100%	Same; published retrospective
2011, percentage	70,6%	25,8%	3,5%	0,0%	100%	Rounding hides an actual indictment request
2011, number	1.721	629	86	1	2.437	Exact number in original Table 1

The 2011 row elaborates the original disciplinary matrix already reproduced in the annual health series. These are the same 2.437 decisions, which must not be counted again. The new fuller text check adds in particular the scope of reopening, evidentiary criticism and specific patient courses. The one request for prosecution also shows why 0,0% must not be rewritten as zero cases. A request to consider prosecution is not a criminal conviction. This annual report lacks identification of the particular criminal case and its later outcome. The historical percentage cells do not permit calculation of exact counts for 2007-2010 from production figures in other reports.

The 2006 series must be read together with the already checked 2006 statistics: the general denominator of 2.217 excludes 88 psychiatric appeals, while the regional table includes 2.305. A percentage glance cannot easily replace this difference. Incorporation is a separate table class here; figures from another publication with a combined criticism class must retain their own classification.

Requests to reopen: five alterations, not a hundred reopened cases

Outcome in 2011	Number	Percentage	Denomination	SDN11FT
Request rejected	75	75%	100 decisions on applications	p.9, Table 2
No criticism changed to criticism	1	1%	Same	p.9, Table 2
Critics changed to no criticism	4	4%	Same	p.9, Table 2
Critics maintained	11	11%	Same	p.9, Table 2
No criticism maintained	9	9%	Same	p.9, Table 2
Total	100	100%	Request decisions	p.9, Table 2
Actual changes, own sum	5	5%	1 + 4; not all reuptake cycles	Calculated by Table 2
Decisions without rejection, own sum	25	25%	1 + 4 + 11 + 9; not 25 new people	Calculated by Table 2
Request decisions 2010	119	-	Historical retrospective	p.9
Rejected 2010	Undisclosed exact	70%	119, rounded part	p.9
No criticism to criticism 2010	Undisclosed exact	2%	119, rounded part	p.9
Criticism to no criticism 2010	Undisclosed exact	6%	119, rounded part	p.9

The title of the table uses the word reuptake, but the main text correctly limits it to decisions on requests. Three quarters were rejected. The statistics document one further criticism decision and four disappearances of criticism. It does not document a hundred correct patient courses or payouts. Overlap with the 2.437 ordinary decisions has not been explained enough to add all hundreds to the production total.

Evidence-sharing may mask processing errors in critical statistics

Conclusion: Criticism statistics are not a complete count of harmful or unlawful treatment acts. The original documents a specific mechanism in which lost medical records prevent review of the treatment itself.

The Authority's concrete statements and original evidence: The annual report p. 15-17 describes 22 decisions concerning the same private specialist. The complainants followed a television broadcast about possible injections without consent. The specialist's lawyer informed us that all the medical records were destroyed after the end of practice at the beginning of 2010. The Board could therefore not assess treatment and information, but criticised the record storage with indentation. One example patient was a 55-year-old woman treated from 1 July 2005 to the end of March 2010.

Discrepancy or deficiency:22 decisions are not 22 verified injections without consent. The annual report reproduces complaints, the lawyer’s explanation and the board’s assessment, but not all original records, injection information or consents. What is precisely documented is that review of treatment was precluded by missing medical records. The private practitioner must not be counted as a public employee either. The public relevance lies in the review system’s ability to establish the facts, examine and respond to citizens’ complaints.

Rule, action and deviation: The Board refers to the amendment from 1 January 2007 to ten years of record-keeping and transfer rules. In the opinion of the Board, the conclusion of practices did not remove the obligation to keep the records. The destruction described weakened both the patient's access to evidence and the Authority's ability to establish treatment responsibilities.

Result significance, responsibility and concrete requirements: A registered criticism of storage cannot replace the investigation of a possible violation of consent and physical integrity. A complete chain of responsibility requires the 22 decisions, possible police notification, supervisory response, preserved prescriptions, settlements and patients' simultaneous information. Where an authority has failed to preserve evidence or to provide information, that independent omission must be examined. No provision may be made for compensation or criminal proceedings alone from the annual report.

Another original section, p.18, describes the Ombudsman’s criticism in 2010 of a longstanding board practice concerning record-keeping. Under its earlier practice, the board could find non-compliance without expressing criticism. The record-keeping duty could not be transferred to a secretary when the healthcare professional remained responsible. This is another specific reason not to interpret “no criticism” as proof of no legal error. The original gives no overall historical denominator for all affected cases; a national under-recording percentage therefore cannot be calculated.

Hospital missing triage records: event, patient and multiple responsibilities

S.19-20 describes a 49-year-old patient with bleeding leg ulcers and blood thinners. A temporary triage schedule was not preserved. A doctor and a nurse provided contradictory information on the message regarding the removal of a bandage. The Board did not find any grounds for criticism of the nurse on the basis of the facts, but criticised a nurse in order not to ensure that the records were kept. The jury considered the triage schedule to be part of the file.

The documented consequence is the loss of simultaneous information and weakened the ability to determine the course of events. The lack of evidence must not be used as positive evidence of proper treatment. The responsibility points of two healthcare professionals tested do not create two patients either. The specific requirement is the safeguarding of original triage information, instructions, record tracks and the full decision, as well as the verification of the actions of the responsible management in relation to conservation. The annual report does not document any subsequent restoration of the patient's injury.

Information, disability and delineated competence of appeal

Progress	Documented in the original	Citizens' consistency and lack of proof	SDN11FT
Two resolutions on non-life	Critics of lack of information; example patients 74 and 59 years of age	Patients affected were not adequately informed; no automatic evidence of wrongfully caused death	p.13-14
44-year-old woman with permanent disability applied for car support	Specialist sought medical records and sent material to the municipality; electronic notices and transmission tested	The original consents, requests and access logs have not been printed; the Court's premise of consent cannot be verified against these documents here.	p.21-22
Fax obtained file in the same case	The Board refused jurisdiction in respect of this part of the procurement;	The definition of competence is not a substantive decision on the legality of the facsimile acquisition.	p.22
Kidney transplant case, patient died 22. July 2005	Appeal decision 28 April 2010; civil proceedings brought 29 October 2011; application received 19 December 2011	Journalist criticism; part of treatment not tested because the responsible doctor was dead; no response at the end of 2011	p.23-24
The Ombudsman's treatment in 2011	The panel does not report any criticism among a non-quantified number of complaints	Not zero complaints and not proof that all the Board's decisions were lawful	p.23

In the disability case, the board relied on the municipality's request as documentation of consent. The annual review does not permit verification of the consent's specific scope or actual access to the patient's information. This local evidential gap does not change other documented criticisms. In the transplant case the patient's death date is outside the 20-year period, but the complaint decision and civil proceedings are within it. Commencing proceedings in 2011 is not a final judgment or information about actual compensation.

Control, punishment and restoration of the complaint

The Rules of Procedure are reproduced on pp. 28-30. Paragraph 3 (2) provided for the possibility of police investigations prior to the processing of the name if there could be a criminal offence. Section 13 distinguishes between degrees of criticism and requests for consideration of charges. Paragraph 14 (3) requires that new material information or material procedural errors be re-examined. These rules do not document general criminal immunity. At the same time, they provide evidence that a final administrative decision does not remove the obligation to handle relevant new information and significant procedural errors.

Page 25 describes sending decisions to the employer and Sundhedsstyrelsen, intensified monitoring and return to ordinary monitoring after 12 months without further decisions involving criticism. This describes the scrutiny system, rather than a quantified number of responses or proof that every risk ceased after a year. Three criticism decisions within five years could lead to publication of a name for two years, and serious or cosmetic-related criticism had separate publication rules, p.7. Neither naming, a formal admonition nor a request for prosecution is the private citizen’s specific punishment for a comparable act. The accountability comparison must distinguish administrative criticism, personnel responses, police investigation, criminal judgment and patient compensation.

The annual report's learning section states that criticism will increase the health care provider's future vigilance. No efficacy study, patient-linked repeat rate or control of actual changes in behaviour are reported in the section. The Authority's expectations cannot therefore be recorded as documented reparation. The reported thematic reports on meningitis and CTG as well as the OBS message on Truxal are dissemination activities; they must not be counted as new patients, new injuries or completed individual redress.

Documentation account

Documented: exact outcome matrix 2011; the six historical percentage years with our own rounding; all five outcomes of reopening requests; average processing time of decided cases; specific record and information errors; limited competence; and the absence at year-end of a final judgment in the civil case described.

Investigative demands: all individual decisions in the 22 specialist cases, supervisory and criminal-case outcomes, the patient’s actual harm, original consents and record trails, and the later judgment and redress in the transplantation case. None of these demands is converted into invented person counts or presumed outcomes.

The source chain is SDN11FT → the original table or case summary → the report's own defined table and analysis. An institution summary documents what the institution published and relied on; it is not the full original patient record or the full judgment. The historical counters, which are still missing from the separate statistics, are preserved as precise remains. The 2011disciplinary matrix is already reproduced in the health year series; this check clarifies its delimitation and the entire published text context.

Psykiatrics: follow-up to waiting, coercion and change of rights

Original control and separate populations

The two final / follow-up notes C121 / 25 and C117 / 25 are now read in full: 13 and six physical PDFs pages respectively. The waiting-time figures and the information table in C121 / 25, physical pages 6, 7 and 9, as well as the mandatory table in C117 / 25, physical page 5, are also visually controlled in memory. The public originals are not stored locally. Law 1762 of 29 December 2025 has been read on both original pages. All page numbers below are physical PDFs pages; the printed page numbers of the notes are one lower.

There are three distinct populations:national quarterly diagnostic assessment courses; a random regionally distributed sample of 75 referral courses; coercive episodes per 100.000 citizens. A patient may have several courses and several interventions. None of these tables provides a national union of children, parents or patients affected by errors.

All printed national values in the waiting figures

Quarter	Diagnostic assessment over 30 days, percentage of courses	Average diagnostic assessment time, days	Original
2023, 4st quarter	67	106	C121 / 25, Figure 1-2, page 6-7
2024, 1st quarter	78	129	Same
2024, 2st quarter	87	142	Same
2024, 3st quarter	88	150	Same
2024, 4st quarter	88	158	Same
2025, 1st quarter	90	160	Same
2025, 2st quarter	91	162	Same

The figures are the printed national values of the figures. The other regional curves do not have an inscribed value for each data point; therefore the height of the curves is not read as exact cells. Underlying regional data must be obtained for a full number cell union. In addition, the note indicates the following precise objectives:

Measurement	Early period	Late period	Unit and delimitation
Valid reason for diagnostic assessment exceeding 30 days	7	5	Percentage of trajectories, 2023K4 versus 2025K2; page 7, § 9
Right to diagnostic assessment complied with overall	40	14	Percentage; includes timely assessment or a valid exception; same locator
Right to diagnostic assessment not complied with, own complement calculation	60	86	100 minus the original 40 / 14; rounded percentages, no exact national number
Region Sjælland's average diagnostic assessment time	48	190	Days, 2023K4 versus 2025K2; page 7, § 10
Increase in share over 30 days, Region Midtjylland	-	4	Percentage designation of the original; page 6; not converted into number of children
Same, Region North Jutland	-	5	Same
Historical differences in diagnostic assessment by social resources	-	Up to 11,8	Days in 2019-2022; page 11, § 21; repetition of previous report, no new victims

Measurement	Early period	Late period	Unit and delimitation
Notified economic boost to psychiatry in 2030 towards 2019	-	4,6	Mia. kr.; page 8, § 13; Ministry's future information, not a documented payment to the families concerned

Version and recording checks: The Capital Region, Zealand and Southern Denmark changed their recording in 2024. The original marks curves through 2024K3 as misleading. No breakdown separates the increase attributable to changed recording from actually longer waits. Figure 1's source note also states data as of **15. September 2024**, although the figure continues to 2025K2. This actually appears in the original image; the date is therefore retained as a specific source discrepancy requiring correction or explanation. Page 5 mentions a more accurate picture after 2024K3, whereas page 10 places the change from and including that quarter. The quarterly boundary must be clarified from the original recording versions.

The 75 progress of follow-up: the entire information table

The referrals are from **September 2024**,and the case-record review is from September 2025. Each region contributes 15 randomly selected processes; this is not a sample weighted by the regions' national patient counts. A year's interval was intended to reduce the risk that assessment was still ongoing. No complete attrition or person-deduplication list is stated. [CPsy25, pages 4 and 9]

Region	Selected courses	Informed about freely extended; Hospital choice	Evaluate bar right denominator	Not documented informed, own diffusers;
Zealand	15	0	15	15
Capital	15	6	11	5
North Jutland	15	11	15	4
South Denmark	15	13	15	2
Central Jutland	15	15	15	0
Total	75	45	71	26

Original table 1, page 9: **72** cases exceeded 30 days because of insufficient capacity and triggered the right to extended free choice of hospital. Three of Hovedstaden's 15 cases were timely. The region could not find one additional information letter: the rights denominator is 72, but the **assessable** information denominator is 71. The missing letter is a separate documentation deficiency, not a proven 27th denial of information. The 26 established deficiencies and the one unresolved case are kept separate.

For the diagnostic assessment plan, the corresponding figures are 72 entitled, one letter not found and 71 correctly informed. **Information about the right to a plan is not in itself evidence of a completed plan or treatment delivered.** Section 17 of the memorandum mentions both elements, while the confirmed follow-up on page 9 describes the information check. For each child, the actual dated plan, its content and the service start are required.

The registration review covered all 75:45 courses from the three regions with earlier registration errors and 30 from the other two. The memorandum found them registered in accordance with the guidance. This is the same sample, not 75+45+30 distinct children. Closure of the registration issue cannot be used as a finding that all 75 rights were fulfilled:the same review found capacity-related breaches of the time limit in 72 and information deficiencies in 26 assessable courses.

Force: the whole new target table

Intervention	Average 2021-2023	2024	Original percentage change
Belt restraint	78	71	−9
Maintenance	81	59	−27
Acute sedatives with compulsion	173	167	−3
Total Episodes	331	297	−10

All values are **episodes per 100.000 citizens**,not raw counts of episodes, patients or unlawful acts. The original's rounding note explains that the components' baseline totals 332,whereas the separately rounded total is 331. The figures therefore do not correct each other. The register version is 14. September 2025; the CPR version is 10. May 2025. [CTv25,page 5,table 1]

Control Point	Latest original status	What status documents
Region Capital / Nordjylland control	Completed August 6, 2021	An audit trail; not all patients concerned stop and repair
New compulsion target	Completed August 29, 2024	The target will be changed to 30% reduction by 2030 of three episodes per year. 100.000 compared to 2021-2023
Closer follow-up, task force and analysis of variation	Three separate points completed on 29 August 2024	Implementation of governance initiatives at the level of documentation of the note
Monitoring model	Closure recommended 20. October 2025	New measurement and published follow-up; not meeting the previous half-life target

The former target concerned halving the proportion of patients subjected to belt restraint in 2014-2020 and reducing overall coercion. The new target has a different baseline, three selected forms of intervention and a population denominator. A reduction of 10 per cent in the new measure is therefore not a documented halving under the old one. The episode table must be linked to board decisions on initiation and duration, specific cessation, individuals and compensation. Closure of oversight does not show this linkage.

Adopted 2026: review of both deadline and transition

Act 1762/2025 amends § 82 b of the Health Act: assessment in a child and adolescent psychiatric department must begin within **one month**,and final assessment and treatment must be offered/started within **two months**,if professionally possible. If this is not possible,a further care plan is required within the same two months. The new § 87,subsection 6,provides access to a contracted hospital if assessment has not started within one month or final assessment/treatment has not started within two. **The enacted text does not contain the bill's special initial capacity condition in § 87,subsection 6.** The original consultation or an earlier ministerial summary must not reinsert it into the law. [PsyL25, § 1, nr. 2 og 5]

The Act entered into force on 1. January 2026. Under the transitional provision,the new assessment and choice rules in § 1,points 1-6,do **not apply to referrals received before entry into force**. The 75 September-2024 processes therefore cannot subsequently be assessed as though they had only the new deadline for final assessment from the outset. Earlier breaches of law are not erased by the later amendment. The remainder of the new Act increases municipal charges for psychiatric patients who have completed treatment:2.404/4.808/7.212/9.616 kroner at the 2025 level,with separate bed-day thresholds. These are incentives between public bodies,not compensation to patients or relatives. [PsyL25, both original pages]

Legal argument and specific resale requirements

Conclusion: Repeated deadline and information deficiencies must be followed through to the child's actual assistance and loss. **Authority's statement:** All regions describe intensified information efforts; the audit recommends closing selected tracks. **Original evidence:** C121/25's 75-case methodology and regional information table, together with C117/25's changed episode/target table. **Discrepancy:** A process improvement or correct registration does not document timely diagnostic assessment, free choice, an actual plan or cessation of an unlawful intervention. **Relevant rule:** The health law applicable at the time of the event, the specific legal authority for intervention and, where the conditions are met, the ECHR's protection of life, integrity, family and remedies. **Act or omission:** Capacity-driven delay and missing information are documented with separate denominators. **Legal departure:** Each right must be examined separately; the authority's organisation does not in itself change the statutory duty. **Significance for the outcome:** Lost access and additional waiting time may lead to losses concerning treatment, schooling, income support and family life. Specific losses require contemporaneous records and dated services; the 162 days are an average, not each family's documented loss. **Responsibility:** The region's chain of action and information, together with the Ministry's separate monitoring duty; personal criminal culpability requires its own examination. **Demand:** A person-linked timeline, basis for the deadline, valid exception, actual plan and treatment, free choice offered/exercised, and independent investigation and reparation of the documented consequences.

Specifically, the still unpublished consequences register must state: receipt of the referral; professionally documented exception to the deadline; every information and plan date; diagnostic assessment and treatment start/end; actual cessation of the intervention; the child's and parents' separately documented losses; complaint, relief, compensation decision and payment. Each data gap is linked to region, case record and period. No request to an authority has been sent.

Patient insurance: supplementary historical register numbers

Controlled October 7, 2026. Source: register analysis dated 9 March 2012,, Table 20, printed / PDF page 46, and Table 6, page 19. Revisions and appeals pending may change the registries; 2011 is provisional before the annual report (page 2). This is the original data version, not a reconstructed annual register.

Year	Medicinal product Notices	Decisions	Recognition r	Published recognition p Rotent	Compensation DKK million	Notifying persons, both damage areas	Notifications personal records; ed
2006	255	321	57	17,8	30,4	4.797	5.097
2007	338	243	61	25,1	32,0	5.237	5.728
2008	312	264	94	35,6	33,0	5.125	5.817
2009	356	404	144	35,6	54,0	5.724	6.664
2010	347	425	106	24,9	51,1	6.678	7.814
2011	379	352	68	19,3	48,0	7.250	8.364

Own method: the decision denominator is actually published and directly usable; annual incoming cases form another population. Not recognised = decisions minus recognitions gives 264/182/170/260/319/284, but the original does not divide this remainder into substantive refusals, rejections or other outcomes. Compensation amounts are stated as compensation, and report pages 5/13 describe payments; award year and bank payment must still be distinguished when comparing with newer award tables. Annual claimants include pharmaceutical cases; they are not recognised injured parties. There is no identity deduplication across years or public/private employment. People and cases must not be added. The 2011 person account’s 8.364 cases differ from treatment claims of 7.993 plus pharmaceutical claims of 379 = 8.372 and the summary’s 8.375; the difference is retained as a population/version discrepancy.

Documented path to the original annual reports

The Folketing's public ODA metadata have been checked using the title words Patientforsikring and årsberetning/rapport and the relations Fil and SagDokument. All documents below have an empty Fil relation. **Subsequently, the official annual originals for 2006-2010 were actually recovered and substantively read through public archive copies of the authority's own download paths.** See patientforsikring-originaler-tid-genopretning-og-versioner.md and the two original table modules. The empty ODA relation remains a local access finding, not a current gap for 2006-2010.

Statistical year i title	Document ID	Collection / selection / annex	Registered date	Status
2006	491418	2006-07 SUU 613	21 June 2007	Annual original 2006 materially read, PFOR06; five regional originals also read
2007	523493	2007-08, 2nd Collection, SUU 434	16 June 2008	Annual original 2007 materially read, PFOR07
2009 but received 2009	563221	2008-09 SUU 555	29 June 2009	2008 annual original found and read separately, PFOR08; this ODA title's relation to 2008 original has not been verified
2009	260712	2009- 10 SUU 399	15 June 2010	Annual original 2009 materially read, PFOR09
2010	207127	2010- 11, 1st Collection, SUU 347	22 June 2011	Annual original 2010 materially read, PFOR10
2011	146810	2011-12 SUU 354	12 June 2012	Original annual report requested
2012	59754	2012-13 SUU 329	4 June 2013	Original annual report requested

ODA lookup can be replaced by the specific document ID for each row. Direct Annex Pages for 2009-2012 did not provide readable original for this check.

Remaining precise data request

To Patienterstatningen: Produce original full-year statistics/annual reviews for 2011-2012 and current revised register extracts separately. The substantively read 2006-2010 annual originals now provide precise treatment denominators, rejection categories and organisational outcomes; they are no longer requested as unread originals. For both injury areas, separately state eligibility decisions, acceptances by rule, substantive refusals, rejections/other closures, decision/notification years, changes following appeal/reopening, unique people by year/period, public/private treatment providers and actual payment years. In the 2012 analysis, table 20 still provides medicinal-product outcomes for 2006-2011 in the explicit analysis version. Outstanding items are the 2011 exact treatment denominator, medicinal products 2012,2011/12 full-year originals, the current common revision and person/payment linkage. The documented 2007/2008 reconsideration groups require separate actual follow-up. To Folketinget's archive: Clarify the title relationship in document 563221 and obtain the 2011/12 originals; metadata alone do not count as reading.

Patientforsikringen: what the 2006-2010 originals document about harm, refusals,time and redress

The historical originals document both serious health damage and deficiencies in the subsequent verification of compensation. The figures show precise decision denominators, public / private hospital groups and various grounds for refusal. They also show why a recognised injury, a changed decision and an actual restored citizen's situation must be kept in separate accounts: financial compensation can follow several years after the damage while a lost body, a child's brain injury or death persists.

This module is accompanied by 77 numerical original tables with 712 factorial rows from five annual reports and 20 regional original tables with 216 factorial rows from the official 2006 statistics. The tables overlap within and across sources. **The 928 series are documentation series, not 928 cases or persons.** All figures are in the two separate table modules. Source maps and direct archives are included in the tables' source lists and moved at the collection to the last bibliography of the report.

Precise decision denominators and locally documented audits

Year of settlement; and publication version	Treatment of Decisions	Recognised	Material ag / compensation conditions; Not achieved	Outside coverage Moat / others refusal classes;	Locator
2006 Annual Report 2006	4444	1482	2515	447 outside	PFOR06, Figure 6, printed 30 / Physical 16
2007, Annual Report 2007, legal classes	4882	1488	2798	596 outside	PFOR07, Figure 7,30 / Physical 16
2007, same publication, coverage areas	4882	1495	Not separate	3387 non-recognised total	PFOR07, Figure 4,27 / Physical 14
2008 Annual Report 2008	4659	1506	2603	550 outside	PFOR08, Figure 8,13 / Physical 7
2009 Annual Report 2009	6676	2298	3572	806 outside	PFOR09, Figure 9,17
2009, revised overview in Annual Report 2010	6733	2379	3547	583 below minimum, 150 obsolete, 74 others	PFOR10, Figure 9,15
2010 Annual Report 2010	7038	2518	3735	510 under minimum, 156 obsolete, 119 others	PFOR10, Figure 9,15

The 2009 revision's 57 additional decisions and 81 additional recognitions must neither be added to the 2009 original nor translated into 81 new individuals. The annual reports describe how reopening, appeal and judicial review can change earlier registrations; the 2010 report also mentions internal quality control. These described mechanisms do not prove the cause of each difference row. The current documentation establishes the revision difference itself.

The 2007 publication, however, contains an internal discrepancy:1495 accepted claims in the coverage matrix versus 1488 in the legal classes. Both figures and the common denominator of 4882 are retained. Neither denominator is changed by our percentage calculation. There is also a classification change from the 2010 publication's retrospective: refusals are divided into compensation conditions, minimum threshold, limitation and other. The earlier class *outside the Act's scope of coverage* therefore cannot be carried forward as an unchanged historical series without source support.

Public hospitals are a defined sub-group

Year and source version	Public: Recognised	Public: erecognised	Public: of done	Private: anerk ended	Private: Recognised	Private: dejor t	Source
2006, five regional originals	1310	2445	3755	53	89	142	PFR06H / M / N / S / Y, section 1-2; own regional funds
2007, annual original	1291	2765	4056	72	121	193	PFOR07, Figure 4,27 / Physical 14
2008, annual original	1232	2469	3701	83	107	190	PFOR08, Figure 5,10 / Physical 6
2009, annual original	1834	3288	5122	219	237	456	PFOR09, Figure 5,13
2010, annual original	1982	3337	5319	258	326	584	PFOR10, Figure 5,13

The public hospital defines the institutional injury location. The figures contain no deduplicated count of employees, patients, children or parents. Medical practices, out-of-hours doctors and private hospitals do not become public employers because the public sector funds compensation. Municipal health schemes appear separately in the originals from 2007: decided/recognised 6/2 in 2007,5/1 in 2008,13/1 in 2009 and 36/2 in 2010.2010 prose's municipal 10% is inconsistent with the same table's 2/36, rounded to 6%.

Healthcare injuries are recognised under different rules. The 2010 original's figure 8 separates 1536 decisions on suboptimal diagnosis/treatment from 7038 total decisions.1178 concern public hospitals,139 private hospitals and 2 municipal health schemes; the remaining areas follow in the reader table. The 2009 original's public group has 1057/5122 under the specialist rule and 632/5122 under the tolerability rule. A rare and serious injury qualifying for compensation does not alone prove negligence; the specific evidence of the medical or administrative act must be retained.

Misuse of practice: five drop-foot cases and radiation treatment

Five patient-compensation cases had been refused under an overly restrictive definition of foot drop. The 2007 annual report, printed page 12/physical page 7, describes Patientforsikringen requiring complete foot drop, whereas appeals-board practice also recognised partial foot drop after hip surgery. Patientforsikringen decided to reopen five cases decided in 2006 and 2007 in which compensation should nevertheless be awarded according to the report. The document thus establishes its own departure from practice and a specific duty to remedy it. It does not document dates of new decisions, actual payment or patients' full financial losses during the wait.

The same review refers to approximately 80% of cases joined, 5% changed cause of injury and 15% changed assessment of basic disease. The number of cases examined does not appear in the section. These percentages cannot be converted into national numbers or added to the five specific reallocations identified.

Appeal-body affirmation did not prevent incorrect application of a rule. The 2008 annual report, printed page 6/physical page 4, first states that appealed cancer-waiting-time decisions had previously been affirmed. Patientforsikringen then acknowledges becoming aware in autumn 2008 that radiotherapy waiting-time rules had been misinterpreted. It decided to review all waiting-time cases and issue new decisions in relevant cases in 2009. The strongest documented criticism is that an actual misunderstanding of a rule persisted within a system where earlier appeal affirmations had been emphasised as grounds not to change practice. Planned reconsideration does not document actual fulfilment of every affected patient's rights.

In the substantively read statistics, management and administration sections of the 2009/2010 annual reports, no reconciliation of this reconsideration was found: numbers of cases reviewed, amended, reimbursed or paid, and actual dates. This is a local follow-up gap, not a reservation about the acknowledged error itself.

The 2007 original provides a specific allocation of responsibility in case 07-0120, printed pages 14-15/physical page 8: referral 7. August 2006, indication for radiotherapy 10. August, treatment 11. October. The hospital notified Sundhedsstyrelsen seven days before the four-week deadline expired; according to the report, the agency did nothing. Patientforsikringen held SST responsible and awarded 10% compensation for permanent impairment for the psychological burden of a 10% worse statistical survival prognosis. This account of the decision describes specific public-authority intervention by omission, a documented health risk and compensation; it is not a full original decision text or criminal judgment.

The status of the case complex 4. April 2008 was 159 reviews, 136 decisions and 18 recognitions with just over 1,5 million DKK awarded. Eight decisions concerned the proceedings of the SST, of which three were recognised. The three are a subgroup, not another three next to 18. This cumulated group overlaps the annual registers.

Waiting time to a decision and to financial redress are different trajectories

Source version and locator	Actual time	End point / delimitation	Measure
PFOR06,34-35 / Physical 18	Approximately 275 days	Year-end average; non-documented annual average	180-200 days incl. material retrieval
PFOR07,34-35 / Physical 18	251 days	Average of the year for decision	180 to 200 days
PFOR07,7/physical 4	6 → 8,5 months	4th quarter 2004 → 4th quarter 2007; second sample	No additional year series derived
PFOR08,4/physical 3	320 days	Annual average 2008	180-200 days referred to
PFOR08,24/physical 13	332 days	From receipt to decision; same publication says second figure above	220 days at end 2009
PFOR09,7 and 30	288 days	Whole 2009	180-200 days in general; 220 days at the end of 2009
PFOR09,7	259 days	1st quarter 2010	Quarterly sample, not 2010 annual average
PFOR10,9 and 23	233 days	All 2010 to the first decision on recognition / refusal	200 days forward
PFOR10,23	202 days	At the end of 2010	180 to 200 days

The 2008 original specifically explains that closing a backlog of old cases increases an average calculated on decided cases. The same average can improve by deciding new cases while old ones remain pending. The report's examination therefore requires decision time, the age of pending cases and the time of actual redress. A fall in the mean for closed cases does not on its own document faster protection for all patients. The 2009 administration section's wording *December 2010* concerning 241 days is also a local date conflict in the 2009 report; it is not changed to December 2009 by guessing.

The amount breakdown after the year of notification shows another part of the progress: in 2010, 18% of the amounts declared relate to notifications from 2010,41% from 2009,24% from 2008,10% from 2007,4% from 2006 and 3% before 2006 (PFOR10, Figure 14,18). These are amounts, not patients' shares. The original explicitly explains that partial payments may be made before the final statement. Thus, 24% of the amounts for 2008 reviews cannot be translated into 24% of patients without compensation until 2010.2009 the original's figure 16 also uses the amounts, while the corresponding text calls 4% a patient share; the recoding is not supported by the figure.

A specific child in the 2007 report, printed page 9/physical page 5, was born with brain damage in 2003 following obstetric care the institution assessed as below specialist standard. The child received a provisional 30% permanent-impairment rating and compensation in 2005; according to the report, final calculation had to await the fifth birthday in August 2008 (05-2129). The case documents different endpoints, rather than five years waiting without any compensation. Another account concerns a woman aged 36 whose motor nerve in the hand was severed during a 2004 operation:15% permanent-impairment compensation in July 2006, continuing lost-earnings compensation during rehabilitation, while final loss-of-earning-capacity calculation was expected after education in summer 2008 (06-0402). Final dates and bank payments are not stated.

The 2008 annual report, printed page 18/physical PDF page 10, describes a child who suffered birth-related oxygen deprivation following inadequate monitoring: brain damage, paralysis of the arms/legs, and loss of visual and eating function;120% permanent impairment and 4,2 million kr. in total compensation. The amount compensates for a financial loss under the scheme's rules. It does not prove that the child's health, the family's life or opportunities for participation have been restored. The annual statistics' compensation total is therefore not an account of disabilities reversed or life-years regained.

Medication injuries, duty to provide information and rejection as time-barred

The 2006-2010 originals now give precise pharmaceutical decisions and reasons. The 2006 original has 51 / 321 recognition; 2007 retrospective 57 / 321.2007 original has 55 / 243, while 2008 retrospective has 61 / 241.2008 has 94 / 264,2009 has 144 / 404 and 2010 has 106 / 425. These audit versions are separate. 2007 broad class of the original; *obsolescence, etc.*66 is not comparable to mere obsolescence with the 2008 publication's 2007 class 34.

The clearly separate limitation counts in the 2008 publication are 34 for 2007 and 22 for 2008;the 2009 original has 25 in 2009,2010's original 15 in 2010.2010's treatment-injury matrix additionally has 156 rejections as time-barred. Medicinal-product and treatment registrations may overlap the same person; the sums are not automatically unique patients. None of the figures establishes on its own which authorised healthcare professional failed to inform a particular patient.

There is, however, a documented systemic line of knowledge. The 2007 pharmaceutical section, printed pp.18-19/physical p.10, states that many contraceptive-pill cases had been reported too late, the health authorities had been informed and information on Lægemiddelstyrelsen's website expanded. The 2008/2009/2010 sections continue to describe patients attributing late reporting to lack of awareness of the scheme, and emphasise healthcare staff's statutory duty to inform and, where necessary, help with reporting. The relevant specific investigation therefore concerns who knew of the injury and information need, what information was provided and whether a failure caused loss of access to compensation. Unrecorded cases are not numerically inferred from the registers.

The scheme excludes or refers to several groups, including some cases without physical injury, cases below minimum amounts, pre-coverage damage and treatment failures to be tested in the treatment scheme rather than the adverse reaction scheme. The 2006 annual report's child and psychiatric reports relate to the period 1996-2006 as a whole; 21 recognised child cases should therefore not be presented as 21 children during the reporting period. At the same time, the 91 alleged determinations of the psych section include two pending cases. The source conflict is maintained in the table module.

Actual source control and precise residue

The 2006 annual report's physical pages 10-18 have been substantively read;they contain pharmaceutical statistics,children/psychiatry,treatment tables and administration. Page 32/physical page 17 has also been checked visually in RAM and confirms 350607186 kr. and the public-sector 315853481 kr. The 2007 report's physical pages 4-5,7-8 and 10-18 have been substantively read;parts of the initial reading of other examples were truncated in the tool display and are not claimed as fully read. 2008 physical pages 3-13,2009 physical pages 5-30 plus 32,and 2010 physical pages 5-24 have been substantively read. The 2009 page 31 was truncated in the first display;the administrative-decisions table is verifiable at 2010 page 23,and no full reading of 2009 page 31 is claimed. Covers,contents lists and some other introductory pages have also been checked;financial-account pages outside these intervals are not claimed as fully read. All four numeric tables in the five regional 2006HTML originals have been read and saved as separate facts.

H01 is substantively complete for 2006-2010 treatment denominators by original version, not for 2011 or medicinal products 2012. H02 is expanded with public/private decision outcomes 2006-2010; a full person count and all later years' organisational delimitations do not follow from this. H03's earlier person series 2006-2011 remains, but new decision and monetary figures do not resolve person deduplication.

There are specific but still unread leads to originals for 2011/2012:ODA document 146810 (*Patient Insurance Association's annual report 2011*,12. June 2012) and 59754 (*annual report 2012*,4. June 2013) still return empty Fil lists in this check. A publicly archived official statistics page from 7. July 2016 has the precise download paths for the 2011 annual report and full-year figures for 2009-2011 and 2010-2012. Domain CDX has been checked with matchType=domain, without a MIME/status filter:2164 URL entries on patientforsikringen.dk and 4406 on patienterstatningen.dk. The old space-containing path for the 2011 annual report and the old path for the 2012 statistics appear only as later redirects. The newer hyphenated paths from the 2016 page have not yielded an actual PDF original in this check. Document titles/links are retrieval leads, not figures read from the source. The 2011 decision denominator is not reconstructed by dividing by a rounded rate of findings in the party's favour.

Reasonable pleas and necessary requirements

The strongest primary ground of appeal is the acknowledged practice error of the radiation waiting period and the five drop-foot cases: the institution knew the wrong legal boundaries and had identified a need for retreatment. The specific requirements for full liability accounts are the date of first knowledge, the list of decisions concerned, the date of resumption, the new outcome, the first and final payment, interest and any remaining losses. Previous accessions do not exempt the specific application of the rules from independent review.

Next, the documented health consequences and specialist deviations: the registers contain recognised avoidable injuries, and concrete courses describe severe disability, organ / functional loss and impaired survival forecast. A replacement decision must be verified in the original medical causality document:

the authority's knowledge and actual intervention. Any criminal act requires independent examination of the offence elements, culpability and responsible person; it is not inferred from the annual register's term *finding in the party's favour*.

Documented errors and source discrepancies are specifically delimited above: incorrect waiting-time interpretation, five foot-drop cases refused too strictly, particular internal statistical inconsistencies and clearly documented revision/classification changes. Hypotheses requiring further evidence concern an unfulfilled information duty in each time-barred individual case, the extent of unreported compensable injuries, whether planned reconsideration actually produced correct payment, and any individual criminal responsibility. None of these hypotheses downplays the errors actually acknowledged.

Patient insurance 2006-2010: original figures by source version and delimitation

The tables complement the later registry versions. Repeated historical years and case groups are overlapping versions. They must not be added together as new patients, injuries or decisions. **-** reproduces an empty tickler that has not been recoded to zero. Treatment and medicinal products are kept separate. Source cards are assembled at the end of this module and shall be moved to the final source list of the report by composition.

Patient insurance 2006: regional original decision and financial statements

Five regional tables apply the later regional division to decisions from 2005/06. The year 2005 provides comparative context; it is not added to the report period's 2006-2025 figures. Findings in the party's favour/refusals and legal classes are overlapping descriptions of the same decisions. Hospital rows are not unique patients or employees.

Limit 2006	Finding in the party's favour	Rejection / others non-recognition;	Decisions
Public hospitals, total five regions Table 1	1310	2445	3755
Private hospitals, total five regions Table 2	53	89	142
All coverage areas, total five Table 3	1482	2962	4444

Public hospital amounts to DKK 315853481, and all areas total DKK 350607186. These sums match the 2006 annual report's printed page 32. They differ from the same annual report figure 7 s 380,0 mio.kr and from later 2006 registerrevision 380321604 kr. The version difference shall not be interpreted as additional payment.

Health: known risk, long review and documented oversight failure

Three public originals provide concrete knowledge and responsibility chains. The patient's full clinical dossier has not been published in them. Verification of the Authority's own action and omission must therefore be kept separate from a claim that the initial treatment caused death or other damage.

A father's complaint after the son's death: 1.957 days for a decision

Conclusion: The period of documented proceedings of the Patient Complaints Board was unacceptable and repeated complaints and promises did not ensure timely review. **Concrete statement by the Authority:** The board promised to move the case forward and regretted the wait several times. **Original proof:** FOB09T, the entire Legal Information 10-page PDF, with the opinion of 22 October 2009, j.nr. 2009- 0031- 400. PDF1 is the printed cover; printed s.1-9 corresponds to PDF2-10. All pages are text read in RAM. The dates in the chronology are checked and the following days are their own calendar differences.

Event or interval	Date or time	Meaning	FOB09T
Son died.	23 June 2003	Historical event prior to the reporting period; subsequent review extends into the period	printed 3 / PDF4
Admissions	8 in just over 2 years	Clinical background; no eight documented regulatory errors	printed 1 / PDF2
Letter of complaint from the father	12 January 2004	Date of letter, not date of receipt by the Board	printed 1 / PDF2
Complaint received	23 January 2004	Start of the full administrative time account	printed 1 / PDF2
Accepted for treatment	19 April 2004	Later administrative start point	printed 1 / PDF2
Calculated average by assumption	8 months	Notice of the Board, not actual compliance	printed 1 / 8, PDF2 / 9
Preview returned	27 April 2005	Approximately one year at the medical officer institution	printed 1 / PDF2
Telephonic view of response before Christmas	2 September 2005	Reported simultaneous information by the father	printed 2 / PDF3
First express regret	18 April 2006	The Director's promise of promotion	printed 2 / 6, PDF3 / 7
Renewal of undertaking	24. May 2006	No safe time frame	printed 2 / 6, PDF3 / 7
First proposal for a decision for consultation	18 September 2006	Process step, not final decision	printed 2 / PDF3
Revised proposal for consultation	16 March 2007	The same procedure	printed 2 / PDF3
Meeting of the panel	19 November 2007	The meeting did not end the citizen's waiting time	printed 2 / 7, PDF3 / 8
Third proposal for consultation	23 November 2007	Renewed hearing after the meeting	printed 2 / PDF3
Father's speech	30 January 2008 / 20 April 2008	Corrected and supplemented information	printed 2 / PDF3
Expert opinion	28 June 2008	Received at month shift June / July; later liability period	printed 2 / 6, PDF3 / 7
Complaint to the Ombudsman	2 January 2009	Received from the Ombudsman on 5 January	printed 2 / PDF3
The Ombudsman's inquiry initiated	11. May 2009	Separate control tracks	printed 3 / PDF4
Patient-complaint decision sent	2 June 2009	No basis of criticism on the basis of the Board's assessment	printed 3 / PDF4
Ombudsman's opinion	22. October 2009	Critifies time and notification; does not test the material outcome of treatment	printed 1 / 3 / 7-9

Event or interval	Date or time	Meaning	FOB09T
Receipt → Decision	1.957 days	The entire process of complaint, start before 2006 and end before the period	Own calculation
Acceptance → Decision	1.870 days	Display of alternative start point	Own calculation
Conference → decision	561 days	The result was more than 1 ½ years after the meeting.	Own calculation
First regret → decision	1.141 days	Commitment without timely completion	Own calculation
Study → patient evaluation	22 days	Sequence; not proof of the entire reason for the timing of the decision	Own calculation
Ombudsman complaint → out of court	293 days	Controlling time, no additional clinical treatment or intervention time	Own calculation
Regrets	4	18 April 2006,7 April 2008,2 and 8 January 2009	printed 6 / PDF7
Returns of case handlers	4	Three shifts; the Ombudsman points out that shifts can also be a consequence of a long time	printed 5 / PDF6
Reporter's reply	3 to 7 days	Not criticised at response speed; the adequacy of content not studied	printed 7 / PDF8
Notification in case of delay	at least every 3 months by its own system;	The system was not followed during the test	printed 8 / PDF9

Discrepancy or deficiency: A prompt reply to a reminder is not a timely decision on the merits. Nor is a board meeting the point at which the individual's appeal is reviewed through a notified decision. The Ombudsman criticised the total time of almost 5½ years as extraordinarily criticisable, even allowing for the specifically acknowledged complexity. He did not examine substantive correctness or every investigative step. This precise limitation does not negate the separate findings on time and notification.

Relevant rule, conduct and departure: The opinion applies good administrative practice and paragraphs 206-208 of the Ministry of Justice's guidance on the Public Administration Act. Under the Ombudsman practice reproduced, general resource shortages or more cases cannot extend the objectively acceptable time. The historical benchmarks of approximately half a year for uncomplicated cases and approximately 1 year for more complicated cases are assessments from an earlier specific investigation, rather than general statutory deadlines for all healthcare cases. The board's specific conduct comprised lengthy waiting, more than half a year of inactivity and missing notifications during periods when the already adopted procedure required notice.

Significance for the outcome, responsibility and demands: The father received the formal patient-complaint decision only almost six years after his son's death. This is lost review time in a serious family case, not documentation of six years of continuing physical harm to the son. The director's promises and earlier information procedures document knowledge of the problem. The demand is to follow every identified promise and oversight finding through to actual changed handling, a decision and individual reparation. Compensation, personal criminal culpability and a connection between treatment and death are not determined in this opinion.

The original also contains earlier criticism of delay from 24. October 2006 involving 34 months' processing, case no. 2006-0697-423, and a general investigation of 60 cases from 2001/2002. Those 60 represent historical knowledge predating the period and must not be added as new cases to the 20-year accounting. In December 2006, the notification procedure was reinforced, and on 28. March 2007 the Ombudsman closed that follow-up. The later 2009 case showed another failure. Completed follow-up and a staff instruction had therefore not documented that the same protective procedural step was actually performed in that subsequent case. [FOB09T,printed4,8-9/PDF5,9-10]

The supervision of a specialist: acknowledged downgrading and lack of journalism

Conclusion: The Danish Health Authority's own account documents lack of progress and inadequate registration of concerns raised in a known patient-safety course. **Authority's specific statement and original evidence:** SSTAM13 is the account of 7. May 2013, case no.5-441-554/1, sent to the Danish Parliament. The entire official HTML text and PDF text reproduction have been read,8 pages. Page images could not be opened; no visual check is claimed. The account reproduces the authority's own case information, not all original patient records or internal messages.

Item	Number / date	Limitation and meaning	SSTAM13
Historical appeal	4 patient cycles in 2001	Before the period; known history, not new 2006-2025 events	p.3
Previous complaints until approximately 2008	6 cases, 5 of which without criticism and 1 statement criticism	Not documented that all came in after 2006; overlap with other events unknown	p.3
Communications raising concerns	From 2006; number not disclosed	Psychiatrists' communications about possible overdiagnosis/overtreatment; individual notes required	p.3
Forensic coroner	2008	The specific patient 's treatment triggered further control; cause of death not established here	p.3-4
Reporting to the Board	2 June 2009	Same coroner's programme	p.4
Additional health records	11	Study take-offs; not 11 new documented injuries	p.4
Record information received	28 April 2010	Actual case material received	p.4
Criticism in the original course	14 December 2010	Post-notification criticism by the Patient Complaints Board	p.4
Decision on further reporting	20 September 2011	7 of 11 to the Board, 4 not forwarded	p.4
Intended meeting	Never called	A technical meeting was not held.	p.4
Actual reporting	29 February 2012	7 courses of treatment transmitted	p.4
Critics with indentation	7 of 7,25-26 September 2012	Subgroup of 11; no further 7 patients	p.4
Consultation of injunctions	7 November 2012	Separate supervisory response after list criticism	p.4
Deferral requested	19 November 2012	Not date of the order	p.4
Comments received	3 December 2012	Consultation	p.4
Professional injunction	10 December 2012	Supervisory reaction; not compensation or punishment	p.4 / 8
New psychiatrist report	19 February 2013	New information; not self-proven damage	p.4
Records requested for follow-up	22 April 2013	Information requirements; undocumented final follow-up	p.4 / 8
Less-priority period, the original words	Autumn 2010 → February 2012, "20 months'	Calendar and number of votes not immediately; exact start date missing	p.7
Meetings of supervisory groups	Every 14 days	Designated new scheme; unmeasured effect in all cases	p.5 / 8
Normal demand follow-up	3 to 6 months	Process description by the Management Board; not an exact national time series	p.8
Announced inspections of treatment sites	Every 3 years	Encouraged scheme after 2012 legislation	p.7-8

Item	Number / date	Limitation and meaning	SSTAM13
Enhanced post-2006 supervision	About 10-15 annually	Rounded historical activity description; not exact annual rows	p.5
Consignment of approval in case of danger	About 2-3 a year	Same time limit	p.5
Temporary limitation	About 2-3 a year	Same; possible person overlap unknown	p.5
Professional supervision	About 800 a year	Cases, not unique risk persons	p.6
Report requested in 2008	60 health professionals	The original calls the Board of Disciplinary Board in 2008, even if it is only created 2011; defects in designation are preserved	p.6
Report requested in 2011	About 150 health professionals	Rounded, possible overlap with other controls	p.6
Conversation call	About 30 annually	Process description, non-strapantal	p.6
Expected new licensing measure	10-20 annually from 1 July 2013;	Forecast of absence of supervisory involvement, non-effective waivers	p.6

Discrepancy or deficiency: Four of 11 treatment courses were not referred to the board because the agency considered there were no grounds for criticism. This is a known excluded population; it must neither disappear from the investigation account nor be counted as four documented breaches of law. Seven formal admonitions fall within the 11, and the original post-mortem examination case is described as preceding the additional 11. An account of cases can retain these elements; a total of 12 individuals requires identities actually to be distinct. The relative's pre-period complaint and the six earlier complaints have further unknown overlap.

There is a concrete time conflict in the original: the period from autumn 2010 to February 2012 is called 20 months. This number shall not be used as an exact interval without control. The dated steps provide a more verifiable chain: reception 28 April 2010, criticism 14 December 2010, decision 20 September 2011 and transmission 29 February 2012. The dates require the original records to explain when the case was actually downgraded. The acknowledged lack of momentum is not denied by the inconsistent duration indication.

Relevant rule, conduct and legal departure: The agency describes powers of intensified oversight from 2006, temporary restriction of professional activity from 2007 and professional orders based on its own investigations from 2011. The latter change removed the requirement for a prior criticism decision for that particular response avenue. Historical legal authorities must be checked in their own statutory versions before determining which specific response should have been chosen at each point. The documented failures comprise a meeting not held, acknowledged lack of prioritisation and file notes from which the healthcare professionals concerned could not be identified. The agency also acknowledges that a case was overlooked in access to documents after 4. January 2013 and only included after the journalist's objection.

Significance for outcomes: Concern information that cannot be linked to the correct healthcare professional weakens the linking of warnings and detection of recurrence. An overlooked case weakens public scrutiny of what the authority knew. A meeting that did not take place and postponed forwarding delay the response to known problems. Specific subsequent harm and the number of patients exposed during the delay cannot be calculated from the statement. The agency's assertion that new meeting arrangements ensured prompt and effective follow-up supplies no comparable impact measurement and cannot close this element of consequences.

Responsibility and specific demand: Public accountability assessment must concern the agency's employees, management and documented duties. The specialist's employment status cannot be inferred as public from the oversight statement. Demand the original concern memoranda, case-allocation/prioritisation decisions, meeting decision and subsequent record trail, the 11 patient files, all seven board decisions and complete follow-up outcome of the order. Examine whether the responsible authority promptly used its specific protective powers after receiving sufficient knowledge. For a documented risk to life or of serious harm, the relevant ECHR2/3 duty must be applied separately. The statement alone establishes neither a Convention violation for every patient, a criminal conviction of public employees nor a specific compensation amount.

The same legal liability: the hospital doctor was exempted following an unlawful practice

Conclusion: There was a documented administrative liability exemption for a particular hospital practice which lacked legal basis. It must not be excluded as the general use of secretarial assistance, nor must it be extended to a general immunity of all public servants.

The Authority's concrete statements and original evidence: FOB10J is the Ombudsman's full original opinion 2010-4-4,25 October 2010, cf. point 2008-2276-420. All 13PDFpages are read in memory; PDF1 is printed in front and printed 1-12 corresponds to PDF2-13. A specific patient had complained about a poor record in a 2005 / 2006 course of treatment. The committee had not held the hospital doctor responsible because a secretary introduced the dictates. The Board informed 15 September 2009 that it was a long established practice based on a significant number of decisions. The National Health Service and the Ministry had known and accepted it. [FOB10J, print1,6-7 / PDF2,7-8]

Non-conformity or deficiency: The law did not distinguish in the relevant responsibility between a hospital doctor and a doctor in its own practice. The technical writing could be carried out by a secretary, but this did not change the legal record of the doctor responsible. The Ombudsman's conclusion describes 20 years of government acceptance of illegal practices. This is the duration of the described practice concept, not a count of 20 years of unique patients or 20 years within 2006-2025. Not available. [FOB10J, print9-12 / PDF10-13]

Relevant rule: Before 2007, section 13 of the Medical Practitioners Act and Executive Order 846/2003, especially sections 4,8,18-19; thereafter chapter 6 of the Authorisation Act and Executive Order 1373/2006. The reproduced rules require record-keeping, source/time identification and retention. Section 25, subsection 2, of the reproduced Authorisation Act requires retention of records relevant to a complaint, supervisory or compensation case while it remains pending. The documented statutory text is historical and must not be presented as an unchanged current rule without checking subsequent amendments. [FOB10J,printed2-5/PDF3-6]

Action and legal deviation: The supervisory body applied a practice which exempted the hospital doctor from a statutory liability on a basis which the law did not allow. The Ombudsman called for amendment and informed the Parliament's Committee on Legal Affairs and the Health Committee in accordance with Section 24 of the Ombudsman's Act on maladministration of major importance. The repetition of this practice by a later authority was not an independent evidence of legality. [FOB10J, print12 / PDF13]

Significance for the outcome: Missing records affect a necessary tool for treatment, information and later review. When the Board also fails to attribute statutory responsibility, patients' access to having that very deficiency established and explained is weakened. A quality plan, new electronic system or accreditation project is a possible future action; the original does not present a patient-linked account of reconsidered decisions or remedied losses. [FOB10J,printed8,10-12/PDF9,11-13]

Responsibilities and specific requirements: Demand identification of the decisions that used the illegal exemption from liability, full patient records and simultaneous dictatorship / control tracks, the reasons of the Board, the Ministry and the Board's knowledge dates, as well as subsequent changes and individual retreatments. Try the doctor's specific legal obligation, the hospital management framework and the Board's own actions separately. Management responsibilities do not replace personal record responsibilities. What criminal guilt, compensation or professional response is justified requires each original case and its proper historical rule. There is no individual sentence in this Ombudsman's opinion.

Comparison with private individuals: This is a particularly precise public / private comparison because the Ombudsman tries the same record rule for hospital doctors and practitioners. The proven difference was in the administrative practice of the Authority and not in a lawful general exception for public employment. The opinion does not document the actual fine imposed on a private doctor for the same incident. Such a punishment must not be constructed by equating criticism with a judgment.

At the same time, the Ombudsman maintained a specific legal demarcation: legal liability did not necessarily mean that the doctor was required to have full control and signature of all secretarial services on a case by case basis. This correction of the scope of the obligation to carry out checks did not remove the responsibility for records and was explicitly kept separate from the unlawful exemption from liability. Thus the report can conduct the documented criticism without making the requirement wider than the test rule. [FOB10J, print10-11 / PDF11-12]

In the event of an established illegality, the Ombudsman requested at least notification of the responsibility of the doctor; he accepted that, in the circumstances, a specific illegality could be registered without disciplinary criticism. It proves,

that the class of criticism and legality of statistics are different variables. This does not mean that the lack disappears or that any lack of criticism is wrong. In the overall accounts, a finding of illegality must have its own registration without criticism. [FOB10J, print12 / PDF13]

Evidence and priority action

Documented errors include the very long period of patient complaints, poor notification, the non-completed meeting, recognised downgrading, unidentifiable concern notes and a missed access case. Hypotheses about cause of death, intent, number of victims later or a common personal union require additional primary material. No administrative regret, restriction or set up meeting group is registered here as actual repair for patients or relatives.

The strongest demands, in order, are:secure contemporaneous evidence; identify the authority's specific knowledge and powers; examine omitted action and continuing risk; secure current rights; and document individual consequences, redress and responsibility. The source chain for criticism of delay is FOB09T→dated case chronology→own calendar difference. The source chain for criticism of supervision is SSTAM13→the agency's specific acknowledgment/decision information→the requested original notes and patient records. A later account of the same chain gives neither new independent evidence nor new persons.

Patient compensation: reopening, time limits and compensation interest

Primary controlled October 7, 2026. Own legal analysis is separate from short source maps. Figures relate to decisions / cases, not necessarily unique people.

1. Refusal after modified obsolescence practices and statutory reassessment

Source card L126, 2013-14: Original explanatory notes to the bill,PDF pages 11, 33, 41 and 61-62(printed 10, 32, 40 and 60-61),sections 1.2.4, 2.4, 4 and the notes to§4. Patientforsikringen changed practice in June 2011,the appeal boards in June 2012. Estimated refusals to reopen: approximately 50 in Patientforsikringen, a little over 25-30 in the Patient Injury Appeals Board and 2-3 in the Drug Injury Appeals Board. Appeal outcomes include both upheld refusals and refusals first introduced by the appeal board. Public and private hospitals are included. The notes envisage contact on the authority's own initiative with affected people following a retroactive change; people who had refrained from applying are also covered.

Source card for enacted legislation: Act no. 519 of 26. May 2014, section 2, no. 10, and section 4, subsections 1 and 6-9, PDF pages 3-4. New section 60 b: a 3-year relative limitation period from binding acceptance/assessment of compensation, possible suspension where the claimant lacks knowledge, an absolute period of 10 years after the decision and 30 years after the injury/dispensing of the medicinal product. From 1. July 2014 the amendment also applies to claims already rejected as time-barred under the transitional conditions; an additional period expires no earlier than 1. July 2015. Older patient-insurance decisions have a 5-year relative period under the transitional rule. The Act does not apply directly to the Faroe Islands/Greenland, cf. section 5.

Own conclusion → proof → meaning → rule → action → deviation → consequence → responsibility → requirements: The material shall document a limited group which lost re-admission after the change of practice and a adopted retroactive re-examination. Some 50, 25-30 and 2-3 of the notes are not the three independent groups of a person: first-time and appeal cases may be the same. A correction actually implemented requires contact, reassessment and any payment in each case; the legislative adoption alone does not document any of these events. The claim to the Patienterstatningen / STPK is a common case register with original refusal, date of contact, resumption, decision and payment, and result. It has not been demonstrated here that all the original refusals were illegal under the applicable law; evidence is the change in practice, the loss of rights and the legal reopening option.

2. Understated interest practice: the specific patient

Judgment source card: Supreme Court, BS-1564/2020-HJR, 4. December 2020,pages 10-13,reasons/result. A reported a medicinal-product injury on 11. April 2013; recognition on 8. January 2015; lost earnings of 1.057.718 kr. awarded on 26. August 2015,with interest from 9. April 2015. The Appeals Board upheld the decision on 11. May 2016. The Supreme Court brought forward the start of interest for the first loss period to 23. June 2013 and ordered the Board to pay 50.000 kr. in legal costs. The Act did not require two stages or preclude earlier information on the amount of compensation. The authority could choose two stages, but that choice did not postpone the interest time limit. Patient Compensation itself had a duty to obtain necessary information, see KEL §§ 55/33 and 58 and EAL § 16.

Own recognition of the dates of the judgment	Days	What time actually measures
Notification → recognition	637	Administrative recognition process
Notification → amount decision	867	Time for award, undocumented bank payment
Review → Judgment of the Supreme Court	2.794	Overall course of final interest rate review
Interest date forward from 9 April 2015 to 23 June 2013	655	Additional interest-bearing periods for the relevant item, not the entire duration of the compensation

Own conclusion → proof → meaning → rule → action → deviation → consequence → responsibility → requirements: The economic consequence of the decision was too little interest for the relevant period. The actual departure from the home was not the choice of two steps in itself, but to make the interest rate dependent on subsequent administrative collection, even if necessary information could be obtained earlier. The judgment shall determine the material interest rate correction. The 637 / 867 / 2.794 days document the course; the judgment does not simply classify the entire time as unlawful delay. In fact, further payment to A, tax and recovery period after the judgment requires payment material. An employment or criminal liability claim against a particular employee requires further concrete evidence.

3. Documented system follow-up, with versions preserved

Original	Short source map	Locator
Annual Report 2020	The overturned practice had been used since 2001. Almost 16.000 decisions in 8.744 cases were to be reopened; estimated additional awards of 40-45 million kr. Compensation decision-making paused during 4. December 2020-14. January 2021; recalculations began on 12. April 2021.	PDF 7-8 and 14, printed 6-7 and 13
Annual Report 2021	The same almost 16.000 decisions/8.744 cases. Recalculation took 5 % of case-handling resources; additional resources allocated in 2022. Approximately 35 million kr. in further interest expected.	PDF 8, printed 7
Annual Report 2022	Almost 16.000 decisions were dealt with in 8.785 cases. Recalculations April 2021-December 2022. approx. DKK 55 million further paid to patients; approx. DKK 7 million administrative costs.	PDF 7 and 13, printed 6 and 12
Annual Report 2025	About 8.600 cases of recalculation. PDF 12 dates the judgment at the end of 2022, but PDF 13 identifies the judgment on December 4, 2020.	PDF 12-13, printed 11-12

Own method and impact assessment: These are versions of the same correction process, not 8.744 + 8.785 + 8.600 people. More than one decision / post may belong to the same cause; different cases may belong to the same person. 2020 / 2021 amounts are expectations; the 2022 amount is described as actually further paid, but does not document each individual payment or distribution. The internal conflict of judgments of 2025 must not become a fictional second judgment. 41 days between stop / restart is own date calculation; the source documents institutional break, not that each patient was delayed exactly 41 days. About 20 months of recalculation is also not each person's waiting time. Request case / person breakdown, contacts, closing dates, gross / net correction, change in principal and actual payment date. The crucial documented system point is an unrecognised practice of financial consequence and later mass recovery / payment; the remaining defect is the actual recovery process of the citizens.

4. Subsequent pension scheme changes the legal comparison

Act no. 909 of 21. June 2022,§ 1,no. 3,and §§ 2-3:KEL §§ 24 b-24 c introduced from 1. July 2022. If payment is later than 5 weeks after the award decision, interest runs from **the date of the decision** until payment. The bill's earlier wording on interest from expiry of the 5-week time limit is not the enacted rule. § 24 b regulates compensation items by their nature with reference to EAL § 15; apply these specific rules in the calculation. The Act does not apply directly to Greenland/the Faroe Islands, but may be brought into force for the Faroe Islands by order.

Own delimitation: The new scheme must not be used retrospectively as the yardstick for decisions taken by A from 2015 / 2016. The patient compensation report describes the change in the main administrative features; legal requirements must be traced to:

the agreed wording and the rules of application of the specific period. No new system number of actual contact / resumption according to Law 519 or individual recovery time of persons is documented in the read sources.

Documented, requires further proof, and traceability

• Documented: refusal to resume in L126's delimitation; retroactive access to the law; acceptance by the Supreme Court of the date of interest; acceptance by the originals of the mass recordings and approximately DKK 55 million further paid out in the 2022 version; original version / annual conflicts.

• Requires further evidence: actual follow-up of all 2014recovery requirements, period-unique patients, financial net loss and correction date of each person, accuracy of payment and personal liability.

• Source chain: legislative observations → passed law → concrete original decisions, reproduced in the Supreme Court's explanatory statement → conclusion → annual reports with concrete follow-up figures. The self-assessment of the administrative consequences of the judgment by the annual reports is not independent evidence of legal or adequate restoration.

• Prioritised demand: full contact/reassessment checks for the 2014 group; person-identity verification and payment reconciliation for interest-related reopenings; processing and redress time for each person; then a reasoned assessment of independent responsibility. The report's general ECHR conclusion must rest on the specific right, harm and remedy, rather than automatically call every case alteration a Convention violation.

10. Personal data and historical surveillance series

The 12 years' public inquiry and complaint categories contain a total of **7.944 newly opened case records**. They contain permit applications and inquiries as well as complaints and therefore are not 7.944 established unlawful acts. Likewise, the **315 public inspection and oversight case files** are newly opened files, not necessarily 315 completed inspections.

What can actually be counted as detected error

In 2006, approximately 38 % of Datatilsynet's **completed public-sector complaints** were well-founded, and approximately 62 % unfounded. Among completed public-sector cases, approximately 21 % were complaints and 79 % enquiries. The original footnote says that the closure population also contains cases created in 2005 and a few in 2004. The number of closed complaints needed to convert 38 % into a case count is not stated. Therefore 430 new cases cannot be multiplied by 21 % and 38 % as a documented error count. Annual review 2006, p. 29, footnotes 1–2.

As of 2008, separate uncategorised closed cases occur. In 2010, it is 43% of the closed public cases. This category cannot be presumed to be legal or illegal. New files continue to leave out case work in existing folders, such as modified notifications and extended permits. In addition, in 2006, some 550 changes are reported in existing private research notifications, which are precisely outside new files. 2006, p. 27; 2010, p. 18-20.

Verification of the internal deviations of the originals

The published tables contain concrete discrepancies that are preserved as two source fields rather than being corrected by a guess:

- •2007:113 own-initiative cases, while the stated subcategories 37 +34 +41 +0 give 112. P.23.
- • 2008: 643 public notifications as a main figure, while the specified sub-categories provide 649. See p. 24 and 26.
- • 2013: municipal connections 344 in table, 341 in the following text. S. 22.

• 2014: closed public cases are indicated for 5% complaints + 42% inquiries + 43% uncategorised, total 90%, not 100%. S. 18.

• 2016: public reviews 240 in the main table, 204 in the detailed table, whose delta totals 204. See footnote 21 and 25.

• 2017: private reviews 1.271 in the main table and 1.274 in the detail text; the detail figures summed up to 1.271. S. 28 and 31.

• 2012: the original corrects its own annual report's percentage decline from 9 % to 5 %, footnote 7. P. 18.

The data file contains all published public instalments for notifications, control directories, press initiatives, online surveys and the public / private security category where it is published. The decrease in public notifications after 2015 shall be linked in the originals to joint state research notifications; it shall not be interpreted as a corresponding decrease in errors.

Knowledge and lack of follow-up

The 2010 report demonstrates that the Danish Business and Company Agency continued to follow a 2005 recommendation on police Internet access to a register; the oversight identified further significant IT security issues. There is thus a concrete five-year public knowledge chain, not just a single recent incident. 2010, p. 11.

In 2010, 64 inspections were carried out: ten public and 54 private, while 78 new inspection directories were created, of which 11 public. In 2008 and 2009, 94 and 83 inspections were carried out, of which 32 and 34 were public. The difference is explicitly documented in the 2010 footnote that not all directories led to an inspection. 2010, p. 11 and 20; 2008–2009, p. 11.

Data Protection Agency 2018- 2025 - controlled extension

Status: All eight original annual reports' activity, complaint and notification tables and eight annual administrative reports' time statistics have been read. The outcome of the sanctions shall be supplemented separately. Figures are not numbers of illegalities or unique citizens.

2018 additional time groups, gns. / 50% / 80%: credit complaints 205 / 235 / 462; private research review 62 / 0 / 54; other private reviews 116 / 80 / 285; public reviews 75 / 35 / 427 days. The notifications here concern processing of information, not security breaches. 2018 complaints above: only other complaints. 2019 overall complaint group. 2018 omits atypical cases; journal changes can restore older cases under new start number. The names of the time measurement are not given in the tables. Time does not automatically apply to the citizen's full waiting time or to public complaints alone.

Own documentary control and statistical significance

2020 overview and sub-tables differ in concrete: legislative preparation 605 / 606, advice 2.733 / 2.567, international 1.243 / 1.231, breach 8.773 / 8.772. Public sector of the subdivisions 5.304, private 3.443, other 25 summers to 8.772; no residual person shall be calculated. 2022 authorisation period is originally indicated at 76 days, retrospectively in 2023 to 78. 2022 breaking rise is written 261, while 8.816 − 8.554 = 262.

New cases exclude reopenings and continuations. Notifications under the Law Enforcement Act lie outside the breach column. FO/GL is separate in the activity overview. January 2023 changes the incident taxonomy from 10 to 64; several categories may belong to the same incident. From 2025, administration/accounts are shared with TET; the Danish Data Protection Agency’s substantive tables 3A/4A remain separately attributable to the Danish Data Protection Agency.

The material deficiency is a single closing register. The selected cases of criticism and injunctions in the annual reports document concrete facts, but their number is not a national outcome statistic. A break notification can include many people, repeated episodes and re-notifications; public numbers can neither be added to complaints nor translated into unique citizens.

Specifically necessary registry query

Register request: all closure registrations 2006-2025 with closure date, case ID, event ID, public/private, statutory basis, all outcome markers, reopening relationship, actual compliance/date, anonymised affected-person deduplication, police report/indictment/court outcome/fine payment.

Issue not effected. Numerical registers store their own compact facts, not original texts.

Actual outcomes in defined groups of supervisors

Year	Sample	Name no	Actual outcome / subgroups	Precise demarcation	Primary Page

Odsherred Municipality	2024-0 1-11	10000 0-2000 00	2024-0 4-23	100000; penalty payments	Unencrypted laptops; 1.200 computers are equipment, not persons	Data Protection Agency
Hvidovre Municipality	2024-0 1-22	not less than 20000 0	2024-0 5-27	200000; penalty payments	Dental care system: protected children's / parents' addresses transmitted	Data Protection Agency
Road Municipality	2024-0 8-14	20000 0	Not dated here	200000; fine adopted by the City Court; date not disclosed in read follow-up	Five stolen laptops; not five citizens	Data Protection Agency
Gladsaxe Municipality	2020-0 3-10	10000 0	Not dated here	-; current in the current committee	20.620 citizens' information on stolen unencrypted computer	Data Protection Agency
The Royal Theatre	2024-0 1-09	25000 0	Not dated here	-; current in the current committee	Lack of rules for deletion; number of customers not disclosed	Data Protection Agency
Lyngby-Ta arbæk Municipality	2024-1 1-27	35000 0-4000 00	Not dated here	-; current in the current committee	At least 1.000 former employees retained access; about 30.000 citizens potentially; 1.022 actually accessed in at least one case; other event about 5.000 registered; overlap unknown	Data Protection Agency

Appeals	Date	Result / fine, DKK	Original
Vejle Municipality	2025-03-27	The fine imposed by the City Court was increased; 100000	Judgment, PDF4-5
Frederiksberg Municipality	2025-02-19	Judgment of the Court of Justice confirmed; 50000	Judgment, PDF3-4
Region South Denmark	2026-03-23	Database relationship conviction; PowerPoint relationship acquittal; one total fine; 500000	Judgment, PDF16-19

The two settings of the Region of Southern Denmark are grouped together in the urban judgment SS-5399 / 2023-COPD, 23 December 2024, one fine of DKK 1.000.000. Case T-113 / 2025 -VLR, 23 March 2026, dismissing PowerPoint's relationship and maintaining that:

conviction in the psychiatric-database matter with a total of 500.000 kr. The same judgment links in both follow-ups document the overlap. The appeal is separately in 2026; amounts must not be added.

Datatilsynet's reference to a judgment summary in the RegionSyd case has been replaced with the actual judgment, document 8393. Favrskov/Frederiksberg's ECLI year 2024 follows the publication record; the originals' decision dates are 1. September 2023 and 16. August 2023 respectively. RegionSyd ECLI 2025 covers a judgment of 23. December 2024. The decision date governs placement by year.

Own recognition: actually elapsed time

Authority	Configuration → First dated decision, calendar days
Hørsholm Municipality	916
Lejre Kommune	617
Guldborgsund Municipality	485
Vejle Municipality	1014
Region South Denmark	1256
Region South Denmark - PowerPoint	1193
Udlændingestyrelsen	944
Region of Central Jutland	1363
Favrskov Municipality	715
Frederiksberg Municipality	608
National Genome Center	763
Civil Service Agency	131
Lolland Municipality	463
Odsherred Municipality	103
Hvidovre Municipality	126

These are own date differences, not the average time taken by the authority to deal with the case. In the case of Vejle, both the City and the National Court refer to the long period of time as relevant for the determination of fines; Horsens rejects the reduction of the time in the Midtjylland Regional case. No calendar day here is evidence of payment of the fine or termination of the damage.

Lack of concrete documents: date of the decision and the decision itself; full imposition of fines for six named authorities; actual payment; full public sanctioning and anonymised persons key. The Committee's follow-up results, but not proof of all the amounts paid or individual staff responsibilities.

Additional primary control in the PDF15-19 of the South African Republic: the grounds calculate the CBCLs database to approximately 23.000 citizens and actually describe access to the information of five other participants, with a period of 4 January 2019-23 August 2020 (own date difference 597 days). The 2021 recommendation of the Data Protection Agency referred to over 30.000 children / data subjects; this is an unresolved delimitation / version difference, not the same verified denominator. Former URL incident notified on 25 May 2018 and serious criticism on 17 July 2020 are included in the grounds for the judgment. PowerPoint del: online exposure until 5 February 2020; indictment alone 25 May 2018 → 5 February 2020. The exemption is based on insufficient criminal evidence of a lack of adequate overall measures during that period; it does not eliminate the data exposure described. The information on actual use and demarcation of the grounds is not a national register of persons.

The separate annual and audit versions of the administrative reports

The figures are presented in accordance with the annual tables themselves. The combination queries / complaints is a subtotal. Historical repetitions should only be counted once after document version, not added to the original year's figure. - is not disclosed / separate row, not zero.

Publication	Table, physical side	Actual Observer an iron window,
Annual Report 2018	A, PDF10	2014-2018
Annual Report 2019	3A, PDF11	2015-2019
Annual Report 2020	3A, PDF10	2016-2020
Annual Report 2021	3A, PDF10	2017-2021
Annual Report 2022	3A, PDF11	2018-2022
Annual Report 2023	3A, PDF12	2019-2023
Annual Report 2024	3A, PDF11	2020-2024
Annual Report 2025	3A, PDF8	2021-2025

Annual Report 2018 indicates 2015 total 5.461; its rows sum 5.444, as later annual report 2019 indicates. Both versions are kept in JSON. The year 2019 shall be indicated in the annual report 15.681 and in the annual report 15.090. Own difference 591 corresponds numerically to administration 591; at the same time, the international 1.156 / 1.151 differs, so there is no substantiated explanation of only one simple delimitation. The series shall not change tacitly between the two total sets.

Annual Report 2020: Law hearings 607, queries 2.734, complaints 2.506, supervision 403, international 1.244. The annual report records 605 / 2.733 / 2.507 / 402 / 1.243 respectively; both totals 17.768. The differences are

actual publication versions. The 2024 annual report table's fall in legislative consultations−7,3% against body text−7,8%; own(634−688)/688=−7,85%, so the body text is closer to the direct calculation. The percentage difference is not harmonised.

Intelligence Oversight Board's substantive oversight account 2014-2025

Controlled October 7, 2026. **34 original annual reports, 651 compact factual rows.** The year is the year of review of the statement; publication may take place the following year. PDF locators are physical pages from the first PDF page, usually printed page number + 2. The JSON file is the detailed fact register with device, denominator, overlap and source.

What the figures document

IT documents repeated breaches of the rules on retrieval, raw data retrieval, erasure, journaling and logging, as well as delays and lack of means of retrieval which have cut off controls. A finding in a later year may relate to previous interventions or information that has still not been deleted. Therefore, years of control, period of action and actual cessation are three different sizes.

The public statements contain TET's statements and assessments. The confidential underlying control evidence has not been published and is therefore not independent in this case. Later ministerial decisions and change of competence are marked; a historical TET statement is not implicitly reclassified as a final judgment.

Controls, interventions, searches, folders, files, e-mails, information, natural persons and legal persons shall not be merged. The graph category breaches also includes internal breaches of guidelines. Critics can also be used to prevent controls. The number of critical checks is therefore not personal or criminal statistics.

2006-2013:TET did not yet exist. This is not eight years with zero breaches of law. CFCS oversight for 2014-2015 is combined; CFCS's own statistical tables nevertheless distinguish the 2nd half of 2014 from 2015. From 2025,TET oversees FE's application of the CFCS Act, whereas SAMSIK's data processing is outside TET oversight (FE 2025 physical p. 5).

Annual checks and overlaps

Graphs 2022- 2025 are visually controlled. Figures before 2022 are published in particular as sub-checks, samples and concrete findings; they cannot be filled in with zero in this aggregate table.

Service / e r	Plilla ge	Quit ed	Outcom e narrow n	Without Bemæ marking , no	Recom mendati on paint, etc.	Law / s etning line rupture	Criticis m	Stærli g criticis m;	Manage marking , sunio n	PDF Page
PET 2022	54	53	53	19	20	8	21	3	34	s 12
PET 2023	49	48	48	29	3	13	10	0	19	s 19
PET 2024	43	38	38	26	8	5	10	0	12	s 21
PET 2025	-	28	28	9	9	4	9	0	19	s 10
FE 2022	38	25	24	14	10	6	2	0	10	s 11

CFCS 2024	12	11	10	8	1	2	0	0	2	s 18

The Union is itself the diffuser of the original's outcome denominator and controls without comment. PET 2024 has an internal conflict; FE 2022 and CFCS 2024 have separate denominator conflict, which is not explained by an assumption. Note scale and PET competence change 2025.

Indirect insight and time to answer

Completed requests concern natural and legal persons together. A person can turn again; the years cannot be summed up to unique people. Zero deletion findings relate to investigated systems, not to all information everywhere.

Service / year	Finished acted	Deletion find	Laughs. total time	Service s time	Not applicable no systems;	PDF Page
PET 2014	16	2	95	26	-	s 23

FE 2025	20	3	85	16	1	s 22

Time is the original days; 2025 explicit working days. PET 2022: 12 deletion findings include one case where technically impossible partitioning meant continued treatment. The deletion category of the graph does not therefore prove complete termination in all 12 cases.

Specific duration and follow-up

FE 2017: four found unjustified catches lasted 20 days, 8 months, 4 days and 17 months; the year of the action was 2014- 2017 (physically s 15). FE 2020: four catches lasted 2,34,55 and 55 days; three originated from PET requests (physically p. 14). The interventions have not been documented to four different people in each year.

PET 2022 retained copies of information on the same 19 persons and 84 organisations deleted in production 2021. Similarly, PET 2024 test copy 67461 files should not be added to previous test files as new people. FE 2023 s 107 unrelieved e-mails are follow-up to 2022 promises. Continued storage is a consequence, although the number of new people is unknown.

Original conflicts

- PET 2024: 38 completed / 26 without / 13 remaining. 38 − 26 = 12; printed 13 is kept separately.
- PET 2024: 67 days 2024 and decrease 105 from 2023. PET 2023 s 32 = 107 days; diffusers 40, not 105.
- PET 2021: 183 days 2021 and increase 102 from 2020. PET 2020 p 29 = 72; diver 111.
- FE 2022: 25 completed but outcome 14 / 24. Quotas 24 are retained; no assumed explanation.
- CFCS 2024: 11 completed but outage 8 / 10. The trigger point 10 is retained.

CFCS: complaints and access to documents with a full annual delineation

CFCSs received personal data complaints are zero in all published 2014- 2025 tables; this shows the absence of registered complaints, while the control accounts contain errors. 2025 concerns the FE- Cyber sector, not all previous CFCS.

Year	Full	Partial	Refusal	No d kokime nter	Total	Keep moving. indicatio n r	Exchang e tn	Safe hedh of which: no	PDF Page

2025 (FE)	1	6	4	2	13	137	23	867	s 29

2014-2015 disclosure figures count cases involving one or more acts; from 2016, acts. 2014-2015 incidents include interception of communications/analysis;2016 also includes other security incidents. The false-positive/no-effect category changes scope several times; separate 2022-2023 false positives are in JSON. Incidents/attacks are not public employees' breaches of law.

Source and residue register

• TET 0: PET 2024; 34 factorial rows. Tangible control, follow-up, insight and time sections read; tables / graphs controlled as above.

• TET 1: PET 2023; 22 factual rows. Tangible control, follow-up, insight and time sections read; tables / graphs controlled as above.

• TET 2: PET 2022; 29 factual rows. Tangible control, follow-up, insight and time sections read; tables / graphs controlled as above.

• TET 3: PET 2021; 21 factorial rows. Tangible control, follow-up, insight and time sections read; tables / graphs controlled as above.

• TET 27: CFCS 2019; 17 factorial rows. Tangible control, follow-up, insight and time sections read; tables / graphs controlled as above.

• TET 28: CFCS 2018; 15 factorial rows. Tangible control, follow-up, insight and time sections read; tables / graphs controlled as above.

• TET 29: CFCS 2017; 18 factual rows. Tangible control, follow-up, insight and time sections read; tables / graphs controlled as above.

• TET 30: CFCS 2016; 17 factorial rows. Tangible control, follow-up, insight and time sections read; tables / graphs controlled as above.

• TET31: CFCS 2014; 34 factorial rows. Tangible control, follow-up, insight and time sections read; tables / graphs controlled as above.

• TET 32: PET 2025; 34 factorial rows. Tangible control, follow-up, insight and time sections read; tables / graphs controlled as above.

• TET 33: FE 2025; 41 factorial rows. Tangible control, follow-up, insight and time sections read; tables / graphs controlled as above.

The rest relates to confidential denominators, personal dedup, unpublished control lists and subsequent actual rectification; precise request for TET: control ID with control year / type / exit category, request ID with natural / legal person and received / completed date, system coverage per year, action start / finding / termination and documented deletion. Please ask for a separate overlap between PET / FE / PNR and repeated follow-up. The register of the Wamberg Committee 2006-2013 is own demand for relevant ministries / TET if the material is taken over. No request has been sent.

Responsibility and demands require linkage to the specific act and applicable competence. The figures support documented systemic criticism and demands for oversight, remedial action and evidence of follow-up; they do not automatically document criminal responsibility for a specified number of employees or a count of citizens entitled to compensation.

11. Taxes: outages, stocks and time

Checked against originals: waiting-time series 2006-2013, flow/stock 2010-2013, administrative percentage matrices 2006 and 2009-2012, first-instance court outcomes 2006 and 2009-2013, the Ombudsman's LSR outcomes 2011-2013 and separate reimbursement outcomes 2009/2010/2013. The separate original modules document 2006 and 2009-2012 with precise denominators, coding rules and reading locators. Administrative 2007/2008/2013 matrices, all exact cell counts, separate remittals and hidden successful claims still require original data. Register metadata are not equated with substantive table reading.

Administrative complaints before 2014 could pass through both an appeals board and LSR; the sum does not necessarily represent unique trajectories. Court outcomes/reimbursement/FOB may overlap the same complaint and must not be added into a union of unique errors/victims. Relief is an outcome; effective payment and established responsibility require separate material.

Main analysis: known waiting time and misleading reading of targets

In 2013, the National Tax Court knew the increasing waiting period, but described the professional results as satisfactory. The exact average time was 9,46 months against the target 8,5. The 20 percent target value means 10 out of 50 contract points; it is not the proportion of citizens treated within a deadline. The 100% recovery applies to a watch which starts only with full case information. Forced reassurances have been omitted. The figures therefore do not show the total citizen's waiting time. [K509, p.5-6,8]

The stock of old FFF cases fell from 1.158 to 732, but the target was 650. The declared target of 62,5 percent is 25 out of 40 points, not an inventory of repaired tax claims. The report also states that management and statistical facilities for the new complaint structure were not yet in place. The total target result thus does not document a timely review, proper outcome or actual repayment. [K509, p.8-9]

The specific demand is linkage of receipt,time on hold,complete investigation of the case,decision and effective redress for each appeal. The financial report contains no complete administrative outcome matrix. This dimension remains open even though the report’s entire text has now been read. The tables already included below are retained without double-counting.

Reading control: K509, Annual Report 2013 of the National Tax Court, dated 4 March 2014, FT SAU 2013- 14 Annex 196, ODA document 99867 / file 193526. All 16 pages are text-read via the Danish Parliament's public PDF reproduction, line 0- 622 of this version. It shall include endorsement, report, objectives, accounts and both financial annexes. There has been no new visual check of the pixels of the pages in this delivery; no full original text or original PDFs pages are stored locally. Official original.

LSR: access, stock and corrected waiting time

Original, PDF page 5. Device: Case and average; not unique taxpayers.

Year	New cases	Stock at end	Time months
2010	3682	2550	7.2
2011	4440	2987	7.1
2012	5122	4297	7.9
2013	5652	6367	9.5

Supply and stock are different units. Time leaves out forced reassurances. These LSR figures are not the larger overall population of the CCR in recent statistics.

LSR: Actual corrected time 2006-2009

Original, PDF page 3. Unit: Average length of proceedings.

Year	Corrected time months	Before correction months
2006	10.7	11,6 in now recovered LSR06O; not disclosed in RR 2010 source
2007	11.8	approx. 13
2008	11.0	12.7
2009	9.1	not disclosed

Forced reassurances in tax proceedings, surveys and estimates as well as EU references have been omitted. 2004 is not comparable and is reported as a dash, not zero. 2005 is 12,8 months (outside the period).

2013: flow of all case groups

Original, PDF page 5.

Type of action	Entry	Departure
Income	1795	1256
Assessment	1798	798
VAT / levy / customs duties	728	632
Recovery	329	357
Other	1002	510
Total	5652	3553

Outflow is not a breakdown into favourable findings,upheld decisions,more adverse decisions,dismissals and remittals.

2013: waiting period by case type

Original, PDF page 5. Unit: Corrected average.

Type of action	Months
All together	9.5
Income	9.6
Assessment	16.2
VAT / levy / customs duties	7.2
Other	4.8
Recovery	0.7
Exit from the Tax Appeal Board	7.5

Conditions omitted. The recovery time starts only when the case is fully informed; the jump is a sub-group and cannot be added as an additional case.

2013: time-scale and more precise inventory

Original, PDF page 8. Device: Steering measures and averages.

Measure	Requirements for months	Actual months	Points	Possible Points	Targeting%
All together	8.5	9.46	10	50	20
Recovery	0.7	0.68	25	25	100

Measure	Requirements for months	Actual months	Points	Possible Points	Targeting%
Surplus	7.5	7.53	20	25	80

9,46 / 9,5 is precision / rounding of the same target, not two separate waiting times or populations.

2013: old FFF cases

Original, PDF page 9. Unit: Old deductions-for- improvements-cases.

Stock at end 2012	Targets at end 2013	In fact at the end of 2013	Points	Possible Points	Targeting%
1158	650	732	25	40	62.5

Own difference:426 fewer in this old cohort; 82 more than the target. This does not represent all new FFF cases, a count of findings in the party's favour or a figure for actual payment.

2008-2009: old LSR cases

Original, PDF page 3. Unit: Old cases.

Kohorte	End 2008	End of 2009	Resolution target%
Received before 1 January 2008	1132	297	95

The 835 of the own component diffuser; the 95% target applies to an old cohort. The original describes a large part of the remainder as being reassuring; no breakdown is given on the basis of reason.

2011-2013: Court access

Original, PDF page 6.

Year	Established by the taxpayer	Established by the Ministry
2011	291	8
2012	287	17
2013	297	26

A small part relates directly to tax decisions. The year of entry shall not be the year of closure; the figures shall not be used as a reference for the judgment of the same year.

2011-2013: all first instance outcomes, taxpayer as applicant

Original, PDF page 7. Unit: Completed first instance proceedings.

Outcome	2011	2012	2013
Rejected	26	16	19
Raised by taxpayer	68	60	49
Confirmation of the principal claim of the taxpayer	26	18	14
Judgment:wholly in the taxpayer's favour	23	13	20
Judgment: taxpayer predominantly successful	4	7	10
Judgment: full relief for the Ministry	150	170	137
Judgment: largely favourable to the ministry	11	18	7

Outcome	2011	2012	2013
Settlement:predominantly in the taxpayer’s favour	8	9	7
Settlement:predominantly in the Ministry’s favour	7	2	3
Total completed	323	313	266

Rejection, swelling, retaliation, judgment and settlement shall be kept separate. A small part relates directly to tax decisions. No number counts for unique people or automatically proves the criminal responsibility of an official.

2011-2013: all first instance outcomes, Ministry as applicant

Original, PDF page 7. Unit: Completed first instance proceedings.

Outcome	2011	2012	2013
Rejected	0	0	0
Raised by the Ministry	0	1	0
Confirmation of the Ministry's principal claim	1	1	1
Judgment:wholly in the taxpayer’s favour	3	1	2
Judgment: taxpayer predominantly successful	0	1	0
Judgment: full relief for the Ministry	5	6	10
Judgment: largely favourable to the ministry	0	0	0
Settlement:predominantly in the taxpayer’s favour	0	0	0
Settlement:predominantly in the Ministry’s favour	0	0	0
Total completed	9	10	13

Citizens granted relief on an administrative appeal may then become defendants in the Ministry's litigation. The first instance does not document the final outcome following any appeal or the timing of payment.

2011- 2013: Ombudsman's LSC cases

Original, PDF page 8. Unit: Ombudsman case closures.

Year	Total	Rejected	Reality without criticism / recommendation, etc.	Reality with criticism / recommendation, etc.
2011	26	15	10	1
2012	16	12	2	2
2013	43	34	8	1

Only Landsskatteretten in these historical columns; 2014 expands the authority population. The criticism category includes recommendations etc. and cannot be relabelled as Convention violations without reading the cases.

2009: outcomes in completed legal-cost reimbursement cases

Original, PDF page 4. Unit: Expenses across agencies.

Outcome	Case	%	Compensation DKK	Amount share%	Average DKK	Adjusted average DKK
Full relief	1015	31	60996863	45	60095	47656

Outcome	Case	%	Compensation DKK	Amount share%	Average DKK	Adjusted average DKK
Predominant success	413	13	24818600	18	60093	54577
Limited favourable finding	337	10	8722128	6	25882	25882
No favourable finding/lost	1518	46	42398262	31	27930	25529
Total	3283	100	136935853	100	41711	36021

Common reading rule for the reimbursement counts: Selected reimbursement population, not all LSR complaints. Companies/foundations lose access for cases brought later following the legislative change in 2009. Averages are adjusted by excluding large payments over 0,6 million DKK; the annual population and successful-claim proportion therefore do not become a national LSR error rate. A conto payments from earlier years may be included in reimbursement for closed cases.

2010: outcomes in closed cost-reimbursement cases

Original, PDF page 4. Unit: Expenses across agencies.

Outcome	Case	%	Compensation DKK	Amount share%	Average DKK	Adjusted average DKK
Full relief	715	30	61638029	43	86207	61612
Predominant success	286	12	28773682	20	100607	78309
Limited favourable finding	234	10	7281564	5	31118	31118
No favourable finding/lost	1127	48	45951429	32	40773	36116
Total	2362	100	143644704	100	60815	48328

See the common reading rule for the compensation accounts above.

2013: outcomes in closed cost-reimbursement cases

Original, PDF page 4. Unit: Expenses across agencies.

Outcome	Case	%	Compensation DKK	Amount share%	Average DKK	Adjusted average DKK
Full relief	472	31.5	43628975	40.0	92434	72795
Predominant success	196	13.1	21822837	20.0	111341	104046
Limited favourable finding	130	8.7	6086312	5.6	46818	46818
No favourable finding/lost	700	46.7	37550694	34.4	53644	50430
Total	1498	100	109088818	100	72823	64124

See the common reading rule for the compensation accounts above.

LSR: reimbursement of costs in the notified closed cases

Original, PDF page 1.

Year	Case	%	DKK	Amount share%	Average DKK	Adjusted average DKK
2009	1667	50.8	78086275	57.0	46842	40637

Year	Case	%	DKK	Amount share%	Average DKK	Adjusted average DKK
2010	1323	56.0	77499746	54.0	58579	49874

These instance rows are subsets of the totals of the drop tables. The common outcome table is not cross-tabulated at instance; outcomes cannot be applied to the LSR rows by percentage calculation.

2013: LSR series in the same later original version

Original, PDF page 1.

Year	Case	%	DKK	Amount share%	Average DKK	Adjusted average DKK
2013	664	44.3	44427569	40.7	66909	61725

664 is a subset of the year's 1.498 compensation cases, not the total outflow of 3.553. No table of findings in the party's favour by level of jurisdiction in this annex.

LSR:subsequent adjustment following a finding in the party's favour at a later level of jurisdiction

Original, PDF page 6. Unit: Reported post-adjustments.

Year	Case	DKK	Average DKK
2009	127	3152914	24826
2010	74	2059860	27836

Where overall success changes, reimbursement for an earlier instance may rise from 50% to 100%. The adjustment is recorded only at the instance triggering the change; one case may encompass several earlier instances. No addition as new unique cases to the original successful-claim counts.

2013: post-adjustment by all agencies

Original, PDF page 6.

Court of Justice	Case	DKK	Average DKK
LSR	35	1962388	56068
Taxation Council	-	-	-
City Court	13	674454	51881
National law	9	984405	109378
Højesteret	3	1543663	514554
Total	60	5164910	86082

A case may relate to several former bodies; placed on the triggering body. Blindline is retained and is not rewritten to a verified zero.

LSR: accounting costs for reimbursement

Original, PDF page 10. Unit: payments in the accounts.

Year	LSR million DKK	Syn / estimate LSR million DKK
2006	61.4	2.5

Year	LSR million DKK	Syn / estimate LSR million DKK
2007	88.3	6.8
2008	79.4	2.8
2009	84.9	5.3
2010	84.3	9.8

Includes a conto, closed cases, retroregulation and reimbursement. This is a different year from the cost of completed reimbursements; no compensation for the unlawful tax requirement itself is derived.

LSR: historical accounting costs, later source version

Original, PDF page 9. Unit: Accounting disbursements.

Year	LSR million DKK	Syn / estimate LSR million DKK
2011	61.2	5.0
2012	59.4	5.5
2013	53.1	3.6

Separated from closed cases. Example 2013: 53,1 million accounts compared to 44.427.569 DKK completed cases; scopedifference, not automatically an error in the report.

Year-by-year coverage

Later supplies of originals for 2006 and 2009-2012 fill those years' administrative percentage matrices and the court outcomes for 2006/2009/2010. The table here has been updated to this content. The originals' percentage cells have not been back-calculated into observed favourable-finding counts.

Year	Administrative full outcomes	Waiting time	Court outturn	Compensation results
2006	Four group percentages and exact N checked in LSR06O; affirmance includes closures with possible actual relief. Cell counts/remittal unresolved	Original fact 11,6 and corrected 10,7; separate subgroups controlled	All original categories of organiser / judge / conciliatory / referee controlled; own 55 / 283 citizen-friendly, of which 18	The original indicates not yet specified 2006; precise registration requirements
2007	Not primarily controlled; the complete exit table is missing	Primary controlled: RR 2006-09 and LSR 2013 historical table 2010- 13	Original year-end table missing	The year's separate outcome documents are missing
2008	Not primarily controlled; the complete exit table is missing	Primary controlled: RR 2006-09 and LSR 2013 historical table 2010- 13	Original year-end table missing	The year's separate outcome documents are missing
2009	Four administrative group percentages + exact N checked against primary sources in LSRH11/12; exact cell counts/remittal codes missing	Primary controlled: RR 2006-09 and LSR 2013 historical table 2010- 13	Full First Institution Table Primary Controlled in LSRH11 / 12	Primary-Controlled Separate Reimbursement
2010	Four administrative group percentages + exact N checked against primary sources in LSRH11/12; exact cell counts/remittal codes missing	Primary controlled: RR 2006-09 and LSR 2013 historical table 2010- 13	Full First Institution Table Primary Controlled in LSRH11 / 12	Primary-Controlled Separate Reimbursement
2011	Four administrative group percentages + exact N primary controlled i	Primary controlled: RR 2006-09 and LSR 2013 historical table 2010- 13	Full First Institution Table checked	The year's separate outcome documents are missing

Year	Administrative full outcomes	Waiting time	Court outturn	Compensation results
	LSRH11/12; exact cell counts/remittal codes missing			
2012	Four administrative group percentages + exact N checked against primary sources in LSRH11/12; exact cell counts/remittal codes missing	Primary controlled: RR 2006-09 and LSR 2013 historical table 2010- 13	Full First Institution Table checked	The year's separate outcome documents are missing
2013	Not primarily controlled; the complete exit table is missing	Primary controlled: RR 2006-09 and LSR 2013 historical table 2010- 13	Full First Institution Table checked	Primary-Controlled Separate Reimbursement

Found longer originals and financial reports

Year	Official registry item	Material status
2006	ODA document 488209	Longer 64 pages original now retrieved from archiveetSKM; relevant pages 1-19 / 30-46 read, all reproduced numbers visually controlled; 31 tables 146 rows ilSR06O modules
2009	ODA document 249337	Official registration localized; longer original not retrieved and material outreach
2010	ODA document 201843	Official registration localized; longer original not retrieved and material outreach
2011	ODA document 142923	Further original now retrieved from official host via Wayback; case statistics / matrices / method / time controlled in the separate LSRH11 / 12 module
2012	ODA document 53631	Further original now retrieved from official host via Wayback; case statistics / matrices / method / time controlled in the separate LSRH11 / 12 module
2012	ODA document 54511	Separate financial report recorded; no automatic equivalence with longer annual statistics
2013	ODA document 99867	16-page financial annual report: the whole text read, p.1-16; flow, time, stock and target tables re-checked. No full administrative outcome matrix in the report; this dimension remains open

The contemporaneous official 2010 transmission identifies aarsrap2010.pdf, and the property valuation appeals boards' public historical register identifies LSR aarsrapp 2011 til web.pdf. The 2011 original has now been retrieved from the archived official host and checked for case statistics together with the 2012 original;the 2010 annual original remains a specific outstanding access issue. This does not prove that its figures never existed. TAX.dk was used only as a search trail to longer annual reports; no secondary percentage was reverse-calculated into an original case count.

Specific remaining registry request

Skatteankestyrelsen/the National Tax Tribunal is requested to disclose all longer annual reports and underlying version-dated annual tables for 2006-2013: counts upheld,reduced/wholly/partly favourable,increased,remitted,dismissed,discontinued,withdrawn,reopened/refused reopening; total and sample by case type/deciding authority. Include non-board cases,amendments on reconsideration and cases without a substantive ruling,and precise information about every excluded population. Supply both corrected and uncorrected waiting time,number of cases on hold and their duration,all court outcomes at each instance,and unambiguous anonymous case linkage from the first decision to effective repayment/interest compensation/adjustment. The Ministry of Taxation is requested to supply missing compensation outcomes for 2006-08 and 2011-12 with version breaks,natural/legal persons and a cross-table of instances. No request has been sent.

Depreciation and consistency

The three taxpayer-initiated first-instance columns reconcile to 323/313/266; the Ministry-initiated columns to 9/10/13. Reimbursement outcomes reconcile to 3.283/2.362/1.498, but these are different case samples. They cannot be used to infer the number of people subjected to tax without legal authority. Periods on hold and the time before a collection complaint is fully documented are specifically excluded from the published adjusted times. Before 2014 the same case could appear before both an appeals board and LSR. A ruling granting relief therefore does not necessarily end the citizen's actual financial burden either; effective alteration of demands, repayment, interest and later litigation require linkage of the case trajectory.

Own stock reconciliation of LSR's 2013 numbers: 4.297 beginning + 5.652 entry − 3.553 departure = 6.396, while the original returns 6.367 end. The discrepancy is 29 cases. The original flow table does not provide any separate correction or movement category explaining the difference. It shall be aligned with the movement and audit information of the register; it shall not be designated, without further proof, as 29 unlawful decisions or lack of citizens.

National tax law: original knowledge of guarantee breaches and waiting time in 2006-2007

Population and period

FOB 2007.525 examines 40 complaint cases closed during 16. March-30. June 2004, with 20 employee-tax cases and 20 VAT/excise cases. The events precede the report period; preliminary criticism on 21. August 2006, ministerial/court statements in 2006 and the final 2007 account document knowledge and response within the period. The 40 are therefore not added as new error trajectories in 2006-2025. [LSRFOB07,PDF3-4]

The sample excludes wholly favourable findings,continuing correspondence and cases reviewed by courts,the ministerial department or other authorities,including EU bodies. Case processing by lower instances and the Customs and Tax Administration is not independently examined,although the agency was involved in 18 cases. One described linked process was not received. The study examines administrative procedure,not the substantive basis of every decision. This is a specific sample,not a national error rate. [LSRFOB07,PDF3-4,134]

The 40 outcomes comprise 30 upheld decisions, 7 partial findings in the party’s favour, 1 refusal to reopen and 2 formal dismissals. Procedural errors may therefore be found in upheld decisions without being counted as administrative overturnings. The 20 VAT/excise cases cover both individuals and companies; 40 cases are not 40 natural persons. [LSRFOB07,PDF10]

All time series: first answer

Measured from the receipt stamp,including faxes outside office hours,to the dated reply. These acknowledgement times do not document decision time,payment or redress. [LSRFOB07,PDF97-98]

Days	Case	Case ID
0	7	04,06,07,18,29,33,34
1	6	03,08,11,15,25,28
2	6	13,19,26,30,32,35
3	5	02,09,22,37,40
4	3	14,16,39
5	4	01,17,24,36
6	2	12,31
7	2	05,10
10	1	21
13	1	20
14	1	23

Days	Case	Case ID
22	1	27
30	1	38

The sum is 40.35 cases less than 10 days; 36 are not more than 10 days, and 4 over 10 days. The original formulation "within 10 days" and the subsequent clarification of 4 over 10 days are therefore separated by an explicit limit.

All time series: total treatment

The ranges are open: above the first and below the last month's figure. Not displayed ranges are not added as new source rows. [LSRFOB07, PDF98, visually controlled]

Monthly	Case	Case ID
1-2	1	20
2-3	1	39
3-4	2	18,40
4-5	1	19
6-7	3	15,16,38
7-8	2	14,37
8-9	6	10,12,13,33,35,36
9-10	3	08,09,11
10-11	1	07
11-12	4	05,06,32,34
12-13	1	04
14-15	2	03,30
15-16	1	31
16-17	1	29
17-18	1	17
18-19	1	27
19-20	2	02,28
22-23	4	01,24,25,26
26-27	1	23
33-34	1	22
35-36	1	21

The sum is 40.5 cases were decided within 6 months; 35 took longer. In 2 of the long cases, expert inspection and assessment took place with suspension of the separate direct-action deadline. Full calendar time and adjusted administrative time must be retained separately. Average full time was 396,75 days:310,8 for the 20 tax cases and 482,7 for the 20 VAT/duty cases. The contractual target then in force was an average and cannot be treated as an individual statutory deadline. [LSRFOB07,PDF99]

Expected and final criticism

Wanted waiting time	Case ID count	Case ID	Start Point
6-12 months	7	01,21-26	Material received from subbody
9-15 months	19	04,06-10,12-16,18-20, 33-37	Not uniform expressed as material acceptance
9-15 months	10	02,03,05,17,27-32	Material received from subbody
No stated expectation	4	11,38-40	Separate review; absence is not automatic criticism

Source:LSRFOB07,PDF114-115.36 received a general expectation; 24 cases' actual processing time fell just within the stated range. These figures do not certify lawful processing or sufficient ongoing information.

The preliminary timeline included 16 cases. Following the Authority's opinion, Case 32 was removed, **the final time-critical concerned 15 out of 40 cases;**. For the time being 16 and finally 15 are versions of the same control, not 31 cases of error. 17 cases exceeded the relevant contract averages; this is another classification. I8 identified cases constituted periods without external expeditions at least half of the time. [LSRFOB07, PDF112-114]

The initial 16-ID list contains 3 tax and 13 tax cases, while the text of the bread says 3 + 12. The sum of 3 + 12 is 15. This local discrepancy is not implicitly altered; the final separate 15-criticism of PDF114 is the relevant end result. On PDF112, the example of case 34 appears to change in "real 'and" actual' time; the case review on PDF111 indicates over 11 calendar months and about 3 months of effective treatment. The different terms of reference shall be kept visible.

Guarantees: self-criticism of the Authority's premise

Conclusion: Absence of court actions does not prove substantive correctness and cannot replace investigation of safeguard breaches. **The authority's specific statement:** The ministry's reproduced 2006 statement presumes substantive correctness because complainants did not seek further review. **Original evidence:** The study's sample specifically excludes cases reviewed by courts,and the final statement primarily examines the process. **Deficiency:** A selection criterion is used as evidence of a decision's correctness without examining the individual's opportunities or substantive evidence. [LSRFOB07,PDF3,134,139]

Relevant rule: According to the actual legal assessment of the statement, the appeal body must deal with apparent breaches of guarantees and their possible illegality even if the citizen did not want such a review. **Action; or non-compliance:** The authorities dispute this obligation in their opinions; the Ombudsman maintains it in the final outcome. **Legal deviation:** Known guarantee deficiencies cannot be ignored simply by referring to the delimitation of the complaint or the absence of legal proceedings. **Result significance:** Deficient guidance, evidence preservation and review can leave the citizen with a loss of justice without a timely new decision. **Responsibility:** The decision-making chain of the Board of Appeal and the documented response of the Ministry shall be tested separately. **Requirements:** Check the guarantee, the original error and its concrete legal consequences; resume where the conditions are met; documents actual change, payment and liability. Personal liability cannot be deduced from the search alone. [LSRFOB07, PDF135,137-139]

The summary also documents 6 cases with an incorrectly stated legal basis,1 breach of confidentiality,1 incorrectly conducted hearing of the parties,1 missing letter to the citizen and 2 rejections without an assessment of relief under the guidance then in force. These overlapping criticisms are not distinct new people and must not be summed with 15 criticisms concerning time. [LSRFOB07,PDF136-137]

The crucial point of impact is which cases were actually reopened, which right was changed, when the citizen was paid and what the response to responsibility was. An indication of a new folder or process project merely documents the undertaking. No request for authority has been sent.

Taxes 2009-2012: original outages, hidden changes and actually waiting time

Conclusion: Two lengthy annual originals previously not obtained have now actually been retrieved and read in RAM. They fill the four administrative outcome groups for 2009-2012 and the complete first-instance litigation outcomes for 2009/2010 that were absent from the earlier expansion. The other checked annual extracts overlap existing material and are counted once. These are specific new source deliveries; annual statistics still provide no national person or loss linkage.

Original, locator and device

LSRH11 has 30 physical PDFs pages with two printed pages on most notices. LSRH12 has 31 physical pages with corresponding notices. It is therefore wrong to use printed page 44 as physical PDF page 44. The reading delineation here is the specific case, method, time and outcome sections. No certificate of completion shall be provided for all sections of the accounts, staff and members.

The administrative case outcomes state rounded percentages and an exact total case count. **The percentage is not multiplied by the denominator and presented as an observed number of successful complaints.** The exact cell count must be provided from the case register. “Reduction” includes full or partial relief. “Other” includes several closure codes and, according to the original's own note, cases with an actual reduction as well. Affirmance/reduction may therefore be hidden in the overall other category. In valuation cases, the other category for 2011/2012 is described mainly as affirmance; this does not automatically apply to the other groups.

The experience-based statement of approximately 40 % full and 60 % partial reductions is not a separate observed outcome table. Remittal is specifically described in the 2012 target chapter, but does not appear as a separate count in the four outcome tables. A zero in a new remittal column would therefore be invented.

Reader tables

Income: administrative outcome matrix 2009- 2012

[LSRH11 / LSRH12] Physical PDF page 18 / 20; printed pages 34-35 / 38-39. 2009 from LSRH11; 2010-2012 from LSRH12. The duplicate 2010 / 2011 cells of the two originals have been checked as the same; only one annuity is counted.

Year	Stamping%	Reduction%	% increase	Other%	Number of cases
2009	49,0	32,4	2,5	16,1	2356
2010	47,6	35,4	0,4	16,6	1556
2011	49,1	31,6	0,5	18,8	1426
2012	47,4	29,5	0,3	22,8	1203

Assessment: Administrative Outcome Matrix 2009-2012

[LSRH11 / LSRH12] Physical PDF page 18 / 20; printed pages 34-35 / 38-39. 2009 from LSRH11; 2010-2012 from LSRH12. The duplicate 2010 / 2011 cells of the two originals have been checked as the same; only one annuity is counted.

Year	Stamping%	Reduction%	% increase	Other%	Number of cases
2009	19,8	73,0	0,0	7,2	328
2010	15,6	73,6	0,0	10,8	462
2011	13,3	77,1	0,0	9,6	905
2012	19,5	77,9	0,0	2,6	1049

VAT, tax and customs duties: administrative outcome matrix 2009-2012

[LSRH11 / LSRH12] Physical PDF page 18 / 20; printed pages 34-35 / 38-39. 2009 from LSRH11; 2010-2012 from LSRH12. The duplicate 2010 / 2011 cells of the two originals have been checked as the same; only one annuity is counted.

Year	Stamping%	Reduction%	% increase	Other%	Number of cases
2009	46,1	30,2	0,4	23,3	760
2010	55,7	21,6	0,2	22,5	797
2011	49,3	27,9	0,0	22,8	949
2012	56,3	19,0	0,0	24,7	752

Other, including recovery: administrative outcome matrix 2009- 2012

[LSRH11 / LSRH12] Physical PDF page 18 / 20; printed pages 34-35 / 38-39. 2009 from LSRH11; 2010-2012 from LSRH12. The duplicate 2010 / 2011 cells of the two originals have been checked as the same; only one annuity is counted.

Year	Stamping%	Reduction%	% increase	Other%	Number of cases
2009	70,7	13,2	0,1	16,0	706
2010	73,5	12,3	0,3	13,9	763
2011	69,5	11,9	0,1	18,6	717
2012	70,3	12,3	0,1	17,3	775

Departure flow and outcome indicators

[LSRH11 / LSRH12] Physical PDF page 15-18 / 17-20; printed page 28-35 / 32-39. The last column is the own addition of the four original denominators; not new cases. 2010 has a specific difference of 17 between departure and exit population.

Year	Total departure	Income, flow	Assessment, flow	VAT etc., flow	Other, flow	Sum vents tables, N
2009	4150	2356	328	760	706	4150
2010	3595	1559	464	798	774	3578
2011	3997	1426	905	949	717	3997
2012	3779	1203	1049	752	775	3779

Proceedings in the underlying appeals board

[LSRH11 / LSRH12] Physical PDF page 14 / 16; printed page 27 / 31. Inputs, not errors or persons; some cases later pass on to the National Tax Court.

Year	Tax Appeals Board	Engine Anchors Board	Assessment Appeal Board	Total
2009	2028	1159	10218	13405
2010	1771	3049	4333	9153
2011	1595	1161	4552	7308
2012	1874	960	5121	7955

Entry of the National Tax Court by instance

[LSRH11 / LSRH12] Physical PDF page 14 / 16; printed page 27 / 31. 2012 s two empty annual cells are due to new case management system from 1 September. Only the first eight months have 463 tax returns; 463 is not an annual statement.

Year	Treasure board, 2. instance	Engine board, 2. instance	Assessment fist n, 2nd instance	Surplus	Other 1st instance	Total
2009	746	39	392	422	1924	3523
2010	797	45	697	344	1799	3682
2011	648	41	1518	377	1856	4440
2012	-	31	1568	400	-	5122

Court of Justice: two simultaneous 2009 versions

[LSRH11/LSRH12] Physical PDF page 14,21 / 16,23; printed page 27,40 / 31,44. 2009 p 17 and own sum 306 from the submission overview kept separate from the entry table's 7/296. The source does not explain the difference; no speculative correction.

Year and Locator	Tax payer	Ministry	Total, enlightened or own sum
2009, LSRH11 printed 27	289	7	296
2009, LSRH11 printed 40	289	17	306
2010	296	11	307
2011	291	8	299
2012	287	17	304

Court of First Instance cases brought by the taxpayer

[LSRH11 / LSRH12] Physical PDF page 21 / 23; printed pages 40-41 / 44-45. Completed legal proceedings, not necessarily the same year's entry. A small part relates directly to SKAT. 2011 / 2012 already overlaps the controlled Sagp -2014 table; no new counting of this overlap.

Outcome	2009	2010	2011	2012
Rejected	21	26	26	16
Raised by the applicant	68	56	68	60
Confirm to Refill	21	24	26	18

Total	1158

Hearing and separate February surveys

[LSRH11 / LSRH12] Physical PDF page 19-20 / 21-22; printed page 36-38 / 40-42. Assistance is measured by February's entry, not by all the completed cases of the year. 2013's assistance is a subsequent measure of annual report 2012, not 2013's decision statistics.

Year	Delivered at the hearing	Assistance in case of case%	Assistance in non-judicial cases%
2009	586	-	-
2010	435	85	45
2011	463	86	47
2012	349	89	48
2013	-	92	46

February survey: representation groups

[LSRH11/LSRH12] Physical PDF pages 19-20 / 21-22; printed pages 37-38 / 41-42. The 2012 office average is affected by a group from one consultancy. The 2013 non-board figure was visually checked on physical page 22:15 % lawyer and 14 % consultant; the numerical order in the text extraction alone did not identify the labels.

Year and Case Group	No%	Auditor%	Lawyer%	Adviser, etc.%
2011, Board	14	23	55	8
2012, name	11	20	64	5
2013, Board	8	14	76	2
2011, not name	53	17	21	9
2012, not name	52	4	9	35
2013, not name	54	17	15	14

Reimbursement of costs: annual reports' contemporaneous version

[LSRH11 / LSRH12] Physical PDF page 20 / 22; printed page 39 / 43. Compensation cases have their own denominator; the amount per case is not the loss of all completed tax cases. Later recalculated annual accounts in the previous module shall be kept as separate versions.

Year	All agencies DKK million	National tax law DKK million	Pr. LSC case kr.
2008	132,8	76,4	48104
2009	136,9	78,1	46842
2010	143,6	77,5	58579
2011	132,1	63,5	74848
2012	-	-	-

Largest Entry Groups 2011

[LSRH11] Physical PDFs page 16; printed page 31. The source indicates these ten groups as 45% of the entrance; none of the groups alone can be described as illegal decisions.

Location	Subject	Entry
1	Land improvement deduction	887
2	Commercial real estate	254
3	Counterpart / recovery	166

Location	Subject	Entry
4	Estimation/setting aside of accounts	145
5	VAT / estimates	113
6	Tax Control Act surcharge	105
7	VAT / GNI-based own resource	103
8	Commercial condominium units	82
9	Foreign vehicles	75
10	Kommanditists	67

Maximum Entry Groups 2012

[LSRH12] Physical PDF page 18; printed page 35. The source informs these ten groups as 50% of the entry; groups are subpopulations and must not be added to the total entry.

Location	Subject	Entry
1	Land improvement deduction	795
2	Commercial real estate	557
3	Estimation/setting aside of accounts	219
4	Tax Control Act surcharge	191
5	Parcel houses / owner's apartments	162
6	Interest / fees	146
7	VAT compensation	132
8	Counterpart / recovery	119
9	VAT / estimates	116
10	Reimbursement of costs	110

Depreciation and precise discrepancies

1. **2010 s populations:** The flow groups are 1.559 / 464 / 798 / 774 = 3.595; the precipitation tables are 1.556 / 462 / 797 / 763 = 3.578. The difference is 17 case records, not 17 proven errors or citizens. The originals do not provide a joint case ID vote.

2. **2009 court intake:** the same LSRH11 original has the ministry’s 7 on printed page 27 and 17 on printed page 40. These intake figures are also separate from the 8 closed actions brought by the minister. Intake/outflow shifted across years must not be used as an automatic explanation for two different intake figures.

3. **2012 FFF:** the target chapter’s intake 793 differs from the specialist statistics’795. The backlog’s 745→1.158 and old sub-backlog’s 171→4 also show that meeting the clearance target for old cases does not mean clearing the overall queue.
4. **Duration of 2011:** rounded shares sum to 102%. The accumulated row of the original ends at 100% and has several values other than an addition of the rounded parts. The source's rounding note is retained; raw counters and percentages are required for precise reconstruction.

5. **2012's statistical break:** the year of tax return, uncorrected calendar time and several case type averages were not available after the change of system. A 7,9-month target for corrected cases does not prove that all taxpayers waited 7,9 months. The sorted-off cases and the unfinished stock are specifically relevant to the citizens' total waiting time.

Legal meaning and requirements

Conclusion → Original proof → meaning: The known percentage of change is not fully visible in the standard column "reduction 'and the time target hides parts of the calendar period during which a citizen may be bound by a disputed tax decision. The proof is the original code and reassurance notes as well as the actual system breaches. It requires an independent adjustment and time balance rather than a reading of the second category as unchanged decisions. [LSRH11 -LSRH12]

Rule → act/omission → departure: The legal analysis rests on the specific decision's legal authority, factual basis, reasons and effective review; FOB 2007.525 establishes in the separately checked original that an appeal body cannot ignore safeguard errors capable of invalidating the lower authority's decision. A statistical favourable-finding percentage proves neither that every upheld decision is lawful nor that every favourable finding triggers personal criminal responsibility. The specific case record must identify the error and the period during which the intervention had effect.

Consequence → responsibility → specific demand: For citizens and enterprises affected by errors, the register must be linked to assessment/collection, deferral, actual repayment, interest and compensation. The demand is a de-identified extract with a stable case/person key, all closure codes including reconsideration/withdrawal reason, exclusion flag, receipt, periods on hold, decision and actual financial implementation. It must show management's and the employee's specific knowledge and response before personal responsibility is concluded. No data request has been sent.

LSRH12's target chapter shows an actual cross-cutting analysis of the high rate of favourable findings in valuation cases and specific remittals in 2011 cases. It describes an onward-appeal rate of approximately 50 %,with uncertainty about allocation by period, against a target of 10-20 %. At the same time, the target activity scores 100 for target achievement. An activity score is thus not an actual count of corrected decisions, repayments or remedied loss. [LSRH12,physical 9,printed 16-17]

Tax requirements and EMRK: specific scope;

Under the Ferrazzini judgment, ordinary tax disputes fall outside Article 6's civil scope. Financial effect is insufficient. Tax sanctions must be examined separately as autonomous criminal charges; the Vegotex judgment is a specific example of Article 6 applying in a tax and sanction case. The established waiting time therefore requires precise legal classification. [FXTAX01-FXTAX02]

This local delimitation does not remove requirements of legal authority and reasons or protection of property under Article 1 of the First Additional Protocol. A documented unlawful tax intervention must be examined for actual collection, proportionality, loss and effective reparation; Article 13 presupposes a procedurally relevant, arguable Convention claim. State responsibility and domestic liability for damages are examined independently. [R04,R11,R19]

What is now closed and what actually requires more

The four-group administrative matrix 2009- 2012, all nine outcome classes 2009- 2012, simultaneous ombudsman numbers 2008- 2011, selected case flows, time denominators and exclusions are now primarily controlled. Judgment results 2011 / 2012 overlap with previous deliveries; 2013 is already in the newer original.

Administrative outcomes for 2006-2008 and 2013 still lack original table material; the longer 2006/2009/2010 records were not retrieved by the archive check carried out. These percentage tables do not provide precise administrative counts of relief/remittals or internal codes. Court outcomes for 2006-2008 and separate reimbursement outcomes in the previously described outstanding years require their respective originals. A union of unique individuals, actual payment, unlawful period and individual responsibility are separate linkage requirements. None of these outstanding items is turned into a general reservation about the cells documented above.

Landsskatteretten 2006: administrative outcomes, hidden successful claims and actual waiting time

The recovered original annual report closes the specific access gap for the National Tax Tribunal's administrative outcomes in 2006. It also documents a significant limitation in the authority's own coding:some appeals in which the original decision was changed in the citizen's favour are placed under "upheld". Counting this entire category as correct authority decisions or cases lost by citizens would therefore be wrong. **The original does not give the exact count of these hidden findings in the party's favour.** This is a specific finding of missing data that remains after full reading of the relevant outcome tables. LSR06O, pp. 35–37.

Outcome and denominator actually available

Administrative Working Group 2006	Findings	Stamping%	Reduction%	% increase	Original page
Income	3551	63,9	35,7	0,4	35
Assessment	61	49,1	50,9	0,0	35
VAT, tax and customs duties	451	72,7	27,1	0,2	36
Other, including recovery	603	83,6	16,2	0,2	37
Total outflow, not an overall rate of findings in the party's favour	4666	-	-	-	31

Reduction includes both wholly and partly favourable findings. The annual report's remark that roughly half are wholly and half partly favourable is an experience-based description; it is not a count of the two categories among the 2006 cases actually closed. The percentages shown are rounded. Multiplication by the denominator therefore does not produce a documented number of favourable decisions. LSR06O, pp.35–37.

Affirmance also includes rejected, withdrawn, discontinued and lapsed cases, and refused reopening. For VAT/excise/customs, the report explains that withdrawals and discontinuances may result from the customs and tax region or tax centre itself reopening the case and wholly or partly amending the decision in line with the appellant's claim. Such cases are then closed in Landsskatteretten and included in the broader affirmance category. There is therefore a **documented overlap between this category's contents and actual reductions**; its extent cannot be derived from the table. LSR06O, pp. 35–36.

For other cases, the original describes many complaints concerning tax-control surcharges that were closed: applications for exemption had not been examined at first instance. The report itself states that some may subsequently have been granted by SKAT, but documents neither the number nor individual redress. **What is established is closure following absent first-instance examination; later exemption is an assumption in the annual report.** These evidential levels remain separate. LSR06O, p. 37.

Time for testing and time to be removed from target

All 4666 closures have 11,6 months actual average compared to 10,7 months in the corrected statement. The correction removes compulsory reassurances in tax proceedings, surveys and estimates, as well as references to the EU Commission or the EU Customs Code Committee. For the time course of the citizen, uncertainty does not cease because an interval is removed from the control target. Nor is the uncorrected average time for actual repayment or final closure after a subsequent trial. LSR06O, p. 10-13.

Population 2006	Actual months	Corrected months	Findings	Page
All	11,6	10,7	4666	10
Name processing	13,1	12,1	4021	12
Income	12,9	12,1	3551	13
Assessment	6,6	6,6	61	14

Population 2006	Actual months	Corrected months	Findings	Page
VAT, tax and customs duties	14,7	12,2	451	14
Exit from the Tax Appeal Board	4,7	4,7	170	16
Recovery	1,5	0,8	151	17

Name and skipper are not additional populations, which must be added to the four case groups. Recovery is part of others. The corrected clock of recovery shall not begin until full case information has been provided. The surplus also leaves out cases of hearing; the report states that the 170 cases closed did not have such hearings or reassurances. LSR06O, p. 12-17.

The rounded age shares show that 10% of the closures were after more than 24 months. Cases of hearing have 20,4 months average, sight and estimate 31,2 months and are suspended for 43,0 months in criminal proceedings. These sub-groups may overlap; no separate number of cases is given for all reasons. None of the averages automatically document breaches of conventions in each case, but they show why national average time alone cannot bear a conclusion on timely effective review. LSR06O, pp. 11-12 and 38.

In the table on p. 11, 0-3 and 4-6 months rounded positions are 21% + 12% to 33%, while the cumulative cell of the original is 34%. Both original sizes have been preserved. A calculated integer number based on these percentages would provide an accuracy that the original does not provide.

Proceedings, audits and checks without automatic person count

The original divides High Court cases by claimant, judgment, settlement, acknowledgment, withdrawal and dismissal. In 2006, 273 taxpayer-initiated and 10 Ministry-initiated cases were concluded. Taxpayers obtained findings wholly or predominantly in their favour by judgment in 17 of the first and 1 of the second population. In addition, there were 27 acknowledgments of the claim and 10 settlements predominantly in the taxpayer's favour in taxpayer-initiated cases. **Own category counting therefore gives 55 of 283 closures with these expressly citizen-favourable outcomes, of which 18 by judgment.** The 55 must not be relabelled as 55 judgments establishing unlawfulness, unique taxpayers or documented compensation. A smaller proportion of the table's cases concern SKAT's decisions directly. LSR06O, pp. 42–43.

The 2005 column contains a specific registration revision:46 settlements favourable to the Minister, including 45 identical share-premium cases closed in 2005 but registered only after submission of the 2005 annual report's figures. The 45 are not 2006 cases and not a documented number of different persons. The original also describes ongoing work to improve the data basis of registrations. LSR06O, p 43.

The Ombudsman's 2006 outcomes and 2006 reimbursement of legal costs were not yet counted in this original. Hyphens are retained as missing information. An ongoing investigation of 40 selected complaint cases 2005-06 is not 40 established criticism findings. Reimbursement of legal costs is not automatically compensation for an authority error. LSR06O, pp.41 and 44.

Documented errors, investigation requirements and residues

The strongest sustainable criticism is the statistics' lack of transparency concerning favourable findings: **the annual report's upheld code includes cases of actual reduction**. The evidence is the original category footnotes and the explanation about reopening by the first authority; the significance is that corrections favourable to individuals cannot be counted fully in the published outcome account. A reduction by an authority is not in itself sufficient evidence of every alleged breach of law or individual criminal guilt. A legal assessment of responsibility requires the decision before correction, the grounds for amendment, the specific rule breached, the responsible person's act or omission and documented loss. This local evidential limit does not remove the demonstrated coding problem.

The specific requirements for a subsequent account are to separate withdrawn and shelved cases by their actual reason, separately document full and partial relief, retain both unadjusted and adjusted times, and link correction to actual repayment, interest and any compensation. Registers at different instances must be connected through case and person identity before calculating a union across administrative complaints, courts and the Ombudsman.

This delivery closes the 2006 original for administrative outcomes, relevant case flow, court outcome and time. It has 31 reading tables with 146 rows, including the historical comparison columns of the original and future time targets.

These are tables and rows, not 31 or 146 new mistakes / citizen cases. Read material: Annual Report 1-19 and 30-46; all reproduced tables are visually checked because the PDF's text layers mix up several digits. Accounting and personnel of 20-29 / 47-64 are not fully controlled in this defined delivery. Original pages, text layers and images are not permanently stored.

2007,2008 and the administrative outcome breakdown for 2013 remain specific gaps in obtaining originals. Historical 2007/08 averages have already been read in Rigsrevisionen's follow-up; these years must not again be called entirely unknown. The 2013 financial annual report of 16 pages documents flow and time, but the known table does not break down administrative outcomes. The separate historical 2011/12 originals are now substantively checked in landsskatteretten-2009-2012-originale-udfaldsmatricer.md:26 tables,154 rows. Their administrative 2009-2012 columns and 2009/2010 court outcomes are therefore no longer metadata alone.

National tax law 2006: original case, result and time tables

All figures below are our own structured reproductions of the recovered public original. Pre-2006 material is historical comparison material, and 2007/08 time targets are future targets; they are not added to the 2006-2025 error account. **None of the tables documents unique taxpayers.**

LSR06T01 - Income tax cases: administrative outcomes

Original, physical and printed page 35

Outcome	2003	2004	2005	2006
Stamping%	61,4	60,5	62,0	63,9
Reduction%	38,0	39,0	37,0	35,7
% increase	0,6	0,5	1,0	0,4
Total cases	3281	3055	2807	3551

Outcome key for LSR06T01-T04: Upheld includes dismissed, withdrawn, discontinued, lapsed and refused reopening; some involve an actual reduction. Reduction includes wholly and partly favourable findings. No inference of exact outcome counts from rounded percentages. Other outcomes before 2006 not counted.

LSR06T02 - Assessment cases: administrative outcomes

Original, physical and printed page 35

Outcome	2003	2004	2005	2006
Stamping%	46,3	43,3	51,7	49,1
Reduction%	53,7	56,7	48,3	50,9
% increase	0,0	0,0	0,0	0,0
Total cases	346	201	116	61

See the LSR06T01-T04 outcome key above.

LSR06T03 - VAT, tax and customs matters: administrative outcomes

Original, physical and printed page 36

Outcome	2003	2004	2005	2006
Stamping%	78,7	72,0	73,0	72,7
Reduction%	19,7	27,7	26,0	27,1
% increase	1,6	0,3	1,0	0,2

Outcome	2003	2004	2005	2006
Total cases	457	383	449	451

See the LSR06T01-T04 outcome key above.

LSR06T04 - Other cases: administrative outcome

Original, physical and printed page 37

Outcome	2003	2004	2005	2006
Stamping%	-	-	-	83,6
Reduction%	-	-	-	16,2
% increase	-	-	-	0,2
Total cases	-	-	-	603

See the LSR06T01-T04 outcome key above.

LSR06T05 - Entry and departure of proceedings: all cases

Original, physical and printed page 31

Year	Entry	Departure
2003	4110	4084
2004	3646	3639
2005	4189	3419
2006	4165	4666

Case records, not unique people. The rest include recovery; the sub-group must not be added.

LSR06T06 - Input and departure of proceedings: income

Original, physical and printed page 31

Year	Entry	Departure
2003	3351	3281
2004	3189	3055
2005	3433	2807
2006	2936	3551

Case records, not unique people. The rest include recovery; the sub-group must not be added.

LSR06T07 - Admission and departure of proceedings: assessment

Original, physical and printed page 32

Year	Entry	Departure
2003	331	346
2004	71	201
2005	87	116

Year	Entry	Departure
2006	106	61

Case records, not unique people. The rest include recovery; the sub-group must not be added.

LSR06T08 - Access to and departure from proceedings: VAT / tax / customs

Original, physical and printed page 33

Year	Entry	Departure
2003	428	457
2004	386	383
2005	473	449
2006	514	451

Case records, not unique people. The rest include recovery; the sub-group must not be added.

LSR06T09 - Entry and departure of proceedings: others

Original, physical and printed page 33

Year	Entry	Departure
2003	-	-
2004	-	-
2005	196	47
2006	609	603

Case records, not unique people. The rest include recovery; the sub-group must not be added.

LSR06T10 - Recovery: entrance and departure

Original, physical and printed page 33

Year	Entry	Departure
2006	163	151

Subgroup of others.

LSR06T11 - Ten main incoming case groups

Original, physical and printed page 34

Location 2006	Location 2005	Type of action	Case number
1	1	Discretionary assessment, disregard of accounts	280
2	-	Tax surcharge	203
3	2	Operating expenditure, general	190
4	3	Taxation of capital gains on real property	184
5	9	Kommanditists, K / S	164
6	5	Travel and subsistence expenses	160

Location 2006	Location 2005	Type of action	Case number
7	4	Group ratio, co-taxation / trade / merger / grants / loans	110
8	7	VAT deduction	91
9	6	Companies / shareholders, distributions and dividends	88
10	-	Taxation of gains on shares	88

The original informs 37% of the entrance. - in the 2005 position is the original (-), not rank 0.

LSR06T12 - National legal proceedings instituted

Original, physical and printed page 42

Construction by	2003	2004	2005	2006
Tax payer	268	243	280	266
Ministry of Taxation	1	9	13	8

A small part relates to SKAT directly, not the National Tax Court; entries and closures are different annual population.

LSR06T13 - Completed national proceedings brought by the taxpayer

Original, physical and printed page 42

Outcome	2003	2004	2005	2006
Rejected	13	15	11	21
Raised by taxpayer	75	64	106	80
Confirming to retaliate against the taxpayer's principal claim	19	24	12	27
Judgment:wholly in the taxpayer’s favour	11	12	8	11
Judgment: taxpayer predominantly successful	6	1	3	6
Judgment:wholly in the Ministry of Taxation’s favour	107	123	111	106
Judgment: Skatteministeriet predominantly successful	3	9	8	10
Settlement:predominantly in the taxpayer’s favour	18	18	18	10
Settlement: Skatteministeriet predominantly successful	6	1	3	2
Completed cases	258	267	280	273

Tax-direct cases are included to a lesser extent. Judgment, conciliation, retaliation, withdrawal and rejection are kept separate; no personal union.

LSR06T14 - Completed national proceedings brought by the Ministry of Taxation

Original, physical and printed page 43

Outcome	2003	2004	2005	2006
Rejected	0	0	0	0
Raised by the Ministry of Taxation	0	0	1	1

Outcome	2003	2004	2005	2006
Confirmed to respond to the Ministry of Taxation's principal claim	2	2	2	0
Judgment:wholly in the taxpayer's favour	0	0	4	1
Judgment: taxpayer predominantly successful	0	0	0	0
Judgment:wholly in the Ministry of Taxation's favour	5	5	4	8
Judgment: Skatteministeriet predominantly successful	0	0	1	0
Settlement:predominantly in the taxpayer's favour	0	0	0	0
Settlement: Skatteministeriet predominantly successful	0	0	46	0
Completed cases	7	7	58	10

The 2005 conciliation 46 is an audit: 45 identical court cases were closed 2005, but registered after the 2005 annual report. Keep the version; not 45 new 2006 cases.

LSR06T15 - The Ombudsman's closed LSC cases

Original, physical and printed page 44

Outcome	2003	2004	2005	2006
Total cases	22	17	19	-
Rejected	15	13	18	-
Reality without criticism / recommendation etc.,	6	4	1	-
Reality with criticism / recommendation etc.,	1	0	0	-

The 2006 figures were not available; - does not mean zero. Separate study 40 selected cases 2005-06 were not yet completed and are not counted as 40 critical findings.

LSR06T16 - Cases decided at hearing

Original, physical and printed page 38

Year	Case
2003	450
2004	434
2005	457
2006	440

The 2006 average 20,4 months also include suspension due to sight / discretion and criminal proceedings.

LSR06T17 - Publication of orders

Original, physical and printed page 45

Year	Orders
2003	174
2004	148

Year	Orders
2005	159
2006	222

Selected orders of principle or representative orders. A project covering, in principle, all decisions was still in the planning/tender phase; no evidence of publication of all decisions.

LSR06T18 - Professional assistance in case of a given case: February samples

Original, physical and printed page 39

Year	Share with professional assistance%
2004	83
2005	84
2006	85
2007	77

One month's entrance; unknown sample contests. Not all-year cases / persons or legal expenses coverage.

LSR06T19 - Professional assistance: February sampling

Original, physical and printed page 39

Category	Name feb 2006%	Name feb 2007%	Without name feb 2007%
No representative	15	23	46
Auditor	55	40	29
Lawyer	22	26	21
Adviser, etc.,	8	11	4

Third column on p 40. No given N; possible composition differences are highlighted in the original.

LSR06T20 - Reimbursement of costs, current prices

Original, physical and printed page 41

Unit	2003	2004	2005	2006
Total mill, DKK	92,4	106,1	128,9	-
Of which LSR mill, DKK	53,0	55,0	63,8	-
Kr, pr, LSC case	37300	30400	38280	-

The 2006 figures were not available; reimbursement of costs is not a substitute for unlawful regulatory behaviour.

LSR06T21 - All cases: average time

Original, physical and printed page 11

Year	Uncorrected months	Corrected months
2003	13	-
2004	14	-

Year	Uncorrected months	Corrected months
2005	14	13
2006	12	11

LSR06T21-T26 time key: The corrigendum omits the compulsory suspension; the overdraft also omits the hearing. The corrected watch of recovery starts with full case information. Table rounding is maintained; prosatal is more accurate, not new populations.

LSR06T22 - Referral: average time

Original, physical and printed page 13

Year	Uncorrected months	Corrected months
2003	13	-
2004	14	-
2005	14	13
2006	13	12

See the time key for LSR06T21-T26 above.

LSR06T23 - Income: average time

LSR06T26 - Recovery: average time

Original, physical and printed page 17

Year	Uncorrected months	Corrected months
2003	-	-
2004	-	-
2005	-	-
2006	1,5	0,8

See the time key for LSR06T21-T26 above.

LSR06T27 - Assessment: average time

Original, physical and printed page 14

Year	Uncorrected months
2003	8
2004	10
2005	9
2006	7

No reassurances to correct for.

LSR06T28 - 2006 exact averages and population delimitation

Original, physical and printed page 10

Population	Completed cases	Uncorrected months	Corrected months	Page
All	4666	11,6	10,7	10
Name	4021	13,1	12,1	12
Income	3551	12,9	12,1	13
Assessment	61	6,6	6,6	14
VAT / levy / customs duties	451	14,7	12,2	14
Surplus	170	4,7	4,7	16
Recovery	151	1,5	0,8	17

Overheads and boards are transversal / subgroups. Recovery is subgroup of others. No sum across this table.

LSR06T29 - 2006

Original, physical and printed page 12

Population	Average months
With hearing	20,4
Without hearing	10,6
Syn and discretion	31,2
Bero for criminal proceedings	43,0

The courtroom population may also include the other reasons; no N for vision / estimation / penalty suspension and no personal union.

LSR06T30 - Age of proceedings at end 2006, all types of proceedings

Original, physical and printed page 11

Age	Proportion of all cases%	Cumulative%
0-3 months,	21	21
4-6 months,	12	34
7-9 months,	14	48
10-12 months,	13	61
13-15 months,	11	72
16-18 months,	9	81
19-21 months,	6	86
22-24 months,	4	90
Over 24 months,	10	100

N 4666. Rounded percentages and original cumulative percentages are maintained; 21 + 12 = 33, while cumulatively 34. No recuperation to precise numbers.

LSR06T31 - 2005-2008 time results and future management targets

Original, physical and printed page 10

Type of action	2005 months actually	In fact, 2006 months	Objective 2007 months	Objective 2008 months
All boards	13,0	12,1	9	8
Income	12,9	12,1	9	8
Assessment	8,8	6,6	9	8
VAT / levy / customs duties	14,6	12,2	11	10
Surplus	-	4,7	7	7
Recovery	-	0,8	1	1

Targets are not legal deadlines. Actual figures are the corrected populations. 2007 / 08 are future targets in the 2006 Annual Report, not subsequent actual time.

Source basis

LSR06O. National Tax Court, Annual Report 2006,64 pp. Public original at the Ministry of Taxation's historical address; archive copy 20070630025107. Read in memory, without storage of public original pages. SHA256: 396aa84fdb6177929c5614c1786010f420a1b33dc022aa8865820ea2615096e2. Relevant material reading coverage and residue are shown in the JSON card.

National Tax Law 2007, 2008 and 2013: concrete original access after 2006-found

Controlled October 7, 2026. The task is limited to original annual reports or statistical annexes with: **administrative Outcome 2007 / 2008 / 2013**. Original 2006 has been recovered and its relevant 31 tables / 146 rows have been delivered in the National Tax Court -2006-original -tables.md / .json. The negative searches below mean that the original requested was not obtained by the studied means; they do not mean that the original or the authority's underlying figures have never existed.

Checked access route	Actual result	Limit of proof
Public archive, exactly old annual report page nationskatretten.dk / maal _ o g _ results / rsreporta.html	Annual captures 2004 / 2005 / 2007 found. The latest 20070108152045 has been read for links; since refers to 2001-2005, not 2007 / 2008 / 2013.	The site is a historical index, not an updated full list for 2013.
Accurate old statistical page nationskatrett en.dk / maal _ and _ results / selecteactuelles tatistikker.html	Annual captures 2004 / 2005 / 2007 registered. No capture 2013 or later in this precise query.	Recording captures is not material reading of an 2013outcome table.
CDX Domain National Tax Retten.dk, status 200, publication names yearsreport / report / statistics, all MIMEs types	Official 2002-2005 and 2011/12 PDFs, including test hostnames, are found. No 2007/2008/2013 annual original among this filter's results.	2011 / 12 is separately materially controlled in the coordinator's delivery. No claim of full historical publication based on archive coverage.
CDX Domain lsr.dk, corresponding publication filter	Clear result. Separate annual search in the 194 relevant series of the host register found none of the requested annual originals.	Empty search relates to the exact filters; it is not proof that this alternate host has never provided statistics.
CDX domain skm.dk, status 200, national tax / lsr / aarsrap / rsreport, all MIMEs	46 URL registrations. The 2006 original identified at /public/dokumenter/landsskatteretten 2006.pdf. No corresponding 2007/2008/2013 annual original in the result. A 2007 page on shorter case-processing time is another study.	The actual 2006 find has been read. The title of the time evaluation is not annual statistics 2007.
CDX domain skm.dk, status 200, PDF, year 2007 / 2008 / 2013, also generic filenames	62 URL registrations; no desired LSR annual original among the annual report / report names.	Name filter cannot identify a statistics file without a recognisable name; the archive is not the authority's complete document system.
CDX domain skat.dk, status 200, publication names as above	105 URL registrations; no desired LSR year original with year 2007 / 2008 / 2013.	No material year-end reading results from this catalogue result.
Precise possible mirror addresses skm.dk / publi c / documents / national tax law 2007.pdf and national tax law 2008.pdf	Both precise CDX requests resulted in empty results.	The file names were justified search tracks from the working 2006 address; existence is not assumed.
Folketingets ODA Document Register, title contains National Tax Law and Report, top 300	14 official titles, no additional performance page. Annual reports 2006 / 2009 / 2010 / 2011 / 2012 / 2013 are identified, but no title with the requested 2007 / 2008 annual report.	The title index cannot exhaust attachments under another title. The 14 are metadata deposits, not 14 bugs or annual reports.
Genius variant of the ODA registry National Tax Court and Report	Six titles; no independent 2007 / 2008 -original.	Separate search variant, not six new reports.

Checked access route	Actual result	Limit of proof
Annual report of the ODA registry + 2007 / 2008 + Tax / tax	Eight titles, all irrelevant questions concerning other annual reports or companies; no requested original authority annual report.	These eight are not statistical populations.
2013 financial report, FT SAU 20131 Annex 196, document 99867, file 193526	The official 16-page original has now been read in full as text through Folketing's reproduction, pp.1-16/lines 0-622. Existing flow, time, backlog and target tables have been checked. No complete administrative favourable-finding/dismissal/remittal matrix in the report.	The year 2013 is not completely uncovered; the missing dimension is precise administrative distribution and subsequent restoration.
FT 20171 SAU Annex 209,1904358: Evaluation of the complaints structure	Official 69-page PDF available. Targeted text checks of the relevant content / method passages show time, production and court review; search results for confirmation / reduction were empty.	Not the entire 69-page original materially read in this task; not evidence of a full 2013administrative outcome matrix.

For 2007 / 2008, corrected and uncorrected average time is already primary controlled in Follow-up by the National Auditor 6. May 2010, p. 3: 2007 corrected 11,8 months and actually approximately 13; 2008 corrected 11,0 and actually 12,7 months. The concrete remainder is therefore: **all administrative outcome matrices and full annual originals;**, not lack of knowledge of any control or waiting time in these years.

The annual processing time for 2013 in the known annual report is an adjusted 9,5 months, with a more precise measured value of 9,46. This is not the time for a deduplicated trajectory through both administrative instances then in existence. The relevant methodology read in the evaluation, printed pp. 37-38, separately explains that the 2013 time cannot be calculated for cases passing through two instances, and that the 2013 LSR population also contains case types handled by Skatteankestyrelsen after 2014. This narrow methodology check cannot be used to declare all tables in the evaluation checked. Evaluation, methodology pp. 37–38.

The later complete binary CDX search without a filename filter found 41/1/121 URL occurrences on LSR/lsr.dk/SANST. Three generic files were actually opened:2006 annual report hash-identical,2007 writing guide not an annual report, and a 22.2.2007 interim report of 31 pages, now all read as text/diagrams visually. The new process/knowledge source is integrated separately; no 2007/2008/2013 administrative outcome matrix was found. The earlier filename-filter scope has thus been expanded.

The remaining register requirement is version-dated 2007/2008/2013 outcomes by case group, with separate counts of full/partial relief, increases, remittals, rejections, shelving, withdrawal, discontinuance and refusal to reopen, and the actual reasons for those closures. The 2006 original's criticism of coding shows why the final categories must be included: complaints closed after alteration by the first authority may otherwise disappear from the account of successful claims. No external enquiry has been sent in this task.

National Tax Law 2007: documented management knowledge, leisure time and process changes;

A new file search without filename filter found 41 published binary URLs on the National Tax Court's historical domain, one on lsr.dk and 121 on the Danish Tax Appeals Board's domain. These are metadata occurrences, not report, error or case figures. Three generic files were subsequently opened in RAM: 5705-2006 materie.pdf is hashentical with the already used 2006 annual report and adds no new cases; 5707 samnp.pdf is a writing guide from 2007, not the annual report; Mid-Term report.PDF is a 31-page original from 22 February 2007 on complainants' waiting time. All 31 pages of the last page are text read, and PDF9 / 26 / 28 / 29 is visually controlled, including characters with incorrect text coding. No original copies are saved. [LSRLEAN07]

Sage and capacity: all cells in the original population table

Target PDF9	End of 2005, background	Ultimojuni 2006	End of 2006	Unit
Total number of cases	4.844	4.944	4.353	Cases pending, not year-end
Cases not analysed	1.177	467	388	Sub-quantity of total stock
Case handlers	47	72	77	Yearworks, not necessarily employed persons
Cashier in Case	103	69	57	The rounded ratio of the original
Cases not dealt with per caser	25	6	5	The rounded ratio of the original

The stock decreased by 491 from end 2005 to end 2006 and 591 from June to end 2006; undistributed 789 and 79 fell from the respective starting points. These are own differences between stock reductions. They are not the number of complaints closed: new entrances and other movements can be included between the basis.388 disadvantages are also not 388 proven unlawful decisions. They document an actual outstanding work population. The table shall not be added to the 2006 annual report's closing tables.

All key target figures and their demarcation

PDF	Distinguished number or interval	What the source measures or plans
3	13,7 → 8 months	The objectives of the profit and loss contract from 2004 onwards to the end of 2008 for all cases on the list; not achieved in this mid-term report
3	13,6 → 8 months	Corresponding income tax targets; type of case
3	40 appeals	The Ombudsman selected the 2005-2006 review; not an additional error union
4	2 areas of action	Internal working procedures and cross-cutting interactions / rules; the report only covers the former
5-7	7 work tracks and 7 groups	Case technique, piles, hearings, decision / preparation, intervals, office file and main file
5/26	4 phases of the project	Organisation process; not four citizens' cohorts
6	19 employees	Training seminar 5 September 2006; not 19 cases decided
8	3 to 6 months	Planned interval until follow-up on an event on case-handling procedures
9	3 months	Last scheduled start for three types of case piles; not total decision deadline
9	1 month	Office Head of Unit Time Planned; not total time of the citizen
10	14 + possibly 14 days	Consultation deadline and extensions for SKAT and the complainant; extension frequency not counted
12-13	Not more than 7 days	Votation time of each member of the court after a letter has been sent; non-documented performance in all cases
13	4 cases of 45 minutes	Existing legal model
13	5 easier cases 30 minutes	Experimental proposal; own difference 25% more cases, 150 as against 180 meeting minutes; no measurement of quality loss or gain
14	3-4 weeks	Specified normal preparation for hearing; often longer according to source
14	1 ½ week response	Specified example of inability to fill a free meeting time; no trigger denominator
16	3 new reports	Planned tools for ranges, internal / external time and pile management
18	About 50 questions / 8 replies	Internal office journal survey; rounded number of questions and denominator of staff
18	2 office pupils	Expected extension autumn 2007; undocumented effect
19	4 employees	The specified staff of the main journal
25	9 permanent steering group members;	The Commission indicates 3DEP + 3LSR + 1SKAT + 1 Appeal Secretary + 1 Head of Justice; PDF4's list of names has 8 and the difference is not harmonised
27	2 workshops	Project activities; not two independent legal studies
28	8 solution tracks	The Annex to the consultation against the main report's 7; decision-making / preparation is divided into the figure
29	4 cases per office in February / April	Planned sample of case-handling techniques; actual sample and results not stated
30	80% within 14 days	Planned follow-up targets for consultation time ultimoApril; absolute N and actual fulfillment shortcomings
30	At least 1 office	Scheduled experience with self-determination first quarter 2007; not independently documented measurement

The figures’ date axes on PDF28-29 run from 1. December through 1. January,1. February and 1. March to 1. July in the implementation plan. They show planned status meetings, decisions and follow-up, not achieved effect targets. The original’s four phases on PDF26 are visually confirmed. Recurring plan milestones in the main text and annexes must not be counted as new checks every time they are repeated.

Responsibilities and concrete deadlines for the plan

PDF	Planned action or control	Deadline / effect	Specified liability
4-5	Initiation / first meeting of steering group	3 May 2006 decision; 17th May approval versus 16th May before the first meeting	Department / steering group; day difference retained
8	Tools and knowledge sharing	1 April 2007	Chef group
8	Priority of other tool proposals	1. May 2007	Chef group
8	Follow-up to the case	1 June 2007	Souschefer
8	Library Project	1 June 2007	Chief / Library Group
10	Bulk metering	1 February 2007	Secretariat
10	Implementation of bunkers' lines	1 July 2007	Chef group
11	Direct tax consultation amended	11 December 2006	LSR / SKAT; indicated initiated, effect still expected
12	Standard letter for complaints / move / measurement	1 February 2007	Secretariat
13	Votation measurement	1 February 2007	Secretariat
13	Self-determination where possible	May 2007	Chef group
13	Attempts to deal with five cases of easier proceedings	May 2007	Presidents
13	Visitation / priority	1 January 2007	Heads of Division
13	Electronic weighing	No date	IT section; winnings not documented
15	Correspondence letter, newsletter and cancellation statistics	1 February 2007	Secretariat
17	New case placement codes	1 February 2007	Secretariat
17	Three measurement / control reports	1 February 2007	IT section
17	Code information meeting	1 February 2007	Secretariat
17	New code / journal structure	Awaiting period shift mid-2007	Secretariat
19	Daily record tasks and verification	1 February 2007 / May 2007	Newspapers / Chief Group
19	Replacement scheme	1 July 2007	Secretariat / journal masters
19	Holiday / Departure Tool	1. May 2007	Secretariat / IT section
19	Remove coffee accounting	1 January 2007	Secretariat; administrative activity, not civil correction
19	Library project launched	1 February 2007	Chef group; different milestone from June on PDF8
19	Monthly journal knowledge meetings	1 February 2007	Secretariat
19-20	Quarterly main / office journal meetings	1 April 2007	Secretariat
19	Telephone / calendar instructions	1 April 2007	IT section
20	The main journal's task descriptions	Immediately	Main Journal
20	List of authorities / knowledge meetings	1 February 2007	Secretariat

PDF	Planned action or control	Deadline / effect	Specified liability
20-21	Reporting	January / July 2007; management seminar May	Steering Group / Management, further Minister / Audit / Committee
21	User satisfaction survey	End of 2007	LSR; results not in the report
29-30	Procedure technique / consultation / data test	February / April 2007; evaluation May	Offices/management; planned sample and interview

Dates are a chain of responsibility for the planned work. They do not demonstrate that each milestone was implemented or that a complainant got his right or money back. The main text and annexes contain repetitions of the same approach. No aggregate sum of these rows is referred to as implemented regulatory controls.

Independent review of procedural change and civil proceedings

Conclusion: The document proves specific knowledge of time awaiting action, bottlenecks, variation in records and the need for better quality; it does not prove timely or lawful review was achieved. **Authority's statement:** The Minister for Taxation's appendix acknowledges that funding priorities contributed to increased processing time. The terms of reference require changes without deterioration in legal safeguards or decision quality. **Original evidence:** PDF22-25 containing the ministerial statement and terms of reference, read with the internal process description in PDF9-21. **Deficiency:** The report publishes no subsequent measurement of legal safeguards, the individual citizen's actual loss or payment. The budget explanation is the minister's explanation of priorities; it does not document that every delay was legally acceptable.

Relevant rule: The duty of sound processing on a sufficiently established factual basis, the specific statutory access to procedure and hearings, and the right actually covered by the complaint. The Ferrazzini delimitation in the report's tax analysis must continue to apply: ordinary tax claims do not automatically receive the civil protection of Article 6; sanctions and other rights require their own rules. **Act or omission:** PDF11-12 proposes that the complainant must reply within the consultation deadline to retain an oral hearing, otherwise the case proceeds to a written vote; PDF14 narrows the possibility of a new hearing following cancellation. **Legal departure:** A workflow or standard letter cannot alone establish legal authority to deprive the complainant of a procedural right. The examination must show the legal basis then in force, specific information, a valid reason for non-attendance, the party's understanding, the authority's reasons and the actual form of decision. The report documents the plan, not a particular citizen's unlawfully denied hearing.

Significance for outcomes: Less meeting time, self-voting and faster flow must be examined against genuine participation and decision quality. Numbers of closures do not in themselves prove improved lawfulness. **Responsibility:** The department, minister, tribunal management, senior-management group and named responsible roles are documented actors in the governance chain described; individual culpability requires the specific decision and knowledge. **Specific demand:** Produce the planned monthly interval/backlog reports,2006/2007 cancellation statistics, actual self-voting/hearing samples, subsequent measurement of legal safeguards, final 2007 reporting and affected citizens' case histories with financial effects. Examine whether known waiting periods were eliminated and whether changed letters and meeting procedures had proper legal authority and specific consequences. [LSRLEAN07;FXTAX01;FXTAX02;R04]

Remaining exactly after this finding

Administrative outcome matrices for 2007/2008/2013 were not found in these three files. The full binary archive search closes an earlier filename-filter gap and supplies an actual primary source for management knowledge and the process plan, but no new annual findings in the party's favour. The hash-identical republication of the 2006 annual report is counted once. The writing guide's first three pages were read for source identification; no full reading of its 28 pages or use as statistics is claimed. Final linkage of courses and losses still requires case-record/register data.

Tax appeals:outcomes, hidden remittals for reconsideration and time

All 12 years of original exit tables 2014- 2025 are read and numerically aligned with their own totals. The tables include the Motor, Tax and Valuation Appeal Board, the National Tax Court and the Danish Tax Appeals Board. The full breakdown of government figures is retained in the data file; the table below shows the total cases of the same year.

All annual outcomes with the original denominator

Year	Medh old he lt / delvi t	Stadf unladen	Sharpe n a	Tail cold	Other o utcome	Remitted for reconsi deration separately	Completed before the debut; sestudi stability	Name no	Original source

2020	3071	3238	150	1011	1575	are included in the second category;	are included in the second category;	9045	Case statistics; PDF p. 9
2021	2553	2940	225	877	1734	are included in the second category;	are included in the second category;	8329	Case statistics; PDF p. 8
2022	2873	3005	155	1410	1446	are included in the second category;	are included in the second category;	8889	Case statistics; PDF p. 8
2023	2970	3114	253	1566	1986	are included in the second category;	are included in the second category;	9889	Case statistics; PDF p. 8
2024	2302	4075	230	750	1933	are included in the second category;	are included in the second category;	9290	Case statistics; PDF p. 8
2025	2746	4606	235	is included in the second category .	698	253	2039	10577	Case statistics; PDF p. 9

In 2016-2024, “other outcome” includes cases declared inadmissible, closed, lapsed, reopened and remitted for reconsideration, and refused reopening; in 2021-2024, court cases bypassing the appeal body are also described. In 2014-2015, the footnote instead mentions inadmissible, closed, lapsed and refused reopening. None of these combined categories may be interpreted as zero remittals for reconsideration or zero errors. In 2025, 253 remittals for reconsideration are now separate, “other outcome” is narrowed to inadmissible/refused reopening, and 2.039 are concluded before the decision-making authority. The categories’ changed content makes a mechanical trend curve misleading.

In addition, in 2025 approximately 2.200 complaints are concluded administratively without or with limited treatment; they are outside the 10.577 exit table. The group may include, inter alia, the resumption of the first instance at the beginning of the year.

consultation. It must not disappear from the coverage account, nor may it be added to favourable findings as documented errors without further breakdown. 2025,pp.2–3 and 7–8.

Entrance, departure and stock

Year	Received	Decided / Decrease g in the table	Stock end	Original
2012	13077	14453	16372	Case statistics; PDF p. 3

2025	13649	10577	11480	Case statistics; PDF p. 4

The stock should not be calculated mechanically as last year's stock + approach - determined. The originals shall document administrative closure, post-registration, amended decision authority and the splitting of one complaint number into several complaints. In addition, the 2015report has rounded parts of the older population.

The actual reported treatment time and what it omits

Year	Engine	Honey.	Assessment	LSR	SANST	Original and delimitation

2025	13,7	14,8	7	24,6	3,2	Case statistics; PDF p. 10; months, pending cases omitted

The average of assessment cases is 40,9 months in 2020 and the 36,8 months of the National Tax Court in 2019; the reported averages leave out cases suspended, for example due to criminal proceedings or surveys and estimates. This is a concrete understatement of the citizens' total waiting time. Recovery proceedings shall be measured only from the date of full disclosure. Therefore, their short average cannot be used as a time from the first regulatory intervention or the first complaint. 2011- 2013 LSR includes non-case cases and appeal times omitting revoked complaints; historical times are not directly comparable after the change in competence in 2014.

For 2025, the board stresses that 98,8% of "civil matters" meet the 12-month target. The target population omits, among other things, the suspension of proceedings in principle, the request for a hearing, the absence of cooperation and the rejection of the complainant. Assessment cases are not included at all in the category "near to the citizen." The proportion is therefore not evidence that 98,8% of all citizens' tax complaints will be decided within 12 months. 2025, p. 6.

Historical predecessors and current remains

On 1 January 2014, the decisions of the Boards of Appeal were no longer the subject of a general appeal to the National Tax Court and the Board of Directors took over certain competences. This changes both the person overlap, the case population and measured times. 2014, p. 2–3.

2006-2010 and the complete outcomes for 2011-2013 still require originals from the National Tax Tribunal and the appeals boards then in existence. This is a specific remaining historical source component, not an assumed zero. Intake/outflow for 2012-2013 and times for 2011-2013 have already been checked as historical tables in the newer originals.

Historical administrative matrices now provided

The LSRH11/LSRH12 originals complete the administrative percentage matrices for four case groups in 2009-2012 and the full first-instance court outcomes for 2009/2010. The included rounded percentages and exact denominators, and hidden reductions within other outcomes, are in the separate module landsskatteretten-2009-2012-originale-udfaldsmatricer.md. Remaining administrative years 2006-2008/2013 and raw cell counts/remittal codes are kept separate from the substantive review completed.

12. Foreigners and asylum: verification and compliance

What the statements document

The original statistics sections show both amended decisions and an extensive number of remittals. The figures must be retained as separate outcomes: a remittal closes the board's registration, but does not document that the individual obtained a residence permit, received a residence card or reunited with their family. The board's own 2025 report, physical PDF page 6,also states that the board can correct procedural errors and decide a case with criticism. An upheld decision is therefore not in itself documentation of an error-free process either. New information may also lead to remittal; each remittal's grounds must be recorded to count original legal errors. Original 2025.

The checks shall include statistical sections, tables, method passages and the relevant picture figures. It does not imply an allegation that all the individual case reports have been read. The Board began in 2013; the Ministry's previous complaints series 2006-12 must be treated as a separate predecessor.

All outcomes in the original tables 2013- 2021

The unit is person-cases/closures. The same citizen may occur in a later reopening or new decision. The family table also includes, among other things, permanent residence and administrative expulsion; its name must not be rewritten to mean family-reunification cases alone.

Requests to reopen are counted separately below. They are not new, independent citizens, and granting reopening is not itself a residence permit.

Year	Without Decision	Meeting ed take	Refusal	All requests n	Original / Physical PDF page
2013	12	14	140	166	Report p.204
2014	22	30	181	233	Report p.335
2015	29	27	121	177	Report p.362
2016	10	37	148	195	Report p.283
2017	7	17	143	167	Report p.392
2018	11	145	115	271	Report p.418
2019	16	75	107	198	Report p.481
2020	28	113	100	241	Report p.793
2021	14	39	176	229	Report p.719

The sum of the published “Total” fields for 2013-21 is **26.260** closures excluding requests to reopen. The individual outcome categories total **26.266**:the difference of six is in the original family-reunification table for 2019. The categories include **1.834 overturnings** and **4.431 remittals for reconsideration**. In addition, there are **1.877 requests to reopen**,of which **497 granted**. The totals are registration events; distinct persons require separate deduplication. Both the difference of six in 2019 and the difference of ten between outcomes and annual outflow in 2020 are retained visibly in the account.

Selected result figures 2022-2025

The figures show only three outcomes in selected areas of activity. The exact figures and their exact denominators are not published in the figures. **Rounded percentages have therefore not multiplied by the year-end to produce exact number of cases.** Rejected cases and closed cases without a decision must be kept in the overall coverage account even if they are missing from the figures.

Time to completion of the Board

The board's average must not be rewritten as total time before authorities. It does not necessarily include preceding first-instance processing, excluded historical EU waiting time or subsequent implementation. The 2021 original, physical page 716, expressly excludes time before transfer of EU cases on 1. April 2019. This temporal registration boundary must accompany every use of the figure.

Documented source differences and omissions

• 2019: The original outcome of the family table 49 + 1075 + 453 + 163 + 179 = 1919, but total of the original 1913. Unmatched source difference 6; original figures are retained. Original, physical PDF page 480.

• 2017: Footnote 37: Decisions on age and identity omitted from the tables for statistical reasons. Original, physical PDF page 385.

• 2019: The same original indicates all-case types 286 days in text and 213 days in table. Both are preserved; no automatic correction. Original, physical PDF page 478,491.

• 2020: Total outflow 2859, sum of outcome categories 2869. Family-reunification flow 1751 against outcome table 1761. Difference 10 retained as an unreconciled source difference. Original, physical PDF page 788,790,791,792,793.

• 2021: Time before the transfer of EU cases to the Board 1.4.2019 is excluded. The citizens' full historical wait is therefore greater than the objective of these cases. Original, physical PDF page 716.

• 2022: The report 404 days; annual statistics 405 days. Version difference 1 day is maintained. Original, physical PDF page 64.

• 2025:Procedural errors may lead to remittal for reconsideration or be remedied by the Board through a decision and any criticism. New information may also lead to remittal for reconsideration. Outcome figures therefore do not capture all errors, including among upheld decisions. Original,physical PDF page 6.

•2025: The processing-type table's 3158+visa closures 581=3739 versus total closures 3759. Selected areas and the scope of reopenings require reconciliation; a difference of 20 is not 20 documented unique citizens. Original, physical PDF pages 74,77,78.

Concrete progress: first remittal for reconsideration followed by another inadequate refusal

A Moroccan mother, her Danish spouse and their two Danish children moved to France in 2019 and back to Denmark in 2020. Udlændingestyrelsen in November 2020, refused a derogation from the expiry of the residence permit. In November 2022, the Board referred back to the Court of Justice for review following judgments of the European Court of Justice of 5 May 2022, C-451 / 19 and C-532 / 19. The board refused again in April 2023. The Board of Appeal found on 28 May 2024 that the Board of Directors had not assessed the case in accordance with the remittal for reconsideration and amended the decision. The children were 10 and 6 years old.

The documented trajectory lasted approximately 3½ years from the first refusal to alteration of the decision and approximately 18 months from remittal. Responsibility also concerns the agency's omission after the specific correction. The board considered ECHR Article 8 and EU law and sent the case to the agency for a new residence card. The original documents neither the card's issue date nor an actual family separation. Those consequences require separate evidence; they must not be filled in by assumption. KEN9715 of 28. May 2024/ERH 2024/35, physical pages 1-3.

Next Level of Documentation

For a complete account of consequences, each relevant course must be linked to the original decision, reason for remittal for reconsideration, new decision, actual residence permit, physical return, reunification, loss and any compensation. Parliamentary reply UUI421 of 13. August 2025 discusses actual residence permits in 2019-1. June 2025 following board amendments and remittals for reconsideration; the full table must be checked before its figures are compiled as a national account of redress. Reply.

The Refugee Board: decisions, cases concerned and waiting period 2006-2025

Appeal review shows specific amendments to asylum and removal decisions. A favourable finding or remittal must be examined for cause and consequence: changed country information, new information and errors in the first decision can all lead to amendment. The outcome tables identify review results; they count neither all unlawful interventions nor all different people. The statistics cover the board's registered appeals and reopenings; people whose authority decision does not reach the board are outside this review.

1. Breaking of accounts and double counting

2006 counts cases. As of 1 January 2007, at the request of the Ministry (2007-original, physical PDF page 223), the named persons in the cases count. A family history can therefore change from one case to several personal cases. A person may enter several times upon reopening and in different types of decision. All totals should be referred to as cases / persons with this limitation.

From 2022,the main overview includes remittals. Older original annual overviews place remittals among closures without a decision; later five-year overviews rework historical years. The new 2022 overview states 2.410, 1.951, 1.123 and 1.073 for 2018-21 versus the original 2.174, 1.726, 1.023 and 933. These are different source versions and scopes. They are not added together. In 2021, 140 remittals are stated separately and a further 116 closures without a decision. From 2024,other complaint types are listed separately outside the main table.

2. All 20 years of original summaries

2025	604	466	-	-	-	166	Annual report 2025, summary, p. 532; time p. 535

»-« is not zero. The 2006 figures are cases; the other rows are registrations of cases concerning individuals. Spontaneous cases are already included in the main overview. Closures without a decision appear separately and, in older years, overlap remittals in the later revised overviews. The 2024 main overview has a further 229 other complaint cases and 2025 a further 244: the reported categories sum respectively to 733 and 848 before any closures without a decision.

3. The actual outcome of Spontaneous Agents

Year and delimitation	Stadfoe Stated	§ 7(1)	§ 7(2)	§ 7(3)	Home t	Public ed total	Original

2021	20	52	14	86	No; above only new	Original, p. 559

2016-2020: percentages shall not be converted into fictitious accurate counters

The following new case tables shall publish rounded percentages. Each percent has its own annual denominator, which is shown in the table. Multiplication with the denominator does not recreate precise counters.

Year	New: confirmed / § 7(1)/§ 7(2)/§ 7(3), %	Recorded: same order,%	Original physical PDFs pages
2016	83/12/5/-	-/-/-/-	Original, p. 551, 553
2017	83/10/7/-	50/46/3/1	Original, p. 531, 532
2018	84/10/6/0	54/36/10/0	Original, p. 621, 622
2019	85/9/6/-	69/21/10/-	Original, p. 694, 695
2020	83/14/3/-	48/44/8/-	Original, p. 588, 589

The 2016 reopening table states 67/4/11 and a total of 82, while the overview states 83 reopened cases. That table requires separate reconciliation of unit and version errors before category counts are used. No constructed count has been saved for 2016.

4. Requests for revision, separate from subsequent decisions

Year	Allowed g enoptaget ed	Refusal	Rejected	Remitted for recons ideration separately	Other Ter mination	Total	Original

2017	118	287	111	37	16	569	Original, p. 532
2018	49	183	30	150	57	469	Original, p. 622
2019	78	122	42	44	3	289	Original, p. 695
2020	86	191	32	33	14	356	Original, p. 589
2021	107	74	11	-	13	194	Original, p. 559
2022	220	88	26	-	-	334	Original, p. 598
2023	241	90	16	-	-	347	Original, p. 547
2024	125	101	16	-	-	242	Original, p. 519
2025	125	92	12	-	-	229	Original, p. 541

2006 is a case. 2007-21 uses the controlled tables of personal cases; 2022-25 refer to the figures as cases. More recent "resumed" also includes reopening for the purpose of remittal for reconsideration back. A successful application and its subsequent decision of substance may relate to the same person and may not be counted as two people. The residence permit or return actually obtained requires separate documentation.

5. Dublin: Full and defined control accounts

Year	Stadf unladen	Omgja rt	Home t	Rejecte d	Without determi ne lse	Total	All the time of the case;	Fast the time of the case;	Original
2014	852	4	44	0	24	924	21 days	16 (95 %)	Original, p. 481
2015	904	4	37	2	15	962	18 days	13 (95 %)	Original, p.556
2016	1110	9	280	12	164	1575	50 working days	40 (95 %)	Original, p. 554
2017	463	17	38	9	77	604	30 working days	15 (80 %)	Original, p. 534
2018	174	1	30	1	40	246	27 working days	13 (80 %)	Original, p. 624
2019	167	12	2	6	48	235	37 working days	18 (80 %)	Original, p. 698
2020	82	14	1	2	16	115	48 working days	27 (80 %)	Original, page 591
2021	139	9	1	2	27	178	33 working days	16 (80 %)	Original, p. 563
2022	146	1	23	4	-	174	- weekdays	- (80 %)	Original, p. 597
2023	179	16	15	-	-	210	47 working days	23 (80 %)	Original, p. 545
2024	130	34	5	-	-	169	99 working days	47 (80 %)	Original, p. 517
2025	127	49	19	-	-	195	131 working days	64 (80 %)	Original, p. 539

The 2021 total is 178. The separate country distribution has only 148 decisions on the merits (139 affirmances and nine alterations/remittals); the 30 other outcomes must be retained. For 2022-25 the newer tables shown exclude closures without a decision. The rows therefore do not document the same total outflow as 2014-21. For 2014-15 time is described as »days«; from 2016 as »working days«. No conversion is made without a calendar basis.

6. Children, Implications and Concrete Time Loss

The 2021 original (physical PDF pages 564- 565) lists 45 age complaints: 25 confirmed, one overturned, three remitted and 16 closed without a decision because the complainant had disappeared. These are persons who claimed to be children; a refusal of the alleged age is not proof that all the complainants were adults. There were no decisions on § 9c (3) or accompanying assessment. Two identity complaints were confirmed. Of 18 travel documents, one was overturned, three were remanded and 14 were closed upon resignation.

The 2022 original, physical PDF page 598, documents an unaccompanied minor's section 9 c(3)(2) complaint in which the decision was overturned and two identity complaints in which both decisions were overturned. There were no complaints concerning accompaniment assessments or travel-document decisions. Children also appear in family cases and international complaints; category counts must not be added as distinct children.

Waiting time is an independent loss of time in uncertainty, which must be linked to the actual consequences of each person. The average of the Asylum Board for 2018- 19 was 348 and 367 days and by 2025 it was 166 days. For the fastest 95% of the 2025 cases, the average was 151 days against target 110; the target was not reached and the target for 2026 was set at 130. Dublin increased from an average of 33 working days in 2021 to 131 in 2025. These times begin and end at the time of the Board's treatment; the time at first instance, re-treatment and for actual residence or return is added. These aggregated tables do not contain a measure of the citizens' entire cycle.

7. Concrete inconsistencies and remnants of the originals

• The 2010 overview indicates 823 cases, while the table has 825; the original explains two different decisions in the same case. There are not two new people for that reason.

• The 2009 and 2010 prose states an overall overturning rate of 24 % for each, while the checked new/reopened outcomes give 131 of 435 and 280 of 1.066 respectively. Scope or source error has not been reconciled; both source statements must remain visible.

• The title of the 2011 table on new spontaneous cases has a total of 1.292, which includes seven reopened; the seven must not be added again.

• The 2012new table has one more in published total than in the three exit categories. The category of one has not been documented.

• The 2015-new-total is 1.252 in the table and 1.253 in the table of accounts.

• The 2016- resumed is 83 in the table as opposed to 82 in the separate table.

• The 2024 percentage table indicates 55 / 30 / 15, with the exact total row of the year rounded to 56 / 30 / 14. Exact counters shall be retained; the percentages shall not be copied as harmonised values.

• Requests for reopening in 2021 are stated as 194, but the categories of 107 reopenings, 74 refusals, 11 rejections and 13 terminations total 205. A further 29 requests concerning revocation cases (15 reopened, 12 refusals, one rejected and one terminated) are counted separately on p. 560. The specific difference of 11 is not repaired. Other appeal types' outcomes across 20 years, overall closures without a decision from 2022 and the complete historical child/age series have not yet been reconciled. Original annual reports have been located for all 20 years; missing fields are stated specifically and filled through further checks of originals.

13. EMD: judgments, complaints and various rightholders;

Checked on 6. October 2026 in the Court's original annual tables. The unit is judgments delivered in the calendar year. The event, intervention and submission of the complaint may be earlier. The table covers cases against Denmark; geographical or sectoral distribution is not shown in these statistics. A judgment may concern several complaints, applicants and articles. Several judgments may belong to the same case trajectory, including Chamber and Grand Chamber. The table must therefore not be presented as the number of unique individuals or Danish authority events.

Sum	**59**	**25**	**33**	**1**	**0**	**30 non-zero artikel / under category finding; including one conditional find**	Sum of the 20 non-overlapping calendar years in the above table

Blank fields in a row with a known judgment total are reproduced here as 0 after checking the specific column position and reconciling the row. The publisher's original blank fields and coordinates are preserved in the compact positional annex. 2020 has a text layer in which entries of 1 in two neighbouring columns can merge into »11«; the original judgment total is 1, not 11. The table has been checked against the original column positions and the ECtHR's own text extract.

Voting: 25 + 33 + 1 + 0 = 59. The number of article finds is greater than the number of infringement sentences, because the same sentence may find more violations. In particular, in 2009, 2023 and 2024, Article columns may not be added to the infringement judgments as new cases. "Conditional 'means a finding that an intervention such as broadcast would infringe Articles 2 and / or 3; it is not evidence that the broadcast was actually carried out.

Total breakdown of article / sub-category findings

Article / category of publisher	2006-2025	Counting
Article 2, deprivation of life	1	2025
Article 3, inhuman / degrading treatment	2	2020 + 2023
Article 3, lack of effective investigation	2	2023 + 2024
Conditional Article 2 / 3 column	1	2019
Article 5	1	2019

Article 13	2	2009
Article 14	1	2016
Additional Protocol 1, Art. 1	1	2009
Sum colony fund	**30**	No number of unique judgments, complaints or people

What the numbers show and next exact datatrin

The annual tables document 25 judgments finding Danish violations delivered during the 20-year period. They do not count all human rights violations in Denmark. They do not include all national judgments, matters not brought before the Court, authorities' own admissions, domestic remedies or complaints rejected before examination on the merits. Absence of an ECtHR violation judgment is therefore no measure of national legality.

The separate 20-year series from "Analysis of Statistics" for allocated, communicated, rejected / deleted complaints and by judgment is now checked and is in Chapter 7B. Personal counts continue to require a HUDOC list of the specific Danish judgments with complaint numbers, number of applicants and finality. A judgment may include several appeal numbers / persons. The annual table above is fully 20-year-wide for **judgments**; the number of judgments and appeals does not complete the sum of persons.

Source of definitions: EMD, Understanding the Court's statistics, March 2019, p. 5-6, paragraphs 2.3.1 and 3.1.1. Annual statistics can record chamber judgments before maturity; use HUDOC for specific final case outcomes.

EMD: Danish complaints and process steps 2006-2025

Controlled October 6, 2026. All 20 years are covered by original EMD annual tables or the same years retrospective Danish diagrams. The permanent data are own numbers with source and locator; original documents and tabular images are only read in memory.

Unit and delimitation: The figures are the number of complaints / applications and annual procedural events. The figures therefore do not count as unique citizens. Allocated complaints are complaints distributed to a judicial body and do not include all administrative cancellations before distribution. Communicated complaints are not detected violations. Rejected / deleted cases may have different procedural or substantive grounds; they are not one category of orders stating that Danish practice was lawful. The columns cannot be merged because the same complaint can occur in several stages and years. The closure of the year does not necessarily relate to the complaints received during the year.

Year	Allocated	Communisted	Rejected / deleted a	Complaints determined by: Judgment	Original and locator
2006	68	4	96	3	Annual analysis 2008, physical / printed s.25, Denmark, diagram Major Procedural steps

2025	92	6	90	5	Annual analysis 2025, physical / printed p.14, Table 4, Denmark
Kolonnesum	**1425**	**156**	**1430**	**65**	Separate process events; not a total

Complaints settled by judgment (65) must be kept separate from the 59 judgments and 25 judgments with at least one infringement in the field -Denmark -2006- 2025.md. For example, five complaints were settled by three Danish judgments in 2018. The summary table of judgments cannot be used without a specific list of complaints / persons to distribute the 65 complaints on the number of people injured.

Maintain reports audits

The annual reports of the EMD indicate different historical values for each year. Both reports shall be retained; they shall not be counted as new cases. The main table uses the later controlled value. The reason for the audit has not been documented here.

Statistical years and objectives	First controlled value	Later value	Sources and locators
2006, allocated	66	68	Previous source, p.98; later source, p.25, Denmark
2007, rejected / deleted	72	73	Previous source, p. 138; later source, p.25, Denmark
2013, allocated	85	84	Previous source, p.25; later source, p.25, Denmark
2014, allocated	65	66	Previous source, p.25; later source, p.25, Denmark
2015, allocated	45	44	Previous source, p.25; later source, p.25, Denmark

The 2006 annual report p.98 also states 108 applications lodged and 4 admissibility decisions. The 108 are a separate inflow measure and must not be added to the 66/68 allocated cases. A complete 20-year series of all applications lodged, including administrative discontinuances before judicial allocation, has not been established in this note.

The method follows the ECtHR's distinction between applications, applicants, judgments and decisions: Understanding the Court's statistics, pp.5-6, §§ 2.3.1 and 3.1.1. The figures document international review activity. They cannot calculate unrecorded Danish rights violations or a national error rate.

EMD: judgments, complaint numbers, applicants and finality

Controlled October 7, 2026 by original judgment PDFs and HUDOC metadata. The entire series is aligned with the 59 English case files.

59 judgments; 57 cases; 63 different complaints; 99 human applications and one Deathman. Biao and Savran are repeated in chamber and large chamber treatment: the known repetitions removed give 96 registered human identities and one estate of death. This is a corpusus count after public identification, not a register of all the deported Danes. The applicant may be left behind while the person directly affected is deceased.

25 judgments with at least one violation in the annual statistics become 24 finally decided case trajectories with violations. Savran's Chamber judgment from 2019 was replaced: the Grand Chamber found no Article 3 violation, but an Article 8 violation. Historical annual statistics and a count of current final outcomes answer different questions.

The October/November 2025 judgments in Naser, Mortensen and Rasmussen became final in 2026. The decision year is retained in the 2006-2025 series, while finality is shown separately. All 57 case courses were finally decided as at the verification date. A final judgment does not automatically document payment, return home, reunification or other individual redress actions.

Specific decision and follow-up chains

Green Desert: Abdulaal Naser and Others. 21 applicants, application 46571/22; judgment 21. October 2025,final 21. January 2026. §§ 108,131-132 and 143 dismiss separate Article 3/length-of-proceedings complaints;§§ 165-166 find no violation of Article 6 concerning access to court/equality of arms;§§ 169-171 dismiss Article 13. The result is not a factual finding that no ill-treatment occurred. The original's introduction describes the group collectively as Iraqi, whereas person 11 in the annex is stated to be Danish; the nationality discrepancy must not be concealed. Original,§§ 1,108,131-132,143,165-171 and the personal-details annex.

Savran / Abdi. The Ministerial Committee concluded the oversight 19 September 2024 by CM / ResDH (2024) 182 following the Government Action Report DH-DD (2024) 679. The resolution documents the completion of the oversight and provides payment in Savran; Abdi did not get exactly satisfaction. An end to supervision alone is not a statement of actual return, health damage or the continued loss of the family. Original Resolution, the table and the operational sections.

Control rules

Complaint numbers, judgment documents, applicant occurrences, identified persons and people directly affected by consequences are separate units. Article overlap is counted according to the judgment’s operative outcome. Committee monitoring is recorded separately with action, date, actual individual effect and documentation; missing implementation information is never translated into established compliance.

EMD decisions: full public register and person count

All 110 English decision documents with Denmark as respondent State and adoption date 2006-2025 have been checked against originals. A decision may be partial, a rejection, settlement or discontinuance; it is not automatically a judgment finding no violation. The 110 documents contain 136 distinct application numbers and at least 846 natural-person occurrences before documented overlap. Unpublished single-judge rejections are not in this public register.

Critical counting points

• Hingitaq 53: 428 people and a group, EMD control in 2006 of relocation in 1953. These are the figures for the control period, not a figure for new actions in 2006.

• Z.K. and 27 others: 28 **applications**. This includes the 22 remaining members of the NHS Group and 14 remaining members of the OAM Group, in addition to 26 applications. Hence at least 62 people. NHS / OAM's previous sub-decisions originally include 33 and 15 people and end 11 and one respectively; these 12 may not be deducted from the total number of persons concerned.

• M.A. / K.M. comprises five people, S.H.I.E.L.N. / M.N. three and H.H. four; the initials of the case do not count the children completely.

• Estates of deceased persons, associations, companies and Latvia as a State are recorded separately from human beings. A mother complaining about her daughter’s compulsory restraint counts as one applicant and one additional directly affected daughter.

• Several sub-decisions are followed by a judgment. The same people and application numbers may not be counted again when the document series are merged. Anonymisation means that, across different applications, the overall personal union cannot be determined on the basis of initials alone.

Precise party and overlap points

• 18584 / 04: 428 persons and an applicant group; the move from Thule took place in 1953, while the EMD decision dates from 2006.

• 1338 / 03: Dødbo is an applicant; the son represents the estate and is not himself an applicant.

• 5853 / 06: One natural person and two associations.

• 34943 / 06: Company limited liability company.

• 880 / 07: Same person and application number as the Lundquist decision 2009.

• 880 / 07: Same person and application number as the Lundquist decision 2008.

• 54298 / 10: 33 original applicants; this sub-decision closes 11 of their complaints. 22 will continue later in the Z.K decision.

• 67411 / 10: 15 original applicants; this sub-decision closes an applicant's complaint. 14 will continue later in the Z.K general decision.

• 37199/10;1417/11;184/11;2676/11;2926/11;38522/10;38798/10;39675/10;39686/10;40429/10;41010/10;4220/11;42459/10;43188/10;43287/10;44021/10;44982/10;49094/10;51474/10;51480/10;54298/10;57976/10;59025/10;63417/10;67411/10;70347/10;71561/10;73448/10: 28 applications, not 28 people. These include NHS with 22 remaining and OAM with 14 remaining, plus 26 other applications. At least 62 people; the published original document has no person annex, even though the cover refers to an application annex.

• 18483 / 11: Two adults and two children, total 555.000 DKK settlement; actually returned to Greece 9.9.2010 and later returned to Denmark on unclaimed date.

• 16359 / 14: Three people: couples and daughter; the title has only two initial groups.

• 17913 / 14: Five people: couples and three children; the title has only two initial groups.

• 24683 / 14: A company.

• 9717 / 20: Intergovernmental case; Latvia is an applicant, no natural person as an applicant.

• 54155 / 21: Same person as Tim Henrik Bruun Hansen- judgment 51072 / 15.

• 37050 / 22: An association.

• 5855 / 25: A mother as an applicant, the daughter as directly affected. Adopted 4.12.2025; notified 8.1.2026. EUR 15.000 compensation and EUR 3.000 costs, government commitment to discussion in the Task Force.

14. Enforcement of human rights judgments

The 24 independent final break-up proceedings groups from judgments handed down between 2006 and 2025 have per capita 7 October 2026 **16 completed and eight still pending enforcement cases**. The eight are Aggerholm, Noorzae, Sharifi, El- Asmar, Nguyen, Sharafane, Kalkan and Mortensen. All are under standard supervision. The number is limited to these judgments and expresses neither all historical Danish breaches nor all current Danish enforcement cases.

Savran's chamber judgment from 2019 was replaced by the Grand chamber judgment from 2021; the final case is included once. Judgments handed down late in 2025 can only become final in 2026. Naser became final on 21 January 2026, but is a judgment without established breach and is therefore not included in this enforcement account.

Why completion and payment do not count as full actual restoration

The Committee of Ministers' original resolutions themselves make the distinction: under ECHR Article 46, in addition to paying compensation, the State may be obliged to take individual measures ending the violation and remedying its consequences, and general measures against recurrence. A final resolution shows the committee's closure of supervision. It does not in itself show that family separation, illness, deprivation of liberty or lost time have been undone. M.A., CM/ResDH(2023)119, preamble.

Aggerholm, Noorzae, El- Asmar, Nguyen, Kalkan and Mortensen are registered with paid compensation, while enforcement is still pending. Sharifi and Sharafane are registered without compensation. The payment accounts must therefore stand alongside the accounts for concrete actions, public knowledge and lasting consequences. HUDOC-EXEC, full Danish extract and individual status cards.

Voting against the overall system of enforcement

The Committee of Ministers' Annual Report 2025 sets Denmark as four new, nine cases pending at the end of the year and four cases closed. Five pending cases were under standard supervision; none were under reinforced supervision. The figures are a different delineation from the status above: Daugaard Sørensen was still open by the end of 2025 and was completed on 29 April 2026; Mortensen was not final until 2026. Annual Report 2025, Danish Country Field, p. 67.

HUDOC-EXEC's current total Danish caseload also includes Klein (settlement decision adopted 4. December 2025,notified 8. January 2026) and new 2026 judgments Poulsen and Makki. They are kept separate from the 2006-2025 judgments' 24 final violation-case groups. Klein concerns a mother's complaint about her daughter's belt restraint:15.000 EUR compensation, 3.000 EUR costs and the Government's commitment to raise the course with the Danish Health Authority's Task Force. Such a settlement is not a judgment finding a violation and is counted separately. Klein 5855/25,pp. 1–3.

Date documentary check

The originals have been read for all 11 distinct closing resolutions covering the 16 completed cases. In several instances, HUDOC-EXEC status cards give the start of a meeting rather than the original's specific adoption date. The report uses the original adoption date: for example, Sørensen/Rasmussen 28.2.2007, Iversen/Hasslund/Moesgaard 2.12.2011, Christensen/Valentin/Nielsen 6.6.2012, Osman 26.9.2012, M.A. 7.6.2023, Savran/Abdi 19.9.2024 and K.K. 12.6.2025. Biao 10.4.2018 and Tim Henrik Bruun Hansen 8.12.2020 have likewise been checked against originals. The K.K. resolution has a typographical error in the parenthetical part of its number in the original heading; it is identified as CM/ResDH(2025)140 in the committee's other official register.

15. United Nations: control, complaints and knowledge

Controlled October 6, 2026. This sub-note provides documented international control findings and precise next source link. Final observations from UN committees and CPT visit reports are not EMD convictions or convictions. They can document the actual criticism, warnings and recommendations of authoritative control bodies and the state's knowledge of problems; each fact claim must continue to be traced to its primary basis. No sum of committee recommendations is called the number of Danish breaches of the Convention.

Fund of particular importance for the order

Document	Controlled find	Locator and original	Meaning of proof and source
United Nations Children's Committee, CR C / C / DNK / CO / 4, 2011	The Committee states that previous recommendations, including on data and alternative care, were not sufficiently implemented.	Original§ 6-7, adopted 4 February 2011, issued 7 April 2011	Documented previous criticism; not proof of the number of concrete invalid decisions.
United Nations Children's Committee, CR C / C / DNK / CO / 5, 2017	§ 26(c) mentions certain Copenhagen decisions in placement sequences without a legal basis and without, among other things, consultation with the parties, appeal guidance, contact assessment and an action plan; similar problems are described as reported elsewhere. §§ 26(d),(f) concern inadequate involvement and use of force/access to complaints.	OriginalParagraph 26-27, adopted on 29 September 2017, issued on 26 October 2017	Concrete evidence of legal basis. The source does not contain the number of children. The municipal original must show whether the lack of home space relates to the removal itself or to a decision on, for example, supervised relationships; the two cannot be renamed each other.
UN Disability Committee, CRPD / C / DNK / C O / 2-3, 2024	§ 63 highlights inadequate or late support for parents with disabilities, possible significance for parenting-capacity assessments and increasing adoption without consent. § 64 requires timely support. §§ 7-8 criticise inadequate application of the Convention; §§ 57-58 discuss distance from family/language when moving from Greenland to Denmark.	Original, § 7-8, 57-58, 63-64; adopted 3 September 2024, issued 8 October 2024	Specifically documented warning about the chain lack of support → parenting capacity assessment → loss of parental responsibility. The committee does not quantify the number of families affected by errors in these sections.
United Nations Torture Committee, CA T / C / DNK / CO / 8, 2023	§ 40-41 criticises few criminal proceedings after police reports and investigations with too narrow a focus of guilt. The committee also requests that it be examined whether abuse / torture has actually taken place. § 7 identifies earlier recommendations in § 13,21,37 as not implemented.	Original, § 7,40-41; adopted 22 November 2023, issued 8 December 2023	The absence of evidence of individual criminal liability shall not automatically replace the investigation of the act and the State's liability for protection. This supports separate traces of incident, state responsibility and criminal guilt.
United Nations Women's Committee, C EDAW / C / DNK / C O / 9, 2021	Paragraph 12 states that previous observations were sent to relevant ministries with responsibilities. Clauses 20-21 highlight protection against violence, especially women with disabilities, and lack of disaggregated data. Paragraphs 14-15 refer to insufficient legal protection and definition.	Original, § 12,14-15,20-21, adopted during session 15-25 February and 4 March 2021	§ 12 is a concrete level of dissemination / knowledge. The prevalence of violence is not simply a violation of the law by public servants; public negligence must be identified separately.

CPT: repeated investigations and concrete duration of coercive action

The CPT country page lists six visits in 2006-2025: 2008, 2012 (Greenland), 2014, 2019, 2024 and 2025 (Greenland). Four were periodic, two ad hoc. This is the number **visits**, not number of breaches of law. The Government's response in 2007 to a 2002 visit is a source of knowledge / reaction during the period, but not a new visit. Original Country Page, the Activity section.

Visits	Report	Reaction in the register
11-20 February 2008	CPT / Inf (2008) 26	CPT / Inf (2009) 12
25-27 September 2012, Greenland	CPT / Inf (2013) 3	CPT / Inf (2013) 11
4-13 February 2014	CPT / Inf (2014) 25	CPT / Inf (2015) 16
3 to 12 April 2019	CPT / Inf (2019) 35	CPT / Inf (2020) 10 and full response CPT / Inf (2020) 26
23 May - 3 June 2024	CPT / Inf (2024) 38	CPT / Inf (2025) 19
14-16 January 2025, Greenland	CPT / Inf (2025) 14	CPT / Inf (2025) 28

The original of the 2024 visit provides the following defined observations:

• Aarhus: 1.167 restraints in 2022, 569 in 2023 and 239 in January-May 2024; 33 in 2023 and 17 in 2024 exceeded 48 hours. Longest durations since the beginning of 2023 were 16, 13 and 8 days.

• Glostrup: 138 restraints in 2022, 66 in 2023 and 31 in January-May 2024. Longest in 2024 were 10, 8 and 5 days.

• Aarhus child/adolescent psychiatry: 18 patients aged 14-17 restrained 237 times in January 2023-May 2024.

• Some inmates in Nyborg / Vestre spent 21-23 hours daily in the cell over months, sometimes years.

CPT/Inf (2024) 38, sections 143-144,147 (physical PDF pp.61-62; printed pp.61-62) and summary p.7/section 73. These are institutional, time-bounded observations. Restraint episodes are not unique patients; overall restraint practice cannot be relabelled as the same number of unlawful episodes without specific scrutiny under the rules.

The 2024 Report is dated 12 December 2024; the Government's reply was published on 23 June 2025. The government's answer, CPT / Inf (2025) 19. The data chain is visit → report / warning → state response → subsequent practice. The last link must be supported by new concrete measures or data, not the government's declaration of its own compliance.

The time for reunification is an independent legal issue

The Grand Chamber judgment **Strand Lobben and Others v. Norway**, no.37283/13, 10. September 2019, establishes in §§ 205,208 that authorities must promote reunification as soon as reasonably feasible and that the obligation increases during placement. Time can irreparably damage family ties. Where the authorities' failure caused the breakdown, they must not justify adoption on the absence of those ties. Original judgment, §§ 205,208-209, physical PDF pp.68-69, printed pp.66-67.

The judgment concerns Norway. It is here a primary source of law on Article 8 and is not counted as a Danish infringement judgment. Paragraph 8 states that Denmark submitted a written third-party submission; it is a specific Danish level of knowledge on the legal issue. It does not prove that any subsequent Danish intervention violated the judgment's requirements.
The report shall measure for each documented process: decision on action → remittal for reconsideration / repeal → new decision → actual cessation / reunification. If contact is restricted, the frequency / duration should be recorded in parallel. Completed administrative cases may thus have continued material consequences.

Current evidence and necessary next level of evidence

1. Copenhagen's original study, sample and thematic figures are verified in chapter 17. The next evidential link is the individual original decisions behind the deficiencies in legal basis and competence.

2. The international registers include 20 periodic UN observations, 265 individual decision documents and three completed UPRs with 620 recommendations. Next evidence is full individual follow-up, staff association and actual implementation, not a new title list.

3. The CPT register includes all six visits and seven replies. The concrete residue includes the material content of the scanned 2013response, the original and point-by-point actual compliance of the 2020part product. No year's institution take-off is extrapolated to the entire period.

4. The HUDOC accounts comprise 59 judgment documents and 110 decisions. The next evidentiary step is anonymised linkage of persons and actual redress in each course; administrative removals before judicial allocation are a different register population.

Historical UN source map: documented criticism and state problem knowledge

Controlled October 6, 2026. The source cards contain their own, defined paraphrases. They document the findings, recommendations and follow-up requirements of the committees; they do not represent a count of legitimate convictions or uniquely violated persons. The actual facts must be verified against Danish originals, and assessments of applicable law today must not copy a historical point of criticism without legal control.

2007: police investigations and isolationpractices

Source: The United Nations Committee on Torture, CAT/ C / DNK / CO / 5, adopted 14 May 2007, issued 16 July 2007. Original§ 14-15, physical / printed p.4.

Section 14 criticises solitary confinement of minors and prolonged solitary confinement even after reductions in permitted time limits. Section 15 calls for prompt, impartial investigation of alleged police abuse and appropriate redress. The point includes criticism of the investigation system; it does not establish that all reported incidents were proved.

Meaning: The source places documented international problem knowledge early in the period under investigation. For current claims of responsibility, criticism is linked to concrete reception, follow-up and continued incidents. An event from 2002 referred to in the 2007 observations shall not be moved into the event figure for the years 2006-2025.

2014: disability, coercion, support and lack of effective redress

Source: United Nations Disability Committee, CRPD / C / DNK / CO / 1, adopted 2 October 2014, issued 30 October 2014. Original.

Locator	Controlled paraffase	Importance of the report
§ 12- 13, p.2-3	Insufficient knowledge among government, regional and municipal officials; need concrete guidance for municipalities.	The distribution of municipal powers cannot replace the State's implementing responsibilities.
§ 14- 17, p.3	Gaps in protection against discrimination, remedies and disaggregated data.	Missing data are independent control findings; no calculation of unknown person numbers.
§ 20-21, p.3-4; § 68, p.10	Criticism of forced hospitalisation / treatment of children and specific follow-up requirements within 12 months.	Children and their actual exposure to coercion are recorded separately.
§ 36-39, p.5-6	Deprivation of liberty linked to disability and compulsory treatment, including restraint exceeding 48 hours.	Duration and consent are substantive issues.
§ 40-43, p.6	Violence, inaccessible protection, lack of data, institution building and forced relocations.	Consequences: isolation, choice of accommodation and protection against abuse.
§ 54-55, p.8	Independent access to complaints in the case of inadequate special education varies according to the length of time required for the aid.	A rights and review problem, not merely service quality.
§ 69-71, p.10	The observations must be sent to government, parliaments, ministries and local authorities and disseminated to citizens.	An identifiable knowledge / dissemination trail.

These committee assessments do not automatically mean an EMD finding in accordance with the same provisions.

2015 / 2016: foreign military practices, asylum, police and psychiatry

Source: The United Nations Committee on Torture, CAT/ C / DNK / CO / 6-7, adopted 30 November 2015, **issued 4 February 2016**. Original.

Locator	Controlled paraffase	Meaning
§ 12- 15, Incorporation / Fundamental safeguards sections	Criticism of non-incorporation and reports of violation of guarantees from the start of detention.	Control of actual access to lawyer, doctor and relatives.

Locator	Controlled paraffase	Meaning
§ 18- 19, Transfer of detainees	The decommissioning of the Iraqi / Afghan Commission left the issue of international breaches unresolved; demands for independent, completed investigation.	Failure to complete the investigation shall not be communicated as proven acquittal.
§ 20-25, Deportation / Screening / Detention	Criticism of sending vulnerable minors, lack of torture screening and long-term detention of asylum seekers.	Identifiable duty of protection and specific subsequent consequences.
§ 32-33, Solitary construction	Criticism of the isolation of children and long isolation periods.	Duration and citizens' group shall be recorded.
§ 40-43, Coercive measures / Intersex persons	Criticism of psychiatric coercion and irreversible intervention on intersex children.	The damage shall not automatically cease at the end of the proceedings.
§ 48-49, Data collection	Missing aggregate/disaggregated data on abuse complaints, investigations, prosecutions, judgments and redress.	Official complaint numbers don't give you a full assault count.

Follow-up chain: § 50 requests answers to § 13,21,23,37. The Government's response is CAT/ C / DNK / CO / 6-7 / Add.1, received 9. December 2016, issued 30. December 2016: original follow-up letter. CAT/ C / DNK / CO / 8, 2023, § 7 continues to mention non-implemented recommendations in § 13,21,37. The response of the State is documented, not in itself proof of adequate compliance.

2016: unimplemented individual UN decisions and protective holes

Source: United Nations Human Rights Committee, CCPR / C / DNK / CO / 6, adopted 7 July 2016, issued 15 August 2016. Original.

Locator	Controlled paraffase	Meaning of proof
§§ 11-12	Some individual committee decisions were not implemented, in particular broadcasting cases.	Specific decisions and subsequent actions must be listed; the source does not indicate a total number.
§§ 19-20	Delays in data on rape complaints, investigations, criminal prosecution and sanctions; heterogeneous police practices.	The protective effort and the measuring basis shall be tested separately.
§§ 23-24	Criticism of child isolation and long disciplinary isolation periods.	Continuous with previous warnings.
§§ 25-26	Concern about psychiatric coercion and restraint exceeding 48 hours.	Concrete temporal problem repeated from previous checks.
§§ 27-28	Clarification of terrorism, surveillance and removal of dual citizenship.	Include legislative and policy responsibilities with a law version.
§§ 31-32,35-36	Asylum guarantees and a long wait for family reunification.	Time is a material family intervention.

Total use and remaining sources

These findings extend international control sources to 2007-2024 and show repeated warnings about coercion, testing and data gaps. They document a problem history; responsibility for a particular subsequent attack requires the clutch warning → competent recipient → duty → concrete action / omission → damage.

The lists are now established in the following sections:20 periodic observation documents,265 individual decision documents in 2006-2025 and three completed UPR cycles with 620 recommendations. Full follow-up, unique person linkage and actual redress are separate outstanding items. The 2026 State report is not a completed fourth UPR review. The ECtHR series for allocated applications and procedural stages has been checked; unallocated administrative discontinuances concern a different population and require separate information.

UN: complete inventory of observations and historical knowledge chains

Checked on 7. October 2026 against the UN's official Denmark register and original documents. **20 concluding observation documents in 2006-2025:** CAT 3, CCPR 2, CEDAW 4, CERD 4, CESCR 2, CRC 2, CRPD 2 and CRC-OPSC 1. Committee years are adoption years; issuance is shown separately when later. Registration dates must not replace the original date. Two 2005 documents provide background for the State's pre-existing knowledge and are kept outside the 20-year count. Documents are not numbers of violations, events or citizens.

List

Year of control	Document ID	Original / locator	Specific document delineation;

2021	CERD / C / DNK / CO / 22-24	Original, § 1, adopted 30.11.2021, released 1.2.2022	Combined 22-24 report, to be included in 2021 year of control.
2023	CAT/ C / DNK / CO / 8	Original, front / § 1; international fund and time effect.md	Eighth report.
2024	CRPD / C / DNK / CO / 2-3	Original, front / § 1; international fund and time effect.md	Combined 2nd-3rd report, one observation document.

CED: No final observation recorded in 2006-2025. Denmark's first report, CED / C / DNK / 1, was received on May 3, 2025 and released on July 15, 2025; it is the State's own report and is not counted as committee fund. § 1 specifies:

the entry into force of the Convention 12 February 2022 and the territorial derogation for Greenland / Faeroe Islands. Original initial report;, front / § 1. CED / C / DNK / Q / 1 from 2026 belongs to the update.

Background before the period: CRC / C / DNK / CO / 3 and CRC / C / OPAC / DNK / CO / 1 from 2005 are included as sources of already available problem knowledge, not as new control findings in 2006-2025. No report numbers or combined years provide additional documents / persons.

Additional source maps: State knowledge, action and missing data

The following are their own defined paraphrases. The other years of control have been developed in historical source maps and international fund and time effects. The case of practice is committee fund until the underlying Danish originals are checked; the repetitions of the committees are a track of knowledge and no additional person count.

2006: violence, family life and public reporting obligations

CEDAW / C / DEN / CO / 6: § 28-29 criticises the fact that foreign spouses' fears of loss of residence prevent them from leaving a violent partner and requires a rapid change of administrative practice. Clauses 30-31 require the assessment of the impact of the 24-year rule on women and point to a lack of figures on forced marriage. § 9 addresses ministries / parliament; § 35 requires communication to civil servants and politicians; § 36 follow-up in the next report. Demarcation: women in the realm, no affected number of persons. Original§ 9,28-31,35-36, p. 2,5-6.

CERD/C/DEN/CO/17: sections 13-15 criticise missing judicial appeal in asylum cases, families living in centres for years, protection gaps for foreign spouses subjected to violence, the 24-/28-year rules and age limit 15 for family reunification. Sections 18-19 criticise discrimination in benefits and education. Section 24 requires a reply within one year on sections 11,13,15. Actors: government, prosecution, asylum authorities and municipalities. Delimitation: protection against discrimination; no aggregate person count. Original, sections 11,13-15,18-19,24, pp. 3-6.

CRC / C / OPSC / DNK / CO / 1: § 9-14 criticises insufficient coordination, training and data. § 19- 20 warns about the importance of the municipal / police reform for early detection and support. Paragraphs 23-24 refer to Tønder and ask whether public employees know the notification requirement; labour pressure and resource shortages may delay response. § 35 requires submission to the State Council, Folketing and local authorities; § 37 follow-up through the next children's report. Limitation: sexual exploitation, no new case / person; the case may overlap with Danish case material. Original§ 9-14,19-24,35-37, p. 2-4.

2008-2010: foreign operations, municipal management and impunity risk

CCPR/C/DNK/CO/5: section 9 requires investigation and publication concerning possible Danish participation in unlawful transfers through airports/airspace; section 10 on diplomatic assurances does not exempt the State from human rights, humanitarian and refugee obligations. Section 11 criticises prolonged solitary confinement, including of minors. Sections 8,15 require follow-up within one year on violence against women and solitary confinement. Actors: government, police and judiciary. Delimitation: the findings count neither flights, victims nor proved criminal culpability. Original, sections 8-11,15, pp. 2-4.

CEDAW/C/DEN/CO/7: §§ 11-12 identify unimplemented 2006 criticism. §§ 18-19 mention that only 6% of municipalities had a coordinated gender-equality strategy; §§ 22-23 state 8% female mayors; § 24 states 13% female professorships. These are defined distribution measures, not percentages of breaches of law. §§ 30-31 criticise insufficient legal protection for foreign spouses experiencing violence; §§ 40-41 repeat family-life criticism. § 10 addresses ministries/parliament/the judiciary; § 48 requires follow-up within two years on§§ 15,31. Original, §§ 10-12,18-25,30-31,40-41,48, pp. 3-7,9,11.

CERD/C/DNK/CO/18-19: § 9 criticises the prosecution’s extensive powers to close cases and requires independent, multicultural supervision. §§ 13-14 reiterate protection against violence and family-reunification problems. § 18 notes the Equal Treatment Board’s lack of provision for oral witnesses/party testimony. § 26 requires follow-up within one year on §§ 13,15,18,19; § 27 prioritises §§ 8-11. Actors: government, prosecution, boards and municipalities. Delimitation: no total number of closed cases or affected citizens. Original, §§ 9,13-14,18,26-27, pp. 2-6.

2011-2015: lack of support, loss of home and insufficient redress

CRC / C / DNK / CO / 4: § 41-42 criticises the inadequate registration, support and follow-up of children in crisis centres. § 43-44 criticises the lack of local guidance / supervision and children placed without individual action plan; the State must ensure support for families. Paragraphs 45 to 46 concern the support and participation of disabled children. § 70 requires transmission to the Head of State, Højesteret, Folketing, Ministries and Local Authorities. Limitation: child protection and known system problems; no number of persons or automatic homelessness in any placement. OriginalParagraph 41-46,70, p. 7-9,14.

E / C. 12 / DNK / CO / 5: § 4 criticises rare court applications and lack of direct review. § 13 criticises insufficient support for less than 25 years of age and possible loss of pension access for persons with disabilities under 40; § 15 concerns children and appropriate care; § 17 housing barriers, homelessness and many deferrals; § 18 basic healthcare to marginalised. Article 26 requires the provision of information to public servants and courts. Actors: legislator, employment / social authorities, municipalities and health services. Limitation: social rights findings without quantified infringement or person numbers. Original§ 4,13,15,17-18,26, p. 2-6.

CEDAW / C / DNK / CO / 8: § 3 identifies the interministerial delegation; § 9 actually describes the dissemination of previous observations. § 13-14 criticises a lack of municipal strategies; § 17-18 a lack of split violence and protection. Clauses 19-20 relate to up to 72 hours of confinement of possible traffickingo victims. § 45-46 requires comparable data; § 52 requires follow-up to § 18 within two years. Limitation: national / regional / municipal implementation; no count of forced or violent incidents. Original§ 3,9,13-20,45-46,50,52, p. 1,3-5,10-12.

CERD / C / DNK / CO / 20-21: § 13 reproduces that 709 residents were rejected during combined rental, but only 28 received the municipality's mandatory alternative residence. It is a source-printed housing committee, not 709 different unlawful decisions verified here; the remaining 681 is the difference, not an independent find of criminal offences. § 17 criticises the lack of compensation following successful individual UN complaints and continues to make a written mention process. § 29 requires a one-year follow-up to § 10,15. Actors: municipalities, government, boards and law enforcement. OriginalParagraph 13,17,29, p. 5-6,9.

2019-2021: regulatory criticism and specific data gaps

E / C. 12 / DNK / CO / 6: § 6-7 criticises the compatibility of adopted laws with the Treaty and requires regulatory / impact control. Paragraph 41-42 calls for an impact assessment of early retirement / fleksjobreform 2012. § 43-44 criticises the investigation and statistical basis of sexual violence; § 51-52 concerns discriminatory housing / ghetto legislation and coercive elements; § 56-57 psychiatric coercion, including children under 15. § 76 addresses national / regional / municipal level; § 77 requires 24 months follow-up on § 13,17,19. Limitation: rights / legislation findings, no unique persons. Paragraph 4's reference to former section 5 by incorporation is not precise: the incorporation finding of the 2013original is in section 4. Original, § 4,6-7,41-44,51-57,76-77, p. 1-2,6-8,11.

CERD/C/DNK/CO/22-24: §§ 4-5,8-9 and 18-21 reiterate missing ethnicity/criminal-case data, underreporting and racial profiling. § 28 reports 453 foreign nationals among 459 persons charged under the camping provision up to 1. July 2019; these are charges/persons according to the source's wording, not 453 established unlawful police acts. § 36 reports 116 board cases in 2019-2020, including 18 findings in parties' favour; they may overlap with the board series. § 42 also addresses municipalities; § 43 requires one-year follow-up on §§ 19(b),27,31. Original, §§ 4-9,18-21,28,36,42-44, pp. 2,4-8.

How the knowledge chain is used in the responsibility analysis

For each replicate point, the first identified warning → responsible authority / intermediary body → State response → later control findings → documented changed or continued practice → specific persons / interventions → responsibility and requirements. A follow-up letter proves that the answer was given; it does not prove that the problem ceased. Repeated committee reference to the same practice must not be added to new cases or new people. The legal consequences shall be examined in accordance with the rules in force at the time of the event.

The present list of documents is complete for the final observations of the committees indicated in the United Nations Register of Denmark. It does not automatically include all follow-up letters, state reports, shadow reports or individual complaints; these have their own records and document IDs.

UN individual complaint decisions against Denmark,2006-2025;2026 separately

Control 7 October 2026. The list is complete for the decision documents of the Danish public register during the period. The personnel statement and compliance are defined, as specified specifically below.

Count unit and vote

OHCHR land register: 308 series of registers, 304 different raw document names. Seven aliases / corrigendum pages are omitted as autonomous decisions.297 decision documents remain = 265 in 2006-2025 + 5 in 2026 + 27 before 2006. All 265 period decisions and 5 in 2026 are original outflows checked. Two of the 27 previous documents (CERD 23 / 2002 and CCPR 72 / 1980) could not be opened originally; their exclusion from the period follows the date of the register and the session number, not an alleged original date verified. Three precise dates require version clarification; conflict and justified years are preserved.

265 decision-making documents relate to 263 committee / communication numbers. The CCPR 2475 / 2014 has three cessation documents. The CCPR 2497 / 2014 ceased due to double registration. Each unit is preserved; 263 is therefore not a number of unique citizen cases. The unit is not employees, sanctions, families or persons.

Committee	Positive reality	Without breakage	Pure rejection	Clean Termination	Mixed	Documents
CAT	7	10	5	4	0	26
CCPR	31	31	35	72	1	170
CEDAW	3	3	26	8	0	40
CERD	6	1	3	0	0	10
CRC	8	0	5	4	0	17
CRPD	2	0	0	0	0	2
Total	57	45	74	88	1	265

The 57 favourable Views on the merits include established errors and prospective protection against removal that would violate the Convention. They are not 57 completed removals. CAT 743/2016 is inadmissible but contains a separately established Article 22 violation through actual removal despite interim measures (§ 8.2), outside the 57. CCPR 2342/2014 § 13(a) declares inadmissibility, while § 13(b) discontinues B. R.'s/children's part following a residence permit. The document is counted once as mixed. Alternative outcome count: 75 with inadmissibility and 89 with full/partial discontinuance, overlap 1.

Annual breakdown

Decision year	Positive	Without breakage	Rejected	Termination	Mixed	Documents
2006	1	0	0	0	0	1
2007	1	0	2	0	0	3
2008	0	0	1	0	0	1
2009	0	1	0	0	0	1
2010	3	0	2	0	0	5
2011	0	0	0	0	0	0
2012	2	1	0	0	0	3
2013	0	1	5	0	0	6
2014	1	1	2	0	0	4
2015	9	5	9	8	0	31
2016	9	8	15	13	0	45
2017	8	14	6	9	0	37
2018	6	7	6	9	0	28
2019	4	4	10	10	0	28
2020	1	0	6	5	0	12
2021	3	3	4	6	0	16
2022	4	0	2	13	0	19
2023	4	0	2	8	1	15
2024	1	0	2	5	0	8
2025	0	0	0	2	0	2

The year 2017 includes CPR 2625 / 2015 with date conflict; 2021 contains CPR 3781 / 2020 without original verified exact day; 2023 contains CPR 3187 / 2018, whose original writes 2013 despite 137. session 2023. Annual censuses do not verify the open day dates.

Appeals

Denmark's treaty profile:CAT, CCPR-OP 1,CERD, CEDAW-OP, CRPD-OP and CRC-OPIC have relevant individual procedures. CESCR-OP and CED Article 31 are marked **NO**. Their country reports/recommendations are therefore not individual decisions. The CRC procedure entered into force on 7.1.2016; CRPD-OP on 23.10.2014. Concluding observations are never counted as individual violations.

People, children and identities

The person column shows a documented minimum of people indicated in the case; not unique persons across the register. Children are counted when the complaint is lodged and can be adults when the decision is taken.? means untold, not zero. A named complainant is not the whole family; a lawyer is not an additional citizen. The total number of parents, people with disabilities and unique persons has not been established.

The CAT subregister has 38 occurrences of complainants/represented people, including 8 children in 3 explicit families. F. K.580/2014 and 743/2016 are the same person (743/2016 §§ 1.3, 4.11, 9.3-9.6); after this deduction, 37 different CAT complainants/represented people. CERD has 13 petitioner occurrences in 10 cases. CRPD has 3 complainants in 2 cases, 2 complainants with disabilities and one further identified child. These figures are not national population estimates.

CRC 32 / 2017 is the same family as CCPRR 2602 / 2015, express CRC § 6.4. CRC 33 / 2017 and CCPR 2344 / 2014 have the same initials / birth details, but final identity reconciliation is open. CCPR 2475 / 2014 must be deduced as the same communication / family despite three dispositions. Other identical initials are not identity certificates.

Grounds for discontinuation

All 89 documents with complete or partial cessation have been reread for the reason for discontinuation. Stay in a termination proceedings has not been established at the same time as a breach of the Convention.

Documented ground	Documents
Abandoned Denmark / other protection	3
Residence / asylum granted	19
Lost contact / missing response	40
Agreement / expulsion risk terminated; type of stay not defined	22
New Trial; Stay Undocumented	1
Withdrawal / request for termination	2
Disclosure decision repealed	1
Double registration	1

CCPR 2788/2016 ended after reconsideration without documented residence. CCPR 2812/2016 ended after the transfer decision was annulled on 6.6.2018. The 40 documents concerning lost contact/missing responses do not document redress.

Original-controlled actual follow-up

The year below is the controlled follow-up report, not an assumed end status 7.10.2026. The follow-up of the other positive decisions has not been fully updated.

CRPD 2025 - CRPD / C / 32 / 3. § 43-46 / 84-87; published 5.5.2025.

• 61 / 2019: The State of 1.3.2024 rejects individual remedy. The Committee notes in section 87 non-implementation of individual and general recommendations. 2025: closed, C (non-compliance).

• 39 / 2017: Re-recorded 3.10.2018; amended 19.11.2018; temporary stay 5.3.2019; permanent stay 21.7.2022; legal aid 28.518, 75 DKK excluding VAT 7.5.2019. 2025: closed, A (compliance).

CRC 2025 - CRC / C / 98 / 2. A.2-A.5, X. C. et al.; published 5.3.2025.

• 31 / 2017: Re-recorded 4.11.2020; new asylum result 17.8.2021; residence refusal 6.1.2022; family in Avnstrup. Committee A.5: non-broadcast, continued broadcast risk; dialogue open. 2025: dialogue open; resumption without documented restoration.

CCPR 2016 - CCPR / C / 118 / 3. Title by communication number; 118th session 2016.

• 2389 / 2014: Re-recorded 25.11.2015; asylum 13.4.2016. Test A, non-repeat B 1. Closed satisfactory, 118session 2016.

• 2343 / 2014: Re-recorded 22.9.2015; new refusal 26.5.2016; continued exit obligation. Dialogue open, 118th session 2016.

• 2288 / 2013: Recorded 17.9.2015; new refusal; residence under retreatment. Test and broadcast window A, policy change B 1. Closed satisfactory, 118session 2016.

•2370/2014: Reopened 19.8.2015; actual return 14.9.2015; asylum 7.1.2016. Return A, compensation B1; payment not documented. Closed satisfactorily, 118th session 2016.

CERD 2023 - A / 78 / 18. IX table after § 70; historical status.

• 58 / 2016: 2023-table: partially satisfactory; dialogue open.

- 46 / 2009: 2023 table: partially satisfactory; dialogue open.
- 43 / 2008: 2023-table: partially satisfactory.

The CRC follow-up writes Views 28.9.2022; the original has 28.9.2020. The date is not tacitly harmonised. The CERD table status of Gelle 34 / 2004 and Is 40 / 2007 requires a single check in A / 62 / 18 and A / 63 / 18; four old cases are grouped into a common series.

F. K. follow-up:the subsequent original CAT 743/2016,§§ 4.33, 8.2, 9.3-9.6,documents reopening after 580/2014,oral consideration on 14.3.2016,a new refusal on 17.3.2016 and later actual removal despite interim measures. The same person; later dismissal does not extinguish the separate Article 22 violation.

Own analysis of the documented actions: resumption is not actually restoration. Dialogue closure is also not proof of compliance: CRPD-closure A and C have opposite assessments. Individual return, stay, continued obligation to leave and compensation paid shall each follow its source documented event.

Full decision register 2006-2025

People / Children are minima or?. CAT-zero in children means no children, no children affected. Material articles are found in a positive reality or in a separate breach of procedure; the legal basis of the refusal is not counted as a breach. JSON contains direct original URL, format, registry / publication date, notification date when extracted, identity link and follow-up. Absence of precise sub-sections is visible; localisation to the closing section is not an alleged verified paragraph number.

CCPR 2475 / 2014: 125. session 29.3.2019 / Italy; 131. session 25.3.2021 / Somalia; 134. session 24.3.2022 / Italy. All three originals read. The same number / complainant initials, different countries specified; the Secretariat must clarify the version ratio. None of the documents have been deleted by a presumption.

Specific outstanding items and enquiries to authorities

Residual	Information required	Authority
Three precise dates	Authentic adoption date / correction for CCPR 2625 / 2015, 3187 / 2018, 3781 / 2020; relation to 3781-alias	OHCHR CCPR Secretariat / Petitions Section
Repeated 2475 / 2014	Separate dispositions or error versions; authentic country / complainant group in 125., 131., 134. session	The same Secretariat
Full compliance	Latest follow-up uspots, state complaints, complainant commentary and committee evaluation for each positive case, and CAT 743 / 2016 procedural breach; verification to 7.10.2026	Six committee secretariats and Danish representative authorities
Full personal vote	Non-identifying number of complainants / represented, children / adults when submitting, families, disabilities and cross-identity links; exception of lawyer	OHCHR and Danish journal authorities
Actual restoration / duration	Date of return, stay, reunification, continued intervention, compensation paid, first knowledge / end date	Udlændingestyrelsen, The Refugee Board, Ministries of Government, Courts, Municipality / Region

Traceability and limits of evidence

Documented: the outcome of the originals, special sign CAT 22 breakage, explicit personnel minima, localised follow-up and grounds for discontinuation. **Clarification / hypotheses:** additional identity duplicates, version / date errors and unknown compliance. These are not counted as further established breaches.

The strongest sustainable application is to link the state's concrete knowledge, documented procedural / protection errors, in fact, continued strain and individual legal consequences in each case. A Convention opinion shall not automatically document the criminal guilt of a particular staff member. The chain of action and the time course must follow the specific primary documents.

16. CPT and UPR: repeated findings and reactions

Controlled October 7, 2026 against CPT's Official Danish Inventory. This period includes: **six visits: four periodic and two special visits to Greenland;**. There are six visitor reports and seven responses relating to these visits because the 2019 visit has both an urgent and a full response. A further response from 2007 relates to the visit in 2002 and is only recorded as knowledge and follow-up during the period. The 13 January 2025 talks are not a seventh visit. Reports, recommendations and government responses are separate control actions; they are not individual convictions, citizens or new abuses.

Full list

Visits	Report and publication	Government response and publication	Limitation
11-20 February 2008	CPT / Inf (2008) 26, 25.9.2008, front page	CPT / Inf (2009) 12, 13.3.2009, front page	Police, prisons and psychiatry in Denmark.
25-27 September 2012	CPT / Inf (2013) 3, 22.1.2013, front page	CPT / Inf (2013) 11, 3.7.2013, front page	Greenland: police, institutions and psychiatry. The answer is a scanned original. All 31 pages are now visually read in RAM; 31 answered paragraphs, 30 speech / time series and accurate follow-up remains are documented in cpt-2013-Danish -reply-full-original control.md.
4-13 February 2014	CPT / Inf (2014) 25, 17.9.2014, front page	CPT / Inf (2015) 16, 3.3.2015, front page	Police, prisons, secure youth institution and psychiatry.

23 May - 3 June 2024	CPT / Inf (2024) 38, 12.12.2024, front page	CPT / Inf (2025) 19, 23.6.2025, front page	Police, prisons, foreigners and psychiatry.
14 to 16 January 2025	CPT / Inf (2025) 14, 14.5.2025, front page	CPT / Inf (2025) 28, 8.8.2025, front page	Greenland: the closed department in Nuuk.

The 2007 response to the 2002 visit: CPT / Inf (2007) 46. The historical visit report is counted outside the period. Original urgency 2020: registered on CPT Country Page, during the 2019 visit. One document copy; is identified; this module does not build a material conclusion on the copy.

2008: warning of recurrent coercion and insufficient police guarantees

CPT's § 4 documents meetings with Minister of Justice Lene Espersen, ministry officials, police, the Prison and Probation Service, regional psychiatry and the Ombudsman. §§ 5-6 document earlier communication and inadequate action against prolonged restraint. § 10, note 11, states **95 dog-injury incidents in 2006, including 34 open wounds**; these are incidents, not identified unique citizens. § 15 finds continuing problems with systematic compliance with safeguards for detainees after the circular had existed for six and a half years. Original: CPT/Inf (2008) 26, §§ 4-6, 10 and 15.

The Government expressly declares that illegal police force may trigger compensation, disciplinary and criminal penalties. At the same time, it recognises that abuse was not a separate category of complaint statistics and that the further results of criminal proceedings were not recorded in the statistics provided. Thus, the absence of a separate maltreatment counter is not evidence of the absence of maltreatment. CPT / Inf (2009) 12, printed s.4 and 6-9, reply to § 11-12.

Police 2006- 2007accounts in original government replies

Figures below are derived from CPT / Inf (2009) 12, printed p.6-9. Received and determined are different yearscohorts; disciplinary proceedings may overlap with appeals and criminal proceedings and arise from previous years. They shall not be summed up to unique persons or incidents.

Counter	2006	2007
Cases received	989	1.023
of which: conduct / criminal proceedings	405 / 584	457 / 566
Of which traffic in criminal matters	277	214
Cases decided	906	1.140
of which: conduct / criminal proceedings	379 / 527	489 / 651
Behaviour: notice / withdrawal / deadline / rejected / regretted / criticism / others	129 / 12 / 5 / 210 / 7 / 8 / 8	147 / 18 / 9 / 272 / 8 / 14 / 21
Criminal proceedings: complaint rejected / investigation stopped / indicted abandoned / indictment / critical -regret / others	74 / 258 / 4 / 173 / 7 / 11	69 / 383 / 5 / 168 / 14 / 12
Appeals under the Criminal Code	8	14
Disciplinary proceedings: new / decided	77 / 86	46 / 39
Ill-treatment disciplinary cases among those decided	5	4

Allegation is not the number of convictions. Disciplinary outcome 2006: farewell 9, workplace 2, department 2, fine 27, reprimand 15, warning 13, terminated without penalty 16. These outcomes are: **non-documented mutual; exclusive**Two of the abuse cases gave rise to both relocation and fine. Departure 2007: farewell 1, Section 1, fine 9, reprimand 6, warning 16, without penalty 6. The original's total amount must be retained even when the outcome does not summon unambiguously.

2012: concrete intervention and Danish / Greenlandic responsibility sharing

The CPT's §§ 6-7 document urgent communications concerning a 17-year-old held in isolation in police custody, a woman placed among men and a woman with an acute need for psychiatric treatment; the State replied on 31. October 2012. § 8 assigns responsibility for policing to Denmark; § 45 assigns psychiatric services to Greenland's self-government. Psychiatric restraint involved **15 % of patients in 2010 and 14 % in 2011, averaging five days** (§ 47, note 42); there were **14 compulsory admissions in 2007, 29 in 2008 and 36 in 2009** (§ 49, note 44). Percentages without patient counts cannot be converted into citizens; admissions may involve the same patient repeatedly. CPT/Inf (2013) 3, §§ 6-8 and 45-49, printed pp.20-21 for the psychiatric figures.

2013response: corrected figures and recognised protection deficiencies

All the Danish answer **CPT / Inf (2013) 11, all 31 pages**, is now visually original -read through the public archive copy of CPT's official file from November 6, 2013. Full section matrix, 30 numerical rows, archive identity and sidelocators are shown in **cpt-2013-Danish-reply-full-original control.md**. The original response date is July 3, 2013; it includes police, asylum and psychiatry in Greenland.

The reply to section 17, physical p.8, **corrects disciplinary sanctions for 2010 from 2 to 3 and for 2011 from 1 to 2**. In 2012 there were 16 new police complaints board cases:6 conduct,7 criminal,1 death/serious-injury case under section 17(2) and 2 note cases. 6 disciplinary sanctions are reported, including 2 arising from a police complaints board case. Revisions and overlap are retained; neither 2→3,1→2 nor 16+6 represents new unique citizens. Outcomes and actual redress for all 16 complaints board cases are not stated.

The reply to § 31, physical p.16, describes medical examination normally in the **first week**, whereas the CPT required 24 hours. For § 38, pp.19-20, it acknowledges **no reliable extract of isolation figures** and **no statistics on requested visits that did not take place**. The 132 reported person registrations for remand detention on grounds of risk of collusion in 2012 must not be called 132 isolated persons or 132 visit refusals. For §§ 48/54, pp.25/27-28, the State maintains at least daily medical assessment of restraint and states that no independent psychiatrist can be obtained, whereas the CPT required review by two doctors after 6 hours. For § 51, p.28, an ECT register and purchase of EEG equipment are only planned. These departures are documented in the State's own reply and require actual follow-up and individual intervention/injury courses.

2014: repeated warning and documented interministerial knowledge

§ 5 finds continuing inadequate follow-up concerning contact restrictions on pre-trial detainees, restraint in prisons and prolonged psychiatric restraint. The report's summary also describes prolonged room confinement of children upon arrival at Grenen. § 115 addresses Denmark's plan of May 2014 to halve belt restraint by 2020. Verification of actual results must be demanded when the same intervention is criticised again. CPT/Inf (2014) 25, § 5, summary printed pp.6-8 and § 115.

The government's reply states that a permanent interministerial human rights committee was established in October 2014 under the Ministry of Foreign Affairs to map recommendations and follow-up. The reply to § 9 reiterates the possibility of civil, disciplinary and criminal police liability. These are specific statements of knowledge and responsibility, not documentation that all recommendations were implemented. CPT/Inf (2015) 16, replies to §§ 5 and 9, printed pp.1-3.

2019: people detained under inferior conditions and prolonged incarceration

The report's summary finds no progress on central police safeguards since 2014. §117 requires urgent measures at Ellebæk and Nykøbing: conditions were unacceptable, and CPT required renovation or closure. §111 states that Ellebæk had **117 detainees, including 24 women**; approximately **1.100 admissions in 2018**,averaging 32 days, one in six over four months and one person 12 months. §174 states that **14 of 30 patients at Sikringen** spent all or most of the day locked up, sometimes for years. Backlog counts, admissions and duration are different measures. CPT/Inf(2019)35,summary, §§111, 117 and 174,printed pp. 53, 55 and 75.

The government's full reply reports new outdoor areas in Ellebæk from late March 2020, information on rights in more languages and complaint mailboxes from August 2020. This documents the State's reply and measures introduced; actual improvement for patients or detainees must be documented separately. CPT/Inf (2020) 26, reply to sections 119, 126 and 128, printed pp.70 and 74-75.

2024: repeated coercion against children and adults and lack of duration data

Unit and target	2022	2023	Jan-May 2024	Original
Aarhus: restraint incidents	1.167	569	239	CPT / Inf (2024) 38, § 143
Aarhus: of which over 48 hours	-	33	17	See also Section 143
Glostrup: restraint incidents	138	66	31	See also Section 144
Glostrup: chemical compulsion	753	380	211	See also Section 144

§ 147: **18 young people aged 14-17 were restrained 237 times in January 2023-May 2024**. 18 are persons within this local scope; 237 are repeated interventions. § 73 describes up to 21-23 hours of daily cell confinement over months or years. CPT/Inf (2024) 38, §§ 73 and 143-147.

The 2025 reply acknowledges that reliable national figures on the duration of restraint in prisons cannot be extracted without manual review; nor can the connection to mental illness, self-harm or suicide attempts. The annex's tables 8-9 state **167 restraints in 2023 and 155 in 2024**; men 154/144, women 13/11. 2024 is provisional. The reply to § 148 states a legislative amendment from June 2024 under which interventions involving under-15s are registered as coercion even when their parents have consented; previously these were registered as use of force. The recording discontinuity must accompany every time series. CPT/Inf (2025) 19, reply to §§ 111 and 148, printed pp.67-68, 84 and 99-100.

2025: Greenland - continuing specific separation, occupancy and restraint

§ 7: Nuuk had **83 inmates against a capacity of 76**; closed unit A had 45 against a capacity of 40, including 23 in preventive detention, three determinate sentences and 19 in pre-trial detention, four women. The open unit had 38, including eight women. §§ 13-14 describe two women's repeated transfers every other day to police cells to avoid encounters with men, inadequate heating and lack of hot food. §§ 19-20 concern the absence of designated medical responsibility and admission examinations. §§ 31-32 describe restraint lasting over 23 hours and stays in observation cells of 18 and 25 hours. The population may overlap the annual statistics and does not document that all 83 experienced all the conditions. CPT/Inf (2025) 14, §§ 7, 13-14, 19-20 and 31-32.

The reply states a plan for 70 new places and approximately 45 % increased capacity; this is future capacity. The reply to § 31 maintains observation through a window during restraint, whereas the CPT had required direct continuous supervision. The reply to § 32 describes attempts to obtain tear-resistant clothing. These statements document that a reply or plan does not in itself prove full implementation of the recommendation. CPT/Inf (2025) 28, replies to §§ 9 and 31-32, printed pp.1 and 12.

Consequences and responsibilities

Each repeated restraint, cell confinement, family/contact restriction and move must be linked to a specific person, date, actual duration and legal basis before an individual legal conclusion is demanded. The documented warnings from CPT and the government's own replies support examination of the institutions' knowledge and continuing omissions. A full assessment of harm additionally requires case records, incident logs, medical documentation, complaint cases and actual redress. Different review years must not reduce one citizen's repeated interventions to one abstract error; nor may they be multiplied into different citizens.

Greenland 2013: State's full response, lack of control and concrete guarantees

The response of the Danish State demonstrates both known protection deficiencies, correction of its own previous figures and more measures that were only planned. It can now be read point by point together with the CPT's visit report. A rule referred to, a declaration by an authority on the work done and the protection actually achieved by a citizen shall be recorded separately.

Whole **CPT / Inf (2013) 11, all 31 physical PDFs pages**, are visually read on October 7, 2026 in memory. S.1 is front page, p.2 blank, p.3-31 contains the answer. Public archive copy of the then official file was archived on 6 November 2013; the front page indicates Strasbourg, **3 July 2013**, visit **25-27 September 2012** and the document number. The current official document reference; and the CPT's country registry identifies the same response. The SHA256 of the archive file is 21cdcd4c12f9195cfe7fbc3bf5fd8b661816a59dc35c95cd0076cf2318008f9f; the page number is aligned with the document view of the Council of Europe. No official original files or original pages are stored locally.

All locators below are: **physical PDF pages**"§" in the first column refers to: **the paragraph of the CPT's visitor report, which is reproduced in the reply;**Not a new piece of legislation. The government's response is in italics in the original; the CPT's recommendations are in front of the answer. This difference has been retained in the analysis.

Figures, populations and time limits

Information in the original	Number or time	Population, delimitation and significance	Locator
Police complaints board cases received in 2010 and 2011	18 / 18	Arriving cases reported at the CPT visit; not documented personal union.	§ 17, p. 8
Disciplinary sanctions 2010: previously disclosed → corrected	2 → 3	The explicit correction of the CPT report by the State.	§ 17, p. 8
Disciplinary sanctions 2011: previously disclosed → corrected	1 → 2	Both versions are preserved as source chain; they are not summed.	§ 17, p. 8
Police complaints board cases received in 2012	16	6 conduct cases + 7 criminal cases + 1 case under section 17(2) concerning death/serious injury + 2 note cases =16.	§ 17, p. 8
Disciplinary sanctions 2012	6, of which 2	Two of them came out of a police conference. The six are not added to the 16 as new events or persons.	§ 17, p. 8
Nuuk Police Detention 2012	18	The original calls the device people. No identity list or control of repeated stay; not national personal union.	§ 20, p. 10-11
Stay over 24 hours, less than 2 days	9	The open interval designation of the original shall be retained.	§ 20, p. 10
More than 2 days, less than 3 days	4	Same demarcation.	§ 20, p. 10
More than 3 days, less than 4 days	4	Same demarcation.	§ 20, p. 11
More than 4 days, less than 5 days	0	Same demarcation.	§ 20, p. 11
Over 5 days, under 6 days	1	9 + 4 + 4 + 0 + 1 = 18. The original text also mentions arrest less than 24 hours, but the table has no separate such cell. Frontier cases cannot be reconstructed.	§ 20, p. 10-11
Remand justified by risk of collusion in 2012	132	The chief of police denotes the unit persons. It is **not 132 isolation course;**Not 132 refusal of visitors and not all in custody.	§ 38, p. 19
Complaints about refusal to visit the chief of police 2012	0 supplied	There are also no known court cases. Absence of complaints does not replace the absence of action / waiting times.	§ 38, p. 20
The Ombudsman's visit to Nuuk police detention / asylum	1993,1999,2001,2006	Historical series of visits in the State's response; only 2006 is in the reporting period. New visit was scheduled September 2013.	§ 18, p. 8-10
OPCATs-appropriate institutions and planned annual visit activity	Over 1.000 / approximately 75 from 2013	Institution population versus **a plan** for visits to approximately 75 institutions annually. This is not an actual visit count or documentation of completed supervision of 75 different institutions.	§ 18, p. 10
Greenland visit: State frequency description	Average 5 years	The Ombudsman's justification for the supervisory frequency; not an inventory of undiscovered relationships between visits.	§ 18, p. 10
New Nuch-anstalt: planned capacity	76 of which 40 closed	Construction start 2015, finished 2017 was the plan in 2013, not completed capacity at the time of response.	§ 22, p. 12-13
Women's section shielded	6 seats, in service November 2012	Information from the Department of Investigation on the successful offer. It does not document the safe stay of all women.	§ 27, p. 14
Training in the Nouc institution	2 teams daily; typically 5-8 per team; 25 lessons per week	Tender / teaching objectives, not 25 unique pupils or actual participation.	Paragraph 29, p. 15
Recreation to secure / arrest section	Sport 3, school 2, handwork 3 times / week	Tender frequency, non-persons or completed activity.	§ 29, p. 15-16

Information in the original	Number or time	Population, delimitation and significance	Locator
Drug treatment in Nuuk	8 inmates in the ongoing course	Cooperation agreement August 2012; not evidence of treatment outcome or 8 different courses of damage.	§ 33, p. 18
On-arrival medical examination: CPT → State practice	24 hours → usually first week	A concrete discrepancy between the protection requirement and the practice described.	§ 31, p. 16
Restraint in prisons: duration and oversight	More than 24 hours only exceptionally; daily medical orientation; check after 48 / 72 hours	Described rules / follow-up, not actual durations; no one counts for exceptions.	§ 42, p. 23
Prison restraint: observation notes	At least every 15 minutes	Notation interval does not replace direct continuous monitoring.	§ 42, p. 24
Psychiatric restraint: CPT's review requirements	After 6 hours, 2 doctors	CPT recommendation; not a numerator for performed medical assessments.	§ 48, p. 25
Psychiatric restraint: the State's reply	At least 1 medical assessment daily	The State considers that daily assessment is sufficient; independent psychiatrist is reported not to be available.	§ 48 / 54, p. 27-28
Maximum capacity of the psychiatric ward	12 patients	The State's justification for less frequent review; not annual counts or restrained patients.	§ 48, p. 27
Continued psychiatric detention: reassessment	Day 3,10,20,30, then at least every 4 weeks	Legal guarantees are reproduced in the reply; actual compliance is not measured.	§ 54, p. 28
Psychiatric Board of Appeal: decision	14 days; in case of suspensive effect 7 working days	Described timelimits; the reply does not contain any actual procedural time or time limit.	§ 54, p. 29
Patient advisor: first and later visit	Within 24 hours of appointment; at least 1 time/week and as needed	Reported guarantee; actual contact for the individual patient has not been calculated.	§ 57, p. 30

All answered sections: action, residue and protection of the citizen

CPT Clause and locator	What the State specifically answers	The importance of the proof and the remaining material review;
11, p. 3-4	The police order requires information from relatives when the conditions are appropriate and the purpose of the arrest permits it. At less than 18 years of age, social security authorities must always be informed and the home as far as possible. Orientation is recorded. The chief doesn't know cases without feedback.	The answer contains a conditional practice description. It does not document an unconditional, formally recognised right from the start of detention or the CPT's request for justified, written and approved deferral. "Not known 'is not an incident register.
12, p. 4-6	Rules of law and guidance from the entry into force of the Act 1.1.2010 are reproduced. The defendant is informed of the defence; the defence is self-elected, and the police district decides on the appointment. Interview may continue without defence if the defendant wishes to make a statement. The notified additional guidelines will later be deemed unnecessary.	The CPT requested effective access from first detention, quality and independence. The answer does not actually document timely, independent assistance. The legal translations reproduced are state statements and are not independent controls of each legal link.
13, p. 6 -7	The daily recommendation requires health assessment in case of suspected illness, injury, suicide risk or serious exposure. If a doctor is missing locally, a nurse / other health representative may be used. The state states that there are no private doctors and that no citizen can choose a particular doctor.	Access in certain situations of danger is not evidence of a general effective right to medical examination in detention. The absence of an option is explicitly stated.
14 p. 7	The provision of guidance is prescribed. An English version has been requested for consideration; more evidence of extradition will be considered for future review.	Translation and better documentation are **considerations;**, not completed securing understanding and signed reception. The answer refers to guidance in January 2000, while § 11 refers to January 2002; the version difference is retained.
16, p. 7-8	The self-government had no plans to ask Denmark to change policy rules; the subject had not yet been politically discussed in Greenland.	Specifically, the absence of a change initiative, not evidence that the existing review scheme provided effective protection.
17, p. 8	Earlier disciplinary figures are corrected and the 2012 cases, case types and disciplinary sanctions stated. The National Commissioner of Police received disciplinary competence in November 2011.	The contemporaneous correction must be included in the statistical account. No full outcome distribution is stated for all 16 complaints-board cases, nor actual compensation/redress.
18, p. 8-10	The Danish Ombudsman oversees the state's police detention / institutions; the Greenlandic Ombudsman with the psychiatrist of self-government. Please describe visits, OPCATs population, future visits and risk assessment.	The state's knowledge of competence and control capabilities has been documented. It is not a full OPCATT visitor register or original control of all ombudsman reports.
20, p. 10-11	The Chief of Police gives the 18th person table and refers to the day order for only short-term police detention in exceptional cases.	One stay is more than 5 and less than 6 days. The answer does not give persons identity, individual legal basis or judicial review, so that neither national personal dedup nor individual legality can be inferred.
21, p. 11 - 12	Renovation of Nuuk police station was decided March 2012. Project sent to the municipality 10.1.2013; no earlier than 4 months after approval, distributed 2 months plan / approvals + 1 month notice + 1 month establishment. Early start May 2013 and expected delivery June 2014 after about 1 year construction.	All times are a project plan in this answer. The actual completion and improvement of the detainees has not been documented here.
22, p. 12 -13	Location / program selected; competition started December 2012, proposal March 2013, winner 17.5.2013. New institution planned 2015- 17 with 76 seats / 40 closed as well as activities, treatment, community and visitor facilities. The return of Greenlandic inmates from Herstedvester is intended.	Getting closer to languages, family, culture and the environment is recognised as a concrete consideration. The plan is not actual repatriation or restoration for identified prisoners.
23, p. 13	The Department of Investigation says that concrete inappropriate tone and violence between inmates is always followed up; staff is taught in respect and dynamic security, and CCTV is installed.	Complete installation is provided, but no complaint, violence, sanction or damage figures document the claim of "always."
25, p. 13-14	Greenlandic Crime Service reported 7.5.2013 that ventilation and toilet / bath renovation had been completed. Double coating is avoided as far as possible, but continues to be used when needed. Minor changes to the building / screen have been made.	Concrete completion statements, but not independent post-control or double coating cessation.

CPT Clause and locator	What the State specifically answers	The importance of the proof and the remaining material review;
27 p. 14	Women's section with 6 places in service November 2012; the institution considers that it can eliminate the need for mixed sections.	The existence of the measure is enlightened. The actual cessation of mixed placement and the consent / safety of all women have not been documented.
29, p. 15 - 16	Work, school, leisure and leisure frequencies are described. Art workshop opened December 2012. The State recognises the general lack of sufficient work; further initiatives are assessed in the light of the planned new institution 2017. The basic amount is payable to inmates in the event of a lack of duties.	A lack of work is explicitly known. Tender frequency is not actually outdoor / community time or sufficient employment in secure / arrest sections.
31, p. 16	No health workers in Greenlandic institutions; use of the general health care system. Hospital is informed of arrival and examination is usually given before the first week; in case of acute suspicion, immediate action is taken.	The CPT required a doctor / qualified nurse within 24 hours. The normal time limit described does not meet this requirement. No number of delayed studies, disease progression or sequelae is reported.
32, p. 17	No own psychologist / psychiatrist; treatment by public health services to a limited extent. Counselling from the psychiatric department and psychologist with Herstedvester experience is described. As far as possible, future specialist capacity must be established at a new facility.	Limited treatment access is an explicit indication of the current situation. Future capacity is not evidence of the treatment of current inmates.
33, p. 17 - 18	Collaboration with Katsorsaavik August 2012; ongoing trajectory for 8 inmates and possibility of AA.	Concrete course of treatment informed; nationwide needs, access and outcome missing.
34, p. 18	The D.A. 's office rejects health information in their own files and says that CPT must have seen a hospital receipt for a commissioned investigation.	A concrete discrepancy between the CPT observation and the Authority's explanation. The receipt and the file are not provided; the state's explanation does not prove its own correctness.
35, p. 18	The CPT asked for a daily nurse and preferably a responsible doctor at least weekly. The answer refers only to Paragraph 31.	The reference does not document the introduction of the desired permanent health care personnel.
38, p. 18-20	Control of visits, collusion risk, individual proportionality and access to a court are described. The Chief of Police acknowledges that police systems cannot provide reliable solitary-confinement figures and no statistics are kept on requested visits that do not take place.132 collusion registrations and no known complaints in 2012 are stated.	One **documented data relief;** for contact and isolation. "Very few refusals" without numerator / denominator does not document small loss of actual contact or short deferrals.
39, p. 20 - 21	Rules on contact, visits, letters and court access are reproduced. In particular, the CPT required written reasons and a separate periodic review of restrictions.	A general legal representation is not concrete evidence of new instructions, reasoned decisions or actually separate retests.
41, p. 21-22	New call system is provided installed. Very limited daylight in two observation cells is recognised; windows made smaller / shielded. Artistic light improvement and floor / loom revision are decided for later execution.	Call system is an enlightened implemented action; light / renovation work is in the future. Missing daylight is an acknowledged current situation.
42, p. 22-24	Rules on necessity, proportionality, doctor, report, complaint and duration are described. No written guidelines; new report / observation forms prepared. Fixed duty is usually invisible outside the cell; notes at least every 15 minut.15.5.2013 were requested for subsequent calls.	Rules and schedules do not determine compliance. Hidden guard shall not be equated with the continuous direct contact / monitoring required by the CPT without specific control. The call offer is a request, not documented conversation.
44, p. 24	The answer to the independent supervision of the institutions refers to Paragraph 18.	No new visitor or person population; no double counting.
45, p. 24	Psychiatric law adopted by Inatsisartut autumn 2012; copy of the law is attached.	The 31 published pages end with section 58 and do not contain the legal text itself as a subsequent annex. The precise wording of the law is checked separately by legal submission; the representation of the defence is not fully legal.

CPT Clause and locator	What the State specifically answers	The importance of the proof and the remaining material review;
48, p. 25 - 27	The least intrusive means, consent, treatment plan, registration, patient adviser and continuous observation are described. CPT's two-doctor review after 6 hours is answered with at least daily medical assessment and the department's small size; no independent psychiatrist can be obtained. 12 patients is maximum capacity.	The specific difference in protection is documented. Staff shortages/small patient numbers are **the State's express justification**, not a hypothetical authority defence and not proof that longer restraint is necessary.
51, p. 28	The ECT register must be established as soon as possible; the EEG requires a new device and possible purchases / costs are investigated.	Known lack of registration and monitoring. Register and EEG apparatus have not been documented in the reply.
54, p. 28 - 29	Deprivation of liberty must be reassessed on days 3/10/20/30 and at least every 4th week; restraint at least daily. The complaints board's composition,14-day time limit,7 working days where there is suspensive effect, access to courts and appointment of counsel are described.	Legal proceedings are reported, but actual review, legal contact, time, outcome and termination of proceedings are not recorded. Action time cannot therefore be deduced from time limits for appeals.
55, p. 29-30	Information, recall of consent, reflection time, minimum means and indications of coercion are reproduced.	In fact, understandable information, valid consent and concrete necessity have not been proven solely by the reproduction of law.
57, p. 30-31	Patient advisor within 24 hours of appointment, at least weekly and if necessary; free personal / written / telephone communication, appeal to the board / court / ombudsman and supervision by the national physician.	Specifically described safeguards and competent forums; no patient-level compliance or redress figures.
58, p. 31	The function of the Greek Ombudsman's NPM is attributed to Section 17 of Inatsisartutlov 8 of 3.12.2009; the psychiatric department visited March 2012, report prepared and reasonable later intervals intended.	One specifically informed NPM visit is an entrance to original control. It does not close the national OPCATs registry or show that all subsequent recommendations have been implemented.

Consistency and responsibility

The State's knowledge of specific protection deficiencies is documented no later than this reply. The Realm's police/prisons and self-government's psychiatry are identified separately in the reply to section 18, pp. 8-9. The State knew of insufficient healthcare staffing, no reliable isolation counts, missing registration of lost visiting contact, very limited daylight and insufficient work. In psychiatry it knew the requirement for brief restraint, prompt review of continuing coercion and independent medical oversight. The reply's precise wording makes these knowledge points verifiable.

The citizen's loss cannot be replaced by the authority's plan. A possible institution in 2017 did not mean an inmate in 2013 had received treatment, contact or an opportunity to return home. A possible ECT device did not mean EEG monitoring during the treatment in question. Access to a complaint did not document visits received, ended isolation, release or compensation. The strongest sustainable demands are therefore broken down by intervention: actual start/end, legal basis and reasoning, attendance and repeated review, comprehensible information, avenue of complaint and outcome, actual treatment/contact and demonstrated injury and redress.

CPT's recommendations and the State's statements are not themselves Danish criminal convictions or ECtHR judgments. In assessing responsibility, documented departures must be linked to the specific applicable rule and intervention. Missing follow-up may strengthen the knowledge and investigation requirement; it does not, on its own, show that every specific restraint constituted torture under criminal law. This local delimitation does not change the documented oversight deficiency.

Closed reading test and precise residue

The previously identified gap **"CPT/Inf 2013/11 not substantively read" is closed**. All 31 pages and all 31 answered CPT paragraphs have now been read. The remaining CPT catalogue is still a visit/reply register specifying the sections actually reviewed; this full reading of the 2013 reply does not make the other replies fully read. Genuine remaining gaps are actual verification of subsequent compliance with individual promises, the originals of the mentioned Ombudsman visits and statutory annex, and person deduplication, harm trajectories and redress. The statistics on the 16 police complaints board cases still lack all decision outcomes.

UPR: three control cycles, all recommendations and changed responses

The numbered recommendations of the originals have been counted individually. Compact registry: upr-accounting-compact.json, with **133 + 199 + 288 = 620 recommendation numbers**. It is a documentary account; the same problem of rights can be repeated between countries and control cycles. Therefore, 620 are neither 620 different violations, incidents or individuals. Accepted recommendations have also not been automatically implemented. The Government's claim that the law in force complies with the conventions must be tested against practical practices and subsequent findings of control.

Original balance sheet

Cycle and study,	Original answer	All status categories	Sum
2011, 2 May	A/HRC/18/4/Add. 1, 13.9.2011, paragraphs 106.1-106.133, UN original; document copy read	82 accepted; 49 rejected; 2 partially accepted, Nos 106.80 and 106.119.	133
2016, 21 January	A/HRC/32/10/Add. 1, 21.6.2016, §§ 120.1-120.199, UN original; advance version read	120 accepted; 21 accepted in principle; 14 partially accepted; 44 noted. These four counters are confirmed in United Nations Session Report A / HRC / 32 / 2, § 771.	199
2021, 6 May	A/HRC/48/10/Add. 1, 16.7.2021, §§ 1-3 and numbers 60.1-60.288, UN original; document copy read	202 accepted; 86 noted.	288

The UN originals document ID, date and original sender are checked; technical reading is done on identified copies when the UN direct distribution link did not deliver the PDF. The hosts of the copies are registered separately. The status of each recommendation is its own metadata; original full text or PDF is not stored.

2014: 102 is a follow-up figure, not the 2011 initial acceptance figure

Government mid-term report 2014, final table printed p. 64-65, compares the same **133** recommendations: fully accepted; **82 in 2011 and 102 in 2014**; rejected **49 and 16**. The rest includes partial or unfinished answers and must be read in the table's own categories. The mid-term report does not document 20 new recommendations or 102 proven implementations. It also names responsible ministry for each recommendation, including the Ministry of Justice and the Ministry of Foreign Affairs for CIA flights and family rules. This gives a concrete evidence of knowledge and responsibility.

2018: proven version difference and change in numbering

The Government’s June 2018 midterm report, printed p.1, states **122 originally accepted and four additionally accepted**. This must be shown alongside the 2016 original’s **120 + 21 + 14 + 44**, rather than replacing those figures. The report uses **121. xx**, whereas Add. 1 uses **120. xx** for the same recommendation. Cross-references therefore retain both document ID and number. The report’s reply to 121.140, printed p.31, declares placed children’s right to contact with both parents and their network; this is the State’s specific legal statement, to be compared with documented contact restrictions. The midterm report was coordinated within the Government’s human-rights committee with Greenland and the Faroe Islands and circulated for consultation.

2023: status change within the same 288 recommendations

The government’s cover letter to the December 2023 midterm report, p. 1, confirms **202 of 288 accepted in September 2021**. The follow-up covered May 2021-May 2023. Nine previously noted recommendations were accepted; one noted recommendation was partially accepted, and one previously accepted recommendation was changed to partially accepted. New status account: **210 fully + 2 partially accepted**, and by our subtraction **76 remaining noted**. The total remains 288. The follow-up is not a fourth review cycle. The document identifies interministerial coordination and consultation with the human rights institute and civil society.

Material verification of the Government's response

The 2011 reply rejects incorporation of the UN conventions and an overall human rights plan, and describes existing child institutions as sufficient. At the same time, dissemination of the CRC observations is accepted and translation/follow-up dialogue initiated. These are specific government statements that subsequent municipal findings and committee criticism can test. Original: A/HRC/18/4/Add. 1, replies 106.26-106.29, 106.38-106.42 and 106.51, notes 29,37,41 and 43,original copy read.

The 2016 reply to 120.46-120.47 places review of national and international recommendations in an interministerial committee. Replies 120.134-120.135 reject an absolute ban on solitary confinement of under 18-year-olds;120.130 maintains exceptions allowing psychiatric coercion.120.190 accepts the family-rights recommendation, but describes a three-year postponement of family reunification. An acceptance category must therefore not be read as cessation of separation. Original: A/HRC/32/10/Add. 1, printed pp. 4,6 and 8.

The 2021 response to 60.255-60.257 notes the family-reunification recommendations and refers to M.A. as pending. The document is dated 16. July 2021, while the ECtHR Grand Chamber judgment of 9. July 2021 had already found an Article 8 violation. This documents outdated wording in the response issued; it cannot be used as evidence that no judgment existed. 60.262-60.263 maintains that conditions in Ellebæk comply with international obligations; this claim must be examined specifically against CPT's findings. 60.226 states **19 known Danish children in Al-Hol/Roj**, including five children whose return was conditional on consent from three mothers. This is a geographical and temporal stock delimitation, not 19 additional ECtHR applicants. Original: A/HRC/48/10/Add. 1, printed pp. 6-7; M.A., 6697/18, judgment 9.7.2021.

Updating 2026

The fourth cycle is kept outside 2006-2025. The new national report A/HRC/WG. 6/52/DNK/1 must be recorded as the State’s own account, not a new UN judgment. Note 2 expressly explains the earlier numbering difference 120. xx/121. xx. New recommendations and final replies must have their own document IDs and dates; an expected or announced investigation must not be counted as completed scrutiny.

UPR 2026: the entire original basis, Denmark's knowledge and compliance

Conclusion and reading scope

The UN’s fourth Universal Periodic Review adds a current knowledge link to the historical national findings. The entire working-group report and all three completed underlying reports have actually been read as text in memory:26+21+10+10=67 PDF pages. This is the final national document dated 20. February 2026, not the consultation draft from November 2025. The originals are not saved locally. New figures from this process belong in the 2026 supplement.

The review took place on 7. May 2026; the working group adopted its report on 15. May. The final report A/HRC/63/10 is dated 10. July.98 delegations made statements, and the report contains 265 numbered recommendation positions 125.1-125.265. Several countries support the same position; for example, six countries are listed at 125.1 and two at 125.4.265 therefore counts numbered positions, rather than unique problem types, rights violations, victims or contributing States. Paragraph 126 states that recommendations express the positions of the submitting States and/or the State reviewed. They do not constitute 265 convictions. [UPR26-WG,PDF2/9-24]

Complete numbering vote

The table covers all 265 positions without overlap. The themes are the report's own brief reading references; the intervals may not be used as precise thematic totals because one position may have several topics. Each original formulation and recommended state can be found at the number shown.

Original positions	Number of positions	Own reading reference
125.1-125.6	6	Conventions, complaint protocols and cooperation
125.7-125.8	2	Racism plan and human rights institutions
125.9-125.9	1	Equal pay

Original positions	Number of positions	Own reading reference
125.10-125.41	32	Racism, discrimination, police, housing and legal remedies
125.42-125.42	1	Gender equality
125.43-125.58	16	Racism, discrimination, data and remedies
125.59-125.61	3	Separate criminalisation of torture
125.62-125.62	1	Prevention of juvenile crime
125.63-125.71	9	Preservation, isolation, prison conditions and torture
125.72-125.72	1	Combating terrorism
125.73-125.79	7	Detention, alternatives, access to justice and torture
125.80-125.84	5	Religion, integration and expression
125.85-125.91	7	Demonstration, privacy and digital police means
125.92-125.95	4	Family reunification and family / parental law
125.96-125.105	10	Trafficking in human beings, protection, punishment and repair
125.106-125.111	6	Integration, work and equal pay
125.112-125.117	6	Poverty, social conditions and housing
125.118-125.118	1	Psychocracy and compulsion
125.119-125.124	6	Reproductive health and inclusive education
125.125-125.130	6	Climate, environment and digital accessibility
125.131-125.134	4	Development and international cooperation
125.135-125.166	32	Equality, violence, protection, family law and repair
125.167-125.174	8	Child violence, placement, consent, minorities and isolation
125.175-125.205	31	Disability, education, law, coercion, guardianship and consent
125.206-125.206	1	Original people and colonial consequences
125.207-125.224	18	Racism, housing, registration, police and legal remedies
125.225-125.227	3	Intersex children and sexuality-related treatment
125.228-125.247	20	Foreigners, family, freedom, asylum, custody and stateless persons
125.248-125.265	18	Greenland, Faeroe Islands, treatment, children and control access
Total	265	All original numbers, once each

The most direct recommendations on interventions, families and actual protection

Position and Recommendation State	Own paraffase	Concrete impact on the chain of responsibility
125.15, Finland	Avoid discrimination in the case of algorithms in welfare services	Check the decision-making basis, functional limitations, human review and actual benefit
125.18, Malaysia; 125.34, Bahamas; 125.222, Rwanda	Legally defined police practice, data and control of ethnic profiling	Registration and investigation shall follow the specific action of the citizen;
125.51, Belarus	Effective remedies against discrimination in work and housing	A right of appeal shall be able to remedy the relevant loss;
125.63, Switzerland; 125.67, Luxembourg; 125.75, Spain	Limited care and long isolation, with alternatives and time control	Actual action days and contact restrictions shall be tested separately;
125.85, Georgia; 125.86, Tunisia	Examine reported interventions against peaceful demonstrations	The claim requires proof of events, legal basis, use of force and subsequent review
125.91, Chile	Precise regulation of police biometric technologies	Technical access or political agreement does not replace legal basis
125.92, Uruguay	Remove waiting times during family reunification and protect 15-18-year-olds	The separation period shall be measured as an actual consequence;
125.93, Philippines	The concept of parental alienation shall not undermine the protection of the child and the victim of violence;	The justification of family law must be tested against original violence material.
125.94, Brazil	Strengthen legal certainty and coordination in family matters in cultural matters	The mutual representation of authorities shall not replace documentation;
125.99, Ireland; 125.103, Qatar	Examine human trafficking and ensure repair, compensation and support	Established liability and effective remedy have different dates
125.121, Iraq	Including school and prevention of institutional violence against persons with disabilities	The absence of aid and the resulting damage must be linked in concrete terms.
125.150, Australia	Strengthen protection during investigations, including by social workers and legal practitioners	The investigation's own approach may have an adverse effect
125.156, Estonia	Violence and assault charges must be tested in custody and in contact;	Rejection requires an actual document check
125.157, Iran	Responsibility for violence and the killing of women, including police and case management failures	Absence shall be linked to knowledge, duty of action and result;
125.169, Botswana	Children in social care should not be placed with children serving	The grounds of care and the basis of penalties shall not be blurred;
125.171, India	Try child corruption in minority families culturally and without discrimination	Test, consent and original justifications shall be checked
125.173, Poland; 125.174, Slovenia	Abolition of child isolation	The state's well-known child intervention requires individual time and legal records

125.247, Montenegro	Nationality for otherwise stateless children born in the country	Application and waiting time must be linked to the child's real legal position
125.259, Moldova; 125.263, India	Complaint for children and persons with disabilities throughout the Kingdom	Territorial limitations and practical access shall be visible;

Final national report: speak with their true meaning

All the information below is the state's own statements in UPR26-NAT. The alleged initiative is not in itself evidence of the implementation of individual protection.

Locator	Original figures or time-scale	Names, status and numbers
§ 6-8	8 of 9 key conventions; 13 January 2022 ratification; ILO190 in 2024	Treaty status; not a compliance percentage. No individual complaint under the Convention on Enforced Disappearance; the ICESCR complaints protocol has not been acceded to
§ 16	24 weeks of eligible leave per parent	Legal arrangement statements; not number of families
§ 19	40 / 60 target; 30 June 2026 deadline	Board targets for largest listed companies; not quantified actual target performance
§ 21/47	Up to 37 hours per week; introduced 2025	Employment regulations; repetition is the same initiative
§ 22	17 initiatives; 41 alliance members	Contractual and organisational figures; 17 non-detached abuses
§ 23	At least 35 employees and at least 10 men and 10 women in the same function	Thresholds for gender-broken wage statistics; non-observed complainant's denominator
§ 26-27	18 years for legal gender change; child counselling since 2016	Legal / administrative conditions as described by the State
§ 35	DKK 25,7 million 2025-2028; 8 new initiatives; 15.000 more in jobs 2030	Budget, initiatives and future disability-employment target; not actual entry into employment
§ 37	approx. 470 million DKK 2026-2029; 155 million annually thereafter	Budget statements on pedagogical competences; non-counted support for specific children

Locator	Original figures or time-scale	Names, status and numbers
§ 46	Up to 5 years of free language teaching	Timetable of the scheme; not actual delivery
§ 49-50	Arbitration plan 2023-2026; DKK 4,0 million 2024-2027	Planned period and budget to prevent abuse of adults with disabilities
§ 57	10 Night Life Initiatives 2025	Number of measures; not harm/redress statistics
§ 58	Trauma course 2022; special teams in all policy areas 2021	Organisation; impact on each notification not listed here
§ 62	No Ellebak overlay since 2022, according to the state's statement.	Institutional statements; not independently tested capacity series
§ 72-73	118,2 million DKK 2022-2025; new plan 2026-2029 in preparation	Budget and then planning status; WG § 121 mentions later launch January 2026
§ 79	More than 2.000 additional prison places expected 2036	Future capacity; non-directed overcrowding per unit 2026
§ 80-81	14 days; up to 4 weeks exceptional; minors usually not more than 7 days	Disciplinary frames with specified exceptions; not actually total isolation time
§ 82	First report on disappearances submitted 3 May 2025	State report date; not decision in an individual case
§ 87-88	10-year plan; 30% forced reduction 2030; change of law not earlier than 2027	Future target and possible change; not currently documented 30% reduction
§ 89	Compulsory education 6 or 7 to 16 years	Age of the scheme; not number of children without actual education
§ 96	Law of the child applicable 1 January 2024	The State's assurance of compliance, to be tested against actual practice
§ 108	70% reduction 2030 against 1990; 110% 2050	Climate Goal; Not Actual Meeting
§ 110-113	12 initiatives June 2024; 17 December 2025; 36 racist initiatives; of which 12Greenland; 12 further June 2025	Partial volumes, different plans and versions. Of which 12 may not be added to 36
§ 115	At least 0,7% GNI for more than 45 years	Development aid statements; does not waive domestic protection obligations
§ 126	6 Greenlandic strategic focus areas	Policy area number; not 6 documented corrections
§ 129	Greenlandic rape plan 2023-2027	Planned period; actual aid / cessation not measured
§ 132	Treatment clinic with waiting list from the opening	State recognizes demand / capacity problem; no number / day published here
§ 146	22 historical children; 250.000 kr.	Historical 1951interventions and subsequent repairs; not 22 new interventions in 2006-2025
§ 147	354 women; 488 reporting events; expected compensation law 1 June 2026	Different units; more incidents per woman. Legitimate expectations do not document actual payment
§ 151	Approx. 55.000 Faroese inhabitants; 1.556 European / Nordic residents without Denmark; 1.961 others	Population estimates; not number of rights violations
§ 154	6 ministries; about 130 annual works	Size of administration; not exemption from responsibility
§ 157	Expected 16 out of 20 violence initiatives in 2026	Expectations; unverified implementation
§ 159	7,9% childhood risk at 60% median; 3,0% at 50% median	Faroese relative income targets; not the same definition of poverty / denominator
§ 161	Faroese prison agreement 2022; expected completion 2030	Unsatisfactory conditions are acknowledged; new construction is a future response

Additional figures in the work group's representation of Denmark

Locator iUPR26-WG	Number and period	Unit and status
§ 118	More than €3 million; scheduled for January 2026	LGBTQI + budget declared by the State; not number of displaced victims
§ 119	31 million euro; 2023-2026	Budget for the partner-rapist plan specified by the State; no conversion DKK-total added to the national report
§ 120	30% future target 2030; 10% fewer most intrusive coercive forms 2021-2023	Different time periods and objectives.10% is a state statement, not a new independently tested yearseries
§ 120	Abortion limit 12 → 18 weeks; 15-year-olds and older without parental consent in 2025	Legal statements reproduced by the Working Group; non-interventions
§ 121	7th Action Plan 2026-2029; launched January 2026	Version statements on trafficking in human beings; § 73 of the National Report still says in preparation
§ 122	Criminal Code amendment effective 1. January 2025	Statement by the delegation on torture, war crimes and crimes against humanity; Convention / territorial scope requires legal review
§ 124	At least 0,7% GNI for more than 45 years	Repeat state aid statements; no additional year series

UN compilation of Convention material: a precise chain of knowledge

UPR26-UN summarises earlier committee findings and questions. Findings concerning 2021/2023/2024 remain the same findings when they recur in 2026 and must not be counted as new individual violations. Nor is a question in CCPR's list of issues a determined violation.

Stakeholders' figures and source limitations

UPR26-CSO summarises 16 submissions: 11 individual organisations, 2 joint contributions, 1 national human rights institution and 2 regional intergovernmental contributions. A joint contribution can involve many organisations; 16 are not 16 independent evidence chains or cases. The statements made by the national institution and the submissions made by the stakeholders shall be followed to their original documentation.

Locator	Number or concrete statement	Precise status
§ 3/29-30	Up to 23 hours in the cell; up to 28 days of disciplinary isolation	Reproduction of DIHR / CPT / JS2 information; 23 hours is daily register description, 28 days legal exemption
§ 4	DIHR criticises frequent closure of police complaints and proposes human rights review	Institutional assessment; no total of appeal outcomes in this section
§ 10	The DIHR describes significantly increased bogey requirements and requires reliable data	No number series published here; must be connected to the original series
§ 27	30% reduction 2030	The same political psychiatric objective as in the National Report; not a new reduction
§ 37	37 hours of duty referred to as 2023 rule on non-western	The Stakeholder's reproduction is in conflict with the 2025- and residence / employment delineation of the National Report. The legal basis must determine the practical application
§ 38	49.500 poor people; estimated income loss for 11.000 children; 6 years of gradual child benefit	JS2's statement / estimate. No statement of identity or proof of 49.500 breaches of public law
§ 42	Approximately 3,2 billion USD development assistance 2024; 0,7% GNI	MAAT reproduction; non-original national financial statistics
§ 44	47,5% women with violence / threats in the category described	MAAT reproduction; exact year of survey, sample and denominator not presented in the composition
§ 47	12,3% gender gap 2023	IPWR's reproduction; not an established illegal pay gap in each appointment
§ 48	Get psychological violence cases despite surveillance findings	JS2 statements; no numbers that can be invented
§ 51	Repeated allegations of irreversible action without impartial investigation	JS2's criticism, not evidence of a certain number of children
§ 54-55	Long-term administrative detention and indefinite stay for children	JS2's criticism; individual start / end dates are missing
§ 56	Citizenship revoked year after regulatory error	JS2's criticism; original decisions are required for the individual citizen

Locator	Number or concrete statement	Precise status
§ 60-62	Spiral courses, historical child transfers and culturally unsuitable parental tests	JAI / MAAT statements. Repeals may not be counted as new families
§ 66-67	Possible deterioration of rights through Faroese structural changes and limited children's access to complaints	MEGD investigation / legal certainty track; possible future damage is not a recorded actual loss

Documented source errors and necessary response documents

The final national report's footnote 2 on PDF18 describes earlier recommendations with 120 / 121 numbers and refers to the 2016document A / HRC / 32 / 10 / Add.1, while the introductory paragraph 3 deals with the follow-up to 2021 and the subsequent footnotes actually use 60 numbers. The conflict is also found in the final UN document. It is therefore not enough to replace the draft consultation alone. The right recommendation must be matched by number, year and wording; a false source reference must not create a false chain of succession. [UPR26-NAT, PDF2 / 18-21]

The UN's automatic printout from 25 September 2026 indicates 174 supported and 91 listed recommendations: 174 + 91 = 265, own calculation 65,66% and 34,34%. The statement is presented by both the Danish delegation at the 1: 51 and the delegation at 2: 27: 41. The printout explicitly states that it is not an official UN protocol. The total is therefore marked as meeting statements in an automatic print; the final status of each recommendation number is not verified here. [UPR26 -MODEL]

The written response A/HRC/63/10/Add. 1 could not be obtained through the UN's direct symbol API, the exact embedded link at docs.un.org, the register search or the country catalogue. The API returned an error page, not a PDF; the outer docs.un.org display documents only a link template. The country catalogue still showed 2021/2016/2011 files. This is a specific outstanding access item, not an assumption that the response annex does not exist. 174/91 must not be converted into individual matches or completed reparation. An annex with 2025 in its filename about earlier 60 numbers is not an answer to the 2026 set of 125 numbers.

Legal significance and concrete requirements

The final national report opens with Denmark's own acknowledgement of a responsibility to protect the population. This is a documented State statement requiring the analysis to ask about action, effect and reparation. The wording does not in itself prove that R2P's four international-crime categories are met. The specific tracks concern first the rights to family, liberty, integrity, legal access and relevant disability protection under the identified conventions. [UPR26-NAT,§1;the report's legal chapter]

The strongest documented criticism is the difference between assurances of compliance and known oversight findings. The State's section 96 declares that the Children's Act secures respect for the Convention; national original studies simultaneously document continuing errors in fact-finding, consent and timely intervention. The State's section 34 declares sector responsibility for accessibility; CRPD findings and the 2026 recommendations specifically identify legal access, complaint processing time, coercion and assistance. A statute's name, a budget, a plan or an accepted recommendation does not document cessation of an individual's loss.

The demand is a numbered compliance account: original recommendation and finding→responsible ministry/authority→knowledge received→necessary action and deadline→actual measures→affected person's intervention and loss period→dated redress→examination of organisational and individual responsibility. For children, it must follow both the child and the relevant caregivers. For disability, procedural support and accessibility must be examined before the authority treats non-participation as the citizen's own failure. Irreversible interventions require independent investigation and relevant compensation because a later legislative initiative does not restore bodily integrity.

The four fully read 2026 originals close the known reading hole in this UPRs base. They shall not create the unpublished individual files, an accessible written response document or a national register of actual repairs. These specific document requirements are separate, so that the completed original work is not confused with a loose personal account.

17. Copenhagen children's cases: errors and consequences

What the cases of the 77 children actually document

The study of 24. May 2017 shows deficiencies in all 77 children's cases examined. It also gives specific examples of interference with family life, pressure in obtaining consent, overstepping authority and long waiting time. Merely describing its result as a general error rate is therefore insufficient. Individual acts and effects require separate examination. [KK17,pp.6-8,66-69]

The population comprised 78 children’s cases from 2013-2016, with one court-ordered placement excluded. Three of six local units were included: Bispebjerg, Valby-Vesterbro-Kgs.Enghave and City-Østerbro. The starting point was the latest 10 cases in each of four categories per unit; overlap and the number of available cases reduced the sample. The cases were distributed approximately equally between units and between placements with/without consent. With few exceptions, the children were under 12 years. This is the specifically described selection. The report’s later assessment of representativeness cannot replace a documented national random sample. [KK17,pp.8,12-14]

The method consisted, on the one hand, of the administration's own screening and, on the other, of the citizen's control of relevant acts in 62 cases with unclear registrations. Records were amended, inter alia, when an investigation was actually completed after the placement, or a placement registered as a voluntary lack of consent. The main consideration was whether a case-by-case approach existed and, normally, whether its content was sufficient. Therefore, a recorded implemented step is not proof that the entire step was legal or professional enough. [KK17, p.13-14]

This delimits the statement of the check in two ways: the absence of written evidence cannot be explained merely by the lack of a note on an oral act; at the same time, the lack of quality in existing documents may be outside the control. The 77 / 77 report is the union of at least one investigated deficiency per child case, not the sum of all series of errors and not an individual decision on 77 materially illegal locations.

Relationship: an actual restriction can be hidden by the designation

Nine of the 23 children's cases with established facts or concrete signs concerned relations determined without the necessary competence. For six children, a scheme was designated as supported interaction effectively supervised interaction. The management had assessed ten other schemes which were properly supported. The relevant statement is therefore 6 / 16 = 37,5%; the original reproduces 37%. It is a subpopulation of 77 and 23 and should not be added to any of them. The original mention of 60 irrelevant cases and one further exclusion is not sufficiently explained to construct a new overall denominator. [KK17, p.66]

One of the specific cases shows that the administration wrongly believed that children and the youth committee could not decide on monitoring during a voluntary placement. It carried out the surveillance and called it supported interaction. The consequence was a real restriction of parent and child contact without the competent decision and associated review. It is the actual system, its intervention force and the rules of jurisdiction of the time that govern legality; the title of the case cannot provide a legal basis. [KK17, p.68, example 16]

The legal criticism must address both the excess of competence and the lost safeguards. The demand is production of the contact decision, contact actually carried out, surveillance instruction, reasons and subsequent correction. Until these dates exist, there is no documentation of the total days or hours the family experienced the scheme without legal authority. The missing measurement does not make the identified lack of competence less serious.

Six concrete types of trajectory and their human impact

The 16 numbered examples of p.66-68 are 16 relationships, not 16 different children or families. Several describe the same siblings or the same child. Nor should they be attributed to the main population, as they illustrate cases within it.

Progress in the original;	Specific regulatory action; or non-compliance;	Documented sequence / time	Legal deviation and necessary requirements
Three sisters, example 1-4	The mother is pressed for holiday / living; the municipality, on behalf of the father, seeks temporary full custody and advises him to detain the girls	Three children and their relationship with the mother are affected; later, municipal arrangements of access, even if the children are not placed	Examine impartiality, actual involvement and competence; obtain the municipal application, parental-responsibility decision and dates

Progress in the original;	Specific regulatory action; or non-compliance;	Documented sequence / time	Legal deviation and necessary requirements
	in respect of the mother, while she is still a member of custody and the right of residence;		for detention / presence
One son, example 5-6	The requirement to deposit passport without an identified legal basis; reference to placement changes the mother's refusal to accept; parents repeatedly ask for more contact.	A formal access decision is only seen over a year later.	Clear travel / family life, freedom of consent, non-decision and access to complaint; aim first request → decision → actual change of contact
Two non-related children, example 7	Decisions appear to have been taken immediately before birth.	Indication of two courses, unverified birth / decision dates in the text of the report	Check the original dates and the day-count right. The child's law later special rule about an unborn child cannot be used backwards on 2013-2016
Twin boys, just over a month, example 8-10	The municipality notifies its decision to the mother of the hospital prior to documented consent; changes the four months of the form to one for signature; accepts signature without documented verification of voluntary / informed consent	Two babies; the mother wants support at home and describes the signature as the pressure. Four / one month are planned periods, not verified actual separation	Try consent and competence, current decision and whether compulsory guarantees were circumvented; require the hospital's simultaneous file, both form versions and physical removal date
A boy with a former foster family, example 12-14	The municipality organises pick-up, pays board / lodging and driving, but designates the course as a private contract; records vary between private arrangement and placement	The father with custody is not contacted until three or four months after the apparent decision on voluntary placement.	Lack of necessary consent and changing legal basis; require the first decision, the consent of both parents, the basis of payment and the timeline for each basis
A son, example 15	The consent of the mother shall be withdrawn three days after receipt of the decision; the municipality shall decide on the period of return of one month and subsequently refer the matter to the Committee;	Withdrawal and planned repatriation period is described; actual return is not disclosed	Check the return-home decision, any new compulsory decision and actual cessation. A one-month decision is not evidence of return home after one month

The separate example 11 describes a family faced with family or forced housing, apparently motivated by previous opposition to cooperation. The number of children is not specified. It must therefore be described as one illustrated family course without an invented figure. The resistance to cooperation cannot in itself replace the material conditions for intervention. [KK17, p.67]

Parental authority and complicity in detention

The strongest point of criticism in the course of the three sisters is that the authority responsible for informing and managing the children's case was itself assisting one parent against the other and recommending detention. The citizen's adviser describes the mother's then custody and right of residence, and later the decision on the municipality's application. It is a concrete breaking track of impartiality and possible involvement; it cannot be reduced to an unfortunate tone. [KK17, p.66-69]

A comparison with child abduction by private individuals must therefore examine the actually recommended and carried-out removal from the entitled person, the timing of changes in parental responsibility and the actor’s knowledge. The report excerpt does not on its own document every element of Criminal Code§215 or§23 on complicity. The demand is to investigate these elements against original material while fully maintaining the already documented excess of authority.

Pressed consent and an amended form

The twins' case documents that a signature cannot simply be treated as self-explanatory evidence of a free decision. An already communicated placement decision, missing explanation of the compulsory process and rights, and a change of duration to obtain the mother's signature must enter substantive scrutiny of consent. A case label of voluntary does not exempt the authority from proving that necessary consents were valid. [KK17,p.67]

If the necessary consent was not valid and there was no other legal decision by the appropriate body, the removal shall be tested as an intervention without valid basis. It is the strong and concrete legal chain: action → lack of consent / competence → lack of action → separation → demands for termination, review and repair. At the same time, the final personal guilt requires proof of the action and guilt of the individual employee; it does not automatically follow from the fact that the report reproduces the course.

A year without a probable decision

Parents' repeated requests for access and a formal decision only more than a year later are an independent matter of time. During this period, the family lacked a formal decision which could be tested by the usual means of redress. The average time taken by the Board of Appeal does not capture this time before the complaint. It should therefore be kept in the time accounts as a delayed decision / access to review. [KK17, p.67, example 6]

The report shall not indicate the calendar dates or all visits actually made. Therefore, no precise number of separation days can be calculated or concluded that there was no interaction throughout the year. The verified consequence is the long-standing lack of formal consultation despite requests. Specific requirements: fix all requests and answers in time; measure the volume of visits; try whether the actual scheme was legal and whether the slowness violated the right to effective testing and family life.

A lack of protection also needs to be criticised.

The original describes the reports of violence against siblings, which were not more closely uncovered, and the cases of two brothers, where the authority was awaiting a suspended police investigation. It also describes one case of information about the mother's violence against a small sister, while the municipality continued its planned repatriation with a security plan. This documents the information received and a description of the omission; it is not in itself independent evidence of each reported act of violence. [KK17, p.68-69]

The legal criticism concerns lack of independent investigation of the facts and timely protection assessment. The municipality’s duty to investigate the child’s circumstances does not disappear because police are investigating a criminal case. Denmark’s positive protection obligations require examination of who knew what, which realistic protective steps were available, and why they were omitted. This criticism can coexist with demands to stop separations without legal authority; each child is entitled to a lawful, individual assessment of protection and family life.

Previous knowledge, repetition and undocumented closure

Annex 2 of the report describes previous oversight. In 2011-2012, the administration examined 203 registrations; the later joint review by Internal Audit and the Citizens’ Adviser found that the investigation did not provide a sufficient basis for the administration’s conclusion about the nature of the incorrect registrations and the measures selected. The reported approximate 11% and 13% must not be converted into exact error counts without the original account, and 203 are registrations, not necessarily 203 different children. [KK17,pp.74-75]

A separate investigation of 30 foster children's cases for 2011-2012 found a lack of evidence of the minimum requirements for supervision laid down in the Act in at least 22 cases; the result was completed in 2015. It is a former control find, not a sub-category of the 77 cases, and must be able to be summed up only into a single children's union after the person-coupling. The image is a verified later source; the original 30 case report is to be used for a full number and selection check. [KK17, p.75]

The repetition argument is therefore concrete: before 2017 management had received criticism about supervision, guidance and registration, and the 2017 study again found extensive failures in guarantees and registrations. It can be used to demand responsibility for the choice, implementation and control of the previous actions. It does not prove without further documents that all the mistakes were made by the same employees.

At p. 69, the conclusion of several competence and home issues is based on information on a plan of action and an assumption that errors were or would be corrected. The councilman asked the council to confirm the assumption. Such an assumption and a planned course do not in itself demonstrate that the intervention of each family ceased, that contact was restored or that the citizen was compensated. The chain of responsibility of the report must therefore not end when a plan of action is adopted. [KK17, p.69]

The requirement is an account of each of the 77 cases: actual errors, date of recognition by the authority, decision addressed, actual change in the child's life, loss / indemnity and, where appropriate, the outcome of the duties or criminal proceedings. This chain is necessary in order to compare long intervention time with actual lack of personal sanction. The existing study provides serious and useful evidence; it does not publish this overall closure account.

Verification of certificates and priority requirements

Documented report find: 77 / 77 with at least one deficiencies examined; the specified denominators in Chapter 9; 6 / 16 effectively supervised schemes designated as supported; specific actions described and over one year waiting time for a visit decision. In particular 23 / 77 is a mixed category of findings and concrete signs. The source itself states that much is based on the municipality's own identification and not a full independent study of all these matters. [KK17, p.13-14,66]

Further evidentiary requirements:original signatures and form versions; clinical/hospital records in the twin course; actual birth dates in the two pre-birth examples; parental-responsibility decisions and municipal correspondence in the sister cases; the dated contact requests; contact hours and move dates; the specific closing response to the Citizens’ Adviser and corrections per child. These documents differ from the 2017 report’s summaries.

The strongest arguments are, in order:1) lack of necessary consent and proper decision-making competence at the intervention itself;2) actual surveillance without a decision by a competent body;3) the authority’s assistance to one party and pressure against the other parent;4) absence of a decision and prolonged blocking of review;5) repetition after earlier documented management knowledge;6) lack of documentation of actual cessation and individual reparation. Each point must be linked to the precise person, period and original document when advanced as an individual claim.

18. Time of intervention, repatriation and temporary residence of children protection;

A registered win must be followed to the actual situation of the family

Conclusion: Remittal or annulment is not in itself an account of when a child returned home or how long the family lost contact. The public scrutiny system must show both the decision's legal consequence and the intervention's actual cessation. Appeal processing time alone can hide further months following a favourable decision. Conversely, a child may have returned home before the appeal decision later recorded as remittal. The two timelines must therefore be linked through original documents and event dates. [HG01-HG03; R07-R10]

The commissioner's two meanings of "sending home" are treated separately: **remittal for fresh consideration by the authority** and **return home with actual return**. Contact, geographical distance, support and later reunification are also recorded. Annulment of a contact decision may be an important legal consequence even while the child remains in placement. Remittal of an assistance decision may involve restoration of an earlier benefit; it does not prove that a child returned home.

Registration	Unit and necessary originals	What can it prove?
Remittal for reconsideration	Appeals, grounds of error, repeal and any provisional provisions	New processing is required; the specific legal order must be read
New Decision	Date, decision-making power, legal basis, justification and documented legal conditions	Whether the intervention was given a new independent basis; no retrospective repair of past losses
Actual return	Date of removal, end of placement, receiving homes and, where appropriate, support courses	When physical separation ceased
Consultation and contact	Decisions and actual visits, telephone contacts, cancellations and transport	Whether the family actually had contact and how the relationship was affected
Suspension effect	Request and decision of each body	Whether implementation was temporarily stopped; not automatically the outcome in the main proceedings
Repair	Restoration, compensation, assistance, liability assessment and effective implementation	Whether an established error was followed by effective redress

A commune declaration such as "returned" must be checked against actual cessation and the child's stay. A statement of continued need shall be checked against the simultaneous evidence, including documented help, the child's statement and relevant counter-evidence. None of the information will be sufficient simply by repeating several decisions.

Højesteret 3 November 2025: a rule was wrongly made an absolute ban

Documented error of law: The Eastern High Court precluded an individual assessment of suspensive effect in a case concerning a Faroese child's placement in Denmark. The Supreme Court quashed the order and remitted the question to the High Court for reconsideration. This specifically demonstrates that a review body may itself limit interim protection through an incorrect interpretation of law. [HG01,particularly pp.9-10]

The original order, BS-28216/2025-HJR, describes one child, B, born in 2009,and the two parents F1 and F2. This is **one case with three named procedural roles**,not three independent courses involving errors. The placement decision was made by Føroya Kærustovnur on 3. September 2024. On 25. September 2024,the Court of the Faroe Islands granted the proceedings suspensive effect. The High Court revoked this decision on 18. March 2025. The Supreme Court remitted the matter for reconsideration on 3. November 2025. [HG01,pp.1-2 and8-10]

Step	Documented date	Legal meaning
Administrative placement decision	3.9.2024	Decision on institutional placement in Denmark

Step	Documented date	Legal meaning
The Court of First Instance of the Faroe Islands	25.9.2024	Temporary suspension after a specific assessment
Østre Landsret	18.3.2025	The suspension was lifted on the basis of an assumed absolute prohibition;
Højesteret	3.11.2025	High Court order annulled; issue remitted for specific assessment

There were **426 calendar days** from the administrative decision to Højesteret's order and **230 calendar days** from the high court's order to Højesteret's correction. From first-instance interim protection to Højesteret there were **404 days**. The calculation is the difference between dates without including both endpoints. It shows review time; the order does not document that the child was physically separated from the parents on all those days. Højesteret's remittal is also not evidence of later return home or a final decision granting suspensive effect. The subsequent high-court order and actual residence dates are necessary to count this individual case as a quantified loss through separation.

The evidence chain and the specific deviation

The child's statement, reproduced in the original case, includes six relocations, of which four in the last two years, and a wish to remain in the improved current situation. The information is counted as: **the child's rerepresented statement;**. It is not an independent document-controlled relocation package in this national review. The original order also reproduces school information on improved development and the first court's assessment that an acute relocation was not necessary. The risk of a Danish institution included the fact that the child did not speak Danish. Arguments on psychiatric risk are included in the manufacture of the parties; they are not to be converted into independent medical findings from: Højesteret. [HG01, p.2-7]

The national court's specific legal statement was that Article 64 of the Faroese Barnavodar Act cut the suspensive effect. Højesteret The Court held that that provision did not exclude the right of the court under the Code of Procedure of the Faroe Islands, Section 517 (3), to grant suspensive effect exceptionally. That is why the national court had to make the specific assessment. The case concerns Faroese social legislation and Danish law in the Faroe Islands; it may not be used as an interpretation of all provisions of the child's law for municipalities in Denmark. The established legal principle in this context is that the relevant access to temporary protection should not be excluded by the categorical interpretation of the national law. [HG01, p.9-10]

Significance for outcomes: The specific assessment of risk, the child’s current situation and the consequences of intervention was delayed by the incorrect legal exclusion. **Responsibility and demands:** The Supreme Court order documents the legal error and the necessary fresh consideration. It does not establish personal disciplinary culpability, criminal punishment or a specific compensation amount. The strongest documented demand is a prompt, genuine, reasoned decision on interim protection, together with production of the subsequent decision and actual event dates if loss is to be calculated. The substantive placement decision still requires independent review.

Procesbevillingsnævnet's public account states leave granted on 8. May 2025 and publication the following day. The registration supports the review chain, but is not an additional remittal or a new child. [HG02]

C-5-99:remittal for reconsideration may occur after return home

The Board of Appeal's decision of principle C-5-99 concerns a historical course outside the twenty-year period of the report. It is used here as **legal and conceptual explanations;**, not as a case in the count 2006-2025. Legal information shall indicate the decision as applicable at the time of the verification 7 October 2026. The then paragraph numbers must not be referred to as current provisions of the child's law. [HG03]

The original two-page decision describes a boy placed in care from 1995. The Children and Young People Committee decided on continued placement on 19. August 1998. The municipality moved him from an institution to a foster family without his mother’s consent. When Ankestyrelsen considered the case, the boy had already been home for approximately three weeks with municipal assistance. Ankestyrelsen annulled the continued-placement decision and remitted the question of relevant assistance and support for a new decision. There was to be, among other things, a relevant offer of psychotherapeutic treatment. [HG03,s. 1-2]

This case includes both an **annulment** and a **remittal**, but the remittal concerned future support after the child had actually returned home. A statistical registration as remittal therefore cannot, on its own, determine whether physical separation continued. The necessary rights-oriented account also includes missing support after

The return. The original does not provide the exact dates necessary for a day-by-day calculation of the entire period of placement; no such duration shall be constructed.

The time rules shall be tested against each day of continued action;

The controlled provisions of the child's law allow for a period of return of up to six months and a period of seven days for the decision on the request for termination of a voluntary placement. The two rules are different. Six months is not an automatic minimum period and the seven-day period is not always a guarantee of physical return on the seventh day. The decision, period and concrete basis must be presented. Complaints against children and decisions of the Youth Committee do not, as a matter of principle, have suspensory effect, but there is an exemption and subsequent judicial review. [R08, § 100,102,146-148]

The legal departure must be located: If a voluntary placement continues without valid consent, without a lawful return-home decision or without another valid decision, the basis for continuation must be examined for the specific period. If the decision has only a documented procedural error, its validity, the error's significance and any independent violation of procedural rights must be examined. If the basis ceases through being set aside, actual continuation must be investigated anew. A later decision does not change past events or remove losses already suffered.

Absence of automatic suspensive effect must not be described as **criminal immunity**. It allows a decision to be implemented while under review and may thereby create a period in which the citizen bears the actual consequences before the error is clarified. Precisely for this reason, the responsibility inquiry must examine knowledge of the missing basis, breached safeguards, management instructions, failure to respond to complaints and omissions after documented error. The Liability for Damages Act's limitation of personal employee liability is a separate form of financial protection. It must not be rewritten as legality of the intervention or extinction of the State's responsibility. [R05; R11]

What the family can actually lose in the waiting period

Physical distance, reduced hours of visiting, cancelled visits, transport, loss of daily care, school and language environments, as well as stress on repeated relocations are concrete consequences. They must be registered next to the processing time. A figure of waiting time cannot in itself prove each of these losses, but the absence of national interconnection must not be used to prove that the losses do not exist.

The ECtHR's Grand Chamber in *Strand Lobben* links Article 8 to active efforts towards reunification as soon as practically possible and an obligation that increases over time. Authorities' own restrictions of contact or slow processing must not become an unchecked link in reasoning that family ties are now weakened. For every such argument, the origin of the alleged weakening must be investigated: Which contact decisions were made, who implemented them, which opportunities were refused, and when? [R09, §§205 and208]

Specific requirements for the national statement of time

The municipalities, Ankestyrelsen and Danmarks Statistik must be able to delimit annual cohorts with original decision ID, complaint ID and pseudonymised person coupling. The time fields shall include at least the initial decision, actual move, appeal, reassessment, external decision, new municipal decision, actual cessation and actual return. Changes in circumstances and the reasons for continued intervention must be attributable to the same periods. Existing registrations and a documented explanation are requested if the fields do not exist. The report does not claim that all this information is already in a common national register.

Statement	Required denominator	Counter and Outcome
Time for remittal for reconsideration	All relevant reality decisions in a clearly defined annual cohort	Remitted cases with actual dates; amended and affirmed cases separately
Time after remittal for reconsideration	All remitted cases in the same cohort, including those not yet concluded	New decision, continued intervention, termination, new complaint and lack of follow-up
Actual separation	Children with documented movement and start / end date	Days, relationships, reunification; progress separately
Time without valid basis	Individual procedures with established legal consequences	The documented illegal period; not automatically the entire placement

Statement	Required denominator	Counter and Outcome
Parents' touch	Documented parents and actual rights / care relationship	No automatic multiplication of the child count by two

The central criticism concerns both the documented legal exclusion in the specific Supreme Court case and the review system's insufficient basis for calculating total intervention time in national statistics. The national figure must not be invented. The demand to produce the linkage, make corrections effective and secure rapid redress can be stated precisely without it.

Children's contact, freedom and actual repatriation: three documented progress of the authority;

BK01. Illegal control of a boy's communications

Conclusion: The residential facility and municipality contributed to interference with a boy in care's privacy and contact without the necessary decision from the Children and Young People Committee. The boy thereby lost both confidentiality and special opportunities to obtain review. This is a specific deficiency in competence and legal authority for communication monitoring. It must be recorded independently even if the placement decision otherwise remains in force. [BK-K01, pp.1-15]

What the original document chain shows

FOB 2018-26 of 4 July 2018 concerns a boy who was 14-15 years of age in 2015-2016. The residence B was private; the responsibility of the municipality is reflected in its own notes and orders. A private supplier does not make the act of the municipality a purely private relationship.

Documented impact	Initial document referred to in the opinion	Meaning of proof
7 June 2015; received by the Municipality of 8 June	diary note with details from the boy's Skype communication	The municipality's knowledge can be traced back beyond its later explanation
9 September 2015	The municipality's telephone note about the location's access to the boy's phone without his knowledge	Direct evidence of municipal knowledge of hidden access
11 and 16 September 2015	The municipality's request for the content of the communication and the delivery of the contact printouts by the place of stay	The municipality was active recipient and ordering
21 September 2015	New detailed note on Skype contact with the former foster mother	A further documented reduction in controls
6 January 2016	The case handler's desire for proof of contact; subsequent screenshots	The active participation of the municipality continued
16 February 2016	Place of residence information to the boy about limited control	The information did not cover the hidden copying and transmission; it does not document informed consent
29. May 2016	Latest documented material from the check	End point of the rebates shown; exact date of harvest has not been proven

The Ombudsman also reviews information about checking letters and about the boy's anger about getting messages read. The opinion is based on simultaneous documents reproduced in the file. The report has checked the entire 15 pages of the opinion, but has not received the complete original file systems of the municipality and the place of residence.

The Authority's statement tested against its own documents

In fact, the municipality's first statement of 21 December 2017 rejected the fact that the material provided the basis for its involvement. In its opinion of 16 February 2018, the Municipality recognised, inter alia, involvement in Skype and e-mail control, but sought to delimit its role at images and time. The Ombudsman's verification shows that the simultaneous notes were of greater value than the later narrow description. The first initiator of all control actions has not been identified; it does not change the documented municipal orders and arrivals. [BK-K01, p.8-15]

Rule, deviation and actual follow-up

Paragraph 123 (2) of the service law at the time laid down the special competence of children and the youth committee. The place of stay and the municipality could not replace the required decision with their own discretion or the consent of the child or parents. The Ombudsman's opinion describes that the unlawful approach also removed guarantees, such as legal assistance, access to documents, access to the hearing, necessity and delimitation of the period and judicial review. [BK-K01, p.11- 14]

The concrete consequence was that the child's private contact was read, documented and surrendered without the legal decision-making process. There is no need for a subsequent psychiatric diagnosis to document this private life loss. Furthermore, whether the illegally collected communication has an impact on contact or other decisions requires comparison with subsequent original decisions.

From 7 June 2015 to 29 May 2016, there are 357 calendar days between the discounts shown. From the direct telephone note 9 September 2015 to 29 May 2016, there are 263 days. The figures are own date calculations; they are **not** evidence of daily uninterrupted checks throughout the period. From the first showed discounts to the opinion 4. July 2018 went 1.123 days. The time of the course of control and the time of the course of supervision are different.

Responsibility and comparison with private individuals

The sustainable track of responsibility is the municipality's own actions, the execution of the place of residence and the identifiable duties and management stages. The Ombudsman informed, inter alia, the Parliamentary Committee on Legal Affairs, the Ministry, the Municipal Council and the Social Security Authority of the South. Information on changed workflows is reaction information; they do not document compensation for the boy or punishment for a particular employee.

A private individual's unauthorised access to another person's communications may fall under section 263 of the Criminal Code where the relevant elements of the offence are met. In the 2014 statutory text checked, subsection 1 provided a fine or imprisonment for up to 6 months, unauthorised access to information systems under subsection 2 up to 1 year and 6 months, and particularly aggravating circumstances under subsection 3 up to 6 years. These are different forms of offence, not one standard sentence for reading a child's message. The specific act, statutory version and culpability must be examined. Public employees are not generally exempt from this criminal provision. The material checked documents no criminal conviction concerning these particular acts. [BK-K04,§263]

Specific demand: Disclose the full communication, commissioning and access chain, identify its use in later decisions, examine rectification and erasure under the appropriate rule, and make a separate decision on individual redress and responsibility. The unlawful surveillance must not be hidden within overall placement statistics.

BK02. Egely: incarceration and a presumption of authority without proof

Conclusion: Two examined interior locks in young people's rooms did not have the required legal basis. At the same time, the region's acceptance was based on a crucial factual condition which the reports did not substantiate. It is both an intervention problem and a problem in the proof test of the control. [BK-K02, printed p.35-40; physical p. 36-41]

The Ombudsman's follow-up of 12. April 2011 followed the inspection on 12. December 2007 and main report of 14. April 2010. Two use-of-force reports stated respectively 5 and 15 minutes for the complete interventions. The times include taking the person to the room and, in the second case, restraint and locking in. They are not precise separate measurements of how long the door was locked.

The Region of Southern Denmark accepted door locking as an emergency guard provided that an employee was with the young person. In its letter of 23 January 2008, the region acknowledged that this was not apparent from the notification. The Ombudsman criticised the fact that the region had taken a decision without examining this crucial fact. The subsequent reference by the institution to the opinion of the region did not provide any new independent evidence. This is a concrete example of how

the institution's and the supervisory authority's references to each other shall not be read as two independent endorsements. [BK-K02, printed p.36-37]

The Ministry of Social Affairs' opinion of 26. October 2010 clarified that there was no legal authority to lock children and young people in their rooms in secure units outside the special night-time arrangement. The special rules on isolation rooms could not provide legal authority for the room confinement in question. The Ministry considered both instances unlawful use of force. Placement in a secure institution therefore does not remove the right to separate review of the lawfulness of further confinement. [BK-K02, printed pp.38-39]

The displayed source documents **two instances of intervention**. It does not identify whether two different young people were involved. Egely's 129 placement sequences in 2008 and 117 in 2009 are the institution's other activity data, not the number of unlawful interventions. The corresponding 8.237 and 7.984 days of stay and averages of 64 and 68 days describe the entire activity series and cannot be added to the two uses of force. [BK-K02, section on length of stay]

It took 1.217 days from the inspection to the follow-up report. It is supervisory time; the examined interior locks did not last for 1.217 days. The source does not document an individual penalty or compensation paid for the two cases.

Responsibilities and requirements: The action of the executing institution, the decision of the region on an unpaid basis and the subsequent follow-up shall be recorded separately. Retrieve both original alerts, the duration of the door locking and subsequent liability decisions. Comparison with a private person's deprivation of liberty requires the actual stages of action and guilt in Section 261; there is no basis for transforming the finding of the supervisory authority into a claim for a specific automatic prison sentence.

BK03. Randers: return without the statutory guarantees

Conclusion: All four controlled repatriation cases had shortcomings in both the previous action plan and the child interview. The three children over 12 years of age were not given the decision in due time in the manner required, according to the documentation examined. Two decisions for parents were insufficiently justified. The documented return error must be included alongside removal and continued placement errors. [BK-K03, p.1-36]

The entire sample and the correct denominator

Randers reported 12 return-home decisions from 1. January to 1. June 2017:6 from an institution,4 from kinship/network foster care and 2 from a foster family. The Ombudsman selected four cases, A-D. A and B had been placed without consent; C and D with consent. The investigation covers the four selected cases, not a legality review of all 12. Both cases without consent were included in the sample. The sample's composition must be preserved when communicating the results. [BK-K03, pp.3-5 and annex]

Controlled deficiency	Number	Actual population	Cosmetic count
Action plan not revised in due time with focus on repatriation	4	A-D	Same four kids as next row.
No sufficiently documented child interview about imminent return	4	A-D	Do not add as four new children
Decision not correctly notified to the child before return	3	A, B, D; all over 12 years	Subset of the four
Insufficient justification for parents	2	A and D	Subset, not new cases
Lack of information for children and the Youth Committee	1	A; the sample included 2 children in compulsory placements	B's committee was informed

The above outcomes include four investigated cases with overlapping errors. There are not 14 different children who have failed by adding 4 + 4 + 3 + 2 + 1. The decision on D also included her sister. The material thus refers to at least five children concerned, but the sister's own case was not examined as a fifth sample case. The precise unique number of parents has not been published; four children's cases are not automatically converted into eight parents.

Actual return and subsequent dates of proceedings

Child	Actual return to: it controlled docutato n	Other crucial dates	Documented meaning of time
A	10 January 2017	Written decision 26 January; plan revised 28 February but not forwarded; plan received 27 May	16 days from actual return to the written decision; the plan reference in the decision did not give sufficient reasons;
B	23 January 2017	The first survey by the municipality indicated 1 March; the plan was subsequently recognized 1 March; Ankestyrelsen 30 October 2017 immediately imposed aid	37 days difference between first review date and corrected actual date; this difference shall not be used to prolong the separation;
C	1 June 2017	Application by the mother 21 February; decision 22 February; interview 14 June; revised plan 26 June	100 days from application to return; interview 13 past days and schedule 25 days after return
D	31 January 2017	Decision 12 January; earlier Decision 14 December 2016 sought to indicate period 25 May to 31 October 2016 retroactively	19 days from the date of the new decision until the date of return; the retroactive decision was not effective and does not document a return in May;

The Ombudsman's text calls the interview 14 June 14 days after 1 June. The 13 days of the report are common date subtraction without including counting. The difference is indicated rather than hiding it. The 100 days in C's course are not automatically 100 illegal separation days; the legality of the period of return itself is a separate test point. [BK-K03, p.6-12 and 26-35]

There are also different original dates for placing in B's material: the inventory refers to 13 February 2015, while the later case description indicates a first placing in January 2014. This information may relate to different stages during a longer period. Therefore, the report does not calculate an overall uninterrupted separation from February 2015 alone.

Actual aid following the Office's request to act immediately

Ankestyrelsen the decision of 30 October 2017 to immediately launch psychological examination / assistance, permanent contact person and family-led support during B's course. The municipality's subsequent response gives mentors and family-oriented action launched 20 November and psychological assistance 24 November. It is 21 and 25 calendar days after the order, respectively. From the actual return, there were 301 and 305 days for these operations. The final figures are not proof that any other aid was lacking for the whole period; they measure the time of the specifically declared bets. [BK-K03, p.28-29 and 33]

The municipality states that the mentor and family-focused intervention ended on 23. February 2018 and that its purpose was not achieved. It explains this by a lack of cooperation from B and her mother. That is the municipality’s explanation, not an independently verified finding of their fault. For a causal assessment, it must be compared with the information given to B about the support, its late initiation, the intervention’s content and the family as actual participants. The opinion does not document that the original case-handling deficiencies were thereby immaterial.

The record as proof, not automatic fact

A meeting in B's case is in the journal dated 1 January 2017, but the note was created on 1 March. The municipality itself declared uncertainty about the date of the meeting and assumed that it took place around the clearing of 10 January. The date of 1 January cannot therefore be used as a secure simultaneous proof of timely involvement. [BK-K03, p.32]

According to the municipality's own post-control, D's allegedly updated plan of 14 December 2016 had the same content as the September 2015 plan; only the consultant's signature had changed. A new date of the document was thus not a documented new material assessment. [BK-K03, p.30]

The municipality's statement that the decisions were sufficiently informed at a general level does not replace the specific statutory guarantees. The Ombudsman maintained his serious criticism, although the municipality announced changed working practices. His decision not to carry out any more is an end to the investigation; it is not an acquittal of the errors found or proof of individual repair. [BK-K03, p.21-24]

Rules, responsibilities and specific requirements

Clauses 46,48 and 68 of the Services Act at the time required involvement, relevant conversations and legal decision on return and period; Clause 140 (7) required a plan of action on repatriation. The relevant rules on notification and complaint, as well as Sections 22- 25 of the Administrative Act, ensured the possibility of understanding and testing the decision. The point of criticism must be taken from the particular lack of action to the particular loss of the guarantee. It must not be converted into a finding that all four children should have been placed longer or not have been placed at all.

Demand: Publish an anonymised date/implementation account for the 12 decisions; produce missing original plans and corrections in the case record; examine support and reparation in the specific cases affected by errors; identify management responsibility for ensuring that new dates, standard references and declared changes were not confused with actually fulfilled safeguards. Individual criminal responsibility requires further investigation of specific duty and culpability. This opinion documents no criminal decision.

19. The case of instruction: separation, time and jurisdiction

An unlawful decision may take effect long after the instruction is amended;

The Court of Impeachment's judgment of 13. December 2021 makes it possible to link an established unlawful public scheme with specific families, separation dates and subsequent handling. The original instruction was changed on 18. March 2016. Separations already carried out continued without renewed assessment, and cases were only reopened on 28. April 2016 for consultation with the parties. Thus,**41 calendar days elapsed from the change to reopening**. A corrected instruction was not in itself redress for the people already separated. [IF01, p.142]

The court's majority found violations of ECHR Article 8 and general administrative-law principles in decisions separating **18 couples** during 10. February-18. March 2016. This included missing individual assessment and insufficient fact-finding. For **at least three couples, nos.6,12 and 15**, the majority also found a substantive violation: on the available material, these couples could not lawfully have been separated even if procedural rules had been followed. These are independently documented violations, not dependent on a calculated error percentage. [IF01, pp.138-141]

Three populations should be distinguished: **24 pairs in the overall table of the judgment; 18 pairs in the majority assessment of decisions under the initial instruction; at least three pairs with the material expressly established; infringement;**. The three groups must not be merged. A previous mention of 32 pairs is also not a substitute for the judgment's limited table of actually separate pairs.

All 24 courses in the judgment schedule

The daily figures below represent the judgment's own duration column. The nature of the end point is crucial: the transition to integration and departure is not necessarily evidence of actual reunification. A dash in the original is retained as unknown duration; it is not zero days. The table provides evidence of the progress made, not an individual judgment that the entire period was unlawful. [IF01, p.112-116]

Number of pairs	Actual separated	Registered end point	Days in the judgment; table	Children / Pregnancy in the table;	What the end point documents
1	18.02.2016	03.10.2016	228	None specified	Transition to integration; continued separation decided in July
2	16.02.2016	30.06.2016	135	None specified	Transition to integration
3	18.02.2016	25.05.2016	97	None specified	Together accommodated after changed age setting
4	17.02.2016	27.04.2016	70	None specified	Together accommodated after changed age setting
5	18.02.2016	Request for continued separation in July	Unknown	None specified	Later wish; no precise duration in the original
6	16.02.2016	30.07.2016	165	Pregnancy, probably from March	Women's transition to integration; men's about one month earlier
7	16.02.2016	19.05.2016	93	None specified	Together accommodated after 18th birthday
8	31.01.2016	Request for continued separation in June	Unknown	None specified	Separation before instruction; continued after 15th birthday
9	16.02.2016	01.05.2016	75	Pregnant	Transition to integration

Number of pairs	Actual separated	Registered end point	Days in the judgment; table	Children / Pregnancy in the table;	What the end point documents
10	19.02.2016	10.05.2016	81	None specified	Together accommodated after 18th birthday
11	04.03.2016	23.05.2016	80	One child, born 2015	Together accommodated after 18th birthday
12	04.03.2016	07.07.2016	125	One child, born 2015; pregnant	Transition to integration
13	02.03.2016	13.10.2016	225	One child, born 2015	Together after further consultation; continued separation decided in July
14	02.03.2016	14.07.2016	134	Pregnant	Together accommodation after consultation
15	17.03.2016	11.07.2016	116	One child, born 2014	Together accommodation after consultation
16	11.03.2016	12.07.2016	123	Pregnant	Together accommodation after consultation
17	07.03.2016	11.07.2016	126	Pregnant	Together accommodation after consultation
18	01.04.2016	23.08.2016	144	None specified	Exit; continued separation decided in July
19	17.11.2015	01.05.2016	Unknown	Pregnant	Transition to integration; later cohabitation explicitly unknown
20	13.05.2016	03.11.2016	174	None specified	Together after further consultation; continued separation decided in July
21	29.06.2016	02.11.2016	126	None specified	Together after further consultation; continued separation decided in July
22	20.07.2016	16.08.2016	27	None specified	Together accommodated after 18th birthday
23	15.08.2016	22.08.2016	7	Pregnant	Together accommodation after consultation
24	19.04.2016	11.11.2016	206	One child, born 2016	Together according to the wishes of the woman; original request in anticipation of compulsory separation

The 21 given durations have a span of **7-228 days**. The three undisclosed durations may not be completed by guessing an end date. The five registered common children are found in pairs 11,12,13,15 and 24. Eight pairs have indicated pregnancy: 6,9,12,14,16,17,19 and 23. Par 12 belongs to both categories. There is therefore a need for **12 pairs with child and / or pregnancy;**Not 13. The 24 pairs include 48 partners; the five already born children provide at least 53 people described in the family population of the form. These are not 53 court-determined offenses. Later births are not counted without birth and time information.

Age and consent must be checked in each course. Pairs 3 and 4 changed the age of the woman to 18 and 19, respectively. There are also other changes in age levels. A later desire for continued separation does not prove that the original separation was desired. Par 24 specifically shows the problem: the desire to learn to fend for themselves was explained in the expectation that the authorities would nevertheless separate the couple. It requires an independent review of whether consent or wish was free and informed. [IF01, p.113- 116]

Three materially illegal interventions with concrete time and impact chain

Progress	Documented knowledge before / during the intervention;	Later treatment	Consistency and precise evidence status
Par 6	Complaint 15 February with announced hunger strike, school absenteeism and possible self-harm; separation 16 February, approximately 60 km between centres	22 March men were told of fear of health and depression; 26 May women were considered to be accompanied by men; various dates of integration 27 June / 30 July	165 days in the form; information on serious burdens consists of documented statements in the judgment's account of the facts, not an independently verified diagnosis
Par 12	Child born 2015 and pregnancy; Operator's Schedule 22 February described the risk of crisis action, falling well-being and retaumatisation; complaint 26 February described ongoing psychological treatment and support needs	The father moved 4 March, about 8 km; consultation 20 June; accompanying assessment 21 June; integration 7 July	125 days in the schedule. The child lost daily life with the father. The paragraph of the judgment on material infringement has been verified; the risk indication is not proof that any damage was caused
Par 15	Local Social Coordinator on 1 March described joint childcare, lack of support networks and risk of traumatisation; the couple did not want separation	Father moved 17 March, approx. 37 km; first stated renewed hearing 17 June; decision on common accommodation 6 July; physically together 11 July	116 days of registered separation; 5 days from the reunification decision to actual common accommodation. The woman was still under 18 at the reunion

Source chain: simultaneous forms, complaints, interviews and decisions reproduced in the original case-law p.116-118 → Independent controlled material grounds p.139 → This report's time and impact assessment. The underlying original forms and clinical files are not identical to the reproduction of the judgment. Therefore, the report does not use the reproduction as an automatic proof of all the psychological damage referred to. On the other hand, it documents that such information was provided and that the court found the separation itself to be materially contrary to the Convention.

For couple 15, there were **92 days from physical separation to the stated hearing on 17. June**, then 19 days to the decision on 6. July and another 5 days until actual shared accommodation. For couple 12, there were 108 days from 4. March to the hearing on 20. June. For couple 6, there were 65 days from the accompanying-person assessment on 26. May to the woman's integration date on 30. July; this calculation must not be called 65 days from a return-home decision to reunification, since the two events are not documented as such. All calculations are calendar differences excluding the starting day.

Responsibilities cannot be read out of the administrative end date

The conclusion is that there is a specific public example of **intentional unlawful administration of separation**, and that changing the general instruction did not immediately remove its effect on the separated families. The evidence is the original judgment's 18 decisions, at least three substantive violations and the documented waiting time. The relevant rule is ECHR Article 8 and § 5, subsection1 of the Ministerial Responsibility Act. The act was an instruction allowing no exceptions; the omission was the lack of individual examination at the intervention. The departure consisted in the established unlawful administration. The consequence was separation and loss of daily family life. The Court of Impeachment established personal ministerial responsibility and 60 days' immediate imprisonment. Citizens' claims for redress and any reparation must still be assessed separately; the Minister's punishment must not be counted as compensation to the families. [IF01, pp.138-149]

The period of personal culpability established by the Court of Impeachment ended on 18. March 2016. That date is **not a determination that all subsequent days of separation were lawful**. Page142 of the judgment specifically describes continued separation without a new assessment. Personal ministerial responsibility, the agency's duty to act and State responsibility are different examinations. The report must therefore preserve the later actual intervention periods even where the particular Minister has not been convicted in respect of them.

Combining with private abduction cases

The sentencing practice concerning private persons in chapter 9 includes 20 days' suspended imprisonment for withholding two children for approximately1½hours,40 days' suspended imprisonment with community service for 33 days and 6 months, of which 3 suspended, for almost 10 months. Compared with the Court of Impeachment's 60 days' immediate imprisonment, the material shows that both private and public interventions may lead to personal criminal liability. The private cases mentioned are summarised in the Director of Public Prosecutions' practice overview, while the Court of Impeachment's judgment has been read in the original. [R06; IF01]

A penalty per day of separation cannot be legally calculated by this row. The content of the offence, the guilt, the duration, the situation of the children, the injury, the relationship, other offences and the length of the criminal proceedings are not the same. The concrete

comparison shall instead check: who removed or detained the child / family member; what right was missing; when the person knew or should know; how long the intervention continued; what circumstances were investigated; and what decision was taken by the competent forum.

The strong accountability demand is **consistent investigation of documented acts and duties**, including where the perpetrator acts through a public body. Protection against personal recourse claims, absence of suspensive effect and a supervisory recommendation do not provide legal authority for continuing intervention. If a public intervention continues after knowledge that its basis is missing, the new omission must be examined separately. A low or absent personal sanction does not, on its own, determine whether the citizen suffered a violation.

Mink: actual ex post liability assessment shall include:

The subsequent chain of responsibility changes what can be counted as a final personal sanction. The Head of Department of the Ministry of State received a disciplinary warning on 24 August 2022. The original decision of 23 March 2023 revokes the warning after a re-evaluation, which takes into account the report of the interrogator on the Chief of Police. It cannot therefore appear in a register as a continuing warning. [IF02, p.1-4]

The inquiry leadership's published part 8 of 10. February 2023 found no basis for disciplinary punishment of the National Commissioner of Police. Among other things, the report proceeded on the basis that the press-conference statements were not a legal instruction to the police and assessed his specific duties to act. This is a later disciplinary assessment in a delimited individual case; it is not a judgment that every culling, every actioncard or all authorities' communications were lawful. [IF03, sections8.1-8.3]

The Ministry of Justice’s original withdrawal decision concerning the Permanent Secretary likewise describes why the reprimand is not maintained. The Ministry’s statement of 24. March 2023 also reports withdrawal concerning a Head of Division. The account must preserve the original grounds for criticism, the initial response and the later outcome in three separate fields. [IF04; IF05]

The Danish Parliament’s report of 8. July 2022 is the subsequent parliamentary consideration and contains different majority and minority assessments. It must be read as such. It does not determine officials’ disciplinary cases, and political criticism must not be counted as a criminal conviction. [IF06, pp.1-2,21-27]

20. Tibet: rights, proof and responsibility

The result and the different responsibilities

The Tibet movement demonstrates that public servants used police force to prevent peaceful political expression without the necessary legal basis. Tibetan Commission I denotes concrete orders and actions in 2012 and 2013 as clearly illegal and identifies incorrect or misleading information to the Danish Parliament. The Tibetan Commission II alters the assessment of the role of the Ministry of Foreign Affairs and of PET in particular because it receives material that the first Commission had not received. The final sentence of 2025 concerns the false explanations of two police officers in court in 2013. It is not an overall criminal sentence against all interventions, employees or ministers. [TB01, TB02, TB04]

For citizens, the violations consist of removed flags, relocation, screening and obstruction of visible demonstration at the relevant time. A demonstration possible only after the foreign delegation's departure does not restore the lost opportunity for expression. Subsequent commission criticism and a suspended sentence therefore document different responses; they do not in themselves prove full redress for each affected citizen.

What original evidence changed the case?

Search the chain	Original documentation and locator	Documented meaning
General order in 2012	Tibet I, Volume 2, printed pp. 352-353: Operation Command, Tactical Command and Briefing, compared with the actual interventions	Visibility of the Chinese delegation was targeted without any concrete hazard assessment; the Commission considers that there is no legal basis and a breach of freedom of expression and assembly.
Specific interventions in 2013	See also, p. 353 and 371-372, for Avedøreværket, Rigsdagsgården and Amalienborg.	Absence of a general written order for the entire visit does not make the specific foreclosure orders legal
Information to the Danish Parliament	See also, p. 354-355: identified questions and presentations in 2012-2015	Some answers repeat previous misinformation. The number of repetitions is not the number of independent proofs
Role of the Minister for Foreign Affairs	Tibet II, Volume 2, p. 1110-1118, including mails from 2009 and Claus Grubes mail of 12 June 2012	Commission II rejects the previously limited description of the role of the Ministry. In its view, trade and diplomatic considerations were overruled by the Constitution and the Treaty on European Union. EMRK
Role of PET	The same, p. 1118 - 1121, including the minutes of Tuesday meetings and briefings	Material missing by the first Commission supports the dissemination of wishes to avoid demonstrations and loss of reputation; PET recommendations were perceived in police work as orders
Kim Lykke Østergaard's knowledge	1125- 1128, read in conjunction with Tibet I, p. 365- 366	The assessment of the first Commission is amended with the later material, including a relationship from 2004 and an email dated 24 May 2013. This is a different assessment of evidence, not a new criminal conviction.
False explanation	Østre Landsret 29 October 2025, p. 18-21, S-3118- 23	The court compares witness statements with surgical material and audio / video; two defendants are sentenced for certain statements, while other parts are dismissed.

The underlying emails, plans and recordings are discussed here through the commissions' and judgment's documentation. The report does not claim independently to have verified all raw recordings or every annex. On these points, independent verification consists of reading the original reports' responsibility assessments and the full original High Court judgment, and checking whether the result, scope and later changes are reproduced correctly.

The chain of incorrect information of the first investigation

Tibet I identifies on pages 354- 355 parts of answers to questions 865, 875- 880 and BL-BN from August 2012, question 1119 from October 2012, ministerial statement of 26 June 2013, questions 650, AC, 864- 865 and 868 from April 2014, questions 866 and 914-916 from December 2014, and the briefing of 18 September 2015 as incorrect, misleading or incomplete. The 2013visit highlights questions 895 and 956 as well as BI-BL. These are concrete references to documents, not an allegation that all the information contained in each reply was false.

The Commission's examination of the case on p. 362 also shows delayed investigation of already available material: Central audio files were only examined in the summer of 2015 following the national court's opinion of 29 April 2015. Material on golf vehicles was not included in the briefing to the Ministry of Justice and, following a request in February 2014, only two of three relevant persons from the King's Garden were identified in February 2015. These are concrete omissions in the information of the case, which extend the gap between intervention and responsibility.

On the other hand, p. 358 and 360 contain the first Commission's premise that the Ministry of Justice and the State Police could, as a starting point, rely on police contributions. This paragraph is reproduced as the Commission's assessment; it is not used as an independent presumption of truth in this report. When information runs from the executing police force through the State Police and the Ministry of Justice to the Folketing, the source remains the same. More official reproductions of information do not create more independent evidence.

Study number two: documents were not necessarily gone simply because they were not delivered

The final control by the Commission II describes the following on printed pages 99 to 102 of Volume 1:

- The State Department's recovery database contained additional relevant employees' mailboxes, which were subsequently provided.
- A relevant mailbox from the Ministry of Foreign Affairs was overlooked due to a spelling error in the name; the extradition was corrected.
- The National Police had indicated that 87 former employees' accounts were not available in an external mail system. The checks showed that the search required the email addresses of the persons concerned. When Johan Reimann's address was delivered, correspondence could be found. A typo error had also hidden Kim Lykke Østergaard's correspondence.
- A further 54 of the 87 employees were obtained and 15 of them had mail accounts which were provided. The Commission did not find any evidence of interest in these later correspondence. This does not alter the documented error in the previous search.

Figures 87, 54 and 15 are staff / search units with overlapping, not citizens with established rights breaches. They must also not be added to 156 missing mailboxes. Thus, a statement of missing material must be tested against the search method and the systems actually available before it is treated as a documented deletion.

Volume 2, pp. 1137-1138, separately emphasises that central documents, especially Grube's email and Tuesday minutes, were unavailable to the first commission. Commission II finds retention rules insufficient to secure all relevant investigation material. This is documented criticism of evidence preservation. It does not, on its own, establish a proved allegation of intentional destruction by a named employee.

Personal liability and the specific limitations

Person or group	Tibet I / Tibet II	Actual documented reaction or delimitation
Claus Hjelm Olsen	I, p. 364- 365: liability assessment for clearly unlawful orders and knowingly incorrect information	The Commission I finds the basis for disciplinary responsibility; this is not a disciplinary decision itself.
Andrew Jerome Henrik Oryé	I, p. 369-370: clearly unlawful orders and incorrect contributions to reply	The same distinction between Commission assessment and actual response
Mogens Norup Lauridsen	I, p. 363-364; II, p. 1124- 1125	Criticism of strategic management and lack of correction; the Commission's graduated assessment of responsibilities must not be transformed into a judgment
Martin Bille Hermann	II, p. 1117 - 1118	New critique. The Ministry of Foreign Affairs decides on 1 April 2022 not to open a staff case; the source is the Ministry's own communication [TB06]
PET employee KF0796	II, p. 1120 - 1121	New basis for criticism. The originals in question do not in themselves document a subsequent disciplinary decision.
Kim Lykke Østergaard	II, p. 1125- 1128	Modified basis for criticism against I; separate final staff reaction must be documented before counting
Disciplinary officials	II, Volume 1, p. 39-40; Volume 2, p. 1137-1138	The Commission limits its individual judicial review. Lack of assessment is not material acquittal
Two indicted police officers	Final judgment of the Landgericht of 29 October 2025 [TB04]	Each 30 days of conditional prison for false testimony; some statements are dismissed

The Communication of the Ministry of Foreign Affairs of 1 April 2022 states that Hermann was the only one of the collective referred to, who was still employed by the State. The Ministry decided, on its overall assessment, to waive a staff case and to continue to declare his trust in him. It documents an actual decision on no staff case. The confidence of the Ministry is not a new original proof that repeals the criticism of the Commission.

Commission II does not exclude the institutional responsibility of the State or the illegality of the specific measures by restricting the assessment of persons. It states that a possible criminal liability for the historical circumstances must be regarded as obsolete and that the course of time will have a disciplinary effect. There is no general statutory five-year period for all disciplinary responsibilities. The practice of age and resignation must therefore be described precisely, rather than as a general rule of immunity. [TB02 Volume 1, pp. 35-40]

The two types of criminal matter must be kept separate: the Commission's discussion of the limitation period relates to the acts and breaches of its obligations which it has a mandate to assess. The subsequent sentence concerns a false explanation in court on 13 August 2013 under Section 158 of the Criminal Code. The fact that a commission renounces an earlier assessment of liability does not prove that any subsequent conditions of indictment for another crime have lapsed.

The final sentence and the importance of the 12 years

The original judgment of 21 pages has been published in the judgment database as final. The court considers that the guard at Højbro Plads should be carried out even if no demonstrators ran towards the Palace Square. By explaining the decisive condition differently, the defendants gave false explanations. For one of the contested statements, the number of votes was 4-2; this was the proof of that particular statement. It is not transformed into uncertainty about all other documented conditions. [TB04, pp. 18-20]

The court rejects exemption from punishment under section 159, subsection 1, in the specific circumstances. This is particularly relevant to immunity: the judgment shows actual criminal review of public employees despite the very lengthy process. The court upholds 30 days' suspended imprisonment for each and states that the lengthy period before the district-court decision was already reflected in sentencing. The Treasury was ordered to pay district-court costs; the defendants must pay their own defence costs before the High Court. The judgment does not document service of an immediate prison sentence. [TB04, pp. 20-21]

Start and finish	Calculated calendar days	Unit and meaning
Actions June 15, 2012 → Tibet In December 18, 2017	2.012	Time for the first Commission report, not the duration of detention
Intervention 15. June 2012 → police compensation notice 18. April 2018	2.133	Time for the documented offer of reimbursement
Tibet In 18 December 2017 → publication of Tibet II 28 March 2022	1.561	Additional study time after first result
Action 15 June 2012 → public surrender of Tibet II 28 March 2022	3.573	Almost ten years for the extended documented assessment
Tibet II 28 March 2022 → Parliamentary report 17 May 2023	415	Time for the political treatment of missing material, among others
False explanation August 13, 2013 → Final national court judgment October 29, 2025	4.460	More than twelve years for the documented final sentence
Urban judgment 1 November 2023 → National Court judgment 29 October 2025	728	Calendar length of the proceedings

The date of 28 March 2022 shall be used here for the publication: the original notification by the Ministry of Justice indicates that the report is made on that day and the annexes to the Folketing have the same document date. On the other hand, the Ministry of Foreign Affairs's subsequent communication refers to a report of 25 March. This dating difference does not change months to years of delay, but the start / end definition is explicitly maintained. The figures are own date calculations with end date minus start date.

The Independent Police Complaints Authority’s investigation and the indictment are separate temporal links. Commission II, volume 1, pp. 46-47, describes cooperation and postponement of the criminal case after the commission’s work resumed. The prosecution service’s announcement of 28. April 2022 maintains the charges against two managers after the second report. The two announcements and the judgment are different procedural stages of the same sequence and must not be counted as three new criminal cases or six new perpetrators. [TB08]

Compensation: claim, offer and payment are three different numbers

The original message of the Copenhagen Police of 18 April 2018 states that eight people had made demands and that 20.000 DKK would be offered to each. For three, the Financial Committee was asked to waive the limitation period. The documented offer is calculated to be DKK 160.000 for eight people. The notification does not in itself demonstrate that all offers were accepted or the amounts paid. [TB07]

The reported number of eight is not a count of all demonstrators whose rights were violated. The commissions’ count of more than 200 official visits is likewise an investigation universe, not 200 documented unlawful interventions and not 200 compensation recipients. The second commission’s specific assessments of unlawfulness also include visits in 2002 and 2004, before this report’s twenty-year period. They are used as documented background to the culture and authorities’ knowledge but must not be counted as new interventions in 2006-2025. [TB02, pp. 1121-1124]

Commission II informs 108 interrogated or re-interrogated persons over 39 days of questioning. Protocol numbers with repeated interrogations are not a higher number of unique witnesses. On the basis of its own statement, the Commission did not call witnesses outside the authorities; a few citizens' inquiries were made in writing. It limits what direct citizen explanation this particular study contains. On the other hand, the later sentence also contains a demonstration's testimony. The boundaries of Commission II may not be transferred to the trial. [TB02, Volume 1, pp. 45-47; TB04, pp. 15-16]

Commission II’s recorded expenditure up to and including 31. December 2021 was 57.554.015 kr.: operations 33.750.428 kr., IT 14.141.329 kr. and assisting counsel 9.662.258 kr. The sum reconciles. It is not the commission’s final total cost in March 2022, does not automatically cover all authorities’ internal work and is not compensation to citizens. The institution’s investigation expenditure and victims’ redress must appear in separate accounts. [TB02, volume 1, pp. 103-104]

Treatment of the Folketing: a opt-out of further investigation

Report No 1 of 17 May 2023 demonstrates that the majority S, V and M did not wish to further examine why the first Commission lacked material. The majority referred, inter alia, to new procedures and to Commission II's discussion of the framework for personal responsibility. The minority wanted a further study, including of responsibility for missing material. [TB05]

It is a political decision on the continuation of the investigation. It is neither an individual acquittal nor an original reconstruction of who failed to deliver. The Commission's representation on pages 1132- 1137 of the reforms described by the ministries and the police document the authorities' own information on measures; it is not a fully independent measure of whether the recurrence risk has actually been eliminated.

Legal argument and concrete legal order

Conclusion: Unlawful screening from view and misleading information to oversight bodies require separate redress and scrutiny of responsibility; time taken may weaken both the citizen's remedy and subsequent personal accountability.

Consignment and original proof: The Commission's statements on legal security considerations and the absence of knowledge must be tested against operating commands, simultaneous mails and recordings. The documents identified changed the assessment of Commission II and the original judgment uses recordings and explanations for judgment.

Discrepancy: Keeping political messages out of delegation escorts' field of vision is not the specific risk assessment required by the legal powers of intervention. Repeating incorrect information through several authorities does not make it correct.

Rule: Sections 77 and 79 of the Constitution, ECHR Articles 10 and 11 and sections 7-8 of the Police Act protect the expression and assemblies concerned. Conditions for personal criminal responsibility and duties of office are examined separately. The State's duty of effective response and protection does not cease when an employee leaves.

Action and deviation: The police gave and performed clearly illegal orders. Deceptive contributions were subsequently made and relevant evidence was only obtained through a new investigation. Some aspects of personal responsibility were then limited by time and resignation; others actually led to punishment.

Consequence: Citizens lost their opportunity at the crucial time, while questions of investigation and responsibility spread over many years. The precise financial and health damage to each individual requires individual documentation; no national injury figures shall be recorded.

Responsibility and demands: Authorities should document all identified interventions, all amounts actually offered and paid, the reasons for each personnel response, expired opportunities for accountability, and independent verification of the preservation and handover of evidence. On a documented basis, the citizen’s specific claims may include acknowledgment of the violation, compensation/damages, access to information, correction of authority information and effective safeguards against recurrence. These claims are analytical legal consequences, not an assertion that everyone affected has already been awarded them.

21. Stateless: breach of the Convention and 14 years civil review;

The state-aid case demonstrates that a correction of a government practice may occur several years after the intervention and that a subsequent judgment may reject compensation on the grounds of limitation without thereby legalising the original breach of the Convention. The Commission's annexes to the case, its assessment of responsibilities, the Ministry's staff releases and the judgments must therefore be read as different levels of evidence. The case covers both children and young adults; the figures below are not an overall measure for all stateless persons who the State has failed.

Control of action accounts

Annex 18 to Statsløsekommissionen's report, volume 9, printed pp. 2993-2997, has been reviewed row by row. Several rows concern multiple children, while the same case number may have several refusals. The report's account therefore uses both individual decisions and distinct case numbers. The machine-readable annex statsloese-indgrebsregnskab.json contains year, case numbers, Convention category, later citizenship year and source reference; annual figures have not been converted into invented dates. [SL01]

Population and time	Number	What the number counts
Applications received 1992-25 January 2011	758	719 in the child column and 39 in the 1961st Convention column; applications, non-observed violations;
of which received 2006-25 January 2011	710	672 in the child column and 38 in the 1961Convention column
Rejection 1995-2010 in Annex 18	50	Personal decisions after multi-person series have been folded out
Different case numbers behind the 50 refusals	44	The same person's repeated refusal is counted once here
Refusal within 2006-2025	40	6 in 2007, 9 in 2008, 24 in 2009 and 1 in 2010; defined by year of refusal
Different case numbers behind the 40 refusal period	35	12 in the Convention on the Rights of the Child category and 23 in the 1961 Convention category
Personal decisions in the Convention classes of the period	12 + 28	Refusals under the Convention on the Rights of the Child + refusals under the 1961 Convention; not 40 different people
Delay without refusal received from 2006	5	Case numbers 52, 62, 65, 66 and 696; separate from the 35 refusal numbers
Union of the refusal and delay numbers of the period	40	35 + 5 without overlap in this Annex; not a National Offer Statement

The category of the Annex is not a full age distribution for each intervention. Some applications were submitted while the applicant was a child and the birth right was only granted after the age of 18. Colonial headlines and the Commission's text do not always use identical age designations. The two categories of Convention are therefore maintained as the categories of the source. Case 80 contains a separate security issue; the position in the non-contractual statement of refusal contained in the Annex is not in itself proof that the refusal was also clearly unlawful under national law. [SL01, SL02]

The five expressly quantified delays without refusal are respectively 18, 12, 3, 6 and 6 months: a total of **45 person-months**. This sums five people’s delays,rather than 45 months of one shared calendar timeline. Case 65 concerns a younger child whose processing was tied to the sister’s documentation issues;the sister is not invented as another separate victim in this accounting. The appendix also includes case 35 with six months’ delay in 2003-2004. It is retained in the historical appendix,but not in the 2006-2025 total. For the refusal group,the commission’s findings describe delays of six months to six years and an average of approximately 22 months. That average concerns the broader historical group and must not simply be applied to the 35 distinct refusal case numbers within the report period. [SL01, SL02, SL07, p. 8]

Resumption is not the same as actual birth right

The Commission's examination shows that the Authority's initial information on the clean-up did not cover the whole of the found sample. Of 44 previous refusals / counselling cases, 13 had already been resumed or completed with the right of birth before the clean-up in 2010. Of the remaining 31, 27 were resumed in 2010; 23 were actually introduced in December 2010, while four were only admitted later. A further four people were not contacted directly until 2011. **31 potential retake, 27 retake and 23 actual retake in December are three different stages.** [SL01, printed pp. 2736-2747]

In 2010, a total of 194 stateless persons were included in naturalisation bills:152 in the child group and 42 in the adult group. Of the 42, 26 had applied as minors. The 194 are not 194 documented compensation or reparation cases; the group also includes applications without earlier refusal. Likewise, the 35 persons in the separate naturalisation Act of December 2010 form a legislative group that cannot be added to the 194 or the 44 without person linkage. [SL01, printed pp. 2736-2747]

Case 696 shows that the clean-up did not immediately stop all the consequences. The Commission notes six months of further delay in 2010-2011. Old standard letters and documentation requirements continued to be used even after the practice had been corrected. Therefore, the requirement for declarations etc. cannot be described as a purely linguistic error when the proven result was later citizenship. [SL01, Annex 18 and printed pp. 2736-2747; SL06]

SL- K01: The ministerial decision continued the antiConvention practice

Conclusion → concrete statement → proof → deficiency. The Commission considered that it was decided to continue the treatment according to general naturalisation requirements, while a Nordic comparison was examined. Its reported notes and progress show that questions concerning the special rights of the stateless had been submitted to the Minister in 2008-2009. The wording of the warnings was changed during the internal presentation. The Commission considered that it was not certain that the Minister actually understood practice as a breach of the Convention at the relevant times. The local uncertainty about her knowledge does not rule out the Commission's finding that the practice was contrary to international law or that the decision contributed to its continuation. [SL01, printed pp. 2785-2796 and 2809-2813]

Rule → action → departure → consequence. Article 7 of the Convention on the Rights of the Child and the 1961 Convention's special rules for stateless people born in the territory limit the conditions the State may impose. The Ministry's continued application of ordinary requirements produced new refusals and delayed citizenship. Delayed entitlement to citizenship matters for identity, belonging, travel documents and full civic status. Loss of voting rights requires that the individual met the other electoral conditions during the relevant period; it is not automatically attributed to every child.

Responsibilities → requirements. The Commission's mandate did not include a legal assessment of ministers' responsibilities. The Folketing's report of 4 March 2016 subsequently contains serious political criticism from a majority, including of poor information to the Folketing and the cleanup. Political criticism is not a punishment. The long-term requirement is the full separation of the State's contractual liability, the conditions of the Minister's liability and the individual claims for compensation; the absence of a ministerial judgment cannot be used as evidence of legal interference by citizens. [SL06]

SL-K02: Warnings were weakened and employee responsibilities were delimited differently

Conclusion → statement → original proof. The Commission considered that Claes Nilas and Kim Lunding had demonstrated facts on the basis of which disciplinary responsibilities were assessed. The criticism of Nilas includes that he should have warned the Minister clearly and ensured evidence of the advice. The criticism of Lunding includes continued refusal after knowledge of the problem, suspension and inadequate follow-up, advice on continued general requirements and inadequate public guidance. The Commission links the management process with additional waiting time. [SL01, printed pp. 2809-2813 and 2822-2828]

In 2008, the Commission found nine refusals, five of them in the adult and four in the children's group, as negligent misconduct, but not serious enough for disciplinary proceedings. For 22 cases dealt with under the Ministerial Decision of 23 February 2009, individual service offences were not established on the basis assessed. The Commission's reasoning specifically related to the clarity of national law, the understanding of employees and the basis of the order. It is not a general rule of immunity and it does not annul the very practice of international law. [SL01, printed pp. 2787-2796]

Omission → meaning of the evidence. Several dismissed officials were not subject to individual liability assessment. According to the report, Dorit Hørlyck wanted to be assessed, but was nevertheless excluded from this track of responsibility following the Commission's delimitation. Absence of assessment shall be in the absence of assessment. It is neither an acquittal nor evidence of a sanction. Described acts can still be tested on the document basis without the report inventing a subsequent disciplinary outcome. [SL01, printed pp. 2787-2796]

Response → specific status. On 21. December 2015, the ministry announced it would take no further action against Nilas on the available basis; he took up an advisory post in SIRI on 1. January 2016. On 11. January 2016, the ministry announced corresponding closure for Lunding, who became an adviser in Udlændingestyrelsen. These are two verified decisions not to proceed, made by the employing authority. The public announcements do not document an independent disciplinary judgment or a punishment subsequently substituted for the commission's criticism. [SL03, SL04]

Time accounts: citizens' rights and the end of the track

Start and finish	Calendar days	What Time documents
4 August 2008 → 27 January 2010	541	Between the central stages of the decision and orientation process; not the same delay for each applicant
Proceedings 10 July 2012 → national court judgment 28 May 2025	4.705	Time for the first full judgment of the 33 applicants
Proceedings 10 July 2012 → Supreme Court judgment 21 August 2026	5.155	Time for the last appeal decision for the 22 who appealed
Report 17 August 2015 → Ministry of Finance for Nilas	126	Documented time for public staff closure
Report 17 August 2015 → Ministry of Finance for Lunding	147	Same for the other leader

The days are the report's own calendar calculations from dated sources. The 5.155 days are not 5.155 days without citizenship for every claimant. Several had received citizenship before proceedings began, but still awaited review of the compensation claim. The comparison shows that the two managers' public personnel tracks were closed within months of the commission report, while citizens' civil review reached its latest appeal decision only more than 14 years after proceedings began. [SL01, SL03, SL04, SL07, SL08]

The Commission pointed to the statute of limitations on the actions under investigation and discussed the importance of the past for disciplinary proceedings. It is a concrete time barrier, not a general criminal immunity for civil servants. The limitation period must be linked to the possible criminal offence and to the legal proceedings before it; the reference to the report of two years is not uncritically transferred to any present-day criminal offence. [SL01, printed pp. 2787-2796]

SL-K03: Civil judgments only remedy part of the documented course

The Eastern High Court judgment of 28. May 2025, BS-4484/2012-OLR, covers **33 claimants**. They are not 33 new Convention violations on top of the commission's cases. Another judgment mentioned in this judgment and the Supreme Court's 2018 annual report involved 17 other claimants: ten without an award on the delay ground, six awarded 10.000 kr. each and one whose claim was time-barred. The two litigation groups therefore comprise 50 distinct claimants according to the judgment's account of separate groups; links to the commission's 44 case numbers have not been published as a complete person key. [SL05; SL07, pp. 4, 124-129]

In 2025 claimants 3, 20 and 23 were each awarded 10.000 kr. with litigation interest from 23. November 2012. For nos. 3 and 23 the Ministry had offered the same principal sum on 6. December 2019. For no. 20 the high court established a delay based on application on 14. November 2008 and citizenship on 28. December 2010. Three awards amount to **30.000 kr. in principal**, not an account of all consequences. No party was ordered to pay another's costs in the high court. [SL07, pp. 126-129]

The court had mainly negotiated the case in 2021-2022, but it had to go back with new judges on the grounds of inequity. The court awarded its own affairs and the Ministry awarded DKK 50.000 from the Treasury in accordance with Section 320 of the Code of Criminal Procedure. The applicants were not granted the same concession because the court referred to their legal process and to a lack of own costs at the time of the procedure. **Free process does not eliminate the extra years of waiting.** The 50.000 DKK is a legal cost response to the Ministry, not compensation for the people concerned. [SL07, p. 129]

The judgment of the Supreme Court of 21 August 2026, B-36329 / 2025 -HJR, comprises 22 applicants. It shall maintain the suspension of their further claims. The groups of the judgment shall be counted precisely:

Group in the appeal of the Supreme Court	Number	Facts of the judgment
Nos 4, 5, 6, 7, 12, 13, 21, 22 and 24	9	The Court of First Instance did not find any delay in relation to other applicants
Points 1, 2, 8 and 25	4	The Ministry had recognised that prior right of entry was possible; the requirements were rejected as obsolete
Nos 9, 10, 11, 14, 15, 16, 17, 18 and 19	9	Any claims were already out of date; not a positive finding of actual delay for all nine
Grants to the 22 of this appeal	0	No further compensation following the judgment of the Supreme Court

The Ministry's payment to the three successful claimants appears in Højesteret's reproduction of information supplied by the Ministry. This is a different level of documentation from independent payment records. Højesteret did not find the additional alleged violations of ECHR Articles 3, 8 and 14 and did not grant the claims concerning personal data or the application fee. The court ordered the Treasury to pay 100.000 kr. in appeal costs to the Ministry under legal aid; this is not recorded as a private debt of 100.000 kr. for each claimant. [SL08, pp. 1-7]

Review of the premises. The High Court assumed an ordinary processing time of 16 months to two years from the actual application, referring to earlier practice. The distinction between ordinary applicants and people with special Convention rights thereby became central. The High Court states that the ministry did not comply with the claimants' request of 5. November 2021 for comparative information, but found that this did not alter the outcome. Missing production is a specific evidential deficiency in the comparison basis. The report identifies it without rewriting the rejected discrimination claim as a judgment won. [SL07, pp. 124-128]

Consequence → responsibility → demand. Rejection of an acknowledged delay claim as time-barred cannot be presented as exoneration in respect of the original act. The judgments show a difference between breach of Convention law and access to individual compensation. The strongest sustainable demand is an account linking the specific Convention right, the refusal, the actual citizenship date, the documented additional waiting time and the remedy; comparative material and possibilities of reparation must be examined separately when the authority's own guidance contributed to the citizen's lack of knowledge of the right.

Documented errors, open evidence questions and claims

The proven errors are the non-contractual practices in the Commission's delimitation, the registered refusal and delays, the management and advisory errors, inadequate guidance and grubbing-up, and the documented conduct of the trial due to inequity. They must not be extended to the fact that any application from the 758 had been unlawfully processed.

Continued unresolved is a full public link between the numbers of the Commission Annex and the two legal groups, individual financial and health losses for all concerned and evidence of actual payment in addition to the reported information of the judgment. These deficiencies are concrete absences in the published material. They are not open tasks, which can be solved by counting the same people again.

The arguments are prioritised as follows: 1) the special rules provided legal protection that ordinary naturalisation requirements could not replace; 2) the actual date of correction must be documented for each person; 3) management's weakening of warnings and delayed remedial work must be attributed to specific acts; 4) criminal, disciplinary and civil limitation must be kept separate; 5) the courts' refusal of further compensation must not erase the original Convention violation from statistics or historical responsibility.

22. Mink: legal, management and staff actions

The citizen's intervention must be tested independently

The strongest proven criticism is that the authorities' knowledge of the lack of legal basis did not stop communication that healthy crews outside the safety zones should be killed. The report of the Mink Commission links the government's decision to the letter of the Food Authority and the police's phone calls. Subsequent decisions on employee responsibility relate to defined duties of action. They are not an overall decision that each citizen's intervention was lawful. [MK01, kap.8; IF03-IF05]

In the report's accounts, this is counted as one coherent process, with more actions, more authorities and more liability studies. Ten positive assessments of civil liability are neither ten citizens' victims nor ten convictions. The Commission shall not give a judgment on penalties or compensation.

Legal timing of the advance

Time	Information or assessment of the original source	Importance to the citizen and the testing of responsibility
3 November 2020	The coordinating committee of the government decides on the killing of all mink, including breeding animals	The Decision covers more than the previous zone regulation; its legal basis must be examined separately;
4 November	National press meetings and subsequent reports	The Commission assesses the statements as objectively grossly misleading and as an unlawful instruction; the subsequent hearing assesses the nature of the press meeting differently;
5 November	NOST meeting: lack of legal basis outside the zones	The Commission places specific knowledge on the part of key police officers; citizens do not receive similar clarification at the same time.
6 November	Letter from the Food Safety Agency and the police's original action card	The mandatory nature of the letter and the pressure of the telephone manuscript must be assessed as actual acts of authority.
7 November	New press conference maintains the effort	Continued communication must be assessed on the basis of the knowledge that the individual now had
8 November	Home shortage becomes public; urgent legislation is being prepared	Publicity is not in itself individual rectification of all growers already contacted
10 November	New message and revised action card	The Commission states that the new action card did not come into use; follow-up contact was limited to some of the contacted growers.

The timeline is based on the Commission's assessments and reproduced simultaneous documents. The original mails, letters and telephone notes are not all individually verified outside the report. This does not alter the fact that the pages of the report itself and subsequent original decisions can be compared directly. [MK01, p.632-650,708-712,727-740]

Mandatory, economic pressure and unused corrected telephone script

The Food Safety Agency's letter of 6 November also dealt with herds outside the safety zones as part of the killing. The Commission attaches importance to the wording of the letter rather than to the subsequent explanation of an invitation. It set the deadline of 16 November and an economic bonus scheme. An authority's subsequent description of its intention does not alter what was actually communicated to the citizen. [MK01, p.642-644]

The police action card concerned contact about counting. The commission’s criticism concerns a refusal being linked to loss of a bonus and the prospect that the authorities would empty the herd anyway. A formally voluntary response obtained under this pressure cannot automatically be registered as free and informed consent to the substantive operation. The legal scrutiny must therefore concern legal authority, truthful information and the effect of the specific authority communication. [MK01, pp.646-647]

According to the Commission, a revised action card of 10 November was never used. The plan to contact all first contacted growers was again restricted to those who had answered no. The Commission did not criticise the revised action card separately in the circumstances described. This limited assessment does not demonstrate that all citizens were granted individual rectification or that the germinal products were already killed. Actual

culling dates, herd information and contact notes are necessary for an account of harm by citizen. [MK01, p.648]

Criticism chain: Authority communications with the character of orders after knowledge of missing legal authority are documented → letter and actioncard identified → later labels such as encouragement or voluntariness must be compared with the content communicated → the principle of legality and duty of truthfulness require lawful, correct communication → authorities continued or failed to make adequate corrections → the citizen's decision basis and freedom of action were affected → a specific loss must be connected to the contact and actual culling → State responsibility and any individual responsibility are examined separately → demand for documented cessation, correct information and specific redress.

Ten official reviews: what can actually be documented about the follow-up

Commission Chapter 8.8 contains positive assessments of responsibility for the following ten named persons. It's a count of ratings, not a percentage of guilt. Several other officials were examined without a similar positive assessment; for example, Commissioner Lykke Sørensen was not placed in this group. She must also not be confused with the individual role of Lykke Sørensen in the instruction process. [MK01, pp.8.8.1-8.8.6]

Person	The Commission's limited criticism	Further follow-up and documentation status
Henrik Studsgaard	Press conference, continued misconduct, letter and press statement	The Ministry of the Environment published duty exemption and service study 24.8.2022. New municipal employment can be documented. The exact closing decision must be presented separately [MK04- MK05]
Tejs Binderup	Press conference, maintenance, letter and press opinion	The specific decision on employment law and any subsequent amendment have not been substantiated by the published original decision here
Paolo Drostby	Press conference and subsequent maintenance	FOB2024-5 documents that the Ministry of Food had disclosed a revocation decision with the employee’s consent, but does not identify the person. The named original decision is necessary [MK03, p.5]
Hanne Larsen	Fødevarestyrelsen’s letter of 6.11.2020	The specific decision on employment law and any subsequent amendment shall be documented by the original decision;
Barbara Bertelsen	Press conference and subsequent maintenance	Warning of 24.8.2022 revoked 23.3.2023. The original decision is published [IF02]
Johan Legarth	Press conference and maintenance; not the creation of the action card	Reprimand of 24.8.2022 revoked 23.3.2023. The original decision has been published [IF04]
Anne-Mette Lyhne Jensen	Press conference and maintenance; not the creation of the action card	Warning of 22.9.2022 revoked 23.3.2023. The original decision has been published [MK06]
Thorkild Fogde	Reaction after knowledge of homelessness and continued misconduct	On 10.2.2023, the disciplinary inquiry found no disciplinary offence within the four matters examined; service resumed [IF03, del8]
Uffe Stormly	Participation in the police's use of the actioncard of 6.11.2020	Warning 20.9.2022 revoked 2.6.2023. The National Police published the result; detailed reasons were denied [MK02-MK03]
Birgitte Buch	Involvement in police use of the same action card	Same dated outages as Stormly, separate person [MK02-MK03]

There is thus direct public original documentation of **five revoked sanctions** concerning Bertelsen, Legarth, Lyhne Jensen, Stormly and Buch, and Fogde’s separate disciplinary-inquiry outcome. This is a documented subset. It must not be presented as all later responses, all revocations or an exhaustive national account. The three food officials’ named original decisions and Studsgaard’s closing decision must be added when available; non-publication is not a zero result.

Why Fogde's results do not determine the legality of the action board

Part 8 of the interview management has been checked in its entirety. It describes four specific issues, in particular press conferences and the duties of the Head of State. It expressly notes that the action card of the National Police is not part of the facts that have been raised against him. This is a crucial delineation. [IF03, part 8, physical p.13 / printed p.124]

The disciplinary inquiry leadership classifies the press-conference announcement as a political decision to be followed by lawful authority actions, and does not find that Fogde breached the service duties examined. The commission, by contrast, had assessed the announcement as an instruction. The discrepancy is legal and specific. The report does not automatically give either assessment truth value solely because of the institution's name. Instead, it specifies the actions examined, the decision's scope and the intervention affecting citizens that still requires review. [MK01, pp.709-712; IF03, part 8]

The disciplinary inquiry's own principles include the legality requirement applying to actual administrative activity too, and a manager having to respond where there is specific reason rather than simply assuming subordinates acted lawfully. It emphasises the duty to reject a clearly unlawful instruction and seek to stop it. These principles must therefore be applied to the specific letter, telephone contact and knowledge at the time of the act. Fogde's lack of knowledge of the action card before 10. November does not determine what its authors or approvers knew on 6. November. [IF03, del8, physical pp.5-8; MK01, pp.714-717]

Ministerial responsibility: positive findings without a judgment of the Court of Justice in the mink case

The Commission considered that the statements made by the Prime Minister on 4 November were objectively grossly misleading. At the same time, it assumed that she did not know the lack of home space and expressly stated that it did not consider gross negligence. A reproduction of the report as a complete acquittal of any ministerial responsibility therefore goes beyond its investigation. Nor does it document a criminal offence. [MK01, p.738-739]

The commission's own evidential chain concerning Mogens Jensen is more specific: in its assessment, his text message of 9. November and contemporaneous emails supported knowledge already on 5. November. Wording about the briefing date was subsequently changed in drafts and replies. The commission assessed the information at the parliamentary consultation on 11. November as incorrect. The Minister's own original statements and identified emails must be kept separate from later accounts. [MK01, pp.728-732]

For the Minister for Health, the Commission defines the opinions for risk assessment and health actions; for the Minister of Finance, uncertainty about the financial basis of the bonus scheme is identified without an assessment of gross negligence. Therefore, the liability accounts must not assign identical actions or identical knowledge to all ministers. The material shortage of land in relation to the growers is a separate point of investigation. [MK01, p.742-748]

The evidence of the limitation of access

FOB 2024-5 accepted that Clause 21 of the Public Law did not give the right to neither the revoked police warnings nor the revocation decisions. Earlier extradition did not preserve the general right of access. The Ombudsman also accepted the balancing of the authorities against more publicity. The opinion also documents different public practices between the police, the Prime Minister, the Ministry of Justice and the Ministry of Food. [MK03, p.5-14]

This is a **documented limit on public scrutiny**, not documentation of concealed criminal culpability. The legal decision must be reproduced precisely. The democratic consequence can be criticised independently: the public can see the commission's specific criticism and a later brief outcome, but does not necessarily have access to the reasoning connecting them. FOB 2024-6 similarly concerns the underlying material for the Prime Minister's Office's revocation, even though the revocation decision itself was published. [MK07]

The specific requirement is the publication of an anonymous inventory of actions and reasons: what actions were tested, what actual grounds were changed, what rule applied and what citizens' consequences were investigated? The report does not create fictitious outcomes for the documents that are not available.

Control status and necessary originals

• **Documented:** lack of home; letter and action card with the described content; Commission's ten positive liability assessments; five identified recalls; Fogdes limited interrogation result; actual refusal of access to police reasons.

• **Not established:** individual criminal culpability in the mink case; the number of breeders who culled outside the zones solely because of the unlawful communication; all ten persons' final responsibility; whether each individual citizen received effective rectification and full redress.

• **Necessary investigative steps:** the four missing named closure/response decisions; contact and culling dates for each herd; legal authority on each date; compensation decisions and actual payments; documentation of individual correction. These demands derive from the present verification against originals.

23. Defence and intelligence: Green Desert and Samsam

The Danish acquittal did not lift the court's finding of abuse

Højesteret On 31 May 2022, the Ministry of Defence dismissed the appeal but maintained that: **18 of the 23 Iraqi parties had been subjected to inhumane treatment;** the transfer to and detention in Al Jameat, as determined by the National Court. The evidence included torture with falanga and electric shock. For the other five, the court did not find the offences described proven. The 18 and the five are subsets of 23, not extra persons. [GD01, p.26-28]

This is a court-established evidentiary finding. The individual original medical reports, interviews and detention registers have not all been independently verified here. The documented conclusion is that the published Danish acquittal **does not mean the court found that no one was ill-treated**. Its reasoning concerns Danish attribution, knowledge, control and jurisdiction.

Before the Supreme Court, the Ministry of Defence argued that none of the Iraqi parties could be regarded as having suffered inhuman treatment and that their accounts lacked credibility. The Supreme Court reproduces that position on p.26, but upholds on p.27 the High Court's affirmative findings concerning 18. The authority's general denial is therefore not the judgment's overall evidential finding. [GD01, pp.26-27]

Chain of criticism: The acquittal cannot document absence of ill-treatment → the Ministry's denial is identified → the judgment upholds 18 affirmative findings of abuse → the statement and evidentiary finding differ → the State's duty to investigate and provide redress must be delimited under the relevant basis of responsibility → a public account must not replace that examination with a general acquittal label → such an account may conceal citizens' documented suffering → scrutiny of responsibility requires evidence of injury, acts and knowledge → a specific demand for an account, broken down by person and citing sources, of abuse, Danish involvement and actual redress.

Population and timing

The operation took place on 25 November 2004. It is before the 2006-2025 event period of the report, while the investigations and the public court investigation are inside. The judgment of the EMD in 2025 concerns 21 complainants from the same course of action. They must not be added to the 23 Danish parties as 44 separate people. The judgment indicates all 21 as Iraqi nationals; Danish residence is not Danish citizenship. [GD02, Introduction / § 1-3]

Search	Original information	Precise meaning
Operation 25.11.2004	Danish and British forces assist the Iraqi operation	Initial point of occurrence and subsequent investigation, not a 2006 event
Danish studies 2 010-2011,2012-2014,201 5-2016	Three audit studies	Three studies of the course, not three groups of victims [GD01, p.33]
First civil cases 2011- 2012	Five actions; later merged and rejected 2013, confirmed 2014	Refusal to proceed, not a substantive decision on the infringements [GD02, § 21- 24]
New lawsuit 24.10.2014	New civil proceedings	Independent process start point [GD02, § 25]
High Court 15.6.2018	18 obtain a partially favourable finding; five do not	DKK 30.000 for each of the 18 in the national court; later abolished Danish payment obligation [GD01-GD02]
Højesteret 31.5.2022	No compensation from the Ministry of Defence; the assault finding for 18 is maintained.	2.776 calendar days after the new action; 1.446 days after the judgment in the main proceedings;
EMD21.10.2025	Differential Appeals Outcome	1.239 calendar days after the judgment of the Supreme Court;
EMD judgment final 21.1.2026	Final maturity after 92 calendar days	Additional 2026 status; judgment year remains 2025

The daily figures are own calendar calculations on the dates of the sources. They shall indicate the duration of judicial review, not the duration of detention or a determined number of illegal days. From the operation to the Supreme Court judgment went 17 years, 6

months and 6 days. From the operation to the EMD judgment went 20 years, 10 months and 26 days. The total personal load shall be documented by the detention, health and life cycle; it cannot be calculated solely by the date of the judgment.

What? Højesteret actually decided on Danish responsibility

The court proceeded on the basis that Danish forces had not detained the parties, held them in custody, transferred them or commanded the Iraqi forces. It therefore found no Danish jurisdiction over the specific parties under ECHR Article 1. This is a specific finding about control, not a rule that Denmark has no human rights duties outside the country. [GD01, pp.25-26,31-32]

The Court also examined Danish liability law independently of EMRK. It stated that the absence of Danish detention or direct transfer does not relieve Danish authorities of any liability. Assistance may be unlawful in the event of sufficiently specific and current knowledge or suspicion of abuse. In the present case, the court did not find the necessary knowledge. The documented control point is therefore the simultaneous knowledge and the actual functioning of the operation, including by indirect assistance. [GD01, p.30-31]

The Defence Command Directive 1.9.2004 is described in the judgment with two different situations: own detainees had to go to British rather than Iraqi forces; Iraqi own arrests under cooperation were considered to be Iraqi. The Directive also included attention, reporting and, where appropriate, action in the event of illegality. The term Iraqi arrest must therefore be checked against actual checks; it cannot only determine who contributed to what. [GD01, p.30]

The Supreme Court did **not decide the limitation issue**, because it found no Danish basis for compensation. The judgment must therefore not be described as dismissal of liability solely because of limitation. It found the investigations conducted sufficient and rejected a new investigation and remittal. [GD01, pp.32-34]

EMD 2025: Inadmissibility and admissibility must be kept separate

Point of complaint	The exact outcome of EMD	What it doesn't document
Substantive Article 3	Rejected for lack of Danish jurisdiction, § 108- 109	No overall finding that the abuses described did not take place
Duty to investigate under Article 3	Rejected; even if a jurisdictional link existed, the court found no deficient investigation, sections 118,131-132	No Danish criminal record of the alleged perpetrators
Duration of proceedings Article 6	Rejected for failure to discharge the national legal instrument, § 143	No decision of substance that the whole course of time was reasonable
Access to a court and a fair trial Article 6	Reality test: no infringement § 165- 166	No decision on all other points of international law
Article 13	§ 169- 171 Rejected	No redress awarded for the Iraqi ill-treatment itself

Source: original judgment *Abdulaal Naser and Others v. Denmark*,46571 / 22. [GD02] The grounds for rejection must be retained in the statistics. A single label that no break cannot replace the different outcomes of the table.

Costs are not compensation for the victims

Højesteret the total costs to the Ministry of Defence of: **DKK 9.010.796,85**, distributed as follows: [GD01, p.34-35]

Obligation to pay following the judgment	Amount	Unit and delimitation
Anti-Torture Support Fund for A and U	562.500,00 kr.	One mandate payment, not two identical payments
21 other parties, including the heirs of E	984.375,00 DKK	21 × 46.875 DKK; heirs are not an additional live person

Obligation to pay following the judgment	Amount	Unit and delimitation
The Treasury	7.463.921,85 DKK	State financing of the remaining part
Total	DKK 9.010.796,85	Sum of the three items above

The sums imposed do not constitute evidence of actual payment and do not constitute compensation to the applicants. Freedom of procedure, the removal of the term of office and limited claims are described separately in the judgment. A national cost analysis must therefore preserve the payer, the recipient, the amount allocated and the actual payment as different fields.

Remaining review and specific requirements

Later judgments can be analysed, but cannot replace independent verification of all original operational orders, command arrangements, detention lists, transport/transfer registers and knowledge of Al Jameat. Each decisive claim requires a source chain from the contemporaneous original to the high court's and Højesteret's reasoning. The two domestic instances' reproduction of the same original information is one evidential link, not two independent pieces of evidence.

The United Nations Torture Committee's 2023 observations on a close focus on individual criminal liability specifically concern the police and the DUP, with reference to: *E-Asmar*. They may not be reproduced as a separate committee decision on Green Desert. Their fundamental relevance to the methodology of the report is the distinction between the existence of the incident, the State's protection / investigation responsibility and identified individual criminal liability. [GD03, § 40-41,48-49]

The strongest sustainable investigation demand is specific verification against originals of the factual links on which accountability decisions rest. If new primary material changes a decisive link, the legal consequence must be assessed for the specific person and basis of responsibility. Suspicion of concealment or incorrect oversight classification must be identified separately until the material documents it. The report does not establish Danish responsibility for torture contrary to the available outcomes without this further basis.

Samsam: authority information, evidential chain and late review

The documented main conclusion

Højesteret found 02.09.2025 that Ahmed Samsam had demonstrated cooperation with PET and FE during the travel in 2013- 2014 and receipt of fees and other services for information about Danish Syrian fighters. The original judgment, BS-58021 / 2023-HJR, has been read with separate verification of the parties' claims, explanations, grounds and findings. It's a recognition judgment. It does not even lift the Spanish sentence and does not provide for Danish compensation for detention. [SA01, p.16-21]

The crucial point of criticism is a **evidence of inconsistency in information that became relevant for a the assessment of evidence by foreign courts;**. Højesteret p. 19 describes that the Spanish højesteret Denmark's registration in the Schengen Information System and the information provided by the Spanish police on the denial of cooperation by the Danish police were important to its conclusion that Samsam was not among the people who actually cooperated with the Danish authorities against terrorism. The later Danish judgment states precisely this kind of cooperation in connection with travel. The original SIS registration, the specific Danish reply and the Spanish original case are different proofs which have not all been replaced by the Danish judgment's reproduction. [SA01, p.18-21]

The concrete source and evidence chain

Search	Original source; or document status;	What the proof carries	What needs to be tested separately
Danish SIS-registration	Referred to in the judgment of the Supreme Court under review p.19	The registration was part of the reasoning of the Spanish court	Original content of the registration, date, purpose, sender, knowledge basis and subsequent corrections
Spanish police information about Danish denial	Reported in paragraph 19 of the Danish judgment	Spain højesteret built on an information about Danish denial	Who in Denmark replied, precise wording and recipient; the Danish original correspondence
Spanish Penalty and Appeals	Dates and extracts of the judgment in the original Danish judgment	Convicted 28.06.2018 to 8 years; appeals 23.11.2018 and 17.05.2019	All original Spanish evidence and the importance of proper cooperation information
Cooperation	Explanation, sound file, payment information and other material in the Danish case	Overall basis for the establishment of cooperation and benefits by the Supreme Court	The author and authenticity of each certificate; not all individual statements submitted have been established independently;
New translation	Judgment p.2-3	An expression in a previous Spanish extract was changed from a translation of precise cooperation to occasional cooperation	The Spanish original and certified translation; language changes must not be concealed
Final Danish recognition	Judgment p.21; Joint opinion of PET / FE on the same day	The services shall recognise and recognise the cooperation;	Actual assistance for resumption, subsequent Spanish decision and possible repair

It is not sufficient to point out that the Spanish judgment was final and thus treat the Danish information behind the judgment as correct. The paragraph of the Supreme Court shows a specific point where such an argument would repeat an information created by the authority without testing its actual basis. On the other hand, the Danish judgment does not determine by its very existence what the result of a completely new Spanish test will be. The necessary review is the local cause chain: Danish information → foreign ending → importance for sentence and continued detention → possibility of resumption. [SA01, p.18-21]

Timetable and actual consistency

Date / period	Documented event	Meaning for the citizen
2013-2014	The subsequent judicial cooperation	The relationship of cooperation is an essential factual proof of the journeys which were later made in the criminal proceedings.
28.06.2018	Spanish sentence of 8 years in prison	serious deprivation of liberty and legal status as a criminal offence; the length of the sentence is not automatically the same as the time actually served;
23.11.2018 and 17.05.2019	Spanish appeals	The authority information formed part of a situation in which ordinary review ended without change
24.06.2020-07.09.2021	The lawyer's explanation of 13 meetings with the management layers of the intelligence services	Documentary explanation of attempts to settle; meetings are not proof of a settlement reached or recognised liability
20.11.2020	The court in Glostrup converted the execution into 6 years imprisonment in Denmark	Amendment of the execution framework; not cancellation of the result of the debt
December 2020	Transfer to continued service in Denmark; lawyer indicates 10.12.2020	Physical return home was continued service of the sentence, not release or full redress
08.11.2023	Østre Landsret's decision in the recognition case	At this stage, the case did not lead to the subsequent recognition
02.09.2025	Judgment of the Supreme Court and public recognition of services	A central relationship of cooperation was legally established more than 7 years after the Spanish judgment.

Sources: SA01 p.1 -3,9 -14,16-21; SA02. From 28.06.2018 to 02.09.2025 it took 7 years, 2 months and 5 days. From the judgment of the National Court on 08.11.2023 to the judgment of the Supreme Court, 664 calendar days were allowed. These periods are calculated procedural and evidence periods. They are **not an inventory of 664 illegal prison days or a court-determined 7; year-illegal detention;**. Such an inventory actually requires the history of atonement and the legal review of each period.

The lawyer's explanation describes a claim for compensation, including detention entries, actual losses / expenses and tort, as well as changing discussions on amounts. None of the amounts of the negotiations referred to may be recorded as compensation paid. DKK 500.000 to be paid jointly and severally by PET and FE **to the Treasury as legal costs;**, not for Samsam as compensation. [SA01, p.12-14,21]

Examination of the opinion of the Authority and of the judgment

Conclusion → The specific official information denying cooperation was incompatible with cooperation later proved in the Danish case. Authority statement → The Spanish evidential chain included information about a denial by Danish police. Original evidence → Supreme Court judgment pp.19-21 documents the chain and the later finding of cooperation. Deficiency → Original Danish correspondence and the complete Spanish legal assessment must be obtained to establish sender,culpability and causal contribution. Rule → Truthfulness,proper fact-finding and access to effective review must be assessed alongside the particular services' duties and relevant Convention provisions. Conduct/omission → Recording,responses and failure to produce or correct information must be dated. Departure → Incorrect or inadequate official information must not become self-confirming evidence against the citizen. Consequence → Central information about his activities was legally established only after many years of criminal and declaratory proceedings. Responsibility → State responsibility and each individual's responsibility require separate review. Demands → Preservation of original correspondence and recording histories,specific assistance with reopening,assessment of documented loss and a decision on actual redress.

The Supreme Court established a highly restrictive starting point for proceedings concerning intelligence services' sources, but accepted the specific exception. The report's criticism therefore also concerns the effect of a barrier to review in a case with serious consequences for a citizen:the information-related legal position must be reviewable in time to matter in practice. The citizen's eventual acknowledgment does not on its own answer the question of preceding assistance, information and elapsed time. [SA01,pp.17-19]

Documented findings: cooperation and services established by Højesteret; the described significance of Danish information for the Spanish inference; the lengthy trajectory until Danish acknowledgement; the recipient of the costs amount. **Further evidential requirements:** original Danish-Spanish communication, complete SIS history, source agreement and payment trail, actual history of serving the sentence, later reopening decision and final compensation decision. A deliberate lie by a particular Danish person, criminal complicity and a particular total period of harm are not established by the declaratory judgment alone.

24. Greenland: self-determination, family ties and repair

The inquiries into contraception and the 22 Greenlandic children show specific losses of self-determination, family ties and cultural belonging. The historical interventions occurred before 2006 and therefore are not included as new interventions in the report's 20-year total. Investigation, apology and reparation in 2006-2026 are included as present-day State acts. Both timelines must be retained: a citizen may still bear the consequences of an old intervention even if the State investigates only much later.

The independent investigation 2025: countable events and people

The investigation into contraceptive practices in Kalaallit Nunaat 1960-1991 was delivered on 9. September 2025 after starting on 1. June 2023. Ilisimatusarfik and the University of Southern Denmark anchored the work; the Danish ministry funded it. The study uses voluntary accounts and archival material. It is not a random national sample or a judgment on every individual healthcare intervention. Abortion and sterilisation received only limited examination; the main priorities were intrauterine devices and Depo-Provera. [GL01, printed pp. 6-10]

Population of the survey	Number and sub-groups	Unit and delimitation
Women with reports	354	Various women; 137 by telephone, 125 by the National Doctor, 72 personal interviews and 20 by Sullissivik
Double story from the same woman	17	Oral + written; oral use only. They are not added to 354
Other women's enquiries	70	Outside topic / period or guidance needs; omitted from analysis
Specialist, etc., interview	11	Nine inquiries + one former official + one former minister; two other inquiries omitted
Beret events	488	410 spiral, 43 Depo-Provera and 35 other events; more events per woman
Place of occurrence	422 Greenland, 22 Denmark, 44 not available	All 488 events; not 488 different people
Residence in the report	244 Greenland, 66 Denmark, 44 not available	Women, not places of incident
Number of events per woman	264 with one, 62 with two, 20 with three, 8 with more than three	354 women; the last eight have 40 events in total
Women with Spiral Report	335	410 events; average 16,7 years at first spiral
First spiral, age	94 not more than 14 years old, 120 at 15-17, 75 at least 18, 46 not available	335 women; **214 with known inferiority** at first spiral
Depo-Provera, age	6 up to 14 years, 11 at 15-17, 16 at least 18, 10 not available	43 women / events; mean age 17,4. Overlap with spiral group not published as person key
Births before first spiral	176 without birth, 31 with one, 21 with more, 107 not available	335 women
Spiral events of known age and place	316	297 Greenland and 19 Denmark; 94 of the 410 omitted from this particular analysis
Minors in Greenland's sub-analysis	185 girls, 204 incidents	The 204 are contained in the 297, not new cases

The last subanalysis distributes the 204 events: birth 11, own / parents' wish 11, sent by school 24, provoked abortion 28, second consultation 30, sent from college etc. 26, unpublished 32 and summoned from health care 42. The 24 and 26 provide 50 events with the school / institution path as indicated category; it is not 50 identified

employees or, necessarily, 50 different girls. The material also describes girls without sexual debut and girls whose parents according to the reports had not been informed. [GL01, printed pages 8-10 and 177-182]

Consent, information and consequences have different denominators

Measurement	Counter / denominator and remainder	Meaning
Consent to Spiral or Depo-Provera	55 yes, 330 no / not clear, 68 not available / 453	Events. The 35 other events are outside this measurement
Spiral alone	47 yes, 300 no / not clear, 63 not available / 410	Same events in a subgroup
Depo-Provera alone	8 yes, 30 no / not clear, 5 not available / 43	55=47+8; 330=300+30; 68=63+5
Information by spiral	98 sufficient, 58 insufficient, 170 none, 84 not available / 410	228 / 410 with negative information; 228 / 326 = 69,94% among the informed
Information at Depo-Provera	22 sufficient, 15 insufficient / none, 6 not available / 43	15 is the total negative category; the two types cannot be separated accurately;
Experienced consequences of spiral	349 yes, 14 no, 47 not available / 410	Preferred consequences; not 349 medically diagnosed injuries
Experienced consequences of Depo-Provera	42 yes, 1 not available / 43	No separate "no 'category declared
Both forms, consequences	391/453	349 + 42, with 14 no and 48 not available; not new events
Sexual education	44 yes, 150 no, 160 not available / 354	Women; a large undisclosed group must be preserved
Women without children	63/354	The source does not determine how many were involuntarily childless, or individual cause for all 63

330 / 453 is 72,85% of the reported spiral / depot events; among the 385 with information on consent, the proportion is 85,71%. Both fractions are right for each denominator. None of them is a national percentage for all Greenlandic women. The consent, information and impact categories of the events overlap; 330 + 228 + 391 may not be used as a number of assaults or victims. [GL01, printed pp. 203-211 and 224- 230]

GL-K01: The interventions had concrete bodily and family consequences

Conclusion → statement → evidence. The women's accounts describe interventions without their knowledge or clear consent, severe pain and bleeding, hospital admissions, lack of subsequent help and experiences of lost self-determination. The investigation identifies women through anonymised codes and compares their accounts with historical material, but has not made an individual medical causation determination for each consequence. It thus documents that the consequences were reported; where contemporaneous records or medical assessments are missing, this must be stated locally. [GL01, printed pp. 203-211, 224-230]

Action → deviation → result. In report 10B96, a 12-year-old girl was sent from the school home without explanation of the purpose. 10B30 describes the collection of a 13-year-old with an ambulance without prior knowledge of spiral and later scar tissue as well as unwanted infertility. The 5B63 describes repeated unsuccessful requests to have the spiral removed. For these reports, criticism must not be reduced to inadequate record keeping: the procedure described and the continuing lack of help relate to the body itself, the possibility of choosing from and the possibility of having children later. The cause assessment for long-term health requires the specific records; the uncertainty does not change the documented report's description of lack of information and experienced coercion. [GL01, printed pp. 180-181, 226-229]

Rule → responsibility → demand. The rules then applicable to minors' and parents' consent changed several times. Access to counselling without parental consent is not equivalent to permission to perform any physical intervention without the girl's own involvement. The investigation's legal analysis describes parental consent requirements until 30. September 1973 and subsequent differing periods and age thresholds. Present-day ECHR analyses must also examine Article 8, Article 3 where the necessary severity is reached, and Article 14 where discrimination is documented, particularly where authorities controlled children in institutions. The specific demand is person-by-person clarification of consent, actors, age, timing, case-record basis and aftercare, with relevant reparation. [GL01, printed pp. 161-166, 242-254]

GL-K02: Central knowledge and supervision must be independently tested

Conclusion → authority statement → original chain. Official descriptions of contraception as voluntary cannot, on their own, prove voluntariness. The inquiry reproduces specific warnings about inadequate information and excessively active intervention that officials and politicians learned of. A municipal council meeting in Scoresbysund in 1972 included participation from Grønlandsministeriet and criticism of inadequate information and girls' perception that the intrauterine device could not be removed. The inquiry did not find that this led to the closer investigation the allegation might have prompted. The national report bases this link on the inquiry's references to historical originals; those archival records have not themselves been published and independently reread here. [GL01, printed pp. 165-166]

Deficiency → rule → legal significance. The State managed and financed Greenland's healthcare system until responsibility was transferred at the turn of 1991/1992. The inquiry's responsibility analysis describes the Ministry, Health Authority, chief medical officer and district doctors. Operational and supervisory roles within the same official function, together with failures in registration and follow-up, therefore cannot conceal who had the opportunity and duty to respond. Reasonably substantiated allegations of treatment contrary to Article 3 trigger requirements of investigation and protection under the relevant conditions. The report distinguishes documented receipt of specific warnings from an as-yet undocumented claim that every manager knew every individual incident. [GL01, printed pp. 131-136, 161-166 and 258-263]

Responsibility → demand. The apology and a general compensation scheme do not in themselves conclude scrutiny of supervision, individual losses or personal responsibility. The strongest sustainable demands are a coherent evidential chain for the known warnings, investigation of the specific omission and accessible means of reparation. Assessment of historical ECHR protection must respect the law at the time; the inquiry itself describes assessment of the temporal legal position as difficult. This is not a general defence of the interventions, but a precise delimitation of the legal conclusion.

Historical registrations: scope is not the same as a recorded breach of consent

The historical series are used as material on scope and knowledge, not as a 2006-2025 error total. Table 3. a of the investigation gives women with an IUD:684 as at 1. January 1968, 1.820 as at 1. January 1969, 2.854 as at 1. January 1970, 4.070 as at 31. December 1970, 4.890 as at 1. January 1972 and 5.737 as at 31. December 1972. Printed p. 170 also gives 3.821 women at the end of 1970. **3.821 and 4.070 must not be conflated:** the text describes a registration deducting removed/lost IUDs, whereas the table and conclusion discuss the number who had received an IUD. The original does not provide full person reconciliation that makes all these measurement points unique historical recipients. They must not be added across years. [GL01,printed pp. 170-176 and 262]

In ten of 17 districts, 606 spirals were newly set up in 1973 and 791 in 1974; relocations and relocations make national de-industrialisation uncertain. Three protocols contain: **2.206 pledges**: Sisimiut 1973-1977: 445; Ilulissat 1967-1983: 1.261; Nuuk 1973-1979: 500. The Ilulissat Protocol identifies 807 different girls / women. The 807 must not be added to the 1.261 or 2.206. Across the protocols, the age groups are below 15: 50; 15-19: 598; 20-24: 539; 25-29: 415; 30-34: 305; 35-39: 162; at least 40: 54; not applicable: 86. **These summers to 2.209, while The sum of the minutes is 2.206: an internal difference of three, which is retained.** The mixed 15-19 group cannot be converted into an exact number of children. [GL01, printed pp. 172-175]

Depo-Provera is reported as having 480 users in 1981 and 290, 340, 260 and 240 in 1985-1988. The Chief Medical Officer’s 1988 count covers approximately 4.000 women, of whom 50 % used an IUD, 45 % contraceptive pills/mini-pills and 5 % Depo-Provera; 27 % of women aged 15-49 within that delimitation used the three methods. Import-based estimates of coverage below 40 % in the first half of the 1980s also include condoms and measure something different from these records. None of the series identifies nationally who consented. [GL01, printed pp. 175-176]

GL-K03: Compensation 2026 and a concrete exception to the fine

Act no. 722 of 1. September 2026 has been read in its complete original text. It grants 300.000 kr. to an eligible woman following application, a solemn declaration and making it probable that a contraceptive event without consent occurred in 1960-1991. The residence requirement may be waived. The application deadline is 1. September 2028 with a limited exemption possibility. Heirs succeed to the claim if the woman dies after applying; the Act does not give every descendant of a woman who died before applying an independent claim. [GL02, sections 1-3, 8]

Conclusion → statutory text → difference. Section 4 requires necessary information to be supplied to Patienterstatningen within 30 days, with a possible additional 30 days. Section 16,subsection 2,expressly exempts public authorities and their employees from the fine for failing to fulfil that information duty. An intentionally false declaration on one's honour under section 16,subsection 1,can meanwhile be punished by a fine or imprisonment for up to two years. This is a **specific statutory difference in the criminal-law avenue** between private information-providers and public actors. The maximum sentence for a false declaration is not a sentence imposed on the women, and the exemption is not general immunity for historical abuses or other official-duty offences. [GL02, sections 4, 15-16]

Consistency → responsibility → requirements. The derogation will be significant if the non-extradition of a public actor delays the repair of a woman. For this reason, the obligation to provide information to the administration does not lapse. A specific control account should show the date of the requirement, any extension of time, extradition, date of decision and response to a break in time. Paragraph 5 of the Act provides for the possibility of the legal costs of necessary assistance, which give rise to a new and amended decision when the initial lack of information was not due to the applicant; this may be a concrete consequence of the error of the Authority. [GL02]

The Act applies the Public Administration Act but exempts Patienterstatningen's activity under the scheme from the Access to Public Administration Files Act. This does not remove individual parties' rights under the Public Administration Act. The scheme provides for appeal to Ankenævnet for Patienterstatningen and interest on payment later than five weeks after the award, subject to the statutory exception for impediments caused by the recipient. The amount is protected in specified benefit and set-off contexts. Earlier settlements/compensation must not be counted as new payments through the scheme. Section 19 contains a separate territorial provision; Greenland's assumption of responsibility and the geographical application of Danish law must be distinguished from Denmark's human-rights responsibility as a State. [GL02, sections 3, 5-14, 19]

The public status of the patient compensation, entered on 7 October 2026 and on the Danish part dated 30 September 2026, shows: **627 cases: 138 applications received, 4 applications dismissed and 485 applications dismissed**. The four refusals are due to previous settlements with the State. The Greenlandic part shows the same number, but another update date. DKK 138 × DKK 300.000 is DKK 41,4 million in calculated compensation; **award is not independent proof of actual payment;**. An estimated potential target group is not counted as recognised victims. [GL03]

GL-K04: Return to Greenland was not reunion with the family

The historical investigation from 2020 covers 22 children sent to Denmark in 1951. Six were adopted in Denmark; the 16 who returned grew up in a children's home in Godthåb. These geographical returns were therefore not 16 returns to parents. The investigation's chapter on broken family ties describes the difficulties both adopted children and children in the home faced in finding their families again, lost Greenlandic language and sparse contact. Even children whose mothers and siblings lived in the town experienced restricted visits. [GL04, printed pp. 54-66, 73-78]

Conclusion → statement → evidence → deficiency. It is documented that the project's planned return did not restore the children's previous family life. The investigation draws on contemporary archival records and later recollections and explains the distinction between them. The lifelong feeling of estrangement or loss is described as the participants' experience; an overall psychiatric diagnosis or an exact family-contact duration for all 22 cannot be inferred. The specific consequence is separation, a language barrier and loss of the close relationship, including after return.

Time → repair. The State's written apology came in December 2020. Six living persons brought an action in December 2021. The Ministry of Social Affairs's announcement of 25 February 2022 documents a settlement of DKK 250.000 for each, a total of DKK 1,5 million. The six are a surviving subset of the 22, not six new victims. The settlement is not a judgment on the legal position of all 22 children. [GL05]

Rule → responsibility → demand. The example is central to the report's current analysis of return home: reunification must be documented as actual restoration of relationship and contact, not merely transport back to a country or closure of a case. Current Article 8 obligations and the Convention on the Rights of the Child's protection of family, identity and language are the legal measure for acts in the reporting period; they are not uncritically backdated as ratified rules in 1951.

Folkeret and R2P: the exact meaning

The material’s connection between population policy, ethnicity, reproductive control and children in public care requires serious scrutiny under international law. The Genocide Convention’s provision on measures intended to prevent births within a protected group, and the provision on forcible transfer of children, may be relevant lines of investigation. A completed genocide conclusion requires proof of the specific intent to destroy the group in whole or in part; regulating birth numbers or the documented incident counts does not on its own prove that intent. Crimes against humanity likewise require the relevant examination of attack, scale, policy and knowledge. [The legal basis is examined in the report’s international-law analysis.]

R2P encompasses four specific forms of mass atrocity and does not automatically become applicable because an authority has disregarded consent or family reunification. The immediately strong rights-based and responsibility claims here are protection of bodily integrity, effective investigation of substantiated allegations of abuse, access to individual review and reparation. The international-law investigation track must be pursued as far as specific archival records concerning purpose, orders, knowledge and implementation support; absence of a judgment is not evidence that these questions are irrelevant.

Documentation checks and necessary evidentiary links

Documented findings comprise the delimited event and person series, accounts of missing consent, specific descriptions of bodily and family consequences, historical State organisation and current statutory text and compensation status. Hypotheses requiring further proof are the individual medical cause of each lasting injury, personal criminal liability of specific historical actors and a specific intent to destroy a group. These questions must not be conflated with already documented deficiencies in information and contact.

For each critical requirement, the chain shall be: reporting code → time / age group → simultaneous records / archives, where available → actual action and consent → relevant day-to-day law → later consistency → state / individual liability condition → specific investigation or repair requirements. The present system includes decision-making and payment documents and time-limit data. The report's total statistics cannot replace these individual evidence.

25. Commission, audit, liability time limits and preservation of evidence;

What a Commission study can document

Denmark has acquired extensive publicly accessible knowledge of unlawful administration, misleading information and failing management through commission investigations. However, a commission report is not a criminal judgment, a compensation decision or documentation that the intervention described has ceased. The report's responsibility chain therefore has four distinct links: an established circumstance; assessment of possible personal responsibility; the competent authority's subsequent decision; actual redress for the citizen. A missing link must not be replaced by the preceding one.

For the older investigations, the original comparative source is the official report 1571 from 2018. It reviews terms of reference, investigation courses, conclusions and subsequent parliamentary consideration. It is a documented source for that subsequent consideration, but its summary is not an independent re-examination of all original annexes in every commission. Where the report uses the original commission report, this is stated separately. Publication date, date of the acts investigated and duration of the investigation are preserved as different quantities. [KO01, chapter3, particularly pp.90-118]

Eight studies ending or closing in 2006-2015

Investigation	Reduction → report / closure	Period or topic examined	Documentary knowledge and delimitation of responsibilities
PET Commission	17.08.1999 → 24.06.2009; approximately 9 years 10 months	PET company 1945- 1989	The report dealt, inter alia, with the violation or circumvention of the 1968 Government Declaration. There was no mandate to assess individual legal liability. The after-treatment of the Folketing 19.12.2011 emphasised the long past. Older actions are not new mistakes in 2009.
Farum Commission	06.08.2003 → 12.04.2012; approximately 8 years 8 months	Farum Kommune 1990-2003	Comprehensive study of municipal administration and economy; not mandate to individual responsibility. Parallel criminal proceedings had their own course of action, including national court judgment 06.10.2009. The Commission's mandate therefore does not limit what the criminal courts could deal with.
Dan Lynge-Kommission	15.09.2003 → 19.09.2006; approximately 3 years old	Police, PET and cooperation with an informant	Criticism of, inter alia, the handling of information on a homicide, drug information, confidential information and management failure. The report refers to three cases of excessive disclosure of confidential information. The post-examination 23.05.2007 had different political assessments; these are not three convictions.
Tax credit commission	19.03.2004 → 16.06.2006; ca.2 years 3 months	Tax administration and information on tax relief problems 2000-2003	Critics of three employees were not attributed to them as service offences in the Commission's assessment. The failure to respond to information must be preserved as an independent administrative finding. Parliamentary finishing 28.02.2007.
Blekingegade Commission	15.09.2010 → 26.05.2014; approximately 3 years 8 months	Whether central authorities had obstructed investigation 1980-1990	The Commission did not find any evidence of the main obstacle to which the mandate was addressed. This is a limited evidence conclusion, not a general approval of any police or PET action. No mandate for individual responsibility. Finishing 10.03.2015.
Statelessness Commission	23.08.2011 → 17.08.2015; approximately 4 years old	Treatment of the birth right of stateless persons 1991-2010	Non-contractual practices and grounds for seeking disciplinary action by two senior officials. A duty waiver 17.08.2015 is an interim response, not in itself the final sanction. Finishing 16.03.2016.
Tax matters	12.03.2012 → 03.11.2014; ca.2 years 8 months	A concrete tax case and interference by the department	Criticism of interference in a specific decision-making process and handling confidential information. Valuations of gravity, resignation and later advice did not automatically lead to disciplinary punishment. Finishing 10.03.2015.
Iraq and Afghan Central Commission	07.11.2012 → 02.07.2015; closed after c.2 years 8 months	Basis of war, detention exercises, transfers and knowledge of abuse risk	Closed without report. Absence of a report is a lack of a finding and cannot be counted as zero illegality or as an acquittal.

Source and verification position: KO01, PET pp.90-92; Farum pp.95-97; Dan Lynge pp.98-101; tax deductions pp.102-105; Blekingegade pp.106-107; stateless persons pp.108-111; tax case pp.114-118; Iraq/Afghanistan pp.128-132. Durations are rounded calendar periods between the stated dates, not measures of how long a particular citizen was subjected to an unlawful intervention.

The investigations are very large, but page counts are not counts of proved errors. The report gives, among other things, 88 witnesses and 146 hearing days in the PET investigation, 222 witnesses and 93 hearing days in Farum, 44 witnesses and 29 hearing days in Dan Lynge, 64 witnesses and 30 hearing days concerning tax deductions, 69 witnesses and 28 hearing days in Blekingegade, 44 witnesses and 27 hearing days concerning stateless persons, and 45 witnesses and 45 hearing days in the tax case. These counts describe investigative work. They must not be added to the report's case or person counts. PET's 13.414 cases examined are likewise not 13.414 established breaches of law. [KO01,the specified sections]

Accounts of investigation expenditure incurred must not be called compensation either. For example, the report states 77.514.141 kr. for the PET Commission,61.985.285 kr. for Farum,11.269.082 kr. for Dan Lynge,19.988.794 kr. for Blekingegade,42.241.877 kr. for stateless persons,28.475.942 kr. for the tax case and 18.576.933 kr. for the closed Iraq/Afghanistan Commission. The expenditure accounts each have their own coverage of commission, secretariat and assisting counsel. They are therefore retained as source-specific amounts without a common 20-year total or conversion to citizens' losses. [KO01, same section]

Convention-barred birth case-law and political closure of investigation

The state-run case shows that Denmark may have a binding international obligation while at the same time managing contrary to it for a long period of time. The relevant deviation was the examination of applications without the protection provided by the 1961Convention on the Limitation of Statelessness and the Child Convention. In the chain of responsibility, refusal, lack of guidance, subsequent resumption and actual granting of citizenship must be assessed separately. The Commission's assessment of two officials does not prove that all the applicants concerned were subsequently given their legal status or that any refusal during the period under review was contrary to the Convention. [KO01, p.108- 111]

The specific checks should identify the original application, the birth and the stateless person, the day-to-day convention rule, the grounds for refusal, the authority's documented knowledge, the time of resumption and the actual outcome. The consequence is the time period during which a person lacked the nationality or access to the award to which he or she was entitled. Persons, families, refusals and resignations are different counting units. The national inventory can only be deduced when these events are linked at case or person level.

For the Iraq/Afghanistan Commission, the documented failure in the report's material is that politically decided closure prevented the commissioned overall public investigation. Its mandate covered circumstances central to examining the State's duty to investigate possible torture and ill-treatment. Closure does not itself establish that a particular person committed torture. The demand is investigation of unresolved acts, knowledge of risk, transfers and accountability chains in a forum capable of obtaining original material. Later Green Desert judgments have their own parties and limits and cannot simply replace the entire closed mandate. [KO01, pp.128-132; see the report's separate Green Desert analysis]

Instruction Commission: limitation of the right to review of criminal liability

The lengthy delay had a documented legal consequence: the commission refrained from assessing possible criminal responsibility for 2016-2017 because the relevant matters were time-barred. This appears in the original final report of April 2021,volume 6 pp. 3578-3579. The precise conclusion is therefore not that the officials were criminally acquitted for 2016-2017. It is that culpability was not examined for these acts. [KO02]

The report examines Criminal Code sections 156-157 as applicable at the time, the limitation period and when neglect of duty ceased. The then ordinary maximum sentence of 4 months' imprisonment generally entailed a 2-year limitation period. A subsequent increase for certain managers could not simply be applied retrospectively to earlier acts. Circumstances from 2019 were assessed separately. A present-day maximum sentence or statutory text must not be inserted as the applicable rule for all 20 years. [KO02, pp.3577-3579]

The Commission's individual assessments concerned, inter alia, the following five persons, but **At different points of responsibility**:

Person in the report	The criticism that led to a positive assessment of possible disciplinary liability	Original position
Line Shooter Mørk Hansen	Active involvement in the instruction and its maintenance; assessed as intentional and gross	Volume 6 p.3499-3500
Happiness Sørensen	Actions / omissions in the administration and duty of truth in the subsequent course	S.3500- 3504
Jesper Gori	Confidentiality in the subsequent course; the separate assessment of the 2016 administration did not have the same positive gravity conclusion	S.3501-3504
Lene Linnea Vejrum	Involvement in the administration, failure to resume immediately after 18.03.2016, and information to the Danish Parliament / Ombudsman	S.3506-3509
Ditte Kruse Dankert	Involvement in the administration, failure to re-establish the law and the obligation to be truthful in the future	S.3506-3509

This table summarises the Commission's assessments of responsibilities. It is not five convictions, five similar administrative offences or proof of five final penalties. Those who had left state employment were not considered disciplinary within the scope of the mandate; it is not an acquittal of fact. The final employer's reaction must be documented by a separate decision. [KO02, p.3492- 3509,3568-3569]

There is no corresponding fixed general disciplinary limitation period. The report nevertheless describes how a long delay may justify a milder response or no response, and how special grounds are required after approximately 5 years. This is a time factor in the assessment of responsibility, not an unconditional statutory 5-year limit. Disciplinary responses under Civil Servants Act § 24 include warning, reprimand, fine, transfer, demotion and dismissal. Disciplinary and criminal assessments of responsibility are not mutually exclusive. [KO02,pp.3570-3572,3580]

The importance of the evidence is that, several years after the intervention, the end of a public inquiry may be too late for a trial, while the family has already borne the consequences. The action / omission to be tested is both the original unlawful instruction and the subsequent failure to stop or resume. The liability is a dated record of the authorities' knowledge, continued actions and any interruption of limitation. The specific requirement of the system is that investigation into possible criminal liability and the safeguarding of evidence should not be postponed solely to await a multiannual Commission report.

Liability does not confer the right to continue clearly unlawful action;

The original version of the report clarifies a significant difference: in the case of a clearly unlawful order of service, the official must state his resignation; in the case of a highly probable illegality, there may be a right to reject, even if the higher threshold for an unconditional obligation to reject has not been reached. The obligation of warning and the obligation to seek an unlawful condition which has already been implemented must be examined separately. This must not be reduced to a general claim that a staff member should simply obey. [KO02, corrigendum and p.3526-3528]

The later disciplinary inquiry in the mink case also describes the duty to establish the facts as applicable both to decisions and operational administrative activity. Acts without a formal decision therefore do not become free of legal responsibility. A supervisory rule normally permitting a superior to rely on subordinates has a specific exception where there is particular reason to investigate unlawfulness. The report therefore does not apply a presumption of lawful administration without first checking what the superior actually knew and when. [IF03, physical pp.5-8/printed pp.116-119]

Subsequent studies and current open mandates

Investigation	Knowledge / status before the report cut-off date	How to count the result
Tibet Commission and Tibet Commission II	Public reports 2017 and 2022 on police interventions and the conduct of the authorities	Specific circumstances, persons and subsequent decisions must be deduced between the first and the second investigation. A repeated finding is not a new violation.
Instruction Commission	Sub-report 2020 and Final Report April 2021; subsequent Court of Justice 2021	The commission’s assessments of individuals and the Court of Impeachment’s judgment concerning a Minister are different determinations. The same family cases must not be counted twice.
Mink missile n	Report 30.06.2022; Parliamentary and disciplinary finishing 2022-2023	First criticism, first reaction and subsequent recall must be separate. Revocated warnings are not sanctions in force.
Survey on SKAT	Established 03.07.2017; continued work	An open investigation mandate does not provide a final error rate or a completed account of personal responsibility.
THE FEE COMMISSION	Declared 21.12.2020; Report 13.12.2021 classified	The full report is not public. Public access to a summary does not allow for retesting of all underlying issues.
THE COMMUNITY COMMISSION	Decreased 01.10.2023; amendment 2024 extended to the Findsen/ Hjort cases. Letter 25.06.2026: expected report by 30.06.2028	The investigation has not yet been completed. The original target date 01.04.2026 and later the end of 2026 are higher expectations, not closing dates.
Samsam Commission of Inquiry	The proposal B27 was rejected 18.12.2025	A rejected proposal may not be registered as an actual commission or an investigation carried out. The Supreme Court judgment of 02.09.2025 is an independent basis of evidence.

Sources: KO03-KO06 and the separate original reports in the literature and source register. For FEII, current expectations are checked on the Commission's own website, which explicitly refers to the letter 25.06.2026. The Ministry of Justice communication 09.07.2026 describes the transmission; a brief search for the "possibility" of ending 2026 cannot be used as proof that 2026 was still the schedule. [KO04- KO05]

FEII's mandate covers both the suspensions from duty in August 2020 and, following its extension, the organisation of investigation and prosecution of Lars Johan Findsen and Claus Hjort Frederiksen. The commission must investigate improper considerations and express its opinion on possible responsibility. § 22 of the Act envisages a public report with necessary protections and the possibility of a further non-public report. Confidentiality limits public scrutiny; it does not remove the mandate's duty to investigate. [KO04]

A proposed longer ministerial deadline was not applicable

Bill L118, introduced 25.02.2026, proposed, among other things, to change the ordinary limitation period for ministerial responsibility and provide a subsequent period in connection with commission investigations. Folketinget's official case status is **lapsed**. The proposal must therefore not be used as the applicable rule in the report's comparison of public and private responsibility. A document display labelled "In force" on Retsinformation does not in itself turn a bill into an enacted law. [KO07]

This source control is of direct importance: the report can demonstrate a political attempt to remedy the problem of time, but cannot on that basis claim that the problem is generally resolved. Special rules in the legislation on a particular commission must be assessed within their own scope of application and cannot be extended to all municipal case handlers or ministers.

Documented errors, hypotheses and necessary evidence

Documented in the stated original sources: unlawful separation administration and substantive ECHR violations in the Court of Impeachment's judgment; the commission's positive assessments of possible disciplinary responsibility on the separately identified points above; absence of criminal review of 2016-2017 because of limitation; withdrawal of several mink-related disciplinary responses; closure of the Iraq/Afghanistan Commission without a report; lack of public access to FEI's complete report; postponement of FEII's expected report to 2028. These findings must not be added as numbers of victims or criminal convictions.

Hypotheses requiring further evidence: that the timing in a specific case was deliberately arranged to avoid responsibility; that a particular manager had specific knowledge not apparent from the checked records; that a later revocation disregarded necessary contemporaneous evidence; or that every citizen in the commission's subject population suffered the same legal harm. None of these hypotheses is used as established fact.

Documents necessary to complete an individual accountability account: original report/list of allegations, documented knowledge, actual cessation date, investigative steps relevant to limitation, final employer decision and actual redress for the citizen. Their absence from public records does not prove that no response occurred. Every decisive factual claim above can be traced to a specific report, decision or official case status; where the source is only an official later review, this is stated.

Cassation of social complaints: documented loss of evidence

Original-controlled course [ARK-FOB08]

The Ombudsman's case 2006-3096-009 / FOB 2008.399 describes erroneous rules of cassation: an annual deadline was calculated from creation rather than closure. PDF-s.8-14:

Central government	Documented regional progress
Capital	Cases created up to 2004 and many from 2005 were discarded; direct citizens' mail was not generally passed on to the municipality.
South Denmark	Cases set up before 2005 discarded; direct incoming mail not generally forwarded.
Central Jutland	Cases brought up to and including 2004 dismissed; last completed on 25 November 2005.

Central government	Documented regional progress
North Jutland	Nordjylland's old social cases have been preserved since 1992; Viborg's cases up to and including 2004 have been discarded, including original municipal acts. Electronic self-produced material preserved.

The Ministry had not carried out a systematic survey of the archives of the municipalities; the sample included 4-5 municipalities per region. The Ombudsman maintained criticism of premature cassation and considered that one year of storage was usually inadequate in relation to obsolete requirements. The archives could not simply be moved to the municipality. Later, own and received acts were retained longer; Zealand stopped returning. No total number of cases destroyed or citizens concerned shall be published. Locator: PDF-s.8-14 and 32-35; printed pages are one lower.

Consistency, responsibility and necessary investigation

The documented interference with the citizens' evidence is concrete: material which had been delivered directly to the Board of Appeal could have been destroyed without being returned to the municipality. The archives of the municipality cannot therefore be used without control as proof that the entire appeal has been preserved. For Viborg, the loss described also includes original municipal acts. The cases concerned must be examined through the files of both the Board of Appeal and the municipality, electronic documents, copies of the citizen and any files supplied.

The strongest documented criticism is the premature discarding and the inadequately investigated basis for the conservation policy. The specific consequence may be to prevent the resumption of proceedings, more difficult proof of errors and losses, and a weakened review of the decision of an authority. Whether this resulted in a particular loss or breach of a convention in an individual case requires the evidence and timeline of the case in question; the national investigation does not establish this automatically for all cases.

The necessary register query to the Appeals Board, National Archives and those responsible for the relevant former State Administrations' archives is: destruction protocols and legal authority; specific case numbers and creation/closure dates; which originals, copies and digital documents were covered; return registers; any reconstruction; remaining archive location. Municipal responses must be reconciled against the same case numbers. Numbers of cases and persons can be counted only afterwards.

This is not evidence that a particular public statistical year has disappeared or that published anchor tables are incorrect. Such an end requires separate proof. Nor is it a justification for omitting still available primary tables from the report.

Documented errors and open evidence points

• Documented: incorrect start date of the cassation deadline; concrete cassation in the specified areas; not fully investigated municipal storage; criticism of the short storage.

• To be examined: number of cases / persons destroyed, actual lack of material in each case, financial and family consequences, employee and management responsibilities, and actual reconstruction and restoration.

• The evidence chain: regional response in the Ombudsman's original decision → control and criticism of the document → case cashier / return records and retained originals. Regional responses are the information provided by the authorities; individual reconstruction is not yet checked here.

Annual review 2006-2023 - historical original figures

Substantively checked 2006-2023: main conclusions/denominators, reported columns in ministerial tables and annual reports' follow-up distributions. From 2018 both annual originals' complete follow-up annexes and financial section tables are checked;the 2021-23 theme matrix is complete. Specific citizen/time findings and other tables in criticism sections are separately delimited in the coverage matrix below; no overall unique victim population has been inferred. 2024-2025 is addressed in the other audit module.

Total number of checks

Year	Evaluated audits;	Appropriations trolled main accounts;	Positive bedø %	Essential b Evil Bem Prunes	Original / locator
2006	504	1331	89	4	Report, PDF 9
2007	470	1437	89	10	Report, PDF 8

2006: 18 follow-up cases from 2005; 11 are dealt with in the year's report and 7 in separate notes (PDF 6, § 17). This is a location of follow-up, not a figure for closed cases.

Ministerial areas: all published evaluation totals

Colony break: The 2006 product column also includes unrated grant control. The 2007 total is audited. Main accounts are a separate unit. No column counts unique institutions, employees or citizens.

Importance and local boundaries observed

The 2006 scale allows improvement needs in a positive assessment. "Satisfactory" means that the main standards are met, not that every action was flawless (PDF 149- 150, § 619- 621). Thus, the positive assessment of the State Ministry is followed by specific shortcomings in the documentation and approval of reposts (PDF 11, § 36-37). Therefore, a positive audit conclusion cannot be used as evidence that the rights of all citizens concerned were fulfilled.

Residues

The main/ministerial/follow-up series 2006-2023 and the 17 separately specified 2018-2021 annual tables have subsequently been checked in the following sections and supplementary module. Current gaps concern individual criticism/methodology figures, other special reports and person/loss/redress linkage. Ministerial portfolios and review units change; aggregation requires compatible units and populations.

2007- 2017: declarations, control populations and follow-up

Year	Measure	Number	Unit / denominator	Limitation / Locator

Documented definition breaches

•2008: A four-grade scale is replaced by risk-selected entity statements; final audit without a statement remains.

• 2013: Core conclusions are specified in ministerial territory; enterprises / reservations / areas are different entities.

• 2016: Highlighting replaces additional information after ISSAI200.

• 2018: Financial audit of state accounts and legal-critical / administrative audit are published in separate reports.

2008 announces the introduction 72 with / 127 without a statement, while the background section informs 168 companies and 289 independent institutions. The figures are kept according to their own textual boundaries. A false uniform population has not been formed.

The follow-up tables 2014-2017 have been counted in full: closure proposal + pending + continuing follow-up + another report = respectively 58,62,48,55. »Can be closed« is Rigsrevisionen's assessment, not documentation of specific redress for citizens or a closure date. Transfers are counted separately.

Additional verified figures

Year	Measure	Number	Unit / denominator	Meaning and original
2006	enterprises in the state accounts;	175	enterprises;	; original, PDF 148

The 2012 annex has 50 actual status rows:49 from the annual-audit stream plus 1 Culture case from 2013.2013's annex has 56 rows;2 rows contain both proposed closure and continued follow-up, and 1 transferred row was already closed in another stream on 10. April 2014. Our disjoint classification:17 closed/full proposals,34 continued including mixed cases,5 other transferred. The original's 16/40(main text) and 17/33/6(annex introduction) are retained. None of these figures counts citizens who obtained redress.

All product ranges 2006-2007

The Vector shows products, very satisfactory, satisfactory, not entirely satisfactory, not satisfactory; 2006 also has comments on appropriations. The source's hyphen is maintained as "-"; empty number cells are reproduced as 0. All 273 product rows are aligned to 38 ministerial totals.

2022: 17 legal-critical and 18 management audits; 16 / 17 and 14 / 18 positive. 2023: 23 legal-critical and 16 management audits, all positive. This does not alter the actual breaches of the rules in the same report. The conclusions apply materiality and do not replace individual review of legality.

Concrete residues at the part-delivery

- 2006-2023 specific citizens / time consequences

Full Declaration Annex 2008-2010 by ministerial area

All 613 published annexes are checked by graphical column location. With / without is declaration columns; positive is an express pure declaration marker (2008 uses "revision" also in this column). Reservations and additional information may be in the same row; they are not combined as unique cases. A published series can bring together several institutions.

2008:60 purely positive-opinion rows and 12 rows with reservations/supplementary information;2 rows bear both markers. The 127 audits without an opinion and 1 dash are distinct. 2009:68 positive-opinion rows and 15 rows with modification,including 1 bearing both markers.83 rows in the with-opinion column include SKAT's substitute-Auditor-General row and 1 group of 7 TV2 regions:83−1+6=88 accounts with Auditor General opinions (own reconciliation against original PDF8/133/136).13 supplementary-information rows are not the source's 14 individual supplementary matters. 2010:93 rows in the with-opinion column include endorsements for undertakings outside the State accounts. DSB has 1 row marked with reservations, but the source's 2 reservations; not 2 undertakings.

Explicit institutional groups in the Annexes

Year	PDF / row marker	Group number	Column	Outcome
2008	174/26	10	without an accounting statement of assurance;	audit;
2008	177/31	266	without an accounting statement of assurance;	audit;
2009	132/22	10	without an accounting statement of assurance;	audit;
2009	134/23	11	without an accounting statement of assurance;	audit;
2009	135/33	266	without an accounting statement of assurance;	audit;
2009	136/40	7	with an accounting statement	positive statement of accounts;
2009	137/3	10	without an accounting statement of assurance;	audit;
2010	120/26	9	without an accounting statement of assurance;	audit;
2010	122/33	11	without an accounting statement of assurance;	audit;
2010	123/31	261	without an accounting statement of assurance;	audit;
2010	125/3	10	without an accounting statement of assurance;	audit;

Group numbers shall not be multiplied by a different annual drop-out rate. Revision of a group is not evidence of errors on the part of all members.

Ministerial tables 2011, including continuation pages

Original. Yes / No applies to significant accounting errors; no is no collective review of legality or civil rights. The type / error columns are checked on the first and subsequent table pages.

Own delimitation: A marker is not automatically one independent account or one citizen. No group is multiplied by a wrong part.

Concrete source deviations: PDF86 footnote 5 includes the result of the Home Guard in the Joint Accounts of the Defence Command, despite separate marker. PDF129 Table 19 denotes Researcher Park Foulum as Revision; bread text refers to endorsement. The continuation of the cultural table PDF119 adds 17 rows (9 revisions / 8 endorsements). Former countdown 199 has been replaced by 216.

Ministerial tables 2012, including continuation pages

Original. Yes / No applies to significant accounting errors; no is no collective review of legality or civil rights. The type / error columns are checked on the first and subsequent table pages.

Own delimitation: A marker is not automatically one independent account or one citizen. No group is multiplied by a wrong part.

The Culture continuation on PDF131 adds 14 rows (3 audits/11 endorsements), including DR with Yes. The earlier count of 193 is replaced by 207. PDF136:10 diocesan-fund accounts have a dash in the error column, not No. The source's 53 accounts with statements/54 endorsed accounts are different units from table markers 56/42; the remaining account linkage has not been assumed.

Pension 2011: full sample table and actual consequences

Original, PDF29 Table 1; method PDF28 § 61 -65; consequence PDF31 § 76.

Group	Population	Sample	Error	% of report	Sample gross error 2011, DKK	Extrapolated gross, kr.
New pay	1115	64	17	27	54402	947782
Old salary	5033	18	2	11	22567	6310099
Senior scheme	22	11	5	45	29610	59220
Annual target	24	19	8	42	216505	273479
Yield	164	19	1	5	14417	124440
§ 55 addendum	40	6	2	33	97034	646893
Total	6398	137	35	14	434535	8361913

11 undertakings were selected on a risk basis. Groups may overlap in people; actual pension payments were not examined. The percentage 14 is population-weighted. The sample fraction calculated here, 35/137, is 25,55%. Gross figures include overpayments/underpayments.8.361.913 kr. is an extrapolation, rather than documented total harm or compensation. All 8 errors in 19 fixed-term-appointment cases concerned pension contributions on allowances without legal authority; one error extended 8 years back, approximately 300.000 kr. That case is already included in 8; the amount covers several years. This documents both unlawful payment and prolonged duration, but not that all 6.398 records represent unique people with errors.

Financial lines 2013- 2017, full ministerial overviews

From 2013, the company's Yes / No and Declaration columns will be replaced by the Ministerial Declaration and the business line's comments. These years must not be harmonised with 2008- 12 markers. A remark can be an improvement, follow-up, uncertainty or criticism; the column is no binary illegality counter.

Year	Controlled financial rows	Of which outside the state accounts	Rows with note
2013	206	65	57
2014	198	67	52
2015	198	69	48
2016	195	68	43
2017	197	73	26

Own enumeration of published financial table rows. A number can bring together several institutions. Financial materiality is DKK million, not damage / compensation. No merger with critical conclusions or citizens' numbers.

2013

Original. I / U = inside / outside the state accounts. Referral candidates are identifiers for source sections, never extra cases.

Material status: The financial row / scope columns of all ministerial statements have been checked, including cultural continuations. The individual legal conclusions of the observations are classified only where they appear as concrete findings in the main table; the presence of the table text is not in itself a breach of law. Other citizen / person and time findings in the bread text shall be checked separately.

Financial paragraph tables 2018- 2023, fully controlled

§ 3The Folketing has been omitted from the audit even where the table shows an amount. 2021 Joint Paragraffes; 2022-23 Collect 35-37 / 40-42. Their number of rows is therefore not the same denominator. Amount is financial activity in mio.DKK. Absence of a reservation marker is not proof of the absence of a breach of law. The statement of the state account as a whole shall be counted separately.

Year	Table rows	Of which § 3 omitted	Reservation marked paragraphs	Explicit positive 2021-23	Highlighting 2022-23

32 legal-compliance audits=31 without a critical finding+1 critical;22 management audits=20 without a critical finding+2 critical. Red text in Skat 7/B and Skat 6/7/C has been checked. The count covers 54 thematic audits, not 54 people. Table C places the Banedanmark/Bygningsstyrelsen project field under the Climate row; that table placement is retained without our own correction of ministerial responsibility.

Full follow-up Annex 2018- 2023

All 344 table rows are materially counted. The source's case totals summing 343, because 2021 finance indicates 13 cases but contains 14 rows. Summers repeat cases over years; they are not a national unique error / victim count. Tags can overlap, e.g. continued case moved to another account. Blank status means blank field, not rectified conditions.

Specific reconciliations:2019 administration section 77/PDF79 states 5 closures, but chapter 4 has 4 case sections,sections 78-81,the appendix introduction/PDF85 states 4,and 45 table rows have 5 closure markers. The fifth/PDF90 row 4 is in the financial annual report and overlaps its closures. 2021 finance/PDF40 states 13 versus 14 separate rows; no documented deduplication explanation has been invented. 2021 administration has 8 closure rows, whereas the introduction says 7 cases: payroll administration in Social/Defence appears on 2 rows but is closed jointly in section 25/PDF29.2023 administration:2 new closure proposals; education-institution funding had already been closed in another line through the memorandum of 24.8.2022(PDF32 row 1). Transfer of responsibility or completion of a network transition is not counted as a closed audit case.

Separate critical 2020 endorsement outside the state accounts

Original, Table 1 / PDF13 and Section 43 / PDF60: 4 critical statements of the ministerial audit are Treasury cases. In addition, 1 critical endorsement on health education annual accounts 2020, carried out with private auditor, outside the state accounts. It concerns activity / resource management. It is a separate actual 2020 opinion, not SSI / 2019 repetition. No addition as 5 critical statements in the ministerial audit's own population.

Materiality and Consequence of Rights

Management 2023, PDF8-9: a legal breach is assessed as material above 100 million DKK or above 10% of revenue/expenditure on the audited theme; consequences for citizens/businesses may also be included. A positive conclusion may contain delimited breaches of rules. Management 2022, PDF26 also has a 937 million DKK threshold for section 38. Finance 2023, PDF49: overall accounts 1%=17,4 billion DKK;section 38 1%=9,2 billion; ministerial graph 2% with a maximum of 1 billion DKK. Thus »positive« is a materiality conclusion, not a declaration that all transactions had legal authority or citizens obtained full redress.

Material coverage matrix and concrete residues

Year	Main figures	Ministerial / Conclusion Tables	Follow-up	Person / time
2006	Materially controlled: main conclusions and reported main denominators	All 38 ministerial-assessment totals combined; all 273 product rows across the 2 years	Original total and breakdown between annual report / memo; not all individual cases' later effective closure	Selected concrete findings; no full national personal / time coupling
2007	Materially controlled: main conclusions and reported main denominators	All 38 ministerial-assessment totals combined; all 273 product rows across the 2 years	Original total and breakdown between annual report / memo; not all individual cases' later effective closure	Selected concrete findings; no full national personal / time coupling
2008	Materially controlled: main conclusions and reported main denominators	All 613 declaration-annex rows combined for 2008-10, graphical columns/groups/overlap checked	Original total / location / transfer; non national power or person coupling	Selected concrete findings; no full national personal / time coupling
2009	Materially controlled: main conclusions and reported main denominators	All 613 declaration-annex rows combined for 2008-10, graphical columns/groups/overlap checked	Original total / location / transfer; non national power or person coupling	Selected concrete findings; no full national personal / time coupling
2010	Materially controlled: main conclusions and reported main denominators	All 613 declaration-annex rows combined for 2008-10, graphical columns/groups/overlap checked	Original total / location / transfer; non national power or person coupling	Selected concrete findings; no full national personal / time coupling
2011	Materially controlled: main conclusions and reported main denominators	All 216 table rows with Culture-continuation, Yes / No / type / amount; pension table full	29 cases total, 11 closing proposals / 11 continued / 7 second report; not separate register of all later closing dates	Selected concrete findings; no full national personal / time coupling
2012	Materially controlled: main conclusions and reported main denominators	All 207 series of tables with continuation of Culture; group 10 with dash retained	50 attachments counted; 49 previous cases + 1Culture 2013; 22 close / 23 continued / 5 move	Selected concrete findings; no full national personal / time coupling
2013	Materially controlled: main conclusions and reported main denominators	All financial summary rows; 20 ministerial declarations, new regime	All 56 rows/status overlaps; main text 16/40 and annex 17/33/6 reconciliation discrepancies retained	Selected concrete findings; no full national personal / time coupling
2014	Materially controlled: main conclusions and reported main denominators	All financial summary rows and main criticisms; 994 rows overall 2013- 17	Status count of the complete annexes,223 rows overall 2014-17; proposal≠effective redress	Selected concrete findings; no full national personal / time coupling
2015	Materially controlled: main conclusions and reported main denominators	All financial summary rows and main criticisms; 994 rows overall 2013- 17	Status count of the complete annexes,223 rows overall 2014-17; proposal≠effective redress	Selected concrete findings; no full national personal / time coupling
2016	Materially controlled: main conclusions and reported main denominators	All financial summary rows and main criticisms; 994 rows overall 2013- 17	Status count of the complete annexes,223 rows overall 2014-17; proposal≠effective redress	Selected concrete findings; no full national personal / time coupling
2017	Materially controlled: main conclusions and reported main denominators	All financial summary rows and main criticisms; 994 rows overall 2013- 17	Status count of the complete annexes,223 rows overall 2014-17; proposal≠effective redress	Selected concrete findings; no full national personal / time coupling
2018	Materially controlled: main conclusions and reported main denominators	The entire financial overview by statutory account section; the entire performance-audit overview and 2021-23 thematic matrix	All 2 annexes of the year materially row / status checked; 344 rows of 12 Annexes 2018- 23; repetitions / transfers retained	Selected concrete findings; no full national personal / time coupling

Year	Main figures	Ministerial / Conclusion Tables	Follow-up	Person / time
2019	Materially controlled: main conclusions and reported main denominators	The entire financial overview by statutory account section; the entire performance-audit overview and 2021-23 thematic matrix	All 2 annexes of the year materially row / status checked; 344 rows of 12 Annexes 2018- 23; repetitions / transfers retained	Selected concrete findings; no full national personal / time coupling
2020	Materially controlled: main conclusions and reported main denominators	The entire financial overview by statutory account section; the entire performance-audit overview and 2021-23 thematic matrix	All 2 annexes of the year materially row / status checked; 344 rows of 12 Annexes 2018- 23; repetitions / transfers retained	Selected concrete findings; no full national personal / time coupling
2021	Materially controlled: main conclusions and reported main denominators	The entire financial overview by statutory account section; the entire performance-audit overview and 2021-23 thematic matrix	All 2 annexes of the year materially row / status checked; 344 rows of 12 Annexes 2018- 23; repetitions / transfers retained	Selected concrete findings; no full national personal / time coupling
2022	Materially controlled: main conclusions and reported main denominators	The entire financial overview by statutory account section; the entire performance-audit overview and 2021-23 thematic matrix	All 2 annexes of the year materially row / status checked; 344 rows of 12 Annexes 2018- 23; repetitions / transfers retained	Selected concrete findings; no full national personal / time coupling
2023	Materially controlled: main conclusions and reported main denominators	The entire financial overview by statutory account section; the entire performance-audit overview and 2021-23 thematic matrix	All 2 annexes of the year materially row / status checked; 344 rows of 12 Annexes 2018- 23; repetitions / transfers retained	Selected concrete findings; no full national personal / time coupling

Scope remains delimited: other numeric methodology/criticism-section tables and figures for 2006-23 are not all reproduced in this module,although the main,ministerial and follow-up series have been substantively completed. Additional substantive checking appears in the supplementary analysis of specific consequences and tables below: 2018 tables 7-9, 2019 tables 5-6 and 8, 2020 table 7 and all 12 interest errors,2021 table 3, 2022 table 3 and the entire 2023 financial user-control matrix. Remaining public-table checking in these newer criticism sections comprises 2018 tables 2-6 and 10, 2019 tables 2-4 and 7, 2020 tables 2-6 and 2021 tables 1-2; older specific criticism sections have not all been numerically extracted. Effective closure dates and back payments also require individual follow-up memoranda. Rigsrevisionen must separately explain the 2012 accounts/marker discrepancy and the 2013/2021 follow-up groupings. No authority inquiry has been sent.

National audit: concrete consequences and full control tables

Complementing the yearseries. Documented populations and effective actions are separated from potential amounts and from accounting / audit markers.

2018: Working time break, Table 7

OriginalPDF34.

Company	48 hours	Rest / free days
SKAT	Yes	Yes
Banedmark	Yes	Yes
Defence Command	Not studied	Yes
Emergency Board	Not studied	Yes
Region Zealand	Yes	Not studied
Criminal services	Yes	Not studied

4/4 examined in each column;2 unexamined per column.6 entities,5 ministerial portfolios; no employee denominator.

Small Belt / Stunning	2.0	0.6
Total	8.0	6.0

3 / 4 hospitals studied, 2 regions with systematic error of assessment. The amounts include both on-call and on-call work without any specific assessment; 14 million have not been proven illegal.

2020: All 12 home / interest rate errors § 18-20

Original, PDF36-40.

Error ID	Period / knowledge	Population	Amount DKK	Facts / status
Tax Account 1	2016/2013-08-2015-10	approx. 40.000 companies	Not quantified	Interest rate without legal basis; grubbing-up not resolved
Tax Account 2	2013-2017-07	about 274.000 companies	488 million too much; 63 million too little; up to 150 million	In fact, 42 million to about 137.000, excluding compensation.
Tax Account 3	2017-07-2018-12	Enter in 2	Enter in 2	Discovered 2019-01; no separate addition
Tax Account 4	2013-2020	Not quantified	31,8 million non-eligible; 1,2 million paid / off	Converted 2013 main requirement 10- 30 million is omitted
Tax Account 5	2008-2019	56 cases; 2 accounting errors	3,9 million; 543 million	Former 4,3 billion / 830 million; 405 million overpaid to 2 companies recovered
Tax Account 6	Objections 2017-19; closed 2021-06	69 cases	207,3 million; about 35 million compensation estimates	Relief in a tax complaint did not trigger the correct interest adjustment
Tax Account 7	Determined 2020	Not quantified	Not quantified	Wrong date of return; possible obsolescence
SAP1	2019 -04-2020-12; vi den 2013	Not quantified	approx. 14 million years	Manual solution 2018; obsolescence / loss
SAP2	Since 2013	Not quantified	Not quantified	Simple interest used without the law interest rate
SAP3	Since 2013	Not quantified	Not quantified	Pension claims due late
SAP4	Since 2012-06; new duty 2019-03	Not quantified	58 million 2019 / 131,8 million 2020	Exemption 2016-03-2019-02; start-up 2020 with data gaps
SAP5	Since 2013	Not quantified	1,2-1,6 miageld; 100-130 mioannually	8,05% 2020; interest older than 3 years old

503 million = newly estimeable 2020 error; 1.167,6 million = government accounting errors including years of old. Not additive. Companies / cases / errors overlap; in particular 2 / 3. Full unique organisational / personal union is missing.

2020: DMI potential, Table 7

Original, PDF35.

Population	Number	Debt securities DKK	Potential repayment DKK
Guilders with unused capacity	606798	58	4

Potential, not documented individual injury.4 billion=3,2 pay+0,8 agreements;underestimated by approximately 0,7 billion. Ability-to-pay/subsistence objections require individual assessment.

2021: DMI potential, Table 3

OriginalPDF22.

Population	Persons	Debt securities DKK	Potential investment DKK
Payment capacity without remuneration / agreement	529715	52.1	4.8

Includes locked / covered claims; PSRMafflutions.63% of DMIperson debtors, about 80% pay / 20% others. Recurrence of persons in 2020 / 22; no addition as new misofferings.

2022: DMI potential, Table 3

OriginalPDF16.

Population	Guilders	Debt securities DKK	Potential investment DKK
Payment capacity without remuneration / agreement	600659	44.3	4.0

The potential includes 0,9 million doubtful / temporarily exempted claims; debt with only 3 months recovery at the end is deducted. Not 4 mi- liable damage. 38% of DMIs are doubtful, 40,7 billion; enterprises 53,9 million debt, 18% of unsettled company debt.

Actual post-payment 2019 after sub-payment 2017

Original, PDF80 § 79: 6 months 2017 underpayment; right up to 85% of VE / PSO, budget 195 million 2016 / 285 million 2017. Review 2015- 19. About 8 mioDKK actually paid back 2019-12. Number of unique companies and each payment date not given; the period between underpayment and post payment is documented but not individual delay days.

Full user rights matrix 2023, Table A / PDF50

Original.26 system rows × 4 control areas = 104 cells: 44 missing, 10 met, 50 not revised 2023. The 54 currently tested cells are no 54 people; 14 ministerial areas overlap with the second annual report criticism. Repeat the same system name; do not deduplicate the original rows by name.

Rigsrevisionen: the 17 remaining annual tables 2018- 2021

All tables below are checked in the original by text reading and visual reading. This complements the historical annual and impact modules; the same original cells should not be counted again. The checks shall include the tables and the surrounding method, not a new certificate of all the formulations on all pages.

Original tables

2018 Table 2 - printed page 7, PDFpage 14

Unit: mia.kr.. 2018 arrears; without foreign requirements and manuelSAP38; approach includes interest. Not loss / persons.

Movement	Amount
Primo	108,6
Supply	25,4
Recovery	-7,2
Depreciated	-8,6
End	118,2

Source: RR2018F.

2018 Table 3 - printed page 9, PDFpage 16

Unit: mia.kr.. Cut of demands. Without foreign / manual / converted; not the same population as T2.

Krav status	Amount
DMI Closed	60,2
Coverage ready, non-PSRMclear	56,1
PSRMclyde	0,0

Source: RR2018F.

2018 Table 4 - printed page 11, PDFpage 18

Unit: yes / no. System status; requirement / attachment / settlement planned developed 2019. EFI tools for the end 2018; manual application is another device.

Tools	System supported
Wages and salaries including separately	No
Forced payment agreement	No
Requirements	No
Consignment / attachment	No
Housing	No
Set-off	Yes
Voluntary payment	Yes

Source: RR2018F.

2018 Table 5 - printed page 14, PDFpage 21

Unit: DKK million / employee / month. Profit productivity; not employee error.

Zone	Average
Capital companies	4,51
Foreign	0,46
Private entertainment	0,12

Source: RR2018F.

2018 Table 6 - printed page 15, PDFpage 22

Unit: mia.kr.. Price values are uncertain estimates, not recorded or final loss of citizens. UDK is also amended by transferred portfolio. SAP38 outside.

Claim holder	Nominal 2017	Nominal 2018	Course 2018
Honey.	72,3	78,9	15,9
UDK	11,9	21,2	7,9
State Police	9,2	10,4	1,8
Municipalities	4,2	3,9	1,5
DR	1,7	1,7	1,2
Statens Administration	6,3	0	0
Others	3	2,1	0,8
Total	108,6	118,2	29,1

Source: RR2018F.

2018 Table 10 - printed page 43, PDFpage 50

Unit: mio.kr.. Three defence projects; budget, not actual losses.

IT project	Budget
Time management	100
Emergency IT	3,5

IT project	Budget
Capacity maintenance	20,5

Source: RR2018F.

2019 Table 2 - printed page 29, PDFpage 38

Unit: DKK billion / pct. SAP38 outside. Printed total is 0,1 higher than the sum of rounded system cells; the rounding note of the original is retained.

System	Amount	Share
DMI	126,7	98,3
PSRM	2,1	1,7
Total	128,9	100

Source: RR2019F.

2019 Table 3 - printed page 30, PDFside 39

Unit: balance sheet / estimate. Three routes of connection, statements of the future are not actually implemented.

System	Initial status
Tax account	45,8 million DKK development written down; break 2019; early 2021 connection expected
KOBRA	Bskat 2019 controlled; restskatJun / Aug 2020 planned, unsafe
SAP38	No expected connection

Source: RR2019F.

2019 Table 4 - printed page 34, PDFpage 43

Unit: per cent. Country statements have different positions of set-off. The comparison is not harmonised.

Country	Assumed
Denmark	98,7
Sweden	99,6
Norway	98,9

Source: RR2019F.

2019 Table 7 - printed page 51, PDFpage 60

Unit: control scope. Two different control populations; not two persons or full country control.

Revision issue	Regions	Hospital snitch
Overtime	Capital; North Jutland	All hospitals in the two regions
Other work	Capital; South Denmark	Rigshospital; Herlev; OUH; Little Belt

Source: RR2019F.

2020 Table 2 - printed page 8, PDFpage 17

Unit: DKK million / control status. Five projects, 20 control cells. Color cells visually read; budget versions different. DAC6 is 9,6 million, not 69,6.

Project	Budget	Basis	Businesscase	Steering group	Eligible budget
DUPLA	25,8	Yes	Yes	Yes	Yes
DAC6	9,6	Yes	No	No	No
Annual Report 2018	81,1	Partial	No	No	No
Annual log 2019	49,3	Partial	No	Partial	No
L4	1,0	No	No	No	No

Source: RR2020F.

2020 Table 3 - printed page 10, PDFpage 19

Unit: projects. Application models and undisclosed IT omitted. Classification is not a certificate of effective compliance.

Project class	Number
State model	17
Model non-business / risk	5
Operation	9
Borrowed	37
Total	68

Source: RR2020F.

2020 Table 4 - printed page 13, PDFpage 22

Unit: mio.kr.. Five versions of one annual declaration project 2018, not five projects.

Version	Estimated end	Eligible budget	Provisional consumption
Aug 2018	81,2	10,5	0,8
Jan 2019	70,6	10,5	28,6
Feb 2019	70,6	63,6	28,6
Nov 2019	67,7	63,6	64,7
May 2020	68,7	63,6	68,1

Source: RR2020F.

2020 Table 5 - printed page 14, PDFpage 23

Unit: mio.kr.. Six versions of one annual declaration project 2019. The Executive Board's budget is not approved by department. The final estimate is not actually final consumption.

Version	Estimated end	Non-approved budget	Provisional consumption
May 2019	10	0	0,5
Sep 2019	49,3	49,8	6,7
Mar 2020	54,5	49,8	41,4
May 2020	53,9	49,8	50,6
Aug 2020	53,9	49,8	58,7

Version	Estimated end	Non-approved budget	Provisional consumption
Sep 2020	65	49,8	59,9

Source: RR2020F.

2020 Table 6 - printed page 23, PDFpage 32

Unit: mia.kr.. Recovery proceeds, not losses. Positive 0,02 / 0,002 underlying figures and rounded totals are retained.

Tools	DMI	PSRM	Total
Set-off	2,6	0,4	3
Voluntary deposit	2,3	0,2	2,5
Wage maintenance	0	0,8	0,8
Separate wage and salary retention	0	0,2	0,2
Forced payment agreement	0	0,02	0
Voluntary payment agreement	0,3	0	0,3
Claim / bankruptcy	1,1	0,002	1,1
Other	0	0,3	0,3
Total	6,3	1,9	8,2

Source: RR2020F.

2021 Table 1 - printed page 10, PDFpage 17

Unit: DKK billion / pct. Tax contingencies after year of transmission, not annual total populations. Locked is not evidence of illegal debt. Rounding note explains possible differences.

Year of shipment	Total	Locked	Share
Before 2014	3,8	2,8	74
2014	1	0,3	25
2015	4,1	1,3	32
2016	3,8	1,6	41
2017	3,8	1,3	35
2018	3,9	1,3	33
2019	4,9	1,3	27
2020	4,5	1,3	29
2021	8,8	3	34
Total	38,7	14,2	37

Source: RR2021F.

2021 Table 2 - printed page 11, PDFpage 18

Unit: DKK billion / pct. Only six types over 1 billion DKK Same underlying requirements as T1, second breakdown; not to be added T1.

Type of claim	Total	Locked	Share
VAT	20,2	6	30
Askat	8,5	2,6	30
Interest	1,8	1,8	100
Company tax	1,8	1,1	61
AMcontributions	1,7	0,5	27
Post-declaration VAT	1,1	0,5	50

Source: RR2021F.

Voting and limitation

• 2018 T2 movement: 108,6 + 25,4 − 7,2 − 8,6 = 118,2 aligned.

• 2019 T2 system sum: 126,7 + 2,1 = 128,8 versus printed 128,9. 0,1 rounding difference; original note.

• 2020 T2 Control Cells: 5Yes + 3Partial + 12No = 20 Cells; 5 projects.Own Countdown; Not Person / Case Union.

• 2020 T6PSRM: visible subcells 1,922 against total 1,9. rounding levels maintained.

• 2021 T1 total: visible annual cells 38,6 against total 38,7 rounding note, no arbitrary correction.

• 2021 T2 selection: 35,1 total / 12,5 locked. Six types; not whole T1 population.

Additional method and impact checks

2018: Supply 25,4 includes 19,2 new claims and 6,2 interest; 8,6 depreciation includes 5,3 exceptional and 3,3 additional. SAP38 manual 1,4 billion has been omitted; 0,4 billion of the approach comes from conversion. Time management budget 38 → 100 million is not proof of 62 million losses.

2019: The original links hypothetical DKK 8,8 / 2,2 billion to Norway / Sweden. The percentage differences 0,2 / 0,9 points point in opposite order at common denominator. The allotment is maintained; the raw denominator / corrected original is required before the power amount can be used. Refers 2019 about 250.000 people / companies and 44 billion; by April 2020 cumulatively 565.000 debtors / 72,3 billion: overlap, unsummable years.

2020: the T2DAC6 budget of 9,6 million has been visually reread separately. T2 footnotes: DUPLA25,8 million budget in 2017, expanded in 2019 by 4,5 million; copies outside the project budget of 25 million for 2018 and 28 million for 2019. L4’s recorded 2,9 million includes other projects; it does not prove a 1,9 million overrun. L4 remained in operation 2 years after project completion; DUPLA reclassification occurred half a year after completion. The table measures financial governance, rather than employees/citizen numbers.

2021: SAP38 manual 1,7 billion is separate from the tax-account tables. The percentage lock is based on unrounded values;0,3/1,0 therefore cannot replace the printed 25%. T1/T2 gives neither a unique debtor union nor realised loss.

Own method analysis: An amount can demonstrate errors in registration, budget approval or recovery basis without being equal to a realised loss. The relevant further proof is the validity of the claim, the actual payment, actual damage and the date of correction. No person or liability numbers can be formed from these tables.

Sources and control tracks

• RR2018F, 70 originals; SHA256 6bc1fc95a6697e29a36d52d6c4382395090b1cddaa6b7d18c4e65c71df574525. The table is visually read; temporary control images are deleted.

• RR2021F, 44 originals; SHA256 52db66913cdaf5c2c84ff411c86eb3a6c88958e9937e388f6c64ee9a53e073f4. The table is visually read; temporary control images are deleted.

Annual review of the National Audit Office: separate populations and permanent breaks

2024: 56 audits =22 legal+14 management+20 other; 35 positive thematic conclusions/one critical. Risk-based selection, five-year rotation; a positive conclusion may contain delimited breaches of rules. Materiality:100 million kr./10%, tax sector 945 million kr.; consequences for citizens may be included.30 earlier follow-up cases. [RRAAR24, PDF8-13/49-50/53-58]

Controlled objectives	Number; own population	PDF
esas	≥ 88,7 million DKK / ≥ 44% increase; 39 m delay; 2 / 10 late references	15-17
VAT	597 associations; 35 / 35 bug applications; 562 uncontrolled; estimated DKK 21,3 million wrongly paid	22
Purchasing	124 Risk selected contracts / 11 agencies / 6 ministries; 5 / 11 management deficiencies; Health 5 / 30 breach + Geodata 1	23-29
It	13 ministries examined; 5 highlighted with shortcomings	30-35
Policy items	4 / 13 circuit; access 1 / 4; temporary overview 2 / 4; pre-recorded destruction 1 / 4; early destruction 1 / 4	38-39
Greenland	28 / 86 satellite images unread 2019-24; 6 studies; 0 control; specialist shortage 14 m / 24 m on ship	41-44
Interest	274.000 companies wrong rate of interest; 40.000 interest rates 2016. Later legislative changes and correction, follow-up case 2017- 24 will be completed	46

Debt / proceeds 2014- 24,2024 prices: 107,0 / 7,9; 122,3 / 8,1; 142,0 / 7,2; 148,6 / 9,1; 157,7 / 9,4; 167,2 / 11,1; 173,4 / 13,1; 168,2 / 13,2; 160,5 / 13,0; 181,0 / 14,8; 173,8 / 15,3 mia.kr 2024 suspended 23,1; new debt 17,7, of which 5,8 suspended → 2,8 clear + 1,9 settled + 1,2 still unclear (rounding 0,1). [RRAAR24, PDF18-21]

Patrol 2020-24, target / actual days: aircraft 220 / 221,294 / 275,365 / 171,365 / 272,365 / 311; ship-, 365 / 323,365 / 215,365 / 2 88,365 / 251; vessels-882 / 554,882 / 786,732 / 623,822 / 644.2020 ship data missing. [RRAAR24, Table 3 PDF43, visually aligned]

Own analysis: The economic materiality limit is an audit classification. It does not determine whether a particular citizen has been the subject of illegal interference. The number of audits, risk-selected contracts, authorities, companies and possibly affected users are different entities. They are measured separately. Positive conclusions should not be converted into the absence of errors when the same audit documents specific breaches of rules.

In fact follow-up November 2025

RN902 / 25: The report is closed, but other cases are moved to later annual reports. Two cases are closed in full / in part: esas because the project ended June 2024; Geodata is closed in new procurement / contract. Twelve ministerial areas are included. VAT initiative is expected early 2027; new debt 2026 / 27; police clarification first half 2026; marine environment specialists by 2026 end. Rigsrevisionen continues checking of actual implementation, also where the FDA announces all deficiencies handled. [RROP24, PDF2-10, point 7 / 11 / 13 / 17 / 29 / 31]

Own analysis: The end of the project is an explicit reason for closing the control case, although the improvement has already taken place. Therefore, closure and repair must not be treated equally. Moreover, the administrative document status continues to hide control when cases are moved to future reports; national time series must follow the critical point itself across these documents.

An institutional promise about changing practices is not actually repair either. The closure of a follow-up case must be examined for the transfer to another report, amended legislation, correction of historical transactions and actual recovery. The follow-up shall document the correction in all essential respects; it shall not provide a full person-based replacement or criminal case counter. A number of system users shall not be renamed to documented victims. The concrete evidence-keeping errors in the police forces require linkage with the criminal proceedings concerned, their outcome and responsible decisions.

The total catalogue work continues with other annual audits and special reports. Titles and document links are marked metadata until original targets, denominators and follow-up are checked. This 2024 check does not close all 20 years of content gaps.

State administration 2025: control, continued errors and actual follow-up

Financial year 2025; published 17.8.2026. The entire original 61PDFs pages are reviewed; tables 2 / 3 are visually controlled. New seven-theme model and critical scale: 57 revisions, 41 not highlighted, 16 highlighted; 43 older follow-up cases, 11 mentioned, 4 closing proposals. Five-year risk-based tour; one table marker may cover several revisions. No annual comparison of error rates without population control. [RRAAR25, PDF4 / 11- 15 / 50- 61]

Population and objectives	Controlled figures	PDF
IT procurement	31 / 172 contracts; 13 ministries above 2024-25. Culture 8 / 21; Justice 13 / 41	17-20
Culture	21 contracts ≥ 171 million DKK; ≥ 30% of 2025-t purchase. Four direct contracts: 18,1 / 1,9 / unknown / 4,2 million DKK	18-19
Justice	41 contracts ≥ 1,5 billion DKK; ≥ 22% of 2025-t purchase. The 7 contracts of the police are included among the 16 well-known problem contracts in 2017 / 18; ≥ 840 million DKK 2018-25	20
Acquisition by court	Operating contract 2014: 11 years, expected 13 years in 2027; DKK 228,5 million, DKK 113 million above; foged DKK 20,5 million; Box DKK 5,1 million.	20
Defence purchases	37 purchases 2023-25/91,3 million kr.;19 reasons,10 need,27 market documentation with deficiencies. 2025 total direct purchases≈1,2 billion kr./2%;27.000 additional knives	21-22
Health fees	17 schemes / 620 million DKK; 15 investigated / 597 million DKK; 13 imbalances: 3 surpluses 119,8 million DKK + 10 deficits 126,4 million DKK All 15 balance 273 million DKK; + 109 million DKK since 2022	23-24
Prison staff	730/≈1.900 round-the-clock duties;avg.35/employee;41/59 prisons.28,5 million kr. compensation 2022+2025 for breaches of the 48-hour limit.7.7.2026 exemption at 19/41 locations	25-26
Oxygen security	14 ministries studied, 7 major problems highlighted. Court of Justice; 30 privileged users; Fish 102. SU- system 21 years; CESA3 previous deficiencies, 1 fixed	27-36
Court data	February 2025 deleted civil data:12 days until restoration,target 28 hours	31
Banedmark	Supplier control received 9.5.2025, reviewed 10.9.2025	36
Helicopters	14 EH101, objective 8 ready to operate, ngs.6.106 / 1.268 missions 2021-25 exceeded maximum; ≤ 2% allowed. Response times 13 / 25 min day / night; 5SARs criteria, 3 not met	37-39
Fisheries control	46 straight adjustments 2025; 5 risk selected: 4 inadequately controlled, of which 2 uncontrolled	40-42

Population and objectives	Controlled figures	PDF
Assessment Appeal Board	350 members; 119,8 mio.kr.1.7.2022-31.12.2025; 21 members>100 cases, 12<5,3 only 1.7 short-term members 0 cases / 23.300 -117.500 DKK. RR model saving 85,1 million DKK / 71%	43-44
Tax-it	8 projects examined, 2 problematic; EUTK11 / 19EU deadlines exceeded; 2021 release 120 error / 41 critical; Q4 202599% imports in old system. Parallel operation: DKK 50 million / DKK 1,3 million per month BF17 ≥ 9 md.delayed / 13% above budget;>40 million p.a. intermediate consumption	44-46

Debt / proceeds, billion DKK, 2025 prices:

Year	Debt	Profenu
2014	108,8	8,1
2015	124,5	8,3
2016	144,9	7,5
2017	151,5	9,4
2018	161,0	9,7
2019	170,8	11,5
2020	179,0	13,6
2021	174,7	13,7
2022	166,4	13,5
2023	188,0	15,3
2024	180,5	15,9
2025	177,1	15,1

2025: 20,1 billion DKK non-recoverable debt due to lack of information. [RRAAR25, PDF15-16]

Final proposal: Health Network 2013- 25, Environmental Fees 2022- 25, SABA 2023- 25 of the Nature Agency and the Hunting Portal 2020- 25. Environment: 3 / 4 previous problems without significant imbalance; removal of the hunting portal's old log problem because the system is no longer used. [RAAR25, PDF47-49]

Our methodology and consequences analysis: Statsrevisorerne's opening formulation about 41 satisfactory audits does not justify declaring all underlying transactions lawful. RR's own reporting rule excludes less material problems; selection is risk-based. Oversight markers, contracts, systems and employees cannot be added as harmed citizens. The 102 privileged users are neither 102 perpetrators nor 102 victims. Payment amounts and modelled savings are not a crime account either: the boards' fixed fee model is described as the applicable scheme, while RR criticises whether it is economical.

The twelve-day unavailability of civil data is a documented actual incident; the number of families and specific case delays require incident and case registers. The working-time compensation documents payment, but the published amount does not show the number of recipients or payment for all breaches of rest-time requirements. Exemptions in 2026 do not prove the legality of earlier shifts. Closure of follow-up and replacement of systems do not prove historical compensation, responsibility or full redress. The 43-case overview includes reused, multi-year cases and references to other reports; counting again for each reference would create duplicates. Named ministers' portfolio responsibility in annex 2 is not individual criminal culpability.

The 18-year debt-collection follow-up 2008-2026, working time 2020-2026 and CØSA 2020-2026 show correction still outstanding across multiple checks. Specifically necessary data: RR's audit register with stable audit/follow-up IDs, Danish Prisons' compensation recipients and duty-roster data, the Court Administration's incident log and affected case IDs. The purpose is to link documented oversight findings with periods, affected rights holders and actual reparation without double counting.

26. Legal basis and liability comparison

Position: the meaning of the defect must be followed up to the procedure

Removal or continued separation without any necessary legal basis shall be regarded as unlawful interference with family life. If consent, competence or substantive conditions are missing, this must be examined as a concrete defect in the legality of the action itself. A procedural error may be decisive for the validity and the process may independently infringe Article 8, even where there is a need for assistance. A need for assistance does not replace legal basis and legal procedure. [R01- R04]

The precise scope of the commission’s term “administrative abduction” is as follows:the term may describe documented removal or detention through public administration without a valid basis. It is not a separate Danish criminal provision. A missing date, incorrect appeal guidance or another procedural error does not on its own prove fulfilment of every element of the Criminal Code’s abduction or deprivation-of-liberty provisions. The law must be applied separately to the action, rights holder, absence of entitlement, intent or required negligence and the specific period. This delimitation removes no documented error or actual separation. [R04-R06]

Section 19 of the Administrative Procedure Act regulates hearing of the parties; sections 22-25 regulate reasons and appeal instructions. Hearing of the parties is a procedural safeguard whose breach may cause invalidity. Specific materiality, the decision's content and any lawful curing of the defect must be examined; the authority's own assurance that the outcome would have been the same is not evidence. [R01-R02]

For each removal, the test shall follow this chain:

1. Original decision, date and decision-making body; any prompt decision and approval.
2. Documented consent of the necessary rightholders; no conclusion of the municipality's label "voluntary" alone.
3. Actual data for each legal condition, simultaneous counter-evidence and possible absence of aid.
4. Consultation of parties, access to documents, lawyer, child participation, justification and complaint guidance.
5. Actual movement, interaction and later basis for continued separation.
6. Complaint, review, remittal for reconsideration / cancellation, new decision and actual reunification.
7. Losses in each period and liability for the act or omission that created or prolonged the loss.

This chain prevents subsequent summaries from becoming evidence of their own original claims. It also makes it possible to require the termination of a continued unlawful action, even if an administrative appeal procedure is marked as having been closed.

Copenhagen: a proven chain from the municipality to international criticism

Borgerrådgiveren's original report of 24. May 2017 concerns 2013-2016. 78 selected cases became 77 after exclusion of one placement ordered by judgment. Thematic denominators vary. [R03, pp.12-14]

Control Point	Error / Investigation
Investigation not timely, where required	22/27
Child welfare assessment entirely missing	14/77
Action plan not timely, where required	14/27
Action plan completely missing	9/77
Not both study and action plan	27/77
Absence of prior child interview	17/77
Relevant consultations of the parties appear to have failed	42/76
Lack of voluntary / coercive guidance	50/70

Control Point	Error / Investigation
Lack of complaint guidance	67/76
No position on the subject	25/76
No decision on location	68/76
Established facts / concrete signs: inter alia, jurisdiction, legal basis, misuse of powers	23/77
Lack of guidance for the child about the support person	Interval 48-70 / 77
The child did not guide about the network support person, then SEL § 68 b, paragraph 4	76 / 76; guideline 0 / 76
Parents did not guide the child's network support person	72 / 73; guidance 1 / 73
Parents did not guide about their own support person, then SEL § 54	49/75
No guidance on free lawyer in relevant forced labour proceedings	3/35
Absence of justification in the decisions taken	6/24
Absence of justification in the decision on location	4/8
At least one of the procedural deficiencies examined	77/77

Source: R03, p.6-8 and 21-24. Rows overlap; the sum is not children. The Union 77 / 77 follows the report's explicit statement that no case met all the requirements examined. 23 / 77 mix established facts and concrete signs and are not 23 proven homelessness. Records were verified and modified; screening and report should not be merged. Paragraph 26 (c) of the UN Children's Committee is a later source, not a new population. [R03; UN-CRC17]

The analysis concludes that the checks demonstrate serious shortcomings in citizens' access to understand, contradict and have the interventions tried. The case-file must be linked to continuous separation and subsequent decisions in order to determine periods without valid basis and individual losses. This is a concrete investigation requirement, not a presumption of legality.

Remittal for reconsideration, return home and the time the family loses

Remittal is a legal return for reconsideration. Return home is termination of placement and coming home. A family may win an appeal without being reunited the same day. It is precisely the gap between review and actual redress that must be measured.

Ankestyrelsen’s precedent decision 108-15 states that, when ongoing assistance is remitted, the original decision is annulled and the legal position is generally restored. This cannot mechanically be translated into the same legal consequence for every compulsory placement. The specific appeal decision, any other operative decisions and the basis for every subsequent day must be disclosed. A new decision does not erase loss already suffered. [R07]

Time	What is to be documented?	Consequences
T0 operations	Decision and actual implementation	Separation begins
T1 complaint	Reception and re-evaluation	Time before external review
T2 remittal for reconsideration / cancellation	Precise legal procedure and grounds for error	Initial period
T3 new decision	Self-employed and legal basis	Time for a new administrative position
T4 actual return	Actual date, contact and support	Length of the entire separation
T5 redress/responsibility	Help, compensation, investigation	Time for effective remedy

T2−T1 is appeal processing. T3−T2 is the time after remittal for reconsideration until a new decision. T4−T0 is actual separation. T4−T2 shows whether a favourable appeal decision is followed by prompt redress. None of these periods can be replaced with an average for the Appeals Board’s part of the course. Contact is recorded alongside: number of visits, hours, cancellations, supervision and distance. The table is a measurement model, not invented national statistics.

The child's law in the controlled version of the law provides for a period of repatriation of **up to six months**, not a general requirement for six months' additional separation. The deadline of **seven days** in the case of a request for termination of a voluntary placement, it concerns a return decision, not necessarily a physical return. Complaints about children and the decision of the Youth Committee do not have suspensory effect in principle; exceptionally, the Director of the Appeal Board may decide to do so. There is access to judicial review. [R08, § 100,102,146-148]

The legal conclusion of the report is that these schemes **rapid review and concrete assessment of the continued basis;** It is essential. Absence of suspensive effect is a rule of implementation; it does not grant immunity to the cashier and does not make an invalid decision legal. A period of repatriation cannot subsequently provide the legal basis for a previous unlawful act. Support and organisation must be assessed according to the specific child and family life, not used as an automatic additional waiting time.

The ECtHR's Grand Chamber holds in *Strand Lobben*, §§ 205 and 208, that reunification efforts must take place as soon as reasonably feasible, and that the obligation increases with time. Authority-created erosion of family ties must not become a justification for permanently severing them. This is a central argument against a chain in which restricted contact and slow case processing first create distance, and that distance is then used against the family. [R09]

Errors in homelessness cases are documented

FOB 2018-33 examined four randomly selected cases among 12 returns home in one municipality. All four lacked a revised action plan and prior child interview; three cases involving children over 12 lacked notification to the child; two statements of reasons to parents were insufficient. The error categories overlap. The investigation proves errors in the return-home process, not four earlier placements without legal authority. [R10]

Quality and time must therefore be measured in both directions: by removal and by reunification. The child's participation and specific support cannot be deleted from the analysis simply because the municipality describes a course as completed.

Responsibilities of civil servants and comparison with private individuals

There has been no evidence of general personal immunity for case handlers. The Criminal Code has provisions on public service, including sections 150,155- 157. According to Paragraph 81 (8), abuse of a public position may be an aggravating circumstance. Liability requires that the conditions and claims of the specific provision are fulfilled. Management responsibilities must be independently examined and must not end at the individual case manager. [R05]

Sections 19-20 and 23 of the Liability for Damages Act may limit the employee's personal liability in damages and the employer's recourse. This provides significant protection against personal financial consequences. It is not criminal immunity and does not extinguish the authority's or State's responsibility. [R11]

Tracks of responsibility	The decisive question	Specific requirements of the citizen
Validity of decision	Is there a legal and sufficient basis?	Setting aside, fresh review, cessation/redress
Compensation and compensation	What liability, loss, causal link and remuneration basis?	Specified requirements against proper accountability
Legal liability	Which duty was disregarded by the employee/manager?	Independent investigation and reasoned outcome
Personal criminal liability	Does action / omission and guilt each link?	Specific notification and investigation
International State responsibility	What contractual obligation did a sane body break?	Termination, effective remedy, repair

Penal framework of the law: only if the conditions of the offence were met

Destination	Action	Controlled criminal framework
§ 215, § 261	Child under 18 is excluded from proper authority / care; illegal immigration	Section 261: fine or imprisonment up to 4 years; qualifying conditions up to 12 years
§ 150	Abuse of a public position for illegal coercion	Prison up to 3 years
§ 155	Abuse of a public position for infringement of rights	Fine or up to 4 months; unwarranted benefit up to 2 years
§§ 156-157	Duty or gross / repeated negligence	Fine or up to 4 months; special managers up to 1 year in the 2025 version
Law of the child § 209	Helping to escape / hide the placed child	Prison up to 2 years

Sources: R05, R08. The punishment framework is not the actual punishment. The law and obsolescence of the year of action must be checked; the sharpening of managers in 2025 must not be applied without further ado to older actions. Paragraphs 156 to 157 provide for a special exception for public office to be chosen; this exception does not constitute a general exception to other criminal provisions.

The Director of Public Prosecutions' checked practice overview provides actual points of comparison. The source chain is **judgment discussed in the prosecution's overview → the overview's summary → the table**; full judgment documents have not been reviewed here. [R06,pp.12-14]

Court reference	Actual separation / action in summary	Punishment
TfK 2013.338V	Two children, approximately 1 ½ hour; parent without custody	20 days conditional; short duration and about 5 ½ years of proceedings were included
TfK 2014.801E	Child, almost 10 months	6 months, of which 3 conditional
TfK 2015.1182E	Child, 33 days	40 days conditional on community service
TfK 2017.684 / 2V	Played child taken to Ethiopia	4 months, 30 days to be served
TfK 2019.1332E	Child led to Syria	1 year and expulsion

The illegal separation of individuals may thus lead to imprisonment, even at short notice. The strongest sustainable issue in the comparison is: **Why has a documented public intervention been unjustly investigated? For the relevant personal responsibility, and who has secured an end in the meantime?** The answer requires the act of the case, not an assumption of public immunity.

There is no basis in the material for claiming that any municipal procedural error would give a private person the same penalty as § 215. A home-free removal and a short or long private detention must be compared with the actual act, duration, loss of access, awareness of the lack of justice and the claim for the debt. There may be specific public duties in addition to ordinary crimes. A low number of criminal proceedings may be evidence of inadequate investigation; this does not in itself prove that a particular employee is punishable or guilty.

An official police announcement on 28. March 2023 reports two years' imprisonment following nine years' withholding of three children in Lebanon. It documents the reported district-court decision, rather than finality after a possible appeal. [R12] A 2026 supplement is a prosecution announcement of 30. June 2026 about one child concealed from November 2024 to March 2026 and a sentence of 1 year 3 months. Reunification occurred in March 2026. This is one case, rather than a new full-year statistic. [R13]

Time can weaken responsibility without abrogating the infringement

In the introduction to Chapter 9, the Tibet Commission notes that possible criminal liability was outdated and that the liability of the service was made more difficult by time and resignation. This documents a mechanism in which late hedging can reduce the real possibility of personal responsibility. It is something other than statutory general immunity. [R14, p.987]

The report therefore demands simultaneous time measures: time to redress **and** time to assessment of responsibility. A supervisory case opened or closed only after several years must be examined to determine whether the authority in the meantime allowed interventions to continue, evidence to be

lost or liability parent. Individual limitation periods shall be calculated on a case-by-case basis after determination, timing and any interruption.

Ministers, officials, police and institutional knowledge

The Court of Impeachment's judgment of 13. December 2021 documents an intentional breach of ministerial duties through implementation and maintenance of an unlawful accommodation scheme for asylum-seeking couples. The period of culpability was 10. February-18. March 2016.25 of 26 judges found guilt; the sentence was 60 days' immediate imprisonment. The judgment must not be converted into a specific number of unlawfully separated families without checking each couple and the relevant period. [R15]

The Tibet Commission II documents a practice of illegal police orders in demonstrations and examines ministerial and managerial influences. The historical events 2002 / 2004 are used as prehistory; events 2012 / 2013 are in the reporting period. The Commission's 2022 conclusions are based on a broader source base than the 2017report. A previous summary of authority must therefore not be the last step in the evidence chain. [R14, § 9.7]

Minkkommissionen's 2022 report and Folketinget's subsequent consideration form a track concerning the 2020 decision, legal authority, communication and duties of office. The commission was not to determine ministers' criminal responsibility. The report refers to commission material and Folketinget's own documents; complete volume 2 could not be checked directly in this review and is therefore not used for an independent conclusion on each person's culpability. No count of »all mink« as culled without legal authority, or animals as numbers of harmed citizens, is presented. [R16-R17]

The Egely Inspectorate documented two incidents of locking young people without the necessary legal basis. The region's reference to a less intrusive solution could not create a legal basis. It is a concrete example of why good intentions or the practical needs of an institution do not replace a legal basis. [R18]

Across these tracks, the key question of knowledge is: **When did the body receive sufficient documents, what obligation triggered it and when did the practice actually stop?** An action plan or ministerial response documents a reaction, but not that the error ended. Ex post verification of decisions and concrete consequences must be required.

State responsibility, positive obligations and international law

ECHR Article 1 obliges the State to secure rights within its jurisdiction. Articles 2 and 3 may trigger protection and investigation duties; Article 8 covers family and private life; Article 13 requires an effective remedy for an arguable claim of a violation. The thresholds must be examined under the specific article. A public procedural error is not automatically torture; nor may a well-substantiated allegation of serious ill-treatment be reduced to an internal administrative error. [R04]

For interference, Article 8 requires legal authority, a legitimate aim and necessity/proportionality, together with a decision-making process protecting affected interests. Under relevant conditions, authorities also have positive duties to support family life and reunification. An intervention may be unlawful because of insufficient procedure even where the State invokes a protective purpose. Child and parents are separate rights holders; the number of parents cannot simply be assumed to be twice the number of children. [R04,R09]

The ILC's articles on State responsibility deal with state bodies, including local bodies, and public acts in addition to competence. Therefore, the State cannot reject international imputability solely by exceeding its authority by a municipality or employee. A breach of a binding obligation still needs to be identified. Termination, non-repetition and repair are key legal consequences. The articles are a codification work, not a ratification treaty as a whole; the normal legal status and application must be assessed for the relevant rule. [R19, Art. 2,4,7,30-37]

Critics from UN committees and the CPT document concrete control findings and state problem knowledge. It must not be interpreted as as being as many convictions. On the other hand, repeated warnings may have a decisive impact on evidence when investigating future omissions: the material can demonstrate that the risk was known before a new family or patient was hit. Each such argument must show the recipient, date, applicable practice and subsequent omission.

UN Disability Committee 2024 criticism of late or insufficient support for parents with disabilities makes it necessary to test the chain **lack of support → functional assessment → placement / adoption**. If public negligence has created the situation that has since been used against parents, the causal link must be presented. The criticism does not contain a number of illegally separated disabled families. [FN-CRPD24]

The UN Committee against Torture's 2023 criticism of an excessively narrow focus on individual criminal culpability supports three separate investigations: what happened; what State responsibility exists; who can personally be punished. Absence of a conviction does not, on its own, answer the first or second question. [FN-CAT23]

Responsibility to Protect and International Crimes

The R2P of the UN 2005 Final Document, § 138- 139, concerns protection against genocide, war crimes, ethnic cleansing and crimes against humanity. The political framework is not a general system of complaints for management errors and does not provide an automatic basis for international intervention. The material of the report must be examined through the conditions of the specific crimes before R2P is invoked as other than a track of investigation. [R20]

Rome Statute article 6 on forcible transfer of children requires, among other things, a protected national, ethnic, racial or religious group and specific intent to destroy the group in whole or in part. Article 7 requires, among other things, a widespread **or** systematic attack directed against a civilian population and knowledge of it; the individual underlying act and other contextual requirements must be proved. War crimes require a relevant connection to armed conflict. A high administrative error rate does not on its own satisfy these elements. [R21]

Denmark introduced new provisions on international crimes through Act 1674 of 30. December 2024, entering into force on 1. January 2025. These include a separate criminalisation of torture. The law in the year of the act and the statute’s special retroactivity rule must be checked; the entire new chapter cannot simply be applied to acts from 2006. [R22]

The strongest documented conclusion of international law in this material is that tampering by local and central bodies can trigger **State responsibility and effective resolution requirements;**, regardless of whether a particular employee is convicted. There has been no evidence here of the further context and intent that would bear a global conclusion on genocide or crimes against humanity. It is a precise definition of these designations; other proven illegality stands.

Specific protection against sanctions in healthcare incident reporting: scope, time and the citizen's accountability track

There is express statutory protection against sanctions resulting from reporting adverse events. It must be included in the comparison of responsibility. The protection applies to a particular reporting basis and group of people; it provides no legal authority for harm, coercion, deprivation of liberty or separation. Nor may it be overlooked by stating only generally that public employees can be punished. [UTHP03; UTHP20; UTHP25]

Controlled rule versions and time

Version	Protected persons and sources	Documented rule change
2006	The reporting health professional; Patient Safety Act 429/2003,§ 6	The Act had entered into force on 1.1.2004. It protects against consequences of one’s own reporting; not every treatment or error.
2007-2008	Reporting Health Officer; Section 201 of the Health Act 2008 version	§ 277 indicates the transition 1.1.2007 and the repeal of the patient safety law. No new general impunity.
2011	Reporting person; Guidance 1 / 2011, Section 8, PDF6	The guidance explicitly distinguishes between reporting bases and sanctions on a different basis.
From 1.1.2021	Rapporteur **and healthcare professionals involved in: reporting;**; Act 1855 / 2020, § 1 nr. 4-5, § 5	Protection of identity and protection against sanctions are both expanded. This part enters into force on 1.1.2021, not 1.7.2021 as for the Act's special appeals-board part.
March 2025	The same extended population; Health Act 275 / 2025, § 200- 202, PDF43	The protection includes disciplinary investigation / measure, supervisory response and criminal penalties where the following is based on the reporting.
From 1.5.2025	Act 406 / 2025, § 1 and § 4, whole 2 pages	Administration and analysis are transferred to designated Regional Council; § 201 is not repealed. STPS shall continue to receive anonymised thematic, oversight and learning reports.

The source chain is the specific statutory versions and the amending Act's entry-into-force provision. A later consolidated Act is not a retrospective description of the entire 20-year period. The table documents the stated versions; it does not purport to review all amendments to the Health Act's other provisions. [UTHP03;UTHP08;UTHP11;UTHP20;UTHP25;UTHP25A]

Protection of the information base shall be separated from responsibility for the action;

Guide 2011 paragraph 8 states that the Patient Ombudsperson could not raise disciplinary proceedings or deal with a patient complaint on the basis of the statutory reports to the central database. The same paragraph states that other evidence may lead to penalties. It is a concrete barrier between the learning register and individual sanctions cases. [UTHP11, PDF6]

For the citizen, therefore, the chain of responsibility requires simultaneous records, medical and forced logs, own inquiries, testimonies, decisions and other independent evidence. An authority may not refer solely to the protection of the report in response to a documented other basis; it shall identify which material is protected and which other information is to be investigated. At the same time, an alert shall not be converted into a documented offence or criminal offence. The actual source of evidence and causality must be maintained for each action.

Public and private: the relevant comparison

Section 202, subsection 2, of the Health Act extends reporting rules to private hospitals. This protection is therefore not in itself a privilege available only to public employees against private practitioners. Comparison must concern the same rule and evidential basis. It is separate from liability limits in the Liability for Damages Act, special exceptions for elected offices and the specific fine exception in Greenland's 2026 Compensation Act. [UTHP25,PDF43;R05,R11;GL-K03]

Child abduction by a private individual must still be compared with public separations through the actual course of conduct, legal basis, culpability, duration and judgment outcome. The UTH rules give a municipal caseworker no general permission to separate children and parents without a valid basis. Whether a specific healthcare action within a sequence falls within reporting protection requires the specific action, actor and information source.

The citizen's time, information and repair

The 2011 guidance, section 7, states that the reporting scheme does not in itself require the patient to be informed of the reporting itself. Section 7.1 also describes healthcare professionals' separate duty to inform about injuries that may be assumed to confer entitlement to compensation and assist with notification. These two matters must be kept separate: no duty to disclose the database report does not remove the compensation information described. Actual compliance requires the patient's record and information given. [UTHP11,PDF6]

Reporting and analysis are not cessation, treatment or payment. The 2011 rules specify 7 days for staff reporting and 90 days for local onward reporting. These are reporting deadlines, not a promise of clinical or financial redress within 90 days. The same historical guidance excludes, among other things, incidents in the Prison and Probation Service from the reporting duty; national incident statistics therefore do not exhaust health-care errors in State institutions. The report's later 2025 ministerial documentation of non-retention in the Prison and Probation Service must be examined in its own responsibility track. [UTHP11,PDF3,5;KFUTH25]

Party-oriented liability requirements and evidence testing

Conclusion: The report's specific protection of penalties must be recorded together with an independent track of responsibility from the other original evidence. **Statement by the Authority:** Legal text and guidance protect against sanctions as a result of reporting. **Original proof:** They controlled § 201 versions, the Amendment Act 2020 and the precise limit of the guidance. **Deficiency to be investigated:** Whether a specific authority has made protection a general refusal to examine other evidence. The report does not claim that this has happened in each reported event. **Rule:** The specific health, criminal and liability rules as well as the relevant EMU obligation. **Action / omission:** Identify the treatment, the procedure, the knowledge and the actual subsequent examination. **Legal deviation:** Try each stage of duty and apply protection only within its documented scope. **Consequence:** Continue to record loss of liberty / integrity, loss of treatment and financial loss from actual dates. **Responsibility:** Institution, management and concrete employee according to their own rules. **Requirements:** [UTHP11; UTHP20; UTHP25; R04, R05, R11, R19]

Documented: existence, extension and precise scope of reporting protection. Hypothesis: specific misuse of the rule to avoid responsibility on another basis. Missing material: individual sanction/inadmissibility decisions, evidence actually used and implementation dates. The strongest argument is to demand individual assessment of responsibility from independent sources without awaiting or confusing closure of the learning register with the citizen’s reparation.

Rights, consequences and responsibilities

The report shall make documented criticism a verifiable chain: the Authority's concrete statement, the original proof, the legal discrepancy, the concrete citizen's consistency and the continuing failure to restore the situation. It must be seen where the state knew a problem and continued or failed to correct it. The end of a control institution, the remuneration paid and the actual restoration of a citizen are carried out as three different events.

Legality matrix for the legal final review

The table is a control structure. Each rule and its conditions must be summed up against the actual original material contained in the main report; the list does not constitute a finding that any error automatically infringes all the rules mentioned.

Documented action; or non-compliance;	Legal review fields	Original certificate required	Direct impact accounts;	Restoration to be undertaken checked
Child is removed, family separation continues, relationships are restricted	Home and validity; EMRK 8; CRC 3, 9, 12; CRPD 23 for disability	Decision and day-to-day rule, hearing of parties, justification, review, child's own involvement; documented location and schedule of visits	Number of children and parents, days separated, actual contact, lost family relations and injury	Remittal, new decision, actual return home/reunification and compensation, each with its own dates
Deprivation of liberty, restraint or inhuman conditions	EMRK 3 and 5; CAT; CRPD 14-17; day-to-day coercive measures	Journal, start / stop, justification, monitoring, alternatives, health follow-up and original recordings	People, episodes and hours separately; injuries, deaths and persistent consequences	Actual cessation, treatment, independent investigation, sanction and compensation
Prolongation and refusal of compensation	EMRK5, including paragraphs 3 to 5, subject to specific conditions; § 762,768 and 1018a of the Danish Code of Procedure	All orders and periods, actual release, prosecution/judgment outcomes; original compensation reasoning and causal assessment of the person's own fault	Days of deprivation of liberty, sequences and people separately; lost earnings, work and family contact	Repayment of damages, actual payment with interest and outstanding loss; judgment in damages is not automatically in breach of all orders
Absence of mandatory submission of long-term storage extension	Section 768 a of the Code of Procedure and the relevant order for reference, checked by time	LV19 pp. 3-4 records 16 missing submissions; check each request, time limit, order and the responsible person’s knowledge	Actual continuation and persons concerned are not quantified by the 16 registrations	Identification and verification of all processes involved; subsequent management initiative is not individual restoration;
Health errors and non-preservation of UTH information in prisons	Specific treatment / updating of evidence; EMRK2 / 3 and effective investigation after condition testing; the explicit exception of the UTH scheme is separate	Journal, medicine log, reporting, time of authority knowledge, processing and subsequent conservation; KFUTH25, p.2-3	Persons, events, damage and waiting period separately; West's 38 local events are not national total	Actual treatment and remedying, independent investigation, secured proof and concrete liability / compensation
Disciplinary cell, security cell/restraint, exclusion and their judicial review	Sentence-enforcement rules then applicable, legal basis/proportionality/procedure; ECHR3/5/8/13 according to the nature of the matter; §120 and transition under Act 661/2024	Action and cessation records, underlying decision, sample / chain dates, PBN application and actual implementation; KF24, p.39-43,54-56	Intervention, man and duration separately; 2024 departure 141 and status 148 shall be maintained without tacit uniformity;	Actual cessation or release, treatment, payment and liability; changed decision and effect are own events

Documented action; or non-compliance;	Legal review fields	Original certificate required	Direct impact accounts;	Restoration to be undertaken checked
Child with disabilities excluded from municipal services	Disability Discrimination Act sections 5,7,10 and 11 as applied in KEN9536/2021; relevant CRPD5,7 and 30 following specific examination	Access rule, support needs, municipality justification and actually investigated less intrusive means	The child's loss of participation; parents' documented follow-up separately	Actual access with necessary support, reimbursement and concrete follow-up
Police violence or inadequate investigation	EMRK 2 / 3 and their procedural duties; 13; CAT 12-14	Evidence of the event, independence, investigative steps, timeline and grounds for closure	Victims, injuries, lost evidence and loss of trial opportunity	Investigation reopened, proofs secured, liability processed, compensation
Social aid is refused or reduced on an inadequate basis	Daily social law; official principle, equal treatment, proportionality; concrete CRPD / CESCR right	Needs, relevant acts, decision, measurement and whether the actual needs were later met	People, support without delivery, self-payment, loss of function, health and participation	Remuneration, actual support, rehabilitation and compensation
Wrong record, unsubstantiated statements, lack of access to documents	Administrative law, disclosure, data protection; EMRK 6 / 8 / 13 by specific scope	First source, all subsequent reproductions, changes, omissions and simultaneous objections of the party	What decisions were based on the information, which people were affected and what damage was done?	Correction, deletion / rectification, defence, resumption of secondary decisions
Issue despite genuine risk or provisional measures	EMRK 3, 8 and 13; CAT 3 / 22; ICCPR 6 / 7; CRC by specific case	Risk information, receipt by the State of the provisional application, expulsion time and residence conditions	Actual expulsion, travel, family split, deprivation of liberty, concrete damage	Actual return, stay, security and compensation; resumption alone is insufficient as counts
Discriminatory law or practice	ECHR14 taken together with the relevant right; CERD/CEDAW/CRPD; equal-treatment rules	Criterion, basis for comparison, cause, effect and original complaint decision	Persons concerned and losses; an inspector may count cases without knowing all persons;	Practice / law amended, previous cases identified and specifically restored
Unreasonably long treatment or loss of redress	EMRK 6 / 13 where applicable; EMRK 8's positive duties in family matters	Complete timeline, authority periods without action and impact on result	Days / years for each event; permanent loss of family relations, support, evidence or claim	Rapid and effective new decision, effective effect and remuneration
The state fails to protect against private abuse	Specific EMRK 2 / 3 / 8-obligation; CRC / CEDAW / CRPD and day-to-day protection rule	Actual knowledge of the Authority, risk assessment, availability of effective steps and concrete omissions	Repeated assaults, damage and loss of protection	Actual safety, effective investigation, liability and compensation
Overseas military operations	Jurisdiction, relevant humanitarian law, State responsibility and specific elements of crimes; R2P's special thresholds	Original operating order, control of persons, surrender, knowledge of risk and simultaneous reports	Consequences of deprived, injured, dead and families, with actual identity / overlap	Investigation, remedy, liability and restoration; refusal of jurisdiction cannot be interpreted as proof that the act did not take place

Five accounts showing the real impact

The oversight account describes what was complained about and reviewed. **The error account** describes the specific departures established. **The person account** describes documented applicants and other directly affected people. **The consequence account** describes what actually happened to them. **The responsibility and redress account** describes who knew of the problem, who had to act and what was actually done. The five accounts must be linked through document and case identity; their totals must not be added together.

A series of 385 decisions examined can document many errors and several errors in the same decision. It is neither automatically 385 unique persons nor an estimate for all decisions in Denmark. The placement of one child may affect two parents and siblings. These people must be included in the impact accounts when they are documented; a mechanical factor three would conceal which family members are actually identified.

Word choice and local legal clarification

Write the documented action specifically: "The authorities refused the entire compensation for 240 days in addition to the penalty; DKK 408.000 was not confirmed until 673 calendar days after the release" shows both loss, incorrect outcome and trial time. The time in the replacement process must not be converted into continued detention. When an intervention specifically lacks the legal basis, it must be said unequivocally. At the same time, in the case of an application for placement, it must be specified whether the error found affects the place of placement itself, the compulsory procedure, the individual action or anything else. An established lack of legal basis for supervised contact is not evidence that all locations in the population studied lacked legal basis.

"Administrative abduction 'may be used as the descriptive designation of a specific unlawful action by the applicant if the report shows at the same time the actual separation and the relevant lack of home space. Where the name is presented as a criminal offence, each relevant criminal scene, including subjective conditions and the individual's liability, shall be tested separately. The criticism of the intervention itself must remain strong, even if a particular criminal link still requires further proof.

In comparison with private individuals, the comparison must keep action, consistency, home status and subjective conditions fixed and only change the role. "The same concrete detention without legal basis" is a useful comparison; two different courses of action are not the same simply because both include the removal of a child. State responsibility, employer responsibility, disciplinary responsibility, ministerial responsibility and criminal liability shall each have a documented rule and subtraction.

The PB01-PB03 shows this with a full original chain: two defendants, one child, the prosecutor's claim 2-3 months in prison and the acquittal of both in the District and the National Court. The description of the defendant, the penalty imposed by the authority, the evidence and the person actually determined shall have separate columns. This local correction does not negate any proven lack of home space by public intervention.

The PU22 has another proven outcome: 40 days of conditional prison and 60 hours of community service for a private evasive period of 37 days' time; the second defendant has been acquitted. All six original pages have been read. At the same time, the reproducible family law premium of the Criminal Court criticises the basis at the original time and allows later stay / time to be included in the maintenance. The two decision tracks shall be tested separately. An embedded reproduction of family law is not a full reading of its own documents; criticism and document requirements are in the 2022 judgment module.

Mandatory fields of the Time Account

For each documented person, it shall read: first intervention; first objection; first proven knowledge of the error; complaint; decision on amendment / termination / remittal for reconsideration; new decision; actual cessation of the intervention; actual reunification / return / aid; reimbursement; liability and actual follow-up. Calculate the intervals between the events. An empty date means a specific unannounced event and must not be set equal to the date of the appeal decision.

The following oversight tracks are already documented in the international modules: A.H. 2370/2014 has three different events, reopening, return and asylum. CRPD Domina/Bendtsen has reopening in 2018 and permanent residence in 2022; Mikkelsen has a concluded UN follow-up dialogue with a negative implementation assessment in 2025. ECtHR Aggerholm has compensation paid and execution supervision still open. These must be used as specific examples of why the accounts must be kept separate.

The national chains show the same distinction. ERVA01 documents an incorrect complete refusal and a later award of 408.000 kroner, but no actual payment date. ERVA02 documents early part-payment and the mother’s account of the children returning upon her release; a favourable High Court outcome 875 days later does not prove restoration of health or work. ERVA03 documents notification delayed by 273 days, but also a maintained refusal of compensation. KEN9536/2021 documents unlawful discrimination and 5.000 kroner awarded after 961 days, while payment and access are unknown. The favourable result must not conceal the independently documented errors, consequences and open implementation links.

Historical deprivation of liberty must be read with both time and annual version. The 2011-12 QlikView transition, 2017 recalculation and 2021 transition to actual release change populations and endpoints. Earlier deadline tables had a documented incorrect endpoint. Authorities' known registration problems and follow-up must be examined as a separate accountability track while each citizen's orders and actual interventions are examined specifically.

Isolation courses have their own unit: 2019 s 15 periods relate to documented 13 people; the 19 historical records of children cannot be deduced by public tables alone. Compliance with an absolute maximum time limit alone does not demonstrate necessity, the child's special conditions, proportionality or the correct grounds for order.

Ankestyrelsen’s scrutiny targets require the same distinction: 13 weeks was replaced by 30, and around 35 weeks in 2025 also exceeded the new target. Closing scrutiny under the new benchmark does not document actual redress. The original remitted sanctions case has 97 calendar days from appeal to remittal, 44 until municipal forwarding and 53 afterwards; the printed week figures cannot replace these events. Distinguish administrative targets, specific statutory deadlines and applicable Convention duties. [AT02, physical PDF33-34; AT07, pp. 3-4; AT13, pp. 8-11]

Source and verification

The matrix’s actual examples must refer to the report’s original source cards in fn-individuelle-klagesager.md, emd-fuldbyrdelse-regnskab.md, hudoc-doms-og-personregnskab.md and the specific national case chapters, including varetaegt-primaere-erstatningsforloeb-og-genoprettelse.md and handicap-barn-musikalsk-legestue-tid-og-ansvar.md. Legal rules are documented with original text and the precise provision in the main report’s legal analysis. The matrix connects right, original evidence, consequence and demand; the specific legal assessment is in the documentation chapters mentioned and chapter 28.

Additional original controls: long-range -product range -2011-2023-original controls -md / .json and isolation-originals -boern- time-and-versioner.md; original URL and locators are available in the final source lists of these modules.

Prison and private-responsibility chains: kriminalforsorg-indgreb-proevelse-og-sundhedsblindhed.md, kriminalforsorg-originale-tabeller.md and privat-boernebortfoerelse-originaldom-og-anklage.md. The prison module’s review scope is 45 tables/598 data rows from selected chapters in three publication versions, not full reading of all annual originals.

Time control: ankestyrelsen-time-control measurement and effective protection; md; and ankestyrelsen-original time and time tables. Md; control targets, original dates, weighting and case closures follow their own populations.

Private child abduction: original judgment, criminal claim and legal basis

A concrete criminal case must be divided into indictment, claim and actual outcome

Copenhagen District Court, 16. January 2017,SS1-23445/2016,and Eastern High Court, 7. June 2017,S-218-17,provide a complete checked source chain for a mother and her mother who were charged under Criminal Code § 215,subsection2. All 3 pages of the District Court judgment, 6 pages of the supplementary court record and 5 pages of the High Court judgment were read directly in the published originals. The three documents concern the same case, two defendants and one child; they are not three abductions.

Search	Original information	Legal / census significance
Period of the concession	23-26 February 2016, exit from Spain without father's prior consent; child born 2013	Title of indictment, non-independent evidence of criminal activity
Punishment	Prosecution sought 2-3 months’ immediate imprisonment; district-court judgment 1	Alleged penalty, not sentenced and not a general penalty rate
Administrative basis	Temporary residence decision 22 February 2016; it was not known whether the decision had been notified to the mother; urban judgment 2	A decision, its notification and the addressee's knowledge are separate evidence
Legal delimitation	Both parents had joint custody; the pending case concerned residence; the 2-3 judgment of the City Court and the 5	Pupils and custody should not be assimilated to criminal submission

Search	Original information	Legal / census significance
Actual Outcome	Both defendants were dismissed in the local and national courts; the national courts applied the wording and the principle of criminal legality.	In fact sentenced penalty 0 in this particular course of proceedings; no further conviction is inferred from the defendant's allegation
Actual consequence produced by the mother	Legal Book 2: Accelerated return journey after information on possible Interpol search and first contact 21 April 2016; national court judgment 3: at that time 19 days without having seen the child	Documented explanations in the original courtbook; residence / visits and decisions are necessary before independent determination of the entire period and responsibility of the authority

The Landgericht held that the mention of residence by the processor could not extend the criminal territory against the wording and the terms of Paragraph 1 of the Criminal Code. It is not a decision on the legality of any subsequent decision to stay / stay or the accelerated return journey. These matters must be examined on their own original decisions and rules.

The originals also show differences in the source chain: the mother disputed the police report's account of when she learned of the residence decision; the grandmother disputed its account of whether the host in Spain knew of the journey. The father's testimony concerning the municipality's recommendation to report the matter and apply for temporary sole parental responsibility is on court-record p. 5. These are disputed accounts and witness testimony respectively. None becomes an independent fact through repetition in an authority's case. Original messages, tickets, decision notifications and the police's contemporaneous audio/statement material are the relevant verification sources.

The importance of the comparison between private and public separation

The report’s notices of judgments concerning private individuals and its case-law overview show that documented criminal child abduction can lead to imprisonment. This original chain also shows why a requested sentence must be distinguished from an imposed sentence, and why the specific missing legal element must be identified. Comparison with public interventions must use the same relevant elements of the act, rights, culpability and period. It must not assign every procedural error the 2-3-month sentence requested here, or present the acquittal as legal authority for another public intervention.

Conclusion→authority’s statement: prosecution and a demand for immediate imprisonment. Original evidence: district-court judgment pp.1-3 and High Court judgment pp.3-5. Deficiency in legal characterisation: disagreement about residence did not satisfy the wording’s disagreement about parental responsibility. Rule:section 215,subsection2,the then Parental Responsibility Act section 3,subsection2,and Criminal Code section 1. Conduct: departure with the child as described in the indictment. Departure/outcome: the basis for criminal liability could not sustain conviction; both acquitted. Consequence: prosecution and the described family/contact consequences require separate investigation. Responsibility: no criminal culpability is attributed to those acquitted; possible responsibility for other official acts requires the specific chain of legal authority/knowledge/loss. Demands: complete contemporaneous documentation and independent review of return home, later changes in parental responsibility, contact and possible compensation.

Private evasion 2022: actual punishment, time and the Authority's created situation

Conclusion: 37 days evasive gave 40 days conditional prison

The original overall judgment from the Public Knowledge Base of the Public Prosecutor's Office contains the Court of First Instance in Aarhus judgment of 31 March 2022 and Vestre Landsret judgment of 16 June 2022, S-0833-22. All six PDFs pages have been read. The mother T1 was sentenced to keep the child X1 hidden from March 30 to May 6, 2020: 37 calendar days of date. The sentence was 40 days in prison, conditional on 60 hours of community service, a longer period of nine months and a trial period of one year. The court confirmed. The defendant T2 was dismissed on the ground that the alleged financial contribution had not been proven. [PU22, physical PDF1-6]

It is one family and one evasive period, not two new children in two agencies. The judgment is a concrete example of a criminal offence within the period of the report. It provides a documented comparison point for the user's question of public and private accountability. It does not automatically document the punishment a particular public servant would receive: action, lack of right, intention, involvement and the relevant crime description must continue to be proved. The penalty of 40 days shall be conditional and shall not be produced as 40 served days.

Time chain and legal events

Event	Date	What the original documents
Temporary parental responsibility transferred to the risk F	27 March 2020	The decision of the family court; the court shall address the incorrect declaration of authority of the accusation;
The mother informed and the beginning of the period of the offence	30 March 2020	The court bases her knowledge and subsequently concealment on her.
The child delivered to the father	6. May 2020	Termination of the stay on the grounds of the criminal court
Family law shall review the provisional decision.	10 July 2020	Reported grounds say that there were no grounds initially; the decision is nevertheless confirmed on the basis of the later situation
Final decision on custody	8 September 2020	The criminal court states that: Højesteret the father granted custody only to him;
Statement of claim received	12 November 2020	Start-up information in the criminal proceedings of the City Court
Penalty in the city	31 March 2022	40 days conditional / 60 hours community service; T2 acquitted
Penal convictions in national law	16 June 2022	T1's judgment upheld

From the administrative decision to the reproduction of family law went 105 days. From the delivery of the child on 6 May to this trial, 65 days passed. From delivery to the city court's sentence, 694 days went to 771. These are calculated date distances without double counting of endpoints. 65 days is the time for the test described, not a documented period without the mother. 694 / 771 is the time of the criminal proceedings after the cessation of the escape, not continued abduction. [PU22]

The lengthy criminal proceedings, which were not attributable to T1, formed part of the District Court's reasons for suspending the sentence, together with her personal circumstances and the circumstances of the case. This is a specific documented effect of time on the private person's sentence. It is not general impunity because of processing time. The High Court upheld the same sentence after assessing nature, length and personal circumstances. [PU22, physical PDF4 and6]

The crucial regulatory framework: the time after a critical intervention

The Court of Justice reproduces the Decision of the Court of Justice of the European Communities of 10 July 2020. According to this reproduction, the mother was the primary caretaker of the child, and the father had had sparse contact. Family law considered that 27 March 2020 did not provide grounds for granting temporary parental responsibility. Nevertheless, the court maintained the decision because it considered it best for the child in the present situation to remain with the danger. The Court of First Instance expressly referred to the time since delivery on 6 May and to subsequent information from kindergarten and municipality. [PU22, physical PDF2]

Original evidence and evidence chain: The primary sentence contains a reproduction of the grounds of family law. The criminal court is the prime source of punishment and its own reasons; it is an embedded reproduction of the second decision. The full original family law act, underlying simultaneous evidence and the administrative case act are not read as an independent source chain in this module. Therefore, the assessment is precisely referred to as the reproducible premise. One cannot simply repeat its reference to carers, relationships or the situation of the child as a self-controlled fact.

Importance of the incompatibility: There is a concrete contradiction between the assessment of the basis of 27 March and the decision to maintain the later result. Here, the situation created by implementation and time will have an impact on the subsequent review. The report treats this as a documented track of time and justification. It is necessary to examine whether the original decision was fully informed and legally justified, what information was missing and whether subsequent considerations actually meant that an initial error had a lasting effect. The contested criticism does not in itself establish that the decision was formally annulled or declared void.

Action and legal deviation in private criminal proceedings: The courts found that at the time of the offence there was a decision on parental responsibility to be observed. The mother knew the decision and kept the child hidden from the danger. The Landgericht took the view that the subsequent comment by the family court on the original basis did not alter this. The legal qualification was Section 215 (1) of the Criminal Code, cf. Section 261 (1). The controlled judgment thus shows an actual punishment, even

whether the initial basis of the administrative decision had subsequently been criticised in the reproducedfamily court premium. [PU22, physical PDF3-4 and 6]

Comparison with public intervention and continued omission

Tracks of responsibility	The concrete evidence point of comparison,	Proof to be added by public intervention
Private intentional evasion	37 days of hiding after known decision; 40 days conditional plus 60 hours of community service	Identified rightholder, lack of right, concrete action, knowledge and intent
Private participation	T2 dismissed: alleged financial assistance not proven	Each person's contribution, period of time and calculation; the same probationary requirements for management / staff liability
Administrative action	Reported criticism of the initial basis and later maintenance over time as regards	Original decision, competence, legal conditions, factual basis and validity for each period
Continuation after error or cancellation	This sentence does not establish the guilt of an official.	Knowledge of errors / lapses, duty of action, actual ability to stop and documented omission
Compensation and loss of child	Reservations were made for claims for compensation on behalf of the child	Own loss, causation, claim, decision and payment of the child and parents

Strongest sustainable criticism: Where a private individual is actually judged not to comply with a decision, the action and omission of the Authority itself shall be independently examined against legal basis, proper information, timelimit and liability. The private judgment is not proof of the legality of all the steps taken by the authorities. The repeated criticism of the original basis gives a concrete reason to demand the originals and to examine the administrative decision-making chain. A later assessment of the child's situation shall not be used to remove the documentation of past errors or to make an responsibility chain invisible.

A public employee’s power to make or implement a lawful decision depends on the relevant legal authority and its requirements. It is not general criminal immunity. If a child is actually removed or withheld without a valid basis, the act must be described with a precise date, rights-holder and deficiency in legal authority. Possible criminal characterisation under section 215/section 261 or official-duty provisions must rest on each element, including intent or the culpability required by the provision. For a continuing intervention, knowledge of an established error and failure to remedy it constitute a separate issue of investigation. The report’s legal framework identifies the checked statutory versions and avenues of accountability.

Documented conditions: One private conviction, one member's acquittal, the same child and period, 40 days of conditional sentence, 60 hours of community service and the reproduced family court premium on the original basis / time. The indictment of the General Court in Aarhus as the decisive authority was incorrect; the national court corrects it to Familieretshuset. The correction shows why the identity of the authority may not be automatically taken over from the charge.

Suspects and hypotheses with specific evidence requirements: Whether the provisional decision was based on unsubstantiated or repeated information; whether the Authority's implementation created the later reasoned stay; whether contact was interrupted and, if so, how long; whether the administrative error led to liability or loss. The mother's information in the national court about 24 notifications, changed CPR address and load response is reproduced explanations, non-independently controlled files, dates or medical causality findings. Therefore, neither 24 additional errors nor a documented diagnosis are counted into national totals. [PU22, physical PDF5-6]

Specific requirements: Collect the original 27 March decision, all simultaneous evidence and party consultations, full 10 July decision, the 8th September decision of the Supreme Court, contact / delivery log and evidence of subsequent liability assessment. Warn the legal position and loss of the child and each parent for the specific periods. A possible requirement for repair must include actual relationship and support, not just a later change of status. The reservation for the child's compensation in the criminal proceedings does not demonstrate that the compensation was awarded or paid.

27. Judicial, detention and restoration;

Review of a judgment and responsibility for a judge's conduct concern different populations. Reopening permits fresh review; it is not in itself acquittal, actual release, compensation or personal punishment of a judge. Nor does a rejected conduct complaint document substantive examination of the original judgment's evidential basis. This distinction is necessary for the citizen's right to both a correct decision and effective redress.

The Special Complaint Court: Original Outcome 2020- 2025

The official table is updated on June 19, 2026. The entity is settled cases; it is not a register of unique citizens or all errors in the courts. "Other" is closure without judgment or judgment, such as revocation or closure. [DSK01]

Year	Readmission proceedings	Allowed	Rejected	Other
2020	57	7	45	5
2021	38	3	30	5
2022	27	2	22	3
2023	41	5	36	0
2024	18	7	11	0
2025	41	2	39	0
Sum	**222**	**26**	**183**	**13**

Year	Legal appointment honorable objectives;	Raised / Refused	Stated	Modified
2020	13	4	8	1
2021	9	2	7	0
2022	11	1	7	3
2023	7	2	3	2
2024	6	0	6	0
2025	5	2	3	0
Sum	**51**	**11**	**34**	**6**

Year	Appeals concerning default cases	Raised / Refused	Stated	Modified
2020	12	3	8	1
2021	9	3	5	1
2022	7	0	7	0
2023	21	3	16	2
2024	18	2	15	1
2025	23	6	14	3
Sum	**90**	**17**	**65**	**8**

Year	Appeals against judges etc.	Rejected	Disapproval; or suspension	Other
2020	90	82	3	5
2021	64	62	1	1
2022	30	29	1	0
2023	73	73	0	0
2024	33	32	1	0
2025	74	73	0	1
Sum	**364**	**351**	**6**	**7**

All the sums are the own addition of the original cells. Disapproval and suspension are not fragmented in the source. Therefore, the six outcomes cannot be classified as six fines, redundancies or various responsible judges. The table does not have person ID or connection to change of judgment and subsequent repair. The four types of case are not summed to a unique citizen population. [DSK01]

Historical figures in legal research literature

Gorm Toftegaard Nielsen reproduces the complaint's then network statistics. He was himself a member 2006-2016. The article is checked in the original, but its figures are a representation of a historical register of authorities; the original web version has not been found here. [DSK02, p.552, footnote 16-19]

Year	Applications in the article	Allowed	Rejected	Other
2013	48	3	42	3
2014	62	13	46	3
2015	71	5	62	4
2016	47	9	34	4
2017	37	0	35	2
2018	46	1	39	6
2019	63	7	49	7
2020	57	7	45	5

2020 overlaps with DSK01 and is not counted again. 2014's higher number of permits is explained in the article by several cases following an understated speed sign and several cases of ship owners' notification after grounding. The authorisation is thus no one counts for final acquitments. 2006- 2012 and other types of historical case require the original register. [DSK02]

Legal significance and concrete requirements

Conclusion: An account of reopenings must be followed through to a new decision and actual consequences. **Authority's statement:** Official statistics state decisions on reopening, interlocutory appeals and conduct. **Original evidence:** DSK01's four tables; DSK02 is a separate historical account. **Deficiency:** They do not record the complete citizen journey from original error to cessation or reparation. **Relevant rule:** ECHR Article 6 and, for deprivation of liberty, Article 5; reopening and complaint rules have their own conditions. **Act or omission:** A case is closed or opened for fresh review while substantive consequences for the citizen may continue. **Legal departure:** The specific decision's evidential basis and duty of effective reparation must be examined independently. **Significance for the outcome:** Errors concerning guilt, impartiality, adversarial procedure or service of process may result in punishment, intervention or lost access to review. **Responsibility:** The correct judicial/authority chain and, on separate evidence, the responsible person. **Demand:** The original judgment, order for fresh review, new judgment, actual end of deprivation of liberty and compensation are linked through shared case identification.

Paragraph 49 (6) to (8) of the Code of Procedure provides for the possibility of disapproval, fine and for the stated serious or repeated conditions of detention. The independence of the judge is therefore not a general exemption from liability. However, a decision on conduct should not be used as proof that all the facts of the judgment in question have been properly examined. Accident and evidence criticism requires comparison with the original material, including several bodies repeating the same case. [DSK03]

Necessary register information: For 2006-2025, Klageretten/the Danish Court Administration must disclose de-identified annual rows with case type, outcome, complaint/judgment ID, original decision date, new review and any new judgment. Reopening in favour of and to the detriment of a defendant, reopening after default and conduct complaints must remain separate. For interventions affecting liberty, dates of actual cessation and compensation outcomes are required from the prosecution service and courts. An incomplete public register provides no documented national error rate; nor does it bar claims in individually proved sequences.

Storage: actual time of liberty, acquittal, isolation and data limits

Preservation must be included as actual deprivation of liberty before final criminal clarification. Statistics on custody are not, in itself, statistics on unlawful custody, and an acquittal does not automatically determine whether the original action was without legal basis. The duration and outcome of the proceedings, on the other hand, must be followed by the citizen through the examination of necessity, proportionality, propulsion and compensation. The sources show long-term freedom interventions, the process of acquittal and concrete shortcomings in the central data which a pure enumeration of convictions does not illuminate.

Latest original annual statistics: 2024, published March 2026

The county attorney's 2024 statistics were prepared in March 2026; Polsa extracts 3 February 2026. "Long-term" means over 3 months. The device is completed, not unique people. Progress started earlier with end 2024 is included; ongoing progress without end 2024 is omitted. Time for transition to service can be included by judgment. An interrupted course is now counted as two; in published 2020 and earlier versions, it was counted as one, and time ended at first instance / indictment waiver / notice. The later historical series are thus audit versions, not new persons. [VA01, p.7]

Year	All DK / NSK	Long-term	Share%	Long-term meeting
2020	4039	1749	43,3	7,8
2021	3648	1851	50,7	8,1
2022	3668	1805	49,2	8,6
2023	3363	1881	55,9	8,8
2024	2941	1690	57,5	9,6

Year	Less than 18, all	Less than 18 long-term	Share%	Long-term meeting
2020	173	68	39,3	6,4
2021	166	89	53,6	6,1
2022	128	60	46,9	7,7
2023	129	69	53,5	6,6
2024	104	54	51,9	8,1

There is a specific internal discrepancy: the summary p.1 states 127 minor case trajectories in 2023, but table B states 129. Both versions are retained; their difference is not two new children. The 2024 total of 54 long-term child cases is a subset of 104 and of 1.690, and must therefore not be added to national figures. An average of 8,1 months does not state each child's precise time separated from the parents. [VA01,pp.1,3-4]

All 2024 circle cells

Circles	All	Long-term	Rounded%	Long-term meeting
North Jutland	216	142	66	7,5
East Jutland	220	155	71	9,0
Middle and West Jutland	247	183	74	8,7
South-East Jutland	121	77	64	7,6
South and South Jutland	160	93	58	10,2
Funen	160	84	53	8,5
South Zealand / Lolland-Falster	230	166	72	7,7
Middle and West Zealand	120	65	54	13,9
Northern Zealand	148	62	42	8,9
The West Region of Copenhagen	180	104	58	10,5
Copenhagen	968	424	44	10,3
Bornholm	21	2	10	4,5
NSK	150	133	89	13,3
Total	2941	1690	58	9,6

The total 58% of Table C is rounded; the 57,5% of Table A is the same ratio to one decimal place. 2024 changes the NSK division from archive location to responsible authority at the end of the run. Former NSK cases could be registered under Copenhagen because NSK is located there in POLSAS. It is an organisational change of registration, not evidence of a similar new increase in people subject to intervention. SEV was situated before 2022 under Østjylland, while SEØ / Frontier Centre Øresund was located below Copenhagen. [VA01, p.3-4]

Faeroe Islands and Greenland: all age cells

Faroe Islands, Table D / E, p.9

Year	All	Long-term	Share%	Mdr.

Greenland, Table F / G, p.12

Year	All	Long-term	Share%	Mdr.
2022	81	42	51,8	8,9
2023	97	59	60,8	8,0
2024	123	51	41,5	8,8

Year	Less than 18, all	Long-term	Share%	Mdr.
2022	0	0	0	0
2023	4	4	100	6,7
2024	0	0	0	0

The Faroe Islands are coming from 2021 and Greenland from 2022. According to the original, NIFLHEIMR and Avannarleq cannot deliver the relevant automatic extracts; the figures are manually reported. Greenland 2023's four long-term children's courses and 6,7 months are not four extra people in addition to the year's total. A 0 in the mean field at no course is the source's table convention, not a measured average duration for an actual citizen. The 2024 cell of the Faroe Islands also has "0%" in the monthly field, which is retained as a typographic unit deviation. [VA01, p.8-13]

Conviction figures with a different denominator: Denmark 2024 approximately 92% conviction and 84% immediate imprisonment/preventive detention concern decided cases involving prolonged remand detention; the exact denominator is not stated. The Faroe Islands describe all such decided cases as convictions/immediate sentences. Greenland reports 96% conviction and 94% institutional placement/preventive detention/other liberty-depriving measures;86% of the 2024 detentions concern offences against the person. Rounded percentages without an exact decision denominator are not converted into numbers acquitted or unlawful interventions. [VA01,pp.2,8,10]

The State Advocate's 2025-analysis: all 22 statistical tables

The analysis has two different populations: completed courses 2018- 2023 and 2.950 valid courses, which were pending during the period 1 January-24 August 2024. The latter may be both completed and still open; they are not the total stock of the year or the 2.941 completed in the later 2024-year statistics. The polsa extracts are from October-November 2024; Table 11 uses the Crime Registry October 2024. The judgments of the Court shall be omitted. The start of the service is taken into account in the analysis from the court's decision; in fact, prior arrest must be added to by a single civil order. [VA03, p.4-5,32]

Scope of acquittal: Only processes with acquittal on the charge under which pre-trial detention was registered are included. The individual may simultaneously have been convicted of other charges in the same case complex. The 2018-2023 figures 303/228/261/248/249/217 are therefore neither a union of people nor a register of unlawful imprisonment. Their averages of 3,9/5,1/4,8/4,7/6,5/6,8 months show the actual time burden in the specified group. [VA03,s. 5,22-23]

Verification of the conclusions:

• Table 9's 2020-total 4.038 differs from Table 1's 4.039; 2022 is 3.667 against 3.666, and 2023 is 3.360 against 3.361. Tables 4 and 10 also have different rounded ranges. The deviant original cells are preserved, not normalised to an apparently identical series of years.

• Table 21's explanatory text p.42 says 100 presumptions correspond to 31% of 575; 100 / 575 is 17,4%, while 100 / 319 in the killing / fire group is 31,3%. The precise denominator is therefore crucial.

• The text on pp.43-45 and 53 compares pre-scheduled cases' 8,4 months with 5,9 months, described as »without« pre-scheduling. But table 19's 1.938 includes all the stated first-instance cases, including the 449 pre-scheduled cases. It is therefore not an independently selected control average for cases without pre-scheduling. The text's reference to table 17 as a timing basis is also incorrect; table 17 concerns changes in legal basis. The group cannot serve as a clean effect measure without its own comparison data.

• Table 17 records 208 changes from collusion risk alone among 1.047 original sequences of that kind.173 of 208 end with the law-enforcement basis§762, subsection 2. The source cannot date the change; its assumption that it occurred when

the initial risk ceased is not a verified measure of timely termination. Later shifts do not demonstrate the necessity on every previous day.

• Prior investigation and the prosecution's indictment cannot be broken down reliably; their time is measured together. The longer course of the analysis with the mental statement does not prove who caused the waiting time. Defender changes, defences, reconditioning and decay are not part of the data model of the conclusion.

The 22 tables are reproduced below with all extracted statistical cells. Months are averages, not summable case or person numbers; percentages are the rounded figures of the source. Empty supporting cells shall be kept as "- '. The same courses appear in many tables and are not counted again as a new population. Table 8's shorter name "Other Penal Code" includes the source's use theft group. Table 16's combinations are reciprocal registration rows; their large matrix is reproduced in two readable parts. [VA03]

Legal isolation: all cells in 2024 statistics three tables

Denmark/NSK 2024 has 0 registered completed solitary-confinement trajectories. This is court-ordered solitary confinement under the specified procedural scheme; it does not mean 0 actual isolation in cells, spending 21-23 hours alone, disciplinary cells or exclusion from association. Such conditions are addressed separately in the CPT/UN/Kriminalforsorgen tracks. [VA02;chapter15-16]

Year	1 - 7 days	8-14	15-28	29-42	43-56	57 d-3 md	More than 3 months	Total	Share%
2020	1	12	1	0	0	0	0	14	0,3
2021	0	6	0	0	0	0	0	6	0,2
2022	0	0	0	0	0	0	0	0	0
2023	0	7	0	0	0	0	0	7	0,2
2024	0	0	0	0	0	0	0	0	0

Area / objective	2020	2021	2022	2023	2024
Faroes, number	3	1	0	0	11
Faeroe Islands, average days	7	7	0	0	7
Greenland, number	-	0	0	0	0
Greenland, average days	-	0	0	0	0

The Faroes 2024: 11 were conducted in 3 criminal cases, 5-7 days, precise prose-average 6,8 days versus the table rounded 7; all in the case of drug crime / risk, none below 18. The new Code of Procedure of the Faroe Islands entered into force on 1 January 2021. Greenland is first included 2021, so 2020 is no proven zero cell. [VA02, p.3-5]

Internal and historical boundaries: The Faroes and Greenland tabular headings say completed, but the method sections say started. The manual statements cannot be reconciled without case ID to the same end-time accumulation. The 2024-method says that the share previously 2019-and-before included straight judgments; however, the 2018- original of the Ministry of Justice says that the 2012@-@ and-forward did not include straight judgments. The historical percentage must be adjusted version rather than common method break. [VA02, p.2,4-5; VA04, p.3, note2]

Positive protection obligations, time-limits and necessary information

Conclusion: Prolonged actual deprivation of liberty and the data model's lack of review of legal basis/time require an independent citizen-oriented examination. **Authority's statement:** Conviction rates, changed crime profile, changes in legal basis and new training/supervision initiatives. **Original evidence:** VA01-03's different populations and tables, including courses ending in acquittal and their duration. **Deficiency:** None of these aggregates shows necessity on each day of the intervention or actual redress provided; several explanations rely on assumptions, missing data or an incorrect comparison group. **Rule:** ECHR Article 5 requires lawful deprivation of liberty and relevant review/cessation/compensation safeguards; Articles 3 and 8 may be independently relevant to conditions and family separation. **Action:** Police/prosecution request and maintain interventions, and courts review/schedule them. **Departure:** Each authority's lack of progress or insufficient specific basis must be documented per phase, rather than covered by an overall conviction rate. **Consequence:** The citizen actually loses liberty, work and family contact over months or years; later changed access to review does not automatically restore those days. **Responsibility:** The State's positive and negative obligations and the specific authority/person chain; individual punishment requires a documented act and culpability. **Requirement:** A shared de-identified course ID for arrest, each detention order and legal basis, changes, visits/correspondence monitoring, actual cessation, judgment/acquittal, compensation request/decision/payment and disciplinary/criminal proceedings consequences.

Guidelines and training concerning detainees developed in 2025 are documented in follow-up to the 2024 statistics, but no measured individual redress. The original 2025 analysis reports local experiences of earlier release without counts or the oversight case ID; this is not counted as a verified number of citizens protected in time. 2023 changed reporting to the State Prosecutor from extension submissions to the specified cases of judicial refusal or a late request. That change must be included when measuring supervisory coverage; a fall in reports does not in itself show fewer unlawful extensions. [VA01,pp.2-3;VA03,pp.45-47;VA05,p.2]

The public register must be supplemented for lengthy sequences in 2006-2017, specific compensation outcomes throughout the period, the courts' legal-basis/deadline errors and the complete annual sequence for 2025 not yet shown. Historical annual originals and solitary-confinement series are treated by version in the separate historical annex; identifying publications does not assert that all their tables are already checked. Children under 15 have a separate actual error account, which must not be added to detention age tables without person and sequence linkage.

Historical care and isolation: original numbers, time and selection

Long-term care 2006: all 19 tables

The original research report documents 657 lengthy courses of custody with 135.561 total days and 12 acquitments in the first instance. 50 were under 18 years at the beginning: 14 in 15 years, 17 in 16 years and 19 in 17 years. The report cannot provide information on the extent of custody surrogate. It measures the course of custody over 3 months until first instance in 2006. It does not count all the defendants, all the 2018- 2024 definitions completed, or only illegal prisons.

All 21 original pages have been substantively read. The 19 tables are reproduced here with our own scope definitions; table 9's continuation is combined. The study excluded incorrectly reported sequences without stating the original count or the number excluded.49 of 657 had interrupted pre-trial detention and therefore enter the stage analyses only to a limited extent. This is a specific selection limitation, meaning that stage waiting times do not cover the entire population. Source LV06, pp.1-3.

LV06 Table 7, physical page 9

Each crime cell indicates the number and percentage in this order. The denominator of all pre-trial imprisonment comes from the Reich Police and counts the process started; the numerator for long-term counts end / year of judgment. The fraction is therefore not a cohort's share.

Co-perpetrators	32	4
Witnesses	20	2
Other	14	2
Total number of reasons given	881	100

LV06 Table 19, physical page 20

657 courses. Long-term event is one of the report's procedural stages over one month.564 has at least one, 93 none; such an event is not automatically a proven break in time or convention.

Group	Number	Percentage	Average maintenance period (days),
One event with a duration of more than one month	309	47	179
Two events	139	21	251
Three events	83	13	271
Four events	23	4	299
Five events	9	1	367
Six events	1	0,2	445
No prolonged event	93	14	132
Total	657	100	206

Time-related regulatory responsibility

Conclusion: already in 2006, the State had specific knowledge of long waiting times during deprivation of liberty; responsibility must be examined for each stage and actor. Original evidence: mental examinations lasting up to 401 days,8 Regional Public Prosecutor stages exceeding 6 months and 20 cases exceeding 6 months from indictment to judgment. Significance of the evidence: these days burden liberty, not merely administrative processing. Rule: ECHR5, paragraph 3 requires special diligence and relevant, sufficient grounds for detention; Article 5, paragraph 4 requires speedy review. Action/omission: recorded waiting time, late initiation or delayed decision. Legal departure: can be established when the specific duration and lack of diligence during continued detention are proved, not from an overall average alone. Consequence: burdens on liberty and contact during the actual days. Responsibility: the State, relevant management and individual responsibility according to documented role, duty and culpability. Demand: a stage-by-stage timeline, all orders and extensions, initiation dates, reasons, appeal/release/compensation dates and any disciplinary or criminal responses. Unlawful deprivation of liberty by private individuals and abuse by public employees are compared by reference to the same specific conduct and separate criminal-law conditions in chapter 26.

Isolation 2006-2018: completed courses and actual day load

ISO18 has been read in its entirety, 10 original pages; in addition, the original table 4 has been visually checked. Nationally counted completed isolation course. The series applies to legally determined isolation under custody; it cannot replace numbers of actual single cell, disciplinary isolation or children detained by the police. None of these figures is in themselves a number of illegal interventions.

Year	Completed isolation course	Share of the Source in custody	Total isolation days specified in ISO18
2006	475	8,0%	Not specified here
2007	273	4,6%	Not specified here
2008	327	5,3%	Not specified here
2009	210	3,2%	Not specified here
2010	127	1,9%	Not specified here
2011	186	2,8%	Not specified here
2012	132	2,4%	3182
2013	55	1,0%	870
2014	36	0,7%	681
2015	32	0,7%	601
2016	37	0,9%	950
2017	17	0,4%	191
2018	14	0,3%	195

Prior to 2012, the percentage has not-updated started custody; from 2012 updated completed courses. As of 2012, straight judgments are omitted according to ISO18, s 5 Note 2. Isolation 2024, on the other hand, says that 2019 and previously included straight judgments. This is a concrete conflict between two original methodological descriptions which require clarification of the data extracts used. No artificially homogeneous percentage series is produced. The days shall be the sum of the rounded duration of each lead, not the number × rounded mean time.

ISO18 Table 3: Policy area and duration

Politikreds	Prolonged-release device b	Isolation	Share	1 -7 d	8-14 d	15-28 d
North Jutland	234	0	0,0	0	0	0
East Jutland	362	1	0,3	0	1	0
Middle and West Jutland	263	1	0,4	0	0	1
South-East Jutland	266	0	0,0	0	0	0
South and South Jutland	302	0	0,0	0	0	0
Funen	217	1	0,5	1	0	0
South Zealand and Lolland-Falster	241	1	0,4	1	0	0
Middle and West Zealand	188	2	1,1	0	2	0
Northern Zealand	277	0	0,0	0	0	0
The West Region of Copenhagen	256	0	0,0	0	0	0
Copenhagen	1793	8	0,4	1	4	3
Bornholm	20	0	0,0	0	0	0
Total	4419	14	0,3	3	7	4

All other duration columns are 0 for all 12 ranges: 29- 42 d, 43- 56 d, 57 d-3 months and over 3 months. Including straight sentences, according to s 6 Note 5, the shares would be Middle / West Zealand 1,0%, Funen 0,4%, Middle / West Jutland 0,3% and South Zealand / Lolland-Falster 0,3%; eight others unchanged. The country share of the source is rounded 0,3%, not a known additional number of cases.

ISO18 Table 4: Crime, two years and an unresolved interval denominator

Division	Number 2017	Quantity 2018	Average 2017	Average days 2018	Interval cells 1 -7 / 8-14 / 15-28 d
Manslaughter / Trials	7	4	11	24	1/7/3
Violence / threats	1	1	14	7	1/1/0
Sexual crimes	0	1	0	15	0/0/1
Drugs	6	4	10	11	2/8/0
Weapons / explosives	3	4	13	9	1/6/0
Total	17	14	11	14	5/22/4

All four longer interval columns are 0. The original interval columns sum to 31=17+14; they are not a2018 distribution of 14,although the heading does not state their annual denominator. This has been visually verified and is retained separately. No 2018 subgroup’s processes may be inferred from these mixed columns. According to the source, no one under 18 was placed in solitary confinement in 2018. All 14 processes concerned offences carrying a maximum sentence of at least 6 years, and the source states no exceedance of statutory maximum periods; this is the source’s specific rule check, not an independent complete ECHR examination of each order.

Historical custody versions 2007-2010 and correction of children's whereabouts

Different versions tell different stories about citizens' freedom time

The original 2008 report omitted 29 lengthy courses, which were only identified in the 2009 material. The revised 2010 addition changes 650 → 679 courses, 130.781 → 136.913 days and 35 → 37 children under 18 years of age in this defined long-term population.29 already registered courses were also attributed to wrong police lines: 28 moved to South-East Jutland, 1 to South / South Jutland. It is a specific documented statistical error; the two 29 groups must not be added together as 58 people neglected. Both table versions are retained below. When summing, select one marked version per data year; the full 2008 original dataset is not automatically updated by four corrected tables.

All 19 pages of LV07,18 pages of LV08 and 5 pages of LV08R are read. The 18 tables in each annual report and all four tables of amendment are reproduced. Year before 2006 is only the historical context of the source, outside the budget of the report period. All processes are long-term before first instance, not a national number of illegal arrests.

2007 had 620 processes, 133.772 days, 12 acquittals and at least 55 children under 18(13 aged 15, 28 aged 16, 14 aged 17); missing age data may conceal more. 63 interrupted processes are excluded from important stage analyses. Psychiatric examination 214(12 repeated),Medico-Legal Council 69(4 repeated),Regional Public Prosecutor 267(34 repeated),co-suspects 397. The first-time denominator before exclusion of erroneous reports is not stated. The 2008 original had 45 interrupted, 256 psychiatrically examined(9 repeated),87 Medico-Legal Council(7 repeated),286 Regional Public Prosecutor(10 repeated),384 co-suspects; one missing relation. These sub-counts derive from the original 650 version and must not receive 679 as a new denominator.

Concrete source conflicts are preserved locally

• LV07 Tables 1 and 6 have different 2007 duration distributions despite the same 620: 132 / 141 / 75 / 124 / 65 / 83 versus 130 / 143 / 71 / 126 / 67 / 83. They must not be standardized without the original registers.

• LV07 Table 14 indicates 121 within 7 days of 169, but the 66% of the source does not correspond to 121 / 169 = 71,6%. The six printed sub-percentages sum 92%, not 100%. The numerators and printed percentages are reproduced separately.

• LV07 Table 18 writes 175 middle days in the total, while the main tables and text indicate 216.175 is also the means of the first sub-group; the document does not explain the total. The printed 175-total has not been used for the annual average of the report.

• LV08 Table 1's total row indicates 56 over 1 year, while the 10 crime rows sum 55, and Table 6 indicates 55. The ranges in Table 1's total series summer 651, although the printed total is 650. The prose on page 3 writes 87 homicides, Table 86. The figures are source conflicts, not extra people.

• A footnote marker after 619 / 649 is not an additional digit in the numerator. Notes on one missing case are included below; 619 ³ means 619 with Note 3, not 6.193 decisions.

LV07: all 18 original tables

LV07 Table 1, Physical Page 3

Main charge and duration, all lengthy procedures. Intervals and subtotals overlap.

Crime group	>3-4 months	>4-5 months	>5-6 months	>6-9 months	>9-12 months	>1 year

UC0810: 14 original tables on children, surrogate and arrest

The entire 8-page correction has been read. It concerns a different population from long-term pre-trial detention: judgments imposing a youth sanction or immediate imprisonment in 2008-2010, including short pre-trial detention. A review of 50 detention trajectories in 2010 triggered complete reanalysis of three judgment years. Kriminalregisteret's recording of residence had not adequately tracked changes. The new analysis uses POLSAS and information from Kriminalforsorgen; stays outside Kriminalforsorgen are classified as substitute custody for calculation without obtaining direct documentation of stays from those locations. The registers' data discipline is described as the authorities' assessment, not an independently verified guarantee.

Year of Judgment	All judgments	Initial only arrest	Corrected only arrest	Original total product days of revenue,	Corrected days	Original Arrest part of days	Corrected arrestandel
2008	476	121	23	21.386	20.693	41%	10%
2009	454	93	27	18.482	18.303	33%	14%
2010	456	58	22	20.061	21.436	30%	12%

This changes the recording of the location of the load, not automatically the actual historical location or its legality. Judgments and days are different units. No figures here are a number of parents or a number of unique children across the years.18 years of age at the beginning are omitted from the arrest rates of the report in notes 1-3; 2010 also covers 14 years after the age of criminal years of the time.

Partial surrogate	59%	67%	70%
Proportion of arrest	41%	33%	30%

UC0810 Table 14, physical page 8

Corrected day figures.

Days and distribution	2008	2009	2010
Total days	20693	18303	21436
Partial surrogate	90%	86%	88%
Proportion of arrest	10%	14%	12%

Percentages with multiple boundaries

2008: pre-juvenile custody 74 → 77%, pre-custodial sentence 58 → 56%; arrest during whole / part 63 → 55%. Among boat stays 17% had only 1 arrest day and 29% maximum 2. If ≤ 2 days are classified as pure surrogate, the arrest portion becomes 42%.

2009: youth sanction 71 → 70%, prison sentence 59 → 59%, arrest whole / parts 74 → 72%. Among boats' stays, 9% had only 1 day and 20% no more than 2; alternative arrest 59%.

2010: youth sanction 78 → 82%, custodial sentence 53 → 56%, arrest whole / parts 54 → 57%. Among boats' stays, 21% had only 1 day and 25% no more than 2; alternative arrest 45%. The percentages use different denominators and 18 year delusion; they must not be converted into new integers without the specific denominators.

Thresholds above 1 week/3 weeks show the same significance of the revision: in 2008, at most 1 week's custody approximately one third→59%, more than 3 weeks approximately one quarter→10%;2009 at most 1 week 37→56%, more than 3 weeks 24→14%;2010 at most 1 week 35→62%, more than 3 weeks 20→10%. These are proportions among cases involving both a remand substitute and custody, rather than all children or all remand cases.

Long-term care 2009- 2010: excluded courses, timelimits and evidence department;

Registered time, acquittal and hidden selection

Both original reports of 16 pages have been read in full. All 14 tables in each report are reproduced. 2009:790 prolonged courses, 148.083 total days, 20 acquittals and at least 42 under age 18 (7 aged 15, 15 aged 16, 20 aged 17).2010:896 courses, 6.132 total months, 11 acquittals and 1 exempt from criminal liability due to self-defence, at least 58 under age 18 (13 aged 15, 27 aged 16, 18 aged 17). Reported days and months are different units; 6.132 months is not an exact number of days when multiplied by 30. The courses end with a first-instance judgment and exceed 3 months; the unit's definition differs from later series on actual release.

Cases closed with defendants, etc., have been explicitly omitted from both reports on page 2. In addition, incorrect data years and duration less than 3 months. The total number reported and dissorted is not reported. 55 / 67 interrupted runs limit the phase analyses. Therefore, the number of the year's acquittal cannot describe all detention exercises without subsequent conviction. Lack of age data means that the children's counters are the minimum source.

The reports' analyses of section 768 a limits examine maximum periods in the absence of special circumstances; they do not find every departure unlawful. The decisive review requirement is each order's actually documented special circumstances, diligence, necessity and time. In 2009,only 776 of 790 cases commenced after 1. July 2008 are included. The main text states 97 overruns; comparative tables 9/10 use 99 because of different criteria for interrupted cases. In 2010,tables 9/10 total 829 cases and 127 departures,not all 896. 829=896−67 interrupted cases is an independently calculated population relationship; report tables 9/10 do not expressly state the overall denominator as 829. 2010,p.12,states 15%,whereas 127/896 is 14,2% and 127/829 is 15,3%. The denominator must therefore be stated when using the proportion.

The State had shredded original evidence necessary for control

LV09,p. 11 describes four 2007 reporting forms being shredded. Researchers could therefore not establish whether the recorded pre-trial detention had been continuous. Comparison was adapted through changed 2009 criteria rather than verification of the original processes. This is a specific documented loss of the basis for review. It does not on its own prove that the four orders were unlawful; it proves that the state could no longer carry out the intended substantive verification against the originals.

Conclusion→original statement: four forms shredded, the connection no longer verifiable. Significance of the evidence: the legal classification of time in 4 processes could not be reconstructed from the material used. Relevant rule: prompt and effective review under ECHR 5,paragraph 4,and the state's duty to secure a real evidential basis for review; administrative archival/documentation duties under the specific applicable scheme. Act: disposal of original case material. Departure: documented preservation and oversight failures; a specific breach of archives legislation requires the legal basis for disposal, date and responsible role. Consequence: verification replaced by amended statistical criteria. Responsibility: the register/archive authority and identified decision-makers according to specific duty/culpability. Demand: disposal basis, original reporting IDs, orders, custody/alternative-detention logs and other preserved contemporaneous dates for all four processes. Archival disposal must therefore be included in individuals' opportunities for later accountability and compensation, not merely technical data quality.

Local conflicts in figures and legal classifications

• LV09 Table 1 lasts 210 / 178 / 110 / 161 / 73 / 58, Table 6 has 210 / 173 / 108 / 165 / 77 / 57; both total 790. LV10 Table 1 has 194 / 186 / 130 / 182 / 115 / 89, Table 6 has 186 / 190 / 126 / 187 / 118 / 89; both 896. Both versions are reproduced.

• LV09 Table 13 sub-columns 677 + 97 = 774, total indicates 776. In two rows the sum of inside / outside is one smaller than the total: 287 + 24 = 311 versus 312; 178 + 28 = 206 versus 207. The 776 totals of the tables shall not be used for a common fraction with 774 sub-registrations without precise marking.

• LV09 p.7 states 258 referrals to the Regional Public Prosecutor/36%, but 258/790=32,7%;259 mentally examined/32%is 32,8%. The denominator for the printed percentages is unexplained. Original counts and percentages remain separate.
• LV10 s 7 says decrease 2005 → 2007 at 16%, but 717 → 620 is 13,5%; 620 is not used as a revised 605 counter. The main table data takes precedence as a basis for counting, without concealing the source's wrong development statements.
• Table 10 in both years groups statutory penalty ranges as ≤6 years/>6 years, while the legal description on p. 11 uses <6 years/other. This is a specific category conflict requiring each case's provision/penalty range before classification of lawfulness.

Adults; comparisons 2007 and 2009 / 2010.2009 s 97 / 99 criterion breaks and 2010 s 829 delimitation are explained above. The penalty framework and duration are separate criteria.

Penalty framework	Duration	2007	2010
Strammer < prison for 6 years	custody ≤ 6 months	76 (84 %)	118 (71 %)
Strammer < prison for 6 years	pre-trial detention; > 6 months	15 (16 %)	48 (29 %)

Penalty framework	Duration	2007	2010
Strammer ≥ prison for 6 years	remand ≤ 12 months	398 (84 %)	540 (88 %)
Strammer ≥ prison for 6 years	pre-trial detention; > 12 months	76 (16 %)	72 (12 %)
Total	pre-trial detention ≤ time limit	474 (84 %)	658 (85 %)
Total	pre-trial detention; > time limit	91 (16 %)	120 (15 %)

LV10 Table 10, physical page 12

Under age 18,comparison of 2007 and 2009/2010; 2009 has 41 against 42 in the main count, 2010 has 51 against 58. Departures are not automatically invalid orders. The group's ≤6 years/> 6 years is marked as an original classification conflict.

Penalty framework	Duration	2007	2010
Stramme ≤ prison for 6 years	custody ≤ 4 months	3 (75 %)	1 (50 %)
Stramme ≤ prison for 6 years	pre-trial detention; > 4 months	1 (25 %)	1 (50 %)
Strammer > prison for 6 years	remand ≤ 8 months	40 (78 %)	43 (88 %)
Strammer > prison for 6 years	pre-trial detention; > 8 months	11 (22 %)	6 (12 %)
Total	Proprietary custody ≤ time limit	43 (78 %)	44 (86 %)
Total	pre-trial detention; > time limit	12 (22 %)	7 (14 %)

LV10 Table 11, Physical page 13

Uninterrupted trajectories; repeated forensic psychiatric/Retslægerådet/regional public prosecutor examinations excluded in relevant cells. Each event has its own valid dataset. Rounded percentages provide no additional integer denominator.

Event	Within: number	Within:%	Outside: number	Outside:%	All: number	All:%
Mental examination	177	25 %	45	37 %	222	27 %
Presentation to the Council of Prosecutors	47	7 %	29	23 %	76	9 %
Presentation to the public prosecutor	179	26 %	62	50 %	241	29 %

LV10 Table 12, Physical page 13

Cell-by-cell counts and mean days for stages; uninterrupted sequences and exclusion of repetitions. This is not the mean for the entire period of pre-trial detention. The difference between stages is an association, not independent causal evidence.

Stage	Within: ed	Within: en Me	Outside: ed	Outside: day a	Difference
Number of days from the start of pre-trial detention to the order for a mental examination	157	32	47	67	+ 35 days
Duration of the mental examination	156	83	42	85	+ 2 days
Number of days from the end of the mental examination to be submitted to the Legal Medical Council	33	21	25	40	+ 19 days
Duration of drafting of the Opinion of the Council of Prosecutors	31	45	24	50	+ 5 days
Duration of proceedings at the Public Prosecutor's Office	167	25	62	92	+ 67 days

Stage	Within: ed	Within: en Me	Outside: ed	Outside: day a	Difference
Number of days from the decision of the Public Prosecutor on the indictment issue until the indictment is drawn up	170	1	65	16	+ 15 days
Number of days from preparation of the indictment to judgment at 1st instance	699	70	124	127	+ 57 days

LV10 Table 13, Physical page 14

Number of contestants with time groups. 2009 sub-denominator / total conflict described above. 2010: 702 + 127 = 829, all 67 abortions outside this sum.

Isolation: original annual reports, children, time volumes and versions 2006-2023

What reports and populations have actually been reviewed?

All original reports for 2006-2017 have been read, including all methodological sections, tables and children's information. Original 2019 is read on all 10 pages; 2020 / 2022 / 2023 on all 5 / 6 / 5 pages and 2021's original DOCX in memory. 2018 has already been reviewed in the previous module and 2024 in the main module. Numerical cells from all 17 additional annual originals are reproduced below with the source locator. Historical overview before 2006 is shown as context; re-use of the same annual data in the next report does not provide any new developments.

The count concerns completed solitary-confinement periods, rather than automatically distinct people, offences or unlawful court orders. 2006 records 2 interrupted cases as complete case histories;2007 counts continuous periods separately, including two periods in the same Bornholm case and two in the same South Zealand case. 2019 provides an actual link to individuals:15 periods concern 13 people, one person having 3 separate periods in the same espionage case. This must not be uncritically used as a ratio for other years. Total days in the year of completion also include days spent in the preceding year. The tables concern court-ordered solitary confinement on remand; disciplinary cells, voluntary isolation, actual contact restrictions and children’s other detention stays require separate populations.

Total time and children: Counters with their own devices

Year / version	Completed Danish isolation course;	Total days of isolation;	Average days of the source	Less than 18 years
2006 original	475	13.838	29	6
2007 original	273	7.189	27	5
2008 original	327	6.910	21	4
2009 original	210	4.642	22	0
2010 original	127	3.083	24	1
2011 original	186	4.535	24	0
2012 original	132	3.182	24	0
2013 original	55	870	16	0
2014 original	36	681	19	0
2015 original	32	601	19	0
2016 original	37	950	26	2
2017 original	17	191	11	1
2018 original, already reviewed	14	195	14	0
2019 original, August 2020	15	333	22	0
2019 retrospective in 2023	14	Not specified	Not specified	Not specified separately
2020 corrected August 2023	14	Not specified	12, previously 7	0
2021 original DOCX	6	Not specified	11	0
2022 original	0	Not separate time quantity	No positive time group	0 course
2023 original	7	Not specified	10	Not specified separately

Average days are rounded and cannot be multiplied by the number to invent a precise amount of time. Indeed, the 13.838 days in 2006 and the 7.189 in 2007 are reported sums. The six children in 2006: 17 years / 14 days in manslaughter; 16 / 16 / 17 years every 6 days in arson; 16 years / 3 days in drugs and 16 years / 6 days in robbery. 2007: three arson cases 15 / 15 / 17 years every 14 days, 17 years / 14 days in robbery and 16 years / 2 days in bodily injury. 2008: 17 years / 6 days for attempted murder; 15 years / 10 days for killings; two 16-year-olds every 10 days in drug cases. 2010: one child 17 days of isolation in homicide, age not specified. 2016: two children 26 days in terrorist proceedings and 11 days in attempted murder. 2017: one child 13 days in arms case. These are 19 records of children over these years, without evidence of identity across years. No automatic child count is derived from the course of adults or from two parents per child.

The precise meaning of the rules and the incomplete control of the reports

Act 1561/2006,§1 points 3/6/7,tightened requirements for children from 1. January 2007: wholly exceptional circumstances for solitary confinement; a maximum of 4 consecutive weeks, with a narrow exception for intentional offences under chapters 12/13; extensions of no more than 2 weeks at a time. In 2010,the 17 days in a homicide case therefore do not in themselves exceed the 4-week limit. The legal issues also include separate orders, wholly exceptional circumstances, necessity and proportionality. A statistical finding that an absolute maximum deadline was met does not answer these questions or independently address ECHR 3/5/8 and the child’s rights.

2008 s 5 indicates 4 isolates over 14 days in the case of crimes whose normal criminal framework is less than 4 years. As a possible explanation, the report states particularly serious circumstances with a higher criminal framework under § 286.2009 s 5 do the same for one 18-day fraud case. 2012 s 5 informs one company theft case over 14 days among 3 normal

lower criminal proceedings. The specific orders, increased penalties and actual time limits shall not be presented. This local deficiency is proof of incompetence; it must not be transformed into proven criminal guilt or to proven legality in the possible explanation of the report.

2007, p. 5, distinguishes between 19 periods exceeding 8 weeks:15 had already been extended in 2006 and 4 fell under new rules. The exclusion of 15 from the new rules does not remove their actual time in solitary confinement or human-rights significance. 2015-2017 and 2019 reproduce the 14-day threshold using the wording maximum sentence up to 4 years, whereas the rule delimits cases that cannot carry 4 years. At precisely 4 years, this editorial shift of the boundary must not be used in an individual legal assessment.

Conclusion → Government statements: possible increased penalties and general statements on longest periods. Original proof: Section 6 / 7 of the annual reports with 4 + 1 + 1, different years and without individual orders. Deficiency: relevant factual and legal basis for the derogation cannot be checked in the publication. Rule: legal basis, necessity, proportionality, reasoned separate order and effective review by EMRK5. Action: registered continued isolation. Deviation: lack of public control, not automatically proven illegality in each case. Consequences: the citizens concerned have been isolated beyond the normal limit and the overall statistics do not document the legality of the derogation. Liability: the requesting public prosecutor, the decision-making court and appropriate supervision according to their specific duties. Requirements: original orders, precise charges / penalties, requests, time of authorisation, start / end of isolation and actual contact / health conditions of the child.

Versions conflicts and population fractures

-The 2006 crime table has 473 trajectories against 475 overall;2 foreign cases lack a crime classification. The 2 must not be lost from the main numerator. The 2007 retrospective splits the 2006 drug figure of 328 into 323 Criminal Code+5 Act on Euphoriant Substances;328+323+5 is double counting. -From 2012 the percentage denominator changes from unupdated pre-trial detentions begun to updated completed detentions. 2020-2023 also describes immediate judgments as excluded from its own denominator and included in earlier publications; this must be compared with the specific older methodological information in the report. A common percentage curve cannot conceal the described methodological/version differences. -The 2020 correction in August 2023 changes mean duration from 7→12 days. The 2020 table A states 2016/2017/2018 proportions of 0,8/0,8/0,4%, against older originals' 0,9/0,4/0,3%. The printed 2020 percentage 0,4% becomes 0,3% in the 2021/2022 retrospective;2019's 0,3 becomes 0,4 in 2021/2022. All versions are reproduced; no additional people are inferred from the differences. -The 2019 original has 15 periods and durations 2/8/2/1/1/1/0 in the 7 intervals. The 2023 retrospective has 14 and 2/7/2/2/0/0/1. The change concerns both the total and movement between time intervals, including a new cell over 3 months. This must not be reduced to a trivial rounding difference. -The 2019 crime table shows intervals summing to 29=14+15, while the annual-total columns are 14/15. Like the 2018 original's unlabelled interval basis, it cannot be read as the 2019 total of 15 periods alone. The publication gives no separate year at the interval columns; coincidence with the sum of two years is a recalculated observation, not a stated year label. -The Faroe Islands' table title says completed, while the methodology says begun in 2020-2023. Greenland has the same title/methodology conflict in 2022/2023. The Faroe Islands changed the rules on 1. January 2021 after a temporary restriction from September 2020; a temporal connection is not independent evidence of each order's lawfulness. Older Faroese 2016-2019 counts of 6/16/7/9 and mean days of 10/12/8/9 are reproduced separately from Danish counts. Greenland's missing years before 2021 are not 0.

All numerical tables from the additional original years

The original figures below are a counting basis with their own version. Each district table shows denominator/numerator/percentage and all 7 duration intervals; these are two views of the same trajectories. Crime tables' previous-year column overlaps the preceding year's original table. The original dash is retained and does not automatically mean numerical zero.

Long-term care 2011- 2023: originals, annual versions, children and actual end time

Controlled October 7, 2026. The module complements Chapter 27. It is based on the tables and methodological sections of the annual originals found, not on news summaries. All numbers below keep the original version. 2024-2025 are dealt with in the separate modules and are not included again here.

The deprivation of liberty is real; the number of the register is not automatically a count of illegality

The figures document registered trajectories of deprivation of liberty, including those ending in acquittal or abandonment of prosecution. A long duration is a specific consequence for the citizen and a line of review concerning necessity, progress, proportionality and redress. The statistical category does not, on its own, establish unlawfulness, an employee's culpability or a particular compensation claim. Conversely, a conviction does not document that all preceding deprivation of liberty was lawful or necessary. Legal scrutiny must follow every specific intervention and point in time.

The key data problem is documented in the originals: missing and incorrect registration, wrong years, changed division of interrupted runs and different end points. These facts must be kept separate from the actual breaches of rights which the report documents in the course of the decision.

Main figures with all checked annual versions

Unit: progress, non-deductive citizens. Long-term means the category of reports over three months; the interval tables simultaneously write ≥ 3 months. An accurate count of border cases requires underlying days and code delimitation. The average concerns only the long-term courses. Less than 18 years of age is the first day of imprisonment; a course can continue after the person has grown up. A line means that the shown main table does not publish an overall children's average.

The repeated years below are alternative statements of the same year and **shall not be added together;**. Each source ID identifies the original URL and the exact control location in the source list at the end.

LV15 s printed child percentages are preserved, but their calculation errors are explained below.

The method break in 2011-12 and the hidden 2010fix

LV11, p. 2-5, explains the transition from manual alerts to POLSAS / QlikView. The manual system mainly covered more than three months before the first instance judgment and the year followed the judgment. The new inventory also included, for example, indictment and moved a process of prior release to the year of release. The schemes cannot therefore be assimilated.

The same original, p. 3,footnote 1,corrects the earlier **896 manually reported courses in 2010 to 1.005**:109 reports submitted with the 2011 material actually concerned 2010. The manual count for 2011 was 959,whereas QlikView gave 1.618; QlikView also gave 1.764 for 2010. The documented under-registration and incorrect period allocation mean that a conclusion about “all instances” cannot rest on the original manual series. The difference 1.764−1.005 = 759 does not on its own establish 759 proved omitted persons:the schemes’ scope and period allocation differ. The 109 incorrectly assigned years, however, are specifically documented.

The data for LV11's tables were compiled 20 March 2013; LV13 1 January 2015; LV14B 13 May 2015; LV15 15 March 2016; LV16 1 March 2017. In the historical annexes, one month corresponds to 30,5 days. Records corrections and subsequent decisions may change the denominators and outcomes of the return.

New model in 2017 and actual release from 2021

LV15's p. 3 announced a new data model for the 2016statement. LV16's p. 2-3 proved that it was not finished; the challenges continued. LV17's p. 2-3 described technical optimisation and recalculation of 2014- 2016. Therefore, for example, the children's name for 2015 changes from 189 in LV15 / LV16 to 156 in LV17; these are alternative versions, not a decrease of 33 children in the same population.

LV21, pp. 2 and 6, document an additional method break: from a period ending at the time of the first instance, indictment or arrest, to **actual release from custody;**. At the same time, the interrupted course was divided into two rather than one coherent course. The statistics only cover the course completed in the year; still imprisoned have been omitted. For example, 2017 becomes 4.372 / 1.124 in LV20 and 4.501 / 1.483 in LV21. Longer recorded duration after the breach of the method cannot be easily described as a corresponding change in actual detention.

LV21's Danish data is extracted 23 September 2022, LV22's 18 January 2023 and LV23's 18 January 2024. LV22 and LV23 have later corrected notes. Therefore, the version label is not a guarantee that the entire dataset is recalculated on the revision date.

Length of forelegs: all national ranges checked

The figures show time spent within the original’s delimitation. Short and long intervals together constitute the displayed annual version’s total denominator. A register course ≥24 months may still be shorter than total deprivation of liberty if the historical statistics end at the first-instance decision.

Version	Year	0-<3 months	3-<6	6-<12	12-<24	24+	Total

LV17	2017	1035	107	0	54	73	33

Locators: Annex to the individual versions Table 6; physical PDF pages LV11 20-21, LV13 16-17, LV15 18, LV16 16 and LV17 22; LV14B Table 6. **within the** "non-felling 'and shall not be added again. In addition, LV15's 2014 has one registration of a ground-less charge, so 18 disclaimers + 4 charges + 1 ground-less charge = 23.

Conviction percentages have different denominators. LV14's 98,5 % for 2014 corresponds to 1.272/(1.272+19); 94 unresolved cases are excluded. LV17's 86,5 % for 2017 corresponds to 1.035/1.196 and includes 54 unresolved cases in the denominator. LV22/LV23 expressly state approximately 92 % of *decided* lengthy cases and do not publish exact outcome numerators. Juxtaposing 98,5→86,5→92 % without explaining denominators would mislead. Nor is it sustainable to calculate an exact "8 % without conviction" count by multiplying 0,08 by all lengthy cases.

Children and lack of age: the impact accounts cannot be resolved by percentage

LV11 annex table 2, pp. 3-4/PDF pp. 13-14, documents under age 15: 2010 **8 cases/0 long-term**, 2011 **31/7** and 2012 **1/0**. The seven long-term 2011 cases averaged 4,4 months. The footnote states that the age of criminal responsibility was 14 from 1. July 2010 to 1. March 2012. The figures are not in themselves seven established unlawful imprisonments, nor necessarily seven different children. Their actual deprivation of liberty and significance for schooling, health and family must still be shown.

The same originals document unknown age: LV11 2012 **331 course / 0 long term**, LV13 2012 after update **7/0**, LV15 2015 **1.163/122** and LV16 2016 **1.197/142**. LV17's optimized 2015 is **89/28**, 2016 **89/28** and 2017 **94/38**. All these figures are source and version dependent. The unknown ages cannot be distributed to children or adults without personal / age data; that uncertainty is concrete and must not be concealed by making a registered series of children a complete personal account.

LV16's Table 2 has also combined the 2015denominator **4.404**, while using the main table of the same version, orbital and fallout **4.398**. The original age ranges summer to 4.404. It is a proven contradiction in the printed original, visually controlled on PDF p. 12. An overall children's average is not self-calculated on the basis of rounded age averages.

Time limits: the wrong end time and changed supervision

LV15, pp. 6-7, documents that QlikView's earlier count used **the first-instance decision**, while the relevant section 768 a deadline ended at **commencement of the trial hearing**. A deadline could therefore appear exceeded in the register although it was not. LV15 and LV16 consequently excluded these Qlik tables and used regional public prosecutors' reports.

Version and delineation;	2010	2011	2012	2013	2014	2015	2016	2017
LV11, Qlik, adults / children	397/68	221/57	242/36	-	-	-	-	-
LV13, Qlik, adults / children	-	-	168/13	151/15	-	-	-	-
LV14B, Qlik, adults / children	-	-	-	151/14	128/10	-	-	-
LV15-17, State Advice Report	-	-	-	-	21	42	25	35

Locators: LV11 Annex Tables 7-8 / PDF pp. 22; LV13 Table 7-8 / PDF pp. 17; LV14B Table 7-8; LV15 pp. 6; LV16 pp. 7; LV17 pp. 6. **previously misappropriated records;**Not as evidence of a breach of law. The 21 / 42 / 25 / 35 procedure is not automatically unlawful either: the normal time-limits were different in the

relevant conditions. Each actual intervention requires checking the extension request, judicial order, specific reasoning and progress.

Another change affects the authority's responsibility. LV22, p. 2, describes that before 2023, the police officers submitted requests for extension beyond the deadlines of the public prosecutor's office. From **1 January 2023** shall be reported when the court fails to comply with the request or the request is not made in due time. LV23, p. 2, confirms this delimitation. Therefore, a decrease in the number of alerts over this shift would not in itself prove less long runs or less infringement of rights. The exact number of applications rejected or late submitted is not shown in these annual statistics.

Faeroe Islands and Greenland: separate populations and actual withdrawn information

Version	Zone	Year	All	Ling	%	Months	U18 all / long
LV21	Faeroe Islands	2021	27	10	37	10,9	1/0
LV22	Faeroe Islands	2021	27	10	37	11	1/0
LV22	Faeroe Islands	2022	27	7	25,9	8,9	1/0
LV23	Faeroe Islands	2023	29	8	27,6	8,9	0/0
LV22	Greenland	2022	81	42	51,8	8,9	0/0
LV23	Greenland	2023	97	59	60,8	8	4/4

The 2021 inventory of the Faroe Islands was corrected from **28 / 12, approximately 43% and approximately 8 months** to **27 / 10, 37% and 10,9 months**. LV21 p. 7 explains that some of the courses included ended in 2022, while the courses started in 2019-2020 and ended in 2021 were omitted. The file designation refers to October 2023, but the note indicates September 2023. The LV22 / LV23 overview later rounds the 2021 average to 11,0. This is a definite error in both inclusion and year.

Greenland's 2022 figures were corrected from **68/43 and approximately 8 months** to **81/42, 51,8 % and 8,9 months**. LV22, p. 10, explains the correction in December 2024. Original information that all concluded lengthy detentions resulted in conviction and approximately 93 % in institutional placement was **removed**, because outcomes could not be verified without manually examining every case. The removed percentages must appear as withdrawn information, rather than current findings.

The Faroe Islands use manual reports because NIFLHEIMR cannot extract the statistics in question; Greenland uses manual reports linked to Avannarleq. Danish POLSS series, Faroese custody and Greenlandic detentions must therefore be shown separately. Greenland's 2023 series has four children's courses, all long term, average 6,7 months; this is not a count of four deductive children. At the same time, LV23 p. 11 describes ten case-law cases in the second half of the year following the amendment of the law of 1 July 2023; they cannot be added to the 97 detentions without clarification of the overlap.

NSK: Correction of explanation is not the same as correction of numbers

The NSK was established on 1 January 2022. The previous SEV course was under Østjylland and SEØ / GCØ under Copenhagen; cross-section comparisons require the demarcation. LV22 / LV23 p. 2 describes the merger. The April 2026 notes on page 4 indicate that the NSK course may be wrongly included under the Copenhagen Police Department. It is **not** evidence that the figures shown are thus corrected.

LV22 Table C, p. 4, has for NSK 2022 **31 completed courses, 25 lengthy, 81% and 8,7 months**. LV23 figures 1-2, p. 5-6, have in the updated 2022-overview **92% and 18,1 months**; the exact 2022 counters are not shown there. LV23's 2023 table has **26 / 13, 50% and 16,4 months**. Both figure values 92% and 18,1 are visually controlled. The different 2022 versions shall not be standardised and a precise 2022 number cannot be derived from the rounded 92% label.

Documented printed contradiction - no silent correction

1. **LV15 p. 4, child percentages:** The original writes 2014 81 / 280 = 29,5% and 2015 64 / 189 = 33,4%. Own divisions give 28,9% and 33,9%, respectively, rounded to one decimal place. The original number and the mathematical control are kept separate; the page is image-controlled.

2. **LV16 Annex Table 2, PDF p. 12:** The 2015- total is 4.404, while the main table of the same version and Table 1 show 4.398. The age rows summed up to 4.404. This is not an automated exit error; the printed page is checked.

3. **LV16 Annex Table 3-4, PDF pp. 14-15:** "Other special laws" 2016 has accumulated 148 in Table 3, but 160 in Table 4. Table 3's case names summer to 4.259, although the total is 4.271; Table 4 summer to 4.271. The same table 3 writes 163 / 218 killings = 78,8%, while the division returns 74,8%. Both sides are image controlled.

4. **LV14B Table 5:** The total 2014 denominators sum up to 5.005, while the main denominator is 5.006. One non-location shall not be implicitly allocated to a group.

5. **LV15 Table 5:** LV16 p. 6 explicitly acknowledges that the previous table was described as the number of offences but actually contained the number of arrears in the complex. LV17 Table 5 describes persons in the same main relationship. These indicators are different.

These specific errors weaken the specific statements made by the statements in question. They are neither a general defence of the authorities nor proof that all other figures or all prison orders are wrong.

Knowledge of the authorities, repeated follow-up and necessary concrete requirements

The authorities' own originals document knowledge of missing and incorrect POLSAS entries and imprecise codes from LV11 p. 5 onwards. LV13 pp. 6-7 describes how the autumn 2014 consultation did not show consistent or full use of detention case management, and some police districts had started late. LV15 p. 8 requires more detailed knowledge and case review. LV16 p. 8 documents that the subsequent investigation still showed difficulties with consistent use of all elements; officers responsible for detention cases were to be designated by 1. April 2017. A described effort is not equivalent to documented effect or specific redress.

The strongest documented criticism is therefore a coherent chain: authorities' knowledge of registration and progress problems → repeated oversight and management initiatives → continuing documented methodological errors and local deficiencies → risk of inadequate detection and review of prolonged deprivation of liberty → demand for case-specific checks, correct statistics, timely review and actual redress. A criminal allegation against a particular person still requires documentation of their act, culpability and the conditions of the specific criminal provision; it must neither be invented nor dismissed through a general claim of official immunity.

For the individual citizen, the responsibility timeline must cover arrest, each extension, the start of the main hearing, the first-instance judgment, any appeal, actual release, compensation claim, refusal, judgment, payment and actual restoration of work, school and family contact. Statistics alone do not document the final links. ERVA01-ERVA03 and the known partial payments in the Suldrup sequence show why these must appear separately.

Coverage status and precise residues

The annual originals for 2011-2017 have now actually been found, and their main figures, interval tables, outcomes and central changes in methodology/time limits checked. The tables and methodology/results sections of the 2020-2023 originals have been checked; exact district figures in unlabelled 2020/2021 charts cannot be read as precise data. 2018 and 2019 are numerically covered by retrospectives in several later originals. The separate 2019 statement's four pages have now been read in the Folketing's original HTML; its 16 omitted submissions have been checked against the primary source. The 2019 appendix's 16 pages are available as 32 separately labelled transcription segments with 371 data rows, but the PDF image cells have not yet been substantively checked. The 2018 original's eight statement pages and 15 appendix pages have now been fully read visually against public archive copies:30 annual tables/363 numeric rows, all methodology notes and internal discrepancies of 44/42 child-related case histories, and 1-2 observation differences between main/interval/outcome figures. See langvarig-varetaegt-2018-fuld-original-og-versionsafstemning.md and langvarig-varetaegt-2018-originale-tabeller.md. See langvarig-varetaegt-2019-originaltekst-og-bilagsgengivelse.md/.json; these differences in the actual scope of checking are retained.

Remains: material image control of the 2019 annex (secondary 371 rows reproduced, known original URL not provided); underlying graphics data; all exact material counters for recent years; number and progress of late-onset / rejected extensions; actual compensation and payment; personal dedup and relationships with children / parents. Data coverage status shall describe these concrete residues without making previous private work phases relevant to this new public project.

Sources and control locators

• **LV11**: The use of long-term detention in 2011 and 2012; date / version 2013-06-19, RA-2013-1211-0014, 22 PDFs pages. Control: The text of the statement and the statistical tables of the annex; some non-numerical annex notes not fully read. Locators of numbers are indicated by the appropriate tables and in the compact JSON.

• **LV13**: The use of long-term detention in 2013; date / version 2015-01-26, RA-2014-1211-0016, 18 PDFs pages. Checking: All eight text pages as well as all numerical annexes; some non-numerical annex notes not fully read. Locators of numbers are indicated by the appropriate tables and in the compact JSON.

• **LV14**: Use of long-term pre-trial detention in 2014; date/version 2015-07-09,RA-2015-1211-0017, 7 PDF pages. Checked: All seven text pages. Numeric locators appear at the relevant tables and in the compact JSON.

• **LV14B**: Annex to the 2014 statement; date / version 2015-06, RA-2014-1211-0017, 12 PDFs pages. Control: All numerical table rows and key method / delimiting notes. Locators of numbers are indicated by the appropriate tables and in the compact JSON.

• **LV15**: Use of long-term pre-trial detention in 2015; date/version 2016-10-20,RA-2016-1211-0018, 18 PDF pages. Checked: All eight text pages and all ten annex pages; every numeric annex cell and all scope notes checked visually. Image check also of text p. 4. Numeric locators appear at the relevant tables and in the compact JSON.

• **LV16**: Use of long-term pre-trial imprisonment in 2016; date / version 2017-08-07, RA-2017-2100105-2, 16 PDFs pages. Checking: All nine text pages, numerical attachment rows and key notes; image control of PDF pages 12, 14-15. Locators of numbers are indicated by the appropriate tables and in the compact JSON.

• **LV17**: The use of long-term detention in 2017; date / version 2018-05-31, RA-2018-2100105-2, 22 PDFs pages. Checking: All eight text pages and all 14 annex pages. Locators of numbers are indicated by the appropriate tables and in the compact JSON.

• **LV20**: Statistics on long-term detention in custody 2020; date / version 2023-01-03 registry date; original inventory date 2021- 05-22,, 6 PDFs pages. Checking: All text and table pages; figures without precise number labels cannot be translated into exact numbers. Locators of numbers are indicated by the appropriate tables and in the compact JSON.
• **LV21**: Statistics 2021, corrected October 2023 (corrigendum indicates September 2023); date / version 2023-10 revision, 8 PDFs pages. Control: All eight pages. The figures p. 4-5 do not have precise data labels. Locators of numbers are indicated by the appropriate tables and in the compact JSON.

• **LV22**: Statistics 2022, corrected December 2024 and April 2026; date / version 2026-04 revision,, 12 PDFs pages. Control: All tables, numerical figures and method / result sections; no uncritical conversion of rounded percentages into case numbers. Locators of numbers are indicated by the appropriate tables and in the compact JSON.

• **LV23**: Statistics 2023, corrected April 2026; date / version 2026 -04 revision, 13 PDFs pages. Control: All tables, numerical figure labels and method / result sections; visual check of the figures p. 5-6.

Compact, source-bound numbers and versions: long-range -product-range -2011-2023-versions -and -original control.json. The additional historical annexes have now been translated into 109 source and side-bound segments in long-range item-original-Annex-tables. There are 1.079 data rows: 939 from the first extract (six annual rows are column headings, and one separate blank row with 54 is added) and 140 cell-controlled rows from the ten annex pages of the 2015- original. These tables continue to be alternative annual versions and can

are not converted into an additional personal account. Only own fact and analysis cards are saved; public raw PDFs files and full texts are not stored.

Long-term storage: original numerical annexes as reading tables

These loss segments complement the analytical module on 2011- 2023. All rows retain the original publication version, original table number and physical PDF page. Repeated annual versions shall not be added together. The figures are the course and outcome of the original; they are not automatic persons, illegalities or convicted employees.

Scope: 109 loss segments with 1.079 data rows. The first 944 drawn numerical rows are translated into 939 reader rows: six rows with years are column headings and appear as such; one originally omitted row "Not Determined: 54" is included. In addition, 140 rows are from the image-based 2015-original, which is controlled cell by cell visually. In six rows from the 2016 Annex, the text extract repeated each cell twice; the single figures are checked in the original table rows and retained once. These are extract fixes, which must be distinguished from the documented errors in the printed originals.

Tables can continue on the next page or contain several years. Original annual markers are shown separately; no automatic person mapping is carried out. The line shift and spacer columns of the headings are normalized, and the same original column meaning follows continued tables. A line in the exit tables is an empty original cell, not a separate zero. The analytical module explains the accounting errors, the time limits, the annual versions and the various indicators of Table 5. For combined tables, the PDF / table position shown is the determinant locator.

Common category key for LV15 tables 3-4: The case category follows the decision's crime category; for cases not yet decided, the charge is used. The category may therefore change later. Classification follows the police/prosecution and is not directly comparable with Forskningskontoret's categories before 2011.

Subject matter	Number of long-term duration egg imprisonment in: the scope of the case;	Total number of retention in prison, the scope of the case;	Share of lengthy remand in offence category (%)	Average duration of long-term custody Intritions on the file in months;
Murder etc.	128	183	69,9	7,3

Long-term care 2019: original control findings and separate annex reproduction

Concurrent authority finding: 16 omitted references

The Director of Public Prosecutions' statement of 30. November 2020 documents that in 16 instances in 2019, police districts omitted the prescribed referral to the Regional Public Prosecutor concerning continued pre-trial detention beyond the time limits. The Regional Public Prosecutors criticised the omissions. The same section lists 82 referrals. The two counts must remain separate; the original does not determine whether the same person or case may occur several times. Calculating a national proportion requires the precise referral population and case linkage. [LV19, p. 3]

Argument chain: Conclusion: a protective oversight procedure was demonstrably breached. The authority's specific statement: 16 omitted submissions that were criticised. Original evidence: page 3 of the statement. Deficiency: the required prior review of continuing deprivation of liberty was not performed as prescribed. Rule: the statement's submission duty, linked to the Administration of Justice Act's section 768 a deadlines and requirements for special or very special reasons. Act/omission: the police district's extension request without the prescribed submission. Legal departure: the procedural deficiency described; each order's validity and the intervention's necessity must be examined in the record. Significance for the outcome: the prescribed review of the extension request did not occur; the actual extension and its days must be documented in individual records. Responsibility: the specific prosecutor, police-district and supervisory chain and the timing of knowledge must be identified. Demand: produce the 16 submission trajectories, their orders, actual duration, supervisory response and any subsequent legal consequences. The figure does not in itself represent 16 different people or 16 imprisonments already established as lacking legal authority.

Limitation and actual reading volume

All four pages of the statement are read in the Danish Parliament's original HTML reproduction. The document has file number RA-2020-2100105-2 and was transmitted as REU Annex 244 on 12 March 2021. It describes long-term custody as more than three months before judgment at first instance. Data were drawn on April 4, 2020. The period ending in 2019 is included, even if they started earlier; continued custody at the end of the year has been omitted. [LV19, pp. 1, 3-4]

The independent attachment is identified in the original Folketing registry with file number 2353614, but its PDF and image cells are not yet materially controlled. The following **32 segments with 371 data rows are controlled in PolSpy's public transcription of this Annex**. They are therefore labeled as document reproduction, not fully controlled PDF-original. Page numbers, tables, explicit annual markers and all reproduced numerical cells are preserved. Column meaning and line change are normalised; no passenger coupling is performed. An original "-" remains a line and is not tacitly renamed zero.

The Annex provides alternative annual versions for 2015- 2019. For example, the 2019 version is 4.213 completed, of which 1.406 is long, while the later statistics with the modified end point give other counters. The two versions cannot be combined or produced as a development for an unchanged population. [LV19B-G, Tables A and 1, reproduced p. 1-2]

The outcome categories include judgments imposing measures, fines and waivers of prosecution. The stated conviction rate of approximately 95 per cent concerns **decided prolonged cases**,not all remand-detention courses or all persons. The annex account's 2019 row reconciles 1.247 convictions, 66 non-convictions and 93 undecided cases to 1.406. The 48 acquittals are included in the 66 and must not be added again. [LV19,p. 2; LV19B-G, table 6,p. 15]

A concrete question for the original table check

The statement's original p. 1 gives children's average long-term pre-trial detention as 5,9 months in 2019. Table B in the reproduction repeats this. Table 2,however, reproduces two long processes for 15-year-olds averaging 6,7 months, 11 for 16-year-olds with 6,4 and 25 for 17-year-olds with 6,4. Weighting these reproduced cells gives approximately 6,42 months. This is a specific possible reconciliation problem requiring a check in the original PDF and its underlying data. It is not yet an established printing error in the original table. [LV19,s. 1; LV19B-G, table B/2,s. 1/5]

Documented findings, traces of investigations and necessary documents

Documented in the original report: the 16 omitted references, the 82 references, the date of calculation and the exclusion of continued custody at the end of the year. Recording level: the 371 table rows and their internal sum control. Traces of investigation: possible variations in child characteristics and the legal basis, duration and consequences of individual deprivation of liberty. Material needed: original documents, file and order chains, file references, release dates, documented children / family relationships, consequences of liability and actual compensation. The strongest current documented criticism is the lack of control under continued care; the actual cessation and repair of the citizen must follow as independent events.

The autonomous 2018- original has also been identified: eight exposition pages and 15 attachment pages, originally REU 2018- 19, second collection, Annex 113, transmitted 25 September 2019. The current public PDF view has only been able to provide piston text and page numbers; screenshot calls have not provided image pixels. These 23 pages are therefore not yet materially read. The lack does not change the actually read historical originals or the original 2019 find.

LV 2018: full original, children, outcomes and internal number differences

The 2018 original demonstrates that the main total, duration distribution and decision-making outcomes do not have the same numeric sum. In addition, the follow-up letter indicates a different number of children than both tables. These differences shall be visible when counting detention exercises, children and subsequent tests. None of the figures shall be replaced by an estimated "true 'value.

State Advocate General *The use of long-term pre-trial imprisonment 2018*, **17 September 2019, RA-2019-2100105-2**, is now fully visually read: **8 report / follow-up pages and 15 Annex pages**. The two scanned official Folketing files, retransmitted as REU 2019-20 question 655, are obtained through public archive copies of the same official URLs. The documents also show REU 2018- 19, 2nd Collection, Annex 113. All pages are read in memory; no official original files or pages are saved.

Originals: report 2237670 and annex 2237671. The archive copies of the report and annex used are from 28. June 2024. Checksums: report SHA256 bdb84a81563d13d62cfd45841032c09a499a5885aa2d0800643877151b7914b7; annex 03e0db86a98136ca6935e680b8b20c3d08b4c949d97f7d13ea430f162bd04fbd.

They may harm them, even **30 annual tables and all 363 series of figures** is reproduced in **long-product-product -2018- original-tables.md**, with original table number, year, column designation and physical / printed sidecator. JSON file **long-range -product -2018-original control -and -all-tables .json** contains the same own cells, sources, control date, all pages read and methodical facts. All column numbers and length drawings are aligned to check the transcription; the material discrepancy between the tables is preserved.

Limitation and source chain

The report's pt.4, p.7-8, describes QlikView with POLSAS as the basis. Previous years 2014- 2017 are reextracted in this publication for comparability. They are **the audit version of this publication;**, not additional observations that can be added to the same year's other versions. The exact day of the extract shall not be given in the 23 pages; it shall not be deduced from the date of a subsequent re-transmission.

Long-term is defined as **more than 3 months before judgment at first instance**. A case begun in 2017 is included if pre-trial detention ended in 2018. Cases initiated but not yet completed in 2018 are **excluded**. This therefore covers neither all people in pre-trial detention during the calendar year nor the year's total time burden. One month equals **30,5 days**, annex p.15, note 2. The main case category is determined by the decision, but the charge is used for undecided cases; these are dynamic data that may change following amendment of the prosecution or acquittal on one count, note 3.

The report uses on s.3 the wording "total number of persons under the age of 18," but the title and cells of the Annex show **pre-trial detention at the age of the arrest;**. There is no identity list or national person dedup rule. Therefore, the report's change of words does not create evidence for 172 unique children. The original interval markings 20-25 and 18-20 of the age range are retained in the reading table; any limit days cannot be reconstructed from the labels.

The State itself states that methodology and data change continuously, and that missing/incorrect registrations and imprecise definitions/codes cause data uncertainty. This is documented, source-specific methodological information, not a general reservation about specifically verified cells. The Director of Public Prosecutions' explanations concerning crime trends and case complexity on pp.2-3 are the authority's explanations; they do not document necessity or legality in each individual pre-trial detention case.

Main table, duration table and outcome: same year, different sums

Data year in 2018-pu milking	All products Red-billed rings R, Table 1	Long-term, Table 1	Share / mean months	Sum of ≥ 3 months ranges, table 4	Sum of decisions esstatus, Table 6	Deviation from long-term Table 1
2018	4.419	1.328	30,1% /6,1	1.326	1.326	−2
2017	4.415	1.229	27,8% /6,1	1.227	1.227	−2
2016	4.218	1.241	29,4% /6,4	1.240	1.240	−1
2015	4.407	1.286	29,2% /6,5	1.286	1.286	0
2014	5.031	1.417	28,2% /6,0	1.417	1.417	0

Locators: Annex Table 1 p.1-3, Table 4 p.10-11 and Table 6 p.14-15; Main Report p.3 Table 1 and Note 1 user **more than 3 months**, while Table 4 marks the interval **≥ 3 months**. The different threshold selection is an independent method point. The missing 1-2 rows cannot be attributed without raw data to specific persons, limit days or classification errors. An explained data dynamics is not a documented reconstruction of these concrete observations.

The review of the later 2019 publication for 2018 **4.446 /1.321**(i) the number of persons employed in the production of the product; *long-term -product -2019 -original text and Annex reproduct.md*. It is a later version and must neither replace the 2018- original 4.419 / 1.328 without labelling nor be added to them. The 2019 Annex remains secondary reproduced and not fully original read, see final status below.

Children's number: 44 in the cover letter, 42 in both tables

Data year	All progress made during 18 years	Long-lasting i the main table,	Proportion long-term	Average months
2018	172	42	24,4%	4,9
2017	210	77	36,7%	5,2
2016	167	50	29,9%	5,4
2015	166	47	28,3%	5,9
2014	223	69	30,9%	5,4

Main report p.4. The age annex 2018, table 2 p.4, states **age 15:3 long-term out of 16, age 16:13 out of 64 and age 17:26 out of 92**; the long-term cases sum to **42**, and all cases to **172**. The covering letter p.1 instead states **44 long-term** and a decline of **45%** from 2017's 77. The calculated decline 77→42 is 45,45%;77→44 is 42,86%. The main table and age annex support 42, but 44 is retained as the covering letter's divergent information. This is **not two additional children**, nor a verified explanation of the error.

The report additionally states an 18,1% fall in all child courses, a12,3 percentage-point fall in the proportion prolonged and a reduction of 0,3 month/9 days in average duration. These are relative changes in the closed annual population; they do not themselves document actually fewer unique detained children or less total time when ongoing courses are excluded.

Duration and subsequent decision

Table 4, p.10, gives 2018: **3.093 under 3 months,829 from 3 to under 6,433 from 6 to under 12,64 from 12 to under 24 and 0 at least 24 months**. All 64 long cases lasting at least 1 year are counted within this completed population; absence of 2-year cases from the table does not mean no ongoing 2-year cases existed. The report, p.5, states a 6,5% increase at 3-6 months,a 19,6% increase at 6-12 and a 17,9% decrease above 1 year. The longest mean duration by offence category in 2018 is homicide etc., **8,1 months**, sexual offences **7,0** and drugs/smuggling **6,1**, appendix table 3, p.7. For cases with at least 5 people in the same principal matter, the long-case proportion is **58,1%** and mean duration **7,4 months**, table 5, p.12. None of these averages is an individual maximum duration or proof of specific lawfulness.

Data year	Coating status	Not felling status	Not settled	Dismissed within the non-decaying,	Objection dismissed § 721, paragraph 1, nr.2
2018	1.197	59	70	37	22
2017	1.158	57	12	31	25
2016	1.179	52	9	32	20
2015	1.201	84	1	28	7
2014	1.340	76	1	35	31

Annex table 6,pp.14-15. The last two columns are **subsets**,not new courses. The 2015 figure of 49 groundless charges and the 2014 figure of 9 groundless charges/1 discontinuance under no.3,and the 2017 figure of 1 transfer to another police district explain other non-conviction categories; all cells are in the full reading table. The 2018 figure of 37 acquittals represents courses in this count based on the **latest decision for the detainee concerned**,not a national minimum person count or automatically 37 unlawful deprivations of liberty. Acquittal, absence of conviction, the lawfulness of each order and entitlement to compensation must be assessed separately.

Report s.5 provides: **95,3% conviction among convicted**, calculated at 1.197 / (1.197 + 59) = 1.256 decided; 70 not settled is outside the denominator. Among the 1.197 fellows: **84,5% unconditional penalty**, **10,5% of the measure judgments under § 68-70** and **3,5% partly conditional**. This is neither 95,3% of the 1.328 main course nor 95,3% of all prisoners in custody for the calendar year. A later felling judgment does not in itself demonstrate that prior custody was necessary, properly tested and proportionate.

Overrun of § 768 a and control by the Authority

The report's s.5-6 reproduces the time frame structure at the time: adults **6 / 12 months** depending on whether the penalty is less than 6 years or 6 years or more; young people less than 18 **4 / 8 months**. Derogation requires special and exceptional circumstances, respectively. These are the 2018rules of the 2019 original and should not be called current 2026 deadlines without version control.

The Director of Public Prosecutions acknowledges on p.6 that QlikView/POLSAS **cannot provide valid duration extracts in relation to the offence's statutory penalty range**. Instead, information from Regional Public Prosecutors on prior approval and the court's order is used:

Year	Reported courses approved by the State Prosecutor exceeding § 768 a
2018	56
2017	35
2016	25
2015	42

The figures register a **described approval procedure**, not established unlawful acts or independent examination of each approval's conditions.56 in 2018 must not be confused with the 2019 statement's **16 cases without the required submission** or its 82 submissions. The populations have different years and criteria. The report's pp.6-7 say that all requests beyond the deadline must be submitted and that supervision monitors this; it gives no count of missing submissions for 2018.

The state describes the arrest warrant in all lawyers, the electronic management chart developed 2017 and tested from the second half of 2018 with feedback from early 2019. Mandatory nationwide use remained a **evaluation issues;**, p. 7 Surveillance and plan statements document knowledge and organised action options; the citizen's actual limited intervention time requires specific dates, orders and case impetus.

Completed original and remaining 2019 Annex

The former concrete remnants **LV 2018's 8 + 15 original pages** is now closed. The whole text, all 6 original tables with 5 data years each, all notes and all 363 rows of numbers are read / reproduced. Coverage status shall no longer denote these two 2018 files as only identified or unread.

For **LV 2019**,the official 4-page statement has already been read and documented. The 16-page appendix remains a checked **secondary PolSpy reproduction**,30 annual tables/32 page segments and 371 rows in the existing module. The official appendix file 2353614 has been identified through Folketing metadata; direct access and image viewing have not delivered every page for substantive reading. The public archive entry tested on 7. October 2026 yielded **no archived HTTP 200 PDF at the known URL**. This is a specific acquisition task for that primary original, rather than a national absence of data or negative proof against other possible public copies. Original checking of mean age, notes and all appendix cells remains outstanding. No new catalogue areas have been opened.

LV 2018: all original Annex Tables published 17 September 2019

30 annual tables and 363 numerical rows, visually read in the original 15 pages 7 October 2026. Table units, cells and percentage precision are maintained. The years 2014- 2017 are the review of this publication, not the extra course of custody. Table 6 sets out the most recent decision, not necessarily closing balance sheet on the year of custody. No automatic person dedup is performed.

Source for all tables: original statistical annex;; public record copy of the official original;. Each section indicates the original table number, data year and physical / printed page. Thousands of separators are removed in integer cells; decimals, percentage precision and originals' - 'are preserved. No new sightings have been created.

Table 1, data year 2018, original page 1: Number and share of long-term detention periods and the average duration of each area of policy;

The original notes and demarcation

[1] Prolonged courses last more than 3 months before judgment at first instance. [2] A month is counted as 30,5 days. [3] The principal case area is linked to the decision; if undecided, the charge is used. These are dynamic data, so the principal case area may change when charges change or there is acquittal on one count. [4] Case areas follow police/prosecution definitions and are not directly comparable with the Ministry of Justice Research Office's 2011 division. [5] In 2018,under other Criminal Code offences, 102 courses concerning firearms in particularly aggravating circumstances, 22 concerning threats to life, 15 concerning aggravated deprivation of liberty and 12 concerning unauthorised use of a passenger car are mentioned. These four figures are not an exhaustive separate national person population and are not added to the main total.

The actual discrepancies between the main table, the duration table, the outcome table and the accompanying letter are dealt with in the **long-range-product -2018- full-original-and-version reconciliation. md**. No deviant cell is directed to a computed value.

Criminal services: intervention, changed decisions and health defects without national registration;

Tests and procedures must have different counters

The checked originals provide court referrals and outcomes back to 2006, and interventions broken down by duration. Placement in a punishment cell is a sanction against an inmate, not disciplinary punishment of a public employee. Force, security-cell placement, restraint and exclusion are interventions whose legal basis, necessity, proportionality, procedure and specific duration must be examined. Registration alone does not determine legality. Amended authority decisions are a separate review count. [KF15, KF23, KF24]

Selected original tables in three publication versions have been read:2015 PDF32-38 and 48-51;2023 PDF4-5,37-46 and 53-56;2024 PDF4-5,36-46 and 53-56. The 2024 version unavailable on the web has additionally been checked for methodology and judicial review at PDF4 and 54-56. There are 45 reader tables with 598 short data rows in the following table module. This does not constitute a full reading of all other statistical chapters or every separate annual original. The 2015 version looks back over 2006-2015; newer versions cover 2014/2015-2024. On the current statistical webpage checked, the latest listed statistical report was 2024. A missing 2025 annual table does not mean zero interventions in 2025. [KF15,KF23,KF24,KFA]

Final outcome, first instance and closed court proceedings

The 2015 original counts 91 incoming and 75 decided cases:58 affirmed,4 altered and 13 discontinued. Two of the four alterations were set aside by the high court following the authority's appeal; the year's text therefore states 2 finally altered authority decisions. This represents neither 4 final alterations nor four new people. The 2015 report's 2006 row has 36 affirmances,1 alteration and 8 discontinued cases; the footnote states that the authority's appeal of the alteration led to affirmance of the authority's decision. Footnote numbers must not be read as additional digits in alteration counts. [KF15,PDF49-51]

The newer originals indicate a statistical break in 2020: 2011- 2019 measured Table 8.2 first instance outcomes, while 2020 and later to include cross-agency final outcomes. The statements also have a specific vote deficit which must not be concealed by a common "decided 'column. [KF23 / KF24, PDF55-56]

Year and original place	Incomes	Determined in Table 8.1	Stated	Modified	Repealed / up given	Rejected	Sum Table 8.2
2018, KF24 retrospective	93	66	63	3	6	0	72
2019, KF24 retrospective	94	88	83	5	8	0	96
2020, KF24 retrospective	139	124	113	11	15	0	139
2021, KF24 retrospective	125	104	95	9	13	0	117

Year and original place	Incomes	Determined in Table 8.1	Stated	Modified	Repealed / up given	Rejected	Sum Table 8.2
2022, KF24 retrospective	146	112	93	11	7	1	112
2023, KF24 retrospective	169	167	135	21	11	0	167
2024, KF24	151	141	128	12	7	1	148

In 2018-2021,the difference between the two tables' outflow figures corresponds to the discontinuance/annulment column. In 2022 and 2023,however, table 8.1 also includes that column. The 2024 text gives 141 finally decided cases, 12 amendments and 7 withdrawn reviews; table 8.2 totals 148 including these 7. This is a documented difference in the scope of the published counts. Different years of intake and decision do not on their own explain the difference between two outflow tables for the same year. Case-record rows and a definition of closure must be produced before building a homogeneous twenty-year percentage. [KF23/KF24,PDF54-56]

For 2024, 12 / 141 = 8,51% of the declared departure including one rejection, 12 / (128 + 12) = 8,57% of the confirmation / change population and 12 / 148 = 8,11% of all table 8.2 statuses including the 7 given. Each denominator is visible; none of the percentages is an error rate for all prison decisions. The 12 amendments consist of 9 parole, 2 penalty cells and 1 reinstatement; 9 amendments are from the City Court and 3 from the National Court. In fact, prior release, termination of the penalty cell, repayment, duration of proceedings and personal liability are not included in this annual statement. [KF24, PDF54-56]

Sample access narrowed during the period

Act 661 of 11. June 2024 amended Sentence Enforcement Act § 120,subsection1,so that appeals against District Court orders require permission from the Appeals Permission Board. The Act's precise criterion is special grounds; a statistical account of special circumstances must not replace the statutory wording. Entry into force was 15. June 2024. Under § 10,subsection6,decisions made before entry into force retain the earlier rules. There is therefore no unconditional common methodological break for all appeals lodged after that date. The amendment applies here to Denmark;§ 11 of the Act excludes the Faroe Islands and Greenland. [KFL24,PDF5-7]

The 2024 original records 25 High Court appeals:19 from prisoners and 6 from the authority. Applications for leave numbered 11:6 from prisoners and 5 from the authority. One authority application had been granted, 2 prisoner applications refused, and 8 applications remained pending at year-end. The 8 pending must not be counted as refusals, and 25 appeals must not be added to 151 review entries as 25 new authority errors. Actual intervention time during the wait must be examined in linked case records. [KF24,PDF54]

Association, restraint, handcuffs and changed registration boundaries

2024 records 193 completed exclusions from association; 6 lasted over 28 days. The table excludes the institution's temporary suspension of association for order/security reasons. Therefore 193 is not all isolating conditions. Voluntary exclusions total 778,including 225 over 28 days and 277 without an opportunity for association with fellow prisoners. Calling an entry voluntary does not on its own document free choice or absence of failures of protection; the specific decision basis and reason for opting out of association must be examined. [KF24,PDF39-41]

The 2015 original's voluntary exclusions cover closed prisons and remand prisons and total 391,including 121 without an opportunity for association. Newer tables'2015 retrospective figures also include open prisons and total 644,including 197 without an opportunity for association. The two versions must not be added as 1.035 exclusions or used as unexplained growth. The 2015 observation-cell intervals 482+154+212+56+17 give 921 against the printed 924; newer retrospective figures change the two middle cells to 156 and 213,reconciling 924. Both numerical versions are included in the original tables. [KF15,PDF36-37; KF23/KF24,PDF40-42]

The 2024 security-cell count has 195 placements, including 157 with restraint;14 placements lasted at least one day, including 2 at least 3 days. Placements with restraint are a subset, and the number of restraints within each duration interval is not stated. The observation-cell count gives 937 and use of force 997 episodes. The same case may be registered under several intervention types; summing to a number of people or unlawful acts requires case-record/person linkage. [KF24,PDF41-42]

Handcuffs / conveyor belts fall back from 10.674 in 2021 to 1.368 in 2022 and 245 in 2023. The Authority took over the arrest services of the police in 2019.2023 original note states that reporting during transportation from 1 February 2022 only includes prisoners on open regimes; the 2024 note refers to the change of rule less. Therefore, the decrease does not demonstrate that the application to other regimes ceased. 2024 returns 210. [KF23 / KF24, PDF43]

The 2024 version changes the methodology for reasons for disciplinary punishments, including earlier years. The 2023 row's refusal to work thus changes from 7,0% to 8,6% between publications. The 2023 denominator for reasons for using force changes from 1.235 to 1.126, while the separate incident table lists 1.125; these are different original counts that must be clarified before conversion into people. [KF23/KF24, PDF38,42-43]

Deaths and health defects: concrete counters and a recognised national data gap

The 2015- original marks the year's 2 suicides as a provisional; recent retrospections indicate 1.2024 have 6 other deaths and 8 suicides. The 2023 registration of suicide attempts changes from 18 to 20 in the 2024 version; 2022 changes from 16 to 17. Deaths and trials must be investigated for cause of death, the authority's knowledge, treatment, supervision, prevention and investigation. The table does not simply show that a certain death is due to a liability omission. [KF15, PDF48; KF23 / KF24, PDF53]

The Minister of Justice's original reply of 23. June 2025 states that the Prison and Probation Service has no systematic records capable of counting adverse healthcare incidents over the preceding five years. The eastern region states that reports are not registered and retained after handling. The western region has a manual account for 1. April 2024-1. June 2025:38 incidents, including 35 medication deviations and one each concerning the wrong medical record, missing supervision after assault and a urine sample linked to the wrong civil-registration number. The count is described as uncertain. This is an actually documented recording gap;38 is not a national annual total or 38 unique prisoners. [KFUTH25,PDF2-3]

Executive Order 420/2025,§ 2,no.3,excludes healthcare activities in State institutions from this UTH reporting scheme. The exception does not establish that healthcare errors do not occur, and does not answer demands for adequate treatment, preservation of evidence and effective investigation. When the State also deprives the patient of liberty and controls access to treatment, the report's ECHR analysis must link the specific failure to relevant positive duties. The documented evidentiary gap makes records, medication logs, reports and supervisory follow-up necessary. [KFUTHREG25; the report's legal chapters]

The Data Protection Agency 10 July 2025 documents the wrong legal basis and long response times for inmates' insight. The study started on 19 July 2024; revised guidelines came on 9 September 2024.7 February 2025 informed the Directorate that it announced additional training had not yet been completed due to savings. The oversight ended with criticism and announced follow-up in 2026. The decision proves the failures listed and the unimplemented effort at the given time; actual recovery for each inmate must be documented separately. [KFDT25, decision 1-4]

Liability, claims for evidence and concrete action

Conclusion: national tables and the reporting scheme cannot alone show every unlawful prison intervention or affected person. Authority statements: annual-table entries/exits,amendments,annulments and the adverse-incident reply's absence of systematic counting. Original evidence: identified tables,the ministerial reply and access oversight. Deficiency: different exit boundaries,excluded intervention categories and missing linked health/time/person documentation. Relevant rule: the particular intervention's legal basis and procedure,and ECHR2/3/5/8/13 according to its nature;access under the actually applicable rules. Conduct/omission: intervention,deficient recording,missing access to information and possibly inadequate prevention/investigation. Departure: examined case by case;recording and access deficiencies are documented,automatic individual criminal liability is not. Consequence: prisoners and relatives may lose the ability to document harm,duration,cause and claims. Responsibility: managerial,authority,State and personal responsibility are examined separately. Demands: preserve contemporaneous evidence,produce the affected case rows,promptly review the continuing basis for intervention,and document cessation,treatment and actual redress.

Documented findings: the above table/version differences, absence of UTH registration and criticism concerning access to information. Investigation tracks: lawfulness of individual lengthy exclusions/restraints, causes of health injuries and any individual criminal liability. Necessary material: start/end of all interventions, release/contact/treatment dates, appeal and permission files, grounds for withdrawal, person linkage, payment and legal authority for non-retention of reports. The strongest current contention is the demand for effective

protection and documented testing during the procedure; an administratively completed control process is not evidence of timely restoration.

The original action and trial tables of the Department of Investigation

All rows below are short number extracts from the identified original tables. Publication year and PDF page are preserved. The figures are not unique citizens, not automatically illegal acts and not a sum across versions. The character - means zero; k denotes the original version correction. Multilayer lines in original row headings may be shortened to the line link bearing the numbers; the table and columns of the numerical row define its location.

Proprietary custody: all controlled years, durations and consequences of Justitia/ The 2025 Study of the Lawyer Society

Main findings and precise measurement of the source

I Justitia/ The 2025 version of the Bar Society decreased from 4.604 in 2018 to 2.940 in 2024, while the average duration increased from 3,3 to 6,2 months. Progress of at least 24 months increased from 18 to 107. By 2024 152 operations had been completed with acquittal of the principal; their average duration was 7,7 months and 29 had lasted over 12 months. It documents extensive deprivation of liberty before a freeing outcome, but does not in itself test the legality of each order.

The source is Mikele Schultz-Knudsen and Birgitte Arent Eiriksson, Justitia/ Legal Society (2025), *Preservation of custody - Legal certainty before judgment*, published 28.10.2025, ISBN9788797248942. Original 214 pages report. Printed page = PDF page minus 2. Chapter 5, p. 67-99, method pp. 16-17 and 101-104, as well as the legal and impact sections used here are read in the original. The checks include the tables and sections mentioned; it is not a claim for material checks on all 214 pages or on the underlying individual registry items.

The counting unit is completed in custody, not different persons (Method p. 68). A person can perform several times. The subsequent wording of the report "persons" for the same aggregates does not change this definition. Dismissed on the main proceedings; another judgment may be given in the same case.

the data withdrawal and is not automatically a definitively abandoned case. All these outcomes are subsets of the trajectories and are not added to them.

POLSS data shall be re-recorded. The 2025 data specifically provided may therefore differ from previous State Law versions; for example, 2023 exemptions were 217 earlier and now 234. The difference 17 is a version change, not 17 new separately documented citizens. The report's own tables must be displayed as a source version next to the original Danish Attorney-General's series.

Later source version: Rigsadvokaten's March 2026 revision records 2.941 completed 2024 trajectories. The Justitia2025 table below is retained with 2.940. The version difference must not be interpreted as one additional identified person. Fewer registered completions do not, on their own, document fewer distinct people deprived of liberty; starts, completions, ongoing trajectories and daily occupancy concern different populations.

Completed programme and duration

Year	All cleared	Number of months	0-3 md.	3-6 months.	6-12 months.	12-24 months.	24 + mg
2018	4604	3.3	3019	843	556	168	18
2019	4387	3.9	2713	825	558	254	37
2020	4038	4.2	2290	907	579	223	39
2021	3648	4.9	1797	913	617	263	58
2022	3668	5.0	1863	861	579	289	76
2023	3362	5.6	1482	863	648	269	100
2024	2940	6.2	1250	734	555	294	107

Source: original p.70 and 81-82. All the duration ranges to the main denominator. The boundaries of the ranges are reproduced by the source.

Year	24-36 months.	36-48 months.	48 -60 months.	60 + md.
2018	17	0	1	0
2019	37	0	0	0
2020	37	2	0	0
2021	46	10	1	1
2022	68	7	1	0
2023	75	22	3	0
2024	69	27	11	0

Source: original p.82. The rows are subdivided into the 24 + column above. In 2024, 38 courses were over 36 months, of which 11 were between 48 and 60 months. A 60 + course occurs in 2021. It's not different people across years.

Children under 18 years of age

Year	Completed less than 18	0-3 md.	3-6 months.	6-12 months.	12-24 months.	24 + mg
2018	199	134	45	16	4	0
2019	124	70	25	18	11	0
2020	173	105	45	17	6	0
2021	166	77	57	26	6	0
2022	128	68	33	20	5	2
2023	127	59	42	19	6	1
2024	104	50	28	16	7	3

Source: original pp.77 and 87. The figures are subsets of nationally completed case histories. 2022-2024 contains 6 cases lasting at least 24 months in total, but there are no person identifiers proving 6 distinct children. The source describes 5 as homicide/arson and 1 as financial crime (p.86). DST's 2024 figures for commenced cases among ages 15, 16 and 17 are 33,43 and 56, totalling 132; this uses a different annual boundary from the Director of Public Prosecutions' 104 completed cases. The difference of 28 does not document 28 additional unique children or a precise change in the caseload.

Dismisses the application;

Year	Courses ending in acquittal on the principal charge	% of all	Gns.md.	Not indicted by extract	% of all
2018	307	6.67	3.9	400	8.69
2019	236	5.38	5.0	315	7.18
2020	261	6.46	4.8	324	8.02
2021	252	6.91	4.6	269	7.37
2022	256	6.98	6.4	264	7.2
2023	234	6.96	6.4	218	6.48
2024	152	5.17	7.7	-	-

Source: original s.96-98.2024: 29 of 152 acquittal courses were over 12 months; 6 of 104 completed child courses had voluntary main outcomes, of which 1 over 12 months. They are already included in the previous figures. For 2024, the non-indictment number was not delivered. In 2023, 234 + 218 = 452 courses, 13,44% of 3.362, divided into the two categories listed; they are not 452 different persons and not a count of all illegal detention exercises.

The report also reproduces about 200 annual courses 2018- 2023, over 5%, where the time in custody was at least the subsequent penalty. The separate number of persons in custody **exceeded** the penalty is not shown in this checked aggregate material. Therefore, all approximately 200 must not be called detention beyond the sentence (p.97-98).

Police districts and scope of crime categories

Policy district / body	2018	2019	2020	2021	2022	2023	2024
North Jutland	238	241	233	266	236	234	216

Source: original p.73. Sum minus national main figure by year: [0, 0, 0, 0, 0, 0, 0]. Differences are retained and must be reconciled in the original version before a corrected sum is used. No crime group is itself a count of unlawfulness.

Several simultaneous denominators: start, judgments, evidence and international comparisons

Year	DST started progress	DST unconditional judgments	Gns.daily storage
2015	5221	8561	1258
2016	5715	8376	1243
2017	5832	8475	1283
2018	5797	8067	1444
2019	5537	8085	1505
2020	4570	7788	1645
2021	3949	7373	1600
2022	4084	7564	1633
2023	3692	8136	1604
2024	3318	8618	1362

Source: original s.71-72 and 77. Started courses from STRAF70, unconditional sentences from STRAF40 and daily evidence from the Department of Crime. The 2024 number of the cover is later given more precisely to 1.362,3 (p.79). Starts and endings do not cover identical time windows / populations, and evidence also includes alien-law detention, which the RA series omits. It is not possible to pull the start and the end and thus to document a precise number of accumulated citizens. The relationship between starting and sentences is not the proportion of sentenced persons who were previously held in custody.

The Nordic comparison of the report uses different years and units of measure: Norway 2023 has 2.526 starts and 2.425 endings; Finland 2024 has 2.379 starts; Sweden 2024 has 11.328 endings. Denmark 2024 has 2.940 endings. The population denominators are 5.606.944,5.636.000,10.587.710 and 6.004.342; the Danish is 2025, while the custody year is 2024. The published rates are 43,42,107 and 49 per 100.000. respectively. Daily data are Norway 2023: 704, Finland 2024: 782, Sweden 2024: 3.056 and Denmark 2024: 1.362,3; rates 12,6,13,9,28,9 and 22,7. The quantities are compared with Norway 2022: 78 days, Finland 2020: 3,4 months and Sweden 2024: 98 days. Year, start / finish and scope must be at the rates; the comparison cannot only identify a number of illegal Danish prisons (p.78-89).

Data selection, process phases and documented times

The additional 2024 analysis includes 2.950 ongoing courses from 1 January to 24 August; approximately 800 courses were sorted out due to insufficient information. There is therefore a specific selection limit. This committee included collusion hazards in 1.849 courses (62,7%), repetitive hazards 588 (19,9%), escape hazards 578 (19,6%), § 762, paragraph 2, paragraph 1 in 226 (7,7%) and paragraph 2 in 34 (1,2%). Reasons do not overlap and summer to unique persons.146 return journeys and 8 journeys under section 763 are separate boundaries in the same material; they must not be renamed ordinary criminal proceedings (p.74-75).

Among proceedings concluded in the district court, the pre-charge phase increased from 1,6 months in 2018 to 2,6 in 2023, and charge to first judgment from 1,5 to 2,5. In appealed cases, pre-charge increased from 3,1 to 4,3, charge to first judgment from 2,8 to 4,7, and first to final judgment from 5,3 to 7,4; a further phase from final judgment to serving the sentence increased from 0,3 to 0,6. The three appeal phases total 16,4 months in 2023; including the last phase, 17,0. It is therefore wrong to present 16,4 as the time of complete cessation. For homicide/arson in the 2024 committee’s appealed cases, the first three phases are 8,2,6,9 and 13,9 months, but this is a selected group (pp.83-84).

19% of the 2024 sample had advance listing and sequences 2,5 months longer than the others. This is an observation in a selected sample, not causal proof that advance listing prolongs cases. Time from indictment to listing was 0,7 months generally,1,4 for sexual offences and 1,5 for homicide/arson; listing to first judgment was 1,9. According to RA, the advance-listing measure’s apparent phase of 1 month may be affected by relisting and registration errors (pp.87-88).

Interview and question form: criticism with proper evidence status

19 interviewees comprise 5 defence lawyers,7 judges and 7 prosecutors;5 had previously been prosecutors and are already included in 19. Interviews cover 10 of 12 police districts. The questionnaire has 79 defence-lawyer responses from approximately 400 possible respondents and 58 prosecutor responses from 95 invitees. The Judges' Association did not want a questionnaire survey of judges. Bornholm, NSK, Greenland and the Faroe Islands are outside the questionnaire's scope; geographical table totals are 77 defence lawyers and 57 prosecutors and must not be presented as all 79/58 respondents. Prosecutor responses are geographically skewed, for example 3 in Copenhagen and 20 in Funen/South and Southern Jutland, and are not weighted by caseload. The report's statements about practice rest on this material, rather than full review of court orders (pp.16-17 and 101-104).

The interview material describes repeated extensions without real retesting of the grounds of suspicion, reticence in the use of precautionary surrogates and a lack of consistency in slow propulsion. These statements are essential evidence of the actions and omissions of the police, the prosecution and the courts. They must be labelled as professional experience and assessments; the study does not establish that all extensions are illegal. Defenders also describe the abandonment of appeals or acceptance of outcomes under the pressure of long-term custody; the prosecution's assessment of the absence of false confessions is not empirical evidence that such never occurs (p.158- 169,180-185 and 198).

The questionnaire figures do not print all precise column values, and answers like "don't know" are omitted in several characters. Therefore, the whole of 79 / 58 is not automatically the denominator for each question. These graphical figures cannot be translated into precise new case figures by reading or guessing.

Actual cessation and replacement: secondary documents

The legal section of the report, p. 48-49, refers to the following specific decisions. AM 2020.10.15V2, AM 2010.02.25V2 and AM 2022.10.17Ø are subsequently checked in all sides of the official original decision chains. The full time / evidence analysis is in *Weight: three original decision chains and time to restore*. The other maps below have continued **description of the source;**, not independently verified court orders:

• AM 2016.01.04V: 366 days of custody and acquittal; compensation rejected according to the source's description, referring to its own guilt in a telephone statement on ketamine. Requirements for next checks: precise date of release, causation and original justification.

• AM 2020.10.15V2: 240 days of custody in addition to the sentence imposed; compensation awarded because incorrect explanations did not cause the extra time it is reproduced. Requirement: amount, periods and actual payment.

• AM 2010.02.25V2: more than a year of custody in the Suldrup case and subsequent acquittal; the source describes damages despite concealments without the necessary causal link. Requirements: original dates and endurance status.

• U2013.1798/2H: compensation halved with reference to the partial causal significance of incorrect statements. Demand: precise deprivation-of-liberty period and amount.

• U 2009.2287E: replacement refused in the source's description with reference to lack of explanation. Requirements: precise scope in relation to the right to silence and applicable law.

• U 2000.2385H is before the reporting period. It can only be used as a historical legal reference: the source describes isolation-induced psychosis, 216 days in addition to punishment and compensation. It is not counted as a 2006-2025 course.

These references to the courts shall not be added to the national proceedings or referred to as a complete register of procedural errors. A right to compensation, an award and actual payment are different times and must be recorded separately.

Consequences and responsibilities

The dates of the order, each extension, indictment, first judgment, final judgment, physical release or transition to serving a sentence and actual compensation must be recorded separately. A lawful basis on an earlier date does not prove necessity on every later date. An acquittal examines guilt; it does not by itself restore lost family life, employment or mental health. Research on such losses is addressed in the module *Remand detention, employment and family life* with the original register study's own historical and person-related delimitation.

The report recommends the publication of several running ratios: lengths by circle and ground, termination and initiators, court and replacement outcomes. This shows specific data requirements, not evidence that the recommendations were implemented after publication (p.209-211). Liability shall link the documented phase delay to the action or omission of the individual actor, the rule to be observed and the loss of the citizen. No unconditional discretion is derived from the figures.

Additional published percentage tables: keep rounding and denominator

The tables below also reproduce the rounded percentage of the original. They describe the progress already taken into account. They are not additional events and the rounding should not be used to reconstruct unknown exact numbers. Circular change has its own base year as the denominator; duration shares use the end 2024 course of the circle.

Maintenance, work and family life: primary research and controlled source chain

Main findings and actual delineation

Danish register research documents a lasting decline in labour-market attachment and increased risk of ceasing cohabitation with one's own children after pre-trial detention, including in the group without subsequent conviction. The results show specific social losses that a later acquittal or abandonment of prosecution does not in itself repair. The study does not examine the lawfulness of individual detention orders and therefore is not a count of unlawful deprivations of liberty.

The primary source is Sara Wakefield and Lars Højsgaard Andersen (2020), *Pretrial Detention and the Costs of System Overreach for Employment and Family Life*, Sociological Science 7, pp. 342-366, DOI 10.15195/v7.a14. Original article. PDF page = printed page minus 341. The methodology, delimitation and central outcome tables have been read in the original. The register data are the researchers' analyses; the underlying individual register records are not available in this report.

The study covers: **75.187 cases / cases involving 50.446 different men**, 18-59 years, period **1995-2010**, with at least seven days in custody in the relevant groups. Both the beginning and the end must be in the period; the outcome is followed three years before and after. Women, children under the age of 18, under seven days of care and cross-border courses are not included. Thus, the study only covers 2006-2010 of the main period of the report and cannot be estimated at a national number of losses in 2006-2025. 78% of the different persons had one case; 95% had a maximum of three. People with multiple cases are counted several times in the case accounts; standard errors are clung to person. Original p. 346-349.

Analytical group	Cases / proceedings	What the outcome means
Convicted, never in prison, except for possible arrest under 24 hours	27.376	Reference group; **not** serving an ordinary prison sentence;
Preservation, no conviction	2.797	Dismisses the application; the category is not limited to discontinuance;
Convicted, the entire sentence served as custody	1.017	No further atonement after the judgment
Preservation and subsequent prison sentence	38.990	Further detention after detention
Remand followed by another sanction	5.007	Primarily conditional penalty / probation in article categorisation
Total	**75.187**	**50.446 persons** across the groups

Source:original table 1,pp. 354-355,compared with the definitions on pp. 346-349. The group without conviction is not 2.797 documented unlawful remand-detention orders. Nor may the whole historical cohort be added on top of the Director of Public Prosecutions' annual courses.

Work: actual measurements and interpretation

Employment income comes from tax information. Annual income is divided by 12 into a monthly measure; the employment indicator shows income from work. Precise timing before and after deprivation of liberty is uncertain by up to **±11 months** in certain cases. These months are marked in figures and excluded from the statistical models. Amounts are stated in **2010-USD adjusted for purchasing power**, not present-day kroner. Original pp. 347 and 350-356.

The Danish research communication reports labour-market attachment in the group without conviction as **16 % lower** after remand detention than before. This is a **relative change**, not 16 percentage points and not evidence that exactly 16 % of all remand detainees lost a job. ROCKWOOL Foundation's original research communication, pp. 1–2.

Article table 2, p. 356, provides controlled model estimates. In model 5 the reference group's change in the employment indicator is −0,054, and the additional change for the reference category with pre-trial detention is −0,058. The latter is **−5,8 percentage points**, in addition to the change among convicted people without imprisonment. The interaction for the group without conviction is +0,015 and not statistically significant. In model 6 with individual fixed effects, the additional pre-trial detention change is −0,053. Income model 2 estimates an additional change of −124,957 purchasing-power-adjusted 2010-USD per month; the interaction for no conviction is +30,014 and not significant. The estimates have different reference components and must not be added to the reported relative change as separate losses.

The descriptive pre- / post-share with work income in Table 1, p. 354, is 0,769 / 0,716 for prisoners without imprisonment, 0,724 / 0,625 without conviction, 0,649 / 0,555 for full custody, 0,650 / 0,526 for later prison serving and 0,731 / 0,637 for second sentence. It is descriptive group objectives and not the number of unique people who have lost their jobs. The controlled estimates are necessary because the groups already differ before imprisonment.

Family: Cohabitation, children and comparison group

Family outcomes measure common address with partner and with **own children**. They do not measure the number of children, contact, contact, parental authority or the child's subjective experience. An address breach therefore does not automatically document a complete break in contact, but is a tangible loss of common everyday life. Original pages 348 and 357-358.

The Danish dissemination indicates among men who: **before the course lived with partner and children**that the family is no longer the same for **35 %** in the reference group with a sentence without imprisonment, **46 %** in the group of custody without conviction; and **51 %** among those who served the entire sentence in custody. The difference is 11 and 16 percentage points, respectively, between the groups indicated. There is no published, common precise number in this figure which makes it justifiable to translate the percentages into a number of children or families concerned. Original Danish dissemination, p. 3.

Specific correction of the source chain: Justitia/ The 2025 Report of the Bar Association, published on p. 12, reproduces 35% as a group serving ordinary prison sentences without custody. This does not match the original article reference group and the original ROCKWOOL Foundation p. 3. **Convicted who did not stay prison,**. The error changes the comparison; it does not erase the documented additional family loss in the group without conviction. 2025 reproduction.

The article's table 3,p. 358,uses separate risk groups: **8.631 cases** with previous cohabitation with a partner and **8.280 cases** with previous cohabitation with their own children; observation time is 212.499 and 196.208 months respectively. The figures are not unique people and are not the denominator for all three percentages in the Danish figure about partner **and** children. In the model controlling for background, the relative event rate for ending partner cohabitation is 1,292 in the group without conviction, and for ending cohabitation with children 1,250; both are statistically significant at the article's stated levels. For a sentence served entirely in pre-trial detention, the figures are 1,098 for a partner, not significant, and 1,601 for children, significant. For later imprisonment, they are 2,146 and 1,711; for another sanction, 1,695 and 1,473. An event rate is not a percentage of all imprisoned people and must not be converted directly into children.

Evidence value, responsibility and concrete requirements

Researchers use individual before / after changes, background controls and personal fixed effects. The models assume that remaining selection is random depending on observed conditions and past outcomes. The design is not a randomized study; time-varying unobserved conditions may affect the relationship. This specific method limit does not make the losses invisible and does not justify a general defence of detention. Original pp. 349- 352 and 361-363.

The strongest sustainable use in the report is: Pre-trial detention may be followed by loss of income support and shared family life even without conviction; redress must therefore be examined separately for liberty, work, housing, cohabitation, child contact and compensation. If a specific deprivation of liberty or extension was unlawful or unnecessary, these outcomes may be relevant heads of loss and lines of investigation. This requires individual documentation of dates, actual loss, causation and legal responsibility; research estimates are not individual compensation amounts.

Additional information required is current personalised duplicated cohorts, women and children, subsequent jobs / income / housing / cohabitation, date of actual cessation and replacement, and link to established illegality. The national annual programme of the report cannot provide these figures by multiplying an historical percentage by the number of courses in custody.

Weight: three original decision chains and time to restore

The decisive findings

Two original decision chains document that the Regional Public Prosecutor and Director of Public Prosecutions maintained the denial or halving of compensation that the courts later set aside. In one case, the citizen was deprived of liberty for **240 days beyond the sentence imposed** and, after judicial review, was awarded **DKK 408.000** with interest. In the other case, a mother of **two minor children** was deprived of liberty for **433 commenced days** and acquitted; the halving of compensation was set aside, but her claim for further enhanced compensation was not upheld. The third case documents **12 commenced days**, discontinued prosecution and a delayed letter to defence counsel; compensation was refused also after judicial review.

The three cases are identifiable decision chains, not a representative committee or a complete national court register. They may overlap the national causes. Their administrative decisions and judgments are not counted as new persons. The sources do not document criminal liability for employees or an automatic infringement of EMRK In all three cases. The criticism below relates to the actual deviations, losses and non-recoveries of the originals.

All pages of the official configurations are read: AM 2020.10.15V2, 21 PDFs pages; AM 2010.02.25V2, 37 pages; AM 2022.10.17Ø, 9 pages. They contain original decisions and court extracts and their reproduction of previous evidence. The underlying police reports, medical records and supporting documents have not been independently obtained here. A reproduced explanation is therefore marked as an explanation, and a court premium such as the court premium.

1. E: 240 days too much; two administrative refusals, then DKK 408.000.

Conclusion: The prosecution's reasoning for eliminating all compensation could not support the necessary causal connection to the additional 240 days. Both the district court and high court set aside the refusal. This is a specifically documented incorrect compensation outcome that an internal administrative complaint did not correct.

Original: AM 2020.10.15V2, Vestre Landsret S-0338-20, 15 October 2020, with decision chain.

Date	Action, outcome and source
16 January 2017 20.08	Arrest. Initial charge attempted murder; later killing and helpless condition. PDF-p. 3, 9, 15-16
17 January 2017	Warrant detention. PDF, pp. 3 and 16
6. October 2017	indictment for murder, or, alternatively, gross violence resulting in death, threats and stabbing. PDF-p. 17
15 January 2018	Corner sentenced E to 12 years in prison for, among other things, complicit in killing; E appealed. PDF-p. 3, 17-18
12 December 2018	Vestre Landsret acquitted of murder and convicted of violent violence, threats and knife laws: 1 year and 3 months. PDF-p. 3 and 18-19
12 December 2018 kl 13.10	In fact, according to the D.A. 's parallel 2019 decision. 695 days started, penalty calculated at 455 days, difference 240. PDF-p. 19; date deviation below
20 December 2018	Claims made. PDF-pp. 3-4 and 19
21 March 2019	The district attorney in Viborg refused compensation and a lawyer's fee for his own guilt. PDF-p. 15 and 19-21
3 April 2019	The lawyer complained. PDF, pp. 4, 8 and 13
29. May 2019	The Attorney General maintained the entire refusal and the fee waiver. PDF-p. 8-14
9 July / 16 August 2019	Application for judicial review / referral and receipt. PDF-p. 4
29 January 2020	The court in Hjørring awarded DKK 408.000 for 240 days with procedural interest from December 20, 2018. The DA appealed. PDF-p. 3-7
15. October 2020	Vestre Landsret The Court of First Instance dismissed the application and ordered the Treasury to pay the costs. PDF-p. 1-2
Actual payment	Not documented in the composition; shall not be replaced by the date of the judgment

The statement of the Authority and the significance of the evidence: The Attorney General has already acknowledged the mismatch between detention and punishment, but thought that E's changing explanations had given rise to the whole detention (PDF's 10-13). On the other hand, the City Court found that the same fact of his presence at the first incident of violence had been taken into account in both criminal convictions and that there had been no significant new information between them. The change in national law related to the meaning of criminal law: it was not proven that the individual had participated in the second episode or that the cause of death originated from the first episode. E would also have been in custody if, from the outset, he had given the explanation corresponding to the fact on which the judgments were based (PDF, pp. 2 and 5-6).

Legal departure and responsibility: The rule applied was section 1018 a, subsection 2, of the Administration of Justice Act concerning disproportion, read with subsection 3 concerning the person’s own fault. The courts did not find the necessary causal connection to the additional 240 days. The prosecution had converted an assessment of the citizen’s credibility into complete loss of entitlement to compensation without a sustainable connection to the part of the deprivation of liberty to be compensated. The criticism specifically concerns the State Prosecutor’s refusal, the Director of Public Prosecutions’ affirmation and the appeal against the favourable decision; it does not require an assumption that every original remand order was unlawful or criminal.

Time and specific demand: From actual release to the first compensation judgment,**413 calendar days** elapsed; to the High Court’s affirmance,**673 days**. From the first administrative refusal to affirmance,**574 days** elapsed. These are our own date-difference calculations; they are not additional days of deprivation of liberty. The post-judgment claim is DKK 408.000, interest and the awarded costs. Actual payment and any further loss must be documented independently.

Source conflict: The district court's statement of the case, PDF p. 3, gives release on 12. December **2019**, but the same paragraph states 695 days from January 2017 and describes a compensation claim already on 20. December **2018**. The regional public prosecutor's original PDF p. 19 specifies 12. December **2018** at 13.10. The account of time uses the latter direct date and makes the discrepancy visible. Rigsadvokaten's PDF pp. 10-11 also contains 2019 dates for acts placed in 2017 by the decision's own earlier chronology and the regional public prosecutor's original. These errors must not become an additional year of actual deprivation of liberty. The district court's judgment date has separately been corrected from 30. to 29. January 2020, PDF p. 7.

2. Suldrup: 433 days, two children, loss of work, and halving set aside

Conclusion: The Regional Public Prosecutor's and Director of Public Prosecutions' halving of both compensation and lost earnings was set aside. The originals also document loss of work, very limited contact with two children and a long sequence leading to full compensation under the standard rates. The High Court's compensation review had to proceed with E's estate as a party; the date and cause of death are not stated and must not be inferred from the case.

Original: AM 2010.02.25V2, Vestre Landsret S-1566-09, 25 February 2010, with judgment of the Court of Justice of the European Communities and administrative originals;.

Date	Actual / legal process and locator
29 July 2006 kl. 03.40	E is being arrested for killing his mother. The same day they're in custody. PDF-pp. 5-7 and 34
28 August / 1 September 2006	Dismissal by the employer effective 28. August documented to the Regional Public Prosecutor; the compensation period is calculated from 1. September. PDF pp.32 and 36
6 February 2007	indictment. PDF-pp. 7 and 22
6 July 2007	Visits to the children are abolished; so far, monitored visits of half an hour per week. PDF-pp. 11 and 27
4. October 2007	Acquittal and release. 433 commenced days in the compensation count: first day + 432 subsequent days. PDF pp. 5-7 and 34-35
7 November 2007	Claims made. PDF-pp. 5-6 and 34
27 February 2008	The district attorney awards DKK 285.800 in compensation after halving. PDF-p. 34-37
6 March 2008	The DA awards DKK 164.143,84 in lost earnings after halving. PDF-p. 24 and 32-33
24 June 2008	The Attorney General will hold on to the halves and refuse any further increase. PDF-p. 24-31
25 June 2009	The District Court in Aalborg sets aside the halving: total compensation DKK 571.600 and lost earnings DKK 328.333, total DKK 899.933; an additional DKK 449.990 after deduction of amounts already paid, with interest from 7. November 2007. PDF pp. 20-23
25 February 2010	Vestre Landsret maintain the compensation outcome. The separate fee of DKK 2.900 plus VAT is abolished; additional work must be included in the court's sales. PDF-p. 2-4
Actual reunification	E explained in the District Court that the two children moved back when they were released and had since lived with her. PDF-pp. 16-17; not a separate read address / authority register
Actual payment	The first two amounts are described in the urban balance sheet as already paid out; date and possible set-off are not shown. The actual date of payment of the additional compensation has not been documented. PDF - pp. 6, 22, 33 and 37

The authority's specific statement and legal examination: The State Prosecutor held it against E that she had left the crime scene, not called 112,taken off the bloodstained clothes, wanted a bath and pointed out different clothes. The Director of Public Prosecutions adopted the same reasons. The High Court found that, in the situation after witnessing her mother's murder, she could not be blamed for running home to her minor children, not managing to summon help, taking off her clothes or wanting a bath. Concealed clothes and incorrect information about the clothing could be blamed to some extent, but had not had the necessary significance for the remand detention itself. This rested particularly on the father's account, the bloodstained clothes found and the assessment of her reaction. There was no basis for a reduction under § 1018 a, subsection 3 (PDF pp. 3-4 and 35; District Court p. 22).

Citizens with precise evidence status: The public prosecutor recognised a dismissal on account of the case, monthly wages around DKK 25.000 and a calculated loss of earnings from 1 September 2006 until the release. The reproduced psychological opinion of 20 May 2009 described stress response after both the experience of mother killing and the stay in the brig, with PTSD symptoms and the need for longer therapy. The doctor described 12 June 2009 worsening anxiety / restlessness, psychological treatment stopped for economic reasons and difficulties in using teacher training, but even provided limited grounds to separate the causes (PDF-s. 14-15). These are two reproducible health-care assessments, unindependently controlled medical history or evidence that all symptoms were solely due to care.

E explained that she had been on sick leave for the first six months after the acquittal, had been refused employment and had to give up further training; the first compensation was mainly spent on debts recovered during imprisonment. She also described psychological aid to her eldest daughter. Her statements on saliva, humiliation, misleading police report and the pressure of confession are serious concrete allegations in the original judgment, but did not establish facts solely by reproduction (PDF-pp. 16-17). The original examination of the specific complaints and records is necessary for these points. They shall not be presented as already proven or deleted from the impact accounts.

Time, redress and responsibility: From release to the favourable District Court finding,**630 days** elapsed, and to the High Court's conclusion,**875 days**. Contact during deprivation of liberty was half an hour weekly until 6. July 2007; two children were affected, but they are not two additional compensation claimants. Reunification is described at release, while full entitlement to compensation was examined only later. Occupational and psychological recovery are not documented as completed. A monetary payment is therefore not equivalent to restoration of health, education, work or lost time living together.

The judgments upheld refusal of an increase beyond the standard rate for homicide cases. That specifically changes the compensation amount; it does not make the loss of children, work and the opportunity to attend the mother's funeral unreal. The strong sustainable criticism is the halving without the necessary causal connection and the prolonged need for external review. The evidence assessment in the overall criminal case and all restrictions' compatibility with the Convention cannot be determined solely from these compensation judgments.

Local source conflicts: The PDF- p. 3 of the National Court refers to the decision of the Public Prosecutor as of 27 February 2007 and of the Advocate General as of 25 March 2008. The originals attached show 27 February **2008** and **24 June 2008**; 25 March is the date of complaint. The city court's PDF p. 8 writes one place 8 March, but the attached administrative original and RA's p. 24 show **6 March 2008**. The loss of earnings is administratively calculated at DKK 328.287,67, while the City Court grants DKK 328.333; the visible diffusers DKK 45,33 is not retained and is not hidden as complete numerical uniformity. Both sub-payments, the total amount and the additional award shall not be summed up to a new, higher amount of compensation.

3. Dismissed arms case: release, delayed notification and refusal of compensation

Conclusion: The original documents a separate information failure: the defender first received a message **273 calendar days** after the arrest. The claim was therefore not rejected as late. On the other hand, it was refused on account of its own fault and the refusal was confirmed. A person may thus have the charge dropped and yet remain without compensation; this outcome is not proof of the absence of actual loss of liberty or family life.

Original: AM 2022.10.17E, Østre Landsret S-2621-21, with administrative decisions and Glostrup judgment.

The deprivation began. **15 June 2017 kl 14.56** and terminated upon decision of the police **27 June 2017 kl 13.12**, before the time limit for imprisonment: **12 days started**. The charges were dropped. **15 December 2017**, but the defender was first informed **14 September 2018** and made claims; **17 September 2018**. The DA refused. **20 June 2019**, The Advocate General maintained: **19 August 2019**, Glostrup **1 September 2021** and Østre Landsret **17 October 2022**. The requirement was **15.300 kr.**, calculated as 6.500 DKK first day + 11 × 800 DKK; the amount was not awarded. The citizen had to pay the costs before the courts (PDF, pp. 1-5 and 8-9).

The legal assessment was based on the car having been made available as a pool car to Bandidos members and on the court's assessment that the owner should have foreseen the risk of storage of unlawful items. The person subsequently convicted in relation to the pistol found was someone else (PDF p. 9). The material read provides no basis for claiming that this refusal of compensation has already been set aside or is contrary to the Convention. The criticism can specifically maintain the delayed notification, prolonged review and absence of compensation; further examination of proportionality and contributory fault requires the underlying documents and relevant case-law.

From physical release to the end of the national court **1.938 calendar days**. It is time for an unresolved claim for compensation, not continued imprisonment. A reclaimed police interview indicates that the citizen and the girlfriend had a single child; the child is an identified possible affected relationship, not an additional prison or person seeking compensation (PDF p. 6).

Source conflict: The City Court's PDF p. 5 writes the end of the detention as 27 June **2021**, while the simultaneous originals of the Attorney General and the Attorney General show **2017** and count 12 days. The mistake must not become four years of detention. The City Court's p. 8 indicates in a paragraph found in the car as 16 June, while the administrative simultaneous incident chronology indicates 15 June; the exact date of funding must be checked, if necessary, in the police's original report. No additional day is added to the 12 days documented.

Overall control of the three chains

Measurement point	E 2020	Suldrup 2010	Armistice 2022
Various detainees in this committee	1	1	1
Explicitly referred to minors / own children	Not specified	2	1 family information reproduced
Detention	695 days started, 240 of which in addition to punishment	433 days started	12 days started
First administrative default	None	Half compensation / loss of earnings	None
Legal end-of-life in the original chain	DKK 408.000 + interest	Full rate / wage loss; additional DKK 449.990 + interest	None; cost to the citizen
Actual payment	Unknown	Early instalments described in terms of payments; last unknown	No award
Actual return to children	Unknown	Described by the mother upon release	Not specified
Work / Health Restored	Unknown	Documented continued problems in reproduced 2009 material	Not specified

The five accounts must remain separate: decisions, progress, persons, actual losses and liability / restoration. A reversed replacement decision is proven error of authority; an acquittal alone is not a judgment of each previous custody order; an award of funds alone is not documented actual or complete refund. A comparison of criminal law with the same concrete action by a private person requires its own legal basis, intention / negligence, causation and individual proof. Nothing in the three chains establishes a general authority immunity.

28. Denmark's knowledge, positive commitments and actual responsibility;

Main assessment

The report documents repeated breaches of law, specific losses of rights and authority knowledge of serious problems. This supports criticism of both the original interventions and subsequent review: Known errors must be followed through to actual cessation, correction and redress. Absence of an individual criminal conviction does not extinguish the State's duties of protection, investigation and reparation.

The key chain of responsibility is: **tampering or omission → documented deficiency → competent bodies knowledge → required action → actual reaction or inaction → continued loss of rights → responsibility and specific requirements.** The sectoral accounts of the report document the first steps in many ways. The concrete lines of citizenship and responsibility also document later stages. Each conclusion indicates where an additional indent requires original decisions, acknowledgement of receipt, contact log, journal or payment information.

The strongest valid national criticism is that control outcomes and declared improvements do not constitute a single proof for protected citizens. An administrative closure may be carried out at the same time as an unpaid loss of rights. It is therefore necessary to examine: **the impact of the checks on the citizen;**, not only its activities carried out. The findings require concrete legal assessments, but a lack of national personal union does not prevent demands in already documented processes.

1. Knowledge must be associated with competence, time and action

Three different types of knowledge

Institutional knowledge of problems arises through its own complaints, investigations, commissions, supervision, national reports and international oversight results. It documents that a problem was identified at a particular organisational level. A published report does not on its own document receipt by every individual actor.

Specific case-law follow, for example, from objections received, a rejected decision, a known non-investigation, a invalid consent, a medical warning or proven risk during continued action. It must be attached to the recipient, date, content, competence and actual means of action.

Legally grounded constructive knowledge is assessed according to the specific duty of protection. An authority's organised lack of an overview must be examined as possible separate neglect where its particular duty requires identification, control or follow-up. This is not a universal responsibility criterion. Articles 2, 3, 8 and 13 have different conditions. Article 2's criteria for operational protection against a real and immediate risk to life cannot be transferred as a general admissibility requirement for all family or remedy questions. [PFK01; see also the legal basis in chapter 26]

Personal reading by any staff member is not required to investigate institutional negligence. On the other hand, personal punishment requires an independent test of the individual's duty, action and guilt. That distinction keeps the responsibility of the State and of the management open, while at the same time the charge of individuals is anchored in concrete proof.

Documented examples of knowledge and responsibility

Progress	Documented knowledge and response	Legal significance and concrete requirements
Langeland, 2023-2026	Task Force and follow-up described continued problems. In May 2026, the Ministry overruled the basis of the previous decision of the Appeal Board not to raise a supervisory case.	Try the knowledge received, the omissions of the supervisory authority and the actual corrected or continued situation of the current citizens. [TFLAN23; TFLANISM26]
Hospital doctors' record, 2010	The Patient Complaints Board, after many years of practice, exempted hospital doctors from responsibility in the described situation. The National Health Service and the Ministry knew and accepted practices.	The Ombudsman found practices illegal. Try the decisions concerned, re-examination and institutional accreditation and accountability chain. [PFK06]
Nordfyn, 2020	The report reproduces management’s statements about financial management, insufficient intervention and an assessment backlog.	The statements are concrete clues to management knowledge. Try the simultaneous management decisions against the necessary support and intervention of the citizens concerned; the different stock targets may not be summed up as persons. [TFNOR20]
Faaborg-Midtfyn, 2020	The municipality described staff reduction, delayed assistance and the risk of continued ineffective measures.	Try known lack of follow-up against each action's continued necessity and termination. The lack of staff does not create the right to continue intervention. [FMK20]
Politiklagesængelse, 2023	The UN Committee on Torture criticised a few criminal charges and a too narrow focus on individual criminal guilt in certain investigations.	Try whether the incident and possible ill-treatment were actually resolved, even when individual criminal liability could not be established first. [PFK02, paragraphs 40-41]

Each row has its own evidence function. A municipal management statement is proof of the statement made; its actual explanation and causal significance must be checked against the control acts and citizen's progress. Several control bodies repeat the same information does not count as several independent original certificates.

Langeland shows why control fencing has to be tested independently

Conclusion: The ministry’s opinion documents an insufficiently substantiated supervisory response to information about unlawful administration. **Statement and original evidence:** The letter of 29. May 2026, particularly pp. 14-16, examines Ankestyrelsen’s decision from August 2025. **Deficiency:** Organisational measures and the municipality’s information did not provide a sufficient basis for assuming lawful practice. **Rule and action:** The ministry required renewed assessment of legality, reopening and relevant supervisory sanctions. **Significance:** Closure of the review did not document redress for the identified citizens. **Responsibility and demand:** The municipality’s and supervisory authority’s actions must be followed from first relevant knowledge to actual correction. A specific ECHR violation must be linked to the right affected and the individual sequence of events. [PFK05]

2. Immunity, Liability Exemption and Actual Punishment

The liability waiver shall have the name and precise scope;

The critical study includes both statutory exemptions, unlawful exemption practices and actual lack of responsibility. The word immunity must not replace this investigation. What rule or decision prevented the sanction? What responsibility could still be pursued? Was it actually being followed?

Mechanism	What the material documents	What to test
General public liability	Paragraphs 155to 157 of the Criminal Code contain responsibility for certain forms of abuse and misconduct.	Public employment does not give an ordinary criminal immunity. Try the specific crime scene, guilt, day-to-day law and any special exceptions. [PFK07]
Illegal administrative exemption	The Ombudsman's file shows institutionally accepted practices in breach of a statutory obligation.	Identify the decisions that were affected, who approved the practice and whether citizens had their complaints re-examined. [PFK06]
Restricted personal financial liability	Section 23 of the Liability for Damages Act may limit an employee’s liability in damages and by way of recourse. It also covers privately employed staff.	The liability of the employer and the State and the criminal trail must be assessed separately. [PFK08]

Mechanism	What the material documents	What to test
Protected reporting basis	Paragraph 201 of the Health Act protects against certain consequences of the UTH report; the scheme also includes private hospitals.	Secure independent records, logs and testimonies. The protection is not a general liability exemption for the action on any basis. [PFK09; UTHP11; UTHP20]
Proper exemption from a particular penalty	The 2026 Compensation Act concerning the contraception case in Greenland exempts authorities and their employees from section 16, subsection 2, where section 4 is not fulfilled.	The derogation applies to this obligation to provide information. Responsibility for the historical interventions and other duties shall be tested separately. [PFK10]
Actual waiving of liability	The disciplinary, Commission and judicial processes of the report show delays and concrete impediments to sanctions.	Examine both the initial action and responsibility for the delay, loss of evidence or inadequate investigation that prevented effective response. [Chapters 2 and 19-25]

The record-keeping case is a documented institutional exemption from responsibility contrary to law. The Ombudsman established both the long-standing practice and the central authorities' knowledge and acceptance. Notification to the parliamentary committee underscores the seriousness of the case. The finding documents the exemption practice; it does not on its own establish the number of patients affected by errors or their subsequent compensation. That requires identification of the affected appeal decisions and citizen courses. [PFK06,pp. 1-2]

Lack of evidence of intent shall not close the entire liability assessment;

Article 155 of the Penal Code is directed against the abuse of a public position to infringe the rights of individuals. Paragraph 157 includes gross or more frequent negligence or carelessness. Therefore, a finding of a lack of evidence of intent must be followed by verification of the other relevant provisions of law and order. The specific exceptions for publicly elected posts in § 156-157 must be applied with their precise scope. According to Paragraph 81 (8), a public position may be more stringent in the determination of penalties. Historical actions shall be tested according to the relevant day-to-day course. [PFK07]

Grounds for investigation, a substantiated allegation of responsibility and a final conviction have different evidentiary requirements. A substantiated allegation of a violation may require investigation before all circumstances concerning perpetrator and culpability are clarified. Authority or State responsibility may be documented even where the evidence cannot support an individual criminal conviction. Each responsibility track must conclude with its own reasons.

3. Effective investigation and sanction in case of serious abuse

Denmark has received a concrete international criticism

In 2023, the UN Committee against Torture expressed concern about the low number of criminal charges following police complaints and certain investigations' focus on individual criminal culpability rather than establishing whether ill-treatment actually occurred. It recommended a clearer mandate to investigate all allegations of torture and ill-treatment, including without initial indications of individual criminal culpability. This is specifically documented criticism directed at Denmark and a dated basis for examining the subsequent response. [PFK02, paragraphs 40-41]

The demand is an investigation of the incident, the course of injury and the entire authority chain. Closure on grounds of lack of personal criminal culpability does not necessarily answer whether the citizen was subjected to ill-treatment, whether protection failed or whether the institution must provide redress. The investigation's mandate, actual gathering of evidence and reasoning must therefore be produced and examined. The Committee's recommendation is an international oversight finding; it is not a criminal conviction of particular employees.

Article 3 requires a real opportunity to establish and attribute responsibility

Where there is a substantiated allegation of treatment covered by Article 3, the investigation must be effective and independent, capable of clarifying the incident and identifying those responsible. The duty does not guarantee conviction. It requires actual investigation, timely securing of evidence and a genuine possibility of accountability. An investigation may fail through delay, omitted evidence or uncritical reliance on the accounts of those involved. [PFK03, paragraphs 123-140 and 150]

It triggers a specific document requirement: original complaint, date of receipt, mandate, hearings, technical tracks, records, damage information, investigation decisions and reasons for closure. In the case of deficiencies, a

effective additional investigation and, at the same time, protection against continued injury. Citizens' help should not wait for a multiannual personal liability trail to end.

An existing sanction may still be inadequate

I *Gäfgen v Germany* the EMD considered that almost symbolic conditional fines following serious police abuse did not provide sufficient deterrence. A subsequent promotion was included in the assessment. The judgment therefore follows this conclusion: **A registered sanction does not in itself provide effective protection against serious abuse.** [PFK04, paragraphs 123-125]

For serious State ill-treatment under Article 3,disciplinary criticism or financial compensation cannot on their own replace the necessary effective criminal-law response. ECtHR case-law also imposes specific requirements that limitation and similar obstacles must not create impunity for such ill-treatment. This rule requires a specific Article 3 assessment; it is not a general repeal of all Danish limitation rules. [PFK03,paragraphs 150-155]

The report's specific warnings, reprimands and disciplinary decisions must be tested against action, seriousness, duration, vulnerability, repetition and the quality of the study. The disciplinary summaries may include internal employment and conduct outside the service. A penalty rate cannot be calculated for proven violations of citizens by using all summary items as the denominator.

What the low drop figures can actually show

Politiklagemyndigheden's 2024 figures of 542 closed criminal cases and nine cases supporting the specified criminal-law responses differ from a conviction account. They document neither nine convictions nor 533 proved crimes without punishment. A sustainable impunity analysis requires linkage between **established unlawful conduct, the relevant criminal provision, investigation, decision, sanction and effect for the victim**. [chapter 2, police-outcomes module]

This data requirement does not tone down the documented criticism. The United Nations's specific comments, the illegal exemption practices and the documented delays already provide a basis for investigating actual impunity. The next necessary statement must follow known serious circumstances in the course of their discharge, on the grounds of each non-compliance.

4. Time is both a loss of rights and an independent track of responsibility

Remittal and return home must be recorded separately

remittal for reconsideration indicates a new examination of the decision. A decision on the return, the actual termination of employment, the child's destination and the actual reunification with a parent shall be taken separately. A new decision, provided support and restored contact each has its date. All joints must be included when the procedure continues after a denial or a concrete warning of a lack of basis.

Timeline	Proof	Legal questions
First intervention	Decision, legal basis, competence, consent and actual movement	Was the decision and implementation legal at this time?
First concrete warning	Opposition, medical information, findings of inspection or appeal with receipt	Who knew what and what action was required?
Remittal for reconsideration or refusal	Original decision and precise reasons	What basis was lost and required temporary protection?
New Treatment	Information, participation, new decision and time limits	Was the missing link actually corrected and did the continuation have a current basis?
Actual Termination	Movements, contacts, processing, support or payment	When did the citizen's actual deprivation cease?
Redress and responsibility	Payment instruments, support plan, investigations and sanction decisions	What consequences were remedied, what are and who is liable?

A later legal decision does not make the previously proven deficiency historically legal. Each continuation period shall be tested against its current basis. A difference between the date of the appeal and the actual termination of the proceedings may be an independent loss of rights; the specific necessity, period and legal consequences depend on the type of action.

The State shall not allow its own delay to produce the result of the decision;

The EMD states that: *Strand Lobben v Norway*that the obligation to work for reunification arises from the beginning of the placement. Quick action is necessary because time can change relations irrevocably. If the failure of the authorities to comply with the obligation of association has caused the breach, adoption shall not be justified by the lack of ties. Parents' use of remedies for reunification must not in itself be held against them and procedural delay must not in practice determine relations throughout the course of time. [PFK11, paragraphs 205, 208 and 212]

The specific test should therefore include the provision of relationships, contact restrictions, support for the child and parents, realistic conditions for reunification and a dated assessment of continued necessity. The rights and security of the child must be specifically examined. A general reference to the best of the child does not document this study.

Demand: Produce the entire contact and support chain from the start of the intervention. Examine whether the authority's own actions or omissions weakened the relationship later used against reunification. Where unlawful separation is documented, cessation and actual redress must be demanded with an individually reasoned plan and deadlines.

Delayed responsibility requires its own investigation

The policy sources of the report describe both an almost four-year delay affecting the response and a disciplinary action which was not brought up due to a late attitude, although the State Police considered the behaviour to be totally unacceptable and disciplinary. The Tibet process shows another long line of responsibility: the two judgments of 2025 relate to false explanations in court in 2013 and are not to be renamed judgments of all initial interventions. [Chapter 2, PD01-PD02; Chapter 20]

Where possible liability lapses through the authority's own delay, the investigation must establish receipt, case allocation, evidence preservation, deadline monitoring, management decisions and grounds for closure. The citizen may at the same time suffer continuing injury and have civil claims. **Time that weakens the possibility of sanctions must not disappear from the responsibility account.**

5. Psychological, physical and social damage shall be included in the infringement investigation;

Loss of family, help, freedom of movement, bodily self-determination and subsistence support matters in the rights assessment itself. The account of consequences must therefore begin with the actual burden and trace developments over time. A late favourable finding does not document restored health or returned family time.

Consequence	Relevant documentation	Meaning
Psychological load	Contemporary descriptions, journals, sleep, anxiety, insecurity, development and function	Assess intensity, duration and cumulative load. The opinion of the citizen has an independent function of proof; a clinical diagnosis requires its own basis.
Physical injury or deterioration	Investigations, treatment, medicine logs, function before and after, known warnings	Try action, access to help, causation and possibly independent protection failure.
Family loss	Actual contact, sibling relations, relocations, support and reunification work	The loss of family life itself can be a loss of rights, even without diagnosed illness.
Social and economic consequences	Work, schooling, housing, networks, help and documented expenditure	Separate direct losses, subsequent effects, causation and relevant replacement rules.
Vulnerability and dependence	Age, disability, communication needs, health and authority control over assistance	Assessment of the protection and participation was tailored to the individual.

Concrete consequences and reactions in the report's material

Psychological injury following failure by an authority to act: Patient Insurance case 07-0120 describes the Danish Health Authority's failure to act after the hospital's timely report. From the indication on 10. August 2006 to radiotherapy on 11. October, two months elapsed. The scheme awarded 10 per cent compensation for permanent injury for psychological distress associated with a 10 per cent deterioration in the statistical survival prognosis. This documents a specific course of omission and compensation. It is not a Convention judgment or an individual criminal conviction. The demand is to examine knowledge received, treatment possibility, omission, injury and full redress. [PFOR07, printed pp. 14-15/physical PDF 8; chapters 9 and 29]

Helpless citizen and limited sanction: The police disciplinary summary from 2015, no. 21, describes a citizen with Parkinson's disease who called after a bicycle fall and explained that he could not get up himself. No rescue operation was initiated; the citizen was found in a ditch after more than 42 hours. The National Police's response was a warning. Documented knowledge of helplessness, the absent assistance and the time support a specific demand for examination of protective and service duties and the adequacy of the sanction. The emergency-call recording, rescue log and medical information are required for the full Article 2 and 3 assessment and quantification of harm. A recorded warning does not resolve these questions. [PD03, original summary 2015 no. 21, physical p. 7; chapter 2]

Family loss and late financial review: In the Suldrup sequence, two minor children moved back on their mother's acquittal and release, according to her testimony in court. The High Court concluded the compensation review 875 calendar days later and set aside the authorities' halving of compensation and lost earnings. The specific judgment documents an incorrect compensation outcome and a financial-redress claim; it does not thereby set aside every earlier pre-trial detention order. Return home, full compensation entitlement, payment and any lasting effects on health and family life each have their own documentation. [ERVA02; chapters 27 and 29]

The Article 3 assessment includes duration, psychological and physical effects, age and health. Lack of intent to humiliate does not in itself exclude a violation. *Gäfgen* illustrates these assessment elements. [PFK04, paragraphs 88-89]

Article 8 protects family life and personal integrity. Illegal action does not require the citizen first to develop a medically-diagnosed disease. In the event of a serious danger to health or life, Articles 2 and 3 shall be tested in accordance with their own conditions. Direct public intervention, lack of protection, inadequate investigation and ineffective remedies each have their own legal test. [PFK01]

Cumulation must be examined in concrete terms: repeated intervention, lack of help, uncertainty, futile testing and long duration can reinforce each other. This requires a documented course; a national error rate cannot replace this test. The lack of conclusive evidence of a particular physical injury also does not eliminate an already documented failure to participate, family or study.

6. Comparison with private must follow the actual action

The 2022 judgment read documents a specific sentence imposed on a private person:a mother's withholding of one child for 37 days led to 40 days' suspended imprisonment and 60 hours of community service. The 2017 case read, however, ended in acquittal of the mother and maternal grandmother. The prosecution's requested sentence is therefore neither a sentence imposed nor a general tariff. [PU22,physical PDF 1-6; PB01-PB03]

The comparison shall include action, child and rightholders, valid basis, actual guilt, duration, effects and the actual outcome of the proceedings. In the case of public decisions, special duties, authorisation and order chains and the duty to respond shall also be subject to review.

The clearest criticism is this: Where a private specific evasive measure is penalized, while a public removal or continuation without a valid basis has been documented, a reasoned explanation of how the public action was investigated and what traces of responsibility were tested. The investigation shall identify the subject matter and the subject matter of the proceedings; a public title or an administrative closure shall not answer them.

The term **administrative abduction;** may describe an actual public removal or detention without valid legal basis. The report does not use the term as an independent Danish penalty. In each such claim, the simultaneous legal basis, competence, consent, decision and continuation must be disclosed. A failure to participate may have significant legal significance without merely proving that all conditions for criminal abduction have been met. The specific missing link must be tested; other proven errors exist.

7. State responsibility, repair and international qualification

Acts and omissions of municipalities and other public bodies may be attributed to the State internationally. This may also apply to acts exceeding competence when the body acts in an official capacity. The ILC Articles on State Responsibility systematise, among other things, attribution, cessation and reparation for material and non-material injury. They are not in themselves a ratified treaty; application requires the relevant binding obligation and applicable rule of international law. [PFK12, Articles 2, 4, 7 and 30-31]

The State may therefore bear responsibility where the overall public decision-making and oversight chain violates a right even if responsibility cannot be concentrated in one person's criminal conviction. Individual claims for review, protection and financial redress follow the competent forum's rules. Where there is an arguable Convention claim, Article 13's effective-remedy requirement must be examined. [PFK01, Article 13]

Repair shall be recorded as actual result: termination, contact, appropriate assistance, corrected information, payment and handling of remaining consequences. A payment does not give back a lost childhood, family relationship or functional capacity. Such consequences shall continue to be included in the loss assessment and the necessary prevention.

R2P and individual international criminal responsibility have separate conditions. Genocide, war crimes, ethnic cleansing and crimes against humanity require their specific classification and contextual elements. The report’s complaint and error counts do not on their own prove those elements. Documented acts, patterns, and order and knowledge chains can justify a separate investigation. This does not change already sustainable demands under the ECHR, relevant UN conventions and state-responsibility rules. [chapter 26,R19-R22; the Greenland histories in chapter 24]

8. Priorities of pleas and specific requirements

1. **Stopping and protecting:** Try immediately continued intervention when the basis is overlooked or a serious deficiency is documented. Take a reasoned decision on temporary protection and appropriate measures and actually register efficacy.

2. **Investigate the entire incident:** In case of substantiated serious attacks, effective and independent investigation of facts, consequences, protection failures and chain of responsibility is required. Personal criminal liability shall not be the sole object of the investigation.

3. **Test the continuation:** Provide the current basis for each section of time following specific warning, appeal or remittal for reconsideration. In fact, in the case of families, contact and work for reunification must be included.

4. **Recover with date:** Follow the citizen's right from favourable decision to aid, termination, return, payment and handling of residual damage.

5. **Place responsibility in a timely manner:** Try case manager, management, political instructions and supervision according to the competence and knowledge of each actor. Ensure proof and deadlines before inaction creates a new sanction barrier.
6. **Documenting the Recurrence Protection System:** After a known problem, it is necessary to check the changed practices and the relevant cases concerned. A new organisation or guidance is an action the effectiveness of which must be documented.

The requirements shall be anchored in each right and the powers of the competent forum. The report calls for the simultaneous implementation of the protection and repair measures which already have sufficient grounds; other tasks of proof shall not delay such measures.

Documented find

The unlawful record-keeping practice and central authorities’ acceptance; the Ministry’s rejection of the supervisory basis in Langeland; the UN’s specific criticism of police-complaint investigations; the report’s documented breaches of law, losses of rights and delays in responsibility within their own populations. Source chains are in the named modules and primary sources.

Hypotheses and additional evidence

Specific individuals' intent or gross neglect; the precise total population of proved criminal violations against citizens; causation in each harm trajectory; and which specific circumstances meet Article 3 or international criminal law's additional conditions. These questions require original case and accountability records. They must not be used to downplay independently documented errors.

Traceability and necessary documentation

For every decisive conclusion, it must be possible to trace a source chain from original event and rule to knowledge, response, consequence and demand. Necessary annexes include decisions, signatures and consent, receipt information, records, contact and implementation logs, management instructions, supervisory files, payment files and reasons for absence of investigation or sanction. The cross-cutting factual documentation is in chapter 29; the combined principal demands conclude chapter 30.

29. Cross-cutting evidence and documented evidence consequences

Concrete consequences which the national accounts must show

Authority action; or non-compliance;	Citizen's Folk	Evidence of scope and cause	Relevant liability requirements
Removal / continued separation without valid basis	Loss of daily family life	Decision, error, date of removal, date of discontinuation	Termination / reunification, aid and compensation according to specific rules
Consistency limited by incompetent body	Loss of contact and gradual distance	Orders, actual complaints, decision-making powers	Repeal, concrete contact plan and verification of succession
Lack of disability support	Strain, possible biased parenting-capacity assessment	Application, need, refusal, functional assessment	Legal support and re-assessment not resulting from unlawful negligence
Remittal for reconsideration without timely effect	Continued lack of help or income	T2-T4 and performance / payment data	Quick execution, back payment and documented losses
Illegal coercion or excessive duration	Loss of liberty / integrity	Action record, monitoring, implementation decision and duration	Termination, investigation and actual repair
Assessment deadline exceeded/lack of information	Waiting time and lost option	Reference, plan, information, actual processing	Effective access and follow-up to concrete damage
Illegal data sharing / monitoring	Private life losses and risks	Data flow, access log, action basis	Termination, rectification / deletion where conditional and compensation
Illegal police instruction	Loss of demonstration / y tring / freedom	Orders, video, service otates and actual implementation	Examination of orders, management and legal consequences
Late examination of serious circumstances	Loss of proof and liability	Date of knowledge, catch-ups, limitation periods	Independent and timely investigation

The table is a survey model. It does not claim that all of these consequences have been assessed nationally or occurred in all the cases referred to.

Documented example of loss of privacy

FOB 2018- 26 concerned a 15-year-old boy whose SMS and phone calls were controlled. The Ombudsman found the check illegal because children and the youth committee had not taken the necessary decision and described the substantial contribution of the municipality. The specific legal order cannot be replaced by a reference to the practice of the place of stay. [L04]

The Data Protection Agency's decision of 30 January 2024 on Google Workspace included 53 municipalities and the legal basis for disclosure to specific purposes.53 is the number of authorities, not the number of children; previous injunctions and the new decision are the same chain of proceedings. [L05] The Data Protection Agency's notice on Hørsholm documents a reported fine of DKK 50.000 and the risk of loss of unencrypted information on approximately 1.600 employees. It is an institution's responsibility and a person's number in one data breach case; no identical fine is claimed for each employee or incident. [L06]

Military matters and jurisdiction

In the expanded report, Green Desert is examined through the Supreme Court’s original judgment of 31. May 2022, the ECtHR’s decision of 21. October 2025 and CAT’s observations from 2023. The operation in 2004 predates the event period; the Danish review, knowledge and subsequent international scrutiny fall within the period. The Supreme Court’s 23 claimants, the High Court’s 18 awards and the ECtHR’s 21 applicants are overlapping litigation populations and must not be added up as 62 different victims. The Supreme Court set aside the High Court’s compensation awards; the ECtHR found no violation of the right of access to a court, and the jurisdictional and procedural complaints were examined separately. Thus, this sequence contains no ECtHR judgment finding 23 Danish violations. The original government position from 2024 has now been compared with the later decision. [GD01-GD03]

The strongest documented point of criticism shall be confined to each link: Højesteret maintained information on inhumane treatment by receiving Iraqi authorities for 18 persons, while the Danish liability conditions were not considered to be met. The actual abuse and the result of the testing of Denmark's responsibility are two different conclusions. A criticism of jurisdiction, proof and effective remedies must identify the actual premise and the original proof; it must not attribute to the judgment an infringement finding which it does not contain. The separate Green Desert analysis shows both the evidence chain, the long civil process and the costs imposed. The costs claimed are not in themselves proof of actual payment.

The Samsam course shows another evidentiary conflict: the Supreme Court’s judgment of 2. September 2025 recognised paid cooperation with Danish intelligence services in 2013-2014, contrary to earlier public denials. The Danish declaratory judgment must not be renamed Spanish reopening, actual release or compensation awarded for the entire criminal proceedings. Those consequences each require their own document. [SS sources]

Research literature on family experience

VIVE's 2025 knowledge review addresses placements without consent and consent under pressure. It combines Nordic literature with existing Danish register and survey data. Quantitative experiences of 11-17-year-olds cannot represent infants' experiences, and research descriptions of experienced pressure are not specific legal determinations of each consent's validity. The material supports examining the registered category »with consent« against the actual process. [L01,pp.6-10,20-22,87-94]

VIVE’s 2023 final evaluation of targeted parental support covers 111 families and 146 children. The 35 interviewees also include professionals; municipalities selected participants, and discontinued or declined case histories were absent from the interview sample. The paired one-year measurement covers 11 parents,10 percent. There is no control group and no demonstrated positive quantitative development among children. These limits are decisive for what the study can document about the effects of support. [L02,pp.80-87,110-115] The 2023 well-being study addresses contact with parents, health and adviser relationships. It excluded “don’t know” as an answer about advisers for placed children because it assumed knowledge from the statutory child-interview requirement. A statutory requirement does not prove actual fulfilment. [L03,p.135]

The original Danish register study of remand covers 75.187 cases and 50.446 distinct men from 1995-2010. It documents weaker labour-market attachment and increased risk of ceasing to live with one’s own children after remand, including without conviction. The study measures social outcomes and does not review the lawfulness of orders. Its historical estimates can therefore support specific lines of loss and demands for redress, but cannot be converted into national numbers of people unlawfully deprived of liberty or affected children in 2006-2025. [L08,pp.346-358] The reference group comprises convicted people without prison service. Women and detained minors are not included in the cohort.

Justitia/ The 2025 law community survey shows longer completed custody in 2018- 2024. Data on repeated persons, main outcome and post-registration shall be kept separate. The 2024 denominator is 2.940 in this version and 2.941 in the National Advocate General's March 2026 audit. Fewer registered endings do not in themselves document fewer different custodians. [L09, p.68,70,81-82,96-98]

The report’s analysis of consequences rests on a separate causation requirement: recorded poor well-being documents a burden, but does not on its own establish that a particular authority error caused it. Conversely, a documented contact restriction without legal authority can violate rights without first requiring the child to establish a psychiatric diagnosis. Lost time and family life must therefore be measured in their own right.

Help, consent and restoration of the fully reviewed originals

The 2006 investigation’s case 5.22 shows a specific consent problem: the father’s request for assistance on 13. March was treated as consent to emergency placement on 27. March. The mother’s consent to assessment on 23. February is a third, different matter. The sustainable criticism is that, according to the scrutiny body’s summary, the municipality replaced documentation for the specific separation with a different request for help. The evidential chain is the original practice investigation’s summary→contemporaneous municipal consent/record appendices to be obtained→historical consent and placement conditions→the authority’s specific decision→the child’s actual separation→competent decision-making and managerial responsibility→a demand for review of continuation and actual redress. All 32 tables and repeated case codes have now been reconciled in chapter 4; this is the same 101-case sample, and 23 expected amendments are not 23 children actually returned home. [PUD06-FULD,PDF14/26-27/32,table2.7]

Case 3.4 documents placement 26 February and actual repatriation 31 March 2006, an own calendar calculation of 33 days. The plan was missing before the decision and the regulatory body would amend the decision. However, the return is described with dissatisfaction with the school; the source does not link it to a legal submission. Therefore, the comparison of the report with private 37-day evasion must lead both ways through the specific legal basis, consent, authority knowledge, guilt and legal order. In fact, the 40 days suspended imprisonment of the private judgment shows a personal penalty in that case. The absence of information on personal responsibility by the municipality original shows a lack of public responsibility in this source; it does not document a general immunity. [PUD06-FUD, PDF24 / 41; PU22]

Egedal’s complete 119-page original documents a specific loss of legal position: delayed respite care could not be delivered retrospectively.11 of 20 cases exceeded time limits by 2-20 weeks, but the original does not identify which length of overrun relates to that particular lost service in kind. The consequence is documented, while the individual calendar duration and later redress require the original case appendices.9 expected remittals,14 legal deficiencies and 20 incorrect appeal deadlines are overlapping measurements in the same 20-case sample. Remittal cannot restore lost respite-care time. The demands are documentation of the loss, actual future support, assessment of compensation and scrutiny of the documented unlawful standard rules and whether they contributed to the specific delay. [EGEDAL20,PDF54/73-74/101-110]

Frederikssund's adult original documents the cessation of cleaning aid in February 2020 and the granting of other aid only in November 2020. That is nine months apart; exact day dates and actual startup do not appear. The fact that the second aid was subsequently granted does not therefore show that the need was met in the meantime. The original also documents a placed young with extensive disabilities, a desire for repatriation, a lack of a formal transition plan and undocumented family involvement. These statements shall be followed to the actual date of residence, return, contact and support. The control of the Adult Report cannot be used to replace the separate, still not provided original 2021. [FSA22, PDF88 / 115]

Sorø’s originals reveal a specific chain of knowledge hidden by statistical years alone. The 2024 report describes a school being asked to submit concerns without labelling them a formal notification in a serious neglect case. The 2026 final report reproduces the municipality’s acknowledgement that its earlier district-adviser organisation did not comply with the law and children remained too long in mainstream provision. This is the municipality’s stated acknowledgement,reproduced in the fully read original;the separate municipal statement has not yet been independently obtained. The strongest demand is to trace specific received knowledge to legally required investigation and actual assistance,and identify who decided to omit the relevant case avenue.9 status readings,new workflows and completed organisational development do not themselves demonstrate cessation of earlier losses or decisions in the 3 referrals to the children’s office. [TFSOROE24,PDF27/29/33/35;TFSOROE26,PDF5/14/18-24/26]

The 2008 original’s consent/validity cases show why a combined error category must be unpacked into specific acts. Case 027 describes parents of a three-month-old child being pressured to choose voluntary rather than compulsory placement without understanding the choice;the scrutiny body assesses consent as invalid. Case 041 lacks the consent of the young person aged 16,and his intellectual disability does not replace examination of his legal capacity and participation. In compulsory case 125,no decision was made concerning the father sharing parental responsibility. The original describes a decision concerning both parents as a validity condition and also criticises missing reasons. The strongest accountability chain runs from each specific consent document and decision-making powers to actual separation,its continuation and a dated legal consequence. Case 065,by contrast,was not actually implemented:it can document a deficient decision,but not a period of physical separation. The 22 cases with missing consent and the 21 cases in the report’s primary consent category are different counts within the same 143-case sample. [PUD08-FULD,PDF22-24/30-32/45-46/53-54]

Copenhagen's political presentation in March 2008 claims that none of the municipality's investigated cases had been misdealt with. The attached original annex, on the other hand, indicates 3 correct and 7 wrong decisions from 10, including 2 with no basis for voluntary placement. The inconsistency is a proven source conflict between the submission of the municipality and its annexes. The existence of an investigation or plan does not document its timeliness, content or valid consent. The requirement is to provide the basis for the political insurance, the subsequent individual follow-up and who received the opposing knowledge of the Annex. Planned workflows and a statement of no economic consequences do not show restoration for the families concerned. [KK-SUD93 / 2008; PUD08-FUD, PDF63-65, Annex 3, Tables 1-5]

The 2011 study of moves and returns home documents 67 incorrect decisions among 81, but Ankestyrelsen expressly states that no case was taken up on its own initiative. Municipalities received case-specific feedback. The authority's knowledge and a specific review decision are therefore documented, while the municipalities' individual redress remains to be proved. Case 136 describes suicide attempts also after the move and later extensive support; the specific harm requires original case records and timeline material to establish the municipality's causal responsibility. Return to a partner's home in case 058 is termination of placement, but not parent-child reunification. The necessary demand is a separate account of destination, support, contact and loss, and a reasoned examination of why known validity and support errors did not trigger action on the authority's own initiative. [PUD-H11-FULD, PDF4/13-14/52-53/60-65]

In its final UN report for 2026,Denmark declares responsibility to protect the population and respect Conventions in child placements. The UN treaty-body compilation reproduces already known findings concerning disability-appeal time,coercion,family interventions and access to effective review. The report's analysis compares these findings with Denmark's compliance declarations. A supported recommendation,a budget and future legislative change have a different evidential function from a documented date of cessation and redress.265 recommendation positions are not 265 new violation cases;174 supported and 91 noted are recorded as meeting statements in the UN's automatic transcript,while individual status matching against the written reply appendix still requires its acquisition. International-law responsibility must therefore be traced from the specific body and knowledge received to effective action and reparation,without allowing the missing national person total to suspend demands in documented cases. [UPR26-NAT,sections1/34/96;UPR26-UN,sections11/21/37-44/61-64;UPR26-MOEDE;R19-R22]

The 2009 original restricts review of the placement basis itself to cases satisfying the specific procedural requirements. A recorded procedural error can therefore prevent further substantive scrutiny within that investigation. The error rate consequently cannot serve as full scrutiny of every basis. Case 097 describes an actual emergency voluntary placement of a child aged 10 without the father's necessary consent;the emergency assessment exception does not replace the consent condition. Case 135 describes the municipality recording voluntariness even though,according to the case-note account,the seriously ill mother did not understand the meeting. The original states zero own-motion cases. The strongest chain is therefore the specific missing condition→actual separation→the scrutiny body's received case material→individual decision on legal consequence and continuation→date of actual redress.130 holders of parental responsibility in 91 cases and 83 missing offers of a separate plan must remain their own units;they are not 83 additional families. [PUD09,PDF4/12/18-19/24/29/60-62]

The 2011 original on voluntary measures reveals another blind spot: the main classification excludes the four-month assessment deadline,assessment consent,plan duration and systematic participation. It also excludes review of the decision's form,reasons and appeal guidance by reference to voluntary measures. These methodological exclusions abolish no specific statutory duty.41 deadline overruns among 78 relevant assessments may overlap the main measurement's 75 erroneous cases among 121;they must not be added as new children. Case 048 describes an actual contact person only one year after the decision. Case 131 describes almost four years waiting for a PPR report and family treatment that never began. The documented departure therefore includes actual missing help over time,beyond the paper error. The demands are support logs,knowledge and management chains,individual loss assessment and relevant redress. The original mentions two decisions without consent in the own-motion avenue;their original decisions and actual effects are required before they can be called redress. [PUD-I11F,PDF5/18-21/38-39/71/81/83/106]

Obstacle, contact and actual correction after check

A scrutiny outcome cannot replace documentation of what actually happened to the citizen. Example 20 in the external-provider investigation describes subsistence payments being stopped while a final decision awaited medical information. About nine months later, when Ankestyrelsen made contact, the municipality had still not decided. The citizen's problem comprised both lost subsistence and the absence of a final decision to challenge. Five other incorrect cases involved unlawful delegation; those five and example 20 form the same six incorrect cases among 48. AMS's communication of 17. January 2012 required reopening of other cases involving unlawful delegation too, information, investigation, party consultation, a new decision and prompt payment where entitlement was documented. The strongest accountability chain runs from the municipality's received knowledge and contractual/signature arrangements to suspension, continuation, a new decision and actual financial redress. Back payment in example 20 is not documented in the report. [PAKT13-FULD,PDF44-47/105-107/113]

The rehabilitation study shows another oversight mechanism:11 of the 26 cases concerning other measures assessed for correctness contained no oral or written decision. The Appeals Board assumed that the municipality had followed the team's recommendation when the material did not show otherwise. These 11 and 11 other procedural steps were excluded from the examination of the information basis, a total of 22 of 37 cases. These are documented assumptions and exclusions in oversight, not evidence of assistance actually initiated. A claim for support or redress must therefore be traced from the team's recommendation to the competent decision, the support/treatment log and the citizen's actual course. The two groups of 11 must not be conflated or added to the main cohort as new persons. [REH14F,PDF67-69]

Relief and redress may be separated by additional waiting time. Housing-benefit study case 8 documents that the new calculation decision came only five months after relief was granted, although the authority had stated two to three months. This documents five months awaiting a new calculation, not the bank payment date. Maternity-benefit study case 34 took 135 calendar days from refusal to relief. Case 33 obtained relief concerning the deadline but then refusal concerning medical documentation, while case 32 had timeliness confirmed and received a deadline refusal the same day. The account of time must therefore separately record original intervention, complaint, reconsideration, new calculation/decision and actual payment. Relief on one question cannot be called fully restored rights. [GEN-UDK21,HovedPDF50-51,case 8;PUDK22-FULD,HovedPDF18-19/25-26/30-35]

The same distinction applies to occupational-injury compensation. In example 4 of the AES investigation, a loss was assessed at 30 percent and later rejected as below 15 percent on the employer's account of reduced orders and discontinued overtime. The citizen had given a different account concerning limitations following the injury. On remittal, 377 calendar days after refusal, Ankestyrelsen required specific clarification of the conflicting information. According to the scrutiny body's own assessment, the employer's account could not stand as sufficient fact without investigation. Actual subsequent compensation, payment date and redress through interest are not stated. The demands are the original evidential chain, a reviewable fresh decision and separate accounting for losses during the wait. [PAES23-FULD,HovedPDF21-23,eksempel4]

Contact figures describe serious loss of relationships and a distinct selection in the scrutiny body's explanations. Reasons figure 2.2 covers 331 affirmed or amended cases;annulled decisions are excluded. The 367 appeal cases and 382 decisions under individual statutory provisions concern the same cohort with 15 double cases. An interview concerning two children who had not seen their father for years,and a most recently fixed two-year period,shows a specific official statement concerning prolonged separation. It is neither a national duration statistic nor documented actual reunification. The authorities' own descriptions of unsubstantiated allegations,fact-finding after the most intrusive measure and party consultation with limited information must be traced to contemporaneous original evidence. Every continuing interruption of contact requires specific reasons and review;a general statement about the child's needs does not prove every factual premise. The demands are the first actual interruption,every decision and extension,contemporaneous information and the child's statements,appeal outcomes and the date of genuine restoration of contact. [PSAM20-FULD,PDF16/30-31/35-38/41-42/48]

The pension study shows two documented cases with an excessively late award date in Struer and six oral team decisions made without competence in one municipality; the municipality table places all six hypothetical remittals in Bornholm. Ankestyrelsen's dialogue with the municipality documents the authority's knowledge, but not a new competent decision or payment of arrears. Only awards following a rehabilitation team are included, while refusals and obvious cases without a team are excluded. It therefore cannot measure the total loss following unlawful pension refusals. The authorities' own descriptions of repeated sanctions against citizens with misunderstood support needs and responsibility lost between departments provide specific lines of investigation. Knowledge of need, necessary support, decision-making responsibility, actual delivery and consequences must be documented for each citizen; internal disagreement about responsibility cannot document that the need was met. [PPEN25-FULD,HovedPDF16/21-22/32-37/48-50;BilagPDF4-6/12-13]

The combined demands are thus actual cessation, a new decision by the competent authority with reasons, payment or support with a documented start, restored contact where that is the relevant legal consequence, and assessment of losses that a later decision cannot in itself remove. The same child, the same stoppage of subsistence support or the same back-payment sequence is counted only once in the person and loss account. The review report's findings, the authority's declared correction and the citizen's documented redress must stand as three distinct evidential links.

Information and support must not be turned against the citizen

Case 35 in the sanctions investigation shows a specific reversed burden of proof. The citizen stated that he had actually attended on the two disputed days. The municipality asked him to contact the programme provider himself and imposed a sanction without clarifying attendance. Ankestyrelsen required the authority's own investigation. Recorded non-attendance therefore cannot stand as proven conduct merely because it appears on the provider's list. Case 90 shows another necessary distinction: the municipality's awareness that one sanctioned day should be repaid is a statement about correction, rather than proof of actual repayment. The demands are original attendance records, the citizen's objection, the municipality's investigation and decision, and account/payment evidence. [SAN15F,PDF47-48/61]

Pension-study case 44 describes a 38-year-old mother alone with five children, PTSD, anxiety and chronic pain. The trauma rehabilitation centre's reproduced assessment warns of deterioration even from further assessment or clarification. Ankestyrelsen nevertheless requires a specialist psychiatric examination. The published chain contains no independent clinical risk justification addressing that particular warning. The demand for more information must therefore be tested against the original statement, specific necessity, risk and assistance for the mother and children. This is a documented conflict between a professional warning and an authority's demand; it does not prove a particular later deterioration without the medical records. In case 20, the refusal's reasoning about missing employment measures stands against the same report's dated clarification and ongoing work placement on the decision date. The original decision and record list are required before the authority's adverse premise can be accepted. [PEN15F,PDF16-17/19-21/27-28]

The historical pension investigation from 2006 shows that missing documentation cannot be rewritten as the citizen's lack of interest either. Among 99 cases with a meeting offer, attendance was recorded in nine, non-attendance in 36 and the outcome unstated in 54. A general explanation about interest cannot fill those 54 unknown case histories. The report's account of the older principle decision P-19-05 criticises both the municipality's and board's use of incomplete resource-profile summaries: both had to investigate all relevant original information. Repetition by two instances therefore does not strengthen an incomplete basis. The decisions in the investigation and principle case predate 2006 and are not added to the period's incident figures. They document already known evidential and participation requirements against which subsequent administrative practice must be tested. [PEN06F,PDF19/53]

The 2015 Youth Survey shows that a correct category of business does not prove timely support either. Among the same 102 cases, 85 entries were judged correct, while 52 interviews did not follow the rules, and an offer of coordinating case handler was documented only in eight of 48 relevant cases. Case 62 describes a previously placed young who was still waiting for psychological treatment and requested support. The needs described and the lack of information must be tested before training requirements are used as proof that the citizen can already cope with them. The cohort examined omits performance calculation; therefore, possible incorrect activity allowance must be documented through the actual decisions and payments. [UNGE15-FULD, PDF16 / 26-27 / 33-34 / 45]

The sickness-benefit reassessment from the same year documents 26 decisions with significant deficiencies in medical information. In the scrutiny body's assessment,case 31 should have received an extension rather than cessation and a job-clarification programme. Case 56 received a new extension decision only 25 days after the reassessment point,and the agency still found the basis inadequate. There is also a specific break between legal versions: the report's instruction in 16-15 to stop payments despite missing information was discarded in 75-15 on 11. November 2015. Earlier practice was described as an error of law,and a valid cessation decision and consideration of reopening were required. The original's historical cessation instruction therefore cannot prove that the citizen's subsistence could lawfully be stopped. The demand runs from invalidity and a known practice error to a timely new decision,restored benefit,actual payment and specific loss assessment. [SYREV15-FULD,PDF38-39/42/56/102;SYREV15-75,PDF1-5]

The relationship of the child and the evidence of the intervention

The 2013 family/network investigation documents that a plan does not itself preserve a child's relationships. Among 252 children,17 had contact with fewer groups of people than planned. Interview material describes a child who has not seen half-siblings since Christmas and has not told an adult about missing them, and a child who does not know why a regular arrangement with a grandmother ended. Municipalities' explanation about parents cancelling cannot be derived from a table measuring frequency alone. The child's own experience, original contact records and specific causes must be traced to action and contact actually preserved or restored. The nine interviewed children are not documented as the same as the case sample's 252;542 contact-group occurrences are not 542 visits or people either. [NET13-FULD, PDF49-55/65-66/69-72/79]

The 2012 parenting-capacity investigation shows the same need concerning the evidential basis. Three of ten assessments examined had only low validity; two of four older assessments should have been supplemented. In one account, the psychologist lacked relevant records. Ankestyrelsen's contemporaneous overall assessment of the parental material does not cancel these specific deficiencies. The demands are the original assessments, interaction observations, appendix lists, current supplements and parents' comments, followed by specific review of what the information can actually support. The 104 placement cases were reused from Barnets Reform and are neither 104 parenting-capacity assessments nor a new population of individuals. The complete FKU review, physical PDF11/16-19.

The 2014 foster-family study provides an additional, separate oversight signal:132 of 340 defined responses report fewer than two supervisory visits in 2013. Former foster families were excluded, and responses concerned one selected child. The figure is therefore a documented signal of missing supervision in this particular sample, not a national proportion of unlawful placements. The demand is for contemporaneous supervision records, the child's own interview, any specific grounds for exceptions and subsequent support. The foster family's assessment of the child's reactions must also be examined independently and cannot on its own prove that family contact is harmful. [PF14P, PDF28/49-50] See the overall foster-family review.

Priority Arguments Map

A. Participation of the citizen in an accommodation case

Conclusion: Documented failure to hear the parties must be examined as a defect affecting rights and validity. **Authority statement:** The Citizens' Adviser's investigation criticises the absence of relevant hearings. **Original evidence:** R03, the displayed thematic table and methodological delimitation. **Deficiency:** The decision-making process has not ensured the affected person's opportunity to correct the basis. **Rule:** § 19 of the Public Administration Act and Article 8's procedural protection. **Action/omission:** An intrusive decision is made without the required procedural step. **Legal departure:** The safeguard is disregarded; specific validity and Convention consequences must be determined from the original file. **Effect on the outcome:** The family loses participation, and unanswered information may affect the intervention; each decision's causal chain must be shown. **Responsibility:** The deciding municipality and identified duty/management chain; personal culpability is a separate question. **Requirement:** Case review, access to documents, specific determination of cessation/redress and documented consequences.

B. Checks must be carried out to the actual effect

Conclusion: A closed supervisory case does not on its own document restored rights. **Authority statement:** Rigsrevisionen criticises the supervisory approach and follow-up. **Original evidence:** RR18/2024,sample and response table. **Deficiency:** The effect on the individual is not systematically verified. **Rule:** The specific substantive duty and, for an arguable Convention claim, the requirement for an effective remedy. **Omission:** Information about correction is not followed through to its actual effect. **Legal departure:** The oversight weakness requires examination of whether the specific duty of protection/remedy owed to the individual was breached; zero use of responses does not automatically prove this in every case. **Significance for the outcome:** Unremedied loss may continue after closure. **Responsibility:** Competent authority, supervisory authority and potentially management according to their specific duties. **Demand:** Documentation of implementation date, continuing loss and subsequent independent verification.

C. Legality of the duration of the obligation

Conclusion: Approved initiation must not be presented as approval of the entire period of coercion. **Authority statement:** The Patient Complaints Board counts initiation and duration separately. **Original evidence:** PPKN25, tables 11-12. **Deficiency:** A main total without duration outcomes conceals a separate review result. **Rule:** The relevant legal authority for coercion and, following specific application to the facts, the ECHR's protection of liberty/integrity. **Action:** Coercion continues through a period requiring its own legal justification. **Legal departure:** The part set aside must be recorded and examined independently. **Significance for the outcome:** The citizen's loss of liberty and integrity extends beyond the initial decision. **Responsibility:** The competent decision/oversight chain and institution; personal culpability must be investigated separately. **Demand:** Complete timeline, actual cessation, investigation and specific reparation.

D. Incorrect refusal of compensation after custody

Conclusion: Refusals and halvings in ERVA01-ERVA02 were incorrect authority outcomes and were set aside by the courts. **Authority statement:** The Regional Public Prosecutors and Director of Public Prosecutions referred to the citizen's own fault. **Original evidence:** Administrative decisions, District Court reasoning and High Court outcomes in AM 2020.10.15V2 and AM 2010.02.25V2. **Deficiency:** The criticised conduct lacked the necessary causal connection with the relevant deprivation of liberty. **Rule:** Section 1018 a of the Administration of Justice Act, including own fault under subsection 3, applied in the original judgments. **Action:** Compensation was refused or halved, and this was maintained on internal appeal. **Legal departure:** The specific reasoning did not satisfy the causation requirement. **Effect on the outcome:** The citizens had to pursue further litigation for DKK 408.000 and full compensation/lost earnings respectively. **Responsibility:** Institutional decision-making responsibility and the State's payment obligation are documented; personal criminal culpability was not determined in these compensation judgments. **Demand:** Actual payment with interest, verification of residual loss and a separate investigation of the decision-making and management chain. The judgments examine compensation and do not set aside every previous pre-trial detention order as a whole.

E. Known child-case errors require verification of actual redress

Conclusion: The Langeland case documents that closure of supervision must be examined against documented lawfulness and each citizen's actual circumstances. **The authority's specific statement:** Ankestyrelsen rejected a new supervisory case in August 2025 and closed follow-up in May 2026; later that same month the Ministry required fresh processing. **Original evidence:** The 2023 Task Force analysis and the Ministry's 16-page opinion of 29. May 2026, with dated accounts of intervening oversight steps. **Deficiency:** A 2024 follow-up described continuing insufficient compliance with the law without planned checks of whether current cases were actually corrected. Organisational improvements did not document redress. [TFLAN23;TFLANISM26]

Relevant rule: The social-law safeguards then applicable, the specific supervisory powers under the Local Government Act and ECHR8's protection of family life must each be examined separately. **Action or omission:** The review was closed without the documentation of corrected cases requested by the ministry. **Legal departure:** The ministry's direction required renewed consideration of legality, possible sanctions and redress; it is not a judgment on the validity of every individual placement. **Effect on the outcome:** Closure did not dispel the risk of continuing unremedied loss of rights. A documented action plan 11 months after placement is a specific temporal element that must be connected with the original decision-making basis, actual contact and later cessation. **Responsibility:** The municipality's decision-making and management chain and the supervisory authority's knowledge and response must be investigated separately. **Demand:** Produce the original supervisory opinion, follow-up records, the identified citizens' contemporaneous decisions and evidence of correction, support, contact, return home and any reparation. [TFLAN23, PDF31; TFLANISM26, PDF1-16; R04, R19]

F. Management knowledge, economic governance and continued intervention

Conclusion: The original Task Force reports provide concrete evidence to investigate whether known lack of support and lack of decision-making were continued through the municipality's management. **Concrete statement by the Authority:** The Nordfyn analysis reproduces the Director's statement that an earlier strategy and quality standard placed too much emphasis on economics and contributed to the sub-measure. At the same time, it describes the prioritisation of new studies from 1 January 2020, while the older ones continued to lack study. **Original proof:** TFNOR20, PDF8 and 21. At the end of 2019, a backlog of 155 studies will be reported; in March 2020, 143 ongoing, 116 of which are over the deadline, and 103 parallel cases will be reported. These four targets are different stock / activity cuts with unknown overlap. There are no 397 different children or 116 illegal places for them.

Non-conformity or deficiency: The sample documents 7 / 14 missing surveys / updates, while the larger backlog is the report's reproduction of municipal quarterly data. The original quarterly annex has not yet been independently tested. The concrete impact of the economy on the individual citizen's help requires the simultaneous management decisions and records. **Relevant rule:** The day-to-day investigation, support, participation and follow-up obligations as well as the EMRK8 requirements for intervention in family life. **Action or omission:** Assistance and intrusive decisions will be implemented or continued without the required simultaneous assessments. **Legal deviation:** The breach of the guarantee found must be linked to the substantive conditions and the continuing necessity of the decision; a subsequent investigation does not in itself demonstrate a sufficient previous basis. **Result significance:** Delayed or insufficient support may change the actual situation of the family, which is then part of a later action decision. Such a chain of reasons is a specific investigation requirement and not already proven for all sample cases. **Responsibility:** Decentralised staff, professional management, economic / political management and control body shall be tested;

according to each one's documented knowledge, competence and duty. **Specific demand:** Produce budget and quality decisions, quarterly underlying data, contemporaneous needs assessments, decisions and implementation logs; examine whether necessary support could and should have been provided before the intervention and whether actual redress was ensured after errors were established. [TFNOR20,PDF8,21,34,36-40;R04,R19]

The Odense analysis's two specific placement examples lack a professional assessment of support needs at placement. In one sequence, a decided assessment update is not completed until after 8 months; the child has already been placed beforehand. The report states that information in both sequences was known long before the later need for placement. This makes the time before the move and the rejected support options decisive evidential links. The original decisions, the validity of consent and any grounds for compulsion are necessary for a conclusion on the legal basis of the specific placement. [TFODE22, PDF28; own document keys TFODE22-HOVED-P28-ANBR1 and ANBR2]

Odense's professional management also confirms action plans after the decision and states that the requirement was previously unknown. The Task Force describes municipal guidance from 2020 that departs from the child-interview requirement. This is a lead to organisationally produced errors:the original guidance, approval, distribution and actual use must be examined, and affected decisions identified. Solrød's adviser interviews describe measures continuing longer than necessary because of changes of adviser. This is a specific lead to unnecessary intervention time, but neither number, duration nor type of intervention is stated. These statements must neither be deleted as mere administration nor converted into unproved national person and day counts. [TFODE22,PDF32,37; TFSOL22,PDF38]

G. Consent, child consultation and decision-making basis after placement

Conclusion: The new original courses document interventions before the required participation and assessment steps and a specific need to examine whether an intervention registered as voluntary had valid consent. **Authority's specific statement:** The Morsø analysis describes a nine-year-old child placed without a documented child welfare assessment and without a prior interview; the first interview is recorded only 14 months after the decision. The father shared parental responsibility and was largely not involved; only the mother had signed the declaration of consent. **Original evidence:** TFMOR18A,PDF36-37, reread in this analysis; the public report reproduces an anonymised record sequence, while the original records and declaration are not published. **Discrepancy or deficiency:** The child's views were not included before the decision, and the report does not document the father's consent.14 months is the time until the interview; it does not document 14 months of uninterrupted separation or an actual return-home date.

Relevant rule: The historical Social Services Act versions SL16H and SL17H,sections 48,50,52-54, link the decision to prior participation, assessment, specific need and consent. Consent to placement must include its purpose. ECHR8 also requires scrutiny of the intervention's legal basis, necessity, procedure and family life. **Act or omission:** The municipality carried out the described decision-making process without the documented prior requirements and without the report showing consent from both holders. **Legal departure:** An interview 14 months later cannot move the child's participation back to the decision date. Examination of contemporaneous consent and competence must determine whether any basis for voluntary placement existed at all. **Significance for the outcome:** The child and overlooked parent lost influence before a separation decision; an inadequate basis affects the very protection against unjustified intervention. **Responsibility:** The decision-maker, approving level and management's later knowledge must be followed through the records. **Specific demand:** Produce the consent declaration including purpose, contemporaneous statements by both holders of parental responsibility, the decision, any other legal basis for intervention, actual relocation/contact/cessation logs and later correction. Examine invalidity and continuing legal authority; documented removal or detention without legal authority requires cessation, reunification, reparation and separate assessment of responsibility.
[TFMOR18A,PDF36-37;SL16H;SL17H;R04,R09,R19]

Sønderborg2019 shows a related specific consent track: the mother of a14-year-old was informed that 14 days of silence would be treated as consent to assessment and forthcoming measures. The report does not document later obtaining consent. An announced automatic consequence of silence does not in itself document specific informed consent to the purpose of a placement not yet determined. Cooperation in assessment and consent to placement must each be examined separately; in the 2016/2017 statutory text, the assessment is conducted in cooperation as far as possible, while placement has a separate consent requirement. The original notice and all subsequent expressions must establish what measure was actually decided and what consequence it had. [TFSON19A, PDF34; SL16H, §§50,52-53; SL17H, same provisions]

Middelfart 2020 documents two placement decisions for which assessment updates were only completed approximately 7,5 and 2,5 months after the decisions. A separate case involving age 14 runs from a decision in early December 2018 to an update in late February 2019 and a return-home decision in early April 2019 after consent was withdrawn. This is an actual decision sequence towards return home; the physical moving date is unstated. Only when the request date, decision on a return-home period and physical return are linked can the seven-day deadline and specific legal authority for the period be examined. What the authority knew and lacked at each point must be investigated, and whether continuing intervention was independently justified. A subsequently completed assessment does not make the earlier missing decision basis historically present.
[TFMID20,PDF49/53;SL18H,section68;R04,R09,R19]

H. Actual return and known risk of non-termination

Conclusion: The new originals provide concrete information on actual repatriation and on local knowledge of circumstances that may delay cessation. A measure must be tested on its current purpose and basis; economic or organisational governance does not in itself demonstrate necessity.

Authority's specific statement and original evidence: Faaborg-Midtfyn's final report reproduces the municipality's information on a 19,4% reduction in posts, slower support, missed deadlines and the risk of ineffective measures continuing. The external final measurement finds deterioration in legal compliance. VISO describes a parental plan that does not answer the parents' specific questions about what must change to bring the child home.
[FMK20,PDF29,40-41; FMK20H]

Non-conformity or deficiency: Thus the municipality itself has described a possible failure in the end-of-life test. The report shall not give up the total child population concerned, day-by-day duration or actual repair. The unknown total does not erase the proven knowledge. Parents' ability to work against reunification is weakened when the concrete requirements and support needs are not clarified and followed up.

Rule, action and legal departure: The historical Social Services Act rules on continuing follow-up, support and cessation must be examined together with ECHR8's necessity requirements and actual efforts towards reunification. Under SL18H,section 68, a measure must cease when its purpose is achieved or is no longer fulfilled. A continuing intervention must have its own current basis. Recorded consent cannot, on its own, document a valid basis for all subsequent periods either. Withdrawal requires examination of the request date, a competent new decision and any return-home period.

Effect on the outcome and responsibility: If a known lack of follow-up perpetuates an intervention after the condition for cessation is met, time is an independent part of the specific loss of rights. The responsibility chain runs through caseworker, professional management, resource decisions and supervision, according to each actor's documented competence and knowledge. Staff shortages are here an evidential link in the management chain, not legal authority for continued separation.

Specific demand: Identify the measures whose effect and cessation the municipality itself stated had not been adequately examined. Produce contemporaneous plans, effect measurements, parents' requests for return home, support decisions, relocation/contact logs and management decisions. Examine each child's current basis, deliver necessary support and require actual redress with a date. This annual report alone does not establish a particular individual penalty or invalidity of all placements.

Middelfart's separate welfare check documents a specific return-home flow: 101 placement cases reviewed, 11 selected with potential for return home, and a municipality-reported status in October 2019 of five children actually returned home, four with continuing potential and two without short-term potential. 5+4+2=11, but there is no case-record linkage to the Task Force's 20 cases and no stated error/invalidity reason. The figures must therefore be retained as actual return-home information and must not be rewritten as five documented unlawful removals remedied. [TFMIDV19,item103]

Faaborg-Midtfyn's 2017 report describes an actual return home after approximately 2½ years in placement, with respite care by the former foster family and treatment for the mother. The 2020 measurement mentions another anonymous return-home example before the six-month follow-up. Svendborg describes an actual return home in summer 2017 after years of placement, but finds an inadequately documented professional justification and uncertain support needs; six hours of weekly support under section 11 are stated. Physical return home ends the separation but does not alone document fulfilment of support duties or redress for earlier errors. The three source examples must not be added as three unique children whose errors have been remedied.
[FMK17,PDF41;FMK20,PDF23-24;SV18,PDF63]

I. Recognised incorrect practice requires re-processing until actual payment

Conclusion: The Patientforsikringen originals read document specific incorrect refusals and incorrect application of rules that required reconsideration. **The authority's specific statement:**The 2007 annual report states that five 2006/2007 partial foot-drop cases were to be reopened because the institution's practice wrongly required complete foot drop. The 2008 annual report identifies an incorrect interpretation of the radiotherapy waiting-time rules and plans review of all waiting-time cases, even though previously appealed decisions had been upheld. **Original evidence:** PFOR07, printed 12/physical 7; PFOR08, printed 6/physical 4; our original tables and versions in the health chapter.

Discrepancy or deficiency: Earlier affirmation had not disproved the misunderstanding of the rule. The reopening decision documents a need for redress but states neither five actual payments nor the number of corrected radiotherapy-waiting-time cases. **Relevant rule, conduct and departure:** Compensation entitlement must be examined under the rule and practice actually applicable to the injury. An acknowledged overly restrictive definition requires identification and a correct new decision in affected cases. **Significance for outcomes:** The affected patient may have lost compensation or received it late; specific amounts, interest and periods of deprivation require original payment records. **Responsibility and specific demand:** Identify first knowledge, all affected decisions, reopening, new outcome, first and last payment and residual loss. Institutional redress and possible personal accountability must be distinguished and examined under their respective conditions.

In case 07-0120, the 2007 annual report describes the Danish Health Authority's failure to act after the hospital's timely notification: indication on 10. August 2006 to radiotherapy on 11. October. The institution awarded 10% permanent-injury compensation for psychological distress associated with a 10% deterioration in the statistical survival prognosis. This is a specific public omission and compensation chain, not merely an abstract procedural error. The status at 4. April 2008, with 18 accepted claims among 136 decisions/159 notifications, includes three accepted SST case-processing sequences among eight; those three are already included in 18. [PFOR07, printed 14-15/physical 8]

The own public hospital boards 2006-2010 include 3755 / 4056 / 3701 / 5122 / 5319 cases decided after each original version. Recognized is 1310 / 1291 / 1232 / 1834 / 1982. They include several rules on compensation, including speciality deviation and rare serious damage; therefore, a recognised course of damage is not merely a judgment of the criminal negligence of a public servant. At the same time, a serious disability or death may have irreversible consequences, even if financial compensation is awarded. The impact account of the report must maintain this actual loss without calling a payment restored health. [PFR06H / M / N / S / Y; PFOR07-10]

Documented errors and findings

The following are documented findings within the populations listed. The level of evidence of the control body which has actually been examined in the case of the underlying cases shall be as follows:

1. **Municipal bases for decisions are repeatedly rejected.** The complaint series checked contains 45.022 alterations/remittals in 2018-2024; error type and individuals require separate linkage. [A20,A21,A24]

2. **Copenhagen children's cases had serious procedural and power deficiencies.** The original study indicates the number of themes and both established facts and concrete signs. [R03]

3. **Return home and moving have their own documented errors.** Ankestyrelsen's 2011 study and FOB2018-33 must be included alongside removal statistics. [Personbilag2011; R10]

4. **Supervisory enforcement and verification of corrections were weak in the population studied.** Response, closure and actual redress must be kept separate. [RR18/2024]

5. **Psychiatric coercion was set aside or found formally unlawful in delimited points of complaint.** Duration decisions must be included separately. [PPKN25]

6. **Child and adolescent psychiatry had missed diagnostic-assessment deadlines and documented inadequate information/registration.** Courses are not unique patients, and the suspension period must be included in delimiting lawfulness. [RR10/2023]

7. **Denmark has EMD judgments with specific infringement findings during the 20-year period.** The annual tables are full of judgments; they are not a full count of all Danish violations. [EMD-annual tables]

8. **A minister was punished for the illegal separation scheme, and Commission material documents other unlawful conduct of authority.** Personal guilt and institutional criticism have different levels of evidence and decision-making. [R14-R15]

9. **The UN Committees and the CPT have given concrete and repeated warnings.** The documents provide a level of knowledge to be linked to subsequent practice. [UN / CPT Annex]

10. **The duration of the product should be increased in the 2018- 2024 pre-run series.** It is also a long process for minors. This is a documented duration and load finding requiring individual lawfulness testing. [L09, p.70,81-87]

11. **Specific administrative refusals of compensation and reductions by half were set aside.** The judgments did not find the necessary causal connection between criticised conduct and the relevant deprivation of liberty. Incorrect compensation outcomes are documented; final payment is a separate link. [ERVA01-ERVA02]

12. **The expulsion of a three-year child with disabilities by a municipality was unlawful discrimination.** The decision came 961 calendar days after the expulsion and awarded DKK 5.000. The Ombudsman's previous resignation from the inquiry does not prove the legality of the action. [KEN9536 / 2021, p.12-14]

13. **The Department of Investigation lacks a national systematic account of unintended health incidents.** East states that alerts are not recorded and stored after handling; West's 38 manually recorded events only cover 1 April 2024-1 June 2025. The lack of conservation may weaken the evidence of damage and liability of the inmates and require concrete verification of the duties of evidence and record. [KFUTH25, p.2-3]

14. **The Prison and Probation Service's intervention and review figures have specific methodological and reconciliation deficiencies.**The 2024 statement lists 141 decided cases, while the outcome categories sum to 148. The reporting scope of handcuff figures has changed, and intervention types may overlap for the same person. The 45 checked tables with 598 data rows must therefore neither conceal omitted interventions nor be transformed into 598 victims. [KF15; KF23; KF24, pp.39-43,54-56]

15. **The old objective of municipal appeal was replaced by a longer one.** The checks were completed after times under 30 weeks, while 2025 later also exceeded this target by about 35 weeks. Controlling and changing target does not document supplied assistance or repaired legal loss; target overshoot is not automatically exceeding any legal deadline. [AT07, p. 3-4; AT13, p. 8-11]

16. **The pilot barometer shows errors in cases which were not brought before Ankestyrelsen.** The 228 cases include separate error tests with 70 / 228 missing current investigations / updates without legal exception, 64 / 100 investigation deadlines and 99 / 226 conversation errors. Complaints alone therefore do not cover the level of error investigated; the errors are not a verified union of children or parents. [BBP19; BBP19M, PDF5]

17. **The Langeland course led to a ministerial order for renewed supervisory consideration after earlier closure.** The Ministry required specific examination of lawfulness, redress and possible sanctions. In the original sample, the minimum follow-up in all nine relevant cases was delayed, and parents in all three families with children in care lacked an offer of support under § 54 as then in force. The figures each have their own denominator and may overlap. [TFLAN23,PDF29,33;TFLANISM26]

18. **Næstved's 2023 analysis shows both exclusions and continuing follow-up errors.** Nine § 52 cases had no clear decision date; only six could enter the examination of the three-month deadline, and none of those six met it. Two cases had not yet reached the deadline, and one intervention had not been implemented. Those three are excluded from this deadline denominator. A municipal closure news item in 2025 describes continuing documentation and emergency-assessment problems; it does not prove that every citizen's rights had been restored. [TFNAE23, PDF28-36; TFNAENY25]

Suspects and hypotheses requiring further evidence

These points are open and must not be presented as already proven:

• That a particular number of children in the national placement population were removed without a valid basis.

• That certain employees deliberately removed or retained children without right; guilt and each stage of action require proof of cause.

• That time after a remittal for reconsideration in a particular child's case was unlawful continued separation; applicable decisions and day-to-day basis must be available.

• That the municipality's lack of support caused a specific subsequent parenting-capacity assessment or adoption.

• The creation of sanctions is due to an actual investigation / enforcement deficit in each case; data on notifications, evidence, outcomes and obsolescence are missing.

• That the international criminal context and intentional requirements for R2P crimes are met in a particular pattern.

These hypotheses do not downgrade the above documented shortcomings. They specify precisely the additional evidence required for a stronger conclusion.

Source and evidence chains for decisive statements

Consignment	Controlled chain	What the chain does not, on its own, prove
Number of municipal alterations/remittals	Annual statements→outcome table→amended+remitted→annual sum	Unique citizens, all errors or individual criminal liability
The cases of the 77 children in Copenhagen	Original Citizens' Adviser report→sampling/exclusion→theme counts; municipal minutes/UN later	All 77 homeless or independent extra UN cases
EMD infringement find	Original yearseries → 25 historical breaches; complaint number / Grand Chamber Association → 24 final infringement proceedings	Unique victims or overall Danish infringement rate
Non-response of the supervisory authority	Original National Audit → extracts / exclusions → reaction table	Zero personal penalties in any other scheme
Number of children placed	DST table / version / dimensions → status 31 December	Number of children illegally placed or 20 years of unique children
Waiting time after remittal for reconsideration	→ dates / duration → defined result	National mean or full child separation time
Change in time of appeal and completion of checks	Original final note C108 / 25 → 13 to 30 weeks → Annual Report 2025 around 35 weeks	Each case's specific deadline, actual help or redress; an administrative average is not automatically an individual Convention violation
Specific penalties and acquitments by individuals	Reference practice → identified court reference; PB01-PB03 full originals → same case, two free-found and one child; PU22 full court composition → one actual private punishment and one child	Appeals shall not be subject to penalty; other summaries shall not be fully authentic; no automatic penalty shall be imposed in the event of any error of authority;
Denmark knows the re-association requirement	Strand Lobben original § 8 on Danish post → § 205,208 on reunification	The actual illegality of all subsequent Danish cases
International criticism	Original Committee / CPT report → section → concrete recommendation / warning	Judgment or unique number of victims
The duration of the stay is longer	Justitia 2025 p.68 unit of measurement → p.70 / 81-82 annual / long tables → coordinated annual series	Not unique persons; not a judgment on the legality of all denominations
Wrong release / halving	Administrative originals → identified justification → byret premium → national court outcome	Original datings have specific errors; in fact last payment is missing
Social loss after custody without conviction	Wakefield / Andersen 2020 method → 75.187 cases / 50.446 men → Table 2 / 3	Historically cohort, women / children omitted; family loss measures cohabitation and cannot become the number of children affected
Municipal unlawful discrimination against children	KEN9536/2021 with chronology→reasoning on necessity/proportionality→relief/5.000 kr.	Mail and PPV reproduced in the decision; payment and restored access not documented

The private evidence chain is supplemented by PU22, physical PDF1-6: one child, 37 days of date, 40 days of conditional prison / 60 hours of community service and the acquittal of the other defendant. The imponed family law premium continues to require the independent family law act; the reproduced deficiency is not the punishment of a separate public servant.

Lack of data and necessary investigative measures

A public, de-identified account of consequences and responsibility with shared event identification is required. It must cover the entire sample, including cases excluded, already appealed, reconsidered, upheld with errors or closed without consideration on the merits. Such registration must preserve the reason for exclusion; it must not give excluded cases a fictitious finding of lawfulness.

Each relevant authority shall be able to provide: intervention / decision; type of error; date of finding; original legal basis and actor; new decision; actual recovery; unique rightholders concerned; economic and non-economic consequences; notification, indictment, judgment, professional reaction and compensation. In fact, in the case of children, reunion and loss of access are added. In the case of coercion, the whole duration and sub-periods are added without any right.

The expansion has checked many further historical practice studies and annual series, complete police and asylum annual series and specific ministerial and military cases. The coverage account must be read through three separate questions: is a source identified, is its relevant original content checked, and are the citizen's actual consequences published? Only the last can complete an account of consequences. An unpublished person or implementation register is not filled in by assuming lawful trajectories or converting a sample percentage to the entire population.

Prioritized strongest valid pleas

1. **Termination and concrete basis review:** no further action may be based on a valid basis; take the full decision chain and require a position on the current proceedings. [R01, R04, R07-R08]

2. **Time as independent harm and duty:** demand a complete timeline and rapid actual redress; examine authority-created loss of family ties. [R09, T22]

3. **Known repeated errors require effective response:** documents knowledge, subsequent action and actual cessation; an action plan is insufficient to prove this last indent. [RR18 / 2024, UN / CPT]

4. **Investigate event and state responsibility without waiting for individual conviction:** the offence and the obligation to protect / investigate are separate issues. [R04, R19, UN-CAT23]

5. **Require concrete repair:** indicate the loss items, period, causal link and responsible subject; avoid any loss of contact or freedom being hidden in a general "process error 'label. [R04, R11, R19]

6. **Examine personal and managerial responsibility:** identify the specific duty, act, knowledge, culpability requirements and deadline; no general civil-servant immunity is assumed. [R05,R14-R15]

Legal context in the documented procedures

An overall account of liability

The extended course allows you to try responsibility through actual dates. The table sets up different kinds of time; no common middle time is calculated over invemsurable events.

Progress	Documented time or order	Actual consequence of the material	Result of liability and balance performance joints;
Played boys ko munikati on, 2015-2 016	357 days between the first and the last disclaimer; 1.123 days from the first disclaimer to the Ombudsman's opinion	Private communication controlled and transmitted without the required decision	Illegality and municipal involvement documented; exact date of harvest, reimbursement and individual penalty not published in the opinion
Egely	1.217 days from inspection in 2007 to follow-up in 2011; two intervention reports of 5 and 15 minutes	Two illegal internal and inadequately informed regional controls	No documented individual punishment or payment in the source used; the minutes cover total use of force, not measured door-locking time

Progress	Documented time or order	Actual consequence of the material	Result of liability and balance performance joints;
Randers, A	Released on 10 January 2017; written decision 26 January	Return effected prior to the documented written decision; guarantees were lacking	16 days of documented sequence error, not 16 additional separation days
Randers, B	Requesting immediate aid 30 October 2017; municipal implementation 20 and 24 November	21 and 25 days before the actual required bets started	The child's support and actual follow-up must be tested; the municipality's explanation of cooperation is not independent proof of family responsibility
Indexssa gene	Documented pair separation days; the 21 pairs with a stated duration among the 24 pairs of the form give 2.557 pairs	Separation, contact limitation and specific loads; the duration of three pairs is unknown	The Minister sentenced to 60 days of unconditional imprisonment; couple days are not individual days of children / parents or total time for all concerned.
Foreigners excl, ERH 2024 / 35	In May 2024 the agency had not complied with the November 2022 remittal	Living and family life continued without the timely new review	The Board itself overturns the decision and orders a residence card; actual issuance of the card and full reparation require a separate evidentiary step
Tibet	Intervention 2012 / 2013; later commissions; two conditional judgments 29 October 2025	Interference with expression and demonstration; elapsed time affected the criminal-law response	Conditional judgments are actual criminal proceedings; Commission criticism, civil compensation and staff cases have their own procedures
Stateless	Action brought on 10 July 2012 Højesteret 21 August 2026: 5.155 days	Long-term review of delayed citizenship and compensation; time before citizenship varies individually	Three awards of 10.000 kr. each in the High Court in 2025; 22 appellants received no further award in 2026. Limitation and lack of evidence were applied on different grounds
Mink	Commission Criticism 2022; five documented warnings later revoked	Deficiencies and errors in order and information chains	Revocated warnings are a concrete outcome of the staff case; they do not automatically cancel the Commission's documented objective course
Green Desert	Operation 2004; Landsret 2018; Højesteret 2022; EMD 2025, final 2026	Information about later Iraqi abuse and long Danish case of responsibility	Compensation decisions set aside; the ECtHR's decision and jurisdiction elements must be described precisely, not as a new finding of a Danish violation
Samsam	Public denials 2018; recognition by the Supreme Court of paid cooperation 2025	Misuse of public information and long review	Recognition judgment has not been proven Spanish reopening or Danish compensation for the whole of the criminal proceedings
Children of Greenland	1952 return to Greenland involved for 16 children orphanages, not home to parents; six survivors were offered conciliation 2022	The country, the institution and actual family reunification were different endpoints	Six awards of 250.000 kroner in the documented settlement; the historical 22 children and six settlement parties are overlapping populations
Greenland's anti-conc injection	Historical intervention 1960-1991; investigation 2025; law and decision status 2026	Body integrity and reproduction processes documented through defined reports	138 recognition of 300.000 DKK per case in the read balance sheet, not proof of 138 actual payments; the law provides for a specific exemption from fines for the obligation to provide information
E, AM 202 0.10.15V2	695 days started; 240 against punishment; 413 days of release → first sentence; 673 → national law	Freedom loss in addition to sentenced sentence; the entire compensation first denied by SAogRA	DKK 408.000 + interest awarded; actual payment and other losses not documented
Suldrup, AM 2010.0 2.25V2	433 commenced days;630 days release→favourable District Court finding;875→High Court	Two children; weekly half-hour supervised visits until 6.7.2007; job / salary loss	Halving cancelled; early instalments already paid, last payment unknown; children left by release following mother's sentence; continued health / job problems in reproduced 2009 material

Progress	Documented time or order	Actual consequence of the material	Result of liability and balance performance joints;
Staff case, AM 2022.10.17E	12 commenced days;273 days prosecution discontinued→defence counsel notified;1.938 days release→high-court refusal	Absence of liberty; a common child referred to in the reproduced statement	Replacement denied; delayed notification acknowledged as an excuse for late claims; cost of citizens
Three-year-old child, KEN 9536/2021	961 days of expulsion → decision; 816 days of complaint → decision	Excluded from specific age-oriented municipal offers; the period is not evidence of exclusion from all activities	Illegal discrimination, 5.000 kroner awarded; actual payment / access unknown
Langeland, location 2023	11 months from actual placement to action plan	The young person was placed in the period of education without the timely plan to manage action and follow-up.	Documented lack of plan; other validity of the decision, effective consultation and repatriation require original documents
Langeland, supervision 2022-2026	Law Enforcement Opinion 2022; continued missing 2024; new case dismissed 2025; follow-up closed 6 May 2026; Ministerial notice 29 May 2026	A completed check did not show that the rights of the identified citizens were right	Fresh consideration of lawfulness, redress and sanctions ordered; actual outcome and individual reparation following the order are separate links
Visiting, Informing and Survey 2021	Psychiatric notification in February to decision to investigate in November: nine months	The information requested was initiated after the long waiting period indicated.	Documented delimited example; not evidence of nine months of homelessness or full national delay
Morsø 2018, nine year old child	First child interview 14 months after placement decision	The child's information was not included before the decision; only mother's signature documented, father with common authority largely not involved	Consent, decision and actual separation / termination period require the original record; 14 months is the delay in the call
Sønderborg 2019,14-year programme	14 days of silence announced in consent to future measures	Recording of volunteers requires checking of the concrete, informed expression	Original notification, subsequent consent, actual effort and continued basis must be tested; no duration of placement given for this particular example
Median 2020, two application decisions	BFUs updates finished about 7,5 and 2,5 months after decision	Decision taken before the required updated basis	Actual move/cessation dates and legal redress not stated; the intervals are not the entire placement period
Median speed 2020, 14-year period	Early December 2018 decision→late February 2019 update→early April 2019 return-home decision	Consent was withdrawn and return later decided	Return-home decision documented; request date, return-home period and actual return date required for precise scrutiny of timing/legal authority
Rudersdal 2024, released young	Actual return referred to; date and duration not disclosed	The young person was asked himself to assess support	Individual aid assessment by the Authority and aid actually provided must be provided; the return does not in itself document the repaired breach of the guarantee;
Police 2007, private conflict, No 31	Unjustified arrest / retention attempt; duration unknown	Private conflict supported by police identification and freedom intervention	800 kr. civil fine; criminal decision, original event and compensation required; no specific private comparative penalty can be calculated

Medium speed , welfare check 2019	101 placement cases→11 with potential for return home→5 children actually returned home as of October 2019	Local information on physical return, 4 still possible and 2 without short-term potential	No connection to 20Task Force cases, cause of error, precise moving dates; or replacement; 5 is not a documented illegality union,
Otter 2017, application for race	Child welfare assessment deadline exceeded by just over 2 years beyond the four-month deadline; one plan approximately 11 months after actual placement	Guarantees were missing during the procedure; the overlap of BFU and plan examples is unknown.	Original decisions, prior legal basis, consent and effective termination shall be linked; no two-year home-free course shall be calculated by the deadline;

Medium speed , welfare check 2019	101 placement cases→11 with potential for return home→5 children actually returned home as of October 2019	Local information on physical return, 4 still possible and 2 without short-term potential	No connection to 20Task Force cases, cause of error, precise moving dates; or replacement; 5 is not a documented illegality union,
Faaborg-M idtfyn 2017	Actual return after approximately 2 ½ years of placement	Return and subsequent relief / treatment mentioned	No identity coupling for the recorded errors, calendar date or repair; the entire period has not been deemed illegal in the source
Faabord- M idtfyn 2020	Actual return home before six-month follow-up; another course with withdrawal of consent and follow-up one month late	Return in one example; withdrawal of consent in another	The examples are kept separate; the withdrawal does not merely represent return
Svendborg 2018	Actual return summer 2017 after yearlong placement; 6 hours weekly § 11 support	Physical return, inadequately justified support needs	Four § 65 openings in the take-off measurement, two in the final measurement; final decisions and repair require separate proof
Health Discipline 2011	12,9 months on average for decided complaints;100 reopening requests,75 rejected,5 amendments	Long trial period and limited evidence of changed critical outcome only	Not the patients' full injury/payment period;1 request for prosecution is not 1 judgment

Patient complaint FOB 2009-12-2	1.957 days Receipt → decision; 561 days Board meeting → decision; 1.141 days first regret → decision	The father's complaint after the son's death got very late formula review;	The Ombudsman's very serious time-critical; material processing; outcome and replacement not tested in the opinion;
Health care	20 September 2011 decision → 29 February 2012 transmission; 10 December 2012 injunction	7 out of 11 additional patient sessions were sent to the Board and criticised with invigoration; scheduled meeting never called	Recognised lack of prioritisation and reporting; local conflict over "20 months" retained; actual subsequent damage / execution not quantified
Patient insurance, five drop-out cases	Rejection 2006 / 2007 → Decision to resume 2007 Annual Report	Too strict practice had to be corrected; patients had lost proper redress	Five identified cases, not five documented paid patients; dates, amounts and residual losses are required
Patient insurance, radiation waiting time	Recognised incorrect interpretation autumn 2008 → planned review / re-examination 2009	Previously resigned refusal could be wrong	The number of cases actually examined / amended / paid must be reconciled; the admissibility of the appeal did not contradict the error.

Hospital medical-record practice, FOB 2010-4-4	20 years of accepted practice described in 2010; concrete treatment 2005 / 2006	Hospital doctor was (b) administrative exemption from a tax; statutory record liability on unlawful basis	Name, Board and Ministry had known practice; Amendment and Folketingets notification, but none; actually counted re-treatment / personal union i the opinion;

The table's sources are the separate sequence analyses BK01-BK03, HG01-HG03, IF01-IF06, the immigration-complaint module, TB01-TB08, the statelessness, mink, Green Desert, Samsam and GL-K01-GL-K04 analyses. They contain dates, original references and evidential boundaries. The report's timeline must not erase the distinction between intervention time, appeal time, review time and responsibility time.

Task Force rows refer to TFLAN23, physical page 31 / printed 29; TFLANISM26, physical 1-16; and TFNAE23, physical 31 / printed 29. The cases described do not have public personal identifiers. Own document keys connect source passages and do not prove that several examples concern the same or different people.

The new rows refer to ERVA01-ERVA03 and KEN9536 / 2021 with original URL, page number and dates in the case modules. Daily figures between events are their own calendar differences; they must not be confused with the detention of the person concerned during the replacement process.

Relief must therefore be checked at the actual next stage. An order for payment requires payment information; annulment of a contact restriction requires a contact log; remittal requires a new decision and assistance delivered; acceptance

The Court of First Instance has consistently held that it is necessary to verify whether the original order was altered. If there is not such a follow-up in the original source, the impact accounts are open on that very point. The original infringement or error of authority found will not be solved for that reason. The Suldrup chain actually documents early part payment; the rest applies to the payment date, set-off and payment of a further DKK 449.990.

From detected errors to actual nullity and termination

For a citizen who continues to lose family life or freedom, the first question must be: what is the valid basis for the intervention? **now**. The specific authority shall provide the legal basis, the competent decision, the current factual conditions and the necessary procedure. A detected error shall be subsumed against each of these indents. No information becomes true or sufficient because it is repeated by the municipality, board and court in the same source chain.

Removal without a valid basis is actual administrative separation without legal authority. It can be described through the specific effect: the child has been taken or kept apart from their caregivers without the lawful decision. The expression »administrative abduction« may express this criticism, but is not a separate Danish criminal provision. An allegation of child abduction under section 215 or deprivation of liberty under section 261 must also show the respective elements of conduct and culpability. The report's strongest demand is therefore to identify **the precise unlawful act and its period**, require effective cessation and redress, and investigate the criminal track on this documented basis. [R05-R06]

This only delimits what can be concluded from each error. It is not an argument that procedural deficiencies are immaterial: lack of participation, insufficient facts and a decision by an incompetent body may affect the very safeguard against unjustified interventions. BK01 shows that a lawful placement would not legitimise separate unlawful monitoring of communications. Conversely, BK03 shows that errors concerning return home do not in themselves prove that the original removal lacked legal authority. Each act and omission must have its own legal consequence.

Placement oversight 2026: breaches of law, ongoing delays and continuing family loss

Conclusion: Rigsrevisionen’s measurement of breaches of law requires individual legal review and follow-up through to actual redress. **The authority’s specific statement:**69 per cent of 3.148 selected children’s first placement sequences had at least one measured breach of the requirements examined. **Original evidence:** Figure 2, table A and the methodological annex document the child union, the different denominators and exclusions. **Deficiency:** Not all children are checked against every requirement; among other things, additional registrations and cancelled interviews may conceal further failures. The report itself describes 69 per cent as a lower-bound estimate. The remaining 31 per cent therefore provide no documentation of full legality. [RRAN26, PDF22-32,38-54]

Relevant rule: The requirements then in force for assessment, a competent decision, involvement, a plan, follow-up and supervision must be linked to ECHR8's requirements concerning interference with family life and an effective process. **Act or omission:** Delayed or missing steps have been established in the respective subpopulations. **Legal departure:** Each breach of a safeguard must be examined at the time of intervention; a document prepared later cannot, on its own, document an adequate basis at that time. **Significance for the outcome:** A decision on an insufficient factual basis may cause unjustified separation, while a missing plan and follow-up may prolong a case or weaken contact and reunification. The specific effect must be documented from contemporaneous records and residence/contact logs. There are not 3.148 independently examined invalidity decisions here. [RRAN26;R04,R08-R09]

The timing samples show a further delimitation: among 693 completed delayed, non-urgent child welfare assessments the median overrun was 77 days; among 742 completed delayed plans it was 44 days, and among 391 completed delayed follow-ups 24 days. Unfinished delays are excluded from these distributions. They must therefore not be used as a ceiling on families' waiting time or as return-home times. The demand is for both a completed-case distribution and a separate register of continuing, unfinished safeguard breaches with actual intervention duration. [RRAN26,PDF25,28,31,42-48]

Responsibility: The municipality’s specific decision-making and management chain and the ministry’s separate knowledge/response link must be investigated. The reference to 98 per cent upheld decisions in selected compulsory-placement appeal populations examines neither the same children nor the same safeguards. The minister’s 2026 commitment and the audit’s continuing review document a response, but not completed reparation of every child’s trajectory. **Demand:** Produce each child’s contemporaneous decision-making basis, all five requirements with review status, any emergency basis and consent; examine invalidity and the current basis; record

[RRANSM26, PDF1-4; RRANC11126, PDF2-3]

The additional time series refer to TFMOR18A, PDF36-37; TFSON19A, PDF34; TFMID20, PDF49 / 53; TFRUD24, PDF30; PD2007K, nr. 31 / PDF8. There are no record keys to deduplicate Middfart's two BFUs with the 14th year; they must not be added together as three different children placed.

Stevns: Recognized Untopical Basis and Miscorrection

Conclusion: Reaching adulthood does not make an earlier failure of safeguards timely or document redress for the lost period. **The authority's specific statement:** The status report recounts that in February 2020, the municipality acknowledged to a young person that the assessment should have been updated, but refrained because the young person would turn 18 a few days later. **Original evidence:** TFSTE20, physical page 26/printed 25: an assessment from November 2015 was used for a placement decision around four years later. **Deficiency:** The described update did not exist before the intrusive decision, and the acknowledged deficiency was not corrected by this subsequent conversation. [TFSTE20]

Relevant rule: Contemporaneous requirements for investigation,fact-finding,participation and proportionality,and ECHR8 procedural protection. **Conduct or omission:** The municipality decided on the described old basis and subsequently refrained from updating it. **Legal departure:** The documented safeguard deficiency must be examined at the decision date;an approaching 18th birthday does not document that the earlier decision rested on lawfully established facts. **Significance for outcomes:** The young person had been placed following a process in which the current basis was not documented as required. Four years is the age of the assessment basis at decision,not four years of documented placement without legal authority. **Responsibility:** The municipality's actual decision-makers and management's knowledge must be identified in contemporaneous records. **Demand:** Produce the decision,assessment,need for updating,consent/coercive basis,interviews and subsequent cessation;examine invalidity,actual loss and redress for the specific period. [TFSTE20;R04,R08-R09,R19]

Another source example describes an interview with a child just under ten on the day after the placement agreement, while the adviser collected and drove the child. The later interview does not prove the child's opportunity to influence a decision already made. A separate VISO example describes insufficient family support before emergency placement. However, the VISO sample of five cases required an assessment to exist; cases without an assessment therefore fall outside this professional examination. The demand is to investigate whether documented insufficient support created or intensified the risk used to justify intervention. No person or causal union between the examples is proved. [TFSTE20, PDF25,35]

Preservation of evidence is part of an effective investigation

The original of the Disciplinary Board 2011 documents 22 decisions concerning the same private specialist whose records were destroyed. The name could not try treatment and information itself, but criticised storage. The hospital case in the same original describes a missing triage schedule and conflicting information that weakened the trial. These are concrete evidence mechanisms, not an estimate of all health defects. Where the State is required to investigate a serious intervention or an arguable breach of the Convention, simultaneous records and logs shall be ensured and no refusal of competence shall appear as acquittal of the act itself. In addition, the information provided by the annual report on past practices of uncritical record deviation shows that the category "no criticism 'does not demonstrate the absence of all legal errors. [SDN11FT, p.15- 22]

The full Ombudsman's original 2010- 4-4 shows a further effective administrative liability exemption: hospital doctors were, through a long-standing practice, not held responsible for certain record deficiencies when a secretary wrote the decree. The Board and the Ministry had known and accepted the practice; the Ombudsman described it as illegal and informed the Folketing. According to his review, the law made no such difference between the hospital doctor and the practitioner. This is a concrete proven failure of responsibility, which must be compared with the duties of individuals. This is not a general criminal immunity. At the same time, the opinion required that a recorded breach of law be notified at least to the doctor, even where, on the basis of a concrete assessment, disciplinary criticism was not expressed. Therefore, "no criticism" cannot be used as a national law counter. [FOB10J, print1,9-12 / PDF2,10-13]

Statistics cannot replace the legal document

Verification of Statistics Denmark's methodological description of Statistics Denmark's method reveals that, for certain deficient submissions, the placement register recodes sequences according to assumptions about legally consequential changes. A registered legal-basis category is therefore not independent evidence that the required decision by the competent authority was actually made in time. It must be checked against the original decision. The register's corrected category must neither be used to explain away a documented deficiency nor conversely converted into an unknown number of unlawful cases. [Person extension, DST methodology card]

The same distinction applies to alteration/remittal rates. A case altered or remitted may have multiple errors and rights holders; an affirmed case may also have documented procedural errors. An unappealed case may feature in a practice sample excluding all appealed cases. The report must therefore include separate error populations and retain all denominators before forming a union. A consolidated citizen account must be a linkage, not an addition of different oversight bodies' headlines.

The 2019 pilot barometer gives concrete expression to the exclusion: the cases could not be appealed. The 228 pilot cases and the 3.629 cases in 2020-2024 give 3.857 case cases investigated in six publications. This is a count of study volume, not of different children or illegal locations. Each fault sample retains its denominator and the later collector report does not add any additional population. The strongest documented criticism is that the outcome of the complaint cannot be a comprehensive description of legal certainty in these uncontested cases. [BBP19M, PDF5; BBP19; barometric annual modules]

The historical tax and vehicle-support matrices show a related blindness to outcomes. Landsskatteretten's »other« may contain actual relief, while remittal has no separate cell in the 2009-2012 tables checked. In the 2010 vehicle-support table, 17 remittals are excluded from the printed alteration percentage of 2; a further 66 board decisions are excluded because information about the municipality's decision is missing. This documents specific statistical exclusions. It does not prove all excluded cases were erroneous, but requires them to be recorded as known separate populations with unresolved outcomes rather than disappear from the account. [LSRH11-LSRH12;HB10,table4.3 and methodology annex]

The concrete asymmetry of responsibility

The private original-judgment chain from 2017 shows the necessary precision: the prosecutor sought 2-3 months' immediate imprisonment for a mother and grandmother, but both were acquitted under section 215, subsection 2. The High Court found that the then criminal provision could not be extended from disagreement about parental responsibility to the specific residence disagreement, contrary to its wording and Criminal Code section 1. Three primary documents concern the same case with two defendants and one child. This specific missing offence element limits the criminal-law comparison; it provides no authority for public intervention without a valid basis. [PB01,pp.1-3;PB02,pp.2-5;PB03,pp.3-5]

The fully read 2022 original AM 2022.06.16V, by contrast, shows actual punishment of a private individual:37 days between dates of withholding led to 40 days' suspended imprisonment and 60 hours' community service, affirmed by the High Court. A co-defendant was acquitted. The criminal judgment also reproduces a family-law premise that the original interim parental-responsibility decision lacked a basis, yet was maintained by reference to the later situation and time since the child's handover 65 days earlier. This specific line requires independent scrutiny of the administrative decision, original evidence, effects of time and responsibility. The private individual's punishment does not prove the lawfulness of every official step. The full sequence, source-chain limits and specific document demands appear in the 2022 judgment module. [PU22,physical PDF1-6]

The immunity claim must be examined at several separate levels. Public office does not confer general permission to separate or surveil children without legal authority. The Liability for Damages Act's employer/employee rules may limit an employee's personal financial liability; they are not criminal-law authority for the intervention. Personnel response, punishment, authority responsibility and reparation for the citizen must each be recorded. Absence of one response does not remove the other duties. [R05-R06,R11]

Health also has a specific legal protection of sanctions. Article 201 of the Health Act protects the rapporteur and, from 1 January 2021, health professionals involved in an UTH reporting against disciplinary, supervisory and criminal consequences of the reporting. The rule must be included in the liability assessment. It also applies to private hospitals and does not provide general immunity to a municipal caretaker in a home-free separation. The

historical guidance expressly distinguishes between this reporting basis and sanctions on another basis. The specific demand is to secure contemporaneous records and other independent evidence, and examine each responsibility chain, while the citizen's harm may still require cessation and reparation. [UTHP11, PDF6; UTHP20,§1nr4-5og§5; UTHP25,§§201-202]

The 2026 Greenland Compensation Act nevertheless contains an **express, specific exemption**. Under§16, subsection 2, failure to provide necessary information under the duty in§4 may be fined, but public authorities and their employees are exempt from this fine provision. A private and a public party subject to the same information duty therefore face different sanctions. The exemption does not remove the information duty itself. The applicant's knowingly false declaration on honour has different offence elements under§16, subsection 1, and a penalty range of a fine or imprisonment up to 2 years. It must not be presented as the penalty for precisely the same omission as the authority's. [GL-K03,§§4 and 16]

The actual responsibility cases also show that sanction deadlines and opportunities for proof can expire while the citizen's loss of rights and civil review continue. The Stateless Persons Commission's specific information on disciplinary and criminal-law time limits, subsequent closure of personnel cases and the 14-year civil proceedings provide a documented basis for criticism of this asymmetry. Intent need not be presumed on the part of every employee to demand timely preservation of evidence and determination of institutional responsibility.

The most direct demand is a parallel responsibility track from the first documented serious error: immediate review of the citizen's continuing intervention, preservation of original files and logs, identification of the responsible decision chain and a decision on financial and non-financial redress. The citizen's claim to protection must not be postponed until years-long personnel or criminal proceedings have concluded.

Modified target bar must not hide the actual time of the citizen

The new 30-week term of the Appeal Board replaced the old 13-week term. The subsequent control agreement thus says something about the fulfilment of a modified internal target; it does not prove that the citizen's legal loss ceased more quickly or was repaired. Around 35 weeks by 2025 shows that the new target was also exceeded. The specific legal test is still required to establish time, necessity and effective protection for each right and case. [AT07, p. 3-4; AT13, p. 8-11]

The original referred-back case shows why dates are necessary: 97 calendar days from complaint to remittal for reconsideration, 44 of which to municipal transmission and 53 thereafter. The printed eight and five weeks do not match these starting points. It is a documented time vote; no information is given on the amount of the penalty, the amount of the penalty and the aid actually provided. The requirement is the whole chain of events, including reassessment, receipt, remittal for reconsideration, new decision and payment. A date of receipt or reopening shall not conceal the previous deprivation of the citizen. [AT02, physical PDF33-34]

Psychiatric control: end and modified target stick

The overall legal test of knowledge, continued loss of rights and actual reaction is set out in Chapter 28. The main conclusion and the priority requirements are set out in Chapter 30. The following original runs shall demonstrate separately what a control line actually covers.

The psychiatric follow-up provides a similar examination of what administrative closure means. A review may close the issue of correct registration or improved information while the assessment deadline continues to be exceeded and the family's actual treatment start remains undocumented. The 75 referral sequences from September 2024, the 71 assessable rights letters and the national quarterly averages each have their own denominator. They must not be added up as a person union. The new rights from 2026 apply to new referrals under the transitional rule; they do not erase earlier breaches or the need for specific reparation. [CPsy25, PDF4-10; PsyL25,§§1-2]

The conclusion of the follow-up on coercion also changes the metric: the earlier target of halving the proportion of patients subjected to belt restraint is replaced by a target for 2030 of a 30 per cent reduction in three types of episode per 100.000 inhabitants. Completed follow-up on the new monitoring system does not document achievement of the old target, timely termination of every unlawful intervention or payment to the affected patient. Each form of coercion requires a start, duration, specific legal basis, review, actual cessation and reparation. [CTv25,PDF3-5;H08 time account]

2. The impact of the proof on the rules

Appeal and investigation findings document repeated failures in decision-making bases and protective procedures. ECtHR decisions and international legal sources establish that procedure, effective review and time may be part of the right itself. When an error continues to affect family life, liberty or assistance, redress requires actual action. A new letter, remittal for reconsideration or administrative closure does not necessarily fulfil this duty. [R04,R09,R19]

Direct unlawful interference by a public authority shall be tested as an intervention. Its lack of prevention, support or investigation shall be tested as a positive obligation or obligation to process where the conditions of the relevant Article are met. You have to show the right, the risk, the knowledge and the possible / necessary action for the specific duty. There must be no torture alone from any procedural error or a well-founded allegation of maltreatment simply because individual convictions are lacking.

The right to review must also be assessed under the rules for the case type. Under Ferrazzini, ordinary tax claims fall outside Article 6's civil scope; a tax penalty may require separate examination under the provision's autonomous criminal concept. This specific delimitation removes neither domestic review of lawfulness, property protection under the First Additional Protocol nor Article 13 where there is an arguable Convention claim. Prolonged tax-appeal processing and a hidden outcome category must therefore be connected to the rule actually applicable, rather than automatically classified under Article 6. [FXTAX01,§§25-31;FXTAX02;R04,R11,R19]

3. Action, omission and legal deviation

The strongest valid criticism arises where the chain can be documented: illegal or unintentional intervention; practical knowledge of the authority; lack of timely correction; continued loss of rights. In families, this is particularly true of separation and contact. Time may weaken attachment and the Authority may not use the consequences of its own negligence as a self-created argument to cut off reunification. [R09]

In psychiatry, the lawfulness of initiation and duration must be examined separately. Approval of the starting point does not mean the entire period is lawful. In disability courses, missing timely support must be examined before the consequences of that very absence are used against the citizen’s functional or parenting capacity. In supervision, closure must be assessed against actual effect, not the municipality’s own explanation alone.

Detention: known registry and control failures

State responsibility, repair and the practical comparison with private individuals are grouped together in Chapter 28, paragraphs 6 to 7.

Register quality is a specific accountability track. Rigsadvokaten's historical originals document 109 late-reported 2010 trajectories placed in the wrong year, earlier incorrectly delimited deadline tables and continuing deficiencies in detainee case management. An institution's description of a new application or designated responsible person documents knowledge and initiative, but not in itself effects or redress for people deprived of liberty. The specific demand is for both correct public statistics and scrutiny of individual orders, requests, deadlines and periods. [LV11 pp. 3-5; LV15 pp. 6-8; LV16 p. 8]

The main 2019 account also documents 16 non-compulsory references to the public prosecutor and subsequent criticism from the public prosecutor. The limited requirement is to identify the course of proceedings concerned and to check the application, knowledge, time limit for submission, order and actual continuation. A subsequent management system or statistical correction does not in itself restore the protective control that was lacking in each course. The 16 are not simply 16 different persons and the statistics do not determine the legality of each extension. [LV19, p. 3-4]

The solitary-confinement module documents 19 entries concerning children in 2006-2017 and the stated durations; there is no cross-year deduplication. The 2010 original’s 17 days of child solitary confinement do not in themselves exceed the four-week limit. This does not answer whether wholly exceptional circumstances, necessity, reasoned separate orders and the child’s specific conditions were satisfied. The solitary-confinement statistics’ maximum-period check must therefore not replace individual examination of the child’s rights. [ISO2006-2017,children’s section; Act 1561/2006,§1 nr. 3/6/7,see the solitary-confinement module’s rule check]

Reference to the overall main requirements

The final priority requirements are grouped together in Chapter 30. Chapter 28 sets out their legal basis and the concrete evidence chains in this chapter indicate necessary documents and individual implementation.

Greenland cases and international legal classification questions

State responsibility and R2P's separate scope of application appear in chapter 28, section 7. The Greenland courses require the following specific examination of legal classification.

The Greenland documentation requires particular attention because both measures affecting births and transfers of children have a possible connection to the types of act listed in Article II of the Genocide Convention. That connection is a specific line of investigation. Legal classification additionally requires evidence of the specific intent to destroy a protected group, in whole or in part, as such; neither a serious consent deficiency nor a high recorded proportion without consent proves that intent on its own. Knowledge of minority, the authority's purpose, contemporaneous decision notes, target group and repeated warnings must be examined in the original material. [GL-K01-GL-K04;R20-R22]

In the case of crimes against humanity, the widespread or systematic attack on a civilian population and the perpetrator's knowledge of this connection must be proved together with the actual act. War crimes require the appropriate link to armed conflict. The four categories of R2P must therefore have separate subsumptions. On the other hand, international public liability may relate to a breach of the Convention by a competent public body, even where the particular international straitjacket or individual intention has not been proven. The requirement of termination, effective investigation and repair shall be carried through this directly documented track without waiting for any further classification. [R19-R22]

Detention: specific data and protection requirements

The joint test of authority knowledge and effectiveness is set out in Chapter 28 and the final requirements of Chapter 30 of the report. In the area of freedom, the following documented conditions and requirements are of independent relevance.

Total data requirements in the area of freedom: A race register must follow the person and the documented children / family relationships, maintain actual start and end and distinguish between legal decision and physical freedom. Separate registers of time and liability must be kept for continued care, isolation, time-limit control and compensation. Initial annual versions, post-registration and withdrawn information shall remain visible; the same citizen or the same annual course shall not be counted once for each report version.

Health protection during deprivation of liberty by the State: The State controls both the intervention and the prisoner's practical access to treatment. The documented absence of a national UTH account and Øst's failure to retain reports after handling make demands for contemporaneous records, medication logs, reports and follow-up specific. An exception from the particular UTH reporting scheme does not document fulfilment of treatment, protection or investigation duties. For a specific risk to life or serious treatment, examination under ECHR Articles 2 and 3 must follow the State's knowledge, opportunities to act, omission and actual harm. Vest's 38 incidents cannot replace this examination or constitute a national error rate. [KFUTH25,pp.2-3;KFUTHREG25,§2,no.3]

Review during continuing prison interventions: The 12 amendments in 2024 show decisions overturned in the population reviewed; the statistics do not state each intervention's actual date of cessation or redress. Under Act 661/2024, interlocutory appeals against new district-court orders require Procesbevillingsnævnet's permission under the "special reasons" criterion, subject to the Act's transitional rule. The eight applications pending at the end of 2024 are not eight refusals. Processing time, continuing intervention and actual effect must be tracked alongside final outcome so access to a new decision is not confused with timely access to liberty or treatment. [KF24,pp.54-56;KFL24,section3 and section10,subsection1/6]

Traceability check

The central statistical amounts of the report can be traced back to the annual series and source versions shown. The exclusion of sources and known conflicting figures are visible. Specific penalties refer to the source actually read, even when it is a summary of the authority. EMD, UN and CPT material are marked by decision type. Own legal analysis is separate from the findings of the control bodies. No national number of unique victims, no homelessness or personally responsible staff has been invented.

Reconciliation of the requested extension and specific document status

These accounts indicate what has actually been verified in the course of the enlargement and what continues to require an original or register connection. An updated bibliography and a localized report title do not in itself document that the original has been read. Published controls may lack a common personal identifier, subsequent date of payment or actual relocation. This information may not be invented to declare completeness. Each finite find can still be used with its own documentation.

The rows below reproduce the updated working records; words which refer in part to the specified remainder and do not change the probative value of the findings already checked. The status without material completion is an examination step. No request for access or register data has been sent by this report. The modules and the list of literature identify the original sources.

K01 · Municipal complaints 2006-2016

Substantively checked: national 2006/2012 originals, all 43 pages/13 tables/262 rows;2006 social boards with 28043 closed/24915 considered on the merits/6393 overturnings,2012SN/BAN35496/32066/8202.2006 percentage denominator is all closed cases; from 2007, cases considered on the merits. 2007-2011 national boards and the 2014-2016 portal version checked separately. The local 2006 statutory extract of 9417 overlaps the national report and is not an additional national population;819/818 and integration 6/5 retained. A national 2013 transition row and person/reconsideration/effect linkage remain missing. The official archive overview labelled 2013 does not link to a 2013 outcome table; this does not prove that the data never existed. New actual original-source check for 2013: SFV13H scanned 20 pages, read 1-8/15/19-20, and SFV13A29 pages, read 1-13/25-29, contain 16.780 first-half-year decisions=7.696BAN+9.084SN, all 27 case-area/subtotal rows with regional cells reproduced. AS13A34 pages, read 1-20, states approximately 11.000 municipal appeals, rounded rather than an exact annual outcome. The first-half-year count gap is closed; complete four-outcome data for 2013, transferred case-record keys/second instance/persons/effect remain outstanding. See ankestatistik-2013-overgang-originale-maal-og-naevnere.md/.json.

Document / registry tracks: Ankestyrelsen / previous social boards.

K02 · Municipal complaints 2025

Filled for the 26 eligible municipal law groups: 2025 reality 22927, city 15505, modified 1767, home 5655, rejected 2755. Disposal / re-evaluation / persons are not covered; primary portal + compact JSON in municipal module.

Document / registry tracks: Ankestyrelsen.

K03 · Municipal reassessment before appeal

Partial substantive verification: Varde 2023/Q1 2024; København Social 2009-2014 and BIF 2023-2024; UDK 2021 before/after review; AS 2026 workflows separately. A national reconsideration series and complete local publication register are missing. Overlap and specific data requests: genvurdering-og-klagepopulationer.md/.json. The original 2006 FOB inspection sections 4.2.4-4.2.5 are now read at physical 68-74:18/40 missed deadlines,9/25 social and 9/15BIF; at least 8 missing notifications overlap deadline breaches. Other waiting times deducted; an earlier oral complaint not entered in the records and internal resetting of the receipt date treated separately. See the 2006 annex module.

Document / registry tracks: The municipalities / Ankestyrelsen.

K04 · Practical studies 2006-2025

Five historical originals now read fully as text: placement 2006, all 63 pages/32 tables, 174 rows;2008 all 73 pages/44 tables, 265 rows;2009 all 94 pages/41 tables+2 methodology blocks, 263 rows; involvement 2011 all 107 pages/31 main tables+4 municipal annexes+3 figure/prose blocks, 224 rows; relocation/return home 2011 all 65 pages/28 tables+1 figure,120 factual rows and 23 local example IDs. Same earlier 101/143/125/121/81 cohorts, no additional error sum. Local case-ID deduplication 32/38/38/45/23 is not a cross-report union of individuals. Further completed originals: UDK 2021 all 90 pages/15 tables, 91 rows/16 case codes;rehabilitation 2014 all 112 pages/31 main+2 municipal tables and 7 figures=40 blocks, 201 rows/18 case codes;day club 2025 all 58 pages/9 blocks, 78 rows;work placements 2014 all 103 pages/32 tables+8 figure/methodology blocks, 185 rows/16 case codes;sanctions 2016 all 142 pages/30 tables+7 figures/47 case codes. Assets 2014 and flexible employment 2010 earlier specific municipal/subtable gaps have been supplemented without claiming that all earlier prose/rule pages were read in full. Submission/exclusion/already-appealed status, raw missing cells and actual redress are separate data requirements. The later consolidated 21-row list is now complete:flexible employment 2006, pension-psychiatry 2007, sanctions 2015, reassessment 2015, assessment of young people 2015, pension 2015, low hours 2016, pension-without 2019, BPA 2023, ethnic background 2023, lost earnings 2022, main+annex,work placements 2022, main+annex,contact 2016, force 2018, additional expenses 2014, sickness benefits 2016, dementia 2015 and sanctions 2024, main+annex. PEN06 all 59 pages supplemented with all 20 blocks, 108 rows. SAN17/22/23, external provider 2013, AES 2023, UDK 2022, contact 2020 and pension 2025 are also complete in the named separate modules. Foster families 2014 parts 1/2/4+summary,all 108 pages/40 numbered tables/61 blocks, 373 rows; FKU 2012 all 20 pages/22 tables+3 reconciliations, 142 rows. Specific main originals not obtained:Barnets Reform 2012 and foster relocation 2014 part 3, plus named FKU 2012 annexes. Not automatically unpublished. Survey/family/interview/case-record review cohorts remain separate. Latest specific retrieval attempt: CDX wildcard ast.dk/publikationer/*barnets* and *plejefamilie* both returned 503; archive.org/wayback/available returned 429 for three publication routes guessed from names, which are not verified catalogue IDs, without a repeated call. The old ast.dk/publikationer overview redirected and web access returned 500; SL robots.txt/sitemap.xml returned 404. Targeted Folketinget searches for 2012/2013/2014 and SL searches for Barnets Reform/relocation did not find these main originals. None of the errors proves non-publication. A separate 2013 family/network study with 252 cases does not replace 120/12 or 57/20.

Document / registry tracks: Ankestyrelsen.

K05 · Children's Day Barometer and Practice Checking

Partial substantive verification: child case barometers 2020-2024 and the use-of-force practice check 2018 (46 interviews/7 municipalities; 96 participant occurrences, no error count). Pilot 2019 is now fully checked against the originals:42+6+20 pages,228 unappealed cases/12 municipalities,18 main figures divided into 19 denominator subsets/67 category rows,12 municipality methodology rows and 17 municipal figures/204 rows.115 family treatment+113 placements (4 compulsory);198 cases/248 checked notifications.70 assessment errors,64 deadline errors,99 interview errors,52 plan errors, each with its own denominator; no error/person union. Obtaining the 2019 originals is completed; exact submission/exclusion counts, the direction of two consultation changes and actual redress/person linkage remain missing. See boernesagsbarometer-pilot2019-originalkontrol.md, -originale-tabeller.md and -originale-tal.json. The 2025 barometer is not in the current catalogue; the official 2026 plan describes the first new edition under the Child’s Act. All published 2020-24 municipal annexes have now actually been read:2059 municipal rows in boernebarometer-kommunebilag-2020-2024.md. All case-type annexes 2021-24 actually read, retaining original denominator discrepancies. BB 2020: all 17 raster tables checked visually and registered. See the annual modules and boernebarometer-pause-og-nye-kontroller.md. The complete practice-check inventory and other originals are missing. See boernesagsbarometre-2020-2024.md/.json and praksistjek-magtanvendelse-2018.md/.json. Use of force 2018: all 85 pages now actually reviewed, including visual review of raster annexes 66-85 and tablePDF63:5 blocks,67 rows in praksis-magt2018-fulde-originaltal-og-erkendte-garantiproblemer.md/.json.46 interviews/15 interviews with relatives are not national incidents/people; the original did not assess quality/legality.

Document / registry tracks: Ankestyrelsen.

K06 · Task Force children and disabilities

Central 2024 list:43 trajectories/42 municipality names;28 with at least one substantively checked analysis/status original and 15 without such an original obtained after specific municipal/archive routes. This does not mean 28 fully completed trajectories. All currently obtained necessary main-text/annex originals in the named TaskForce modules have now been substantively reviewed, including KK 2020 all 48 pages, Odsherred 2023 all 44 pages and Sorø children 2024/2026 all 42+27 pages. Other schemes are outside the 43:LTK adults 80 pages;Egedal child disability 119 pages;Sorø adults 119 pages;Nordfyn adults 103 pages;Frederikssund adults 133 pages. Phases and specific retrieval routes tested are in taskforce-daekningsafstemning.md/.json. Initial/final originals not obtained must not be called unpublished solely because of access errors. Exclusion, a union of individuals and actual cessation/redress are separate register/record requirements;2026 final reports have not been redated to 2006-25.

Document / registry tracks: Ankestyrelsen / Social Security and Housing.

K07 · A's own decisions overruled

Substantively completed for selected judgment/review courses and AS court-case denominators for 2019-2021:3541 closed registrations by level of jurisdiction, not 3541 unique persons or findings in the party's favour. The 2021 original table 2.12 has been read; it contains no outcome breakdown. Specific orders/findings in the party's favour, remittals and responsibility have been examined in the court, return-home and compensation modules. Remaining gaps:all 20 years' administrative case→court level→outcome→actual reconsideration/payment/return home; judgments/judicial closures and persons require deduplication. See the T01 module's court section. New AS13A original table 7/PDF13:665 findings in the authority's favour among 704 judgments delivered in 2013,visually checked. The own difference of 39 represents other outcomes, not 39 unique persons/full findings in the party's favour/unlawful placements. All 39 outcomes/judgment IDs/persons and actual effects remain to be linked.

Document / registry tracks: Ankestyrelsen Court of Justice.

T01 · Complaint handling time 2006-2025

Substantively expanded: historical board processing time 2008-2013 and Rigsrevisionen's review 2014-2025; Ankestyrelsen's original annual reports 2019/2021-2025, case counts 2020-2022 and monthly figures 2025-2026.14 original tables/200 numerical data rows.13→30 weeks changed target;2025 approximately 35; deadlines/time pending/reopening dates/exclusions and version discrepancies separately. Four 2014 individual histories, a remitted sanction 97 days from appeal→decision and 44/53-day step differences versus the printed 8/5 weeks. Outstanding: all earlier years' original time/deadline subsets, complete reopening/person union and actual loss/redress; averages are not national error/person counts. See ankestyrelsen-tid-kontrolmaal-og-faktisk-beskyttelse.md and the time-reading annex. New AS13A/SFV13H/SFV13A original verification:19 time/service targets, regional 2013 targets/waiting time/time pending and historical AS06-13 flow cells reproduced. AS13 table 9 excludes merger-relevant cases:18.607 under 12 months+1.262 over=19.869 versus prose 21.347; parts 11.371+3.041+6.935 confirm 21.347. 94,1% must not stand for the entire population. SFV13H unweighted 24,6BAN/23,6SN differs from AT02; versions retained. Exact inclusions/exclusions and actual individual redress outstanding. The new 31-page 2007 interim original LSRLEAN07 has been read in full as text in RAM, and PDF9/26/28/29 checked visually:5×3 backlog cells,25 targets and 32 deadline/function rows. The minister acknowledges budget prioritisation and increasing time; the terms of reference require safeguards to be preserved. Planned written voting in the absence of a reply is not documented actual refusal of a hearing. Backlog/full-time equivalents/targets must not be counted as outcomes/people. See landsskatteretten2007-ledelsesviden-liggetid-og-procesplan.md/.json.

Document / registry tracks: Ankestyrelsen.

T02 · After remittal for reconsideration back

Partial: 2013 report on 2012 execution 131 adult cases + 202039 shipping cases. National annual cohorts and actual new outcomes are missing; see municipal complaints -expansion.md.

Document / registry tracks: The municipalities / Ankestyrelsen.

T03 · Actual cessation and reunification

Specific courses checked substantively:four families with actual return home and support/contact dates in boern-kontakt-frihed-og-hjemgivelsesbeviser; procedural remittal for reconsideration/suspensive effect in hjemvisning-hjemgivelse-og-midlertidig-beskyttelse without automatic actual return home. Suldrup:two children returned on release according to the mother's reported court testimony; status closure 875 days later, early partial payments documented, final payment unknown. Three-year-old child with a disability:961 days until a finding in the party's favour, actual access/payment unknown. National remittal for reconsideration→actual return-home/register linkage not published here; specific demand for contact/residence/benefit/payment logs.

Document / registry tracks: The municipalities / Ankestyrelsen / Statistics Denmark.

P01 · Launched locations 2006-2010

Partly completed: 2007-2010 actually implemented cases involving ages 0-17 in AS 2010 figure 1.1=3693/3502/3254/2864; current ANBIVS1 all ages 2011-25 fully extracted. BU20/21 decision populations 2006-17 checked separately. Outstanding: original 2006 initiations, unit/version linkage; DST/AS historical register and revision dates. AS 2010 entire 56-page original now read in full:all 18 numbered tables/38 numerical blocks, 325 rows in anbringelsesstatistik2010-originale-tabeller.md/.json. Implementations 2007/08=3693/3502, not reversed; versions/decisions/year-end stocks kept separate.

Document / registry tracks: Statistics Denmark.

P02 · Duration of placement and repatriation

Partly completed: all reason rows for cessation in 2007-15 across three AS original versions;BIS66 duration 2006-09;BU25 changes 2014-18 and BU32 breakdowns 2013-16. Reasons may overlap;cessation at age 18 is not reunification. Outstanding: public cessation/duration aggregates for 2006 and 2016-25,actual returns home and interventions following errors. Register inquiry specified;none sent. New-publication check:44 relevant active/inactive table metadata sets and every dimension read among 5737 catalogue entries. Only BIS66 has duration status for 2006-09;BIS7 closures 2001-05 predate the period;no published 2016-25 return-home/completed-duration dimension within scope. Research registers describe precisely cessation/move destination;data must be obtained there. See dst-offentlig-hjemgivelses-og-varighedsdaekning.md/.jsonmetadata. AS 2010,the complete 56-page original,has now been fully read.3253 cessations include 2280 at age 18 even with continuing aftercare,rather than 3253 returns home.69% same placement type=1079/1560 sibling groups,not a proportion of individuals or proof of the same physical location. Original total/percentage conflicts and recalculated aftercare are retained in the AS 2010 reader module.

Document / registry tracks: Statistics Denmark.

P03 · Unique children and parents affected by errors

Method and source verification: national case errors → unique children / parent roles → effective reunification has not been published in the controlled tables. Determined 2011 bug cases and VIVE-return selection have been documented; no multiplication with population or two-parent-pr- child. Rest: unidentified complaint ID / decision ID → BUAH / BUAF → CPR / parent role and event dates at DST / AS / municipalities.

Document / registry tracks: Ankestyrelsen / the municipalities / Danmarks Statistik.

P04 · Disabled adults 2006-2025

Partly completed: HAND02A 2018-2025 and unique NYT populations separately; HANDBIL 2011-2025, 2010 refusals, time and 2025 reconsideration checked. A new original-source check closes vehicle grants 2006-2010: specific flow and grant tables in five AS annual originals and the 2010 methodology read in RAM. Original purchase series 2006-2009: 2.956/2.479/2.249/1.873; HB10 revised 2006-2010: 2.964/2.699/2.309/1.916/1.898. Late reports for 2007 and HB08's printed 5.802 against its own sum of 5.805 retained. Boards 2010: 382 + 66 excluded = 448 known decisions, not persons. Grants, full/partial refusals, reconsideration and appeals have different denominators. Outstanding: other disability-benefit curves 2006-2017 and all refusals, unique documented victims of errors and effective redress 2006-2025. Register trails RA12705/12706 identified; individual data not extracted.

Document / registry tracks: Statistics Denmark / municipalities.

P05 · Disability register quality 2025

Substantively reconciled:115.909 reproduced exactly as the HAND02A2025K4 sum of 23 benefits×9 age groups×3 sexes; recipients of multiple benefits overlap. NYT88.400 are unique recipients. Metadata on cells and missing Aarhus/Holstebro data documented. Outstanding: full revision account, missing municipal benefits and evidence of the effect on the unique-person total; DST data request specified.

Document / registry tracks: Statistics Denmark.

P06 · Copenhagen 2019 location data

Partly completed: DST's concrete Copenhagen 2019 variabel deficiencies, system shift 2020 and ongoing historical fixes source controlled. NYT version 13.600 / 2.624 against current 13.435 / 2.501 retained; 165 / 123 differences cannot be attributed to Copenhagen alone. Remaining: exact rows / extent / decryption of the deficiency and date / version of the post-correction at DST / Copenhagen; no source-based zero assumption.

Document / registry tracks: Danmarks Statistik / Copenhagen Kommune.

P07 · Forced children

Partly completed: BU03A all legal bases 2006-10; ANB6 all four categories 2011-25 and ANBIVS4 start-up basis 2011-25; new / older encoding and automatic registry assumptions checked. The others are not optional and zeros prior to separate reporting are not absences. Residual: individual under-distribution SEL65 / 75 / 76, criminal law, UNKN / Aliens / BLs and actual simultaneous home decisions; the validity of the legal basis cannot be proved on the register label.

Document / registry tracks: Statistics in Denmark / Ankestyrelsen.

O01 · Ombudsman's case coding

Partially completed: 2006-2025 years series for completed file cases and criticism / recommendation / recommendation as well as specific FOB 2018- 26, Egely 2011 and FOB 2018- 33 with source, time and person delineation. See below. md and boern-contact-freedom-and-return documents.md. Rest: all basic originals, full critical encoding, persons and overlap with other complaint systems; no national personal union.

Document / registry tracks: Folketingets Ombudsmand.

O02 · OPCAT and institutional supervision

Partial original coverage: specific Ombudsman investigations/Egely in boern-kontakt-frihed-og-hjemgivelsesbeviser.md. The full CPT/Inf(2013)11 original reports Danish supervision in Nuuk 1993/1999/2001/2006, September 2013 planned;over 1000 institutions eligible for OPCAT/~75 planned visits per year from 2013 and a Greenland NPM psychiatric visit in March 2012 under Act 8/2009§ 17. This is the State’s contemporaneous information, not a full national OPCAT register or substantive reading of the visit reports mentioned. Outstanding: all 2006-2025 visits, findings, recommendations, actual follow-up and person overlap;CPT kept separate. See cpt-2013-dansk-svar-fuld-originalkontrol.md.

Document / registry tracks: Folketingets Ombudsmand / DIGNITY / Institute for Human Rights.

D01 · Police outturn 2006-2025

Substantively checked: all 20 years' police/DUP outcomes; disciplinary entry series 2006-2025 with 1.454 numbered summary entries, including 124 in 2006-07 and 1.330 in 2008-25. The recovered 2006-07 copies at KRIM have 17+10 pages, all read as text, four pages visually checked in memory; binary identity with the authority copy unverified,2007 categories reconciled with report 1507 printed p.97. Complaints about police operational decisions 2018-2020 with outcomes/categories/timing errors;2019 has 55 delays for which regret had already been expressed in addition to 18 new criticism cases. Other operational-decision years not completed; the public annual series ceased after 2020. Judgment/person/response linkage and actual redress require registers. See politi-disciplin-2006-2007-originalkontrol.md and the other police/operational-decision modules.

Document / registry tracks: Attorney General / DUP / Police Commissioner.

D02 · Police unique employees

Material tested in the Disciplinary Module: 1.454 numbered summary items 2006-2025 (124 in 2006-07 + 1.330 in 2008-25) and separate DUP / penalty outcomes, individual cases with one employee and multiple responses. The anonymisation of the summaries and the various entities hinder national employee union. Rest: stable anonymous employee key and event / case coupling between DUP, Public Prosecutor, Judgment and Staff Decision; dedup both within and between years. See police disciplinary and liability accounts.md, PD05 with penalty fine DKK 3500 + disciplinary DKK 1000 same employee; no two-person calculation. New 2006-07 originals show similar employees in different posts and multiple employees in one post; no union of employees. News reports 77 / 46 and suspensions 5 / 9 are separate counting units. See Police Discipline-2006-2007-original control.md.

Document / registry tracks: DUP / National Police / Public Prosecutor.

D03 · Police recurrent errors

Substantive review findings: prolonged disciplinary proceedings, a case held in abeyance for two years, several cases closed due to elapsed time; a cyclist with Parkinson’s left>42 hours; a shared child removed by a police officer acting privately through colleagues; a refusal concerning pre-trial detention later overturned by judgment;2018-2020 dispositions involving unlawful handover of a car, unlawful collection of a child, reminders and delayed decisions. Identified summaries, responses and durations are reproduced. Full national follow-up of recurrence/payment/return home is missing; precise queries in the disciplinary/disposition modules. A new 2006-07 module has 124 specific record locators and four specific evidence/force/child chains PDH01-04. The report’s 55 selected criticism/regret cases exclude 3 known cases=58 known pool;31/38/69/31 per cent are rounded and not exact cells. An overall person/incident/redress union is still unpublished; copy authenticity and individual original judgments are local evidential gaps.

Document / registry tracks: DUP / Reich Police.

H01 · Patienterstatningen consistent series

Substantively checked annual originals 2006-2010: exact processing denominators/findings in parties’ favour/refusals, pharmaceutical classifications and amounts;77 tables 712 factual rows, all publication revisions retained. The 2009 original 6676/2298 changes in 2010 to 6733/2379;2007 internal 1488 vs 1495 acknowledged. Earlier 2006-25 register series and actual 2022 interest redress remain valid. Outstanding:2011 exact processing denominator, pharmaceuticals 2012, original 2011/2012 full-year documents and a common current revision. 2011/12ODA/official archive links found, but original figures not read; no denominator constructed from a rounded percentage.

Document / registry tracks: The patient's replacement.

H02 · Patienterstatningen public / private

Public/private hospital decisions 2006-2010 now substantively checked against originals;2006 five regions,20 tables,216 rows give public 1310 accepted/3755 decided and private 53/142.2007-10 coverage matrices, municipal schemes, specialist/tolerability rule and amounts scoped separately;2017/2021/2025 historical versions retained. Remaining: full public/private outcomes for all other years, organisational/individual responsibility linkage and person deduplication. Regional public financing of compensation for private harm is not public employment.

Document / registry tracks: The patient's replacement.

H03 · Unique replacement patients

Annual unique claimants 2006-11(both areas) and 2013-17(separate areas) previously checked against originals. New 2006-10 decision, child-example and amount matrices are not person counts;the 1996-2006 total of 21 findings in children’s favour must not be redated to the reporting period. Outstanding: annually/period-unique patients with recognised claims, age/disability, public/private and deduplication against complaints/appeals. Recalculation of 8744/8785 cases represents version layers; reopening/actual payment must be linked separately.

Document / registry tracks: The patient's replacement.

H04 · Health complaints 2006-2025

Partly substantively completed: activity and specific time versions for 2006-2025;exact criticism denominators in selected originals 2011-2012/2014-2017;the 2020 original has percentages,2021-2025 precise current aggregate categories. The 2014 supplement has 122 factual rows with denominator exclusions and profession/site components. See sundhedsaar-serier.md;sundhed-restudfald-udvidelse.md. Outstanding: exact original adverse outcomes for 2007-2010/2013/2018-2019,public/private status,employee/patient deduplication and complete criminal follow-up. Current migration exclusions are not a complete historical series. New PKNA10:scanned 2010 annual report,21 pages,six selected pages actually read visually in memory,3 original tables with 16 rows+6 own version rows. Contemporaneous 09/10 receipts of 3416/4147 and decisions of 3098/4247 differ from later statistics of 3294/3910 and 3094/4221;both versions retained. This concerns production/time,rather than the missing adverse-outcome categories. PKS06 original 2006 statistics have now been read as text for all 27 pages/visually checked for 8 pages;36 reader tables/328 numeric rows,567 criticism+2 prosecution requests+1648 no criticism=2217 excluding psychiatric appeals,including appeals 590+2+1713=2305. No additional count of unique people. See patientklager2006-originalkontrol-og-naevnerkritik.md and patientklager2006-originale-tabeller.md. Expanded SDN11FT:official Folketing HTML containing 34 pages actually read;2011 outcomes 1721/629/86/1=2437,reopenings 100=75+1+4+11+9. No image/PDF visual certification. This is the board’s annual report;the separate 2011 annual statistics are not automatically closed. See disciplinarnaevn2011-originale-udfald-og-bevismangler.md/.json. The same 2437 criticism matrix had already been checked within a delimited scope in sundhedsaar-serier.md;the full 34-page text expands methodology/case/evidence checking and reopenings,rather than a new population.

Document / registry tracks: The Patient Complaints Board.

H05 · Health complaints public / private

Partially completed: processing site / complaint, 2014 trade / place sub-decisions and 2021-2025 critical classes with separate denominators; selected references and criminal follow-up in historical originals. See health yearsery.md; health-residual-extension.md. Rest: full public / private division of employment, unique therapists / patients and connection to STPS supervision / current criminal convictions.

Document / registry tracks: Patient Complaints Board / Patient Safety Board.

H06 · Psychiatric compulsion 2006-2025

Partly substantively completed: national first-instance output and intervention outcomes 2011-2025 in source versions; regional originals North Denmark 2008-2010, Central Denmark 2009-2012 and Capital Region 2010-2012. Duration set-asides, formally unlawful approvals, mixed outcomes and 2024-2025 methodological discontinuities recorded. See psykiatrisk-tvang-udfald-2006-2025.md/.json. Outstanding: national/all regional first-instance outcomes 2006-2010, remaining detailed tables and unique patient/intervention linkage.

Document / registry tracks: Name House / Patient Complaints Board.

H07 · Forced tanks and court

Partly substantively completed: independent appeal-board annual originals 2014-2025 and 2013 entries/time viaA14, with parts/cases, revision conflicts and changes without automatic patient benefit. Historical PPKN counts partially overturned judgments as upheld; departure from the rule made visible. See psykiatrisk-tvang-udfald-2006-2025.md/.json. Outstanding: complete central appeal originals 2006-2013, direction of every change, overall court outcomes and case/person deduplication between instances.

Document / registry tracks: The Board of Patient Complaints / Court of Justice.

H08 · Forced cessation and injury

Substantively expanded with duration set aside at first instance/on appeal, specific CPT safeguards and all 6 pages of Rigsrevisionen's C117/25. The full target table per100.000 and new 30% target for 2030 checked; the former halving target concerns a different population. Closed oversight is not documented cessation/redress. Outstanding: intervention/case-record ID→order/relief→actual cessation and unlawful subperiod→unique patient/age/disability→harm/compensation/payment; hospitals' contemporaneous intervention and medication logs. See psykiatri-opfoelgning-2025-tid-tvang-og-rettigheder2026.md and the coercion module.

Document / registry tracks: Regions / Board / Patienterstatningen.

H09 · Accidental events 2006-2025

All 20 years have source-checked figures with different selections/versions. New original-year checking for 2007 and 2012:19 table/figure extracts/128 reader-table rows/59 factual rows. 2007 statistics/methodology/the full regional appendix checked in the 67-page original;2012Part 1 all 18 pages. 2007 primary 20368/secondary 19217/SAC3 353/summary58;2012 created 155791/completed 125870 versus sector average 106193. Internal discrepancies retained; no annual sum. Separate annual originals for 2009/2013 remain unobtained after documented primary-archive checks; no assertion of non-publication. Remaining tasks concern local 2014/15 contributions and old graphs without exact data cells. Deduplication of people, employment status and specific compliance/accountability require independent evidence. No inquiry has been sent. New DPSD12L/DPSD12D2:the learning appendix's complete 12 pages actually read as text;Part 2 PDF1-389; all substantive answer fields read,contact blocks/repetitive questions omitted from the RAM display from PDF55. PDF384 actually checked visually in RAM; no original files or images saved. 531 compact factual rows. See dpsd2012-del2-og-laeringsbilag.md/.json. Regional/hospital/cross-sector-analysis/private contributions overlap; no summed count of unique people/unlawfulness/employment. Part 2 and the learning appendix are now fully substantively read; other local 2014/15 contributions remain separate original-source tasks, rather than merely person-linkage tasks.

Document / registry tracks: Agency for Patient Safety / Health Quality Institute.

H10 · Child psychiatry by RR

Substantively completed for public follow-up C121/25:all 13 pages read, figures 1-2/table 1 checked visually.14 printed quarterly cells 2023K4-2025K2,75 processes=15 per region;72 capacity-delayed,45/71 informed,26 uninformed+one letter not located. Both original pages of Act 1762/2025 checked, new right/transition clarified. Outstanding: exact regional curve cells, figure 1 data-footnote explanation of 15.9.2024 versus 2025K2, national annual person union and actual treatment/parental loss/reparation. Register routes specified; no request sent. See psykiatri-opfoelgning-2025-tid-tvang-og-rettigheder2026.md.

Document / registry tracks: Regions / Rigsrevisionen.

G01 · Data Protection 2006- 2025

Original controlled 2006-17 in dissemination module as well as 2018- 25 in Data Protection -2018- 2025-extension.md / .json: 320 figures, 16 defined supervisory groups, 19 public fines, 3 appeals, 11 court documents date / operational outcome. Rest is concrete register: all completed public / private criticism / injunction / injunction, persons, actual compliance / payment; committee ≠ nationalalkorte; 2018 reform + version breach and RHbride separated. The road date of judgment not disclosed in follow-up.

Document / registry tracks: The Data Protection Agency.

G02 · GDPR public / private all years

Historical public participation 2006-2017 completed: state, county / region, municipality, permissions and miscellaneous; 2006-2010 public / private security cases. These are control records and not affected persons. Remaining: 2018- 2025 all government breaches, government types and data subjects per event, including personal dedup. See Data Protection -2006-2017-tal.json.

Document / registry tracks: The Data Protection Agency.

G03 · GDPR effective sanctions

Partly substantively completed: all 19 public authority/matter entries in the Data Protection Authority's published selection of fines followed to associated follow-up;11 judgment documents' dates/operative outcomes checked, other outcomes through fixed-penalty notices or open/undated. See datatilsyn-2018-2025-udvidelse.md/.json. The Region of Southern Denmark's two matters have a single shared judgment/fine; appeal retained. Outstanding: a complete national criminal-case register, final appeal outcomes, personal employee responsibility and actual compliance/redress.

Document / registry tracks: Data Protection Agency / Public Prosecutor / Courts.

R01 · Rigsrevisionen full list

Materially completed for the 2006-2023 main conclusions, ministerial columns, annual distributions and follow-up annexes; 2018@-@ 2023 both annual originals and 2021-2023 complete theme atoms. See National Audit Years -Historisk.md / json and rr-concrete-consequences- and -tables.md / json. 2024 / 25 annual originals and 20.11.2025 follow-up controlled in own modules. The 17 previous residue tables 2018T2-6 / T10,2019T2-4 / T7,2020T2-6,2021T1-2 are now textual / visually controlled: 86 rows / 165 numerical cells in the National Audit -2018- 2021-remaining -annual tables .md / .json. New report 11 / 2025 published 9.4.2026: all 54 pages + 4 pages of ministerial statement + 7 pages of note read, 80 factual rows and 84 municipal annexes; government audit posts 2026.md / json. Catalogue 796 entries since 2000 including 2026 are metadata, non-material controls. Concrete residues: other individual criticism / method figures 2006-17 and remaining special reports / opf. No error sum / person union; later effective termination / payment dates require separate notes / register coupling.

Document / registry tracks: Rigsrevisionen / State auditors.

R02 · Municipal supervision Table C 2024

Original substantively/visually examined: tableC adults rejected 2024=191, total 202 and examined 101; figure 5 rejected 270 versus 169 children+191 adults. No concealed cell correction. See daekning.md, original 18/2024, physicalPDF 44/printed 37. The documented source discrepancy is established as actually printed, but correction/raw data and the correct alternative cell value remain missing from Rigsrevisionen/Ankestyrelsen.

Document / registry tracks: Ankestyrelsen / Rigsrevisionen.

R03 · Monitoring and responsibility

Partly substantively completed:18/2024 examines 1669 supervisory cases, excludes 154; four powers unused, response/follow-up have separate denominators of 545/498. Disability follow-up 2026 checked against originals with completed initiative tracks, continuing missing application/decision data and no documented direct effect. See daekning.md; handicap-tilsyn-opfoelgning-2026.md. Outstanding: other sanctions/litigation and person-linked actual compliance; closed oversight is not redress.

Document / registry tracks: Ankestyrelsen / municipalities / Rigsrevisionen.

S01 · Tax office 2006-2025

Substantively expanded: all 12 original 2014-2025 outcome tables for five appeal bodies; 129099 closures/35759 wholly-partly favourable findings are decision entries. Historical 20 tables 86 rows supplemented by LSRH11/12:26 tables 154 rows with administrative 2009-2012 percentage matrices/exact N and complete 2009/2010 court outcomes. LSR06O:31 tables 146 rows, administrative 2006 groups, all relevant court outcomes, actual 11,6/corrected 10,7 months; upheld includes closures with potentially actual favourable findings. Our 55/283 outcomes favourable to individuals in 2006 litigation, including 18 by judgment, are not 55 judgments finding illegality. A specific primary-access investigation for 2007/2008/2013 is documented with 12 access results; no sought original outcome document recovered. Outstanding: administrative 2007/2008/2013 matrices; exact historical cell counts, remittal codes and hidden favourable findings; court outcomes 2007/2008; separate compensation outcomes 2006-08/2011-12; own-year originals 2009/2010 as independent versions. Union of people, actual repayment/interest/loss and individual responsibility require process linkage. FXTAX01/02 clarifies Article 6 by tax claim/sanction; no percentage back-calculation or cross-population sum. The new 31-page 2007 interim original LSRLEAN07 has been read in full as text in RAM, and PDF9/26/28/29 checked visually:5×3 backlog cells, 25 targets and 32 deadline/function rows. The minister acknowledges budget prioritisation and increasing time; the terms of reference require safeguards to be preserved. Planned written voting in the absence of a reply is not documented actual refusal of a hearing. Backlog/full-time equivalents/targets must not be counted as outcomes/people. See landsskatteretten2007-ledelsesviden-liggetid-og-procesplan.md/.json.

Document / registry tracks: Tax Appeals Board / National Tax Court.

S02 · Tax actual loss and liability

Outcomes and processing times 2014-2025 substantively checked in skatteklager-udfald-og-tid-2014-2025.md/.json. This does not close the separate loss/responsibility track: case-linked repayment/interest, consequences of debt collection, compensation and personnel responses remain missing; no national zero value or union of persons can be inferred from findings in parties' favour. New primary-source check of FOB 2007.525:40 cases closed in 2004, knowledge/response 2006-07; all 34 time-distribution rows and 4 expectation rows; final 15 criticisms of delay against provisional 16, as well as visible breaches of safeguards and the Ministry's undocumented premise that absence of lawsuits proves correctness. The 2004 events are not counted as new 2006-25 errors; specific reopenings/payment/responsibility remain missing. See landsskatteretten-2007-garantier-og-tidskritik.md. A new 31-page 2007 original midterm document LSRLEAN07 fully read as text in RAM and PDF9/26/28/29 visually checked:5×3 pending-case cells,25 targets and 32 deadline/function rows. The Minister acknowledges budget prioritisation and increasing time; the terms of reference require safeguards to be maintained. Planned written voting in the absence of a response is not documented actual refusal of an oral hearing. Pending cases/full-time equivalents/targets must not be counted as outcomes/persons. See landsskatteretten2007-ledelsesviden-liggetid-og-procesplan.md/.json.

Document / registry tracks: Tax administration / Attorney General / Courts.

U01 · Aliens 2006-2025

Partly completed: the Refugee Appeals Board's full 20 years of original core, spontaneous-asylum, reopening-request and time rows, and Dublin 2014-2025; the Immigration Appeals Board's 13 originals 2013-2025, exact outcomes 2013-2021, more recent rounded percentages. Outstanding: other FLN complaint types/children across 20 years, overall without-decision data from 2022, full union of persons, predecessors' immigration-appeal outcomes before 2013; actual residence/return and responsibility. 2021 reopening requests have a published total of 194 against a category sum of 205. See flygtningenaevn-udfald-og-personer-2006-2025.md and udlaendingenaevn-udfald-og-tid-2013-2025.md.

Document / registry tracks: Udlændingenævnet / The Refugee Board.

U02 · Foreigners actual intervention time

Partial substantive population: national board processing times in udlaendingenaevn-udfald-og-tid-2013-2025.md and flygtningenaevn-udfald-og-personer-2006-2025.md; specific reopening/return/residence links in UN A.H., Domina/Bendtsen and F.K., and statelessness/Court of Impeachment/GreenDesert sequences. Remaining: complete person-linked intervention/separation time and actual implementation for the entire national population; board processing time is not actual separation time.

Document / registry tracks: Udlændingestyrelsen / Home Travel Agency / Police.

N01 · Justice and detention

Substantively checked: DSK 2020-2025 and historical research 2013-2019 separately from the original series;Director of Public Prosecutions 2025 all 22 tables/317 rows and 2024. Solitary-confinement originals 2006-2023 and 2024:62 numeric tables/676 rows;19 child occurrences 2006-2017,rather than 19 unique children;2019 15 periods/13 people. LV 2006-2017 and 2020-2023 relevant originals with versions/methods;2008 revision and child remand 2008-2010 separately. LV reader appendix 109 tables/1079 numeric data rows;2019 statement's 4 original Folketing HTML pages actually read,including 16 omitted submissions;the appendix's 32 segments/371 rows separately marked as transcription checking.LV 2018 original's 8+15 pages have now been fully checked for content with 30 annual-version tables/363 rows;44 children in the letter versus 42 in tables are retained,and 1328 lengthy cases versus 1326 duration/outcome rows kept distinct. Only the LV 2019 appendix's 16 original PDF pages remain a specific acquisition task;the labelled secondary transcription does not replace original checking. Data before/after the 2021 methodological break must not be added uncritically. Under-15 series 2016-2023 and all legal findings 2021-2023;three original compensation case histories,actual partial payments and precise remaining tasks. 2025 liberty data,historical Klageretten originals,national person linkage and compensation/payment series remain missing.

Document / registry tracks: Court of Justice / Special Complaints Court / Attorney General.

N02 · Criminal services

Substantively checked: KF 2015/2023/2024 selected intervention, disciplinary, death/suicide and court tables actually read,45 tables/598 numerical-data rows with historical 2006-2024 cells, original footnotes and denominator/version discrepancies. Discipline concerns prisoners. The 2020 court methodology changes to final outcomes at each instance;2024 closed 141, status sum 148 retained. Handcuffs 2022 reporting scope, voluntary exclusion, restraints, death revisions and the 2024PBN transition examined. REU1157/2025 original,all 4 pages, documents no consolidated national UTH register; Øst does not retain reports after handling, Vest 38 manually counted for 1.4.24-1.6.25. Datatilsynet's 10.7.25 decision actually read;2026 follow-up is a plan, not a proved effect. Outstanding: all other annual originals/subtables, complaint cases/supervisory follow-up,2025 series, case/person/time/payment linkage and full legal scrutiny of each intervention. See kriminalforsorg-indgreb-proevelse-og-sundhedsblindhed.md and kriminalforsorg-originale-tabeller.md.

Document / registry tracks: The Department of Criminal Affairs / Ombudsman.

N03 · Equal treatment

Partly completed: original 2019-2025 name outcomes visually verified, newer historical departure rows back to 2018, source conflicts and concrete SA / CERD knowledge chain. Remains: original 2009- 2018 full denominators and predecessors 2006- 2008, all years of public / private division, unique persons, court order and actual payment. See equaltreatment- fallout -reductionandrestation.md / .json.

Document / registry tracks: Ligebehandlingsnævnet / the courts.

N04 · Environment, industry and other bodies

Partially populated: nine Nævnenes Hus originals 2017-2025, the NMKN original 2016 and Plan originals 2022-2024 with historical flows 2019-2024; time and sample differences, and all three Plan outcome figures visually verified. Remaining: original environment/nature/NMKN 2006-2015, annual outcomes separated by environment/planning 2017-2025, other business boards, people and actual redress. NH totals are not solely environmental cases. See miljoe-plan-udfald-tid-og-afgraensning.md/.json.

Document / registry tracks: Name's House / Business Authority.

N05 · Defence and intelligence

Partly completed: TET 34 originals and 651 factorial rows, all material control / follow-up / indirect inspection / time sections. Categories overlap and are not persons. Residues: control ID and natural / legal person, action start / finding / cessation / deletion, PET / FE / PNRs overlap and Wamberg 2006-2013registry. No request sent.

Document / registry tracks: Ministry of Defence / TET / FE / PET / Danish Parliament.

A01 · Ministerial and service responsibilities

Commission/accountability chains substantively checked: instruction case/impeachment, Tibet, statelessness, mink, Greenland interventions and the legally delimited 2026 section 16 exemption; disciplinary personnel responses and closed/amended cases separately. Specific commission findings/volumes/locators are reproduced in individual modules. A complete national catalogue of every ministerial/disciplinary accountability case and non-public final personnel decision remains a specific outstanding task; no general immunity is concluded. Specific protection from sanctions for adverse-incident reporting has been checked against originals:2003 section 6/2008 section 201,2011 guidance,the complete 2020 Act 1855 of 4 pages extending protection to those involved from 1.1.2021,2025 sections 200-202 and 406,the complete 2 pages. Protection arises from reporting, rather than general immunity for conduct; private hospitals are also covered. See sundhedsrapportering-sanktionsbeskyttelse-og-ansvar.md.

Document / registry tracks: Parliament / Ministries / Commissions.

A02 · Public / private liability comparison

Substantively completed legal matrix and specific time/action comparisons: §§ 155-157/261/215/260, ministerial responsibility, ECHR responsibility and damages each have their own conditions. A public employee in a private role, family removal, unjustified arrest, a private taxi driver's acquittal on grounds of self-defence and a specific public/disciplinary sanction are compared in the discipline module. Statutory sentencing ranges for private persons are not sentences actually imposed in an unknown case. Administrative invalidity/errors concerning legal authority and criminal abduction each require their own body of evidence. Individual comparable judgments and all elements of culpability/action must be produced before further personal responsibility is established. Three original judgments concerning private persons from 2017 now actually read: the same single case concerning a mother/maternal grandmother and one child, both acquitted under § 215; the prosecutor's requested sentence of 2-3 months is not a sentence imposed. The judgments delimit parental responsibility/dispute/residence and proof of knowledge. The ECLI publication year 2022 is not the judgment year 2017; the contact/return sequences in testimony are not independently verified logs. See privat-boernebortfoerelse-originaldom-og-anklage.md. Now the 2022 original private-person judgment document AM 2022.06.16V, all 6 pages read:37 d between dates→40 d suspended/60 h community service, the other defendant acquitted. The reproduced family-law reasoning criticises the initial basis but upholds it with reference to subsequent stay/time; the full separate family-law file/original evidence is required. See privat-unddragelse-2022-straf-tid-og-myndighedspraemisser.md. UTH protection and the scope shared by public/private actors, independent other evidence and the period of responsibility have now been examined in a separate module with 6 primary legal sources. The protection against sanctions must be included specifically and must not be extended to general permission for unlawful family separation.

Document / registry tracks: Court / Public Prosecutor / Personnel Administration.

A03 · Green Desert primary certificates

Materially controlled Green Desert: full Supreme Court judgment 35 pages and identified EMDtesting; separate knowledge, transfer, damage and evidence chain. The 2004 operation is historical; the subsequent 2006-2025 review is part of the period. The evidence, evidence, grounds and the state's well-known denied liability shall be parted. All simultaneous operational orders and individual injury / transfer documents not published / provided in this report; actual original documentation requirements in green-deserts proof-time and liability.

Document / registry tracks: Ministry of Defence / Courts.

I01 · UN Treaty Committees

Lists completed and checked against originals: 20 periodic observations, 265 individual decision documents/263 communication numbers in 2006-2025 and five in 2026. 57 favourable opinions on the merits, a separate CAT Article 22 violation in a rejected case; mixed CCPR rejection/partial discontinuance separately. Outstanding: all State replies and actually updated follow-up for each favourable case, a full union of individuals and three date/version points. See fn-kontrolkatalog-udvidet.md and fn-individuelle-klagesager.md.

Document / registry tracks: OHCHR / relevant Danish ministries.

I02 · UPR

2011 / 2016 / 2021: 620 numbered recommendations and acceptance / version checks. 2026 feather cycle: all 26 + 21 + 10 + 10 = 67 pages in A / HRC / 63 / 10 and WG.6 / 52 / DNK / 1-3 actual RAM read; 265 numbers comment.174 supported + 91 recorded are verified in FNautomatic meeting printout 25.9.2026, explicitly not official protocol or individual written response. A / HRC / 63 / 10 / Add 1 continued not to be provided after 6 tested routes; no artificially recommended acceptance mapping. Actual compliance / personal effect requires separate evidence. See uppr2026 -full -originals -and -afterlife-given.md / .json.

Document / registry tracks: OHCHR / Ministry of Foreign Affairs.

I03 · CPT

Complete visit/reply list: six visits/reports and seven State replies in 2006-2025. CPT/Inf(2013)11 now read fully and visually in the original:31 pages,31 paragraphs answered and 30 numerical/time rows;2010/11 disciplinary corrections,2012 complaint/duration counts and specific health/contact-data deficiencies. Outstanding: other replies beyond sections actually read, the original URL for the 2020 partial reply, full actual compliance, individual cases/person deduplication and redress. See cpt-kontrolkatalog-udvidet.md and cpt-2013-dansk-svar-fuld-originalkontrol.md.

Document / registry tracks: CPT / Ministry of Justice of the Council of Europe.

I04 · EMD full case register

All 59 English judgment records and 110 English decisions in the public HUDOC register checked against originals; finality, 57 judgment-case groups, 24 final violation cases and 16 closed/eight open executions as of 7.10.2026. All 11 distinct closure resolutions checked against originals for date. Decisions cover 136 application numbers and at least 846 person occurrences before overlap. Outstanding: anonymised cross-case union of individuals and full actual individual redress in every case; unpublished single-judge rejections have no public person register. See hudoc-beslutnings-og-personregnskab.md and emd-fuldbyrdelse-regnskab.md.

Document / registry tracks: HUDOC / Committee of Ministers.

I05 · EMD non-distributed complaints

20 years of legally allocated / communicated / refused- deleted / sentenced complaints are originally controlled in the subject-complaints -2006- 2025.md / .json; 2006 the original has also 108 submitted. The rest is concrete: all pending and administrative non-compliance with Danish country code 2006-2025. No fully published country series is established; requires EMDRegister extraction. The difference between administered and distributed from different cohorts must not be assumed to be the counter.

Document / registry tracks: EMD Registry.

Z01 · 2026 separate status

Partly substantively completed with separate 2026 events and 2025 publications: UN5 part-year decisions, ECtHR finality, disability follow-up, Greenland reparation/law, FEII expected 2028, stateless persons Supreme Court, current municipal/monthly and health-register versions. See module dates and introduction. Outstanding: full inventory and content check of all relevant part-year publications as at7. October 2026; no full 2026 year constructed, and a 2026 publication concerning 2025 is not counted as a new 2026 event.

Document / registry tracks: Each registry authority.

Z02 · Overlap cards and national union

Partial substantive overlap check: ECtHR59 records→57 sequences and 63 application numbers; UN265 documents→263 communication numbers, F.K. person union locally; regional/national retrospectives, case/partial decision and repeated review/payment phases kept separate. Senior pension 2024 formal-error/overturning union of 338 is documented. Remaining: common case/person keys across all sectors/years, period-unique children/parents/employees and a national error/injured-person union. Partial unions yield no national total.

Document / registry tracks: Each registry authority / Statistics Denmark.

K08 · Practice surveys of the Regional Board before 2013

Partial substantive review: Beskæftigelsesankenævnet Midtjylland social-assistance cessations 2012,17 main tables and 42 municipal rows with all published figures.80 cases,76 hypothetical alterations/remittals,4 correct; already appealed and previously examined cases excluded. Original table discrepancies and a destruction plan documented. See regionale-naevn-midtjylland-kontanthjaelp2012.md/.json. Other available regional originals still require processing; a complete historical register and actual repayment are separate data needs.

Document / registry tracks: Ankestyrelsen / formerly State Administration / National Archives.

N06 □ The Youth Crime Board

Partly substantively completed: all seven annual reports 2019-2025 read for entries, principal/new decisions, appeal outcomes, deadlines, duration, specific return home and errors also in upheld cases. 358 appeal decisions, 88 wholly/partly amended/set aside; version discontinuities and denominators retained. See ungdomskriminalitetsnaevn-2019-2025.md/.json. Not published exactly in the sources read: 2019 re-entry, full court-outcome series, unique children/parents and appeal-linked actual return-home date. A precise case-record/person query is set out. Remaining original-source check: other detailed tables and the Youth Probation Service's independent supervision/responsibility sources.

Document/register trail: Court Administration / Youth Crime Board / Youth Probation Service.

Final cover audit: 59 areas and 43TaskForce programme

Updated October 7, 2026 against the finished material modules. This accounts closes completed reading tasks; it does not state that undelivered originals, unpublished raw cells or missing person / repair couplings are completed. An access error doesn't prove unpublished. Meta data recording does not prove content control.

Balanced original reading versions

K04: Placing 2006 / 2008 / 2009, involvement 2011 and relocation / return 2011 are now reviewed throughout the known originals: 63 + 73 + 94 + 107 + 65 pages. The published cohorts 101 / 143 / 125 / 121 / 81 are kept separately; no collective union is formed. AS 2010 is a further 56 pages / 18 tables / 325 rows; 2007 / 2008 effectuations 3693 / 3502 and 3253 stoppages including 18 years are precisely delimited. UPR 2026 s four basic originals are fully read 67 pages; written reply / Add 1 is not provided separately. DPSD2012Part 2 all 389 pages material response fields and 12 pages are reviewed: 531 factorial rows, not a new personal cohort.

TaskForce:28 of 43 central trajectories have at least one checked analysis/status original;15 have no such original obtained. Five other schemes are separate. Checking a final report does not automatically resolve a missing baseline or actual redress for citizens. All current phase statuses and routes tested are in taskforce-daekningsafstemning.md/.json.

Current control and residue of the 59 areas

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
K01	Municipal complaints 2006-2016	An exact national full-year outcome cell for 2013 does not appear in the three transition documents now checked against originals; a data/register query is required.	Substantively checked: national 2006/2012 originals, all 43 pages/13 tables/262 rows;2006 social appeals boards with 28043 closed/24915 merits/6393 overturnings,2012 SN/BAN35496/32066/8202.2006 percentage denominator is all closures; from 2007 merits cases.2007-2011 national boards and 2014-2016 portal version checked separately. Local 2006 legislative subset 9417 overlaps the national report and is not an additional national population;819/818 and integration 6/5 retained. The national 2013 transition row and person/reconsideration/effect linkage are still missing. The official archive overview labelled 2013 does not link a2013 outcome table; this does not prove that data never existed. New actual 2013 original verification: scanned SFV13H20 pages, read 1-8/15/19-20, and SFV13A29 pages, read 1-13/25-29, contain 16.780 first-half-year decisions=7.696BAN+9.084SN; all 27 case-area/subtotal rows with regional cells reproduced. AS13A34 pages, read 1-20, states approximately 11.000 municipal appeals, a rounded figure rather than exact annual outcomes. The first-half-year count gap is closed; complete four-outcome 2013 data, transferred file keys/second instance/people/effects remain outstanding. See ankestatistik-2013-overgang-originale-maal-og-naevnere.md/.json.	Personal / re-assessment training and actual performance
K02	Municipal complaints 2025	No residue in 26 groups published 2025 portal outcomes	Filled for the 26 eligible municipal law groups: 2025 reality 22927, city 15505, modified 1767, home 5655, rejected 2755. Disposal / re-evaluation / persons are not covered; primary portal + compact JSON in municipal module.	Reconsideration, individuals and actual redress
K03	Local authority re-evaluation	National re-assessment series and local full register missing. Copenhagen 2014 known 8 pages annexes are reviewed; exact raw outcome matrix is not printed in the read annex. UDK 2021 now all 90 pages reviewed.	Partial substantive check: Varde 2023/Q1 2024; Copenhagen Social Services 2009-2014 and BIF 2023-2024; UDK 2021 before/after check; AS 2026 workflows separately. National reconsideration series and a full local publication register are missing. Overlap and specific data requests: g envurdering-og-klagepopulationer.md/.jso n. Now FOB inspection 2006 original sections 4.2.4-4.2.5 read at physical pages 68-74:18/40 missed deadlines,9/25 social services and 9/15BIF; at least 8 missing notifications overlap with missed deadlines. Other waiting times deducted; an earlier oral appeal not recorded and resetting of internal receipt treated separately. See the 2006 annex module. Supplemented by koeben havn-klager2014-fuldt-bilag-og-udfaldsgr ænser.md/.json:2256 considered on the merits+598 on procedural grounds;642/584 conflicts with 598 and 6,9%;only table 7 provides 12 exact annual figures.	Municipal reassessment log, complaint ID and subsequent progress

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
K04	Practical examinations 2006-2025	None of the 21 specific entries of the original reading / sub-table remains are now unread; all are completed in k 04-diff-original restregister.md / .js on. BarnetsReform 2012 main report / care flight 2014 Part 3 and FKU 2012 named attachments are not obtained after precise search / archive / access attempts. Unknown national raw cells and individual repair couplings are separate data requirements.	Five historical originals now fully read as text: placement 2006 all 63 pages/32 tables 174 rows;2008 all 73 pages/44 tables 265 rows;2009 all 94 pages/41 tables+2 methodology blocks 263 rows; participation 2011 all 107 pages/31 main tables+4 municipal annexes+3 figure/prose blocks 224 rows; relocation/return home 2011 all 65 pages/28 tables+1 figure,120 factual rows and 23 local example IDs. The same earlier 101/143/125/121/81 cohorts, no additional error total. Local case-ID deduplication 32/38/38/45/23 is not a union of persons across reports. Further completed originals: UDK 2021 all 90 pages/15 tables 91 rows/16 case codes;rehabilitation 2014 all 112 pages/31 main+2 municipal tables and 7 figures=40 blocks 201 rows/18 case codes;day club 2025 all 58 pages/9 blocks 78 rows;work placement 2014 all 103 pages/32 tables+8 figure/methodology blocks 185 rows/16 case codes;sanctions 2016 all 142 pages/30 tables+7 figures/47 case codes. Assets 2014 and flex jobs 2010:previous specific municipal/subtable gaps supplemented without claiming all earlier prose/rule pages fully read. Submission/exclusion/already-appealed, raw missing cells and actual redress are independent data requirements. The later combined 21-row list is now completed:flex jobs 2006, psychiatric pension 2007, sanctions 2015, reassessment 2015, assessment of young people’s eligibility 2015, pension 2015, few hours 2016, pension without 2019, BPA 2023, origin 2023, lost earnings 2022, main+annex,company work placements 2022, main+annex,contact 2016, force 2018, additional expenses 2014, sickness benefits 2016, dementia 2015 and sanctions 2024, main+annex. PEN06 all 59 pages supplemented with all 20 blocks 108 rows. SAN17/22/23, other provider 2013, AES 2023, UDK 2022, contact 2020 and pension 2025 also completed in the named separate modules. Foster families 2014 parts 1/2/4+summary,all 108 pages/40 numbered tables/61 blocks 373 rows; FKU 2012 all 20 pages/22 tables+3 reconciliations 142 rows. Specific main originals not obtained:Child’s Reform 2012 and foster placement moves 2014 part 3 and FKU 2012 named annexes. Not automatically non-publication. Survey/family/interview/case-file-sample cohorts kept separate. Last specific retrieval: CDX wildcard ast.dk/publikationer/*barnets* and *plejefamilie* both returned 503; archive.org/wayback/available returned 429 for three guessed publication routes, which are not verified catalogue IDs, without repeated calls. The old	Dissorted / already-anketI D, overlap and actual new decision

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
			ask.dk / publications-overview redirected and webadgang gave 500; SL robots.txt / sitemap.xml gave 404. Targeted Folketing- searches 2012 / 2013 / 2014 and SLsearches on the Child's Reform / Moving did not find these main originals. None of the errors prove undisclosure. A separate 2013 family / network survey with 252 cases does not replace 120 / 12 or 57 / 20.	
K05	Children's Day Barometer and Practice Check	2019 pilot all 42 + 6 + 20 pages and power 2018 all 85 pages including 20 raster attachments are fully read. No specifically assigned readable original page has been left unread. Other unknown practice checks are further inventory / procurement sscopy.	Partial substantive verification: child case barometers 2020-2024 and the use-of-force practice check 2018 (46 interviews/7 municipalities; 96 participant occurrences, no error count). Pilot 2019 is now fully checked against the originals:42+6+20 pages,228 unappealed cases/12 municipalities,18 main figures divided into 19 denominator subsets/67 category rows,12 municipality methodology rows and 17 municipal figures/204 rows.115 family treatment+113 placements (4 compulsory);198 cases/248 checked notifications.70 assessment errors,64 deadline errors,99 interview errors,52 plan errors, each with its own denominator; no error/person union. Obtaining the 2019 originals is completed; exact submission/exclusion counts, the direction of two consultation changes and actual redress/person linkage remain missing. See boernesagsbarometer-pilot2019-originalk ontrol.md, -originale-tabeller.md and -originale-tal.json. The 2025 barometer is not in the current catalogue; the official 2026 plan describes the first new edition under the Child's Act. All published 2020-24 municipal annexes have now actually been read:2059 municipal rows in boernebarometer-kom munebilag-2020-2024.md. All case-type annexes 2021-24 actually read, retaining original denominator discrepancies. BB 2020: all 17 raster tables checked visually and registered. See the annual modules and boerneba rometer-pause-og-nye-kontroller.md. The complete practice-check inventory and other originals are missing. See boernesagsbarometre-2020- 2024.md/.json and praksistjek-magtanvend else-2018.md/.json. Use of force 2018: all 85 pages now actually reviewed, including visual review of raster annexes 66-85 and tablePDF63:5 blocks,67 rows in praksis-magt2018-fuld e-originaltal-og-erkendte-garantiprobleme r.md/.json.46 interviews/15 interviews with relatives are not national incidents/people; the original did not assess quality/legality.	Case/person deduplication and actual redress

K06	Task force children and disabilities	15 central course without provided analysis / status original. The names, phase and specific tested access tracks can be found in 43 votes; separate	Central 2024 directory: 43 courses / 42 municipal names; 28 with at least one materially controlled analysis / status original and 15 without	All selections/exclusions, person overlap, actual cess ation/reunification/responsi bility

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
		the absence of phase originals is also indicated.	obtained such an original following specific municipal/archive trails. These are not 28 fully completed courses. All currently obtained necessary main-text/annex originals in the named TaskForce modules have now been substantively reviewed, including KK 2020 all 48 pages, Odsherred 2023 all 44 pages and Sorø children 2024/2026 all 42+27 pages. Other schemes kept outside 43:LTK adults 80 pages;Egedal child disability 119 pages;Sorø adults 119 pages;Nordfyn adults 103 pages;Frederikssund adults 133 pages. The phases and specific procurement routes tried are recorded in taskforce-daekningsafstemning.md/.json. Initial/final originals not obtained must not be called unpublished solely because of access errors. Exclusion, union of persons and actual cessation/redress are separate register/file requirements;2026 final reports have not been redated to 2006-25.	
K07	A's own decisions are overruled	Remaining judicial / reopening outcome of historical annual originals	Substantively completed for selected court/oversight trajectories and AS 2019-2021 litigation denominators:3541 closed registrations at instances, not 3541 unique people or successful claims. The 2021 original table 2.12 has been read; it contains no outcome breakdown. Specific orders/relief, remittals and responsibility have been examined in the court, return-home and compensation modules. Outstanding: all 20 years of administrative case→court instance→outcome→actual reconsideration/payment/return home; judgments/judicial closures and individuals must be deduplicated. See the court section of module T01. New AS13A original table 7/PDF13:665 outcomes in favour of authorities among 704 judgments delivered in 2013, visually checked. Our difference of 39 represents other outcomes,not 39 unique people/full relief/unlawful placements. All 39 outcomes/judgment IDs/individuals and actual effects still require linkage.	Case-law of the Court of First Instance

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
T01	Complaint processing time 2006-2025	Past years time / free margins other than controlled cuts	Materially extended: Historical denominator time 2008- 2013 and the National Audit Control 2014- 2025; Original Annual Reports 2019 / 2021- 2025, Case Reports 2020- 2022 and Months 2025- 2026.14 original tables / 200 numerical dataer.13 → 30 weeks modified targets; 2025 ca 35; deadlines / recasting dates / exclusions and version deviations separately. Four 2014 citizen's programme, remitted penalty 97 dcomplaint → decision and 44 / 53 dstep differences to printed 8 / 5 weeks. Residues: original time / temptation of all previous years, complete	Individual rest time, municipal retreatment and actual losses

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
			reopening/person union and actual loss/redress; averages are not national error/citizen counts. See ankestyrelsen -tid-kontrolmaal-og-faktisk-beskyttelse.md and the time-reading annex. New AS13A/SFV13H/SF V13A original verification:19 time/service targets, regional 2013 targets/waiting/idle time and historical AS06-13 flow cells reproduced. AS13 table 9 excludes merger-related cases:18.607 under 12 months+1.262 over=19.869 against prose 21.347;parts 11.371+3.041+6.935 confirm 21.347. 94,1% must not represent the entire population. SFV13H unweighted 24,6BAN/23,6SN differs from AT02;versions retained. Exact inclusions/exclusions and actual redress for citizens remain outstanding. New 31-page 2007 interim original LSRLEAN07 read fully as RAM text and PDF9/26/28/29 visually checked:5×3 stock cells,25 targets and 32 deadline/function rows. The Minister acknowledges budget prioritisation and increasing time; the terms of reference require safeguards to be retained. Planned written voting in the absence of a reply is not documented actual denial of an oral hearing. Stocks/full-time equivalents/targets must not be counted as outcomes/people. See landsskatteretten200 7-ledelsesviden-liggetid-og-procesplan.m d/.json.	
T02	After remittal for reconsider ation back	Other published efficacy studies / annual originals not obtained	Partial: 2013 report on 2012 execution 131 adult cases + 202039 shipping cases. National annual cohorts and actual new outcomes are missing; see municipal complaints -expansion.md.	Remittal for reconsideration to new decision / payment / physical change
T03	Actual cessation and reunification	Specific non-delivered original logs / files in the case modules	Specific histories substantively checked: four families with actual return home and support/contact dates in boern-kontakt-fri hed-og-hjemgivelsesbeviser; procedural remittal/suspensive effect in hjemvisning-hjemgivelse-og-midlertidig-b eskyttelse without automatic actual return home. Suldrup: two children returned upon release according to the mother’s court testimony as reproduced; status conclusion 875 days later, early part-payments documented, final payment unknown. Three-year-old disabled child, 961 days to a favourable finding, actual access/payment unknown. National remittal→actual return-home/register linkage not published here; specific demand for contact/residence/benefit/payment logs.	Domestic remittal to actual return home/contact/payment

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
P01	Placing in place from 2006 to 2010	The 2006 start-up cell and audit / unit coupling are not established in the read historical section.	Partially populated:2007-2010 actually implemented placements of 0-17-year-olds in AS 2010 figure 1.1=3693/3502/3254/2864; current ANBIVS1 all ages 2011-25 fully extracted. BU20/21 decision populations 2006-17 checked separately. Remaining: original 2006 implementations, unit/version linkage;	Individual implementation / decision coupling

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
			DST/AS historical register and revision dates. AS 2010 entire 56-page original now fully read:all 18 numbered tables/38 numerical blocks 325 rows in anbringelsesstatistik2010-origina le-tabeller.md/.json. Implementations 2007/08=3693/3502, not the reverse; versions/decisions/year-end kept separate.	
P02	Duration and return of employment	No published 2016-25 return-home/completed-duration dimension found in 44 table metadata records checked; research register extract required.	Partly completed: all reason rows for cessation in 2007-15 across three AS original versions;BIS66 duration 2006-09;BU25 changes 2014-18 and BU32 breakdowns 2013-16. Reasons may overlap;cessation at age 18 is not reunification. Outstanding: public cessation/duration aggregates for 2006 and 2016-25,actual returns home and interventions following errors. Register inquiry specified;none sent. New-publication check:44 relevant active/inactive table metadata sets and every dimension read among 5737 catalogue entries. Only BIS66 has duration status for 2006-09;BIS7 closures 2001-05 predate the period;no published 2016-25 return-home/completed-duration dimension within scope. Research registers describe precisely cessation/move destination;data must be obtained there. See dst-offentlig-hjemgivelses-og-varighed sdaekning.md/.jsonmetadata. AS 2010,the complete 56-page original,has now been fully read.3253 cessations include 2280 at age 18 even with continuing aftercare,rather than 3253 returns home.69% same placement type=1079/1560 sibling groups,not a proportion of individuals or proof of the same physical location. Original total/percentage conflicts and recalculated aftercare are retained in the AS 2010 reader module.	2006 and 2016- 25 termination / duration extracts from research registers and errors to actual return
P03	Unique Malfu nctioning Children and Parents	No national publicly established source of error in the controlled tables	Method and source verification: national case errors → unique children / parent roles → effective reunification has not been published in the controlled tables. Determined 2011 bug cases and VIVE-return selection have been documented; no multiplication with population or two-parent-pr- child. Rest: unidentified complaint ID / decision ID → BU AH / BUAF → CPR / parent role and event dates at DST / AS / municipalities.	Afidentified complaint / determine lsse- / CPR / parentrelleforinging-

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
P04	Handicapvo ksne 2006-2025	Early other performance series and precise rejection population	Partly completed: HAND02A 2018- 2025 and unique NYT populations separately; HANDBIL 2011- 2025, 2010refusal, time and 2025 retreatment controlled. New original controls close the car authorisation 2006-2010: five AS-year-originals' concrete flow and allocation tables and the 2010 method read in RAM. Original	Discharge / error / disability / person coupling

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
			purchase series 2006-2009: 2.956/2.479/2.249/1.873; HB10 revised 2006-2010: 2.964/2.699/2.309/1.916/1.898. Retrospective reports for 2007 and HB08's printed 5.802 against our sum of 5.805 are retained. Board 2010: 382 + 66 excluded = 448 known decisions, not people. Awards, full/partial refusals, reconsideration and complaints have different denominators. Outstanding: other disability-benefit series for 2006-2017 and all refusals, unique documented victims of errors and effective redress 2006-2025. Register routes RA12705/12706 identified; individual data not extracted.	
P05	Handicapre gaster quality 2025	Fully published audit accounts not provided	Substantively reconciled:115.909 reproduced exactly as the HAND02A2025K4 sum of 23 benefits×9 age groups×3 sexes; recipients of multiple benefits overlap. NYT88.400 are unique recipients. Metadata on cells and missing Aarhus/Holstebro data documented. Outstanding: full revision account, missing municipal benefits and evidence of the effect on the unique-person total; DST data request specified.	DSTaudits and impact on unique person total
P06	Copenhagen 2019 information	Original correction tables / versions for Copenhagen 2019 not provided	Partly completed: DST's concrete Copenhagen 2019 variabel deficiencies, system shift 2020 and ongoing historical fixes source controlled. NYT version 13.600 / 2.624 against current 13.435 / 2.501 retained; 165 / 123 differences cannot be attributed to Copenhagen alone. Remaining: exact rows / extent / decryption of the deficiency and date / version of the post-correction at DST / Copenhagen; no source-based zero assumption.	DST / Copenhagen reporting and decoding logs
P07	Forced children	Additional detailed statutory originals under scheme	Partly completed: BU03A all legal bases 2006-10; ANB6 all four categories 2011-25 and ANBIVS4 start-up basis 2011-25; new / older encoding and automatic registry assumptions checked. The others are not optional and zeros prior to separate reporting are not absences. Residual: individual under-distribution SEL65 / 75 / 76, criminal law, UNKN / Aliens / BLs and actual simultaneous home decisions; the validity of the legal basis cannot be proved on the register label.	Contemporary / collective / emergency basis per child

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
O01	Encoding of the Ombudsma	All other basic FOB originals	Partially completed: 2006-2025 years series for completed file cases and criticism / recommendation / recommendation as well as specific FOB 2018- 26, Egely 2011 and FOB 2018- 33 with source, time and person delineation. See below. Md and boern-contact-freedom-and-return	Citizen / error / sanction / construction union

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
			ser.md. Rest: all basic originals, full critical encoding, persons and overlap with other complaint systems; no national personal union.	
O02	OPCAT and in stitutions	National OPCATT Visits Register and other Visits / Answers originals	Partial original coverage: specific Ombudsman investigations/Egely in boer n-kontakt-frihed-og-hjemgivelsesbeviser. md. The complete CPT/Inf(2013)11 original states Danish supervision in Nuuk in 1993/1999/2001/2006, September 2013 planned; over 1000 OPCAT-eligible institutions/~75 planned visits annually from 2013 and a Greenland NPM psychiatric visit in March 2012 under Act 8/2009§ 17. This is the State's contemporaneous information, not a complete national OPCAT register or substantive reading of the mentioned visit reports. Remaining: all 2006-2025 visits, findings, recommendations, actual follow-up and person overlap; CPT kept separate. See cpt -2013-dansk-svar-fuld-originalkontrol.md.	Monitoring of actual change of action / person / responsibility
D01	Police outage 2006-2025	All 20 disciplinary years are now registered; 2006 / 07KRIMcopies read 17 + 10 pages. Official binary identity is an authentication residue, not unread copies pages.	Substantively checked: all 20 years' police/DUP outcomes; disciplinary entry series 2006-2025 with 1.454 numbered summary entries, including 124 in 2006-07 and 1.330 in 2008-25. The recovered 2006-07 copies at KRIM have 17+10 pages, all read as text, four pages visually checked in memory; binary identity with the authority copy unverified,2007 categories reconciled with report 1507 printed p.97. Complaints about police operational decisions 2018-2020 with outcomes/categories/timing errors;2019 has 55 delays for which regret had already been expressed in addition to 18 new criticism cases. Other operational-decision years not completed; the public annual series ceased after 2020. Judgment/person/response linkage and actual redress require registers. See p oliti-disciplin-2006-2007-originalkontrol.m d and the other police/operational-decision modules.	Event / staff / DUP / d om / staff union
D02	Police unique employees	No official stable employee key for deduplication; 1.454 numbered summary items are not 1.454 employees.	Material tested in the Disciplinary Module: 1.454 numbered summary items 2006-2025 (124 in 2006-07 + 1.330 in 2008-25) and separate DUP / penalty outcomes, individual cases with one employee and multiple responses. The anonymisation of the summaries and the various entities hinder national employee union. Rest: stable anonymous employee key and event / case coupling between DUP, Public Prosecutor, Judgment and Staff Decision; dedup both within and between years. See p. Politietsdiscipline- and liability accounts.md, PD05 with penalty fine 3500 kr. + disciplinary 1000 kr. same employee; no two-person calculation. New 2006-07 originals show similar employees in different posts and multiple employees in one post; no union of employees. News reports 77 / 46 and suspensions 5 / 9 are separate counting units. See Police Discipline-2006- 200 7-original control.md.	Stable anonymous employee key, incidents and sanctions

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
D03	Police behind the flaws	Original final judgments / staff decisions in the coordinated summaries may require consultation; 20 years of summary content have been reviewed.	Substantive scrutiny findings: prolonged disciplinary proceedings, a two-year case on hold, several cases closed because of elapsed time; a cyclist with Parkinson's left>42 hours; a shared child removed by an officer acting privately through colleagues; a remand-compensation refusal later overturned by judgment;2018-2020 police actions involving unlawful handover of a car, unlawful collection of a child, reminders and delayed decisions. Identified summaries, responses and durations are reproduced. Full national follow-up on recurrence/payment/return home is missing; precise inquiries appear in the disciplinary/police-actions modules. A new 2006-07 module has 124 specific entry locators and four concrete evidence/force/child chains PDH01-04. The report's 55 selected criticism/regret cases exclude 3 known cases=58 known pool;31/38/69/31 percent are rounded rather than exact cells. A consolidated count of unique people/incidents/redress is still unpublished; copy authenticity and individual original judgments remain local evidential tasks.	Recurrence, effective payment / termination and execution of penalties
H01	Clinical trial consistent series	Original 2011 / 12 full-year documents not provided / read after documented ODA / official / archive tracks; no verified readable original stands as unread.	Substantively checked annual originals 2006-2010: exact processing denominators/findings in parties' favour/refusals, pharmaceutical classifications and amounts;77 tables 712 factual rows, all publication revisions retained. The 2009 original 6676/2298 changes in 2010 to 6733/2379;2007 internal 1488 vs 1495 acknowledged. Earlier 2006-25 register series and actual 2022 interest redress remain valid. Outstanding:2011 exact processing denominator, pharmaceuticals 2012, original 2011/2012 full-year documents and a common current revision. 2011/12ODA/official archive links found, but original figures not read; no denominator constructed from a rounded percentage.	Year / person coupling and actual payment
H02	Patient record public / private	The other years' full public / private outcomes are a registries / t assessment requirement; the 2006-10 extensions of the originals have been carried out.	Public/private hospital decisions 2006-2010 now substantively checked against originals;2006 five regions,20 tables,216 rows give public 1310 accepted/3755 decided and private 53/142.2007-10 coverage matrices, municipal schemes, specialist/tolerability rule and amounts scoped separately;2017/2021/2025 historical versions retained. Remaining: full public/private outcomes for all other years, organisational/individual responsibility linkage and person deduplication. Regional public financing of compensation for private harm is not public employment.	Public employment, organisational / individual error, personal union
ID	**Zone**	**Current outstanding documents / acquisition needs**	**Actual control and accuracy number limitations**	**Case / person / e required power coupling;**
H03	Special allowances	Remaining year-unique recognised patient populations require separate original / registry basis, not	Year-sunt notifiers 2006-11 (both areas) and 2013@-@ 17 (split areas) previously originally controlled. New 2006-10	Recognised patient, age / disability and complaint / cashing

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
		number decisions.	decision, child-example and amount matrices are not person counts;the 1996-2006 total of 21 findings in children’s favour must not be redated to the reporting period. Outstanding: annually/period-unique patients with recognised claims, age/disability, public/private and deduplication against complaints/appeals. Recalculation of 8744/8785 cases represents version layers; reopening/actual payment must be linked separately.	
H04	Health care 2006-2025	Original Critical Outcome 2007- 10 / 2013 / 2018- 19 not fully obtained; 2006 autostatistics 27 pages now actually controlled	Partly substantively completed: activity and specific time versions for 2006-2025;exact criticism denominators in selected originals 2011-2012/2014-2017;the 2020 original has percentages,2021-2025 precise current aggregate categories. The 2014 supplement has 122 factual rows with denominator exclusions and profession/site components. See sundhedsaar-serier.md;sundhed-restudfald-udvidelse.md. Outstanding: exact original adverse outcomes for 2007-2010/2013/2018-2019,public/private status,employee/patient deduplication and complete criminal follow-up. Current migration exclusions are not a complete historical series. New PKNA10:scanned 2010 annual report,21 pages,six selected pages actually read visually in memory,3 original tables with 16 rows+6 own version rows. Contemporaneous 09/10 receipts of 3416/4147 and decisions of 3098/4247 differ from later statistics of 3294/3910 and 3094/4221;both versions retained. This concerns production/time,rather than the missing adverse-outcome categories. PKS06 original 2006 statistics have now been read as text for all 27 pages/visually checked for 8 pages;36 reader tables/328 numeric rows,567 criticism+2 prosecution requests+1648 no criticism=2217 excluding psychiatric appeals,including appeals 590+2+1713=2305. No additional count of unique people. See patientklager2006-originalkontrol-og-naevnerkritik.md and patientklager2006-originale-tabeller.md. Expanded SDN11FT:official Folketing HTML containing 34 pages actually read;2011 outcomes 1721/629/86/1=2437,reopenings 100=75+1+4+11+9. No image/PDF visual certification. This is the board’s annual report;the separate 2011 annual statistics are not automatically closed. See disciplinarnaevn2011-originale-udfald-og-bevismangler.md/.json. The same 2437 criticism matrix had already been checked within a delimited scope in sundhedsaar-serier.md;the full 34-page text expands methodology/case/evidence checking and reopenings,rather than a new population.	Public / private employment, patient / handler dedup and penalty

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
H05	Public health / private	Other organisational / criminal registration originals	Partial material completed: place of treatment / complaint, 2014 trade / place / sub-decisions and 2021-2025 critical classes with separate denominators;	Recruitment status, STPS / criminal / patient coupling

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
			selected references and criminal follow-up in historical originals. See health yearsery.md; health-residual-extension.md. Rest: full public / private division of employment, unique therapists / patients and connection to STPS supervision / current criminal convictions.

Findings setting aside duration, formally unlawful approvals, mixed outcomes and 2024-2025 methodological discontinuities are registered. See psykiatrisk-tvang-udfald-20 06-2025.md/.json. Remaining: national/all regional first-instance outcomes 2006-2010, remaining detailed tables and unique patient/intervention linkage.	Unique patient / interventions to actual cessation / injury
H07	Court of Justice	Central anchor originals 2006-13	Partly substantively completed: separate appeals board annual originals 2014-2025 and 2013 inflow/time via A14, with parts/cases, revision conflicts and alterations not automatically benefiting patients. Historical PPKN counts partially overturned judgments as affirmed; rule breaches made visible. See ps ykiatrisk-tvang-udfald-2006-2025.md/.jso n. Outstanding: full central appeal originals 2006-2013, direction of every alteration, overall court outcomes and case/person deduplication across instances.	Cases / individuals between agencies and effective protection
H08	Forced termination and injury	Concrete action / medicine acts, not national annual table	Substantively expanded with adverse duration findings at first instance/on appeal, specific CPT safeguards and all 6 pages of Rigsrevisionen’s C117/25. The full target table per 100.000 and new 30%2030 target checked; the old halving target concerns a different population. Completed review is not documented cessation/redress. Outstanding: intervention/case-record ID→order/favourable finding→actual cessation and unlawful partial period→unique patient/age/disability→har m/compensation/payment; hospitals’ contemporaneous intervention and medication logs. See psykiatri-opfoelgning-2025-tid-tvang-og-rettigheder2026.md and the coercion module.	Action ID for unlawful period, damage, compensation / payment

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
H09	Accidental events 2006-2025	Own 2009 / 2013 annual originals have not been obtained after actual archive / access attempts. 2012Part 2 and learning annexes are materially fully read; other local 2014 / 15 contributions are not established as a full original series.	All 20 years have source-checked figures with different selections/versions. New own-year original verification 2007 and 2012:19 table/figure numerical extracts/128 reader-table rows/59 factual rows.2007 statistics/methodology/entire regional annex checked in the 67-page original;2012Part1 all 18 pages.2007 primary 20368/secondary 19217/SAC3 353/summary 58;2012 created	DPSDpersonunion, recruitment, concrete responsibility / effect

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
			155791/completed 125870 versus sector average 106193. Internal discrepancies retained; no annual sum. Separate annual originals for 2009/2013 remain unobtained after documented primary-archive checks; no assertion of non-publication. Remaining tasks concern local 2014/15 contributions and old graphs without exact data cells. Deduplication of people, employment status and specific compliance/accountability require independent evidence. No inquiry has been sent. New DPSD12L/DPSD12D2:the learning appendix's complete 12 pages actually read as text;Part 2 PDF1-389; all substantive answer fields read,contact blocks/repetitive questions omitted from the RAM display from PDF55. PDF384 actually checked visually in RAM; no original files or images saved. 531 compact factual rows. See dpsd2012-del2-og-laeringsbilag.md/.json. Regional/hospital/cross-sector-analysis/private contributions overlap; no summed count of unique people/unlawfulness/employment. Part 2 and the learning appendix are now fully substantively read; other local 2014/15 contributions remain separate original-source tasks, rather than merely person-linkage tasks.	
H10	Children's psychology by RR	Figure 1's underlying data / version explanation not provided	Substantively completed for public follow-up C121/25:all 13 pages read, figures 1-2/table 1 visually examined.14 printed quarterly cells 2023K4-2025K2,75 courses=15 per region;72 delayed due to capacity,45/71 informed,26 not informed+one letter not found. Act 1762/2025:both original pages checked, new right/transition clarified. Outstanding: exact regional curve cells, explanation of figure 1 data footnote 15.9.2024 vs 2025K2, national annual union of persons and actual treatment/parental loss/redress. Register trails specified; no request sent. See psykiatri-opfoelgn ing-2025-tid-tvang-og-rettigheder2026.md .	Patient history of actual treatment, parental loss / repair
G01	Data Protection Agency 2006-2025	Remaining national completed control / critical / impose registers	Original controlled 2006-17 in dissemination module as well as 2018-25 in datatilsyn n-2018- 2025-extension.md / .json: 320 figures, 16 defined supervisory groups, 19 public fines committee posts, 3 appeals, 11 court documents date / operational outcome. Rest is concrete register: all completed public / private criticism / injunction / injunction, persons, actual compliance / payment; committee ≠ nationalalkorte; 2018 reform + version breach and RHbride separated. The road date of judgment not disclosed in follow-up.	Personal dedup, actual compliance / penalty payment

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
G02	GDPR public / private all years	All public incident registries 2018-2025	Historical public participation 2006-2017 completed: state, county / region, municipality, permissions and miscellaneous; 2006-2010 security cases	Registered per event and period person union

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
			public / private. These are control records and not affected persons. Remaining: 2018- 2025 all government breaches, government types and data subjects per event, including personal dedup. See Data Protection -2006-2017-tal.json.	
G03	GDPR effective sanctions	Complete national criminal-case list and appeal originals not obtained	Partly substantively completed: all 19 public authority/matter entries in the Data Protection Authority's published selection of fines followed to associated follow-up;11 judgment documents' dates/operative outcomes checked, other outcomes through fixed-penalty notices or open/undated. See datatilsyn-2018-2025-udvidelse.md/.json. The Region of Southern Denmark's two matters have a single shared judgment/fine; appeal retained. Outstanding: a complete national criminal-case register, final appeal outcomes, personal employee responsibility and actual compliance/redress.	Final payment, employee responsibility and actual redress
R01	Rigsrevisione n complete inventory	Remaining special reports and follow-up originals; other individual criticism / methodology figures 2006-17	Materially completed for the 2006-2023 main conclusions, ministerial columns, annual distributions and follow-up annexes; 2018@-@ 2023 both annual originals and 2021-2023 complete theme atoms. See National Audit Years Historic.md / .json and rr-concreteConsequences and tables. 2024 / 25 annual originals and 20.11.2025 follow-up controlled in own modules. The 17 previous residue tables 2018 T2-6 / T10,2019T2-4 / T7,2020T2-6,2021T1 -2 are now textual / visually controlled: 86 rows / 165 numerical cells in the National Audit -2018- 2021-remaining -annual tables .md / .j son. New report 11 / 2025 published 9.4.2026: all 54 pages + 4 pages of ministerial statement + 7 pages of note read, 80 factual rows and 84 municipal annexes; government audit posts 2026.md / json. Catalogue 796 entries since 2000 including 2026 are metadata, non-material controls. Concrete residues: other individual criticism / method figures 2006-17 and remaining special reports / opf. No error sum / person union; later effective termination / payment dates require separate notes / register coupling.	Cases / persons and subsequent effective clearance / payment
R02	Municipal supervision Table C 2024	Rigsrevisionen's original correction/raw data not obtained	Original substantively/visually examined: tableC adults rejected 2024=191, total 202 and examined 101; figure 5 rejected 270 versus 169 children+191 adults. No concealed cell correction. See daekning.md, original 18/2024, physicalPDF 44/printed 37. The documented source discrepancy is established as actually printed, but correction/raw data and the correct alternative cell value remain missing from Rigsrevisionen/Ankestyrelsen.	Case ID and personal consequences (if any)

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
R03	Monitoring monitoring and responsibility	Other sanctions / judicial / follow-up originals	Partly substantively completed:18/2024 examines 1669 supervisory cases, excludes 154; four powers unused, response/follow-up have separate denominators of 545/498. Disability follow-up 2026 checked against originals with completed initiative tracks, continuing missing application/decision data and no documented direct effect. See daekning.md; handicap-tilsyn-opfoelgning-2026.md. Outstanding: other sanctions/litigation and person-linked actual compliance; closed oversight is not redress.	Municipality / error case for actual compliance and liability
S01	Tax Board, 2006-2025	Administrative 2007 / 2008 / 2013 and outcome 2007 / 2008 not obtained after documented tracks. The 2013 financial original is fully read and contains no administrative outcome matrix.	Substantively expanded:all 12 original outcome tables for 2014-2025 for five appeal bodies; 129099 closures/35759 findings wholly-partly in the party's favour are decision instances. The historical 20 tables with 86 rows are supplemented by LSRH11/12:26 tables with 154 rows containing administrative percentage matrices/exact N for 2009-2012 and complete court outcomes for 2009/2010. LSR06O:31 tables with 146 rows, administrative groups for 2006,all relevant court outcomes, actual 11,6/corrected 10,7 months; upholding includes closures with possible actual findings in the party's favour. Own count of 55/283 citizen-favourable court outcomes in 2006,including 18 by judgment, not 55 judgments establishing unlawfulness. Delimited primary-access investigation for 2007/2008/2013 documented with 12 access outcomes; none of the requested outcome originals recovered. Remaining gaps:administrative matrices for 2007/2008/2013; exact historical cell counts, remittal codes and hidden findings in the party's favour; court outcomes for 2007/2008; separate compensation outcomes for 2006-08/2011-12; original annual publications for 2009/2010 as independent versions. A union of persons, actual repayment/interest/loss and individual responsibility require linkage of courses. FXTAX01/02 specifies Article 6 according to tax claim/sanction; no back-calculation from percentages or cross-population sum. The new 31-page 2007 mid-term original LSRLEAN07 has been fully read as text in RAM and PDF9/26/28/29 visually checked:5×3 stock cells, 25 targets and 32 deadline/function rows. The Minister acknowledges budget prioritisation and increasing processing time; the terms of reference require safeguards to be retained. Planned voting in writing in the absence of a response is not documented actual denial of a hearing. Stocks/full-time equivalents/targets must not be counted as outcomes/persons. See landsskatteretten200 7-ledelsesviden-liggetid-og-procesplan.m d/.json. The LSR 2013 financial-year report, all 16 pages/623 web-text lines, has actually been read; no administrative outcome matrix in this file.	Exact cell/remittal counts, payment and person/responsibility linkage require register extracts

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
S02	Tax actual loss and liability	Concrete return / liability originals can be found without full register	Outcomes and processing times 2014-2025 substantively checked in skatteklager-udfald -og-tid-2014-2025.md/.json. This does not close the separate loss/responsibility track: case-linked repayment/interest, consequences of debt collection, compensation and personnel responses remain missing; no national zero value or union of persons can be inferred from findings in parties' favour. New primary-source check of FOB 2007.525:40 cases closed in 2004, knowledge/response 2006-07; all 34 time-distribution rows and 4 expectation rows; final 15 criticisms of delay against provisional 16, as well as visible breaches of safeguards and the Ministry's undocumented premise that absence of lawsuits proves correctness. The 2004 events are not counted as new 2006-25 errors; specific reopenings/payment/responsibility remain missing. See landsskatteretten-2007-garanti er-og-tidskritik.md. A new 31-page 2007 original midterm document LSRLEAN07 fully read as text in RAM and PDF9/26/28/29 visually checked:5×3 pending-case cells,25 targets and 32 deadline/function rows. The Minister acknowledges budget prioritisation and increasing time; the terms of reference require safeguards to be maintained. Planned written voting in the absence of a response is not documented actual refusal of an oral hearing. Pending cases/full-time equivalents/targets must not be counted as outcomes/persons. See landsskatteretten200 7-ledelsesviden-liggetid-og-procesplan.m d/.json.	Recovery, loss, compensation and staff reaction
U01	Foreigners 2006-2025	Previous sources before 2013 and remaining FLN complaints / children's tables	Partly completed: Flygtningenævnet's full 20 years of original core, spontaneous, reopening-request and time rows plus Dublin 2014-2025; Udlændingenævnet's 13 originals 2013-2025, exact outcomes 2013-2021 and more recent rounded percentages. Outstanding: other FLN complaint types/children over 20 years, overall closures without decision from 2022, a full union of individuals, predecessors' immigration-complaint outcomes before 2013; actual residence/return and responsibility. The 2021 reopening requests have a published total of 194 against a category sum of 205. See flygtningenaevn-udfald-og-personer-2 006-2025.md and udlaendingenaevn-udfal d-og-tid-2013-2025.md.	Personal union, actual residence / return and liability

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
U02	Foreigner e actual intervention time	Concurrent Individual Residence / Separation Acts	Partial substantive completion: national board processing times in udlaendingenae vn-udfald-og-tid-2013-2025.md and flygtnin genaevn-udfald-og-personer-2006-2025. md; specific reopening/return/residence steps in UN A.H., Domina/Bendtsen and F.K. and stateless persons/Court of Impeachment/GreenDesert courses. Outstanding: full person-linked intervention/separation time and actual	Personal segregation / exposure / reunification

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
			effectiveness for the whole national population; omnibus processing time is not actually separation time.	
N01	Court of Justice and Freedom	LV 2019 Annex's 16 originalPDFsider missing collection; Historical Complaints and 2025 originals of freedom	Substantively checked: DSK 2020-2025 and historical research 2013-2019 separately from the original series;Director of Public Prosecutions 2025 all 22 tables/317 rows and 2024. Solitary-confinement originals 2006-2023 and 2024:62 numeric tables/676 rows;19 child occurrences 2006-2017,rather than 19 unique children;2019 15 periods/13 people. LV 2006-2017 and 2020-2023 relevant originals with versions/methods;2008 revision and child remand 2008-2010 separately. LV reader appendix 109 tables/1079 numeric data rows;2019 statement’s 4 original Folketing HTML pages actually read,including 16 omitted submissions;the appendix’s 32 segments/371 rows separately marked as transcription checking.LV 2018 original’s 8+15 pages have now been fully checked for content with 30 annual-version tables/363 rows;44 children in the letter versus 42 in tables are retained,and 1328 lengthy cases versus 1326 duration/outcome rows kept distinct. Only the LV 2019 appendix’s 16 original PDF pages remain a specific acquisition task;the labelled secondary transcription does not replace original checking. Data before/after the 2021 methodological break must not be added uncritically. Under-15 series 2016-2023 and all legal findings 2021-2023;three original compensation case histories,actual partial payments and precise remaining tasks. 2025 liberty data,historical Klageretten originals,national person linkage and compensation/payment series remain missing.	National personal union, intervention time and compensation payment; 19 child deposits are not 19 unique children

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
N02	Crime scene.	Other KFår originals / sub-tables and 2025 series	Substantively checked: KF 2015/2023/2024 selected intervention, disciplinary, death/suicide and court tables actually read,45 tables/598 numerical-data rows with historical 2006-2024 cells, original footnotes and denominator/version discrepancies. Discipline concerns prisoners. The 2020 court methodology changes to final outcomes at each instance;2024 closed 141, status sum 148 retained. Handcuffs 2022 reporting scope, voluntary exclusion, restraints, death revisions and the 2024PBN transition examined. REU1157/2025 original,all 4 pages, documents no consolidated national UTH register; Øst does not retain reports after handling, Vest 38 manually counted for 1.4.24-1.6.25. Datatilsynet's 10.7.25 decision actually read;2026 follow-up is a plan, not a proved effect. Outstanding: all other annual originals/subtables, complaint cases/supervisory follow-up,2025 series, case/person/time/payment linkage and	Complaints/supervision to i ntervention/person/cessatio n/payment; UTH-register limitation specified

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
			full legal review of each action. See criminal protection -action-testing-and-health blindhed.md and criminal protection-original -tables.md.	
N03	Equal treatment	Name originals 2009- 18 and predecessors 2006- 08	Partly completed: original 2019-2025 name outcomes visually verified, newer historical departure rows back to 2018, source conflicts and concrete SA / CERD knowledge chain. Remains: original 2009-2018 full denominators and predecessors 2006- 2008, all years of public / private division, unique persons, court order and actual payment. Take a look at the treatment-outcome-limitation-and-geno treatment.md / .json.	Unique person, court order and actual payment
N04	Environment, industry and other bodies	Environment / Nature / NMKN 2006-15 and other original names	Partly completed: nine Nævnenes Hus originals 2017-2025, NMKN original 2016 and Plan originals 2022-2024 with historical flows 2019-2024; timing and sampling differences, all three Plan outcome figures visually verified. Outstanding: original environment/nature/NMKN 2006-2015, environmental/planning annual outcomes 2017-2025, other business appeals boards, individuals and actual redress. NH totals are not environmental cases alone. See mi ljoe-plan-udfald-tid-og-afgraensning.md/.j son.	People and actual change/redress
N05	Defence and intelligence	Wamberg 2006-2013 original register and other defence originals	Partly completed: TET 34 originals and 651 factorial rows, all material control / follow-up / indirect inspection / time sections. Categories overlap and are not persons. Residues: control ID and natural / legal person, action start / finding / cessation / deletion, PET / FE / PNRs overlap and Wamberg 2006-2013registry. No request sent.	Confidential control lists, personal dedup, cessation / deletion / replacement
A01	Ministerial and service r esponsibilitie s	Full national Commission / Liability Catalogue and other volumes / Decisions	Commission/accountability chains substantively checked: instruction case/impeachment, Tibet, statelessness, mink, Greenland interventions and the legally delimited 2026 section 16 exemption; disciplinary personnel responses and closed/amended cases separately. Specific commission findings/volumes/locators are reproduced in individual modules. A complete national catalogue of every ministerial/disciplinary accountability case and non-public final personnel decision remains a specific outstanding task; no general immunity is concluded. Specific protection from sanctions for adverse-incident reporting has been checked against originals:2003 section 6/2008 section 201,2011 guidance,the complete 2020 Act 1855 of 4 pages extending protection to those involved from 1.1.2021,2025 sections 200-202 and 406,the complete 2 pages. Protection arises from reporting, rather than general immunity for conduct; private hospitals are also covered. See sundhedsrapportering-sanktionsbeskyttelse-og-ansvar.md.	Non-public final personnel decisions / fault / reactor

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
A02	Public / private liability comparison	Separate family-law originals and contemporaneous annexes for comparison cases	Substantively completed legal matrix and specific comparisons of time/actions: sections 155-157/261/215/260, ministerial responsibility, ECHR responsibility and damages each have their own conditions. A public employee acting privately, removal from family, unauthorised arrest, a private taxi driver's acquittal on self-defence grounds and specific public/disciplinary sanctions are compared in the disciplinary module. Private sentencing ranges are not sentences actually imposed in an unknown case. Administrative invalidity/legal-authority errors and criminal abduction each require their own evidence. Comparable individual judgments and every element of culpability/conduct must be produced before further personal responsibility is established. Three private primary judgments from 2017 have now actually been read: the same single case involving mother/grandmother and one child, both acquitted under section 215; the prosecutor's sentencing request of 2-3 months was not a sentence imposed. The judgments delimit parental responsibility/dispute/residence and evidence of knowledge. The ECLI publication year 2022 is not the judgment year 2017; contact/return sequences in testimony are not independently verified logs. See privat-boernebortfoe relse-originaldom-og-anklage.md. Now the 2022 private original judgment record AM 2022.06.16V, all 6 pages read:37 days between dates→40 days suspended/60 hours of community service, second defendant acquitted. The reproduced family-court reasoning criticises the original basis but maintains the result with reference to later residence/time; the complete separate family-court record/original evidence is required. See privat-unddragelse-2022-straf-tid-og-myndighedspraemisser.md. UTH protection and its shared public/private scope, independent other evidence and accountability timing have now been examined in a separate module with 6 primary legal sources. Protection against sanctions must be specifically included and must not be extended into general permission for unlawful family separation.	Individual act / guilt / injury before actual crime comparison
A03	Green Desert primary certificates	Simultaneous operational orders and individual claims documents not provided	Materially controlled Green Desert: full Supreme Court judgment 35 pages and identified EMDtesting; separate knowledge, transfer, damage and evidence chain. The 2004 operation is historical; the subsequent 2006-2025 review is part of the period. The evidence, evidence, grounds and the state's well-known denied liability shall be parted. All simultaneous operational orders and individual injury / transfer documents not published / provided in this report; actual original documentation requirements in green-deserts proof-time and liability.	Transfer / knowledge / injury / person chain

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
I01	United Nations Treaty	Remaining State replies and follow-up documents for each favourable case	Records completed and original checked: 20 periodic observations, 265 individual decision documents / 263	Union of individuals across cases and actual redress

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
			communication numbers in 2006-2025 and five in 2026. 57 favourable opinions on the merits, a separate CAT Article 22 violation in a rejected case; mixed CCPR rejection/partial discontinuance separately. Outstanding: all State replies and actually updated follow-up for each favourable case, a full union of individuals and three date/version points. See fn-kontrolkatalog-udvidet.md and fn-individuelle-klagesager.md.	
I02	UPR	Written A / HRC / 63 / 10 / Add 1 not obtained after 6 routes; not they already read 4 basic originals.	2011 / 2016 / 2021: 620 numbered recommendations and acceptance / version checks. 2026 feather cycle: all 26 + 21 + 10 + 10 = 67 pages in A / HRC / 63 / 10 and WG.6 / 52 / DNK / 1-3 actual RAM read; 265 numbers comment.174 supported + 91 recorded are verified in FNautomatic meeting printout 25.9.2026, explicitly not official protocol or individual written response. A / HRC / 63 / 10 / Add 1 continued not to be provided after 6 tested routes; no artificially recommended acceptance mapping. Actual compliance / personal effect requires separate evidence. See uppr2026 full e-originals and afterlife.	Individual impact and enforcement evidence
I03	CPT	Other statsvar and 2020 delsvar's original URL	Complete visit/reply inventory: six visits/reports and seven State replies 2006-2025. CPT/Inf(2013)11 has now been read visually in full against the original:31 pages,31 answered paragraphs and 30 numerical/time rows;2010/11 disciplinary corrections,2012 complaint/duration figures and specific health/contact data gaps. Remaining: other replies beyond the sections actually read, the original URL of the 2020 partial reply, and full actual compliance, individual trajectories/person deduplication and redress. See cpt-kontrolkatalog-udvidet.md and cpt-2013-dansk-svar-fuld-originalkontrol.md.	Personal overlap and actual cessation / repair
I04	Full register of EMD	Non-public single judge rejections	All 59 English judgment documents and 110 English decisions in the public HUDOC register checked against originals; finality, 57 judgment-case groups, 24 final violation cases and 16 closed/eight open execution processes as at 7.10.2026. All 11 distinct final resolutions checked against originals for their dates. Decisions comprise 136 application numbers and at least 846 person occurrences before overlap. Outstanding: anonymised cross-case union of persons and full actual individual redress in every case; unpublished single-judge inadmissibility decisions have no public person register. See hudoc-beslutnings-og-personregnskab.md and emd-fuldbyrdelse-regnskab.md.	Anonymous personal union and actual individual repair

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
I05	EMD not allocated	No established full-country public series of applications / cancellations	20 years of legally distributed / communicated / of certain-deleted / convicted complaints are	EMDRegistration country code-out drag and personal case coupling

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
	complaints		original checked in emd-klager-2006-2025.md/.json;2006 original also has 108 applications lodged. The outstanding requirement is specific: all applications lodged and administrative removals before judicial allocation with Danish country code 2006-2025. No complete published country series has been established; an ECtHR Registry extract is required. The difference between lodged and allocated applications from different cohorts must not be assumed to be the removals count.	
Z01	2026 separate balance sheet	Other relevant 2026 interim publications not fully obtained	Partly substantively completed with separate 2026 events and 2025 publications: UN5 part-year decisions, ECtHR finality, disability follow-up, Greenland reparation/law, FEII expected 2028, stateless persons Supreme Court, current municipal/monthly and health-register versions. See module dates and introduction. Outstanding: full inventory and content check of all relevant part-year publications as at7. October 2026; no full 2026 year constructed, and a 2026 publication concerning 2025 is not counted as a new 2026 event.	Actual 2026 redress and individual trajectories
Z02	Overlap and national union	Not a new catalogue problem; delunions controlled	Partial substantive overlap check: ECtHR59 records→57 sequences and 63 application numbers; UN265 documents→263 communication numbers, F.K. person union locally; regional/national retrospectives, case/partial decision and repeated review/payment phases kept separate. Senior pension 2024 formal-error/overturning union of 338 is documented. Remaining: common case/person keys across all sectors/years, period-unique children/parents/employees and a national error/injured-person union. Partial unions yield no national total.	Cross-sector / Year / Person keys
K08	Regional Board's pre-2013 studies	Other regional practices originals and historical full registers	Partial substantive check: Employment Appeals Board for Central Denmark, cessation of cash assistance 2012,17 main tables and 42 municipal rows with all published figures.80 cases,76 hypothetical amendments/remittals for reconsideration,4 correct; cases already appealed and previously examined excluded. Original table discrepancies and shredding plan documented. See regionale-naevn-midtjyl land-kontanthjaelp2012.md/.json. Other available regional originals remain to be processed; the historical full register and actual repayment are separate data needs.	Hypothetical remittal for reconsideration to actual new decision / refund

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
N06	Youth education	Ungekriminalforsorgen's separate supervision/responsibility sources	Partially completed: all seven annual reports 2019-2025 read for entries, main / re decisions, outcome of complaints, deadlines, duration, actual return and errors also in confirmed	Unique children / parents and actual date of removal

ID	Zone	Current outstanding documents / acquisition needs	Actual control and accuracy number limitations	Case / person / e required power coupling;
			cases. 358 complaint decisions, 88 fully/partly altered/annulled; version breaks and denominators retained. See ungdomskriminalitet snaevn-2019-2025.md/.json. Not published exactly in the sources read: 2019 resubmissions, a complete court-outcome series, unique children/parents and complaint-linked actual return-home dates. A precise case-record/person request is set out. Remaining original verification: other detailed tables and Ungekriminalforsorgen's independent supervisory/accountability sources.	

Residues must not be mixed together

The 15TaskForce sequences without an obtained analysis/status original constitute a specific public source/access gap with municipal/archive trails, not merely a person-linkage gap. There are also separate missing phases, e.g. København 2018, Odsherred 2021, Fredericia's introductory phase and Tårnby's introductory phase, where later originals have been read. By contrast, the known readable Egedal 119 pages, Frederikssund adult 133 pages, Sorø adult 119 pages and Nordfyn adult 103 pages are completed. The central Frederikssund child analysis 2021 remains a different original requirement.

A read original may miss exact figure cells, a submitted form or an explanation of an internal sum deviation. These values can only be closed at the back of the data, not by constructing numbers from rounded percentages. National staff / staff / parent numbers and actual return, delivery, payment and intervention time after detected errors require documented case and person couplings. No request has been sent.

Broad catalogue areas such as all the Ombudsman's individual cases and all the National Audit Office's special reports constitute further scope for full registration. They are not described as completed solely through annual series or catalogue titles. The specific completed annual tables and case chains are shown above and in separate modules.

30. Main conclusions and concrete requirements

Known breaches require effective protection and liability

The report documents serious and repeated failures in the exercise of public authority. It documents also concrete loss of contact, help, freedom, support, privacy and bodily self-determination; and institutional knowledge of major problems. It carries a sharp criticism of the interventions and of the controls. knowledge: the citizen's right must actually be protected and restored.

The criticism can be advanced without inventing a national victim total. Appeal cases, selected studies, judgment courses and specific citizens have different denominators. The delimited findings stand independently: 45.022 overturnings among 150.345 municipal appeals considered on the merits in 2018-2024; at least one measured breach of law in 69 per cent of 3.148 selected children's first placement courses in 2022-2024; an unlawful record-keeping practice known and accepted centrally; ministerial correction of insufficiently reasoned supervision; and international criticism of the scope of police-complaint investigations. None of these figures is a national count of placements lacking legal authority or proven criminal offences. [Chapters 1, 3, 7, 15 and 28]

Denmark's responsibility encompasses the act, its continuation and the response after knowledge. A subsequent closure of oversight, remittal for reconsideration or new decision does not on its own document actual cessation or redress. For children, both the legal decision chain and physical separation must be followed, including contact provided and assistance with reunification. Time can change relationships and possibilities for responsibility; it must be included as part of the loss of rights. [Chapters 18 and 28-29]

Relief from liability shall be documented and tested;

The report identifies unlawful administrative exemption practices, limits on personal financial liability, reporting protection, a specific statutory fine exemption and actual obstacles to sanctions caused by delay. These mechanisms have different legal consequences. They must be examined on their precise basis and not hidden within a collective term of immunity. [Chapters 26 and 28]

Absence of an individual conviction does not exempt the State from responsibility. The original intervention, the authority's duty to protect, the effective investigation, the remedy and redress must each be assessed separately. In cases of serious State ill-treatment, a symbolic sanction may be insufficient, and the investigation must be capable of clarifying the incident and leading to accountability. Lack of initial evidence of individual criminal culpability does not answer whether ill-treatment occurred or protection failed. [Chapter 28, PFK02-PFK04]

The comparison with individuals must be conducted through the same concrete action, valid basis, guilt, duration and consequences. The documented private sentence for 37 days of evasion does not require an automatic identical public sentence. It makes it relevant to require a reasoned, verifiable explanation of how a documented public removal or continuation was investigated without valid basis and why liability might not be realised. [Chapters 26 and 28, PU22]

Priority requirements

1. **Termination and protection.** Immediately try every continued intervention with neglected or seriously deficient basis. Take a reasoned decision on temporary protection and check the actual effect.

2. **Effective, independent investigation.** Clarify serious incidents, injuries, authority knowledge and the overall decision and control chain. Secure original evidence before they are lost.

3. **Actual redress with a date.** Follow the decision through to return home, contact, support, treatment, corrected information and payment. Examine separately the consequences that persist after cessation.

4. **Timely location of responsibility.** Examine case handler, management, instruction and supervision according to competence, duty and documented knowledge. Try to continue, gross or repeated neglect and institutional responsibility according to their own rules.

5. **Oversight after an acknowledged error.** Identify affected decisions and document correction completed. New plans and organisational changes must be assessed by their effects on citizens.

6. **A linked account of consequences and responsibility.** Retain each source figure’s denominator and exclusions, link cases and people according to actual documentation, and trace the loss of rights through to redress and accountability.

The requirements shall be linked to the relevant right and competent body. The protection and repair measures that are already sufficiently substantiated must be carried out while further examining separate debts and injuries.

Evidence completion

Documented findings: Specific breaches of law, decisions setting measures aside, authorities' statements about their own knowledge, timelines and international oversight results are given with original sources and locators in the documentation chapters. Chapter 29 gathers evidential chains, documented errors, hypotheses and necessary document requirements.

Further proof: Personal conduct or gross negligence, each cause of injury, certain actual cessation and payment dates and the specific context of international action shall require the original documents specified. A precise deficiency in this link does not alter an independent documented breach of law or an obligation to investigate.

Traceability: Each decisive plea must be capable of being referred back to original proof, applicable rule, competent actor, proven knowledge, action or omission and the consequences of the citizen. A repeat government narrative is not an independent new proof.

The direct legal requirements of the report follow EMRK, relevant UN conventions, national law and applicable State liability rules. R2P and international individual criminal liability require a separate sample of the relevant crime and context links. These additional qualifications shall not delay already durable requirements for protection, investigation and repair.

Denmark must be judged on whether or not known violations are actually halted, investigated and remedied. Documentary institutional knowledge, continued loss of rights and inadequate response can establish a independent State responsibility. The absence of a criminal sentence is not the end of the citizen's demands.

31. Literature and source list

The sources are available in this review up to 7 October 2026. Source codes and locators at the finds identify the tables and sections used. Legal texts, original control reports, research and later reproduction have different evidentiary functions. The list documents the use of the listed sections; a source on the list is not in itself proof of full reading of the entire publication.

Research literature on restoration

Aysel Küçüksu, *Not all responses are remedies: Scandinavian implementation of ECtHR judgments*, International Journal of Constitutional Law 23(3), 800-827, publiceret 15. november 2025, DOI 10.1093/icon/moaf046.

The study examines Scandinavia's unfavourable EMD judgments, conciliation and communication with the Committee of Ministers and combines systematic coding with 28 interviews. The method codes, inter alia, applicants, payments, individual and general actions, as well as the communication of the authorities. The author distinguishes between a reported reaction and an actual remedial action. In Figure 1 and Note 137, 36,8% of the Danish leading cases have been completed with the sole dissemination of the judgment as reported general measures. The figure omits conciliation; otherwise several actions in the same case can be coded in several categories. The proportion is a research result on implementation forms in the population of the study, not an error rate for Danish administration or evidence that each of these cases lacked any individual restoration. § 6.2 reviews the Danish description of Aggerholm as an isolated event and the documented opposition of civil society. Original article § 3, 5-6.3, Figure 1, Note 137.

Use in this report: State commitments, dissemination, legislative amendment, changed actual practice and individual redress each have their own field. The report's own specific inferences are built on original judgments, action plans, follow-up reports and verifiable consequences. The ECtHR account's 16 closed and eight open cases can therefore coexist with, but must not be confused with, the research finding on implementation.

Bibliographic verification: The journal issue is labelled July 2025, while the article itself was published on 15. November 2025. The report must retain both dates and not present the November article as publicly accessible knowledge in July. The full bibliography is placed after the main conclusion in the combined report.

• **D25S:** Social area 2025 and comparison 2024.

• **D25B:** Children's disability area 2025 and comparison 2024.

• **D25V:** Adult disability area 2025 and comparison 2024.

• **D26L:** Read guide 23 June 2026, page 1-3.

• **P24:** Practical examination of penalties in case of non-appearance from offers or interviews, Table 2.1.

• **P16:** Section 7 of the Health and Safety Act concerning incapacity for work, April 2016;, page 29-30.

• **SP24:** Senior Pension Unit complaint cases 2024, page 6.

• **T22:** Case-processing times in the adult-disability sector, 2022, methodology page 6, case trajectories pages 33 and 44-45.

Primary chain: Ankestyrelsen's register → dated annual statement/count → the specific table row above → our addition of amended and remitted. Danmarkskort: Ankestyrelsen's appeals determined on the merits → the ministry's specific map; activity data come from another register chain and another year. Samples: selected original records → Ankestyrelsen's case review → assessed hypothetical appeal outcome. Without case linkage, none of these chains gives a count of unique injured individuals or personally criminally responsible employees.

National appeals statistics found 2006 and 2012

Ankestyrelsen: *Ancillary statistics for the Social Boards 2006*, July 2007, ISBN 978- 87- 7811 - 032 - 9, 19 pp.; all pages read, all seven numbered tables visually controlled. • **PFR06Y**: Patient insurance Statistics 2006, Region South Denmark; the initial link of authority;; archive version 20070905021812; 23657 bytes; SHA256 d99d9750adbb89eb1967c02d71c2e98b42e77d74825e5589898281011fda551e. All four numerical original tables and their column headings read. HTML page; locator section 1-4.

Health: known risk, long review and documented oversight failure

FOB09T: Folketingets Ombudsmand,2009 12-2,*5 ½ years of total handling time at the Health Service's Patient Complaints Board*. Opinion of 22 October 2009, para. 2009- 0031- 400. Official original PDF. All 10 physical pages text read in RAM7 October 2026; printed pages 1-9 plus printed cover page. Official text page.

SSTAM13: Danish Health Authority,7. May 2013, case no.5-441-554/1,*The Danish Health Authority's handling of the case concerning specialist Arne Mejlhede*. SUU 2012-13, annex 290. Official PDF, official HTML text. The entire 8-page text reproduction read; the dates in the table on p.4 read from PDF text with page markers. No graphical or visual check is attested.

FOB10J: Folketingets Ombudsmand,25 October 2010, j.nr. 2008-2276-420,*Hospital doctors' medical records*, FOB 2010- 4-4. Official original PDF. All 13 physical pages of text read in memory on October 7, 2026; printed 1-12 plus printed cover page. Criticism, concrete statements by the authorities and the legal distinction between responsibility and control have been independently verified in the original.

Data Protection Agency 2006-2017: historical public control figures

Data Protection Agency, Annual Reports 2006, 2007, 2008-2009 and 2010-2017. All original statistical tables are read; exact URL and printed pages are in each row. Official publication directory.

National tax law: original knowledge of guarantee breaches and waiting time in 2006-2007

• **LSRFOB07:** FOB 2007.525, Final Report on 40 actions brought by the National Tax Court,176 physical PDFs pages. In this module, PDF1-4,9-10,91-94,97-101,110-118 and 134-139 content is controlled; the total time distribution of PDF98 is visually controlled in memory. No full reading of 176 pages or individual underlying tax acts is claimed. The original and original images are not stored locally.

Taxes 2009-2012: original outages, hidden changes and actual waiting time

• **FXTAX01** EMD, Ferrazzini v. Italy [GC], 44759 / 98,12 July 2001, § 25-31; legal basis before the period, no new Danish incident. Original judgment.

• **FXTAX02** ECtHR, Vegotex International S.A. v. Belgium [GC],49812/09,3. November 2022, introduction and Article 6's criminal review; international legal basis, no Danish event. Original judgment.

• **LSRH11** National Tax Court, Annual Report 2011. 30 physical PDFs pages; actual reading delineation in the module's numerical annex. Archived official original.

• **LSRH12** National Tax Court, Annual Report 2012. 31 physical PDFs pages; actual reading delineation in the module's numerical annex. Archived official original.

National Tax Tribunal 2006: administrative outcomes, hidden findings in parties' favour and actual waiting time

LSR06O. National Tax Court, Annual Report 2006,64 pp. Historical official address: http://www.skm.dk/public/dokumenter/landsskatteretten2006.pdf. Public Archives, capture 20070630025107.589878 bytes; SHA256396a84fdb6177929c5614c1786010f420a1b33dc022a8865820ea2615096e2. Physical and printed pagination are the same. All its own tables, the original rules of the denominators and the locators can be found in the National Tax Court -2006- original -tal.json and the National Tax Court - 2006- original -tables .md.

National Tax Law 2007, 2008 and 2013: actual original access after 2006 - found

Public historical records: CDX with documented hosts / filters in table above; old official annual report page, capture 20070108152045. Folketingets ODA Document Register, title / annual filters specified above. All notices have been made in memory. Only its own compact results and method boundaries are saved, no complete public source extraction.

2013: official annual report, FT SAU 20131 annex 196, all pp.1-16 read as text in this review; pp.5/8/9 contain the existing statistical and target tables. No new visual pixel check; the original is not stored locally. Evaluation of the tax complaints structure, FT SAU 20171 annex 209, only the specific methodology check on 37-38 in this delivery. The Auditor General's follow-up memorandum of 6. May 2010, p. 3. No percentage reproduced secondarily has been back-calculated into an alleged original count of administrative successful claims.

National Tax Law 2007: documented management knowledge, leisure time and process changes

• **LSRLEAN07** National Tax Law, 22 February 2007, *Group project to reduce the duration of proceedings in the National Tax Court (mid-term report)*31 pages. Historical official original. All 31 pages of text read in RAM, PDF9 / 26 / 28 / 29 visually controll.263005 bytes; SHA256 a5b39cfd391001a59c65ca662080117092b48d9b8d5ae4ad3674e6a342ad0968.

• **LSR06O-GEN** 2006 annual report's hashdentical official re-publication.64 pages; new identification pages 1-3 read; other actual reading in the LSR06O module. SHA256 396aa84fdb6177929c5614c1786010f420a1b33dc022aa8865820ea2615096e2. No new statistical population.

• **LSRWRITE07** Writer Guide 2007, Historically official tester.28 pages; only 1-3 actually read for delimitation. HA256 3d8b047b11d5669432fb53f7ff0592e1717c86b5cf3b0b32c0b7f99a5e59df39.

• Public archive metadata, CDX,7. October 2026: domain queries landsskatteretten.dk, lsr.dk, skatteankestyrelsen.dk,status 200 and MIME PDF/Word/spreadsheet/binary, all names, collapseURL.41/1/121URL occurrences; metadata alone without original-content evidence.

Tax appeals:outcomes, hidden remittals for reconsideration and time

Skatteankestyrelsen, original case statistics 2014-2025, individual URLs and PDF pages above; official publication list.

The Refugee Board: decisions, cases concerned and waiting period 2006-2025

The original URL and page number of all annual reports are at the individual row. The compact JSON retains denominators, device, methodical breakage and unbalanced source differences. The document shall be annexed and the data base shall be included in the overall report; its total list of literature and sources shall be placed at the end.

EMD decisions: full public register and person count

ECtHR, HUDOC, original decisions individually identified above. Sources have been read in memory; the data file retains our compact metadata and document identifiers. The register date is the adoption date. Klein explicitly shows why public notification date and adoption year must be retained separately.

EMD: finality, implementation and actual restoration

EMD, HUDOC-EXEC, all Danish document metadata, extracted 7.10.2026; original resolutions, identified in the table. Ministerial Committee, Annual Report 2025, p. 67. Official Committee of the Ministers Denmark-factaark, updated 11.6.2026, p. 4-9.

Greenland 2013: State's full response, lack of control and concrete guarantees

Council of Europe / CPT and Danish Government (2013): *Response of the Danish Government to the report of the European Committee for the Prevention of Torture and Inhuman or Degrading Treatment or Punishment (CPT) on its visit to Greenland from 25 to 27September 2012*, CPT / Inf (2013) 11, Strasbourg 3July 2013,31 physical pages. Official document reference; public archive copy of official original, 6November 2013. All statistical rows and sections of response have separate sidecomers above. The source section is placed in the final bibliography of the overall report.

UPR 2026: the entire original basis, Denmark's knowledge and compliance

• **UPR26-WG** UN, A / HRC / 63 / 10,10 July 2026,26 pages, all actually RAM text read. FN symbol. Read copy of the UN original.

• **UPR26-NAT** UN, A / HRC / WG.6 / 52 / DNK / 1,20 February 2026,21 pages, all actually RAM text read. SHA256 01d83c4865c0d9c79e8c8ade2a083c22532a307569e6214893c8c249d5307b6a. Final national report.

• **UPR26-UN** OHCHR,A/HRC/WG.6/52/DNK/2,6. February 2026,10 pages, all actually read as text in RAM. SHA256 053247cf58523cdd2bb87e0d1d900f1fd6122a86a9b58ed64023a8fe9bea252b. Treaty compilation.

• **UPR26-CSO** OHCHR,A/HRC/WG.6/52/DNK/3,28. January 2026,10 pages, all actually read as text in RAM. SHA256 316c173caa355c1a72782c27b0a70c2563b286a421539cab76bce38e200f3a1c. Stakeholder summary.

• **UPR26-MOEDE** UN automatic meeting transcript,63rd session,28th meeting,25. September 2026,1:51 segment and 2:27:41;not an official record. Meeting transcript with source limitation.

• **UPR26 ADD ACCESS** The symbol view of the answer document; the embedded API provided error page at the control 7 October 2026. Not read as a reply.

Children cases in Copenhagen: from error figures to actual interventions

• **KK17** Copenhagen Citizens' Adviser,24. May 2017, *The quality of case handling and exercise of authority at the Children and Young People Citizens' Centre*,126 pages. Pp.6-8 overall result;12-14 sampling and verification;21-24 support/accompanying-person rights;66-69 specific matters and follow-up;74-75 previous oversight. Original report. Same original as R03; no new statistical population through the additional source ID.

Remittal for reconsideration, actual return home and interim protection

• **HG01:** Order of the Supreme Court 3 November 2025, BS-28216 / 2025 -HJR, original, 10 pages, the entire order checked; time calculations made from the specified dates. Order for suspension of effect on the placement of a Faroese child.

• **HG02:** Appeals Permission Board, leave granted 8. May 2025, public announcement 9. May 2025, case nos.25/10144 and 25/10519. On suspensive effect in a case concerning placement of a Faroese child in Denmark.

• **HG03:** Decision of the Appeal Board of Appeal C-5-99, KEN No 9414 of 15 July 1999, original, 2 pages, both sides controlled; historical source of rules outside the counting period. C-5 / 99 on the abolition, return and subsequent aid.

• R07-R11 refer to the coded original sources on remittal for reconsideration, the Children's Act, *Strand Lobben*, oversight of return home and liability for damages in the report's final bibliography and source list.

Children's contact, freedom and actual repatriation: three documented steps of government

• **BK-K01:** Folketingets Ombudsmand, FOB 2018- 26,4 July 2018, j.nr.17 / 05145,15 pages. The entire original opinion has been checked. Original.

• **BK-K02:** Folketingets Ombudsmand, *Inspection of the secure institution Egely - follow-up*,12. April 2011, case no. 2007-3697-628/PK3,42 physical pages. The information used about confinement and authorities' assessments is on printed pp.35-40, physical pp.36-41; the institution's activity information is in the section on duration of stays. No new review of all private reports in the case has been carried out. Original.

• **BK-K03:** Folketingets Ombudsmand, FOB 2018- 33, original opinion 7 November 2018, j.nr.17 / 00750,36 pp. The whole of the opinion and its presentation of the case have been checked. The legal rules applied are the historical rules set out in that opinion. Original.

• **BK-K04:** Criminal Code, consolidated Act LBK871 of 4. July 2014,§ 263. Historical statutory text delimiting acts involving communications; a specific criminal case requires checking the version of the law at the time of the act. Original.

Concrete action: separation time, citizens' consequences and responsibility

• **IF01** Court of Impeachment, judgment 13. December 2021, pp.112-118(families, times and reproduced primary documents),138-142(violations and responsibility),145-149(sentence). Original judgment.

• **IF02** The Prime Minister, 23 March 2023, decision to revoke disciplinary warning, 4 pages. Original decision.

• **IF03** The interview management, 10 February 2023, *Report and recommendation on the occasion of an official inquiry against Chief of Police Thorkild Fogde*, published Part 8,16 pages. Original excerpt.

• **IF04** The Ministry of Justice, March 2023, decision to revoke disciplinary reprimand for Johan Legarth. Original decision.

• **IF05** The Ministry of Justice, 24 March 2023, the employment law follow-up, later the CMS update date of 2 October 2025 on the same page, using the decision process 2022-2023. Notification by the Ministry.

• **IF06** Folketing, Report 24,8 July 2022, *Report on the report of the minkkommission*.30 physical pages including cover page. Parliamentary original.

Tibet: illegal censorship, misleading information, lack of material and delayed liability

TB01. Tibetan Commission I, *Report*, 2017, Volume 2, Chapter 4, printed p. 351-375; physical PDFs p. 9-33 are checked in context. Volume 1 is a reference to the first report, not to claim full reading of all annexes.

TB02. Tibetan Commission II, *Report*, 2022, Volume 1, printed pp. 25-47 and 99- 106, and Volume 2, contiguous pp. 1110-1138, Section 9.7 and Chapter 10. Locators are for printed page numbers. Public reporting is also documented in Notification by the Ministry of Justice of 28 March 2022 and Folketingets Annex 209;.

TB04. Eastern High Court, judgment of 29. October 2025, S-3118-23, Judgment Database, case 10805, full original judgment, pp. 1-21, and the register's indication of finality. The displayed ECLI DK:OLR:2026:SS0000000020 has the year 2026, but the judgment's own date is 29. October 2025; the publication identifier's year does not change the judgment date. Underlying District Court judgment: 1. November 2023, SS 3-12715/2022.

TB05. The Danish Parliament, Report No 1 of 17 May 2023 on the treatment of certain aspects of the Tibetan Commission II Report, 2022 / 2 BR 1, entire original, five PDFs pages.

TB06. Ministry of Foreign Affairs, Opinion on Tibetan Commission II, 1 April 2022, the Ministry's decision on Martin Bille Hermann. Ritzau is a distribution channel; the sender is the Ministry of Foreign Affairs.

TB07. The Copenhagen Police Department, compensation to offenders in Tibetan case, 18 April 2018;, initial regulatory notice of eight requirements, offers and three obsolete requirements.

TB08. The Public Prosecutor's Office Police officers continue to be charged with false explanation in court, 28 April 2022, subsequent procedural decision. The final decision is TB04.

The settlement procedure: non-compliance with the Convention, delay and liability until 2026

• [SL01] Stateless Persons Commission (2015), *Report*, volume 9, particularly printed pp. 2736-2747, 2752-2755, 2785-2796, 2809-2813, 2822-2828 and annex 18 pp. 2993-2997. Original volume 9. The decisive case rows, refusal/delay annexes and responsibility sections used have been checked; the entire nine-volume report is not described as fully read.

• [SL02] Stateless Persons Commission (2015), *Report*, volume 8, the commission's case review and table of contents. Original volume 8. The judgment's summary is only a secondary link relative to the commission annexes used.

• [SL03] The Ministry of Foreign Affairs, Integration and Housing, 21 December 2015, Closure of the Claes Nilas case.

Specific protection against sanctions in healthcare incident reporting: scope, time and the citizen's accountability track

[UTHP03] Law 429 of 10.6.2003 on patient safety§ 4-7. Primary public text, the paragraphs listed checked in the web source; historical PDFaddress gave 404 and is not used as a reading certificate.

[UTHP08] Health Act consolidation 95/2008,§§201-202 and 277. Primary provision text checked; the transitional wording is also in the official PDF edition. No attestation of the consolidation Act's other content as a whole.

[UTHP11] Guidance 1 of 3.1.2011 on reporting,8 physical pages. Sections 2/3/4/5/6/7/8/9/11 on the relevant physical pages 1,3-7 read in RAM, particularly the sanction boundary and information duty at PDF6. Historical guidance, not automatically current reporting requirements.

[UTHP20] Act 1855 of 9.12.2020,all 4 pages read as RAM text;section 1 nos. 4-5 and section 5. Enacted legislation; the earlier bill L129 is not equated with enactment.

[UTHP25] Health Act, consolidated Act 275 of 12.3.2025,58 physical pages;checked§§ 200-202 at PDF43, not the entire Act. Later amending Act 406 checked separately.

[UTHP25A] Act 406 of 29.4.2025, all 2 pages read as text in RAM;§ 1 and§ 4. Transfer and entry into force 1.5.2025; the sanction rule in§201 is not repealed by this Act.

Private child abduction: original judgment, criminal claim and legal basis

• **PB01:** Original judgment of the City of Copenhagen 16 January 2017, SS1 -23445 / 2016, all 3PDF pages read; penalty order 1, message deficiency 2, justification and acquittal 3. The court database's registered case number SS-2345 / 2016-KBH is not the original number; the original number is used in the text.

• **PB02:** Original additional note 30 January 2017, all 6PDFs pages read. Explains reconstructed on the basis of sound recordings; in particular 2-5.

• **PB03:** Østre Landsret's original judgment 7. June 2017, S-218-17, all 5PDFs pages read; legal qualification 3-5 and acquittal 5. Public Case metadata indicates finally and connects the city / country law; metadata is not independent proof of the facts of the explanations. The year of publication 2022 is not the year of judgment 2017.

Private evasion 2022: actual punishment, time and the Authority's created situation

• **PU22:** Original combined judgment document AM 2022.06.16V, Prosecution Service knowledge base, all six pages read in memory. District Court judgment 31. March 2022,13-11239/2020, physical PDF1-4; High Court judgment 16. June 2022, S-0833-22, physical PDF5-6. The family-law decision of 10. July 2020 is reproduced at physical PDF2; obtaining the complete separate original is a specified investigative step.

Judicial review: revision, declaration of judgment and effective action

• **DSK01** The Special Board of Appeal, *On the Special Complaint Court*, official statistics 2020-2025, updated 19 June 2026, section "Statistics." Original public table,. The usual court address gave 403; the same content of the official publishing host has been checked.

• **DSK02** Nielsen, Gorm Toftegaard (2021). *Resumption of criminal proceedings in Denmark*. In Swedish Juristtidning, p.538-559. Statistics s.552, Physical PDF page 15, footnotes 16-19. Original research article. The 2020 row of the source overlaps with DSK01.

• **DSK03** The Act of Law, LBK No 1835 of 15 September 2021, Paragraphs 48-50 and the chapter on reopening; source of period. Original historical text. A recent case must be tested against its simultaneous version of the law.

Storage: actual time of liberty, acquittal, isolation and data limits

• **VA01** The Attorney General, *Use of long-term pre-trial imprisonment in 2024*, prepared March 2026,13 pages; all pages read, tabular -G checked, graphs historical overlap aligned against previous annual originals. Original 2024.

• **VA02** Director of Public Prosecutions, *Use of pre-trial solitary confinement in 2024*,5 pages; the entire original and all three tables checked. Original solitary confinement 2024.

• **VA03** The Attorney General, *Analysis of the use of detention facilities*.2025,61 physical PDFs pages; method p.4-5, statistics p.21-44 and Annex 2-3-57-60 as well as conclusion / follow-up p.45-54 controlled. All 22 statistical tables, over 300 own compact rows in the register; legal history / Norwegian-Swedish comparison is not used as verified foreign practice. Original analysis.

• **VA04** The Ministry of Justice's Research Office, *Statistics on isolation imprisonment 2018*, p.3, Note 2; the material historical series shall be checked in separate annexes. Original 2018.

Historical care and isolation: original numbers, time and selection

• **LV06:** Ministry of Justice Research Unit, Long-term detention in custody 2006, December 2007. All 21 pages read; Tables 1-19 reproduced and numerically checked, each with locator. The metadata year and publication index 2008 shall be separated from the data year 2006.

• **ISO18:** Ministry of Justice Research Office, Statistics on Isolation Prison 2018, May 2019. All 10 pages read; Table 1-4, s 3 / 5 / 7 / 8; duration / delimitation, s 2 / 5 / 6 / 9. Table 4 visually read from the original in memory.

Historical custody versions 2007-2010 and correction of children's whereabouts

• **LV07:** Original custody report / audit by the Ministry of Justice. The entire original read; tables and methods with locator above.

• **LV08:** Original custody report / audit by the Ministry of Justice. The entire original read; tables and methods with locator above.

• **LV08R:** Original custody report / audit by the Ministry of Justice. The entire original read; tables and methods with locator above.

• **UC0810:** Ministry of Justice Research Office, Remand detention of young people under 18 years: correction 2008–2010, April 2012. All 8 pages read; all 14 tables reproduced, specific denominators and assumptions delimited.

Long-term care 2009- 2010: excluded course, timelimits and evidence fund

• **LV09:** Ministry of Justice Research Office, Long-term detention in custody 2009, November 2010. All 16 pages read; 14 tables; selection and shredded reports especially s 2 / 7 / 11 / 13 -15.

• **LV10:** Ministry of Justice Research Office, Long-term detention in custody 2010, November 2011. All 16 pages read; 14 tables; main denominator 896, broken 67, continuous 829 and cell exclusions in particular s 2 / 7 / 11-15. Legal rules shall be tested against original orders in the individual chain of responsibility.

Isolation: original annual reports, children, time volumes and versions 2006-2023

• **ISO 2006:** Original annual statistics on isolation imprisonment 2006. Methodology, tables, children and longest periods actually reviewed; table / sidecomers above. 2021 is the original DOCX with 2 numerical tables. 2020 version corrected August 2023.

• **ISO 2007:** Original annual statistics on isolation imprisonment 2007. Methodology, tables, children and longest periods actually reviewed; table / sidecomers above. 2021 is the original DOCX with 2 numerical tables. 2020 version corrected August 2023.

• **ISO 2008:** Original annual statistics on isolation imprisonment 2008. Methodology, tables, children and longest periods actually reviewed; table / sidecomers above. 2021 is the original DOCX with 2 numerical tables. 2020 version corrected August 2023.

• **ISO 2009:** Original annual statistics on isolation imprisonment 2009. Methodology, tables, children and longest periods actually reviewed; table / sidecomers above. 2021 is the original DOCX with 2 numerical tables. 2020 version corrected August 2023.

• **ISO 2010:** Original annual statistics on isolation imprisonment 2010. Methodology, tables, children and longest periods actually reviewed; table / sidecomers above. 2021 is the original DOCX with 2 numerical tables. 2020 version corrected August 2023.

• **ISO 2011:** Original annual statistics on isolation imprisonment 2011. Methodology, tables, children and longest periods actually reviewed; table / sidecomers above. 2021 is the original DOCX with 2 numerical tables. 2020 version corrected August 2023.

• **ISO 2012:** Original annual statistics on isolation imprisonment 2012. Methodology, tables, children and longest periods actually reviewed; table / sidecomers above. 2021 is the original DOCX with 2 numerical tables. 2020 version corrected August 2023.

• **ISO 2013:** Original annual statistics on isolation imprisonment 2013. Methodology, tables, children and longest periods actually reviewed; table / sidecomers above. 2021 is the original DOCX with 2 numerical tables. 2020 version corrected August 2023.

• **ISO 2014:** Original Annual Statistics on Isolation Prison 2014. Methodology, tables, children and longest periods actually reviewed; table / sidecomers above. 2021 is the original DOCX with 2 numerical tables. 2020 version corrected August 2023.

• **ISO 2015:** Original Annual Statistics on Isolation Prison 2015. Methodology, tables, children and longest periods actually reviewed; table / sidecomers above. 2021 is the original DOCX with 2 numerical tables. 2020 version corrected August 2023.

• **ISO 2016:** Original annual statistics on isolation imprisonment 2016. Methodology, tables, children and longest periods actually reviewed; table / sidecomers above. 2021 is the original DOCX with 2 numerical tables. 2020 version corrected August 2023.

• **ISO 2017** Original annual statistics on isolation imprisonment 2017. Methodology, tables, children and longest periods actually reviewed; table / sidecomers above. 2021 is the original DOCX with 2 numerical tables. 2020 version corrected August 2023.

• **ISO 2019:** Original annual statistics on isolation imprisonment 2019. Methodology, tables, children and longest periods actually reviewed; table / sidecomers above. 2021 is the original DOCX with 2 numerical tables. 2020 version corrected August 2023.

• **ISO 2020:** Original annual statistics on isolation imprisonment 2020. Methodology, tables, children and longest periods actually reviewed; table / sidecomers above. 2021 is the original DOCX with 2 numerical tables. 2020 version corrected August 2023.

• **ISO 2021:** Original annual statistics on isolation imprisonment 2021. Methodology, tables, children and longest periods actually reviewed; table / sidecomers above. 2021 is the original DOCX with 2 numerical tables. 2020 version corrected August 2023.

• **ISO 2022:** Original annual statistics on isolation imprisonment 2022. Methodology, tables, children and longest periods actually reviewed; table / sidecomers above. 2021 is the original DOCX with 2 numerical tables. 2020 version corrected August 2023.

• **ISO 2023:** Original annual statistics on isolation imprisonment 2023. Methodology, tables, children and longest periods actually reviewed; table / sidecomers above. 2021 is the original DOCX with 2 numerical tables. 2020 version corrected August 2023.

• **ISOLOV06:** Act 1561 of 20. December 2006 on pre-trial solitary confinement,§1 no.3/6/7. The amending provisions' requirements concerning children and time limits; compared with the Director of Public Prosecutions' Notice 4/2008, section on persons under 18.

Long-term care 2019: original control findings and separate annex reproduction

• **LV19:** Original statement by the Advocate General of 30 November 2020, all four pages read in the official HTML reproduction; in particular, definition p. 1, definition p. 2 and omitted references / method p. 3-4. Original PDF address.

• **LV19B-G:** Public transcription of REU Annex 244, document 901387, section "Annex 1. Statistics on the use of long-term detention in 2019," all 16 pages reproduced; identified original supporting documents;. The figure of the Annex is secondary checked, not materially controlled in the original.

• **LV19-register:** Folketinget's original document register, document 901387 with file relations, forwarding date 12. March 2021, statement file 1523121 and annex file 1523116. Register identification is not reading of content.

• **LV18 register:** Original Folketing Document Register, Document 789586, transfer 25. September 2019; reattachments in original Answer to REU question 655, document 853609. Statement, 8 pages and Annex, 15 pages identified; material image reading missing.

LV 2018: full original, children, outcomes and internal number differences

Rigsadvokaten (2019): *Use of long-term pre-trial detention 2018*,17. September 2019, RA-2019-2100105-2,8 pages, and statistical annex 15 pages. Folketinget, originally REU 2018-19(2nd session) annex 113, resubmitted REU 2019-20 question 655. Original report, original annex, public archive copies from 28. June 2024 with links above. The specific outstanding source for 2019 is original annex 2353614; the actual reproduction is PolSpy 901387. The source section is moved to the full report's final literature/source chapter.

Criminal services: intervention, amended decisions and health errors without national registration

• **KF15:** Statistics 2015, revised edition, PDF32 -38,48 -51; tables 5.1 -5.10,7.6,8.1 -8.2. Magtabel 5.10 indicates revision 7 September 2016.

• **KF23:** Statistics 2023, original, PDF4-5,37-46,53-56. Table 8.2 PDF56 also visually controlled; superwriting footnotes are kept separately.

• **KF24:** Statistics 2024, web-accessible original, PDF4-5,36-46,53-56. Another public original version, PDF4,54-56: the same checked methodology/court figures. Both originals' methodology on page 4 gives early April 2024 as the data-basis date for the 2024 statistics; this has not been silently corrected to 2025 and requires clarification by the authority.

• **KFA:** Current statistical table of the Authority, actual links read in memory October 7, 2026. The controlled inventory has statistical reports 2015- 2024; its demarcation is not evidence of a lack of older registrations.

• **KFL24:** Law 661 of 11 June 2024, § 3 and § 10, paragraph 1 / 6, § 11, original PDF5-7 actually read.

• **KFUTH25:** Original reply of the Minister of Justice to REU1157,23 June 2025, all 4 pages read through public PDF view; in particular 2-3. ODA document 1173975 identifies the same original file 3044774; 2025-06696, dok.3742259.

• **KFUTHREG25:** Executive Order 420 of 29. April 2025,§ 2, nr.3,§ 3-5; content checked in the original public display.

• **KFDT25:** Original decision of the Data Protection Agency 10 July 2025,2024- 432- 0030, the decision's 1-4 actually read; not an independent new victim register on top of the Data Protection Agency's year.

The original action and trial tables of the Department of Investigation

• **KF 2015** Original 2015; the tables shown above.

• **KF 2023** Original 2023; the tables shown above.

• **KF 2024** Original 2024; the tables shown above.

Proprietary custody: all controlled years, durations and consequences of Justitia/ The 2025 Study of the Lawyer Society

Schultz-Knudsen, Mikele and Eiriksson, Birgitte Arent / Justitia and the Danish Bar and Law Society(2025). *Remand detention - Legal safeguards before judgment*. Contributions by Rabia Kubra Güler, Lukas Garly and Anna Hebo Torp Henriksen. ISBN9788797248942. Published 28.10.2025.
Originalhttps://justitia-int.org/wp-content/uploads/2025/10/Rapport_varetaegtsfaengsling-retssikkerhed-foer-dom_web.pdf. Main locators:pp.16-17,48-49,67-99,101-104,158-169,180-185,198,209-211. Actor:authors/organisations; statistics supplied by the Director of Public Prosecutions, DST and the Prison and Probation Service. Document ID:Rapport_varetaegtsfaengsling-retssikkerhed-foer-dom_web. Follow-up:implementation not documented; three specific official judgment chains subsequently checked in a separate module; other original judgments and most actual payment dates remain missing.

Remains: unique persons across the years; full publication of the underlying selected 2024 material; 2024 non-indictment; phase cessation and actual payment in the individual claims; precise numerical questionnaire values and question specific denominators. None of these shortcomings renders the tables already checked unread; they must be indicated locally in the question concerned.

Maintenance, work and family life: primary research and controlled source chain

• Wakefield, Sara and Andersen, Lars Højsgaard (2020). *Pretrial Detention and the Costs of System Overreach for Employment and Family Life*. Sociological Science 7:342-366. DOI 10.15195/v7.a14. Original pp. 346-352, tables 1-3 pp. 354-358 and discussion pp. 361-363. Original article: https://sociologicalscience.com/download/vol-7/august/SocSci_v7_342to366.pdf. Document ID: SocSci_v7_342to366. Actor: researchers using Danish register data. Knowledge point: publication 17. August 2020. Population: 75.187 cases, 50.446 men, 1995-2010. Follow-up: three years after release/judgment; no verification of individual compensation.

• ROCKWOOL Foundation (2020). *Innocent people lose their job after custody.*, June 2020, p. 1-3. https://rockwoolfonden.s3.eu-central-1.amazonaws.com/wp-content/uploads/2022/08/RFF-NYT-Uskyldige-mister-jobbet-efter-varetaegtsfaengsling.pdf? download = true. Research dissemination of the same survey, not an extra cohort. The chapter's used page 1-4 has been read; other research references in the booklet are not included as verified findings here.

• Schultz-Knudsen, Mikele and Eiriksson, Birgitte Arent / Justitia and the Bar Society (2025). *Preservation of custody - Legal certainty before judgment*, printed p. 12. https://justitia-int.org/wp-content/uploads/2025/10/Rapport_varetaegtsfaengsling-retssikkerhed-foer-dom_web.pdf. The reproduction is checked against the original above; the comparison group should be corrected.

Weight: three original decision chains and time to restore

• **ERVA01** AM 2020.10.15V2. Vestre Landsret, 15.10.2020, S-0338-20; Hjørring 29.01.2020KTN-3496/2019; RA29.05.2019RA-2019-3100206-105; SAV21.03.2019SAV-2018-3100101-1068. Official compilation 21 pages, document ID57 cb 5635-11 ed-4 edb-9 ac 0-d 6 a 767 ef 674 d, URL above. Actors: police, District Court, High Court, Regional Public Prosecutor, Director of Public Prosecutions. Knowledge/follow-up dates appear in the timeline. Person deduplication: one E, several decisions. Actual payment unknown.

• **ERVA02** AM 2010.02.25V2. Vestre Landsret 25.02.2010S-1566-09; Aalborg 25.06.2009 nr.12-5016 / 2008; RA24.06.2008RA-2008-521-2206; SA27.02 / 06.03.2008SA4-2007-521-0998. Official composition 9 pages, document -IDf 0 f 12061-d 096-4 c 8 a -a 2 f 8-3 ca 5 cc 95 ca 25, URL above. Scope: one citizen, one child mentioned in the reproduced interview. Follow-up: administrative and legal retention; not documented further review.

Denmark's knowledge, positive commitments and actual responsibility

• **PFK01** The European Convention on Human Rights, in particular Articles 1, 2, 3, 8 and 13 thereof. The application and historical scope of the provision shall be tested in concrete terms. Original Convention.

• **PFK02** The United Nations Committee on Torture, CAT/ C / DNK / CO / 8, adopted 22 November 2023, published 8 December 2023. Points 40 to 41: complaints against the police, few charges, clarification of ill-treatment and scope of the mandate. Official document number. Checked original text.

• **PFK03** The Secretariat of the EMD, *Guide on Article 3 of the European Convention on Human Rights*, updated on 31 August 2026. Points 123- 140 and 150- 155. Guide to practice, not an independent binding judgment. Original Guide.

• **PFK04** EMD, *Gäfgen v. Germany*, Grand Chamber, 1 June 2010, No 22978 / 05. Paragraphs 88-89 and 123-125. Original judgment.

• **PFK05** Ministry of the Interior and Health, letter to the Municipality of Langeland of 29 May 2026, j.nr. 2025-11404, in particular pp. 14-16. Original letter.

• **PFK06** Folketingets Ombudsmand, 2010-4-4, *Hospital doctors' medical records*, 25 October 2010, in particular p. 1-2. Original opinion.

• **PFK07** Criminal Code, consolidated Act no. 1294 of 7. November 2025, §§ 81, no. 8, and 155-157. Historical acts are examined under the rules in force at the time and transitional criminal-law rules. Statutory text.

• **PFK08** Liability for Damages Act, Consolidation Act no.266 of 21. March 2014, particularly §§19-20 and 23. Historical primary version; the applicable version must be tied to the harm. Original statutory text.

• **PFK09** The Health Act, Legislative Decree No 248 of 8 March 2023, § 201- 202. Compare with the historical UTH sources of the report and the enlargement with effect from 1 January 2021. Legal text.

• **PFK10** Act no. 722 of 1. September 2026 on the compensation scheme concerning the contraception case in Greenland, sections 4 and 16. Supplement after the main period. Original statutory text.

• **PFK11** EMD, *Strand Lobben and Others v. Norway*, Grand Chamber, 10 September 2019, No 37283 / 13, paragraphs 205, 208 and 212. Original judgment.

• **PFK12** UN International Law Commission, *Articles on Responsibility of States for Internationally Wrongful Acts*, 2001, Articles 2, 4, 7 and 30-31. Source for the structure of State responsibility rules; status and application are examined according to the relevant rule. Original collection of articles.

Cross-cutting evidence and documented consequences

• **L01** Mølholt,Anne-Kirstine; Søegaard,Emma Hoff; Andreasen,Asger Graa (2025). *Placement without consent - A collection of knowledge*. VIVE. e-ISBN978-87-7582-406-9. Main findings pp.6-10; methodology pp.20-22,87-94. Original report.

• **L02** Lausten, Mette; Kloppenborg, Hans Skov; Engbo, Amanda; Iversen, Katrine (2023). *Targeted support for parents with children in care. Final evaluation*. VIVE. ISBN978-87-7582-143-3;133 PDF pages. Sections on population, before/after results and interview sample checked against the original, pp.80-87,110-115. Original report.

• **L03** Lausten,Mette; Iversen,Katrine; Andreasen,Asger Graa (2023). *Well-being among children and young people in vulnerable positions 2023*. VIVE. ISBN978-87-7582-237-9. Sections on contact, involvement and methodology checked against the original, pp.101-108,135,141-143,163,168-169. Original report.

• **L04** Folketingets Ombudsmand, FOB 2018- 26, case for verification of 14- to 15-year-old communications. The entire 15 pages of the original are checked; the specific chain of time and evidence is in BK01. Original opinion.

• **L05** Datatilsynet,30. January 2024, *Datatilsynet issues an order in the Chromebook case*,case no. 2023-431-0001, decision and statement of the case. Original decision.

• **L06** Data Protection Agency, September 2022, *Hørsholm Municipality fined 50.000 DKK.*, reported break 2019. Notice of the supervisory authority.

• **L07** Government,2024, note on submissions in ECtHR application 46571/22,*Abdulaal Naser and Others v. Denmark*, REU 2023-24, annex 174, pp.1-5. Original government note. The note is a litigation position. The expanded Green Desert analysis also uses the Supreme Court's complete original judgment and the ECtHR's later decision, with separate locators.

• **L08** Wakefield, Sara; Andersen, Lars Højsgaard (2020). *Pretrial Detention and the Costs of System Overreach for Employment and Family Life*. Sociological Science 7: 342-366. DOI10.15195 / v7.a14. Population / method p.346-350; social outcomes p.352-358, Table 2-3. Original Article.

• **L09** Schultz-Knudsen, Mikele; Eiriksson, Birgitte Arent (2025). *Pre-trial detention - Legal safeguards before judgment*. Justitia/Advokatsamfundet. ISBN9788797248942. Methodology pp.16-17,68,101-104; all checked statistical tables pp.67-99. Original report.

• **ERVA01-ERVA03** Official Chambers of the Public Prosecutor's Office AM 2020.10.15V2, AM 2010.02.25V2, AM 2022.10.17E. All 21,37 and 9PDFs pages read. Original administrative decisions and judgments, URL and grounds can be found in the module *Product weight: primary the course of compensation and actual restoration;*.

• **KEN9536/2021** Board of Equal Treatment,17.6.2021, case no.19-16769. The original's 15 PDF pages read; proportionality and favourable finding on printed pp.12-14. Original decision.

• **LV11-LV23** The Director of Public Prosecutions' original reports on prolonged remand detention and corrected annual statistics. Original URLs, dates, precise tables and reading scope appear in the module *Prolonged remand detention 2011-2023: originals, annual versions, children and actual end date*.
• **ISO 2006-ISO 2023** Original isolation reports and annual statistics; source and page references, children's programmes, day numbers and version changes are provided in the module *Isolation: original annual reports, children, time volumes and versions*.

• **SL16H** Law on Services, LBK1270 of 24.10.2016. Historical original. PDF9-11 actual text read in RAM; § 48,50,52-54. No full reading of all 50 pages is claimed.

• **SL17H** Law on Services, LBK988 of 17.8.2017. Historical original. PDF9-11 / 16 actual text read in RAM; § 48,50,52-54,68. No full reading of all 47 pages is claimed. The actual decision dates shall be linked to the version in force on that date.

• **SL18H** Law on Services, LBK1114 of 30.8.2018. Historical original. PDF11 / 16 actual text read in RAM; § 52- 54 / 68, paragraphs 1 to 10, with separate verification of seven-day position and a maximum six-month period of repatriation. No full reading of all 52 pages is claimed.

Control source reference key

FN-CRC17 = CRC/C/DNK/CO/5 (2017); FN-CRPD24 = CRPD/C/DNK/CO/2-3 (2024); FN-CAT23 = CAT/C/DNK/CO/8 (2023). Originals and paragraphs are in chapter15. RR18/2024 = Rigsrevisionen's report on Ankestyrelsen's supervision; RR10/2023 = report on the right to diagnostic assessment in child psychiatry.
